

Rainbow Passage

When the sunlight strikes raindrops in the air, they act like a prism and form a rainbow.

The rainbow is a division of white light into many beautiful colors.

These take the shape of a long round arch, with its path high above, and its 2 ends apparently beyond the horizon.

There is, according to legend, a boiling pot of gold at one end.

People look, but no one ever finds it.

When a man looks for something beyond reach, his friends say he is looking for the pot of gold at the end of the rainbow.
