## **CR-101 (October 2017)** (Implements RCW 34.05.310)

Do NOT use for expedited rule making

OFFICE OF THE CODE REVISER STATE OF WASHINGTON **FILED** 

DATE: February 23, 2022

TIME: 1:43 PM

WSR 22-06-034

Agency: State Board of Health		
considering revisions to the chapter to modify harvest co- illnesses and protect public health. The rule revision may editorial changes as needed.	C, Sanitary control of shellfish. The State Board of Health (board) is ntrol requirements by setting more proactive measures to prevent also include updating definitions, seed size and other technical and	
Statutes authorizing the agency to adopt rules on this	s subject: RCW 69.30.030 and RCW 43.20.050	
Reasons why rules on this subject may be needed ar	nd what they might accomplish: Vibrio parahaemolyticus (Vp) is a	
naturally occurring bacteria found in marine waters. Mollu who consume raw or undercooked shellfish containing V <sub>I</sub>	uscan bivalve shellfish acquire Vp through filter feeding. Humans o can develop an intestinal disease called vibriosis.	
In 2021, there were a high number of vibriosis cases invo	olving Washington shellfish largely due to very high temperatures	
during the summer months. The Department of Health (department) expects this trend to continue. This indicates a need to		
	ontrols are adequate to protect consumers and consider more	
proactive measures to prevent illness and protect public I		
	e this subject and the process coordinating the rule with these	
	) requires a Vibrio parahaemolyticus control plan for the state of	
vvasnington and requires that the plan be in compliance v	with requirements set forth in the NSSP Model Ordinance.
