Evaluating the Fit Test Conductor in the LTC Facility (Qualitative Method using Bitrex or Saccharine Solution)

Name of Fit Tester:	Date:	
Name of Observer:		
Base Knowledge		
Item	Yes	No
Able to explain the components of the respirator and their function		
Demonstrates how to inspect the N95		
Demonstrates knowledge of the N95 and identifies the manufacturer, model, size & approval		
number		
Explains the N95 respirator limitations and capabilities		
Demonstrates proper donning and doffing for all available respirators		
Explains the purpose of respirator fit testing		
Understands the limitations of a qualitative fit test		
Explains what to do if the person is not able to taste the sensitivity solution		
Appropriately addresses questionable fit test results		
Understands the health and safety hazards associated with the chemicals and equipment when	n	
conducting a qualitative fit test		
Corrective actions:		
Recommendations for improvement:		
Equipment		
Equipment	Vos	No
Item	Yes	No
Item Selects correct sensitivity and fit testing solution	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly:	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution • Tests the nebulizers	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution • Tests the nebulizers Assembles and prepares other equipment and supplies to conduct a fit test:	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution • Tests the nebulizers Assembles and prepares other equipment and supplies to conduct a fit test: • Clock	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution • Tests the nebulizers Assembles and prepares other equipment and supplies to conduct a fit test: • Clock • Hood	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution • Tests the nebulizers Assembles and prepares other equipment and supplies to conduct a fit test: • Clock • Hood • Mirror	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution • Tests the nebulizers Assembles and prepares other equipment and supplies to conduct a fit test: • Clock • Hood • Mirror • Gloves	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution • Tests the nebulizers Assembles and prepares other equipment and supplies to conduct a fit test: • Clock • Hood • Mirror • Gloves • Cleaning wipes (preferably, with no scent)	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution • Tests the nebulizers Assembles and prepares other equipment and supplies to conduct a fit test: • Clock • Hood • Mirror • Gloves • Cleaning wipes (preferably, with no scent) • Water and napkins	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution • Tests the nebulizers Assembles and prepares other equipment and supplies to conduct a fit test: • Clock • Hood • Mirror • Gloves • Cleaning wipes (preferably, with no scent) • Water and napkins • Trash can	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution • Tests the nebulizers Assembles and prepares other equipment and supplies to conduct a fit test: • Clock • Hood • Mirror • Gloves • Cleaning wipes (preferably, with no scent) • Water and napkins • Trash can • N95s	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution • Tests the nebulizers Assembles and prepares other equipment and supplies to conduct a fit test: • Clock • Hood • Mirror • Gloves • Cleaning wipes (preferably, with no scent) • Water and napkins • Trash can • N95s • Fit test records	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution • Tests the nebulizers Assembles and prepares other equipment and supplies to conduct a fit test: • Clock • Hood • Mirror • Gloves • Cleaning wipes (preferably, with no scent) • Water and napkins • Trash can • N95s • Fit test records • Pen	Yes	No
Item Selects correct sensitivity and fit testing solution Prepares nebulizers correctly: • Fills the appropriate amount of solution • Tests the nebulizers Assembles and prepares other equipment and supplies to conduct a fit test: • Clock • Hood • Mirror • Gloves • Cleaning wipes (preferably, with no scent) • Water and napkins • Trash can • N95s • Fit test records	Yes	No

Checking for Fit Test Readiness		
Item	Yes	No
Reviews the medical evaluation letter of recommendation for the renewal date and any restrictions		
Asks when the person has last eaten or drank anything		
Delays sensitivity testing for at least 15 minutes if the person ate or drank anything but		
water in the last 15 minutes		
Checks for facial hair		
If the person has facial hair, then the tester gives the person the option to come back clean		
shaven or reschedule the fit test		
Explains the fit test process to the person		
Corrective actions:		

Corrective actions:

Recommendations for improvement:

Performing the Sensitivity Screening		
Item	Yes	No
Instructs person to remove face covering if they are wearing one		
Places hood appropriately over the person's head		
Instructs the person to slightly open their mouth and slightly stick out their tongue		
Delivers full sprays using the palm of the hand, and allows the bulb to fully expand with each spray		
Sprays toward both sides of the hood, away from the person's face or their mouth		
Instructs person on what to do if they taste the sensitivity solution		
Sprays sensitivity solution in groups of 10, up to 30 sprays		
Counts and makes note of the number of sprays given until the person tastes the solution		
Informs the person on how many sprays will be used to start the fit test		
Encourages the person to drink water and wipe their lips of any residual solution after tasting the		
solution		

Corrective actions:

Recommendations for improvement:

Donning (Putting the N95 on)		
Item	Yes	No
Encourages the person to choose the most comfortable model/size and explains how to check for a comfortable fit		
Observes the person donning the N95 and provides feedback or correction		
 Provides instruction for those who wear hair coverings, wigs, hats, etc. 		
 Provides instruction for those using glasses/eye protection 		
Encourages the person to remove large open hoop earrings		
 Encourages the person to tie long hair back, checking for any hair along the edges of the N95, and any hair under the straps on the face and around neck 		
Checks proper strap placement		
Checks edges of respirator for folds		
Checks proper molding of metal nose strip		
 Does not alter N95 in any way (no knots in straps, no writing on the filter, etc.) 		
Observes or demonstrates both positive and negative seal check		
 Makes corrections, if necessary, for positive and negative seal check 		

