Washington State Department of Health

Certificate of Need Application
Kidney Disease Treatment Facilities

Certificate of Need applications must be submitted with a fee in accordance with Washington Administrative Code (WAC) 246-310-990.

Application is made for a Certificate of Need in accordance with provisions in Revised Code of Washington (RCW) 70.38 and WAC 246-310, rules and regulations adopted by the Washington State Department of Health. I attest that the statements made in this application are correct to the best of my knowledge and belief.

Identify the Planning Area for this project as defined in WAC 246-310-800(15).

Snohomish County ESRD Planning Area #2

DAVITA

PILCHUCK DIALYSIS CENTER EXPANSION

SPECIAL CIRCUMSTANCES CERTIFICATE OF NEED APPLICATION

EXECUTIVE SUMMARY

Refuge Dialysis, LLC., a subsidiary of Total Renal Care, Inc., a subsidiary of DaVita Inc. (hereafter "DaVita"), proposes to expand the DaVita Pilchuck Dialysis Center in the Snohomish County Two ESRD Planning Area (hereafter, “Snohomish 2”) from eight (8) Certificate of Need-approved stations plus one (1) Certificate of Need exempt isolation station to ten (10) Certificate of Need-approved stations plus one (1) Certificate of Need-exempt isolation station, an increase of two (2) stations. This proposal falls under the special circumstances application eligibility and process described in WAC 246-310-818. The proposed expanded facility will provide nearly immediate enhanced access to ESRD patients in Snohomish 2. Total Project Costs for the expanded center will be $41,428, and will be financed through operational funds on-hand allocated for the project. There are no associated Indirect Project Costs.

The proposed expanded dialysis facility will continue to occupy the existing 6,375 rentable square feet of leased space, located at **1250 State Avenue, Marysville, WA 98270**.

This geography, as defined by the Department of Health, is currently served by four approved facilities: DaVita Everett Dialysis Center, DaVita Pilchuck Dialysis Center, Puget Sound Kidney Centers Everett, and Puget Sound Kidney Centers Monroe. The facility that DaVita to expand will increase the total station count in the planning area by two (2) stations.

TABLE OF CONTENTS:

DAVITA
EVERETT DIALYSIS CENTER EXPANSION
SPECIAL CIRCUMSTANCES CERTIFICATE OF NEED APPLICATION

I. APPLICANT DESCRIPTION

1. Provide the legal name(s) and address(es)of the applicant(s).

The legal name of the applicant is Refuge Dialysis, LLC, a subsidiary of Total Renal Care, Inc., a subsidiary of DaVita Inc. (hereafter, "DaVita") d.b.a. Everett Dialysis Center. DaVita's address is DaVita Inc., 2000 16th Street, Denver, CO 80202.

We also provide the following additional information regarding DaVita:

- DaVita is a leading provider of dialysis services in the United States for patients suffering from chronic kidney failure, also known as End Stage Renal Disease, or ESRD. We currently operate or provide administrative services to more than 2,539 outpatient dialysis centers located in the United States, serving approximately 185,000 patients.
- Consistent with DaVita's mission statement to "Be the Provider, Partner and Employer of Choice," serving patients by providing quality clinical outcomes is paramount. DaVita has instituted a nationally recognized Dialysis Quality Outcomes program and maintains an aggressive Continuous Quality Improvement (CQI) program. The DaVita philosophy is patient-focused in serving the chronically ill dialysis patient by addressing all dimensions of the dialysis patient's illness state and by providing quality services through a clinical outcomes measurement and management approach to treating ESRD.
- DaVita is committed to serving the chronic kidney disease patient in union with nephrologist partners. The DaVita Pilchuck Dialysis Center will continue to carry out this commitment through:
    - Serving patients where they live and work.
    - Providing the highest quality patient care – DaVita has more three, four, and five-star centers than in the history of the Five-Star rating program, and leads all dialysis providers (davita.com, News Release April 27, 2018 – Appendix 20).
    - Providing proven infrastructure and continuity to grow rapidly and cost effectively in an underserved community.
    - Supporting new patients – All DaVita dialysis centers within Washington State provide regular, in-center education and training with the goal to empower patients through information about their disease and ability to self-manage their care.
    - DaVita offers Kidney Smart, a non-branded, community-based education program for Chronic Kidney Disease (CKD) patients and their families.
    - DaVita offers access to a national non-profit kidney disease advocacy program: Dialysis Patient Citizens.

- DaVita dialysis centers partner with a specialty-focused pharmacy service, WellDyneRx, for dialysis patients.
- DaVita's Guest Services Program provides assistance in locating other dialysis facilities for patients wishing to travel or relocate.
- DaVita will contribute to the community through increased taxes, thereby increasing the community's ability to provide support services for the ESRD patient population.

2. Identify the legal structure of the applicant (LLC, PLLC, etc) and provide the UBI number.

Refuge Dialysis, LLC, is a subsidiary of Total Renal Care, Inc., a subsidiary of DaVita Inc., a publically held, for-profit Delaware corporation. Total Renal Care's UBI number is 602-923-671

3. Contact person for this application

Evan Moore – Director, Special Projects
DaVita Inc. – North Star Division Office
32275 32nd Ave S.
Federal Way, WA 98001
Phone Number: (253) 733-4755
Email: evan.moore@davita.com

4. Provide the name, title, address, telephone number, and email address of the consultant authorized to speak on your behalf related to the screening of this application (if any).

Not Applicable

5. Provide an organizational chart that clearly identifies the business structure of the applicant(s).

DaVita is governed by its Board of Directors. Board of Director meetings are held quarterly. Organization charts are included as Appendix 1.

6. Identify all healthcare facilities owned, operated by, or managed by the applicant. This should include all facilities in Washington State as well as out-of-state facilities, and should identify the license/accreditation status of each facility.

DaVita is a leading provider of dialysis services in the United States for patients suffering from chronic kidney failure, also known as End Stage Renal Disease, or ESRD. We currently operate or provide administrative services to approximately 2,539 outpatient dialysis centers in the United States, serving approximately 185,000 patients (davita.com). All DaVita facilities nationally, and their CMS license and accreditation status, are listed in Appendix 2. All applicable state regulatory agencies are listed in Appendix 13.

State licensure and accreditation is not required for outpatient dialysis facilities in Washington State. However, to establish and maintain federal Medicare certification, each DaVita facility undergoes the process established by the state in which the facility operates. Medicare certification is established through surveys conducted by the Department of Health Facility and Licensing Division. All operating Washington State DaVita facilities are Medicare-certified except for Lynnwood Dialysis Center and Wapato Dialysis Center, which have requested initial certification survey by CMS. All operating DaVita facilities listed in Appendix 2 are Medicare certified or awaiting survey as noted.

DaVita owns, operates or has been approved to operate forty-two (42) dialysis facilities in Washington State. Facilities in Washington State include:

Battle Ground Dialysis Center 720 West Main St. Battle Ground, WA 98604 (360) 687-4677 Medicare Certified	**Olympia Dialysis Center** 335 Cooper Point Rd NW, Ste 105 Olympia, WA 98502 (360) 357-6198 Medicare Certified

II. Project Description

1. Provide the name and address of the existing facility.

The expanded DaVita Pilchuck Dialysis Center will provide kidney dialysis services for residents of the Snohomish 2 ESRD planning area. The location is:

DaVita Pilchuck Dialysis Center
1250 State Avenue
Marysville, WA 98270

2. Provide the name and address of the proposed facility.

This question is not applicable as DaVita is proposing expanding an existing facility, Everett Dialysis Center.

3. Provide a detailed project description of the proposed project.

This project will add two (2) new stations to the service area, and would do so in an at-capacity facility, given the nature of qualifying for eligibility for a special circumstances application. This additional capacity in DaVita Pilchuck Dialysis will provide additional shift options for existing patients and allow for admission of dialysis

patients that might otherwise be required to dialyze in facilities farther from their homes, including in neighboring planning areas. In the DaVita Pilchuck facility, ESRD in-center population census was 47 patients, or 5.875 patients per station, per the June 30, 2018 modality report from the NWRN. The close-to-capacity status of the Everett facility necessitates additional capacity via special circumstances.

Patients of DaVita Pilchuck Dialysis Center will also maintain their access to DaVita national programs. The proposed dialysis centers will offer access to a specialty-focused pharmacy partner, WellDyneRx. Patients and their families will also have access to the Guest Services Program that provides assistance in locating other dialysis facilities for patients wishing to travel or relocate. Additionally, the Kidney Smart Education Program, which is described in Appendix 18, offers robust education for those in the community whose disease may not have yet progressed to ESRD, generating greater awareness of how best to self-manage their care and what treatment options are available to discuss with their nephrologists.

4. Identify any affiliates for this project, as defined in WAC 246-310-800(1).

This question is not applicable, as DaVita Inc., through Total Renal Care, Inc. and Refuge Dialysis, LLC is the sole owner of Pilchuck Dialysis Center, and will remain so upon the completion of this project. It therefore has no affiliates for this project.

5. Provide an estimated timeline for project implementation.

The table below outlines the anticipated dates of approval, design completion, construction commencement and completion, and preparation for survey based on an approval date, assuming all variables operate according to historical trends. DaVita continues to refine and streamline the facility development process.

Table 1
DaVita Pilchuck Dialysis Center
Anticipated Dates of Commencement & Completion of Project

Event	Anticipated Date
Project Approval	*February 13, 2019*
Design Complete	February 2019
Construction Commenced	N/A
Construction Completed	N/A
Facility Prepared for Survey	July 1, 2019

6. Identify the date the facility is expected to be operational as defined in WAC 246-310-800(12).

While DaVita notes that Pilchuck Dialysis is currently operational and the project represents an expansion, it expects that the expansion station will be operational and prepared for survey as defined in WAC 246-310-800(12) by **July 1, 2019**, based on a February 13, 2019 approval date.

7. Provide a detailed description of the services represented by this project. For existing facilities, this should include a discussion of existing services and how these would or would not change as a result of the project.

DaVita Pilchuck Dialysis Center does not expect its existing services to change as a result of the project, except for its ability to offer additional capacity for in-center hemodialysis patients, due to an increase from eight (8) to ten (10) stations. Pilchuck Dialysis Center currently offers services to:

- Hemodialysis patients who dialyze in the chronic setting,
- Hemodialysis patients requiring isolation,
- Hemodialysis patients requiring treatment shifts that begin after 5:00 PM,
- Hemodialysis patients requiring a permanent bed station,
- Continuous Ambulatory Peritoneal Dialysis (CAPD) patients, and
- Continuous Cycle Peritoneal Dialysis (CCPD) patients.

Additional services provided include:

- Training and support for patients for peritoneal dialysis,
- Treatment for visiting hemodialysis patients from other areas outside Snohomish 2, and
- Community education for patients recently diagnosed with Chronic Kidney Disease (CKD).

8. Provide a general description of the types of patients to be served by the facility at project completion.

DaVita Pilchuck Dialysis currently serves patients requiring in-center hemodialysis (both chronic and acute) and peritoneal dialysis (CAPD and CCPD). In addition, it serves patients requiring isolation and those requiring treatment shifts beginning after 5:00 PM, as well as those requiring a permanent bed station. Finally, it also serves visiting hemodialysis patients and recently diagnosed CKD patients. These types of patients are not expected to change following project completion.

9. Provide a copy of the letter of intent that was already submitted according to WAC 246-310-080.

A copy of the letter of intent is included in Appendix 5.

10. Provide single-line drawings (approximately to scale) of the facility, both before and after project completion. Reference WAC 246-310-800(11) for the definition of maximum treatment area square footage. Ensure that stations are clearly labeled with their square footage identified, and specifically identify future expansion stations (if applicable)

A single line drawing, showing both before and after project completion, is included as Appendix 16. Note that, per its revised CON reflective of a one-time station adjustment effective January 1, 2018, Pilchuck Dialysis Center may operate eight (8) in-center stations and one (1) exempt isolation station that does not count towards its Certificate of Need station count. These stations are numbered 1-8 in the “Existing” single

line drawing in Appendix 16, with the exempt isolation station noted and not numbered. The applied-for stations are numbered 9 and 10 on the "Proposed" floor plan. Finally, note that up to three hundred (300) square feet is allocated for future expansion stations per WAC 246-310-800(11)(c) on the proposed line drawing.

11. Provide the gross and net square feet of this facility. Treatment area and non-treatment area should be identified separately.

The DaVita Pilchuck Dialysis Center consists of (and will consist of, after project completion) 6,375 rentable square feet and 6,375 net square feet. The treatment area consists of 2,320 square feet, and non-treatment area of 5,429 square feet. Pilchuck Dialysis Center space allocations are included in Table 2 below. Note that the space allocations include usable (net) square footage, not gross square footage.

Table 2

PILCHUCK DIALYSIS CENTER SQUARE FOOTAGE ALLOCATION		OCTOBER 29, 2018
CATEGORY	**BEFORE COMPLETION**	**AFTER COMPLETION**
TREATMENT FLOOR AREA		
CHRONIC DIALYSIS STATIONS	666 SF	858 SF
ISOLATION STATION	154 SF	154 SF
PERMANENT BED STATION	90 SF	90 SF
EXPANSION STATIONS	189 SF	192 SF
NURSE STATION/ MEDS AREA	176 SF	176 SF
PATIENT PREP	38 SF	38 SF
CIRCULATION AREA	937 SF	742 SF
LAB PREP	44 SF	44 SF
WHEELCHAIR	26 SF	26 SF
TREATMENT FLOOR AREA TOTAL	2,320 SF	2,320 SF
NON-TREATMENT FLOOR AREA		
WATER ROOM	305 SF	305 SF
RE-USE	N/A	N/A
BIO-MED	86 SF	86 SF
STAFF TOILET / LOUNGE	314 SF	314 SF
JANITORIAL / ELECTRIC	115 SF	115 SF
MEDICAL RECORDS	58 SF	58 SF
RECEPTION	206 SF	206 SF
CONFERENCE ROOM	139 SF	139 SF
HOME TRAINING, PD & PD NURSE	331 SF	331 SF
PATIENT TOILETS	88 SF	88 SF
STORAGE/ MED WASTE	336 SF	336 SF
STAFF OFFICES	323 SF	323 SF
HVAC / CIRCULATION	1,754 SF	1754 SF
NON TREATMENT FLOOR AREA TOTAL	4,055 SF	4,055 SF
TOTAL SPACE (SHOULD EQUAL NET SF)	6,375 SF	6,375 SF

In Table 3, below, is calculated the maximum treatment area square footage of 3,588 square feet. Treatment floor area at project completion will be 2,320 square feet, below the maximum allowable square footage.

Table 3			
Maximum treatment floor area square footage: WAC 246-310-800(11)			
Area Type	Number of Stations	Sq Ft Per Station	Total Square Feet
(a) General Use	9	150	1,350
(b) Permanent Bed	1	200	200
(b) Isolation	1	200	200
(c) Expansion	2	150	300
Other Treatment Floor Space	*75% * sum of (a), (b) and (c)*		1,538
Total			**3,588**

12. Confirm that the facility will be certified by Medicare and Medicaid. Provide the existing facility's Medicare and Medicaid numbers.

DaVita Pilchuck Dialysis Center is, and will remain after project completion, certified by Medicare and Medicaid. Expansion certification will be requested from Medicare and Medicaid upon project completion. Everett Dialysis Center's Medicare and Medicaid numbers are below:

Medicare Provider Number: 502577
Medicaid Provider Number: 2044243

III. Certificate of Need Review Criteria

A. Need (WAC 246-310-210 and 246-310-800 to 246-310-833)

1. List all other dialysis facilities currently operating in the planning area, as defined in WAC 246-310-800(15).

WAC 246-310-800(15) defines the Snohomish 2 ESRD planning area. Table 4 provides a list of all other dialysis facilities operating in the Snohomish 2 planning area. Note that Table 4 also includes DaVita Pilchuck Dialysis Center, the subject of this expansion application.

Table 4		
Existing Dialysis Facilities in Snohomish 2	**Provider**	**Current Approved Stations**
PSKC Everett 502503	PSKC	25
DVA EVERETT 502560	DVA	13
DVA PILCHUCK Marysville 502577	DVA	8
PSKC MONROE 502576	PSKC	12

2. Provide utilization data for the facilities listed above according to the most recent NWRN modality report.

WAC 246-310-812(3) requires that projected station need must be based on 4.8 resident in-center patients per station in in urban areas, and 3.2 patients per station in designated rural counties. The applicable utilization standard for Snohomish 2 is 4.8 patients per station, therefore WAC 246-310-812(5) applies, and all certificate of need counted stations at each facility in the planning area must be operating at 4.5 in-center patients per station as of the letter of intent submission date, have been in operation for three or more years, or have not met the timeline presented in their Certificate of Need application. The relevant data for this analysis is the quarterly facility utilization report prepared by the Northwest Renal Network (hereafter "NWRN"). Table 5 provides current utilization levels for all existing Snohomish 2 dialysis facilities.

Table 5	**Quarterly Utilization of Existing Stations**				
Existing Dialysis Facilities in Snohomish 2	Provider	Approved Stations	NWRN 6/30/2018		Standard Met?
			Patients	Patients Per Station	4.5 Patients Per Station
PSKC Everett 502503	PSKC	25	108	4.32	No
DVA EVERETT 502560	DVA	13	65	5.00	Yes
DVA PILCHUCK Marysville 502577	DVA	8	47	5.875	Yes
PSKC MONROE 502576	PSKC	12	39	3.25	No

As outlined in Table 5, all facilities in the planning area are not at 4.5 patients per station – only DaVita Pilchuck Dialysis and Everett Dialysis meet this standard.

However, DaVita is applying for a **special circumstances two (2) stations expansion** for Everett Dialysis Center under WAC 246-310-818. Per WAC 246-310-818(2), the Department may approve special circumstance station expansions even if other kidney dialysis facilities not owned or affiliated with the applicant in the planning area are below the minimum patients per station operating thresholds set by WAC 246-310-812 (5).

3. Complete the quantitative station need methodology outlined in WAC 246-310-812.

WAC 246-310-812 outlines the applicable standards and methodology to determine planning area need. WAC 246-310-800(15) defines a “planning area” as an individual geographic area designated by the department for which kidney dialysis station need projections are calculated. The 6 year in-center hemodialysis patient historical volume for the Snohomish 2 ESRD planning area zip codes is represented below in Table 6, per data from the year-end NWRN modality reports.

Table 6
Planning Area In-Center Hemodialysis Patients Projected by Year

Snohomish 2	2012	2013	2014	2015	2016	2017
98201	48	34	31	32	31	40
98203	28	32	34	33	32	29
98204	32	36	33	37	39	37
98205	0	0	0	0	0	0
98208	38	41	41	42	49	42
98224	1	1	1	0	0	0
98251	1	1	2	0	1	2
98258	18	22	16	22	23	20
98270	60	45	45	40	52	54
98272	4	3	7	13	17	19
98275	8	10	11	16	6	7
98288	0	0	0	0	0	0
98290	20	20	15	9	19	18
98294	1	3	4	7	7	7
Total	259	248	240	251	276	275

Table 7 analyzes the historical growth rate for the number of resident in-center patients from Snohomish 2 to determine if the linear or nonlinear regression methodology will be used in determining need per WAC 246-310-812(4)(a)(i-ii). The linear regression methodology was selected as year-to-year increases are less than 6% in several of the past five annual increases.

Table 7
Analysis of Year-to-Year Percentage Change in In-Center Dialysis Patients

Snohomish 2	2012	2013	2014	2015	2016	2017
Total	259	248	240	251	276	275
% Change		-4.25%	-3.23%	4.58%	9.96%	-0.36%

Table 8 projects dialysis utilization for five years after the last calendar year when year-end in-center patient data by planning area from the NWRN modality reports is available prior to the letter of intent submission date, per WAC 246-310-812(4)(b). This fifth future year is deemed to be the projection year for identifying the maximum number of stations that may be approved within a planning area under the state methodology, per WAC 246-310-800(16). This methodology is based on the following:

- Performing a 5-year future regression of 5-year historical data, described in WAC 246-310-812(4), using either the linear or nonlinear regression methodology determined in the prior table to determine total projected patient volume. In this case, the linear methodology is used.

- Applying the patient to station conversion factor – either 4.8 patients per station for urban areas or 3.2 patients per station for designated rural counties – to determine total station need in the area. In this case, the 4.8 patients per station utilization factor is applied.
- Subtracting existing stations for dialysis facilities in the planning area from the total station need and rounding up to the next whole number of stations to determine net station need.

Table 8 Projected Station Need for the Planning Area by Year					
Snohomish 2	Year 1	Year 2	Year 3	Year 4	Year 5
	2018	2019	2020	2021	2022
Projected Hemodialysis Patients	285.0	294.0	303.0	312.0	321.0
Patient:Station Converstion Factor	4.8	4.8	4.8	4.8	4.8
Total Station Need	59.38	61.25	63.13	65.00	66.88
Rounded to the next whole number	60.00	62.00	64.00	65.00	67.00
Existing Stations	58	58	58	58	58
Net Station Need	-2.00	-4.00	-6.00	-7.00	-9.00

[1]

However, DaVita is applying for a **special circumstances two (2) station expansion** for Pilchuck Dialysis Center under WAC 246-310-818. Per WAC 246-310-818(1), the Department will approve one or two additional special circumstance stations for an existing kidney dialysis facility if it meets certain criteria, regardless of whether the need methodology in WAC 246-310-812 projects a need for additional stations in the planning area.

4. Provide the facility's historical utilization for the last three full calendar years.

As DaVita Pilchuck Dialysis Center is an existing facility for which DaVita is applying for a two (2) station expansion, the facility's historical utilization for the last three full calendar years is provided in Table 9 below. The relevant data for total in-center patients and total home patients is the NWRN modality reports for the periods ended 12/31/2015, 12/31/2016, and 12/31/2017. The relevant data for total in-center stations is the historical number of operational stations for 2015, 2016, and 2017. The relevant data for total in-center treatments and total home treatments is from internal calendar year-end financial reports.

Table 9 DaVita Pilchuck Dialysis Historical Utilization	**CY 2015**	**CY 2016**	**CY 2017**
Total in-center stations (exc. Iso)	8	8	8
Total in-center patients (end of year)	15	31	42
Total in-center treatments	2,328	3,973	5,695
Total home patients (end of year)	10	9	13
Total home treatments	613	1,459	1,476

[1] [1] Note that patient projections use 2013 through year-end 2017 existing data per the department's methodology. A trend line using data from this period is then projected through 2022 to project station need.

5. Historical utilization data for the most recent six months preceding the letter of intent period

DaVita is proposing to add two (2) stations to Pilchuck Dialysis Center under WAC 246-310-818. Per WAC 246-310-818(1)(a), a facility in a 4.8 planning area (Snohomish 2) must operate at or above an average of 5.0 patients per station for the most recent six consecutive month period preceding the letter of intent submission date for which data is available. Table 10 includes the most recent six months' utilization data for in-center patients available from the NWRN preceding the letter of intent period. As the letter of intent period was October 1, 2018, these six months end on September 30, 2018.

Table 10 DaVita Pilchuck Dialysis Center Previous Six Month Utilization	**Apr-18**	**May-18**	**Jun-18**	**Jul-18**	**Aug-18**	**Sep-18**	**Average Patients Per Station**
Total CN approved in-center stations	8	8	8	8	8	8	
Total in-center patients	43	45	44	47	48	50	
Patients per Station	5.38	5.63	5.50	5.88	6.00	6.25	5.77

Per WAC 246-310-818(5), a facility is ineligible for a special circumstances one-or-two-station expansion in a 4.8 planning area (Snohomish 2) if the owner or affiliate has approved certificate of need stations in the planning area that have operated below an average of 4.5 patients per station for the most recent six consecutive month period preceding the letter of intent submission date for which data is available. DaVita Pilchuck Dialysis has operated above 4.5 patients per station for this period.

Table 11 DaVita Everett Dialysis Center Previous Six Month Utilization	**Apr-18**	**May-18**	**Jun-18**	**Jul-18**	**Aug-18**	**Sep-18**	**Average Patients Per Station**
Total CN approved in-center stations	13	13	13	13	13	13	
Total in-center patients	67	65	64	65	69	72	
Patients per Station	5.15	5.00	4.92	5.00	5.31	5.54	5.15

Per WAC 246-310-818(7), a special circumstances one-or-two-station expansion will not be approved if, with the requested new station(s), the applicant's kidney dialysis facility would fall below 4.5 patients per station in a 4.8 planning area, as calculated against the average patients per station over the previous six months utilization shown in Table 10. Hypothetical utilization of Pilchuck Dialysis Center after a two (2) station expansion to ten (10) stations is shown below in Table 12.

Table 12 DaVita Pilchuck Dialysis Center Hypothetical Utilization Average Post-Expansion	**Apr-18**	**May-18**	**Jun-18**	**Jul-18**	**Aug-18**	**Sep-18**	**Post-Expansion Patients Per Station**
Total CN approved in-center stations	10	10	10	10	10	10	
Total in-center patients	43	45	44	47	48	50	
Patients per Station	4.30	4.50	4.40	4.70	4.80	5.00	4.62

6. Provide projected utilization of the proposed facility for the first three full years of operation. For existing facilities, also provide the intervening years between historical and projected. Include all assumptions used to make these projections.

The table below provides projected utilization summaries through completion of the third full year of operation (2022). In-center patient volume is based on a 5-year projection of Snohomish 2 patients using a regression of 5 years historical data and DaVita's own experience. In-center treatments are based on an assumption of 3 treatments per week per patient for 52 weeks with a 5% allowance for missed treatments, except for 2018, which is annualized from 3rd quarter actual figures. Facility-specific growth rates and home patient volume and growth rates are based on a 5-year projection of Snohomish 2 patients using a regression of 5 years historical data, facility growth rates, planning area growth rates, historical home/in-center proportions, and DaVita's experience. The expansion year anticipates expansion on July 1, 2019.

The 2022 utilization rate, in the third full year of operation, exceeds 80% of 6-shift utilization of ten (10) general stations using a 6-shift utilization standard of 4.8 patients per station.

Table 13 **DaVita Pilchuck Dialysis Center Projected Utilization**	**Current Year 2018 (based on Q3 Annualized)**	**Expansion Year 2019**	**Projection Year 2020**	**Projection Year 2021**	**Projection Year 2022**
Total in-center stations (excluding CON exempt ISO)	8	10	10	10	10
Total in-center patients (average)	43.25	45.63	47.88	50.13	52.38
Total in-center treatments	7,172	6,762	7,095	7,429	7,762
Total home patients (average)	13.00	13.33	13.99	14.64	15.30
Total home treatments	1,653	1,975	2,073	2,170	2,268

7. Provide patient origin zip code data for the most recent full calendar year of operation.

The relevant source of this information is internal files for patients who dialyzed in-center at DaVita Pilchuck Dialysis from 1/1/2017-12/31/2017, where available. This data set includes visitor patients and those who only dialyzed for part of the calendar year, where available. Note that this number will not match year-end census due to these inclusions and data set limitations. Please see Appendix 4 for the complete data table.

