**How can I add an administered COVID-19 vaccine to a record in the WAIS when the patient is between the ages of 6 months and 11 years?**

- Log into the WAIS.
- If you are an organization client user, ensure that the administering facility name is displayed at the top of the screen.
- Search for the patient. Add a new patient if your patient is not located. Update or add any new appropriate demographic information.
- For more detailed instructions on searching or adding patients, click [here](#).
- Click the **Vaccinations** tab on the left of the page. Click **View/Add**.

- The **Vaccination View/Add** screen will appear. Choose the appropriate Pfizer COVID-19 vaccine based on your patient's age.
- Enter the date of administration to the right of the vaccine and click **Add Administered** at the bottom of the page.

## COVID-19 Vaccine Documentation for Pediatric Patients

- The **Vaccination Detail Add** page will appear. **Click to Select** to the right of the **Manufacturer** field to choose a lot number from the facility's inventory. The **Manufacturer**, **Lot Number**, **Lot Facility**, and **Funding Source** fields will populate once the lot number has been selected (ensure your computer is set to allow popups). If the lot number you are using does not appear in the popup, then it is not present in the facility's active WAIS inventory. The lot number may need to be re-activated or there may be an order to be received. Click [here](#) for more information about ordering and receiving in the IIS.
- Fill out the rest of the form to include Site, Route, Dose Size, Volume, VIS Pub Dates ([EUA date](#)).
- Click **Save** on the bottom right of the page to complete this vaccination record.
- For more detailed instructions on adding administered vaccines in the WAIS, click [here](#).
