Wollochet Bay		863	Scott Chernoff	(360) 236-3329

Threatened status is generally based on marine water quality but may also be based on the presence of potential pollution sources that, if not managed, may cause a downgrade in classification. Threatened status is assigned in SRS growing areas when a water sampling station's estimated 90th percentile is between 30 and 43 fc/100mL.
