COVID-19 Cases Among Children and Youth in Washington

January 25, 2023

The purpose of this report is to provide information on COVID-19 in all children and youth, ages 0 to 19 years, in Washington state. Children and youth across Washington continue to be affected by the COVID-19 pandemic. While schools are taking precautions to prevent the spread of the virus, understanding the burden of the disease among all children and youth can help communities, educational service districts (ESD), school districts, and schools better prepare and respond to shifting needs. This report describes cases among all children and youth in Washington and are broken down by ESD regions, and age. An ESD is a regional education unit that is made up of multiple school districts. State level hospitalization and death data are also provided.

Cases are assigned to an ESD region based on the individual's home address. Children and youth with COVID-19 include all individuals living within an ESD's jurisdiction who are 0-19 years old, regardless of where they actually learn.

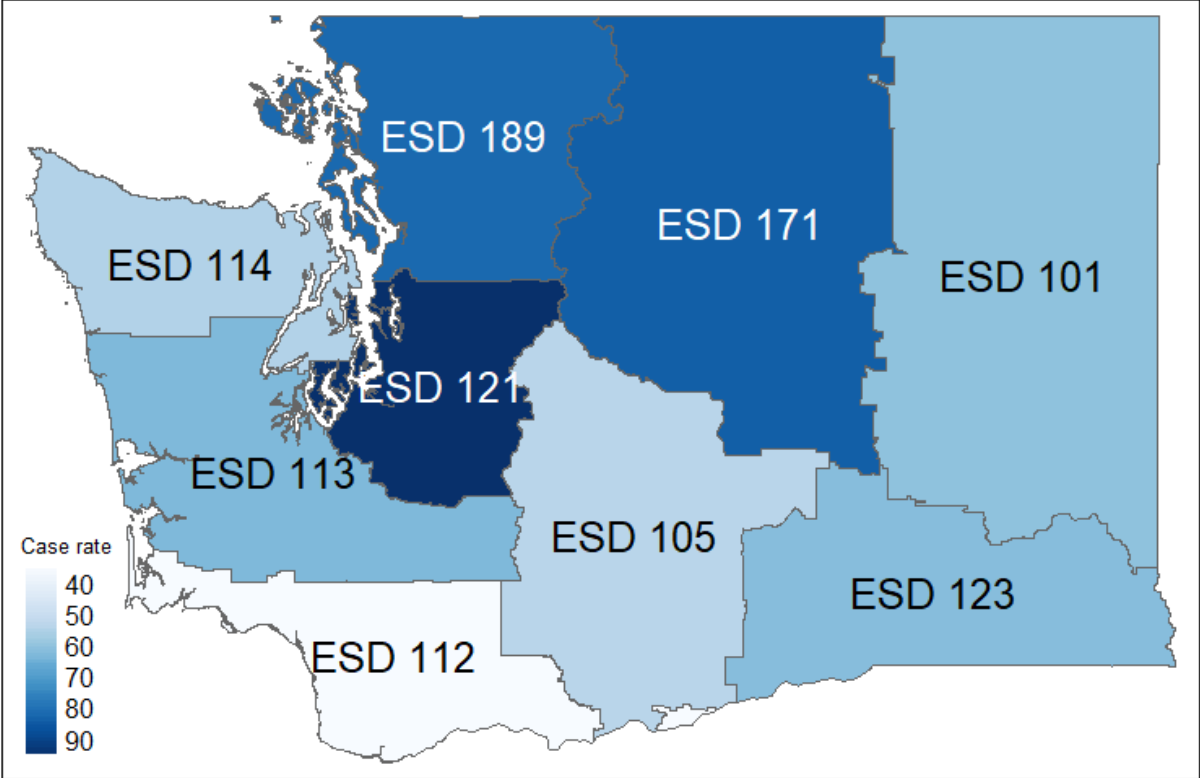

Key findings

- Among children and youth in Washington state from December 31, 2022 to January 14, 2023:
 - there were 1,436 cases (76.2 cases per 100,000 population);
 - case rates are increasing;
 - the highest case rates were in ESD 121 Washington;
 - 0-3 year-olds had the highest case rates (141.6 cases per 100,000 population);
 - there were 38 hospitalizations (2 hospitalizations per 100,000 population);
 - hospitalization rates are increasing.
- There have been a total of 12 deaths in all children and youth in Washington state reported January 1, 2021 to Jan 14, 2023