8. Identify any factors in the planning area that could restrict patient access to dialysis services.

DaVita is not aware of factors relating to its proposed expansion of services that could restrict patient access to dialysis services in the planning area. On the contrary, an expansion of stations in its efficiently-run Pilchuck Dialysis Center, currently averaging more than 5.0 patients per station utilization of the past six (6) months, will enhance patient access. As detailed in its response to question 7 under the Project Description, no existing services provided to dialysis patients or community members diagnosed with chronic kidney disease (CKD) will be curtailed under this project.

9. Identify how this project will be available and accessible to low-income persons, racial and ethnic minorities, women, mentally handicapped persons, and other under-served groups.

DaVita's history of providing dialysis services at numerous locations throughout Washington State provides evidence that all ESRD patients have access to DaVita's facilities, including members of the under-served groups referenced in WAC 246-310-210(2). Appendix 14 includes a copy of the admission, patient financial evaluation, and patient involuntary transfer policies which document that access will not be denied at DaVita Pilchuck Dialysis Center due to indigence, racial or ethnic identity, gender or handicapped status. The pro forma shows that funds have been budgeted to provide charity care.

10. If this project is either a partial or full relocation of an existing facility, provide a detailed discussion of the limitations of the current site consistent with WAC 246-310-210(2).

This question is not applicable to this project.

11. If this project is either a partial or full relocation of an existing facility, provide a detailed discussion of benefits associated with the relocation consistent with WAC 246-310-210(2).

This question is not applicable to this project.

12. Provide a copy of the following policies:

- Admissions policy
- Charity care or financial assistance policy
- Patient Rights and Responsibilities policy
- Non-discrimination policy
- Any other policies directly associated with patient access (example, involuntary discharge)

Copies of these policies are provided in Appendix 14. DaVita's history of providing dialysis services at numerous locations throughout Washington State provides evidence that all ESRD patients have access to

DaVita's facilities, including members of the under-served groups referenced in the regulation, in combination with the policies in Appendix 14.

B. Financial Feasibility (WAC 246-310-220 and 246-310-815)

1. Provide the following agreements/contracts:

- Management agreement.
- Operating agreement
- Medical director agreement
- Development agreement
- Joint Venture agreement

A signed Medical Director Agreement valid through the first three full years following completion of the project is included in Appendix 3. The in-center Medical Director is Dr. Thao Pascual. Dr. Oliver Tai is the medical director for peritoneal dialysis.

Neither a management agreement nor an operating agreement is applicable to this project, as DaVita Inc. is the sole owner and operator of Pilchuck Dialysis via its subsidiary, Refuge Dialysis, LLC. Nor is a joint venture agreement applicable, as DaVita is the sole owner of Everett Dialysis and will continue to be so at the conclusion of the project – it has no joint venture partners on this project.

2. Provide documentation of site control. This could include either a deed to the site or a lease agreement for the site. If a lease agreement is provided, the terms must be for at least five years following project completion.

The DaVita Pilchuck Dialysis Center lease is included in Appendix 15.

3. Provide county assessor information and zoning information for the site. If zoning information for the site is unclear, provide documentation or letter from the municipal authorities showing the proposed project is allowable at the identified site.

Zoning & county assessor documentation for the existing DaVita Pilchuck Dialysis Center is provided in Appendix 15.

4. Complete the table below with the estimated capital expenditure associated with this project. Capital expenditure for the purposes of dialysis applications is defined under WAC 246-310-800(3). If you have other line items not listed below, include the

definition of the line item. Include all assumptions used to create the capital expenditure estimate.

Table 14: Estimated Capital Expenditure Item	Cost
a. Land Purchase	$ -
b. Utilities to Lot Line	$ -
c. Land Improvements	$ -
d. Building Purchase	$ -
e. Residual Value of Replaced Facility	$ -
f. Building Construction	$ -
g. Fixed Equipment (not already included in the construction contract)	$ -
h. Movable Equipment	$ 41,428
i. Architect and Engineering Fees	$ -
j. Consulting Fees	$ -
k. Site Preparation	$ -
l. Supervision and Inspection of Site (including Permits)	$ -
m. Any Costs Associated with Securing the Sources of Financing (include interim interest during construction)	
1. Land	$ -
2. Building	$ -
3. Equipment	$ -
4. Other	$ -
n. Washington Sales Tax (where applicable) - included in line items	$ -
Total Estimated Capital Expenditure	**$41,428**

Movable equipment includes the additional machine, as well as the necessary computer equipment, to add a matching station to Pilchuck Dialysis Center. Sales tax is assumed at the rate of 9.1%, and is not assessed on dialysis machines.

5. Identify the entity responsible for the estimated capital costs identified above. If more than one entity is responsible, provide breakdown of percentages and amounts for all.

DaVita, Inc, via its subsidiary Refuge Dialysis, LLC., is solely responsible for the capital costs identified above.

6. Provide a non-binding contractor's estimate for the construction costs for the project.

This question is not applicable, as there are no construction costs for this project.

7. Provide a detailed narrative regarding how the project would or would not impact costs and charges for services. WAC 246-310-220.

Historical revenue and expense statements, including the current year, are included in Appendix 8. The DaVita Pilchuck Dialysis Center Detailed Projected Operating Statement (Pro Forma) covering the first three full years in operation is included in Appendix 9. As required per WAC 246-310-815(1)(b), that pro forma is based on the facility's current payor mix and current expenses. All major pro forma assumptions are also outlined in Appendix 9.

No existing facility is expected to lose volume or market share below Certificate of Need standards as a result of this project, as Pilchuck Dialysis is already operating at or near capacity by virtue of its utilization eligibility for a special circumstances application. The proposed facility will operate at utilization levels consistent with required utilization levels. Reimbursements for dialysis services are not subject to or affected by capital improvements and expenditures by providers; the proposed project will have no impact on increases in charges for services within the ESRD planning area.

8. Provide documentation that the costs of the project, including any construction costs, will not result in an unreasonable impact on the costs and charges for health services in the planning area. WAC 246-310-220.

WAC 246-310-815(2) requires that applicants limit the costs of facility projects by creating a test of reasonableness in the construction of finished treatment floor area square footage. The treatment floor area must not exceed the maximum treatment floor area square footage defined in WAC 246-310-800(11). As outlined in response to Question Eleven under the Project Description, DaVita does not propose to construct treatment floor space in excess of the maximum treatment floor area square footage, and thus, under the WAC 246-310-815(2) test, this project does not have an unreasonable impact on costs and charges.

Additionally, as noted in response to question seven, reimbursements for dialysis services are not subject to or affected by capital improvements and expenditures by providers; the proposed project will have no impact on increases in charges for services within the ESRD planning area.

9. Provide the projected payer mix by revenue and by patients using the example table below. If "other" is a category, define what is included in "other."

Table 15 provides expected payor mix for Pilchuck Dialysis Center, projected using DaVita's market knowledge, experience, and expertise.

Table 15 DaVita Pilchuck Dialysis Projected Payor Mix	Percentage by Revenue	Percentage by Patient
Medicare Fee-For-Service	15.81%	45.54%
Medicaid Fee-For-Service	0.68%	2.19%
Commercial, HMO, Other Government, and Other	83.51%	52.27%
Total	100.00%	100.00%

10. If this project proposes the addition of stations to an existing facility, provide the historical payer mix by revenue and patients for the existing facility.

Table 16 provides a three-year historical average of payor mix for Pilchuck Dialysis Center.

Table 16 DaVita Pilchuck Dialysis Historical Average Payor Mix	Percentage by Revenue	Percentage by Patient
Medicare Fee-For-Service	15.37%	44.45%
Medicaid Fee-For-Service	0.66%	2.21%
Commercial, HMO, Other Government, and Other	83.97%	53.33%
Total	100.00%	100.00%

11. Provide a listing of all new equipment proposed for this project. The list should include estimated costs for the equipment. If no new equipment is required, explain.

Table 17 provides a listing of all new equipment proposed for this project (including estimated sales tax).

Table 17 Pilchuck Dialysis Center Expansion New Equipment	
Expenditure Category	**Allocated Equipment Cost**
Communication/Computer Equipment	$ 5,019
Water Treatment/Biomedical/Reuse	$ -
Clinical Equipment	$ 32,046
Dialysis Machines, IV Pumps, AED, EKG, etc.	
Permanent bed	
Patient Scale, Ice Machine, Patient Lift, etc.	
Dialysis Chairs, Chart Racks, Stools, etc.	
Storage, Fixtures, Artwork, Office Equipment, etc.	$ 4,364
Sales Tax - included in line items (no tax on dialysis machines)	
Total Equipment Costs	**$ 41,428**

12. Provide a description of any equipment to be replaced, including cost of the equipment, and salvage value (if any) or disposal, or use of the equipment to be replaced.

No equipment is to be replaced during this project.

13. Identify the source(s) of financing (loan, grant, gifts, etc.) and provide supporting documentation from the source.

The project will be funded from DaVita's capital expenditures budget. Capital budgeting reflects appropriate allocations of funds for projects in the Pacific Northwest. A letter from Mike Staffieri, Chief Operating Officer, committing to these funds is included as Appendix 6.

14. Provide the applicant's audited financial statements covering at least the most recent three years. WAC 246-310-220.

Audited financial statements for DaVita Inc., covering the time period from 2015-2017, are provided in Appendix 10.

C. Structure and Process (Quality) of Care (WAC 246-310-230)

1. Provide a table that shows FTEs [full time equivalents] by category for the proposed facility. If the facility is currently in operation, include at least the last three full years of operation, the current year, and the first three full years of operation following project completion. There should be no gaps in years.

Table 18 presents both historical and projected staffing for DaVita Pilchuck Dialysis Center.

Table 18			FY15	FY16	FY17	FY18	FY19	FY20	FY21	FY22
							Projected FTEs			
	Avg Wage Rate (2017)	Staffing Ratio (pts per shift, FTE, or stations)	Historic Year 2015	Historic Year 2016	Historic Year 2017	Current Year 2018	Expansion Year 2019	Full Year 2020	Full Year 2021	Full Year 2022
Administrator	$ 41.99	80	0.63	0.42	0.57	0.24	0.74	0.77	0.81	0.85
Admin Assistant	$ 18.95	110	0.43	0.41	0.49	0.66	0.75	0.75	0.75	0.75
Social Worker	$ 33.75	120	0.19	0.25	0.34	0.57	0.49	0.52	0.54	0.56
Dietician	$ 31.11	120	0.22	0.38	0.48	0.45	0.49	0.52	0.54	0.56
RN - In-Center	$ 39.43	24	0.76	1.91	2.47	2.81	2.97	3.11	3.26	3.41
LPN	$ -	14	-	-	-	-	-	-	-	-
PCT	$ 18.32	12	1.57	2.30	4.08	4.71	3.80	3.99	4.18	4.36
RN - PD	$ 38.62	18	0.33	0.53	0.61	0.72	0.74	0.78	0.81	0.85
RN - HHD	$ -	14					-	-	-	-
Biomed	$ 28.53	40	0.17	0.23	0.31	0.34	0.28	0.28	0.28	0.28
Other	$ 27.99	80	0.86	2.27	1.58	2.52	2.64	2.77	2.90	3.03

2. Provide the assumptions used to project the number and types of FTEs identified for this project.

DaVita projects FTEs based on staffing ratios for patients per shift, FTE, or station count (including any exempt isolation station, in the case of biomed), combined with clinical expertise and historical experience with the facility. General ratios are presented in Table 18.

3. Identify the salaries, wages, and employee benefits for each FTE category.

Aggregated salary and wage rates for each FTE category are noted in Table 17, based on actual rates from 2017. Current non-base wage, benefit, and tax is estimated at 72% of wage based on 2017 data.

4. Provide the name and professional license number of the current or proposed medical director. If not already disclosed under 210(1) identify if the medical director is an employee or under contract.

The current (and proposed) in-center and Medical Director is Dr. Thao Pascual (MD # 1821015728). She is under contract to provide medical director services to DaVita Pilchuck Dialysis Center, and is not an employee of DaVita. The current (and proposed) peritoneal dialysis and Medical Director is Dr. Oliver Tai (MD # 1699885731). He is under contract to provide medical director services to DaVita Pilchuck Dialysis Center, and is not an employee of DaVita.

5. Identify key staff, if known. (nurse manager, clinical director, etc.)

The Pilchuck Dialysis Center Facility Administrator (FA) is Liz Miller.

6. For existing facilities, provide names and professional license numbers for current credentialed staff.

Names and professional license numbers for current credentialed staff are provided in Appendix 7.

7. Describe your methods for staff recruitment and retention. If any barriers to staff recruitment exist in the planning area, provide a detailed description of your plan to staff this project.

DaVita anticipates no difficulty in recruiting the necessary personnel to continue to staff DaVita Pilchuck Dialysis Center. Based on our experience operating facilities in the planning area, Davita anticipates that staff from the existing Pilchuck Dialysis Center and geographically adjacent facilities will serve patients at the expanded Pilchuck Dialysis Center. Moreover, DaVita has been repeatedly recognized as a Top Employer and a Military Friendly Employer (davita.com/about/awards) and offers a competitive wage and benefit package to employees. DaVita posts openings nationally both internally and external to DaVita.

8. Provide a listing of proposed ancillary and support agreements for the facility. For existing facilities, provide a listing of the vendors.

Please see a list of ancillary and support agreements in place at DaVita Pilchuck Dialysis Center, along with their vendors, in Appendix 11.

9. For existing facilities, provide a listing of ancillary and support service vendors already in place.

Please see the list of ancillary and support agreements and their vendors in Appendix 11.

10. For new facilities, provide a listing of ancillary and support services that will be established.

This question is not applicable to an expansion project.

11. Provide a listing of ancillary and support services that would be provided on site and those provided through a parent corporation off site.

Ancillary services such as social services, nutrition services, financial counseling, pharmacy access, patient education, staff education, information services, material management, administration and biomedical technical services are provided on site. Additional services are coordinated through DaVita's main office in Denver, Colorado, and support offices in Federal Way and Tacoma, Washington, and elsewhere. These ancillary and support services provided centrally include the Guest Services Program that provides assistance in locating other dialysis facilities for patients wishing to travel or relocate. In addition, DaVita offers centralized revenue cycle, management services, quality improvement services, biomedical equipment maintenance and a number of other high-value off-site programs.

12. Identify whether any of the existing ancillary or support agreements are expected to change as a result of this project.

No existing ancillary or support agreements are expected to change as a result of this project.

13. If the dialysis center is currently operating, provide a listing of healthcare facilities with which the dialysis center has working relationships.

DaVita Pilchuck Dialysis Center has a number of strong working relationships that tie it to its community, including a Patient Transfer Agreement with Overlake Medical Center in Everett, WA. Please find a listing of these relationships in Table 19 below.

Table 19 **Healthcare Facility Relationships**	**Type of Relationship**
Providence Everett Medical Center	Patient Transfer Agreement
Other Regional Hospitals	Patient Discharge, Chronic and Acute Dialysis

Bethany of the Northwest	Nursing Home Dialysis Transfer Agreement
Prestige Post-Acute and Rehab Center	Nursing Home Dialysis Transfer Agreement
Local Physician Groups	Attending and Rounding

14. For a new facility, provide a listing of healthcare facilities with which the dialysis center would establish working relationships.

This question is not applicable.

15. Clarify whether any of the existing working relationships would change as a result of this project.

No existing working relationships are expected to change as a result of this project, except for any enhancement due to increased access to dialysis services for other healthcare facilities' ESRD patients.

16. Fully describe any history of the applicant concerning the actions noted in Certificate of Need rules and regulations WAC 246-310-230(5)(a). If there is such history, provide documentation that the proposed project will be operated in a manner that ensures safe and adequate care to the public to be served and in conformance with applicable federal and state requirements. This could include a corporate integrity agreement or plan of correction.

DaVita and the United States Department of Health and Human Services, Office of Inspector General entered into a Corporate Integrity Agreement ("CIA") to promote compliance with the statutes, regulations, and written directives of Medicare, Medicaid, and all other Federal health care programs and, in particular, included the appointment of an Independent Monitor to prospectively review DaVita's arrangements with nephrologists and other health care providers for compliance with the Anti-Kickback Statute (collectively, "Federal Health Care Programs and Laws"). That Independent Monitor completed the prospective review process in the fall of 2017. Each arrangement is now reviewed by the Risk Rating team to ensure that it is compliant with these Federal Health Care Programs and Laws. A full copy of the Corporate Integrity Agreement is included with this application in Appendix 19.

17. Provide documentation that the proposed project will promote continuity in the provision of health care services in the planning area, and not result in an unwarranted fragmentation of services. WAC 246-310-230

Appendix 17 provides a summary of quality and continuity of care indicators used in DaVita's quality improvement program. The DaVita Continuous Quality Improvement (CQI) program incorporates all areas of the dialysis program. The program monitors and evaluates all activities related to clinical outcomes, operations management, and process flow. Dialysis-specific statistical tools (developed by DaVita) are used for measurement, analysis, communication, and feedback. Continuing employee and patient education are

integral parts of this program. Appendix 17 includes an example of DaVita Quality Index (DQI) data. Appendix 18 includes an example of DaVita's Physician, Community and Patient Services offered through DaVita's Kidney Smart Education Program. Appendix 12 includes a copy of the transfer agreement between DaVita Pilchuck Dialysis Center and an area care partner. DaVita has been honored as one of the World's Most Admired Companies® by FORTUNE® magazine since 2006, confirming its excellence in working effectively with the communities it serves (davita.com/about/awards).

From the perspective of a dialysis patient with multiple relevant healthcare providers, such as a primary care provider, nephrologist, home care caregivers or skilled nursing or assisted living caregivers, and perhaps (unfortunately) a recently-visited hospital. DaVita is committed to the wellbeing of its patients, and for patients with a diagnosis as complex as end-stage renal disease, that wellbeing by necessity requires communication and coordination with multiple caregivers, such as those above. DaVita uses an interdisciplinary team consisting of the facility social worker, dietician, clinical nurse manager, medical director, and the patient's nephrologist to facilitate communication and coordination through the healthcare system. If a comorbidity is identified that impacts the patient's health, the patient's nephrologist or medical director would reach out to the patient's primary care physician for consult. DaVita would also ensure any change in the care plan from the patient's nephrologist is executed in consultation with the facility medical director. DaVita collaborates with home or assisted living and skilled nursing caregivers on a daily basis, including in cases such as the patient's above, reviewing transportation, dialysis medication needs, access care, as well as taking in any dialysis-related concerns those patients may have and reviewing them in consultation with the interdisciplinary team. When a hospital is unfortunately required to intervene in a patient's care, DaVita facilitates rapid discharges back to chronic dialysis, coordination of medical records into the patient's chart, and coordination with the patient's nephrologist for any care plan changes. Additionally, all DaVita dialysis centers enter into hospital and nursing home transfer agreements, and participate in community emergency preparedness drills to ensure maximum coordination in the healthcare arena. Dialysis is one of the healthcare modalities that, due to its regular cadence and length, is one of patients' most consistent touchpoints with the healthcare system, and DaVita is committed to working with its patients to use these points to coordinate and communicate among the patient's healthcare providers across the healthcare system.

18. Provide documentation that the proposed project will have an appropriate relationship to the service area's existing health care system as required in WAC 246-310-230.

The proposed expansion of DaVita Pilchuck Dialysis Center will have an appropriate relationship to the service area's existing health care system. DaVita Pilchuck Dialysis is a key component of the existing health care system in the service area, and the project will enable enhanced patient access in an already highly utilized facility with a census of more than 5.0 patients per station. Furthermore, DaVita Pilchuck Dialysis Center has a long track record of working with area providers, including a Patient Transfer Agreement seen in Appendix 12, to provide the highest possible quality of care to patients.

19. Provide documentation to verify that the facility would be operated in compliance with applicable state and federal standards. The assessment of the conformance of a project to this criterion shall include, but not be limited to, consideration as to whether the applicant or licensee has no history, in this state or elsewhere, of a criminal conviction which is reasonably related to the applicant's competency to exercise responsibility for the ownership or operation of a health care facility, a denial or revocation of a license to operate a health care facility, a revocation of a license to practice a health profession, or a decertification as a provider of services in the Medicare or Medicaid program because of failure to comply with applicable federal conditions of participation.

The applicant has no adverse history of license revocation or decertification in Washington State. DaVita has no criminal convictions related to DaVita's competency to exercise responsibility for the ownership or operation of its facilities. As previously reported, a DaVita facility in Tennessee was decertified and closed ten years ago (2007) and DaVita voluntarily temporarily shut down a facility in Texas nine years ago (2008). DaVita has also supplied, in Appendix 13, a list of all state regulatory agencies with which it interacts.

D. Cost Containment (WAC 246-310-240)

1. Identify all alternatives considered prior to submitting this project.

Alternative 1: Do nothing, that is do not apply for one additional special circumstances station in Snohomish 2 to expand Pilchuck Dialysis Center. Currently, DaVita Pilchuck Dialysis is a very busy facility, with average utilization of 5.77 patients per station in the latest monthly data available from the NWRN, and thus has little additional capacity to provide access to Snohomish 2 patients. With strong and consistent demand for access to DaVita's services and without expansion, patients will be forced to dialyze at less convenient times, locations, or even out of the planning area entirely. This alternative was rejected.

Alternative 2: Expand the Pilchuck Dialysis Center by two (2) stations. The existing Everett facility is operating at an average of 5.77 patients per station. An expansion of two (2) stations under special circumstances review can be completed quickly and cost-efficiently but, most importantly, will provide crucial additional access for patients. Additionally, DaVita Pilchuck is a 4-Star rated facility by CMS that has the benefit of a proven track record in operational effectiveness and clinical excellence. **This alternative was selected.**

2. Provide a comparison of the project with alternatives rejected by the applicant. Include the rationale for considering this project to be superior to the rejected alternatives. Factors to consider can include, but are not limited to: patient access to healthcare services, capital cost, legal restrictions, staffing impacts, quality of care, and cost or operation efficiency.

Please see the exploration and analysis of alternatives in response to Question One above.

3. For existing facilities, identify your closest two facilities as required in WAC 246-310-827(3)(a).

This question is not applicable to special circumstances applications per WAC 246-310-818(11).

4. For new facilities, identify your closes three facilities as required in WAC 246-310-827(3)(b).

This question is not applicable to special circumstances applications per WAC 246-310-818(11), nor this project as an expansion of an existing facility.

5. Identify whether any aspects of the facility's design could lead to operational efficiency. This could include but is not limited to: LEED building, water filtration, or the methods for construction, etc. WAC 246-310-240(2) and (3).

DaVita Pilchuck Dialysis Center will meet all current energy conservation standards. In addition, expansion will allow full use of the expanded facility designed to meet current energy utilization requirements.

Medical Director Agreement

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

FACILITY AND ASSOCIATE MEDICAL DIRECTOR AGREEMENT
SCHEDULE 1: SELECTED KEY TERMS

This Schedule 1 is attached to and a part of this Facility and Associate Medical Director Agreement.

1. Parties and Notice:

Party	Name	Notice Address	Address for Additional Required Copy of Notice
Group	The Everett Clinic	3901 Hoyt Avenue Everett, WA 98201	
Company	Refuge Dialysis, LLC	c/o Chief Operating Officer 2000 16th Street Denver, CO 80202	c/o Senior Corporate Counsel-Operations 601 Hawaii Street El Segundo, CA 90245
Physicians	Thao Pascual, M.D. Oliver Tai, M.D.	c/o The Everett Clinic 3901 Hoyt Avenue Everett, WA 98201	

2. Center:

Name	Number	Address
Pilchuck Dialysis Center	#11160	1250 State Avenue Marysville, WA 98270-3659

3. Date of Last Signature: The "Effective Date" shall be the date of last signature (shown via DocuSign or if DocuSign is not used by one or more of the parties, the date of last signature of all parties to this Agreement).

4. Initial Term:

The Initial Term of this Agreement shall commence on the later of December 15, 2017 or the Effective Date (the "Commencement Date") and shall continue thereafter for a period of three (3) years, unless earlier terminated pursuant to the terms of this Agreement.

5. Renewal Term: At the expiration of the Initial Term and each successive Renewal Term, the term of this Agreement shall be extended automatically for additional one (1) year periods (each, a "Renewal Term") unless Group or Company gives at least 180 days' prior written notice of the non-extension of the Initial Term or Renewal Term then in effect to the other, in which case, the Term shall expire and terminate on the last day of the Initial Term or Renewal Term then in effect.

6. Facility Medical Director: Thao Pascual, M.D.

7. Associate Medical Director: Oliver Tai, M.D.

8. Preapproved Physicians: Thao Pascual, M.D. and Oliver Tai, M.D.

FACILITY AND ASSOCIATE MEDICAL DIRECTOR AGREEMENT

This Facility and Associate Medical Director Agreement ("Agreement") is by and among **Refuge Dialysis, LLC**, a Delaware limited liability company ("Company"), **The Everett Clinic, P.S.** ("Group") and **Thao Pascual, M.D.** ("Facility Medical Director") and **Oliver Tai, M.D.** ("Associate Medical Director") (each a "Medical Director").

RECITALS

A. Company is in the business of owning and operating dialysis centers including the center known as "**Pilchuck Dialysis**", as more particularly described in Schedule 1. In addition to providing staff-assisted hemodialysis services, Center provides training support, equipment, and supplies for patients who perform peritoneal dialysis in their homes (the "PD Program"), and undergo hemodialysis in their homes (the "HHD Program"), including a nocturnal shift ("Nocturnal Shift"). Group is in the business of rendering medical services through duly licensed physicians who are affiliated with Group, including the Preapproved Physicians.

B. Pursuant to the Conditions for Coverage for ESRD facilities, Company must designate a lead facility medical director for the Center to provide Medical Director Services of the in-center hemodialysis program, including the Nocturnal Shift ("Facility Medical Director") and an associate medical director to perform the Services as they relate to the PD Program and the HHD Program ("Associate Medical Director");

C. Facility Medical Director shall oversee and be responsible for the services provided by the Associate Medical Director;

D. During the Term, Company shall provide Medical Directors with equipment, materials, facilities, and valuable Confidential Information for the purpose of assisting Medical Directors in the performance of each Medical Director's obligations and responsibilities under this Agreement.

E. This Agreement contains the respective rights and obligations of the parties hereto in connection with each Medical Director's appointment and role in performing the Services hereunder.

F. Capitalized terms not otherwise defined shall have the meanings set forth in **Exhibit A**, which is attached to and incorporated in this Agreement.

G. Company recognizes that at some time during the Term, Group may want to change its name or assign its interest in Group to its parent, subsidiary or other affiliate entity.

In consideration of the Recitals, which are incorporated herein, the mutual promises herein, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

1. **Initial Term and Renewals**. The Term of this Agreement shall be as set forth in Schedule 1. The Agreement may be renewed as set forth in Schedule 1.

2. **Appointment**.

