Exhibit D Current-State Database Complexity RFI N22787

The following databases are an integral part of the Current-State ILRS Solution. This information is presented here as a frame of reference for data complexity. It is anticipated that this information will aid in the discovery process for scope of transition requirements (i.e. data migration) and related HELMS cost estimates:

Primary Database Instance

Databasename	Description	UserTables	UserViews	UserFunctions	UserStored Procs
Credential Information Database	Contains Electronic Document Image Metadata related to several types of scanned credential applicant documents, in one or more Kofax projects.	2	0	0	0
Enforcement Database	This supports the ILRS application, and contains licensing and disciplinary data for credentialed health care providers and facilities.	1345	66	289	920
ILRS Document Archive	A component of ILRS, not fully implemented by the vendor, may contain nothing, but required for ILRS system use.	2	0	0	7
EMS Credentials Database	Supports the EMSOnline application, which allows self-service, online renewals of various EMS credentials.	22	3	4	79
ILRS Admin Database	Supports several ILRS related side systems, both internal and external facing, including the provider credential search, and also supports several of the automated data interfaces.	48	61	51	77
ILRS Interface Database	Supports automated ILRS interfaces.	58	1	2	48
Kofax Document Database	Contains Electronic Document Image Metadata related to several types of scanned documents, related to several Kofax projects.	5	2	0	0
Laserfiche Database	Supports the Laserfiche application, and contains Electronic Document Image Metadata related to disciplinary actions and orders on ILRS credentials.	131	4	4	84
Financial Records Database	Contains a snapshot of selected ILRS data, annually extracted from ILRS and exported to the OFM as part of a recurring data request from the Office of Financial Management (OFM).	3	0	0	0

Databasename	Description	UserTables	UserViews	UserFunctions	UserStored Procs
Registration Database	Supports our home built front end attachment to the (vendor supplied) ILRS Online application.	5	0	0	21
PDR Database	Supports an Access Database application which tracks Public disclosure requests for HSQA.	4	0	0	0
Washington State Patrol Database	Snapshot of imported conviction data received monthly from the Washington State Patrol	7	0	1	7
ILRS Staging Database	Staging data for replication of the ILRS database.	1	0	0	0

Replicated Database Instance

Databasename	Description	UserTables	UserViews	UserFunctions	UserStored Procs
EMS Credentials Database	Supports the EMSOnline application, which allows self-service, online renewals of various EMS credentials.	16	0	7	177
ILRS Admin Database	Supports several ILRS related side systems, both internal and external facing, including the provider credential search, and also supports several of the automated data interfaces.	12	1	10	71
ILRS Replica Database	Replicated copy of selected data from the ILRS database, specifically just data which supports external facing web applications.	33	0	11	99
OLIC Web Database	Supports OLIC application (External facing web app).	2	3	0	53
OLIC Web Database	Supports OLIC application (External facing web app).	2	3	0	53
Front Counter Database	Supports walk-In and Courier payment activities.	8	0	5	11
Record Tracking	Supports the tracking of records required to fulfill public records requests	5	0	2	11
