

Prevention Service Navigation Providers

Prevention service navigation providers are available in all counties in Washington and support individuals who need assistance accessing and fully engaging in HIV prevention. Choose the right fit for you for help accessing Pre-Exposure Prophylaxis (PrEP), Post-Exposure Prophylaxis (PEP), HIV & STD testing, condoms, and health insurance enrollment & utilization support. If a prevention navigation agency is not available in your county, reach out to an agency close to you for support or to [WA Department of Health](https://www.doh.wa.gov) to identify navigation resources near you.