2.1 Current Appointment. The physicians listed as Facility Medical Director and Associate Medical Director in Schedule 1 are duly appointed and agree to serve as such Facility Medical Director and

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

Associate Medical Director, respectively, of the Center ("Appointment"). Without limiting Group's obligations under this Agreement, each Medical Director hereby represents and warrants that he or she meets the Medical Director Qualifications and will perform the Services under this Agreement and will comply with all other requirements applicable to Medical Directors hereunder. Subject to the terms and conditions of Section 2.2, the Preapproved Physicians set forth in Schedule 1 have been preapproved by Company to serve as a Medical Director of the Center. During the Term, the Services shall be provided only through the Preapproved Physicians, except as otherwise expressly set forth herein. At Company's discretion, and pursuant to a written amendment executed by all parties hereto, additional physicians may provide Services as medical directors; however, Facility Medical Director set forth in Schedule 1 or any successor Facility Medical Director shall at all times be the lead Facility Medical Director and shall be responsible for oversight of any other associate physicians providing Services. Each Facility Medical Director and Associate Medical Director may be referred to in this Agreement, individually and collectively, as "Medical Director."

2.2 New Appointments. Group may appoint any Preapproved Physician to serve as a successor Medical Director for Center, provided that such Preapproved Physician meets the Medical Director Qualifications and, pursuant to Company's then-current compliance standards, such Preapproved Physician has the practice capacity to provide the Services at the Center at the time of his or her appointment as successor Medical Director. Notwithstanding the foregoing, Group may not make multiple appointments of Preapproved Physicians to serve as a successor Medical Director for Center in any 12 month period without written consent from Company. There shall be no adjustment to the compensation paid under this Agreement upon the appointment of one of the Preapproved Physicians listed in Schedule 1. If Group wishes to appoint a physician not listed in Schedule 1 as Medical Director or add a new Preapproved Physician, Group shall obtain Company's consent and the compensation set forth in Schedule 1 shall be subject to modification (see Section 3.2), based on Company's assessment of the fair market value of such physician's qualifications and DaVita's policies and procedures for fair market value medical director compensation. Group shall provide Company and the Division Vice President for the division of Company in which Center is located with reasonable advance notice of its intent to appoint a successor Medical Director or add an additional Preapproved Physician. If such successor is a Preapproved Physician, Company shall memorialize its acceptance in a written notification to Group, and any appointment (and acceptance) of a successor Medical Director who is not a Preapproved Physician shall be subject to and memorialized in an amendment duly executed by the parties.

3. Compensation.

3.1 Compensation Structure. Company will pay Group for the performance of the Services the sums set forth in Schedule 1. In the event of a temporary closure of the Center, including due to renovation or an Interruption Event, no payment will be owed for Services from the date the Center closes until it reopens, other than Interruption Services, if any. Company shall only be obligated to compensate Group for Services rendered through the Termination Date. For purposes of this section, fair market value shall be determined by DaVita's compliance policies and procedures. Adjustments to compensation made in accordance with this provision shall become effective on the date of last signature to the Amendment.

3.2 Adjustment. In the event that Company consents to an appointment of a successor Medical Director, who is not a Preapproved Physician, pursuant to Section 2 of this Agreement, the compensation set forth in Schedule 1 will be subject to modification based on Company's assessment of the successor Medical Director's qualifications and DaVita's then current policies and procedures for fair market value medical director compensation. Any such change to the compensation based on the appointment of a non-Preapproved Physician shall be memorialized in an amendment duly executed by the parties. One hundred eighty (180) days prior to the first day of each Renewal Term, the parties shall begin negotiation of any compensation adjustment to be effective at the commencement of the Renewal Term; however, if no such

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

agreement can be reached during such 180- day period, and negotiation extends beyond the commencement of the Renewal Term, then any such compensation adjustment, if applicable, will not be effective until such time as the agreement or amendment documenting the revised compensation is fully executed, or the commencement date of such agreement, or amendment, whichever is later, and shall only be paid prospectively for services rendered after that date. In the event that Company discontinues a modality, such as the staff-assisted hemodialysis services, a HHD Program, a PD Program at Center, or the Nocturnal Shift, the compensation set forth on Schedule 1 shall be reduced accordingly. Further, in the event that Company, through audit or review, determines that a particular modality or Nocturnal Shift had no patients or active treatment activity within a particular period of time, Company retains the right to suspend payments for such modality or Nocturnal Shift until such time as Center may have active patients and activities related to such services. In general, Company will audit for compliance and patient activity in areas such as peritoneal and home hemodialysis and Nocturnal Shift. Any adjustment to the compensation based upon discontinuation of a modality or inactivity shall be memorialized in writing.

3.3 Payment. Group and each Medical Director shall adhere to Company forms, policies and procedures regarding invoicing and attestation. Group and Medical Director shall submit an itemized invoice, in a form reasonably acceptable to Company, dated no earlier than the first day of the month following the month in which the Services being invoiced were rendered. Other than an invoice for Interruption Services, Group and Medical Director shall not submit an invoice for the period of time from the date Center closes until it reopens. Each invoice submitted must be accompanied by an attestation, in a form provided by Company, that clearly states the Services were performed and the terms and conditions of this Agreement were fully satisfied by the Medical Director during such month. Subject to Section 5.1 herein, Company shall review the invoice and pay any amounts not disputed in good faith within 30 days of receipt of such invoice. If any disputed item cannot be resolved by the parties within 15 days after payment of the undisputed amount, the parties shall submit to the dispute resolution process set forth in Section 14.2 below. Company may deduct from the amount due the fair market value of any Services set forth in **Exhibit B** not performed by Medical Director in any given month and any other unpaid amounts owed by Group, any employee, shareholder or member of Group, or any Related Physician to Company under this Agreement or any other written agreement among such parties; provided, however, that Company shall first provide notice to Group of its intention to deduct such amounts and give Group an opportunity to provide evidence of entitlement to full payment.

3.4 Fair Market Value. The parties agree that the compensation provided under this Agreement has been determined based on arm's-length bargaining between the parties and reflects fair market value for the Services. Furthermore, the compensation is not and has not been determined in a manner that takes into account the volume or value of any referrals or business otherwise generated for or with respect to Center or between the parties for which payment may be made in whole or in part under Medicare, Medicaid, or any federal or state health care program or under any other third party payor program. At the time of any amendment of this Agreement, the Company may ensure that the compensation paid hereunder continues to reflect Company's internal compliance policies regarding fair market value of the Services being provided and may adjust compensation as necessary.

4. Duties, Responsibilities, and Conditions; Exclusive Use of Center Resources.

4.1 Duties, Responsibilities, and Conditions.

4.1.1 Services. Each Medical Director shall have the duties and responsibilities set forth in **Exhibit B**. The Governing Body of Center shall retain ultimate authority and responsibility for the standards of, and procedures and practices for, the care provided by Center. Each Medical Director shall maintain unrestricted privileges at Center. Associate Medical Director shall provide advice and recommendations regarding Center to the Facility Medical Director for presentation to the Governing Body.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

Only the Facility Medical Director shall be a voting member of the Governing Body. Copies of the Governing Body Bylaws and the Medical Staff Bylaws (together, the "Bylaws") have been or will be made available to each Medical Director. In the event of a governmental survey, each Medical Director shall be present and participate, or arrange for a duly qualified physician to be present and participate, in assisting and providing the government agent with any requested information. In addition, each Medical Director is expected to attend DaVita sponsored educational meetings from time to time. Expenses associated with attending these educational meetings may be reimbursed by DaVita in accordance with applicable DaVita policies and the terms of this Agreement.

4.1.2 Covering Medical Directors. In the event of any temporary absences that would prevent either Medical Director from meeting the requirements of **Exhibit B**, such Medical Director shall notify the Center administrator in writing in advance of such absences, and Medical Director shall arrange for a Covering Medical Director to perform the Services. Any absence in excess of 21 consecutive days or 30 days within any 60 day period shall require Company's prior written consent, which shall not be unreasonably withheld. Each Covering Medical Director shall be deemed to be an agent or employee of Medical Director. In accordance with this Agreement, Company will pay Group for the Services provided by the Covering Medical Director and Group shall pay the Covering Medical Director for such services. Company shall have no responsibility for compensating the Covering Medical Director or supervising the Covering Medical Director, other than that responsibility retained by the Governing Body of Center under **Exhibit B**. Each Covering Medical Director shall: (1) meet the Medical Director Qualifications, (2) meet all Company criteria for membership on the Center's medical staff, and (3) be duly approved by the Governing Body of the Center prior to performing Services pursuant to this Agreement. Group shall ensure that Covering Medical Director complies with the terms of this Agreement, including but not limited to the obligations set forth in Section 5 hereof. Once approved, a Covering Medical Director also can provide routine on-call coverage for Medical Director; provided, however, that Covering Medical Director shall give the Center administrator advance notice of Covering Medical Director's on-call schedule and necessary contact information.

4.2 Exclusive Use of Center Resources. The Center and its supplies, equipment, and non-physician employees shall be utilized by Medical Director solely and exclusively for providing the Services. Except as otherwise agreed in advance in a written agreement setting forth the applicable terms and conditions, which complies with applicable regulatory requirements, and which is duly executed by both parties, no portion of the Center, its supplies or equipment, or the time of any Company employee or contractor shall be utilized by Medical Director or any Related Physician for the general practice of medicine, invoice preparation, or for any other purpose not expressly set forth in this Agreement. Company may deduct from the compensation payable under this Agreement the fair market value of Company space, facilities, supplies, equipment, time of non-physician staff, or any other item or service actually utilized by Medical Director or any Related Physician for the general practice of medicine or for any other purpose not expressly set forth in this Agreement, provided that Company shall first provide notice to Group of its intention to deduct such amounts.

5. Compliance.

5.1 Compliance. The parties enter into this Agreement with the intent of conducting their relationship in full compliance with applicable federal, state, and local law, including without limitation the Anti-Kickback Statute, and certify that no party shall violate the Anti-Kickback Statute with respect to the performance of this Agreement. Notwithstanding any unanticipated effect of any of the provisions of this Agreement, neither party will intentionally conduct itself under the terms of this Agreement in a manner that would violate any such law. Group, Medical Director and each Covering Medical Director shall comply with and ensure that the Center is operated in accordance with:

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

(a) the Bylaws and all of Company's and DaVita's Policies and Procedures (as defined below) and the Company's and DaVita's Code of Conduct;

(b) Company's and the community's standards of care;

(c) the requirements of a medical director imposed by the Conditions for Coverage Section 42 C.F.R. §494.150 et. seq. as may be amended from time to time;

(d) all clinical initiatives of Company and DaVita and initiatives by DaVita's Office of Chief Medical Officer;

(e) all Company and DaVita compliance initiatives and initiatives by DaVita's Chief Compliance Officer, including audits, internal reviews, investigations, protocol monitoring documentation programs, education, and other related initiatives;

(f) all applicable laws, regulations and governmental standards relating to licensing, certification, and operation, including without limitation any federal and state ESRD programs, the disclosure requirements and self-referral prohibitions of the Federal Ethics in Patient Referrals Act, 42 U.S.C. §1395nn (known as the "Stark Law") and any applicable state self-referral laws, the anti-fraud and abuse statute, 42 U.S.C. §1320a-7b(b) (known as the "Anti-Kickback Statute") and any applicable state anti-kickback laws;

(g) HIPAA, including Privacy and Security Standards;

(h) any other applicable federal and state laws; and

(i) Company's and DaVita's corporate compliance program (including, but not limited to, its HIPAA Policies, Code of Conduct, and Policies and Procedures).

Group, Medical Director and each Covering Medical Director shall participate in and complete on an annual basis compliance training (online and otherwise) that Company provides to such parties on an annual basis. The compliance training shall include training on Company policies and procedures designed to ensure compliance with relevant Federal health care program requirements that are applicable to the activities of such parties as required by this Agreement ("Policies and Procedures"), the Company's compliance program, and the Company's Code of Conduct. At least one hour of compliance training will discuss the Anti-Kickback Statute and provide examples of arrangements that potentially implicate the Anti-Kickback Statute. Company shall provide copies of the Policies and Procedures and the Code of Conduct in electronic or hardcopy form as part of the compliance training or in advance of the training.

Group, Medical Director and each Covering Medical Director shall certify in writing or electronic form that each party has received, read, understood and shall abide by the Company Code of Conduct and shall complete and return such certification to Company.

Group, Medical Director and each Covering Medical Director shall provide access to billing documentation, participate in contract and claims audits, and other aspects of Company's and DaVita's compliance program, and, upon request, cooperate and assist during any internal compliance review, investigation, monitoring protocol and/or audit. In addition, Group shall comply with the obligations set forth in the BAA. Group and Medical Director shall ensure that all persons who perform Services under this Agreement adhere to the terms of this Section 5 throughout the Term.

5.1.1 Timeliness. Group and Medical Director shall complete the above training (i)

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

within 30 days after the Commencement Date, and then (ii) annually by April 15th of each subsequent year of the Term (each, a "Training Deadline"). Group and Medical Director shall ensure that any Covering Medical Director completes such training within 30 days of his or her appointment if such Covering Medical Director shall be serving for more than 60 days. Company shall send a courtesy reminder, via electronic mail, to Medical Director prior to the Training Deadline to notify Medical Director of the outstanding training requirement. Notwithstanding the foregoing, if Medical Director fails to complete the required training by the Training Deadline, Company will send written notice to Group and may thereafter, in addition to all other rights and remedies available to Company under this Agreement, withhold compensation for Medical Director's Services until such training has been completed. The withholding contemplated under this Section, and any invoice not paid as a result thereof, shall not be considered a disputed invoice under Section 3.3 or a breach of Section 12.1.1. If such training is not completed within a reasonable time thereafter, it shall be considered a breach of this Agreement subject to the remedies contained in Section 12 and the notice required under 12.2.5 shall not apply.

5.1.2 Notification. Group shall immediately notify DaVita's Chief Compliance Officer of any violation of any applicable law, regulation, third party payor requirement, or breach of Company's or DaVita's compliance program, Code of Conduct, or Policies and Procedures of which Group or its employees or agents become aware of during the Term. Group shall instruct its employees and agents working in or with Center of this obligation.

5.1.3 Cooperation. Group shall cooperate with Company in responding to or resolving any complaint, investigation, inquiry, or review initiated by a governmental agency, Company, or otherwise. Group shall cooperate with any insurance company providing coverage to Company in connection with the foregoing.

5.2 Non-Exclusion.

Group and Medical Director represent and warrant to Company that neither Group, Medical Director, nor any of their employees, officers, directors, equity owners, or Affiliates: (a) is or has been excluded from participation in any federal health care program, as defined under 42 U.S.C. §1320a-7b(f), for the provision of items or services for which payment may be made under such federal health care programs and is not currently excluded, debarred, suspended, or otherwise ineligible to participate in Federal procurement or nonprocurement programs; (b) has arranged or contracted (by employment or otherwise) with any employee, contractor, or agent that such party or its Affiliates know or should know is excluded from participation in any federal health care program to provide items or services hereunder; or (c) has been convicted of a criminal offense that falls within the scope of 42 U.S.C. § 1320a-7(a), but has not yet been excluded, debarred, suspended, or otherwise declared ineligible.

In the event that any of (a)-(c) above has occurred, this Agreement shall, as of the effective date of such exclusion or breach, automatically terminate.

5.2.1 Group and Medical Director further represent and warrant to Company that no Final Adverse Action has occurred, is pending or, to Group's and Medical Director's knowledge, is threatened against Group or a Related Physician, or any of their Affiliates or, to their knowledge, against any employee, contractor, or agent engaged to provide items or services under this Agreement. "Final Adverse Action" means any of the following involving Group or any Related Physician: (a) any final civil judgments in federal or state court related to the delivery of a health care item or service; (b) any federal or state criminal convictions related to the delivery of a health care item or service; (c) any final actions by federal or state agencies responsible for the licensing and certification of health care providers, suppliers, and licensed health care practitioners, including: (1) formal or official actions, such as revocation or suspension of a license (and the length of any such suspension), reprimand, censure, or probation; (2) any

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

other temporary or final loss of license or the right to apply for, or renew, a license of the provider, supplier, or practitioner, whether by operation of law, voluntary surrender, non-renewability, or otherwise; (3) any other negative action or finding by such federal or state agency; or (d) exclusion from participation in any federal or state health care programs, being listed as an excluded provider or banned contractor by the United States Department of Health and Human Services Office of Inspector General or United States General Services Administration, or being listed in the Office of Foreign Assets Control's "Specially Designated Nationals and Blocked Persons" list. The term "Final Adverse Action" does not include any action or judgment solely with respect to a professional malpractice claim.

5.2.2 During the Term and for a period of 6 years following the Term, Group and Medical Director shall notify Company of (a) any Final Adverse Action or basis for a Final Adverse Action that relates to or arises from actions occurring during the periods prior to and during the Term or relating to the Services, or (b) any complaint, investigation, inquiry, or review by any governmental agency or third party payor relating to or arising from actions occurring during the periods prior to and during the Term or relating to the Services. Such notice shall be provided within 2 business days of learning of the event giving rise to such notice and shall include a description of the matters at issue.

6. Indemnification and Insurance.

6.1. Indemnification. Each party shall be free from all liability and claims for damages from any cause or causes whatsoever arising out of or through the negligence, fraud, or other misconduct of any other party or its respective agents, independent contractors, or employees. Each party hereby covenants and agrees to indemnify, defend, and hold harmless any other party from any and all liability, losses, costs, obligations, and expenses, including reasonable attorneys' fees, which the party may incur as a result of the negligence, fraud, or other misconduct of any other party, or its respective agents or employees, or the breach by any other party of its respective obligations under this Agreement, including but not limited to, breaches of Sections 5, 7, 8, 9, 10, 11, and/or 14.5. In addition to the foregoing, Group and/or Medical Director hereby agree to indemnify and defend the other parties for any liability arising from the actions, acts, or omissions of the Medical Director and any Covering Medical Director in providing professional medical services to patients other than in the capacity as Medical Director or Covering Medical Director.

6.2 Insurance.

6.2.1 Company's Coverage. Company shall maintain during the Term, at Company's own expense, general and professional liability insurance with a minimum annual coverage limitation of $250,000 per occurrence and $750,000 in the aggregate, or such higher coverage as may be required by law. Such coverage may be provided through policies obtained from third party insurance carriers or through a program of self-insurance. Within 30 days of a written request from Group, Company shall produce documentation substantiating the existence of such insurance. The parties acknowledge and agree that the insurance coverage maintained by Company in accordance with this Section 6.2.1 shall cover Medical Director or Covering Medical Director for the Services that Medical Director or Covering Medical Director is providing pursuant to this Agreement, but shall not extend to any claims of professional malpractice against Group, claims against Medical Director or Covering Medical Director not arising from the Services, or any private practice of medicine by any Related Physician. Company shall maintain workers' compensation insurance in accordance with statutory limits.

6.2.2 Group's Coverage. Group shall maintain during the Term, at Group's expense, policies of professional and general liability insurance covering Group, Medical Director, Preapproved Physicians, and Group's employees and agents. Such insurance shall insure against liability for damages caused by the acts or omissions of Group, Medical Director, Preapproved Physicians, and employees and agents in the performance of their respective professional practices of medicine. Such coverage shall

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

include, but not be limited to, professional liability insurance with a minimum annual coverage limitation of $250,000 per occurrence and $750,000 in the annual aggregate, or such higher coverage as may be required by law. In addition, Group shall ensure that each Covering Medical Director maintains the professional and general liability insurance coverage described in this Section 6.2.2. Such policy or policies shall specifically cover Group, Medical Director, Preapproved Physicians, or Covering Medical Director, as applicable, and name Company as an additional insured, if such a provision is allowed by Group's or Covering Medical Director's insurance carrier and such additional insurance coverage is requested by the Company. Upon request by Company, Group shall provide Company with documentation substantiating the existence of such insurance and the rating of the insurance carrier. Group shall maintain workers' compensation insurance in accordance with statutory limits. Group's coverage shall be with an insurance carrier that maintains an A.M. Best rating of "A-" or higher.

7. Confidentiality. Group and Related Physicians acknowledge and agree as follows:

7.1 Limitations on Use and Disclosure of Confidential Information.

7.1.1 No Restricted Person will use Confidential Information for any purpose except as necessary to provide Services or will disclose, Directly or Indirectly, any Confidential Information in any manner whatsoever, in whole or in part, without the prior written consent of Company. Group shall ensure that each Restricted Person is aware of and agrees to the limitations on the use and disclosure of Confidential Information set forth in this Section 7. Group and each other Restricted Person shall promptly notify Company of any breach of this Section 7 which becomes known to such Restricted Person. For the avoidance of doubt, this Section 7 prohibits disclosure of Confidential Information to any third party whether or not permitted by applicable law, regardless of whether the Restricted Person is compensated by such third party.

7.1.2 If a Restricted Person is requested or required, in connection with any proceeding, to disclose any Confidential Information, such Restricted Person shall give Company prompt notice of such request or requirement so that Company may seek an appropriate protective order or other remedy and/or waive compliance with the provisions of this Section 7, and the Restricted Person will cooperate with Company to obtain such protective order. In the event that such protective order or other remedy is not obtained or Company grants a waiver, the Restricted Person will furnish only that portion of the Confidential Information which, in the written opinion of Company's counsel, is legally required to be disclosed and the Restricted Person will use best efforts to obtain assurances that the information will be treated as confidential. The confidentiality provisions of this Agreement shall be effective as of the Effective Date.

8. Records.

8.1 Removal of Records or Charts. Patient records or charts may not be removed from Center premises at any time by Medical Director, Covering Medical Director, or any of Group's other agents or employees. Unauthorized removal of said records or failure to immediately return said records after notice shall be a material breach of this Agreement and, in addition to all other legal and/or equitable remedies available to Company, constitute grounds for immediate suspension and/or termination of Medical Director by Company.

8.2 Record Review and Retention.

8.2.1 Each party shall permit, and shall ensure that any subcontractor permits, the United States Department of Health and Human Services and General Accounting Office to review appropriate books and records relating to the performance of this Agreement to the extent required under Section

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

1861(v)(1)(I) of the Social Security Act, 42 U.S.C. Section 1395x(v)(1)(I), or any successor law or regulation for a period of 4 years following the Termination Date. The access shall be provided in accordance with the provisions of 42 C.F.R. Part 420, Subpart D.

8.2.2 If Medical Director carries out any of the duties of this Agreement through a subcontract, with a value or cost of $10,000 or more over a 12 month period, with a related organization, such subcontract shall contain a clause to the effect that until the expiration of 4 years after the furnishing of such services pursuant to such subcontract, the related organization shall make available, upon written request to the Secretary of the United States Department of Health and Human Services or upon request to the Comptroller General of the United States, or any of their duly authorized representatives, the subcontract, and books, documents, and records of such organization that are necessary to verify the nature and extent of the costs incurred pursuant to such subcontract. In addition, the subcontract shall require the related organization to comply with and be bound by Company's privacy, compliance, and record retention policies.

8.2.3 Group and/or Medical Director shall notify Company immediately of the nature and scope of any request for access to books and records described above and shall provide copies of any books, records, or documents to Company prior to the provision of same to any governmental agent to give Company an opportunity to lawfully oppose such production of documents. In addition, Group and Related Physicians shall indemnify and hold Company harmless from any liability arising out of any refusal by Group or any Related Physician or any subcontractors of the foregoing to grant access to books and records as required above. Nothing herein shall be deemed to be a waiver of any applicable privilege (such as attorney-client privilege) by Company.

9. No Conflicts.

Each of Group, Related Physicians, and Medical Director represent, warrant, and covenant to Company that, as of the Effective Date and throughout the Term, each Preapproved Physician and Medical Director: (a) is not a party to, and shall not become a party to, any other medical director agreement, consulting agreement, or other agreement that would be prohibited under Section 10; (b) is and shall remain under no obligation or commitment, contractual or otherwise, that would prohibit or prevent it, him, or her from entering into or performing under this Agreement; (c) has no financial relationships with any vendors or suppliers of goods or services to providers of Dialysis Services which would cause a breach of Section 10; and (d) is and shall remain free to enter into and perform all of its, his, or her respective duties and obligations under this Agreement. Without limiting the foregoing or any of the provisions of Section 11, during the Term, neither Group nor Medical Director nor any Preapproved Physician shall join any medical practice, or permit any other physician to join Group or Medical Director's practice if such affiliation would result in a breach of any of the foregoing representations, warranties, and covenants. Company is entering into this Agreement based upon the representations and warranties of Group, Related Physicians, and Medical Director, including the representations and warranties that such parties are free to enter into and perform under this Agreement as of the Effective Date and shall remain free to perform under this Agreement from such date through the end of the Term.

10. Non-Competition and Non-Solicitation.

10.1 Non-Competition.

10.1.1 Group and each Related Physician acknowledge and agree (a) that each will be exposed to valuable Confidential Information of Company and will participate at Company's expense in building and maintaining its goodwill with employees, vendors, and others, and (b) that Company and

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

Center will suffer serious, irreparable, competitive injury if Group or any Related Physician were to engage in any business or activities in competition with Company or Center.

10.1.2 Group and each Related Physician covenant and agree that each shall not during the Restricted Period, Directly or Indirectly, take, prepare to take, or permit to be taken any action that results in or may reasonably be expected to result in owning (other than as a passive shareholder of less than a 2% interest in a public company), operating, managing, leasing, extending credit to, engaging in or preparing to engage in, being employed by, or otherwise participating in (including, without limitation, as a medical director, contractor, consultant, or employee) Dialysis Services or the business of any Competitor, in the Restricted Area other than in connection with rendering Services under this Agreement or any other agreement with Company or its Affiliates**.**

"**Dialysis Services**" means all dialysis and renal care services and related services, including but not limited to, hemodialysis, acute dialysis, apheresis services, peritoneal dialysis of any type, staff assisted hemodialysis, dialysis related laboratory and pharmacy services, the provision of home dialysis services and supplies, administration of dialysis-related pharmaceuticals (including, without limitation, EPO, Aranesp, iron supplements, vitamin D supplements, or other products related to the treatment of anemia and secondary hyperparathyroidism) to ESRD patients or to patients treated in an acute care hospital due to temporary kidney failure, and any other service or treatment for persons diagnosed as having ESRD, including any dialysis or renal care service provided in a hospital. The Restricted Period and the Restricted Area are set forth in Schedule 1.

10.1.3 Section 10.1.2 shall not prevent Group or any Related Physician from engaging in the professional practice of nephrology or prevent any licensed physician from exercising sound, professional medical judgment, including with respect to a patient's right to choose where he or she desires to receive dialysis.

10.1.4 For the avoidance of doubt, nothing in this Section 10 shall prohibit Group or any Related Physician from engaging in managed care contracting as a participating provider of professional services or otherwise so long as such relationship does not (a) provide such party with remuneration related or attributable, Directly or Indirectly, to Dialysis Services, or (b) involve such party contracting with any person or entity that, Directly or Indirectly, is owned, managed, operated or controlled by, or affiliated with any person or entity (other than Company) that provides Dialysis Services.

10.2 Non-Solicitation. Group and each Related Physician further agree that each shall not, during the Restricted Period, Directly or Indirectly, take any action that constitutes, results, or may reasonably be expected to result in:

10.2.1 Soliciting the termination of, diverting, or interfering with any relationship that Company has with any person or entity who is an independent contractor, supplier, or provider to Company; or

10.2.2 Soliciting, inducing, or encouraging any person (who is presently, or within the most recent 12 month period, affiliated with or employed by Company or an Affiliate of Company) to curtail or terminate such person's affiliation or employment with Company or at a Center.

