Executive Summary

- This report describes COVID-19 outbreaks in K-12 schools that have been reported to the Washington State Department of Health (DOH) during the 2022/2023 school year.
- A total of 262 COVID-19 outbreaks were reported in K-12 schools between August 1, 2022 and November 30, 2022.
- 1201 COVID-19 cases were associated with outbreaks in K-12 schools.
- There may be underreporting of outbreaks due to ongoing limitations of capacity to investigate and report COVID-19 outbreaks in K-12 schools.

Methods

This report was created using information from COVID-19 case data and COVID-19 outbreaks reported by local health jurisdictions (LHJs) to DOH. The investigation of COVID-19 outbreaks to confirm that an event meets Washington State's outbreak definition is time intensive. Therefore, the number of cases and outbreaks reported by a LHJ may change over time as additional details become available.

Definition of a COVID-19 Outbreak in Washington State K-12 Schools

The DOH defines an outbreak in a K-12 school as follows:

- At least 5 cases within a specified core group¹ meeting criteria for a COVID-19 case from a positive test
OR
 - Multiple COVID-19 cases from positive tests comprising at least 20% of students, teachers, or staff within a specified core group;¹
 -
- AND
- The following three criteria are met:
 1. Cases have a symptom onset or positive test result within 7 days of each other,
AND
 2. There is no evidence that transmission was more likely to have occurred in another setting (e.g., household or outside social contact) outside of the school,
AND
 3. Cases were epidemiologically linked² in the school setting or a school-sanctioned extracurricular activity³.

¹ A "core group" includes but is not limited to an extracurricular activity³, cohort group, classroom, before/after school care, etc.

² All groups of 5 cases or 20% within a specified core group that meet criteria 1 and 2 will be presumed to have an epi-link and must be reported to the LHJ as a suspected outbreak. The LHJ will make the final determination for classifying an outbreak.

³ A school- or child care-sanctioned extracurricular activity is defined as a voluntary activity sponsored by the school, local education agency (LEA), organization sanctioned by the LEA, or child care. Extracurricular activities include, but are not limited to, preparation for and involvement in public performances, contests, athletic competitions, demonstrations, displays, and club activities.

COVID-19 outbreaks in Washington State K-12 schools between August 1, 2022 and November 30, 2022.

The following epidemiologic curve shows the weekly count of the 262 COVID-19 outbreaks in Washington State K-12 schools by week of approximate outbreak start date. Reporting of COVID-19 outbreaks and associated cases for the most recent months is ongoing, so the number of outbreaks and associated cases may change.

Cases associated with COVID-19 outbreaks in Washington State K-12 schools between August 1, 2022 and November 30, 2022.

The following epidemiologic curve shows the week of approximate outbreak start date of the 1201 COVID-19 cases that were associated with outbreaks in K-12 schools. Cases from a specific outbreak can be spread out over time, so the cases reported as associated with a specific outbreak may not all have tested positive with COVID-19 or become sick in the same week that the outbreak was reported. Reporting of COVID-19 outbreaks and associated cases is ongoing, so the number of outbreaks and associated cases may change.

COVID-19 outbreaks in Washington State K-12 schools, by county, between August 1, 2022 and November 30, 2022.

Local health jurisdictions reported 262 COVID-19 outbreaks that occurred in K-12 schools across 18 counties. Of these outbreaks, 2 started in November 2022. The number of outbreaks by county ranged from 1 to 56. A total of 1201 COVID-19 cases were associated with these outbreaks. Reporting of COVID-19 outbreaks and associated cases is still occurring, so the number of outbreaks and associated cases may change

County	Number of Outbreaks	Outbreaks occurring in November 2022	Number of Associated Cases	Cases from outbreaks in November 2022