Number of COVID-19 cases and case rate per 100,000 population in all children and youth by ESD region, December 31, 2022 - January 14, 2023

ESD	Population	Case count	Case rate
ESD 101	168,583	102	60.5
ESD 105	105,235	56	53.2
ESD 112	162,085	58	35.8
ESD 113	119,629	75	62.7
ESD 114	78,966	43	54.5
ESD 121	769,804	732	95.1
ESD 123	120,595	74	61.4
ESD 171	67,904	57	83.9
ESD 189	292,760	239	81.6
State total	1,885,561	1,436	76.2

COVID-19 case rate per 100,000 population in all children and youth by ESD region, December 31, 2022 to January 14, 2023

14-day COVID-19 case rate per 100,000 population in all children and youth in Washington state, January 1, 2021 to Jan 14, 2023

14-day COVID-19 case rate per 100,000 population in all children and youth in Washington state by ESD region, January 1, 2021 to Jan 14, 2023

Number of COVID-19 cases and case rate per 100,000 population in all children and youth by ESD region and age group, December 31, 2022 - January 14, 2023

	0-3 year-olds (preschool)		4-10 year-olds (elementary school)		11-13 year-olds (middle school)		14-19 year-olds (high school)

COVID-19 case rate per 100,000 population in all children and youth by ESD region and age group, December 31, 2022 - January 14, 2023

COVID-19 hospitalization rate per 100,000 population in all children and youth in Washington, December 31, 2022 - January 14, 2023

Population	Hospitalization count	Hospitalization rate
1,885,561	38	2

14-day COVID-19 hospitalization rate per 100,000 population in all children and youth in Washington state, January 1, 2021 to Jan 14, 2023

Methods

Definitions

Case data in this report come from the Washington State Disease Reporting System (WDRS). A 'case' is defined as an individual between the ages of 0 and 19 years who tested positive for COVID-19 during a 14-day period by either molecular test (such as PCR) or antigen tests. Most antigen tests are rapid tests and provide results in approximately 15 minutes to 1 hour.

The report includes the most recent complete 14 days of data, December 31, 2022 - January 14, 2023.

Cases are assigned to an ESD region based on the individual's home address. Children and youth with COVID-19 include all individuals living within an ESD's jurisdiction who are 0-19 years old, regardless of where they actually learn. This includes:

- students who attend a public or private school in the ESD region
- homeschooled youth
- youth who reside in a juvenile correctional facility
- all other children and youth

Please note that case rates and counts do not represent cases that occurred among students enrolled in a particular ESD or district. They represent all children and youth within the region served by an ESD or district.

An accurate home address was missing for approximately 0% of cases in children and youth with a test date between December 31, 2022 - January 14, 2023. These cases are not included in this report.

A COVID-19 hospitalization is a Washington resident who has been identified using case investigation data in WDRS or links with Rapid Health Information Network (RHINO) records as hospitalized with confirmed or probable COVID-19. Due to small numbers, to protect privacy hospitalization data are only reported at the state level.

Deaths are reported to the state by health care providers, medical examiners or coroners, local health departments, or others to the official vital records database, WHALES. COVID-19 deaths included in this report are identified in WHALES where the cause of death was confirmed or suspected to have been COVID-19. Due to small numbers, to protect privacy death data are only reported at the state level aggregated across time.

14-day rate calculation

Case rates are calculated as the total number of cases within the specified demographic (e.g. age group) and ESD region with a test date during the 14-day period divided by the Washington state population for the same region and demographic.

Hospitalization rates are calculated as the total number of hospitalizations in Washington state with a test date during the 14-day period divided by the Washington state population 0-19 years old.

All rates presented in this report use the Washington state population distribution based on the Office of Financial Management's (OFM) April 1, 2020 population estimates by age, sex, race, and Hispanic origin.