10.3 Interpretation. Nothing in this Agreement shall require any party to this Agreement to treat patients at or refer any patients to, Center or any Affiliate of Company, whether during or after the Term.

10.4 Modification. If any restriction contained in this Section 10 is held by any court to be unenforceable or unreasonable as a matter of law as to time, geographic area, or business limitation, the

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

parties agree that such restriction shall be and hereby is reformed to the maximum time, geographic area, or business limitation permitted by applicable laws and that any court of proper jurisdiction may issue all orders necessary to accomplish such reformation.

10.5 Necessary and Reasonable. The parties acknowledge that the restrictions set forth in this Section 10 are reasonable and necessary to protect the legitimate business interests of Company, including but not limited to Company's interest in protecting its Confidential Information and its investment in the development of goodwill at Center, and that Company would not have entered into this Agreement in the absence of such restrictions.

10.6 Joinder. Group and Medical Director shall ensure that each person who is a Related Physician as of the Effective Date has executed this Agreement or a Joinder as of the Effective Date. Group and Medical Director shall ensure that each person who becomes a Related Physician during the Term or during the Restricted Period executes the Joinder upon becoming a Related Physician. Group shall notify Company promptly of new Related Physicians so that compliance with the joinder process may be monitored. The parties agree that Company shall not process any application by a Related Physician for credentials to join the medical staff of Center until such Related Physician executes the Joinder.

10.7 Notice. Group and each Related Physician shall promptly provide notice to Company of any direct or indirect attempt by any person or entity to solicit or induce Group or any Related Physician to breach this Section 10 or to take any action that could reasonably be construed or interpreted to be a breach of this Section 10.

11. Assignment.

11.1 No Assignment. Group and Medical Director shall not, Directly or Indirectly, assign or otherwise transfer this Agreement, or any rights, obligations, or interest in this Agreement without the prior written consent of Company, which may be withheld in Company's sole discretion. Upon any assignment, Group and Medical Director shall continue to be bound by those provisions which survive termination, including but not limited to Sections 5, 6, 7, 8, 10, 11, 14.2, and 14.3, after such assignment is completed and upon the agreement by the transferee, in writing, to assume all of the transferring party's obligations under this Agreement.

11.2 No Series of Transactions. In the event that Group or any Related Physician desires to sell, transfer or issue more than 50% of the equity or other interest in Group, or to sell or transfer 50% or more of the assets of Group, whether in a single transaction or series of related transactions, Group shall provide Company with notice at least 180 days prior to such sale. Company may, in its sole discretion, terminate this Agreement at any time within such 180 day period. In the event that Group fails to provide Company with such 180 days' notice, Company shall have the right to terminate this Agreement upon learning of such transfer or proposed transfer, and to seek such other remedies as may be available in law or equity.

11.3 No Subcontracting. Group and Medical Director shall not subcontract to provide Services under this Agreement without the prior written consent of Company, which may be withheld in Company's sole discretion.

11.4 Company's Right to Assign. Company shall be permitted, without the consent of Group, Medical Director, or any Related Physician to assign or otherwise transfer this Agreement or any of its rights hereunder.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

11.5 Group's Right to Assign. Notwithstanding anything contained in this Section 11 seemingly to the contrary, Group shall have the right, without Company's consent, to assign or otherwise transfer this Agreement or any of its rights hereunder to its parent, subsidiary or affiliate entity. Group shall give Company written notice and evidence of any such change.

12. Termination. This Agreement shall be terminated upon the expiration of the Term or as provided in this Section 12.

12.1 Termination by Group. Group may terminate this Agreement prior to expiration of the Initial Term or any Renewal Term upon notice to Company specifying the Termination Date, for any of the following reasons:

12.1.1 A failure by Company to pay any undisputed compensation due under this Agreement within 30 days of Company's receipt of notice from Group or Medical Director.

12.1.2 Upon the revocation of Center's Medicare certification provided that Group provides Company 30 days' advance notice detailing the problems resulting in such revocation, unless such problems are cured within such 30 day period, or such longer period as Company may determine in its sole discretion is appropriate, or unless such revocation is due in whole or in part to acts or omissions of Group, a Related Physician, or any of their agents, subcontractors, or employees.

12.1.3 Any other material breach of this Agreement by Company, provided that Group provides Company 30 days' advance notice detailing such breach and such breach is not cured within such 30 day period or, if Company is actively engaged in attempting to cure such breach and such breach cannot reasonably be cured in 30 days, then Company shall have such longer period as is reasonably required to cure the breach.

12.1.4 Upon the filing of a case by or against Company under the Bankruptcy Code which is not stayed or terminated within 30 days.

12.1.5 Upon the exclusion of Company from any federal healthcare program, as defined under 42 U.S.C. §1320a-7b(f), provided that Group provides Company 30 days' advance written notice, unless such problems are cured within such 30 day period, or such longer period as Group may determine in its sole discretion is appropriate, or unless such exclusion is due in whole or in part to acts or omissions of Group, or a Related Physician, or any of their agents, subcontractors, or employees.

12.2 Termination by Company. Company may terminate this Agreement prior to expiration of the Initial Term or any Renewal Term upon notice to Group and Medical Director specifying the Termination Date, for any of the following reasons:

12.2.1 For Misconduct. "Misconduct" means the occurrence of any of the following:

(a) Misconduct of either a personal or professional nature, including, without limitation, violation of the Bylaws or any applicable laws or regulations, or Company's or DaVita's policies or procedures, by Medical Director or a Covering Medical Director, which in Company's reasonable opinion interferes with Medical Director's or Group's ability to fulfill their obligations under this Agreement directly or through said Medical Director or Covering Medical Director, unless with respect to such misconduct by Medical Director or a Covering Medical Director, Group immediately removes such physician and appoints another Preapproved Physician or other qualified replacement approved by Company in its sole discretion;

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

(b) the revocation or suspension of any medical license of Medical Director or a Covering Medical Director, or the restriction or elimination of practice privileges of Medical Director or a Covering Medical Director at the Center for any reason set forth in the Bylaws and other rules for practice privileges at the Center, or the restriction or elimination of privileges of Medical Director or a Covering Medical Director at any hospital for any reason related to the quality of the patient care provided by Medical Director or said Covering Medical Director, unless Group immediately removes such physician and appoints a Preapproved Physician or other qualified replacement approved by Company in its sole discretion;

(c) any felony charge, indictment, or conviction of Medical Director or a Covering Medical Director, or any charge, indictment, or conviction involving moral turpitude of Medical Director or a Covering Medical Director, unless Group immediately removes such physician and appoints another Preapproved Physician or other qualified replacement approved by Company in its sole discretion;

(d) any failure by Medical Director or a Covering Medical Director to correct other acts or omissions which, in Company's reasonable opinion, interfere with the normal conduct of Center's operations in accordance with Company's or DaVita's policies and procedures, including endangering patient care or interfering with teammate welfare, unless Group immediately removes such physician and appoints another Preapproved Physician or other qualified replacement approved by Company in its sole discretion;

(e) as contemplated in Section 8, the unauthorized removal of records from Center by Medical Director, Covering Medical Director, or any of Group's other agents or employees or other noncompliance with Section 8;

(f) the unlawful alteration or falsification of the Center's records;

(g) the failure of Group, Medical Director or a Covering Medical Director to secure or maintain the insurance required under Section 6;

(h) upon the breach or threatened breach of Section 10;

(i) upon an unauthorized assignment of this Agreement, including subcontracting of Services, by Group or Medical Director in violation of Section 11; or

(j) upon the occurrence of a Final Adverse Action.

12.2.2 Upon the death or disability of the physician serving as Medical Director and Group's failure to immediately appoint a Covering Medical Director or thereafter permanently name another Preapproved Physician within 60 days after the Medical Director's death**;** or upon the occurrence of a disability of a permanent nature which, in the reasonable opinion of a physician appointed by Company, would interfere with Medical Director's ability to serve in the capacity of Medical Director, unless Group immediately removes such disabled Medical Director and appoints a Covering Medical Director, and thereafter designates a Preapproved Physician within 60 days after determination of disability. Group or the disabled Medical Director shall notify Company at the onset of any such disability, provided, however, that a failure to do so shall not deprive Company of its rights under this Section 12.2.2.

12.2.3 Upon Group's or Medical Director's failure to cause Covering Medical Director to cease performing duties as permitted under this Agreement within 15 days of notice from Company detailing Company's concerns with Covering Medical Director's performance unless Group and Medical Director address such concerns to Company's satisfaction before the end of such 15 day period.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

12.2.4 Upon the dissolution of Group's medical practice or upon appointment of a receiver or custodian to take possession of all or any material part of the assets of Group, a general assignment by Group for the benefit of Group's creditors, or the filing of a case by or against Group which is not stayed or terminated within 30 days.

12.2.5 In the event of any other material breach of this Agreement by Group, a Related Physician or Covering Medical Director, provided that Company provides Group or Medical Director 30 days' advance notice detailing such breach and such breach is not cured to the satisfaction of Company, in its sole discretion, within such 30 day period or, if Group or Medical Director is actively attempting to cure such breach and such cure cannot reasonably be accomplished within said 30 day period, then such longer period as Company may determine in its sole discretion is appropriate.

12.2.6 In the event that a Medical Director is absent from Center for any reason for more than 21 consecutive days or for more than 30 days within any 60 day period without the prior written approval of Company; or, to ensure Medical Director maintains "On Call" availability and access to Center employees, patients and clinical needs, the Medical Director's residence or clinical office is not within a reasonable proximity of Center as determined by Company.

12.2.7 In the event that Medical Director fails to comply with Section 13.2.

12.2.8 Upon the termination of Center's business

12.2.9 In the event that Company does not reopen or relocate Center following an Interruption Event, Company shall terminate this Agreement upon 30 days' prior notice to Group and Medical Director, and the compensation to be paid for Services provided hereunder shall be reduced accordingly.

12.3 Remedies. Upon termination by Group pursuant to Section 12.1.1 or 12.1.3, Group shall be entitled to pursue such legal or equitable remedies as may be available to it to collect its actual and consequential damages suffered as a result thereof. Upon termination by Company pursuant to Sections 12.2.1 through 12.2.7 Company shall be entitled to pursue such legal or equitable remedies as may be available to it to collect its actual and consequential damages suffered as a result thereof.

12.4 Relocation of Center. A Relocation of Center during the Term of this Agreement shall not result in termination of this Agreement.

12.5 Termination Due to a Regulatory Event. Notwithstanding any other provision in this Agreement, Company or Group may terminate this Agreement upon the occurrence of a Regulatory Event if such Regulatory Event cannot be corrected after each party has made a good faith effort to do so within 10 days after notice thereof by a party. Termination under this Section 12 shall be effective immediately upon the expiration of such 10 day period.

"Regulatory Event" means the occurrence of any of the following: (a) the performance by a party hereto of any term, covenant, condition, or provision of this Agreement that (1) jeopardizes the certification of Center by or under any federal or state ESRD program, or by or under any other regulatory program; (2) is or, in the reasonable opinion of a party's counsel will become, illegal or in violation of any statute, regulation, or ordinance; or (3) does or, in the reasonable opinion of either party's counsel will, result in a reduction in or elimination of the amount or the rate of reimbursement paid to Company from the Medicare program, any Medicaid program, or any other third party payor program, whether governmental or non-governmental; or (b) the enactment of legislation or issuance of regulations or interpretations thereof, by the federal government or the state government in which Center is located, or the issuance of judicial orders

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

or decrees or governmental ruling or opinion, or any change in the rules and regulations of any third party payment program, or any other similar event which in the reasonable judgment of either party's counsel adversely impacts the operations of the Center or requires Company to divest itself of interests in investments such as the Center or which would result in a reduction in or elimination of the amount of or rate of reimbursement to Company from the Medicare program or any state Medicaid program or any other third-party payor program, whether governmental or non-governmental.

12.6 Consequences of Termination/Expiration, and Termination of Relationship with Group.

Upon any termination of this Agreement, the appointment shall terminate and all obligations of Company to Group and all Related Physicians shall immediately terminate, including without limitation all obligations to compensate Group or Medical Director for Services after the Termination Date. Upon any such termination or expiration of this Agreement, Company shall have no further liability or obligation to Group or Related Physicians of any kind in connection with this Agreement or any relationship established hereby. Upon any such termination or expiration of this Agreement, Group's and Related Physicians' obligations which are intended to survive the termination of this Agreement, including but not limited to those in Sections 5, 6, 7, 8, 10, 11, 14.2, and 14.3, shall survive. Notwithstanding the above, if Group's employment of, or affiliation with (as applicable), a Related Physician terminates (regardless of the reason for such termination) at any time during the Term, such Related Physician's obligations which are intended to survive the termination of this Agreement, including but not limited to those in Sections 5, 6, 7, 8, 10, 11, 14.2, and 14.3, shall survive until the end of his/her Restricted Period.

12.7 Termination within First Year. If this Agreement is terminated for any reason within 1 year of the Commencement Date then prior to the first anniversary of the Commencement Date, Company, Group, and Medical Director will not enter into any agreement with each other for the same or similar Services at Center.

13. Force Majeure; Interruption Event.

13.1 Force Majeure. In the event that any party is prevented from performing or is unable to perform any of its obligations under this Agreement due to any act of God, fire, casualty, flood, earthquake, war, strike, lockout, epidemic, destruction of Center, riot, insurrection, material unavailability, or any other cause beyond the reasonable control of the party invoking this Section, and if such party shall have used commercially reasonable efforts to mitigate its effects, such party shall give prompt notice to the other party, its performance shall be excused, and the time for the performance shall be extended for the period of delay or inability to perform due to such occurrences.

13.2 Interruption Event. Notwithstanding Section 13.1, in the event of an Interruption Event at any time during the Term and if Company intends to reopen or relocate Center, until such time as Center can be reopened or relocated (the "Interruption Period"), Company may require that Medical Director provide services that Company deems necessary or helpful for Center's reopening or relocation and for Center patients and teammates.

13.3 Compensation Adjustment. The compensation to be paid to Group during the Interruption Period shall be adjusted to reflect the fair market value of the services provided during the Interruption Period and to ensure that it continues to be consistent with Company's then-current policies and procedures for medical director compensation following an Interruption Event.

13.4 Time Sheets. During the Interruption Period, Medical Director shall submit a time sheet on the first day of each month with the invoice described in Section 3. The time sheet shall include a description of services provided and the days and hours worked by Medical Director during the previous

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

month. Hours worked means actual hours worked. Company shall reimburse Group or Medical Director, as applicable, for any reasonable, pre-authorized/pre-approved out-of-pocket expenses incurred by Medical Director in the course of performing services during the Interruption Period if in compliance with the requirements of Company's then-current applicable policies.

14. Miscellaneous

14.1 Governing Law. This Agreement shall be governed by the laws of the State of Washington, without regard to the conflict of laws principles thereof.

14.2 Dispute Resolution. Except for alleged breaches of Sections 7, 8, 9, and 10, any dispute between or among the parties shall be resolved as provided in this Section 14. Nothing in this section shall limit or delay a party's termination rights.

14.2.1 Informal Resolution. Notice of the dispute shall be delivered from one party to the other parties and, thereafter, the parties' business representatives shall meet in person and attempt to resolve the dispute in face-to-face negotiations. This meeting shall occur within 30 days of the time the notice of such dispute is received by the other party.

14.2.2 Resolution Through Mediation. If a dispute is not resolved pursuant to Section 14.2.1 above, the parties shall, within 45 days of the first meeting referred to in Section 14.2.1 above, attempt to settle such dispute by formal mediation. If the parties cannot otherwise agree upon a mediator and the place of the mediation within such 45 day period, the American Health Lawyers' Association shall administer the mediation in the State of Washington. In the event that the mediation does not resolve the dispute, the parties shall be entitled to seek any and all available legal remedies.

14.3 Injunctive Relief. The parties acknowledge that the breach or threatened breach of this Agreement, including, without limitation, Sections 6 through 10 and Section 13, would cause irreparable injury to the injured party that could not be adequately compensated by money damages. Accordingly, the injured party shall be entitled to obtain from any court of competent jurisdiction a restraining order and/or injunction prohibiting a breach or threatened breach of the provisions of this Agreement, in addition to any other legal or equitable remedies that may be available. In the event a party seeks such injunctive or other relief with respect to a violation of this Agreement by another party, the injured party will be entitled to recover the costs of such action, including but not limited to reasonable attorney's fees. Notwithstanding the above, Company agrees and acknowledges it will not enforce any injunctive relief or restraining orders with regard to Sections 11.1 and 11.2 that would prevent the transfer of ownership in the Group, including the assignment of an MDA as a result of such transfer of ownership.

14.4 Notice. All notices shall be in writing and shall be addressed to each receiving party at the addresses set forth in Schedule 1 and shall be (a) delivered by hand or electronic mail, (b) sent by recognized overnight courier, or (c) sent by certified mail, return receipt requested, postage prepaid. Notices shall be deemed effective as follows: (a) if by hand, when delivered and if by electronic mail, when received and acknowledged by the recipient via electronic mail; (b) if by overnight courier, on the next business day; and (c) if by certified mail, on the fifth business day. Each party may change its notice address provided in Schedule 1 by providing written notice of its new address to the other parties.

14.5 Independent Contractor. At all times during the performance of any Services hereunder, Medical Director shall be acting and discharging Medical Director's duties and responsibilities as an employee or equity owner of Group, and Group shall at all times during the Term be acting and discharging its duties as an independent contractor. Company will provide all applicable tax documents to Group and will not withhold any local, state, or federal employment taxes on Group's behalf. Group shall be

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

responsible for paying all taxes due on all amounts paid to it under this Agreement, and for paying all local, state, and federal employment taxes, including unemployment insurance, social security taxes, and local, state, and federal withholding taxes for all employees of Group. Group shall indemnify and hold Company harmless from any failure to pay such taxes, including any interest and penalties assessed against Company. If any taxing authority asserts that Group is not an independent contractor under this Agreement, the parties shall cooperate in addressing such assertion. Neither Group nor any Related Physician shall be considered an employee of Company for any purpose, including for purposes of any Company employment policy or employment benefit plan, or be entitled to any benefits under any such policy or benefit plan. Except as expressly set forth in this Agreement or as may be required by applicable law, Company shall neither have nor exercise any control or direction over the methods by which any Medical Director shall perform the duties hereunder, nor shall Company control how any Medical Director's duties are accomplished, except that such duties shall be performed as required by this Agreement.

14.6 Waivers; Severable Provisions; Headings.

14.6.1 Waivers. The failure of any party to insist in any one or more instances upon performance of any terms or conditions of this Agreement shall not be construed as a waiver of future performance of any such term, covenant, or condition, and the obligations of such party with respect thereto shall continue in full force and effect.

14.6.2 Severable Provisions. The provisions of this Agreement are severable. The invalidity or unenforceability of any term or provisions hereto in any jurisdiction shall in no way affect the validity or enforceability of any other terms or provisions in that jurisdiction, or of this entire Agreement in that jurisdiction.

14.6.3 Headings. The headings in this Agreement are for convenience and reference only and are not intended to, and shall not, define or limit the scope of the provisions to which they relate.

14.7 Agreement Collectively Prepared by Parties. Each party to this Agreement (a) has participated in the preparation of this Agreement, (b) has read and understands this Agreement, and (c) has been represented by counsel of its own choice (if such party so selects) in the negotiation and preparation of this Agreement. Each party represents that this Agreement is executed voluntarily and should not be construed against any party hereto solely because it drafted all or a portion hereof.

14.8 Entire Agreement; Binding Effect. This Agreement, including Exhibits hereto and the BAA, incorporated herein by reference, constitutes the entire agreement among the parties with respect to the subject matter hereof and supersedes all other agreements, including, but not limited to that certain Medical Director Agreement by and among Company, Group and Thao Pascual, M.D., dated May 31, 2012, either written or oral, among the parties (including, without limitation, any prior agreement among Group, Medical Director, and Company or any of its subsidiaries or affiliates) with respect to the subject matter hereof. This Agreement may be amended only by a writing that is executed by all of the parties. Subject to Section 11, this Agreement shall be binding upon and inure to the benefit of the parties and their respective successors, assigns, heirs, executors and legal representatives.

14.9 Counterparts; Approval by DaVita as to Form.

14.9.1 Counterparts. This Agreement may be executed in one or more counterparts, each of which shall be deemed to be an original, but all of which together shall constitute one and the same instrument. Facsimile or electronic signature shall be permitted, except where prohibited by law.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

14.9.2 Approval by DaVita as to Form. The parties acknowledge and agree that this Agreement shall be legally binding upon the parties only upon full execution hereof by the parties and by DaVita as to the form hereof.

14.10 Incorporation of Exhibits and Schedules; Priority in Event of a Conflict.

14.10.1 The Exhibits and Schedules attached to this Agreement and the BAA are incorporated into the Agreement by reference.

14.10.2 In the event of a conflict between the BAA and this Agreement, this Agreement shall control unless applicable law requires that the BAA control.

EXHIBIT A

DEFINITIONS

The terms below shall have the meanings below for the purposes of the Agreement:

TERM	DEFINITION
Affiliate	A person or entity that directly, or indirectly through one or more intermediaries, controls or is controlled by, or is under common control with a person or entity, or who has the power to direct or cause the direction of the management of a person or entity, whether through voting rights, ownership, by contract, or otherwise. Affiliate shall also include any combination of persons or entities that meet the definition of a "Controlled Group of Corporations," as defined in 26 U.S.C. § 1563(a), "two or more trades or business under common control," as defined in 26 CFR 1.414(c), or an "Affiliated Service Group," as defined in 26 U.S.C. §¬ 414(m).
Agreement	This Facility and Associate Medical Director Agreement, including all incorporated schedules and exhibits.
BAA	The Business Associate Agreement executed by Company and Group effective as of even date herewith.
Bylaws	The Governing Body Bylaws and the Medical Staff Bylaws.
Center	The facility or facilities identified as such in Schedule 1. Center also shall include the applicable programs identified in Schedule 1.
CMS	The Centers for Medicare and Medicaid Services of the United States Department of Health and Human Services.
Commencement Date	The date identified as such in Schedule 1.
Company	The entity identified as such in Schedule 1.
Competitor	Any person, clinic, corporation, partnership, management services organization, proprietorship, independent practice association, firm, entity, or association which engages in or derives any economic benefit from, or is preparing to engage in or derive any economic benefit from, the business of providing, offering, arranging, or subcontracting Dialysis Services.
Conditions for Coverage	The Medicare Conditions for Coverage for End-Stage Renal Disease Facilities at 42 C.F.R. Part 494, as amended from time to time.
Confidential Information	Confidential or proprietary information or trade secrets including (a) any information, in whatever form, relating directly or indirectly to the business of Center, Company or any Affiliate of Company, whether prepared by Company or by any other person, that is, has been, or will be made available to Restricted Persons; (b) the medical and other identifying information, in whatever form, of any patient currently receiving treatment or having previously received treatment at Center, which is compiled by, obtained by, or furnished to any of the Restricted Persons in the course of performing services hereunder; (c) specialized training materials and information to assist Medical Director in the performance of the Services including, but not limited to, information and training in Company's pricing structures and guidelines for the services it provides, Company's cost structure (including, without limitation, profits and margins) for the services it provides, Company's methods of operating, and Company's products and marketing techniques and strategies, Internet strategies, plans, and business models; (d) shift patterns; (e) commercial insurance information; and (f) any of the terms of this Agreement, including without limitation the compensation payable under the Agreement. Confidential Information does not include (a) any information that is or becomes generally available to the public other than as a direct or indirect result of the disclosure of any of such information by any Restricted Person; (b) any information that becomes available to a

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

	Restricted Person from a source other than Company, provided that such source is not bound by any contractual or other obligation of confidentiality to Company or any other person with respect to any of such information; or (c) any information previously known to Medical Director, provided such information was not subject to protection by a separate agreement with Company or any Affiliate of Company, and subject to Medical Director's patient privacy and security obligations under Section 5 of this Agreement, and as set forth in the BAA.
Covering Medical Director	A physician who performs Services pursuant to Section 4.1.2 in the event of a temporary absence of Medical Director.
DaVita	DaVita Inc., Company's parent company.
Dialysis Services	"Dialysis Services" shall be defined as set forth in Section 10.1.2.
Directly or Indirectly	Any and all activities undertaken by, through or on behalf of Group, Medical Director, Preapproved Physicians, and/or any of their Affiliates, and any and all entities with respect to which Group, Medical Director, Preapproved Physicians, and/or any of their Affiliates serves as a contractor, agent, employee, or representative or has a direct or indirect financial interest.
Effective Date	"Effective Date" shall be defined as set forth in Schedule 1.
ESRD	An abbreviation for End Stage Renal Disease that means the stage of renal impairment that appears irreversible and permanent, and requires a regular course of dialysis or kidney transplantation to maintain life, which definition is set forth in 42 C.F.R. Section 405.2102. To the extent such regulation is changed or amended, ESRD shall have the meaning set forth in the amended regulation or any successor regulation.
Final Adverse Action	"Final Adverse Action" shall be defined as set forth in Section 5.2.2.
Group	The medical practice employing the Medical Director and identified as such in Schedule 1.
Governing Body	The governing body of Center as set forth in Center's Medical Staff Bylaws.
HHD Program	The home hemodialysis program, for patients who undergo hemodialysis in their homes, when and if offered at Center.
HIPAA	The Health Insurance Portability and Accountability Act of 1996, and its related regulations, as amended by the federal Health Information Technology for Economic and Clinical Health Act and its implementing regulations, all as may be amended from time to time, including by the future issuance of regulations and guidance by the United States Department of Health and Human Services.
HIPAA Policies	DaVita's health information privacy and security policies and procedures, as currently in effect and as updated from time to time.
Initial Term	The period identified as such in Schedule 1.
Interruption Event	The destruction of Center or a reduction or interruption in Center services due to any force majeure described in Section 13.
Interruption Period	The time period following such Interruption Event until such time as Center is reopened or relocated.
Joinder	The Joinder to the Facility and Associate Medical Director Agreement, the form of which is set forth at **Exhibit C**.
Medical Director, Facility Medical Director and Associate Medical Director	A physician duly appointed in accordance with this Agreement to serve as the Medical Director for Center.
Medical Director Qualifications	The following qualifications: (a) be qualified and licensed to practice medicine in the state in which the Center is located; (b) be board-certified by either the American Board of Internal Medicine ("ABIM"), the American Osteopathic Association ("AOA"), or such other board-certification entities as approved by Company in writing, in one or more of nephrology, pediatrics, or internal medicine, or to have received a waiver that the certification is not needed and such waiver is approved by Company; (c) have completed a board-approved training program in nephrology; (d) specialize in the treatment of individuals with ESRD; (e) have at least 12 consecutive months of experience or training in the care of patients at ESRD

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

	facilities immediately preceding the Commencement Date; and (f) be experienced in the medical administration of ESRD facilities.
Misconduct	"Misconduct" shall be defined as set forth in Section 12.2.1.
Nocturnal Shift	In-center nocturnal hemodialysis administered at facility at night for six to eight hours, typically beginning between 5:00 p.m. and 9 p.m., typically three times per week.
PD Program	Program for patients who perform peritoneal dialysis in their homes, when and if offered at the Center.
PHI	Protected Health Information, including but not limited to electronic Protected Health Information as defined in HIPAA.
Policies and Procedures	"Policies and Procedures" shall be defined as set forth in Section 5.1.
Preapproved Physicians	The specific physicians, including the Medical Director(s), named on Schedule 1, as may be updated from time to time in an amendment signed by the parties.
Regulatory Event	"Regulatory Event" shall be defined as set forth in Section 12.5.
Related Physician	Any physician who is employed by or engaged in medical practice with Group (including Medical Director and each Preapproved Physician), Medical Director, a Preapproved Physician or any Affiliate thereof, or who is a shareholder, partner, member, or other equity holder of Group, Medical Director, Preapproved Physician, such medical practice, or Affiliate of any of the foregoing.
Relocation	The closure of Center and the physical relocation of substantially all staff of Center to another center that is not a then-existing center operated under the same Medicare provider number as the closed Center.
Renewal Term	The period identified as such in Schedule 1.
Restricted Area	The area set forth as such in Schedule 1.
Restricted Period	The period from the date of last signature through the time period set forth in Schedule 1; provided, however, that with respect to any Related Physician who ceases to be a Related Physician during the Term, the Restricted Period shall end on the second anniversary of the date on which such Related Physician ceases to be a Related Physician.
Restricted Person	Group, Related Physicians, any Covering Medical Director, any Affiliate of Group or a Related Physician, and any of their respective agents, independent contractors, or employees.
Services	The duties and responsibilities set forth in **Exhibit B**, together with all other services to be provided by Medical Director under this Agreement.
Term	The period during which this Agreement is in effect, and which shall consist of the Initial Term and any and all Renewal Terms through the date on which the Agreement expires due to non-renewal or is terminated in accordance with the terms of the Agreement.
Termination Date	The date on which this Agreement terminates, whether such termination occurs as a result of the expiration of the Term due to non-renewal or otherwise under the terms of the Agreement.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

EXHIBIT B

MEDICAL DIRECTOR'S DUTIES

At all times during the Term of this Agreement, Medical Director shall maintain professional qualifications and perform responsibilities at the Center in accordance with 42 C.F.R. Part 494 Medicare Conditions for Coverage for End-Stage Renal Disease Facilities which include, but are not limited to, the following:

1. Maintaining Medical Director Qualifications. Medical Director shall:

(a) Be qualified and licensed to practice medicine in the state in which Center is located.