Donning (Putting the N95 on, continue)		
Corrective actions:		
Recommendations for improvement:		
5 – Minute Wait Time		
Item	Yes	No
The person wore the N95 for 5 minutes before starting the fit test exercises		
Restarts 5-minute waiting period if the person touches or adjusts N95/encourages the person to		
select another N95 if the one they are wearing is not comfortable		
Explains and demonstrates the 7 exercises involved in the fit test		
Explains choices for these two fit test exercises:		
Reading or counting		
Bending over or jogging in place		
Provides instruction on what to do if the person tastes the solution during the fit test		
Allows the person to ask questions		
Corrective actions:		
Recommendations for improvement:		
Fit Test	T T	
Item	Yes	No
Provides the appropriate number of initial sprays of the fit test solution at the start of the fit test		
Provides the correct number of additional sprays of the solution every 30 seconds		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute:		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down 5. Reading or counting out loud		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down 5. Reading or counting out loud 6. Bending over or jogging in place		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down 5. Reading or counting out loud 6. Bending over or jogging in place 7. Normal breathing		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down 5. Reading or counting out loud 6. Bending over or jogging in place 7. Normal breathing Reminds the person to breathe through their mouth		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down 5. Reading or counting out loud 6. Bending over or jogging in place 7. Normal breathing Reminds the person to breathe through their mouth Stops the fit test if the person tastes the solution		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down 5. Reading or counting out loud 6. Bending over or jogging in place 7. Normal breathing Reminds the person to breathe through their mouth Stops the fit test if the person tastes the solution Observes nebulizer for full spray volume, and watches for a decrease in mist volume		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down 5. Reading or counting out loud 6. Bending over or jogging in place 7. Normal breathing Reminds the person to breathe through their mouth Stops the fit test if the person tastes the solution Observes nebulizer for full spray volume, and watches for a decrease in mist volume Keeps the nebulizer level when administering sprays		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down 5. Reading or counting out loud 6. Bending over or jogging in place 7. Normal breathing Reminds the person to breathe through their mouth Stops the fit test if the person tastes the solution Observes nebulizer for full spray volume, and watches for a decrease in mist volume Keeps the nebulizer level when administering sprays Determines if the person's N95 has passed or failed the fit test		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down 5. Reading or counting out loud 6. Bending over or jogging in place 7. Normal breathing Reminds the person to breathe through their mouth Stops the fit test if the person tastes the solution Observes nebulizer for full spray volume, and watches for a decrease in mist volume Keeps the nebulizer level when administering sprays Determines if the person's N95 has passed or failed the fit test Documents results on the person's fit test record		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down 5. Reading or counting out loud 6. Bending over or jogging in place 7. Normal breathing Reminds the person to breathe through their mouth Stops the fit test if the person tastes the solution Observes nebulizer for full spray volume, and watches for a decrease in mist volume Keeps the nebulizer level when administering sprays Determines if the person's N95 has passed or failed the fit test Documents results on the person's fit test record Sanitizes the hood between each fit test		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down 5. Reading or counting out loud 6. Bending over or jogging in place 7. Normal breathing Reminds the person to breathe through their mouth Stops the fit test if the person tastes the solution Observes nebulizer for full spray volume, and watches for a decrease in mist volume Keeps the nebulizer level when administering sprays Determines if the person's N95 has passed or failed the fit test Documents results on the person's fit test record Sanitizes the hood between each fit test If fit testing for more than 4 hours, stops to wash and clean nebulizers every 4 hours		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down 5. Reading or counting out loud 6. Bending over or jogging in place 7. Normal breathing Reminds the person to breathe through their mouth Stops the fit test if the person tastes the solution Observes nebulizer for full spray volume, and watches for a decrease in mist volume Keeps the nebulizer level when administering sprays Determines if the person's N95 has passed or failed the fit test Documents results on the person's fit test record Sanitizes the hood between each fit test		
Provides the correct number of additional sprays of the solution every 30 seconds Instructs the person to change each fit test exercise after at least one minute: 1. Normal breathing 2. Deep breathing 3. Turning head side to side 4. Moving head up and down 5. Reading or counting out loud 6. Bending over or jogging in place 7. Normal breathing Reminds the person to breathe through their mouth Stops the fit test if the person tastes the solution Observes nebulizer for full spray volume, and watches for a decrease in mist volume Keeps the nebulizer level when administering sprays Determines if the person's N95 has passed or failed the fit test Documents results on the person's fit test record Sanitizes the hood between each fit test If fit testing for more than 4 hours, stops to wash and clean nebulizers every 4 hours		

Incidents During the Fit Test		
Item	Yes	No
Restarts fit testing if the person readjusts the N95 during the testing period		
Restarts fit testing if the hood falls off		
Addresses fit test failures		
Properly addresses or describes how to manage someone that gets dizzy or starts to feel unwell		
during the fit test		
Identifies and addresses likely causes of fit test failure (e.g., N95 size, strap placement, etc.)		
Corrective actions:		
Recommendations for improvement:		
Doffing (Taking off the N95)		
Item	Yes	No
Instructs the person to avoid touching the front of the respirator		
Instructs/corrects the person to remove bottom strap first, then the top strap (follow CDC's		
instructions for removing a N95)		
Describes how to discard the respirator		
Corrective actions:		
Recommendations for improvement:		
Cleaning and Storing Equipment		
Item	Yes	No
Discards remaining solutions (in nebulizer dish, or ampule)		
Rinses the nebulizers and atomizers		
Dries and properly stores the nebulizers and hood according to the manufacturer's instructions		
Sanitizes all equipment and supplies		
Encourages cleaning of the tables and chairs in the area		
Corrective actions:		
Recommendations for improvement:		
Recommendations for improvement.		
Observer's Summary:		
Recommend re-evaluation: Yes No
