I called dr office to verify rx due to unusual format to rx and unfamiliar with pt and dr. Man answered the phone (I assumed it was actually pt). He claimed the office was closing and he wasn't able to get the dr for me to clarify the rx, as the dr has already left for the day. I told him I would not be able to fill these prescriptions and that they needed to be ERx'd in from the dr. Next day, same male voice called, impersonating the prescriber, to 'confirm' the rx's validity. I questioned him, 'You are the dr?' He said 'Yes. The prescriptions are valid'. I let him know that we cannot accept the rxs by fax and that he will need to sent them in electronically. He hung up.

2022.06.29	Meredith Potochnic 2069384253 mapotochnic@gmail.com	5/27/2022	oxycodone 10mg IR 90	Charlie Browne capitol hill medical 901 Boren Avenue; Suite 705 Seattle WA 2067209999	King	patient turned in Rx on 5/27/22. Clinic was contacted on same day to verify. I believe the scanners called back and posed as the physician and authorized release of the Rx and it was dispensed. The following day 5/28, the Dr.s office called and verified that it was a forgery. Dr. Charlie Browne's office stated that this has been an ongoing issue and that they rarely prescribe CII's so we should verify each time. The Rx was printed on temper paper and states that prescriber was exempt from EPCS mandate under RCW 69.50.312. If you receive a written Rx from a new patient, you should verify each time.

We asked for photo ID and he went back to car to get it. We had never filled for patient and no history in PMP. I found it odd that a large institution with EHR would be hand writing CII's versus sending electronically. I called institution (Virginia Mason/Franciscan Health) to verify Rx and was told no record of patient or provider in their system. I did not fill the prescription.