(b) Be board-certified in one or more of nephrology, pediatrics or internal medicine.

(c) Have completed a board-approved training program in nephrology.

(d) Specialize in the treatment of individuals with end stage renal disease ("ESRD") with at least 12 consecutive months of experience or training in the care of patients at ESRD facilities.

(e) Meet any additional qualifications to serve as Medical Director required by the state in which Center is located.

(f) Maintain current credentials and privileges at Center including required re-credentialing consistent with requirements in DaVita's Medical Staff Bylaws.

2. Physical Presence in Center and "On Call" Availability. Medical Director shall:

(a) Be available to provide services as Medical Director at all times Center is open and be available to respond to emergencies on an "on-call" basis 24 hours per day, 7 days per week.

(b) Arrange for a covering physician ("Covering Medical Director") to provide services consistent with Section 4.1.2 "Covering Medical Directors" of the Agreement for temporary absences and communicate such arrangement to the Covering Medical Director, Facility Administrator and Regional Operations Director. Medical Director will provide a Covering Medical Director that meets all of the Medical Director qualifications listed above.

3. Center Clinical and Professional Leadership. Medical Director shall:

(a) Serve as a member of Center's Governing Body as clinical leader. Medical Director must attend and participate in both monthly/regularly scheduled Governing Body meetings and any additional meetings deemed necessary to meet the needs of clinical operations. Medical Director shall be accountable to the Governing Body for the quality and safety of medical care provided to patients.

(b) Lead Facility Health Meetings ("FHM"). Medical Director shall attend and participate in FHM on a monthly basis. Associate Medical Director shall support Facility Medical Director in FHM.

(c) Facility Medical Director shall be accountable for any Associate Medical Directors (if any) overseeing other modalities (i.e. PD, HHD). Associate Medical Director is subject to the supervision of the Facility Medical Director.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

(d) Promote adherence to DaVita's Medical Staff Bylaws, the maintenance of a safe working environment and compliance with laws, regulations and Company and DaVita policies and procedures.

4. Patient Admission. Medical Director shall:

(a) Review and approve Center's admissions policy.

(b) Assure patient care providers adhere to Center's admissions policy.

(c) Confirm that prior to dialysis treatment each patient has an initial dialysis prescription, orders for care, and baseline physical and nursing assessments.

(d) Confirm prior to first dialysis treatment that patient can be safely treated in Center.

5. Patient Discharge and Transfers. Medical Director shall:

(a) Review and approve Center's involuntary patient discharge / transfer policy.

(b) Assure interdisciplinary team ("IDT") adheres to involuntary patient discharge / transfer policy.

(c) Direct the IDT, including the attending physician, in the appropriate management of the patient with disruptive behavior, including non-adherence, threatening behavior, or non-threatening behavior. Assure that the IDT properly documents incidents of disruptive behavior, follows DaVita policy and procedure in addressing that patient's behavior, and documents the patient's response in the medical record. Assure that the IDT has completed each of these steps prior to any involuntary discharge or transfer.

(d) Address issues of patient non-adherence with the patient's attending physician and members of Center's IDT (as appropriate) and document discussions.

(e) Review, approve, and sign each involuntary patient discharge or transfer.

6. Patient Rights and Confidentiality. Medical Director shall:

(a) Review and approve Center policies on patient confidentiality to confirm compliance with local, state, and federal guidelines.

(b) Assure that patient confidentiality policies and procedures are followed by Center staff and providers.

(c) Work with Center staff to assure that patients receive confidentiality, respect, and privacy information.

(d) Confirm that Center maintains an internal grievance mechanism and communicates the availability of such mechanism to patients.

(e) Review patient grievances during FHM.

7. Patient Care. Medical Director shall:

(a) Provide general oversight of and have responsibility for the delivery of patient care and outcomes in Center.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

(b) Assure that patients without excludable criteria have been offered referral for transplant and provided information on modality options including withdrawal of dialysis.

(c) Assure the treatment modality is appropriate for the patient during FHM.

(d) Review and confirm availability of suitable patient teaching materials for all self-dialysis modalities for all self-dialysis trainees.

(e) Work with Center staff to provide medically necessary supplies/equipment for patients.

(f) Review and approve Center's patient care policies, guidelines, and protocols.

(g) Assure that patient care policies and procedures are followed by each person who treats patients.

(h) Assist Center in collecting co-morbidity and related clinical information.

(i) Monitor Center's IDT to confirm timely completion, quality, and documentation of patient assessments and patient care plans. In fulfilling this responsibility, Medical Director shall

(i) Assure that patient care meetings occur monthly and are being conducted according to policy.

(ii) Assure attendance and contribution to IDT patient care meetings by attending physicians.

(iii) Be involved in the education of patients and IDT.

(iv) Perform periodic assessment of patient clinical performance and compliance with care plans as necessary to ensure compliance with Federal and state requirements for conditions for coverage.

(v) Review patient competency to perform dialysis tasks for self-dialysis modalities in FHM.

(j) Assure Center has a written and fully executed agreement with a certified laboratory.

(k) Confirm that patient charts are in compliance with state advance directive policies.

8. Water and Dialysate Quality. Medical Director shall:

(a) Provide general oversight for the safety and quality of the water used for patient treatments and assure that the system will produce AAMI quality water. In fulfilling this responsibility, Medical Director shall

(i) Work with Center staff to implement an emergency plan should the water not meet AAMI standards.

(ii) Work with Center staff to implement and regularly test emergency plan.

(iii) Work with Facility Administrator and Biomed staff to review and implement Center specific procedures related to the use of a chemical injection system when necessary to maintain pre-treatment water quality.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

(b) Review and approve Center policies on water and dialysate to confirm compliance with federal and state rules and regulations.

(c) Demonstrate working knowledge of the water treatment system installed at Center.

(d) Demonstrate working knowledge of dialysate machines and proportioning ratios.

(e) Review and sign Limulus amebocyte lysate tests and water cultures monthly and assure the existence and completeness of water records and logs.

(f) Monitor effectiveness of water and dialysate processes and procedures through scheduled reviews to identify problems and implement necessary changes related to water and dialysate operations. In fulfilling this responsibility, Medical Director shall oversee audits of water and dialysate procedures, tasks, and logs in accordance with AAMI requirements.

(g) Assure water treatment, storage, and distribution system meets requirements at time of installation.

9. Dialyzer Reprocessing of Hemodialyzers. Medical Director shall:

(a) Determine Center participation in a dialyzer reprocessing program and document such decision in policy and Governing Body minutes.

(b) Review and approve Center policies on the dialyzer reprocessing program to confirm compliance with federal and state rules and regulations.

(c) Work with Center staff to establish a training course for staff performing hemodialyzer reprocessing. In fulfilling this responsibility, Medical Director shall

(i) Approve training manual and confirm materials are current and available to Center staff.

(ii) Assure there is a written document to provide details about the curriculum and address the potential risks to patients and staff members for not following correct procedures.

(d) Certify successful completion of dialyzer reprocessing training by applicable staff and record in trainee's personnel file along with verification of the trainee having received the instruction.

(e) Assure the existence and completeness of reprocessing records to document each dialyzer from first use to discard.

(f) Demonstrate working knowledge of dialyzer reprocessing machine and review output to assure proper functioning.

(g) Monitor effectiveness of dialyzer reprocessing processes and procedures through scheduled reviews to identify problems and implement necessary changes related to dialyzer reprocessing operations. In fulfilling this responsibility, Medical Director shall oversee audits of dialyzer reprocessing procedures, tasks, and logs in accordance with AAMI requirements.

10. Infection Control. Medical Director shall:

(a) Provide general oversight for infection control activities at Center.

(b) Work with Center staff to conduct infection control surveillance and reporting.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

(c) Perform a monthly review of data and identify issues, including but not limited to:

(i) Identified infection control issues at Center.

(ii) Vaccination rates for Hepatitis B, Influenza, and Pneumococcus.

(iii) Incidence of infections at Center.

(iv) Infection control audit reports.

(v) Hepatitis C Virus and Hepatitis B Virus surveillance.

(vi) Vascular Access ("VA") infections and peritonitis in PD program and other serious infections.

(d) Review and approve policies regarding infection control.

(e) Work with Center staff (including corporate assistance as necessary) to conduct and document investigations into infectious diseases and drug resistant organisms. In fulfilling this responsibility, Medical Director shall:

(i) Identify trends that need root cause analysis.

(ii) Direct and monitor remediation at FHM meetings.

(iii) Assure Reportable Infectious Diseases are reported to the State Health Department and validate compliance with Federal, state, Company and DaVita programs.

11. Physical Environment. Medical Director shall:

(a) Work with Center staff to maintain a safe treatment environment.

(b) Assure there is a process for the general oversight of maintenance and that the outcomes of the process are monitored to assure:

(i) Patient care associated equipment (including emergency equipment, dialysis machines and equipment, the water treatment system and dialyzer reprocessing equipment) are maintained and operated in accordance with manufacturer's recommendations.

(ii) Training to staff and patients to manage medical and non-medical emergencies, including periodic drills to evaluate preparedness.

(iii) Annual evaluation of the effectiveness and update of Center's emergency and disaster plans.

(iv) Compliance with applicable fire safety requirements.

12. Safety. Medical Director shall:

(a) Provide general oversight for safety activities at Center.

(b) Review and approve policies regarding safety.

(c) As part of Quality Assessment and Performance Improvement Plan ("QAPI") activities, work with Center staff to monitor potential safety issues at Center, including but not limited to, performance of a monthly review of:

(i) Sentinel events.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

(ii) Adverse patient occurrences.

(iii) Product, equipment, medication notices or recalls.

(iv) Patient grievances.

(v) Occupational Safety and Health Administration and safety checklist.

13. Quality Assessment and Performance Improvement. Medical Director shall:

(a) Lead quality activities at Center.

(b) Review and approve policies regarding quality activities at Center.

(c) Oversee monthly FHM. In fulfilling this responsibility and without limitation as to other requirements of oversight, Medical Director shall

(i) Review quality indicators and outliers.

(ii) Review deaths of Center patients.

(iii) Review patient hospitalizations, discharges, and transfers.

(iv) Review infection control activities.

(v) Review adverse occurrences.

(vi) Review safety issues.

(vii) Review physical systems (water machines, dialyzer reprocessing and physical plant) issues.

(viii) Review Center staff education and training.

(ix) Review patient and Center staff grievances.

(x) Identify trends in patient grievances, determine corrective actions, and incorporate into Center's quality program.

(xi) Identify underperforming attending physicians and work with them to develop a plan of correction to improve outcomes.

(xii) Participate in Center based clinical problem solving including development, implementation, and monitoring of corrective action plans to address areas where issues are identified.

(xiii) Develop standard protocols which require blood and dialysate cultures and endotoxin levels be collected in the event of patient adverse reaction(s) during or following dialysis treatment.

(d) Participate in interviews with Medicare Surveyors to clarify any issues identified about Center and staff's practices related, but not limited to, infection control, water and dialysate, dialyzer reprocessing of hemodialyzers and bloodlines, and governance.

(e) Participate and support quality activities at Center and DaVita, including but not limited to:

(i) DaVita quality initiatives.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

(ii) Continuous Quality Improvement ("CQI") projects at Center.

(iii) Facility audits, including both internal audits and external CMS survey audits, and related Corrective Action Plans.

(f) Communicate with Governing Body regarding the quality activity needs identified.

14. Policies and Procedures. Medical Director shall:

(a) Review and participate in discussion regarding policies and procedures which may be created and adopted by the Physician Council and the Company, and work with Center staff to individualize policies to address unique Center situations.

(b) Participate in the development, implementation, and periodic review of Center specific policies and procedures.

(c) Approve, in conjunction with the Governing Body, policies and procedures at Center.

(d) Monitor Center staff and attending physician compliance with policies and procedures.

15. Documentation Maintenance and Retention. Medical Director shall:

(a) Comply with Center's and DaVita's record keeping, review, timing, removal, and retention requirements policies and procedures.

(b) Sign involuntary discharges.

(c) Direct Center staff to document thoroughly and accurately every incident of non-compliance, and facilitate and participate (as appropriate) in any First Letter of Concerns or Formal Patient Care Conferences.

(d) Assure patient medical records are current and maintained in accordance with Center's policies and procedures, Medical Staff Bylaws and applicable regulations, including but not limited to:

(i) Patient plans of care through attending physician participation in IDT care plan meetings.

(ii) Medical history.

(iii) Result of physical examinations and laboratory tests.

(iv) Progress reports prepared by patient care staff.

(v) Complete and legibly signed orders with diagnosis supporting medical justification.

(vi) Discharge summaries.

(e) Work with Center staff to protect the privacy and security of patients' medical record information.

16. Center Staff Education, Training, and Performance. Medical Director shall:

(a) Oversee appropriate orientation of staff to Center and their work responsibilities.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

(b) Review and approve policies, procedures, and materials for clinical training of Center staff.

(c) Review and approve the patient care technician, biomed technician and dialyzer reprocessing training program at Center.

(d) Assure that Center staff members receive the appropriate education and training to competently perform their job responsibilities, including but not limited to the following:

(i) Infection Control.

(ii) Water and dialysate quality.

(iii) Dialyzer reprocessing.

(iv) Emergency preparedness.

(e) Work with Facility Administrator to review and attest to Center staff competency files at least quarterly for existing staff and upon completion of training for new hires and assure that staff members are competent to carry out their assigned duties and follow Center policy regarding expected performance, including review of staff surveys.

(f) Cooperate and participate in Center's and Company's education programs and in-service programs.

(g) Assure appropriate Center staff training and competency is evaluated when problems identified in FHM.

17. Center Medical Staff Education and Performance. Medical Director shall:

(a) Oversee appropriate orientation of medical staff and other providers to Center.

(b) Assure attending physicians are educated on and familiar with Center policies and procedures, clinical benchmarks, guidelines, protocols, and quality processes.

(c) Assure attending physicians

(i) Maintain privileges at local hospitals.

(ii) Provide coverage during absences and inform Center.

(d) Communicate expectations to the medical staff regarding staff participation in improving the quality of medical care provided to Center patients.

(e) Work with Center Governing Body to review and approve practitioner privileging requests at initial appointment, reappointment, and for facility add requests. Ensure that privileging requests are handled timely, within 30-60 days from the request being received from credentialing, as required under the DaVita Medical Staff Bylaws.

(f) Review credentialing files (including applicable board and licensure requirements) of Center medical staff with Facility Administrator at least quarterly and at reappointment.

(g) Assure compliance with state, local, and Company and DaVita requirements regarding the employment and practice of Physician Extenders in Center.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

(h) Assure that attending physicians who maintain privileges at Center are holding patient care meetings consistent with Center's medical staff bylaws.

(i) Counsel in person or in writing any member of the medical staff not complying with Medical Staff Bylaws or meeting Company and DaVita performance standards and requirements, including but not limited to:

(i) Monthly patient rounding.

(ii) Complete and timely documentation, including assessments, progress notes, and care plans.

(iii) Incorporation of the patient record of care in Center medical record.

(j) Act in coordination with Company, the Physician Council, the Credentialing and Peer Review Committee, DaVita's Office of Chief Medical Officer ("OCMO"), Facility Administrator and Governing Body in matters of concern to Center, and participate in the medical staff peer review process as provided for in the Medical Staff Bylaws.

18. Healthcare Provider Liaison and Medical Staff Privileges. Medical Director shall:

(a) Maintain current, unrestricted staff privileges at a healthcare provider (e.g. hospital) that will provide acute hospitalization and back-up to patients of Center.

(b) Assist and participate in quality assurance activities with healthcare providers as requested by Center and healthcare provider.

19. Medical Director Education Programs. Medical Director:

(a) Shall participate in such meetings, education sessions and events as required by Company.

(b) Notwithstanding the foregoing, if new to the medical director role with DaVita

(i) Company recommends completion of the Medical Director Roles & Responsibilities course on DaVita's online learning system.

(ii) Company recommends attendance at one or more of the existing training programs/meetings available to Medical Directors, including, but not limited to DaVita Medical Director Education Program at the annual Physician Leadership Meeting and DaVita specific courses/training for new medical directors.

(1) Medical Director should complete above training within the first 12 months of the Medical Director's term of service.

(c) Complete additional education as required by the Governing Body or OCMO.

(d) For any required training, evidence of course completion must be submitted to the Governing Body for inclusion in Governing Body minutes. For all others, Company recommends evidence of course completion also be submitted to Governing Body.

20. Company Meetings and Committees. Medical Director shall:

(a) Attend administrative meetings with Facility Administrator as reasonably requested by Facility Administrator upon reasonable notice to Medical Director.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

(b) Assure attendance by attending physician at monthly patient care meetings convened for the review of the progress and care of each patient at Center.

(c) Company recommends at least one member of Medical Director's Group attend DaVita Physician Leadership Meeting annually, and certain regional Medical Director Conferences as reasonably scheduled by OCMO. Company also recommends that any members of Medical Director Group that may serve as Medical Director or Covering Medical Director attend Physician Leadership Meeting. Company may, in its sole and reasonable discretion and upon reasonable notice, require attendance at DaVita's Physician Leadership Meeting or any other meetings.

(d) Meet with Company and DaVita personnel as required.

(e) Schedule in advance sufficient time for monthly meetings including FHM, Governing Body, and others as needed.

(f) Cooperate and support reasonable, clearly defined, vendor activities as approved by Company and DaVita and Center's Governing Body in a manner consistent with Center Medical Staff Bylaws.

21. Protection of Confidential Information and Goodwill. Medical Director shall:

(a) Take necessary and appropriate actions to assure that the Confidential Information, as defined in the Agreement, and the goodwill associated with Center's and Company's relationships with patients, employees, vendors, consultants and others, both of which are acknowledged to be of extreme importance and value to Center and Company, are protected and preserved to the maximum extent possible.

(b) Assure that Center staff, consultants and others properly exposed to such Confidential Information and goodwill are trained in effective measures to protect and preserve such Confidential Information and goodwill for the exclusive use of Center and Company, and the importance of and need for such measures.

22. Compliance with Conditions for Coverage, Laws and Regulations, and Company's and DaVita's Compliance Programs. Medical Director shall:

(a) Be familiar with and perform other duties required under and be in compliance with 42 C.F.R. Part 494 Medicare Conditions for Coverage for End-Stage Renal Disease Facilities and other applicable laws and regulations.

(b) Comply with and assure compliance by members of the Medical Staff of Center with Company's and DaVita's Code of Conduct and established policies and procedures, the Medical Staff Bylaws, and the requirements of 42 C.F.R. § 494.150, as amended from time to time, as well as other applicable state and federal laws and regulations.

(c) Comply with and participate in Company's and DaVita's compliance program, initiatives, policies, training, and Privacy & Security Standards.

(d) Notify DaVita's Chief Compliance Officer promptly of any violation of any applicable law, regulation, third party payor requirement or breach of DaVita's compliance program.

(e) Cooperate with DaVita in responding to or resolving any complaint, investigation, inquiry or review initiated by a governmental agency, or DaVita.

DocuSign Envelope ID: A5A8C4B2-2EDC-46A3-B30B-39CB9C68BF64

(f) Communicate promptly any exclusion from participation in any federal health care program or knowledge of any Final Adverse Action.

(g) Participate in interviews with Medicare Surveyors to clarify any issues identified about Center and staff's practices related but not limited to infection control, water and dialysate, dialyzer reprocessing of hemodialyzers and bloodlines, and governance.

(h) Review survey reports, both internal and external, and participate as needed in Plans of Correction.

(i) Cooperate with any ESRD Network activities related to Center.

SAMPLE JOINDER

JOINDER TO FACILITY AND ASSOCIATE MEDICAL DIRECTOR AGREEMENT

This joinder ("Joinder") is made as of the last date of signature by a party hereto (the "Effective Date"), by and among the undersigned (the "Agreement"). Reference is made to the Facility and Associate Medical Director Agreement (the "Agreement"), by and among **Refuge Dialysis, LLC**, a Delaware limited liability company ("Company"), **The Everett Clinic, P.S.** ("Group") and **Thao Pascual, M.D.** ("Facility Medical Director") and **Oliver Tai, M.D.** ("Associate Medical Director") (each a "Medical Director") relating to the free-standing dialysis center known as "Pilchuck Dialysis" and located at 1250 State Avenue, Marysville, WA 98270-3659 ("Center"), including the PD Program, the HHD Program and the Nocturnal Shift.

The undersigned acknowledges that [he/she] is a Related Physician (as defined in the Agreement) and receives and will receive compensation and benefits from Group based on such employment or equity ownership. Therefore, and as a condition of [his/her] status as a Related Physician, the undersigned agrees with and guarantees to Group that the undersigned shall abide by the terms and conditions of the Agreement, as such may be amended over time, including without limitation the non-competition and non-solicitation covenants contained in Section 10 and the compliance representations, warranties and covenants contained in Section 5 of the Agreement.

The undersigned further acknowledges that Company has entered into the Agreement in reliance on the assurance, as reflected in Section 10.6 of the Agreement that the undersigned shall execute this Joinder.

In the event the undersigned ceases to be a Related Physician during the Term of the Agreement, the Restricted Period called for in the Agreement shall end on the second anniversary of the date on which such Related Physician ceases to be a Related Physician. The non-compete restrictions shall not extend beyond the second anniversary of the undersigned leaving the Group, or affiliation therewith, if such event occurs prior to the termination of the Agreement.

The undersigned agrees that Company will be a direct third party beneficiary of the covenants made in this Joinder and entitled to enforce the provisions of this Joinder, including, without limitation, the non-competition and non-solicitation covenants contained in Section 10 of the Agreement and the compliance representations, warranties and covenants contained in Section 5 of the Agreement.

The undersigned further acknowledges that the Agreement, including Exhibit B, may from time to time be amended by the Company and Group and agrees that [he/she] shall be bound by any such amendment in the same manner and to the same extent as if [he/she] had signed such amendment, immediately upon receipt of such amendment. Notwithstanding the foregoing, Company and Group may not amend the Agreement in a manner that materially and adversely affects the interests of the undersigned without the consent of the undersigned.

Electronic Record and Signature Disclosure

ELECTRONIC RECORD AND SIGNATURE DISCLOSURE

From time to time, DaVita (we, us or Company) may be required by law to provide to you certain written notices or disclosures. Described below are the terms and conditions for providing to you such notices and disclosures electronically through your DocuSign, Inc. (DocuSign) Express user account. Please read the information below carefully and thoroughly, and if you can access this information electronically to your satisfaction and agree to these terms and conditions, please confirm your agreement by clicking the 'I agree' button at the bottom of this document.

Getting paper copies

At any time, you may request from us a paper copy of any record provided or made available electronically to you by us. For such copies, as long as you are an authorized user of the DocuSign system you will have the ability to download and print any documents we send to you through your DocuSign user account for a limited period of time (usually 30 days) after such documents are first sent to you. After such time, if you wish for us to send you paper copies of any such documents from our office to you, you will be charged a $0.00 per-page fee. You may request delivery of such paper copies from us by following the procedure described below.

Withdrawing your consent

If you decide to receive notices and disclosures from us electronically, you may at any time change your mind and tell us that thereafter you want to receive required notices and disclosures only in paper format. How you must inform us of your decision to receive future notices and disclosure in paper format and withdraw your consent to receive notices and disclosures electronically is described below.

Consequences of changing your mind

If you elect to receive required notices and disclosures only in paper format, it will slow the speed at which we can complete certain steps in transactions with you and delivering services to you because we will need first to send the required notices or disclosures to you in paper format, and then wait until we receive back from you your acknowledgment of your receipt of such paper notices or disclosures. To indicate to us that you are changing your mind, you must withdraw your consent using the DocuSign 'Withdraw Consent' form on the signing page of your DocuSign account. This will indicate to us that you have withdrawn your consent to receive required notices and disclosures electronically from us and you will no longer be able to use your DocuSign Express user account to receive required notices and consents electronically from us or to sign electronically documents from us.

All notices and disclosures will be sent to you electronically

Unless you tell us otherwise in accordance with the procedures described herein, we will provide electronically to you through your DocuSign user account all required notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you during the course of our relationship with you. To reduce the chance of you inadvertently not receiving any notice or disclosure, we prefer to provide all of the required notices and disclosures to you by the same method and to the same address that you have given us. Thus, you can receive all the disclosures and notices electronically or in paper format through the paper mail delivery system. If you do not agree with this process, please let us know as described below. Please also see the paragraph immediately above that describes the consequences of your electing not to receive delivery of the notices and disclosures electronically from us.

How to contact DaVita:
You may contact us to let us know of your changes as to how we may contact you electronically, to request paper copies of certain information from us, and to withdraw your prior consent to receive notices and disclosures electronically as follows:
To contact us by email send messages to: emily.briggs@davita.com

To advise DaVita of your new e-mail address
To let us know of a change in your e-mail address where we should send notices and disclosures electronically to you, you must send an email message to us at jennifer.vanhyning@davita.com and in the body of such request you must state: your previous e-mail address, your new e-mail address. We do not require any other information from you to change your email address..
In addition, you must notify DocuSign, Inc to arrange for your new email address to be reflected in your DocuSign account by following the process for changing e-mail in DocuSign.

