- 2-3 Months: **30** 6-packs per month
- 4-5 Months: **37** 6-packs per month
- 6-11 Months: **26** 6-packs per month

*The amounts in the tables above are based on an infant certified in the first month of life. If the infant is certified later the amounts may fluctuate slightly because the system calculates issuance based on an average.

*Rounding methodology calculates benefit issuance based on age and averages the amount needed over a specific timeframe. This result in participants who are the same number of months old but different number of days old being issued slightly different benefit packages.

Example:

- Two 1-month old infants drinking 10 oz of Similac Advance powder formula/day
- Infant A is 41 days and Infant B is 53 days on the day they are issued their 1-3 month benefit package
- Infant A receives 13 cans and Infant B receives 10 cans over the timeframe
- Infant A receives more because they have more days remaining in the 1-3 month timeframe

Notes:

- Cascades calculates the number of cans of formula needed per category per month based on the total ounces of formula per day entered on the infant's health information screen.
- For more information regarding the use of rounding up methodology to calculate formula issuance please see:
 - 7 CFR 246.10(h)
 - USDA Special Supplemental Nutrition Program for Women, Infants and Children (WIC) Food Package Policy and Guidance – March 2018
