

# HAVE YOU JUST TESTED POSITIVE FOR COVID-19?

Do you have mild or moderate symptoms that started in the past 5 days?

Are you immunocompromised or high risk for severe illness or hospitalization from COVID-19?

## THERE ARE TREATMENTS THAT MAY BE RIGHT FOR YOU

Oral antiviral treatments are currently available to treat COVID-19 for people who are:

- at least 12 years old
- weigh at least 88 pounds
- at higher risk of becoming hospitalized or dying from the virus

A DOH contracted health provider is available to discuss your treatment options if you are not able to access care within 24 hours of a positive COVID-19 test.

This is at no cost to you, even if you do not have insurance.

Same day or next day virtual appointments are available.