To request paper copies from DaVita
To request delivery from us of paper copies of the notices and disclosures previously provided by us to you electronically, you must send us an e-mail to emily.briggs@davita.com and in the body of such request you must state your e-mail address, full name, US Postal address, and telephone number. We will bill you for any fees at that time, if any.

To withdraw your consent with DaVita
To inform us that you no longer want to receive future notices and disclosures in electronic format you may:

i. decline to sign a document from within your DocuSign account, and on the subsequent page, select the check-box indicating you wish to withdraw your consent, or you may;
ii. send us an e-mail to emily.briggs@davita.com and in the body of such request you must state your e-mail, full name, IS Postal Address, telephone number, and account number. We do not need any other information from you to withdraw consent.. The consequences of your withdrawing consent for online documents will be that transactions may take a longer time to process..

Required hardware and software

Operating Systems:	Windows2000? or WindowsXP?
Browsers (for SENDERS):	Internet Explorer 6.0? or above
Browsers (for SIGNERS):	Internet Explorer 6.0?, Mozilla FireFox 1.0, NetScape 7.2 (or above)
Email:	Access to a valid email account
Screen Resolution:	800 x 600 minimum
Enabled Security Settings:	•Allow per session cookies •Users accessing the internet behind a Proxy Server must enable HTTP 1.1 settings via proxy connection

** These minimum requirements are subject to change. If these requirements change, we will provide you with an email message at the email address we have on file for you at that time providing you with the revised hardware and software requirements, at which time you will have the right to withdraw your consent.

Acknowledging your access and consent to receive materials electronically
To confirm to us that you can access this information electronically, which will be similar to other electronic notices and disclosures that we will provide to you, please verify that you were able to read this electronic disclosure and that you also were able to print on paper or electronically save this page for your future reference and access or that you were able to e-mail this disclosure and consent to an address where you will be able to print on paper or save it for your future reference and access. Further, if you consent to receiving notices and disclosures exclusively in electronic format on the terms and conditions described above, please let us know by clicking the 'I agree' button below.
By checking the 'I Agree' box, I confirm that:

- I can access and read this Electronic CONSENT TO ELECTRONIC RECEIPT OF ELECTRONIC RECORD AND SIGNATURE DISCLOSURES document; and

- I can print on paper the disclosure or save or send the disclosure to a place where I can print it, for future reference and access; and

- Until or unless I notify DaVita as described above, I consent to receive from exclusively through electronic means all notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to me by DaVita during the course of my relationship with you.

October 1, 2018

Via Email

Washington State Department of Health
Certificate of Need Program
Attn: Janis Sigman, Manager
P.O. Box 47852
Olympia, WA 98504-7852

Dear Ms. Sigman:

Refuge Dialysis, LLC, a subsidiary of Total Renal Care, Inc., a subsidiary of DaVita Inc. (hereafter "DaVita"), hereby submits a letter of intent to apply for a Certificate of Need to expand the DaVita Pilchuck Dialysis Center by two (2) stations, an increase from eight (8) Certificate of Need-approved stations plus one (1) Certificate of Need-exempt isolation station to ten (10) stations plus one (1) Certificate of Need-exempt isolation station in the Snohomish County ESRD Planning Area #2. In accordance with WAC 246-310-080 and 246-310-806, the following information is provided:

A Description of the Services Proposed:

DaVita proposes to expand the DaVita Pilchuck Dialysis Center by two (2) stations to a ten (10) total station plus one (1) Certificate of Need-exempt isolation station dialysis facility that will provide and support in-center hemodialysis and peritoneal dialysis.

Estimated Cost of the Proposed Project:

The capital expenditure associated with this project is estimated to be **$41,428.**

Description of the Service Area:

The service area will be the Snohomish County ESRD Planning Area #2.

We look forward to continuing to serve dialysis patients in Washington.

Sincerely,

Evan Moore
Director – Special Projects
DaVita, Inc.

Appendix 6

Operational and Financial Commitment Letter

DaVita™

April 4, 2018

Ms. Janis Sigman
Program Manager
Certificate of Need Program
Office of Certification and Enforcement
State of Washington Department of Health
111 Israel Rd. SE
Tumwater, WA 98501

Dear Ms. Sigman:

DaVita, Inc. is planning new projects for the Washington State area. The DaVita, Inc. Board of Directors has authorized management to make strategic investments in operations throughout the United States. The estimated capital expenditure for each project is outlined in a project specific proforma submitted with each Certificate of Need application. Each project will be funded with cash on hand that has been generated through operations. The capital expenditure is not an advance or loan and none of the parent company's debt will be assigned to the facility at any point after the project is complete.

As the Chief Operating Officer - Kidney Care for DaVita, Inc., I have the authority to both authorize individual Certificate of Need applications and commit DaVita to long-term lease agreements, consistent with the investment policies and financial controls that have been established for the corporation. DaVita has authorized its Special Projects Director responsible for Washington State to submit Certificate of Need applications in that state.

Sincerely,

Michael Staffieri
Chief Operating Officer – Kidney Care
Davita, Inc.

EBIT	$ 3,089,462	$ 3,264,481	$ 3,439,837	$ 3,614,760

Assumptions:

First Full Year: 2020, based on a first patient date in July 2019 for the expansion.

Total Stations: CON Approved stations. One CON-exempt isolation station is also included in driving relevant category calculations (bio-med FTE, overall existing facility depreciation).

Total Chronic Capacity: 6 shift capacity of CON-approved stations is assumed to be 100% utilization.

Patient Census Projections: Census projections are based on a 5-year projection of planning area patients using a regression of 5 years historical data and DaVita's own experience and expertise. This is the same trend line (based on the Department's methodology as applied through 2022), but extended out through 2024 to project planning area census through the projection period. DaVita uses projected planning area census, existing planning area capacity, and additional market and experiential knowledge to project new facility census. Home modalities are projected as a ratio of home patients to in-center patients.

Charity Care: estimated at 1.3% of gross revenue, consistent with DaVita's historical experience.

Total Treatments: Total Treatment Volume is assumed to be based on average yearly census, a 5% missed treatment rate consistent with DaVita's own experience and expertise, and three treatments weekly for 52 weeks per year.

Revenue per treatment: No inflation is applied to revenue per treatment, which is based on the last full year of operation for the facility, 2017, and its payor mix.

General expenses: Based on cost per treatment for the last full calendar year (2017) by category. This excludes lease expenses (noted below), depreciation expense (based on projected capital expenditures and existing depreciation), medical director expense (noted below), and labor costs (noted below).

Cost inflation: DaVita does not assume inflation in any expense category (except for the lease agreement, noted separately below) – no current contract cost increases are known during the pro forma period, and thus none are included.

Medical Director Expense: based on contracted, known expenses in latest medical director agreements that run through the extent of the three-year projection window.

Lease Expense: base rent is directly pulled from the lease contract for each calendar year and the lease term and rent, with Commencement on Dec 1, 2013. Note that the master lease includes a 3% increase in base rent starting each December 1 – the pro forma includes this adjustment. Tax & CAM are calculated based on actual 2017 tax and CAM per square foot for the facility.

Labor Assumptions: Based on safe, fair, and efficient staffing ratios for projected census and required staff type. Benefits, taxes, and non-base pay are assumed at a rate of 72% of base salaries and wages based on 2017 facility data.

(State of incorporation)	**(I.R.S. Employer Identification No.)**

Securities registered pursuant to Section 12(b) of the Act:

Class of Security:	**Registered on:**
Common Stock, $0.001 par value	**New York Stock Exchange**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	☒	Accelerated filer	☐
Non-accelerated filer	☐ (Do not check if a smaller reporting company)	Smaller reporting company	☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

As of June 30, 2015, the number of shares of the Registrant's common stock outstanding was approximately 215.5 million shares and the aggregate market value of the common stock outstanding held by non-affiliates based upon the closing price of these shares on the New York Stock Exchange was approximately $17.1 billion.

As of January 29, 2016, the number of shares of the Registrant's common stock outstanding held by non-affiliates was approximately 206.1 million shares.

Documents incorporated by reference

Portions of the Registrant's proxy statement for its 2016 annual meeting of stockholders are incorporated by reference in Part III of this Form 10-K.

PART I

Item 1. Business

We were incorporated as a Delaware corporation in 1994. Our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to section 13(a) or 15(d) of the Exchange Act are made available free of charge through our website, located at http://www.davita.com, as soon as reasonably practicable after the reports are filed with or furnished to the Securities and Exchange Commission (SEC). The SEC also maintains a website at http://www.sec.gov where these reports and other information about us can be obtained. The contents of our website are not incorporated by reference into this report.

Overview of DaVita HealthCare Partners Inc.

The Company consists of two major divisions, Kidney Care and HealthCare Partners (HCP). Kidney Care is comprised of our U.S. dialysis and related lab services, our ancillary services and strategic initiatives, including our international operations and our corporate administrative support. Our U.S. dialysis and related lab services business is our largest line of business, which is a leading provider of kidney dialysis services in the U.S. for patients suffering from chronic kidney failure, also known as end stage renal disease (ESRD). Our HCP division is a patient- and physician-focused integrated healthcare delivery and management company with over two decades of providing coordinated, outcomes-based medical care in a cost-effective manner.

For financial information about our reportable segments please read "Note 25 Segment Reporting" to the consolidated financial statements included in this report.

Kidney Care Division

U.S. dialysis and related lab services business overview

Our U.S. dialysis and related lab services business is a leading provider of kidney dialysis services for patients suffering from ESRD. As of December 31, 2015, we provided dialysis and administrative services in the U.S. through a network of 2,251 outpatient dialysis centers in 46 states and the District of Columbia, serving a total of approximately 180,000 patients. We also provide acute inpatient dialysis services in approximately 900 hospitals and related laboratory services throughout the U.S. Our U.S. dialysis and related lab services business accounted for approximately 62% of our 2015 consolidated net revenues. All references in this document to dialysis and related lab services refer only to our U.S. dialysis and related lab services business.

The loss of kidney function is normally irreversible. Kidney failure is typically caused by Type I and Type II diabetes, high blood pressure, polycystic kidney disease, long-term autoimmune attack on the kidney and prolonged urinary tract obstruction. ESRD is the stage of advanced kidney impairment that requires continued dialysis treatments or a kidney transplant to sustain life. Dialysis is the removal of toxins, fluids and salt from the blood of patients by artificial means. Patients suffering from ESRD generally require dialysis at least three times a week for the rest of their lives.

According to United States Renal Data System, there were approximately 468,000 ESRD dialysis patients in the U.S. in 2013. The underlying ESRD dialysis patient population has grown at an approximate compound rate of 3.6% from 2000 to 2013, the latest period for which such data is available. The growth rate is attributable to the aging of the population, increased incidence rates for diseases that cause kidney failure such as diabetes and hypertension, lower mortality rates for dialysis patients and growth rates of minority populations with higher than average incidence rates of ESRD.

Since 1972, the federal government has provided healthcare coverage for ESRD patients under the Medicare ESRD program regardless of age or financial circumstances. ESRD is the first and only disease state eligible for Medicare coverage both for dialysis and dialysis-related services and for all benefits available under the Medicare program. For patients with Medicare coverage, all ESRD payments for dialysis treatments are made under a single bundled payment rate. See page 5 for further details.

Although Medicare reimbursement limits the allowable charge per treatment, it provides industry participants with a relatively predictable and recurring revenue stream for dialysis services provided to patients without commercial insurance. For the year ended December 31, 2015, approximately 89% of our total dialysis patients were covered under some form of government-based programs, with approximately 76% of our dialysis patients covered under Medicare and Medicare-assigned plans.

Treatment options for ESRD

Treatment options for ESRD are dialysis and kidney transplantation.

Dialysis options

- *Hemodialysis*

Hemodialysis, the most common form of ESRD treatment, is usually performed at a freestanding outpatient dialysis center, at a hospital-based outpatient center, or at the patient's home. The hemodialysis machine uses an artificial kidney, called a dialyzer, to remove toxins, fluids and salt from the patient's blood. The dialysis process occurs across a semi-permeable membrane that divides the dialyzer into two distinct chambers. While blood is circulated through one chamber, a pre-mixed fluid is circulated through the other chamber. The toxins, salt and excess fluids from the blood cross the membrane into the fluid, allowing cleansed blood to return back into the patient's body. Each hemodialysis treatment that occurs in the outpatient dialysis centers typically lasts approximately three and one-half hours and is usually performed three times per week.

Hospital inpatient hemodialysis services are required for patients with acute kidney failure primarily resulting from trauma, patients in early stages of ESRD and ESRD patients who require hospitalization for other reasons. Hospital inpatient hemodialysis is generally performed at the patient's bedside or in a dedicated treatment room in the hospital, as needed.

Some ESRD patients who are healthier and more independent may perform home-based hemodialysis in their home or residence through the use of a hemodialysis machine designed specifically for home therapy that is portable, smaller and easier to use. Patients receive training, support and monitoring from registered nurses, usually in our outpatient dialysis centers, in connection with their dialysis treatment. Home-based hemodialysis is typically performed with greater frequency than dialysis treatments performed in outpatient dialysis centers and on varying schedules.

- *Peritoneal dialysis*

Peritoneal dialysis uses the patient's peritoneal or abdominal cavity to eliminate fluid and toxins and is typically performed at home. The most common methods of peritoneal dialysis are continuous ambulatory peritoneal dialysis (CAPD), and continuous cycling peritoneal dialysis (CCPD). Because it does not involve going to an outpatient dialysis center three times a week for treatment, peritoneal dialysis is an alternative to hemodialysis for patients who are healthier, more independent and desire more flexibility in their lifestyle. However, peritoneal dialysis is not a suitable method of treatment for many patients, including patients who are unable to perform the necessary procedures and those at greater risk of peritoneal infection.

CAPD introduces dialysis solution into the patient's peritoneal cavity through a surgically placed catheter. Toxins in the blood continuously cross the peritoneal membrane into the dialysis solution. After several hours, the patient drains the used dialysis solution and replaces it with fresh solution. This procedure is usually repeated four times per day.

CCPD is performed in a manner similar to CAPD, but uses a mechanical device to cycle dialysis solution through the patient's peritoneal cavity while the patient is sleeping or at rest.

Kidney transplantation

Although kidney transplantation, when successful, is generally the most desirable form of therapeutic intervention, the shortage of suitable donors, side effects of immunosuppressive pharmaceuticals given to transplant recipients and dangers associated with transplant surgery for some patient populations limit the use of this treatment option.

Dialysis and related lab services we provide

Outpatient hemodialysis services

As of December 31, 2015, we operated or provided administrative services through a network of 2,251 outpatient dialysis centers in the U.S. that are designed specifically for outpatient hemodialysis. In 2015, our overall network of U.S. outpatient dialysis centers increased by 72 primarily as a result of the opening of new dialysis centers, net of center closures and divestitures, and acquisitions, representing a total increase of approximately 3.3% from 2014.

As a condition of our enrollment in Medicare for the provision of dialysis services, we contract with a nephrologist or a group of associated nephrologists to provide medical director services at each of our dialysis centers. In addition, other nephrologists may apply for practice privileges to treat their patients at our centers. Each center has an administrator, typically a registered nurse, who supervises the day-to-day operations of the center and its staff. The staff of each center typically consists of registered nurses, licensed practical or vocational nurses, patient care technicians, a social worker, a registered dietician, biomedical technician support and other administrative and support personnel.

Under Medicare regulations, we cannot promote, develop or maintain any kind of contractual relationship with our patients that would directly or indirectly obligate a patient to use or continue to use our dialysis services, or that would give us any preferential rights other than those related to collecting payments for our dialysis services. Our total patient turnover, which is based upon all causes, averaged approximately 25% in both 2015 and 2014. However, in 2015, the overall number of patients to whom we provided services in the U.S. increased by approximately 4.1% from 2014, primarily from the opening of new dialysis centers and acquisitions, and continued growth within the industry.

Hospital inpatient hemodialysis services

As of December 31, 2015, we provided hospital inpatient hemodialysis services, excluding physician services, to patients in approximately 900 hospitals throughout the U.S. We render these services based on a contracted per-treatment fee that is individually negotiated with each hospital. When a hospital requests our services, we typically administer the dialysis treatment at the patient's bedside or in a dedicated treatment room in the hospital, as needed. In 2015, hospital inpatient hemodialysis services accounted for approximately 4.2% of our total U.S. dialysis treatments.

Home-based hemodialysis services

Many of our outpatient dialysis centers offer certain support services for dialysis patients who prefer and are able to perform either home-based hemodialysis or peritoneal dialysis in their homes. Home-based hemodialysis support services consist of providing equipment and supplies, training, patient monitoring, on-call support services and follow-up assistance. Registered nurses train patients and their families or other caregivers to perform either home-based hemodialysis or peritoneal dialysis.

ESRD laboratory services

We own two separately incorporated, licensed, clinical laboratories which specialize in ESRD patient testing. These specialized laboratories provide routine laboratory tests for dialysis and other physician-prescribed laboratory tests for ESRD patients and are an integral component of overall dialysis services that we provide. Our laboratories provide these tests predominantly for our network of ESRD patients throughout the U.S. These tests are performed to monitor a patient's ESRD condition, including the adequacy of dialysis, as well as other medical conditions of the patient. Our laboratories utilize information systems which provide information to certain members of the dialysis centers' staff and medical directors regarding critical outcome indicators.

Management services

We currently operate or provide management and administrative services pursuant to management and administrative services agreements to 31 outpatient dialysis centers located in the U.S. in which we either own a minority equity investment or are wholly-owned by third parties. Management fees are established by contract and are recognized as earned typically based on a percentage of revenues or cash collections generated by the outpatient dialysis centers.

Quality care

We employ 240 clinical service teammates in our dialysis and related lab services business. The primary focus of this group is assuring and facilitating processes that aim to achieve superior clinical outcomes at our centers.

Our physician leadership in the Office of the Chief Medical Officer (OCMO) for our dialysis and related lab services business includes twelve senior nephrologists, led by our Chief Medical Officer, with a variety of academic, clinical practice, and clinical research backgrounds. Our Physician Council is an advisory body to senior management. The Physician Council is currently composed of three physicians with extensive experience in clinical practice in addition to the members of OCMO and currently nine Group Medical Directors.

Sources of revenue—concentrations and risks

Our U.S. dialysis and related lab services business net revenues represent approximately 62% of our consolidated net revenues for the year ended December 31, 2015. Our U.S. dialysis and related lab services revenues are derived primarily from our core business of providing dialysis services, the administration of pharmaceuticals, related laboratory services and to a lesser extent management fees generated from providing management and administrative services to certain outpatient dialysis centers, as discussed above.

The sources of our dialysis and related lab services revenues are principally from government-based programs, including Medicare and Medicare-assigned plans, Medicaid and Medicaid-assigned plans and commercial insurance plans.

The following table summarizes our U.S. dialysis services revenues by source and modality for the year ended December 31, 2015:

Source	Revenue percentages
Medicare and Medicare-assigned plans	56%
Medicaid and Medicaid-assigned plans	6%
Other government-based programs	4%
Total government-based programs	66%
Commercial (including hospital inpatient dialysis services)	34%
Total dialysis and related lab services revenues	100%

Modality	Revenue percentages
Outpatient hemodialysis centers	79%
Peritoneal dialysis and home-based hemodialysis	16%
Hospital inpatient hemodialysis	5%
Total dialysis and related lab services revenues	100%

Medicare revenue

Government dialysis related payment rates in the U.S. are principally determined by federal Medicare and state Medicaid policy. For patients with Medicare coverage, all ESRD payments for dialysis treatments are made under a single bundled payment rate which provides a fixed payment rate to encompass all goods and services provided during the dialysis treatment, including certain pharmaceuticals, such as Epogen® (EPO), vitamin D analogs and iron supplements, irrespective of the level of pharmaceuticals administered to the patient or additional services performed. Most lab services are also included in the bundled payment. The bundled payment rate is also adjusted for certain patient characteristics, a geographic usage index and certain other factors.

An important provision in the law is an annual adjustment, or market basket update, to the ESRD Prospective Payment System (PPS) base rate. Absent action by Congress, the PPS base rate is automatically updated annually by a formulaic inflation adjustment. In December 2013, the Centers for Medicare and Medicaid Services (CMS) issued the 2014 final rule for the ESRD PPS, which phases in the payment reductions mandated by the American Taxpayer Relief Act of 2012 (ATRA), as modified by the Protecting Access to Medicare Act of 2014, which will reduce our market basket inflation adjustment by 1.25% in each of 2016 and 2017, and 1% in 2018. CMS published the 2015 final rule for the ESRD PPS, which increased payments to dialysis facilities modestly by 0.3% to 0.5%, although rural facilities received a decrease of 0.5%. CMS recently issued the 2016 final rule for the ESRD PPS, which cuts dialysis facilities' bundled payment rate for 2016 as compared to 2015 while increasing funds for certain co-morbidities and other patient health factors, and rural facilities. CMS believes its 2016 final rule for the ESRD PPS will (i) increase overall payments to both hospital-based and freestanding dialysis facilities by approximately 0.2%, and (ii) decrease overall payments to rural dialysis facilities by approximately 0.1%.

As a result of the Budget Control Act of 2011 (BCA) and subsequent activity in Congress, a $1.2 trillion sequester (across-the-board spending cuts) in discretionary programs took effect on March 1, 2013. In particular, a 2% reduction to Medicare payments took effect on April 1, 2013, which was subsequently extended through 2014 and 2015. The Bipartisan Budget Act of 2015 extended the BCA's annual 2% reduction to Medicare payments through fiscal year 2025. These across-the-board spending cuts have affected and will continue to adversely affect our revenues, earnings and cash flows.

The CMS Center for Medicare & Medicaid Innovation Center (Innovation Center) is currently working with various healthcare providers to develop, refine and implement Accountable Care Organizations (ACOs) and other innovative models of care for Medicare and Medicaid beneficiaries. We are currently uncertain of the extent to which the long-term operation and evolution of these models of care, including ACOs, Bundled Payments for Care Improvement Initiative, Comprehensive ESRD Care (CEC) Model (which includes the development of ESRD Seamless Care Organizations (ESCOs)), the Comprehensive Primary Care Initiative, the Duals Demonstration, or other models, will impact the healthcare market over time. Our U.S. dialysis business may choose to participate in one or several of these models either as a partner with other providers or independently. We currently participate in the CEC Model with the Innovation Center, including with organizations in Arizona, Florida, New Jersey and Pennsylvania. In areas where our U.S. dialysis business is not directly participating in this or other Innovation Center models, some of our patients may be assigned to an ACO, another ESRD Care Model, or another program, in which case the quality and cost of care that we furnish will be included in an ACO's, another ESRD Care Model's or other programs' calculations. As new models of care emerge and evolve, we may be at risk for losing our Medicare patient base, which would have a materially adverse effect on our revenues, earnings and cash flow. Other initiatives in the government or private sector may also arise, including the development of models similar to ACOs, independent practice associations (IPAs) and integrated delivery systems or evolutions of those concepts which could adversely impact our business.

We anticipate that we will continue to experience increases in our operating costs in 2016 that will outpace any net Medicare rate increases that we may receive, which could significantly impact our operating results. In addition, we expect to continue experiencing increases in operating costs that are subject to inflation, such as labor and supply costs, regardless of whether there is a compensating inflation-based increase in Medicare payment rates or in payments under the bundled payment rate system.

ESRD patients receiving dialysis services become eligible for primary Medicare coverage at various times, depending on their age or disability status, as well as whether they are covered by a commercial insurance plan. Generally, for a patient not covered by a commercial insurance plan, Medicare becomes the primary payor for ESRD patients receiving dialysis services either immediately or after a three-month waiting period. For a patient covered by a commercial insurance plan, Medicare generally becomes the primary payor after 33 months, which includes the three-month waiting period, or earlier if the patient's commercial insurance plan coverage terminates. When Medicare becomes the primary payor, the payment rates we receive for that patient shift from the commercial insurance plan rates to Medicare payment rates, which are significantly lower than commercial insurance rates.

Medicare pays 80% of the amount set by the Medicare system for each covered dialysis treatment. The patient is responsible for the remaining 20%. In most cases, a secondary payor, such as Medicare supplemental insurance, a state Medicaid program or a commercial health plan, covers all or part of these balances. Some patients who do not qualify for Medicaid, but otherwise cannot afford secondary insurance, can apply for premium payment assistance from charitable organizations through a program offered by the American Kidney Fund. We and other dialysis providers support the American Kidney Fund and similar programs through voluntary contributions. If a patient does not have secondary insurance coverage, we are generally unsuccessful in our efforts to collect from the patient the remaining 20% portion of the ESRD composite rate that Medicare does not pay. However, we are able to recover some portion of this unpaid patient balance from Medicare through an established cost reporting process by identifying these Medicare bad debts on each center's Medicare cost report.

Medicaid revenue

Medicaid programs are state-administered programs partially funded by the federal government. These programs are intended to provide health coverage for patients whose income and assets fall below state-defined levels and who are otherwise uninsured. These programs also serve as supplemental insurance programs for co-insurance payments due from Medicaid-eligible patients with primary coverage under the Medicare program. Some Medicaid programs also pay for additional services, including some oral medications that are not covered by Medicare. We are enrolled in the Medicaid programs in the states in which we conduct our business.

Commercial revenue

Before a patient becomes eligible to have Medicare as their primary payor for dialysis services, a patient's commercial insurance plan, if any, is responsible for payment of such dialysis services for the first 33 months, as discussed above. Although commercial payment rates vary, average commercial payment rates established under commercial contracts are generally significantly higher than Medicare rates. The payments we receive from commercial payors generate nearly all of our profits. Payment methods from commercial payors can include a single lump-sum per treatment, referred to as bundled rates, or in other cases separate payments for dialysis treatments and pharmaceuticals, if used as part of the treatment, referred to as Fee-for-Service (FFS) rates. Commercial payment rates are the result of negotiations between us and insurers or third-party administrators. Our out-of-network payment rates are on average higher than in-network commercial contract payment rates. In 2015, we continued to enter into some commercial contracts, covering certain patients that will primarily pay us under a single bundled payment rate for all dialysis services provided to these patients. However, some of the contracts will pay us for certain other services and pharmaceuticals in addition to the bundled payment. These contracts typically contain annual price escalator provisions. We are continuously in the process of negotiating agreements with our commercial payors and if our negotiations result in overall commercial contract payment rate reductions in excess of our commercial contract payment rate increases, our revenues and operating results could be negatively impacted. In addition, if there is an increase in job losses in the U.S., or depending upon changes to the healthcare regulatory system by CMS and/or the impact of healthcare insurance exchanges, we could experience a decrease in the number of patients covered under traditional commercial insurance plans. Patients with commercial insurance who cannot otherwise maintain coverage frequently rely on financial assistance from charitable organizations, such as the American Kidney Fund. If these patients are unable to obtain or continue to receive such financial assistance, our revenues, earnings, and cash flow could be substantially reduced.

