*The 2011 revision of [WAC 246-101-010](#) states "Other rare diseases of public health significance' means a disease or condition, of general or international public health concern, which is occasionally or not ordinarily seen in the state of Washington including, but not limited to, spotted fever rickettsiosis, babesiosis, tick paralysis, anaplasmosis, and other tick borne diseases. This also includes public health events of international concern and communicable diseases that would be of public concern if detected in Washington."

The laboratory results listed above (preliminary or confirmed) are notifiable to public health authorities in Washington in accordance with [WAC 246-101](#).

Information provided with public health notifications and specimen submissions must include: specimen type; name and telephone number of laboratory; date specimen collected and received; requesting health care provider's name and phone number; test result; and name of patient. Also required when available in the lab database are: patient sex, date of birth or age, full patient address (zip code at a minimum), and health care provider address.

Per [WAC 246-101-201\(3\)](#), LHJs may request laboratory reporting of additional test results pertinent to an investigation of a notifiable condition.
