

## Primary Care Provider Survey Summary Report: Stevens County

Survey year: 2012

The Department of Health (DOH) conducts the Primary Care Provider Survey to obtain health care access data. This data is used in the [Health Professional Shortage Area \(HPSA\)](#) designation analysis. HPSA is a federal program administered by the federal Office of [Health Resources and Services Administration \(HRSA\)](#). A HPSA designation identifies areas with provider shortages for underserved and uninsured populations. To learn more about the program please see the [HPSA Overview](#).

This summary report reflects provider survey responses. The department makes every attempt to establish a close to accurate number of providers by collecting lists from local health departments, the National Provider Identifier Registry and other sources. To meet federal guidelines in the analysis the target response rate is >75%. This report offers an aggregate summary of the survey responses.

For questions about the survey data, methodology, and related information please contact Natalie Ogle at [Natalie.Ogle@doh.wa.gov](mailto:Natalie.Ogle@doh.wa.gov) or by phone at (360) 236-2832. Information on other counties can be found on the [Health Care Access Research Page](#).