Approximately 34% of our dialysis services revenues and approximately 11% of our dialysis patients were associated with commercial payors for the year ended December 31, 2015. Commercial patients as a percentage of our total dialysis patients increased by approximately 1% in 2015 as compared to 2014. Less than 1% of our dialysis and related lab services revenues are due directly from patients. There is no single commercial payor that accounted for more than 10% of total dialysis and related lab services revenues for the year ended December 31, 2015.

The healthcare reform legislation enacted in 2010 introduced healthcare insurance exchanges which provide a marketplace for eligible individuals and small employers to purchase healthcare insurance. Although we cannot predict the long term effects of these exchanges, we believe the healthcare insurance exchanges could ultimately result in a reduction in patients covered by traditional commercial insurance or an increase of patients covered through the exchanges under more restrictive commercial plans with lower reimbursement rates. Approximately 11 million individuals were enrolled in the exchanges in 2015, as compared to approximately eight million in 2014. To the extent that the ongoing implementation of such exchanges results in a reduction in reimbursement rates for our services from commercial and/or government payors, our operating results could be adversely affected.

Revenue from other pharmaceuticals and EPO

The impact of physician-prescribed pharmaceuticals on our overall revenues that are separately billable has significantly decreased since Medicare's single bundled payment system went into effect beginning in January 2011, as well as some additional commercial contracts that pay us a single bundled payment rate. Approximately 2% of our total dialysis and related lab services revenues for the year ended December 31, 2015, as compared to 3% in 2014, are associated with the administration of separately-billable physician-prescribed pharmaceuticals. Of this, the administration of EPO that was separately billable, accounted for approximately half of our separately billable pharmaceuticals of our dialysis and related lab services revenues for the year ended December 31, 2015. EPO is produced by a single manufacturer, Amgen USA Inc. (Amgen). Any interruption of supply or product cost increases could impact our operations.

Evaluations on the utilization and reimbursement for erythropoiesis stimulating agents (ESAs), like EPO, which have occurred in the past and may occur in the future, and related actions by the U.S. Congress and federal agencies, could result in further restrictions on the utilization and reimbursement for ESAs. Additionally, commercial payors have also increasingly examined their administration policies for EPO and, in some cases, have modified those policies. Changes in labeling of EPO and other pharmaceuticals in a manner that alters physician practice patterns or accepted clinical practices, changes in private and governmental payment criteria, including the introduction of EPO administration policies or the conversion to alternate types of administration of EPO or other pharmaceuticals that result in further decreases in utilization of EPO for patients covered by commercial payors, which pay for pharmaceuticals separately, could have a material impact on our operating results. Further increased utilization of EPO for patients for whom the cost of EPO is included in a bundled reimbursement rate could also have a material impact on our operating results.

Physician relationships

An ESRD patient generally seeks treatment at an outpatient dialysis center near his or her home where his or her treating nephrologist has practice privileges. Our relationships with local nephrologists and our ability to meet their needs and the needs of their patients are key factors in the success of our dialysis operations. Approximately 4,900 nephrologists currently refer patients to our outpatient dialysis centers. As is typical in the dialysis industry, one or a few physicians, including the outpatient dialysis center's medical director, usually account for all or a significant portion of an outpatient dialysis center's patient base.

Participation in the Medicare ESRD program requires that dialysis services at an outpatient dialysis center be under the general supervision of a medical director who is a licensed physician. We have engaged physicians or groups of physicians to serve as medical directors for each of our outpatient dialysis centers. At some outpatient dialysis centers, we also separately contract with one or more other physicians to serve as assistant or associate medical directors or to direct specific programs, such as home dialysis training programs. We have approximately 950 individual physicians and physician groups under contract to provide medical director services.

Medical directors for our dialysis centers enter into written contracts with us that specify their duties and fix their compensation generally for periods of ten years. The compensation of our medical directors is the result of arm's length negotiations and generally depends upon an analysis of various factors such as the physician's duties, responsibilities, professional qualifications and experience, among others.

Our medical director contracts for our dialysis centers generally include covenants not to compete. Also, except as described below, when we acquire an outpatient dialysis center from one or more physicians or where one or more physicians own minority interests in our outpatient dialysis centers, these physicians have agreed to refrain from owning interests in other competing outpatient dialysis centers within a defined geographic area for various time periods. These non-compete agreements restrict the physicians from owning or providing medical director services to other outpatient dialysis centers, but do not prohibit the physicians from referring patients to any outpatient dialysis center, including competing centers. Many of these non-compete agreements continue for a period of time beyond expiration of the corresponding medical director agreements, although some expire at the same time as the medical director agreement. Occasionally, we experience competition from a new outpatient dialysis center established by a former medical director following the termination of his or her relationship with us. As part of our Corporate Integrity Agreement (CIA), as described below, we also have agreed not to enforce investment non-compete restrictions relating to dialysis clinics or programs that were established pursuant to a partial divestiture joint venture transaction. Therefore, to the extent a joint venture partner or medical director has a contract(s) with us covering dialysis clinics or programs that were established pursuant to a partial divestiture, we will not enforce the investment non-compete provision relating to those clinics and/or programs.

If a significant number of physicians, including an outpatient dialysis center's medical directors, were to cease referring patients to our outpatient dialysis centers, our business could be adversely affected.

Government regulation

Our dialysis operations are subject to extensive federal, state and local governmental regulations. These regulations require us to meet various standards relating to, among other things, government payment programs, dialysis facilities and equipment, management of centers, personnel qualifications, maintenance of proper records, and quality assurance programs and patient care.

Because we are subject to a number of governmental regulations, our business could be adversely impacted by:

- Loss or suspension of federal certifications;
- Loss or suspension of licenses under the laws of any state or governmental authority from which we generate substantial revenues;
- Exclusion from government healthcare programs, including Medicare and Medicaid;
- Significant reductions or lack of inflation-adjusted increases in payment rates or reduction of coverage for dialysis and ancillary services and related pharmaceuticals;
- Civil or criminal liability, fines, damages and monetary penalties for violations of healthcare fraud and abuse laws, including the federal Anti-Kickback Statute, the Physician Self-Referral law (Stark Law), the federal False Claims Act (FCA) and other violations of law or failures to meet regulatory requirements;
- Civil or criminal liability, claims for monetary damages from patients who believe their protected health information (PHI) or other confidential health information has been used or disclosed in violation of federal and state patient privacy laws;
- Mandated changes to our practices or procedures that significantly increase operating expenses; or
- Refunds of payments received from government payors and government healthcare program beneficiaries because of any failures to meet applicable requirements.

We expect that our industry will continue to be subject to substantial regulation, the scope and effect of which are difficult to predict. Our activities could be reviewed or challenged by regulatory authorities at any time in the future. This regulation and scrutiny could have a material adverse impact on us.

Licensure and certification

Our dialysis centers are certified by CMS, as is required for the receipt of Medicare payments. In some states, our outpatient dialysis centers also are required to secure additional state licenses and permits. Governmental authorities, primarily state departments of health, periodically inspect our centers to determine if we satisfy applicable federal and state standards and requirements, including the conditions of participation in the Medicare ESRD program.

To date, we have not experienced significant difficulty in maintaining our licenses or enrolling in state Medicaid programs. However, we have experienced some delays in obtaining Medicare certifications from CMS.

Federal Anti-Kickback Statute

The federal Anti-Kickback statute contained in the Social Security Act of 1935, as amended (Anti-Kickback Statute), prohibits, among other things, knowingly and willfully offering, paying, soliciting or receiving remuneration, directly or indirectly, in cash or kind, to induce or reward either the referral of an individual for, or the purchase, or order or recommendation of, any good or service, for which payment may be made under federal and state healthcare programs such as Medicare and Medicaid.

Federal criminal penalties for the violation of the federal Anti-Kickback Statute include imprisonment, fines and exclusion of the provider from future participation in the federal healthcare programs, including Medicare and Medicaid. Violations of the federal Anti-Kickback Statute are punishable by imprisonment for up to five years and fines of up to $25,000 or both. Larger fines can be imposed upon corporations under the provisions of the U.S. Sentencing Guidelines and the Alternate Fines Statute. Individuals and entities convicted of violating the federal Anti-Kickback Statute are subject to mandatory exclusion from participation in Medicare, Medicaid and other federal healthcare programs for a minimum of five years. Civil penalties for violation of this law include up to $50,000 in monetary penalties per violation, repayments of up to three times the total payments between the parties and suspension

from future participation in Medicare and Medicaid. Court decisions have held that the statute may be violated even if only one purpose of remuneration is to induce referrals. The Patient Protection and Affordable Care Act of 2010, as amended by the Health Care and Education Reconciliation Act of 2010 (Health Reform Acts) amended the federal Anti-Kickback Statute to clarify the intent that is required to prove a violation. Under the statute as amended, the defendant need not have known of the existence of the federal Anti-Kickback Statute or had the specific intent to violate it. In addition, the Health Reform Acts amended the federal Anti-Kickback Statute to provide that any claims submitted from an arrangement that violates the federal Anti-Kickback Statute are false for purposes of the FCA.

The Anti-Kickback Statute includes statutory exceptions and regulatory safe harbors that protect certain arrangements. Business transactions and arrangements that are structured to comply fully with an applicable safe harbor do not violate the federal Anti-Kickback Statute. However, transactions and arrangements that do not satisfy all elements of a relevant safe harbor do not necessarily violate the law. When an arrangement does not satisfy a safe harbor, the arrangement must be evaluated on a case-by-case basis in light of the parties' intent and the arrangement's potential for abuse. Arrangements that do not satisfy a safe harbor may be subject to greater scrutiny by enforcement agencies.

We enter into several arrangements with physicians that potentially implicate the Anti-Kickback Statute. These arrangements include:

Medical Director Agreements. Because our medical directors refer patients to our dialysis centers, our arrangements with these physicians are designed to substantially comply with the safe harbor for personal service arrangements. Although the Medical Director Agreements we enter into with physicians substantially comply with the safe harbor for personal service arrangements, including the requirement that compensation be consistent with fair market value, the safe harbor requires that when services are provided on a part-time basis, the agreement must specify the schedule of intervals of services, and their precise length and the exact charge for such services. Because of the nature of our medical directors' duties, it is impossible to fully satisfy this technical element of the safe harbor. We believe that our fair market value arrangements with physicians who serve as medical directors do not violate the federal Anti-Kickback Statute; however, these arrangements could be subject to scrutiny since they do not expressly describe the schedule of part-time services to be provided under the arrangement.

Joint Ventures. We own a controlling interest in numerous U.S. dialysis related joint ventures. For the year ended December 31, 2015, these joint ventures represented approximately 23% of our dialysis and related lab services revenues. We may continue to increase the number of our joint ventures. Our relationships with physicians and other referral sources relating to these joint ventures do not fully satisfy the safe harbor for investments in small entities. Although failure to comply with a safe harbor does not render an arrangement illegal under the federal Anti-Kickback Statute, an arrangement that does not operate within a safe harbor may be subject to scrutiny and the Department of Health and Human Services' Office of Inspector General (OIG) has warned in the past that certain joint venture relationships have a potential for abuse. Based upon the foregoing, physician joint ventures that fall outside the safe harbors are not, by definition, prohibited by law. Instead, such joint ventures require case-by-case evaluation under the federal Anti-Kickback Statute.

In this regard, we have structured our joint ventures to satisfy as many elements of the safe harbor for investments in small entities as we believe are commercially reasonable. For example, we believe that these investments are offered and made by us on a fair market value basis and provide returns to the investors in proportion to their actual investment in the venture. We believe that our joint venture arrangements do not violate the federal Anti-Kickback Statute; however, since the arrangements do not satisfy all of the requirements of an applicable safe harbor, these arrangements could be subject to challenge on the ground that they are intended to induce patient referrals. In that regard, we were subject to investigation by the United States Attorney's Office for the District of Colorado, the Civil Division of the United States Department of Justice (DOJ) and the OIG related to our relationships with physicians, including our joint ventures, and whether those relationships and joint ventures comply with the federal Anti-Kickback Statute and the FCA. In October 2014, we entered into a Settlement Agreement with the United States and relator David Barbetta to resolve the then pending 2010 and 2011 U.S. Attorney physician relationship investigations. In connection with the resolution of this matter, and in exchange for the OIG's agreement not to exclude us from participating in the federal healthcare programs, we have entered into a five-year CIA with the OIG.

Lease Arrangements. We lease space for numerous dialysis centers from entities in which physicians, hospitals or medical groups hold ownership interests, and we sublease space to referring physicians at approximately 270 of our dialysis centers as of December 31, 2015. These arrangements comply with the federal Anti-Kickback Statute safe harbor for space rentals in all material respects. Therefore, we believe that these lease arrangements should not be subject to challenge under the federal Anti-Kickback Statute.

Common Stock. Some medical directors and other referring physicians may own our common stock. We believe that these interests materially satisfy the requirements of the Anti-Kickback Statute safe harbor for investments in large publicly traded companies. Therefore, we believe that these investments should not be subject to challenge under the federal Anti-Kickback Statute.

Discounts. Our dialysis centers sometimes acquire certain items and services that may be reimbursed by a federal healthcare program at a discount. We believe that our vendor contracts that include discount or rebate provisions are in compliance with the federal Anti-Kickback Statute safe harbor for discounts, and accordingly, we believe that our discounted vendor contracts should not be subject to challenge under the federal Anti-Kickback Statute.

If any of our business transactions or arrangements, including those described above, were found to violate the federal Anti-Kickback Statute, we could face criminal, civil or administrative sanctions, including possible exclusion from participation in Medicare, Medicaid and other state and federal healthcare programs. Any findings that we have violated these laws could have a material adverse impact on our operations.

Stark Law

The federal Physician Self-Referral law, known as the Stark Law, prohibits a physician who has a financial relationship, or who has an immediate family member who has a financial relationship, with entities providing Designated Health Services (DHS), from referring Medicare patients to such entities for the furnishing DHS, unless an exception applies. DHS includes enumerated items and services, including home health services, outpatient prescription drugs, inpatient and outpatient hospital services and clinical laboratory services. The Stark Law also prohibits the DHS entity receiving a prohibited referral from filing a claim or billing for the services arising out of the prohibited referral. The prohibition applies regardless of the reasons for the financial relationship and the referral; unlike the federal Anti-Kickback Statute, intent to induce referrals is not required. Sanctions for violation of the Stark Law include denial of payment for claims for services provided in violation of the prohibition, refunds of amounts collected in violation of the prohibition, a civil penalty of up to $15,000 for each service arising out of the prohibited referral, exclusion from the federal healthcare programs, including Medicare and Medicaid, and a civil penalty of up to $100,000 against parties that enter into a scheme to circumvent the Stark Law prohibition. Furthermore, Stark Law violations can form the basis for FCA liability as discussed below. The types of financial arrangements between a physician and a DHS entity that trigger the self-referral prohibitions of the Stark Law are broad and include direct and indirect ownership and investment interests and compensation arrangements.

The definition of DHS under the Stark Law excludes services paid under a composite rate, even if some of the components bundled in the composite rate are DHS, unless the DHS services are themselves payable through a composite rate. Although the new ESRD bundled payment system is no longer titled a composite rate, we believe that the former composite rate payment system and the current bundled system are both composite systems excluded from the Stark Law. Since most services furnished to Medicare beneficiaries provided in our dialysis centers are reimbursed through a composite or bundled rate, the services performed in our facilities generally are not DHS, and the Stark Law referral prohibition does not apply to those services. Likewise, the definition of inpatient hospital services, for purposes of the Stark Law, also excludes inpatient dialysis performed in hospitals that are not certified to provide ESRD services. Consequently, our arrangements with such hospitals for the provision of dialysis services to hospital inpatients do not trigger the Stark Law referral prohibition.

In addition, although prescription drugs are DHS, there is an exception in the Stark Law for EPO and other specifically enumerated dialysis drugs when furnished in or by an ESRD facility, in compliance with the federal Anti-Kickback Statute and applicable billing requirements. The exception is available only for drugs included on a list of CPT/HCPCS codes published by CMS, and in the case of home dialysis, the exception applies only to EPO, Aranesp® and equivalent drugs dispensed by the facility for use at home. While we believe that most drugs furnished by our dialysis centers are covered by the exception, dialysis centers may administer drugs that are not on the list of CPT/HCPCS codes and therefore do not meet this exception. In order for a physician who has a financial relationship with a dialysis center to order one of these drugs from the center and for the center to obtain Medicare reimbursement, another exception must apply.

We have entered into several types of financial relationships with referring physicians, including compensation arrangements. If an arrangement does not meet a Stark Law exception, we could in the future be required to change our practices, face civil penalties, pay substantial fines, return certain payments received from Medicare and beneficiaries or otherwise experience a material adverse effect as a result of a challenge to payments made pursuant to referrals from these physicians under the Stark Law.

Medical Director Agreements. We believe that our medical director agreements satisfy the personal services arrangement exception to the Stark Law. While we believe that the compensation provisions included in our medical director agreements are the result of arm's length negotiations and result in fair market value payments for medical director services, an enforcement agency could nevertheless challenge the level of compensation that we pay our medical directors.

Lease Agreements. Some of our dialysis centers are leased from entities in which referring physicians hold interests and we sublease space to referring physicians at some of our dialysis centers. The Stark Law provides an exception for lease arrangements if specific requirements are met. We believe that our leases and subleases with referring physicians satisfy the requirements for this exception.

Common Stock. Some medical directors and other referring physicians may own our common stock. We believe that these interests satisfy the Stark Law exception for investments in large publicly traded companies.

Joint Ventures. Some of our referring physicians also own equity interests in entities that operate our dialysis centers. None of the Stark Law exceptions applicable to physician ownership interests in entities to which they make DHS referrals apply to the kinds of ownership arrangements that referring physicians hold in several of our subsidiaries that operate dialysis centers. Accordingly, these dialysis centers do not bill Medicare for DHS referrals from physician owners. If the dialysis centers bill for DHS referred by physician owners, the dialysis center would be subject to the Stark Law penalties described above.

While we believe that most of our operations do not implicate the Stark Law, particularly under the ESRD bundled payment system, and that to the extent that our dialysis centers furnish DHS, they either meet an exception or do not bill for services that do not meet a Stark Law exception, if CMS determined that we have submitted claims in violation to the Stark Law, we would be subject to the penalties described above. In addition, it might be necessary to restructure existing compensation agreements with our medical directors and to repurchase or to request the sale of ownership interests in subsidiaries and partnerships held by referring physicians or, alternatively, to refuse to accept referrals for DHS from these physicians. Any such penalties and restructuring could have a material adverse effect on our operations.

Fraud and abuse under state law

Many states in which we operate dialysis centers have statutes prohibiting physicians from holding financial interests in various types of medical facilities to which they refer patients. Some of these statutes could potentially be interpreted broadly as prohibiting physicians who hold shares of our publicly traded stock from referring patients to our dialysis centers if the centers use our laboratory subsidiary to perform laboratory services for their patients. Some states also have laws similar to the federal Anti-Kickback Statute that may affect our ability to receive referrals from physicians with whom we have financial relationships, such as our medical directors. Some state Anti-Kickback Statutes also include civil and criminal penalties. Some of these statutes include exemptions applicable to our medical directors and other physician relationships or for financial interests limited to shares of publicly traded stock. Some, however, include no explicit exemption for medical director services or other services for which we contract with and compensate referring physicians or for joint ownership interests of the type held by some of our referring physicians or for financial interests limited to shares of publicly traded stock. If these statutes are interpreted to apply to referring physicians with whom we contract for medical director and similar services, to referring physicians with whom we hold joint ownership interests or to physicians who hold interests in DaVita HealthCare Partners Inc. limited solely to our publicly traded stock, we may be required to terminate or restructure some or all of our relationships with or refuse referrals from these referring physicians and could be subject to criminal, civil and administrative sanctions, refund requirements and exclusions from government healthcare programs, including Medicare and Medicaid. Such events could negatively affect the decision of referring physicians to refer patients to our centers.

The False Claims Act

The FCA is a means of policing false bills or false requests for payment in the healthcare delivery system. In part, the FCA authorizes the imposition of up to three times the government's damages and civil penalties on any person who:

- Knowingly presents or causes to be presented to the federal government, a false or fraudulent claim for payment or approval;
- Knowingly makes, uses or causes to be made or used, a false record or statement to get a false or fraudulent claim paid or approved by the federal government;
- Conspires to defraud the federal government by getting a false or fraudulent claim allowed or paid; or
- Knowingly makes, uses or causes to be made or used, a false record or statement to conceal, avoid or decrease an obligation to pay or transmit money or property to the federal government.

In addition, amendments to the FCA impose severe penalties for the knowing and improper retention of overpayments collected from government payors. Under these provisions, within 60 days of identifying an overpayment, a provider is required to notify CMS or the Medicare Administrative Contractor of the overpayment and the reason for it and return the overpayment. As a result of these provisions, our procedures for identifying and processing overpayments may be subject to greater scrutiny. We have made significant investments to accelerate the time it takes us to identify and process overpayments and we may be required to make additional investments in the future. Acceleration in our ability to identify and process overpayments could result in us refunding overpayments to government or other payors sooner than we have in the past. A significant acceleration of these refunds could have a material adverse effect on our operating cash flows.

The penalties for a violation of the FCA range from $5,500 to $11,000 (adjusted for inflation) for each false claim, plus up to three times the amount of damages caused by each false claim, which is generally equal to the amounts received directly or indirectly

from the government for each such false claim. The federal government has used the FCA to prosecute a wide variety of alleged false claims and fraud allegedly perpetrated against Medicare and state healthcare programs, including coding errors, billing for services not rendered, the submission of false cost reports, billing for services at a higher payment rate than appropriate, billing under a comprehensive code as well as under one or more component codes included in the comprehensive code and billing for care that is not considered medically necessary. The Health Reform Acts provide that claims tainted by a violation of the federal Anti-Kickback Statute are false for purposes of the FCA. Some courts have held that filing claims or failing to refund amounts collected in violation of the Stark Law can form the basis for liability under the FCA. In addition to the provisions of the FCA, which provide for civil enforcement, the federal government can use several criminal statutes to prosecute persons who are alleged to have submitted false or fraudulent claims for payment to the federal government.

Privacy and Security

The Health Insurance Portability and Accountability Act of 1996 and its implementing privacy and security regulations, as amended by the federal Health Information Technology for Economic and Clinical Health Act (HITECH Act), (collectively referred to as HIPAA), require us to provide certain protections to patients and their health information. The HIPAA privacy and security regulations extensively regulate the use and disclosure of PHI and require covered entities, which include healthcare providers, to implement and maintain administrative, physical and technical safeguards to protect the security of such information. Additional security requirements apply to electronic PHI. These regulations also provide patients with substantive rights with respect to their health information.

The HIPAA privacy and security regulations also require our centers to impose compliance obligations by written agreement on certain contractors, known as business associates, to whom they disclose PHI. Covered entities may be subject to penalties as a result of a business associate violating HIPAA if the business associate is found to be an agent of the covered entity. Business associates are also directly subject to liability under the HIPAA privacy and security regulations. In instances where our centers act as a business associate to a covered entity, there is the potential for additional liability beyond the center's covered entity status.

Covered entities must report breaches of unsecured PHI to affected individuals without unreasonable delay but not to exceed 60 days of discovery of the breach by a covered entity or its agents. Notification must also be made to the U.S. Department of Health and Human Services (HHS), and, in certain situations involving large breaches, to the media. HHS is required to publish on its website a list of all covered entities that report a breach involving more than 500 individuals. All non-permitted uses or disclosures of unsecured PHI are presumed to be breaches unless the covered entity or business associate establishes that there is a low probability the information has been compromised. Various state laws and regulations may also require us to notify affected individuals in the event of a data breach involving individually identifiable information without regard to whether there is a low probability of the information being compromised.

Penalties for impermissible use or disclosure of PHI were increased by the HITECH Act by imposing tiered penalties of up to $50,000 per violation and up to $1.5 million per year for the same type of violation. In addition, HIPAA provides for criminal penalties of up to $250,000 and ten years in prison, with the severest penalties for obtaining and disclosing PHI with the intent to sell, transfer or use such information for commercial advantage, personal gain or malicious harm. Further, state attorneys general may bring civil actions seeking either injunction or damages in response to violations of the HIPAA privacy and security regulations that threaten the privacy of state residents. We believe our HIPAA Privacy and Security Program sufficiently addresses HIPAA requirements.

Healthcare reform

In March 2010, broad healthcare reform legislation was enacted in the U.S. Although many of the provisions of the legislation did not take effect immediately and continue to be implemented, and some have been and may be modified before or during their implementation, the reforms could have an impact on our business in a number of ways. We cannot predict how employers, private payors or persons buying insurance might react to these changes or what form many of these regulations will take before implementation.

The law requires that all non-grandfathered individual and small group health plans sold in a state, including plans sold through the state-based exchanges created pursuant to the healthcare reform laws, cover essential health benefits (EHBs) in ten general categories. The scope of the benefits is intended to equal the scope of benefits under a typical employer plan.

In December 2011, the CMS Center for Consumer Information and Insurance Oversight published an Essential Health Benefits Bulletin (EHB Bulletin) describing the approach it was taking regarding the implementation of the EHB Bulletin requirement. For the two year transition period (from 2014 through 2015) the law required states to define an EHB benchmark plan that would set the general standards for the EHB that must be covered by plans in the state, subject to certain overarching federal requirements. States that did not define an EHB benchmark plan must use the small group plan with the largest enrollment in the state.

On February 25, 2013, for example, HHS issued the final rule governing the standards applicable to EHB benchmark plans, new definitions, actuarial value requirements and methodology, and published a list of plan benchmark options that states can use to develop EHBs. The rule describes specific coverage requirements that (i) prohibit discrimination against individuals because of pre-existing or chronic conditions on health plans applicable to EHBs, (ii) ensure network adequacy of essential health providers, and (iii) prohibit benefit designs that limit enrollment and that prohibit access to care for enrollees. Subsequent regulations relevant to the EHB have continued the benchmark plan approach for 2016 and future years and have implemented clarifications and modifications to the existing EHB regulations, including the prohibition on discrimination, network adequacy standards and other requirements. In recent years, CMS has issued an annual Notice of Benefit and Payment Parameters rulemaking and related guidance setting for standards for insurance plans provided through the exchanges.

Other aspects of the 2010 healthcare reform laws may affect our business, as well, including changes affecting the Medicare and Medicaid programs.

Other regulations

Our dialysis and related lab services operations are subject to various state hazardous waste and non-hazardous medical waste disposal laws. These laws do not classify as hazardous most of the waste produced from dialysis services. Occupational Safety and Health Administration regulations require employers to provide workers who are occupationally subject to blood or other potentially infectious materials with prescribed protections. These regulatory requirements apply to all healthcare facilities, including dialysis centers, and require employers to make a determination as to which employees may be exposed to blood or other potentially infectious materials and to have in effect a written exposure control plan. In addition, employers are required to provide or employ hepatitis B vaccinations, personal protective equipment and other safety devices, infection control training, post-exposure evaluation and follow-up, waste disposal techniques and procedures and work practice controls. Employers are also required to comply with various record-keeping requirements. We believe that we are in material compliance with these laws and regulations.

A few states have certificate of need programs regulating the establishment or expansion of healthcare facilities, including dialysis centers. We believe that we are in material compliance with all applicable state certificate of need laws.

