

An opportunity for high school students in Washington state to develop their science and communication skills by engaging with health and environmental data from their own communities.

Contest tracks:

Health Science track: Do an analysis with WTN data to reveal correlations, impacts, and disparities.

Community Engagement track: Take the data into the real world and use it to make an impact.

Science Communication track: Identify an issue that's important to you and develop a message to increase awareness or drive action related to the issue.

Why participate?

- Build your STEM (Science, Technology, Engineering and Math) skills and understanding of STEM careers
- Work with real data about your community
- Get project feedback from public health professionals
- Increase your awareness and understanding of health and environmental disparities
- Develop your ability to make a positive impact on your community

Who can participate?

Any Washington high school student

Recognition

All participants will receive:

- Written feedback from the judges
- A contest-branded item
- A certificate of participation

1st-3rd place individuals and teams will receive:

- A plaque recognizing their achievement
- Their project showcased by DOH on social media and WTN's webpage

1st place individuals and teams also will receive:

- A meeting with a relevant expert for project elaboration and professional development

MARCH 1 - APRIL 30, 2022

Registration open
Feb. 17-Mar. 15, 2022.