Capacity and location of our U.S. dialysis centers

Typically we are able to increase our capacity by extending hours at our existing dialysis centers, expanding our existing dialysis centers, relocating our dialysis centers, developing new dialysis centers and by acquiring dialysis centers. The development of a typical outpatient dialysis center by us generally requires approximately $2.8 million for leasehold improvements, equipment and first-year working capital. Based on our experience, a new outpatient dialysis center typically opens within a year after the property lease is signed, normally achieves operating profitability in the second year after Medicare certification and normally reaches maturity within three to five years. Acquiring an existing outpatient dialysis center requires a substantially greater initial investment, but profitability and cash flows are generally accelerated and more predictable. To a limited extent, we enter into agreements to provide management and administrative services to outpatient dialysis centers in which we either own a minority equity investment, or are wholly-owned by third parties in return for management fees, which are typically based on a percentage of revenues or cash collections of the managed center's operations.

The table below shows the growth of our U.S. dialysis operations by number of dialysis centers.

	2015	2014	2013	2012	2011	
Number of centers at beginning of year	2,179	2,074	1,954	1,809	1,612	
Acquired centers	6	18	26	93	170	(1)
Developed centers	72	105	98	70	65	
Net change in centers with management and administrative services agreements*	2	—	4	(8)	1	
Sold and closed centers**	(3)	(2)	(5)	(1)	(32)	(1)
Closed centers***	(5)	(16)	(3)	(9)	(7)	
Number of centers at end of year	2,251	2,179	2,074	1,954	1,809	

(1) In 2011, we acquired 113 dialysis centers and divested a total of 30 centers in connection with our acquisition of DSI Renal Inc. (DSI).

* Represents dialysis centers in which we either own a minority equity investment, or are wholly-owned by third parties.

** Represents dialysis centers that were sold and/or closed for which patients were not retained.

*** Represents dialysis centers that were closed for which the majority of patients were retained and transferred to one of our other existing outpatient dialysis centers.

As of December 31, 2015, we operated or provided administrative services to a total of 2,251 U.S. outpatient dialysis centers. A total of 2,220 of such centers are consolidated in our financial statements. Of the remaining 31 unconsolidated U.S. outpatient dialysis centers, we own a minority equity investment in 22 centers and provide management and administrative services to nine centers that are wholly-owned by third parties. The locations of the 2,220 U.S. outpatient dialysis centers consolidated in our financial statements at December 31, 2015 were as follows:

State	Centers	State	Centers	State	Centers
California	259	Minnesota	50	Nebraska	15
Texas	199	New Jersey	50	Massachusetts	12
Florida	169	Wisconsin	40	Mississippi	11
Georgia	123	Colorado	37	District of Columbia	10
Ohio	115	Oklahoma	36	Idaho	9
Pennsylvania	102	Louisiana	35	West Virginia	8
Illinois	85	South Carolina	35	New Mexico	5
Michigan	77	Kentucky	34	New Hampshire	4
North Carolina	69	Washington	34	Utah	4
Virginia	65	Arkansas	33	Maine	3
Maryland	60	Arizona	26	South Dakota	3
Indiana	59	Iowa	26	North Dakota	2
Missouri	56	Kansas	26	Montana	1
Alabama	55	Connecticut	25	Rhode Island	1
New York	55	Oregon	24		
Tennessee	54	Nevada	19		

Ancillary services and strategic initiatives businesses, including our international operations

As of December 31, 2015, our ancillary services and strategic initiatives consisted primarily of pharmacy services, disease management services, vascular access services, clinical research, physician services, direct primary care and our international dialysis operations. Our ancillary services and strategic initiatives, including our international operations, accounted for approximately 10.0% of our consolidated net revenues for the year ended December 31, 2015, and relate primarily to our core business of providing kidney care services.

Ancillary services and strategic initiatives consist primarily of the following as of December 31, 2015:

- *Pharmacy services*. DaVita Rx is a pharmacy that specializes in providing oral medications and medication management services to patients with ESRD and other chronic diseases. The main objective of the pharmacy is to improve clinical outcomes and reduce total healthcare costs by facilitating increased patient compliance and to provide our patients a convenient way to fill their prescription needs. Revenues are recognized as prescriptions are filled and shipped to patients or when services are completed.

- *Disease management services.* VillageHealth provides advanced care management services to health plans and government agencies for employees/members diagnosed with ESRD and/or CKD. Through a combination of clinical coordination, medical claims analysis and information technology, we endeavor to assist our customers and patients in obtaining superior renal healthcare and improved clinical outcomes, as well as helping to reduce overall medical costs. Revenues are typically based upon an established contract fee and are recognized as earned over the contract period and can include additional fees for cost savings recognized by certain customers. In 2015, VillageHealth operated Medicare Advantage ESRD Special Needs Plans in partnership with two payors that work with CMS to provide ESRD patients full service healthcare. We are at risk for all medical costs of the program in excess of the capitation payments. Furthermore, in October 2015, VillageHealth entered into a management service agreement to support three ESCO joint ventures in which the Company is an investor through certain wholly- or majority-owned dialysis clinics. The ESCOs were formed under the Innovation Center's CEC Model to demonstrate the coordination of care for ESRD patients in a dialysis-center oriented ACO setting. Each ESCO joint venture has a shared risk arrangement with CMS for this program.

- *Vascular access services*. Lifeline provides management and administrative services to physician-owned vascular access clinics that provide vascular services for dialysis and other patients. Lifeline is also the majority-owner of nine vascular access clinics and wholly-owns one vascular access clinic. Management fees generated from providing management and administrative services are recognized as earned typically based on a percentage of revenues or cash collections generated by the clinics. Revenues associated with the vascular access clinics that are majority-owned are recognized in the period when the services are provided.

- *Clinical research programs.* DaVita Clinical Research (DCR) is a provider-based specialty clinical research organization with a full spectrum of services for clinical drug research and device development. DCR uses its extensive, applied database and real-world healthcare experience to assist in the design, recruitment and completion of retrospective, prospective pragmatic and clinical trials. Revenues are based upon an established fee per study, as determined by contract with drug companies and other sponsors and are recognized as earned according to the contract terms.

- *Physician services.* Nephrology Practice Solutions (NPS) is an independent business that partners with physicians committed to providing outstanding clinical and integrated care to patients. NPS provides nephrologist employment opportunities in select markets and offers physician practice management services to nephrologists under administrative services agreements. These services include physician practice management, billing and collections, credentialing, coding, and other support services that enable physician practices to increase efficiency and manage their administrative needs. Fees generated from these services are recognized as earned typically based upon flat fees or cash collections generated by the physician practice. NPS also provides leading nephrology recruitment and staffing services which are billed on a per search basis.

- *Direct primary care.* Paladina Health is a healthcare services organization that operates membership-based primary care clinics mainly through employer-based on-site and near-site clinics. The clinics offer patients more personalized and improved access to primary care physicians, including unlimited visits and same-day or next-day appointments. Physicians focus on clinical outcomes and patient satisfaction. Revenues are recognized over the membership period.

International dialysis operations

As of December 31, 2015, we operated or provided administrative services to a total of 118 outpatient dialysis centers located in ten countries outside of the U.S., serving approximately 10,000 patients. Our international dialysis operations continue to grow steadily and expand as a result of developing and acquiring outpatient dialysis centers in various strategic markets. However, our overall net revenues generated from our international operations represented approximately 1% of our consolidated net revenues during 2015. Our international operations are included as a component of our ancillary services and strategic initiatives. The table below summarizes the number and locations of our international outpatient dialysis centers.

	2015	2014	2013	2012
Number of centers at beginning of year	91	73	36	11
Acquired centers	21	9	38	13
Developed and hospital operated centers	7	11	2	9
Managed centers, net	(1)	—	—	3
Closed centers	—	(2)	(3)	—
Number of centers at end of year	118	91	73	36

The locations of our international outpatient dialysis centers are as follows:

Malaysia	38
Germany	20
Colombia	15
India	13
Saudi Arabia	10
Poland	8
Portugal	5
Taiwan	5
China	3
Singapore	1
	118

Corporate Administrative Support

Corporate administrative support consists primarily of labor, benefits and long-term incentive compensation costs for departments which provide support to all of our different operating lines of business. Corporate administrative support costs were approximately $19 million, $13 million and $53 million in 2015, 2014 and 2013, respectively. These expenses are included in our consolidated general and administrative expenses and are offset by the allocation of management fees. The increase in corporate administrative support costs in 2015 as compared to 2014 was due to an increase in professional fees.

HealthCare Partners Division

HealthCare Partners business overview

HCP is a patient- and physician-focused integrated healthcare delivery and management company with over two decades of experience providing coordinated, outcomes-based medical care in a cost-effective manner. As of December 31, 2015, HCP had approximately 807,400 members under its care in southern California, Colorado, central and south Florida, southern Nevada, central New Mexico and central Arizona through capitation contracts with some of the nation's leading health plans. Of these members, approximately 317,400 individuals were patients enrolled in Medicare Advantage, and the remaining approximately 490,000 individuals were managed care members whose health coverage is provided through their employer or who have individually acquired health coverage directly from a health plan or as a result of their eligibility for Medicaid benefits.

HCP patients as well as the patients of HCP's associated physicians, physician groups and IPAs benefit from an integrated approach to medical care that places the physician at the center of patient care. As of December 31, 2015, HCP delivered services to its members via a network of 547 associated group full-time primary care physicians, over 2,900 associated group and other network primary care physicians, 240 network hospitals, and several thousand associated group and network specialists. Together with hundreds of case managers, registered nurses and other care coordinators, these medical professionals utilize a comprehensive information technology system, sophisticated risk management techniques and clinical protocols to provide high-quality, cost-effective care to HCP's members.

U.S. healthcare spending has increased steadily over the past twenty years. These increases have been driven, in part, by the aging of the baby boomer generation, lack of healthy lifestyle both in terms of exercise and diet, rapidly increasing costs in medical technology and pharmaceutical research, and provider reimbursement structures that may promote volume over quality in a FFS environment. These factors, as well as the steady growth of the U.S. population, have made the healthcare industry a growing market. In 2014, CMS reported that healthcare accounted for 17.5% of the U.S. economy and healthcare spending increased 5.3% to reach $3.0 trillion. Medicare spending grew 5.5% to $620 billion in 2014 or 20% of National Health Expenditures, according to CMS. Medicare outlays accounted for 14% of the Federal Budget in 2014 according to the Congressional Budget Office (CBO). Medicare is frequently the focus of discussions on how to moderate the growth of both federal spending and healthcare spending in the U.S.

Growth in Medicare spending is expected to continue due to population demographics. According to the U.S. Census Bureau, the overall U.S. population grew 57% from 1970 through 2015, while the number of Medicare enrollees grew by 157% from 1970 to 2013 based on the latest publicly available CMS data. As an increasing number of the baby boomers become eligible for Medicare, the senior market is expected to be 20% of the total U.S. population by 2030 according to the U.S. Census Bureau.

Medicare Advantage is an alternative to the traditional FFS Medicare program, which permits Medicare beneficiaries to receive benefits from a managed care health plan. Medicare Advantage plans contract with CMS to provide benefits that are at least comparable to those offered under the traditional FFS Medicare program in exchange for a fixed monthly premium payment per member from CMS. The monthly premium varies based on the county in which the member resides, as adjusted to reflect the plan members' demographics and the members' risk scores. Individuals who elect to participate in the Medicare Advantage program typically receive greater benefits than traditional FFS Medicare Part B beneficiaries, including additional preventive services, vision, dental and prescription drug benefits, and often have lower deductibles and co-payments than traditional FFS Medicare.

Managed care health plans were developed, primarily during the 1980s, in an attempt to mitigate the rising cost of providing healthcare benefits to populations covered by traditional health insurance. These managed care health plans enroll members through their employers. As a result of the prevalence of these health plans, many seniors now becoming eligible for Medicare have been interacting with managed care companies through their employers for the last 30 years. Individuals turning 65 now are likely to be far more familiar with the managed care setting than previous Medicare populations. According to Kaiser Family Foundation, in 2014, Medicare Advantage represents only 31% of total Medicare members, creating a significant opportunity for additional Medicare Advantage penetration of newly eligible seniors.

In an effort to reduce the number of uninsured and to begin to control healthcare expenditures, President Obama signed the Health Reform Acts into law in March 2010, which were affirmed, in substantial part, by the U.S. Supreme Court in June 2012. The Health Reform Acts provide for a reduction of up to 27 million uninsured individuals by 2019, while potentially increasing Medicaid coverage by up to 15 million individuals. CMS projects that the total number of uninsured Americans will fall to 23 million in 2023 from 45 million in 2012. These previously uninsured Americans and potentially newly eligible Medicaid beneficiaries represent a significant new market opportunity for health plans. We believe that health plans looking to cover these newly eligible individuals under fixed premium arrangements will seek provider arrangements that can effectively manage the cost and quality of the care being provided to these newly eligible individuals.

In 2006, Medicare began to pay Medicare Advantage health plans under a bidding process. Plans bid against county-level benchmarks established by Medicare based on the prior year's Medicare Advantage county payment rate and increased by the projected national growth rate in per capita Medicare spending. Those payment rates were at least as high as per capita FFS Medicare

spending in each county and often substantially higher because Congress set floors to raise the lowest rates to stimulate plan growth in areas where plans historically had not found it profitable to enter. If a plan's bid is higher than the benchmark, enrollees pay the difference in the form of a monthly premium. If the bid is lower than the benchmark, the Medicare program retains 25% of the difference as savings and the plan receives 75% of the difference as a rebate, which must be returned to enrollees in the form of additional benefits or reduced premiums. Plan payments are also adjusted based on enrollees' risk profiles. The formula for base payment is a combination of the base rate for the enrollee's county of residence, multiplied by the enrollee's risk score.

One of the primary ways in which the Health Reform Acts will fund increased health insurance coverage is through cuts in Medicare Advantage reimbursement. County benchmarks are transitioning to a system in which each county's benchmark in 2017 will be a certain percentage (ranging from 95% to 115%) of FFS. In a March 2015 report to Congress, the Medicare Payment Advisory Commission (MedPAC) estimated that 2016 Medicare Advantage benchmarks, bids, and payments would average 107%, 94%, and 102% of FFS spending, respectively.

Despite the fact that the plan bids average less than FFS spending, payments for enrollees in these plans usually exceed FFS spending because the benchmarks are high relative to FFS spending. For example, health maintenance organizations (HMOs) as a group bid an average of 90% of FFS spending, yet 2015 payments for HMO enrollees are estimated to average 101% of FFS spending because the benchmarks, including the quality bonuses, average 106% of FFS spending.

As a result of the above, plans would generally have to bid significantly lower than FFS or the Medicare Advantage benchmark for CMS to begin to save money on Medicare Advantage. As a result of the transition of county benchmarks from 95% to 115% of FFS, Medicare Advantage benchmarks on average are expected to be reduced to parity with FFS by 2017. Given that CMS will retain 25% of the difference of any plans bid below benchmark, the overall Medicare Advantage program should realize savings as compared to FFS in 2017, which would result in lower payments to Medicare Advantage plans and to HCP.

Many health plans recognize both the opportunity for growth from senior members as well as the potential risks and costs associated with managing additional senior members. In regions operated by HCP and numerous other markets, many health plans subcontract a significant portion of the responsibility for managing patient care to integrated medical systems such as HCP. These integrated healthcare systems, whether medical groups or IPAs, offer a comprehensive medical delivery system and sophisticated care management know-how and infrastructure to more efficiently provide for the healthcare needs of the population enrolled with that health plan. While reimbursement models for these arrangements vary around the country, health plans in California, Florida, Nevada, New Mexico and Arizona often prospectively pay the integrated healthcare system a fixed Per Member Per Month (PMPM) amount, or capitation payment, which is often based on a percentage of the amount received by the health plan. The capitation payment is for much—and sometimes virtually all—of the care needs of the applicable membership. Capitation payments to integrated healthcare systems, in the aggregate, represent a prospective budget from which the system manages care-related expenses on behalf of the population enrolled with that system. To the extent that these systems manage care-related expenses under the capitated levels, the system realizes an operating profit. On the other hand, if care-related expenses exceed projected levels, the system will realize an operating deficit. Since premiums paid represent a significant amount per person, there is a significant revenue opportunity for an integrated medical system like HCP that is able to effectively manage its costs under a capitated arrangement.

Integrated medical systems, such as HCP, that have scale are positioned to spread an individual member's cost experience across a wider population and realize the benefits of pooling medical risk among large numbers of patients. In addition, integrated medical systems with years of managed care experience can utilize their sizeable medical experience data to identify specific medical care and quality management strategies and interventions for potential high cost cases and aggressively manage them to improve the health of its population base and, thus, lower cost. Many integrated medical systems, like HCP, have also established physician performance metrics that allow them to monitor quality and service outcomes achieved by participating physicians in order to reward efficient, high quality care delivered to members and initiate improvement efforts for physicians whose results can be enhanced.

Healthcare reform

The U.S. healthcare system, including the Medicare Advantage program, is subject to a broad array of new laws and regulations as a result of the Health Reform Acts. This legislation made significant changes to the Medicare program and to the health insurance market overall. The Health Reform Acts are considered by some to be the most dramatic change to the U.S. healthcare system in decades. The U.S. Supreme Court found that the individual mandate to obtain health insurance coverage under this legislation is constitutional and also found that the expanded Medicaid benefit included in the legislation is constitutional if states can opt out of the expanded Medicaid benefit without losing their funding under the pre-reform Medicaid program. In a separate, subsequent case, the U.S. Supreme Court also upheld the use of subsidies to individuals in federally-facilitated healthcare exchanges, rejecting an argument that such subsidies would apply only in the state-run healthcare exchanges.

The Health Reform Acts reflect sweeping legislation that, once fully implemented, may have a significant impact on the U.S. healthcare system generally and the operations of HCP's business. There are numerous steps required to implement the Health Reform Acts, and implementation remains ongoing. Congress also has enacted, and may continue to seek, legislative changes that alter, delay, or eliminate some of their provisions. For example, under the 2016 Omnibus budget agreement, Congress voted to delay certain new

taxes that the Health Reform Acts had enacted, including the excise tax on certain high-cost health plans, the medical device tax, and the tax on health insurers. These and other changes contribute to the uncertainty of the ongoing implementation and impact of the Health Reform Acts; they also underscore the potential for additional reform going forward.

One provision of the Health Reform Acts required CMS to establish a Medicare Shared Savings Program (MSSP) that promotes accountability and coordination of care through the creation of ACOs. The program allows certain providers and suppliers (including hospitals, physicians and other designated professionals) to voluntarily form ACOs and work together along with other ACO participants to invest in infrastructure and redesign delivery processes to achieve high quality and efficient delivery of services. In 2014, HCP entered into an agreement with CMS to participate in the MSSP in California, Florida and Nevada. Under this program, HCP is striving to attain improved clinical outcomes to its Medicare FFS patients in a more cost-effective manner, and will have the opportunity to share with CMS in any financial savings created.

Payor environment

Government programs

HCP derives a significant portion of its revenues from services rendered to beneficiaries of Medicare (including Medicare Advantage), Medicaid, and other governmental healthcare programs.

Medicare. The Medicare program was established in 1965 and became effective in 1967 as a federally funded U.S. health insurance program for persons aged 65 and older, and it was later expanded to include individuals with ESRD and certain disabled persons, regardless of income or age. Since its formation, Medicare has grown to an approximately $620 billion program in 2014, covering approximately 55 million Americans and, based on the growing number of eligible beneficiaries and increases in the cost of healthcare, CBO projects that net Medicare spending will increase from $527 billion in 2015 to $866 billion in 2024.

Initially, Medicare was offered only on a FFS basis. Under the Medicare FFS payment system, an individual can choose any licensed physician enrolled in Medicare and use the services of any hospital, healthcare provider or facility certified by Medicare. CMS reimburses providers for covered services if CMS considers them medically necessary.

FFS Medicare pays for physician services according to a physician fee schedule (PFS) set each year by CMS in accordance with formulas mandated by Congress. Historically, CMS annually adjusted the Medicare Physician Fee Schedule (Medicare PFS) payment rates based on an updated formula that included application of the Sustainable Growth Rate (SGR). On April 1, 2014, President Obama signed into law the Protecting Access to Medicare Act of 2014, which provided for a 0% update to the 2015 Medicare PFS through March 31, 2015. Subsequently, on April 16, 2015, President Obama signed and enacted into law H.R. 2, the Medicare Access and CHIP Reauthorization Act of 2015, which, among other things, repealed the SGR and instituted a 0% update to the single conversion factor under the Medicare PFS from January 1 through June 30, 2015, a 0.5% update for July 2015 through the end of 2019, and a 0% update for 2020 through 2025. For 2026 and subsequent years, the update will be either 0.75% or 0.25%, depending on which Alternate Payment Model (APM) the physician participates. Given that the payment updates for APMs have yet to take effect, we cannot determine the impact of such payment models on our business at this time.

In addition, in recent years, Congress has enacted various laws seeking to reduce the federal debt level and contain healthcare expenditures. For example, the BCA called for the establishment of a Joint Select Committee (the Committee) on Deficit Reduction, tasked with reducing the federal debt level. However, because the Committee did not draft a proposal by the BCA's deadline, President Obama issued an initial sequestration order on March 1, 2013 that imposed automatic spending cuts on various federal programs. Under the Bipartisan Budget Act of 2013 and a bill signed by the President on February 15, 2014, sequestration has been extended through fiscal year 2024. Medicare payments to providers are subject to such cuts, although the BCA generally limited the Medicare cuts to two percent. For fiscal year 2024, however, Medicare sequestration amounts will be realigned such that there will be a 4.0 percent sequester for the first six months and a zero percent sequester for the second six months.

The instability of the federal budget may lead to legislation that could result in further cuts in Medicare and Medicaid payments to providers. In recent years, the government has enacted a patchwork of appropriations legislation to temporarily suspend the debt ceiling and continue government operations. The Medicare program is frequently mentioned as a target for spending cuts. Spending cuts to the Medicare program could adversely affect our operating results.

Medicare Advantage. Medicare Advantage is a Medicare health plan program developed and administered by CMS as an alternative to the original FFS Medicare program. Under the Medicare Advantage program, Medicare beneficiaries may choose to receive benefits under a managed care health plan that provides benefits at least comparable to those offered under the original Medicare FFS payment system in exchange for which the health plan receives a monthly per patient premium payment from CMS. The Medicare Advantage monthly premium varies based on the county in which the member resides, and is adjusted to reflect the demographics and estimated risk profile of the members that enroll. Once a person is authorized by CMS to participate in Medicare Advantage, health plans compete for enrollment based on benefit design differences such as co-payments or deductibles, availability of preventive care, attractiveness of and access to a network of hospitals, physicians and ancillary providers and premium contribution

or, most often in Medicare Advantage plans, the absence of any monthly premium. In certain parts of the country, many health plans that provide Medicare Advantage benefits subcontract with integrated medical systems such as HCP to transfer the responsibility for managing patient care.

In 2004, CMS adopted a risk adjustment payment system for Medicare Advantage health plans in which the participating health plans' premiums are adjusted based on the actual illness burden of the members that enroll. The model bases a portion of the total CMS reimbursement payments on various clinical and demographic factors, including hospital inpatient diagnoses, additional diagnosis data from ambulatory treatment settings, hospital outpatient department and physician visits, gender, age and Medicaid eligibility. CMS requires that all managed care companies capture, collect and submit the necessary diagnosis code information to CMS twice a year for reconciliation with CMS's internal database. Medical providers, such as HCP, provide this diagnosis code information to health plan customers for submission to CMS. Under this system, the risk-adjusted portion of the total CMS payment to the Medicare Advantage plans will equal the local rate set forth in the traditional demographic rate book, adjusted to reflect the plan members' gender, age and morbidity.

Most Medicare beneficiaries have the option to enroll in private health insurance plans that contract with Medicare under the Medicare Advantage program. According to the Kaiser Family Foundation, the share of Medicare beneficiaries in such plans has risen rapidly in recent years; it reached approximately 31% in 2015 from approximately 13% in 2004. Plan costs for the standard benefit package can be significantly lower or higher than the corresponding cost for beneficiaries in the traditional Medicare FFS payment program, but prior to the Health Reform Acts, private plans were generally paid a higher average amount, and they used the additional payments to reduce enrollee cost-sharing requirements, provide extra benefits, and/or reduce Medicare premiums. These enhancements were valuable to enrollees, but also resulted in higher Medicare costs overall and higher premiums for all Medicare Part B beneficiaries and not just those enrolled in Medicare Advantage plans. The Health Reform Acts require that future payments to plans be based on benchmarks in a range of 95% to 115% of local FFS Medicare costs, with bonus amounts payable to plans meeting high quality-of-care standards. In addition, health plans offering Medicare Advantage are required to spend at least 85% of their premium dollars on medical care, the so-called medical loss ratio (MLR). Since HCP is not a health plan, except for DaVita HealthCare Partners Plan (DHPP) it is not subject to the 85% MLR requirement (see "HealthCare Partners Division —Knox-Keene" below). However, payments that health plans make to HCP will apply in full towards the health plans' 85% MLR requirement. If a health plan does not meet the 85% MLR requirement, it must provide a rebate to its customers. Any such shortfalls will not impact amounts paid by health plans to HCP.

Medicaid. Medicaid is a federal entitlement program administered by the states that provides healthcare and long-term care services and support to low-income Americans. Medicaid is funded jointly by the states and the federal government. The federal government guarantees matching funds to states for qualifying Medicaid expenditures based on each state's federal medical assistance percentage, which is calculated annually and varies inversely with average personal income in the state. Subject to federal rules, each state establishes its own eligibility standards, benefit packages, payment rates and program administration within broad federal statutory and regulatory guidelines. Every state Medicaid program must balance a number of potentially competing demands, including the need for quality care, adequate provider access, and cost-effectiveness. In an effort to improve quality and provide more uniform and cost-effective care, many states have implemented Medicaid managed care programs to improve access to coordinated healthcare services, including preventative care, and to control healthcare costs. Under Medicaid managed care programs, a health plan receives capitation payments from the state. The health plan, in turn, arranges for the provision of healthcare services by contracting with a network of medical providers, such as HCP. HCP has entered into capitation agreements with health plans to manage approximately 122,600 Medicaid managed care members in its southern California and Florida markets.

Commercial payors

According to a survey conducted from January through June 2015 by the Kaiser Family Foundation and the Health Research and Education Trust, approximately 63% of non-elderly U.S. citizens received their healthcare benefits through their employers, which contracted with health plans to administer these healthcare benefits. Patients enrolled in health plans offered through an employment setting are generally referred to as commercial members. Commercial employer-sponsored health plan enrollment was approximately 147 million in 2015, according to the survey conducted by the Kaiser Family Foundation and the percentage of workers covered increased by approximately 1% from 62% in 2014. Under the Health Reform Acts, many uninsured individuals and many individuals who receive their health insurance benefits through small employers may purchase their healthcare benefits through insurance exchanges in which health plans compete directly for individual or small group members' enrollment. HCP derives a significant amount of its enrollment from commercial members; however, these members represent a disproportionately small share of HCP's operating profits.

Whether in the Medicare Advantage, commercial or Medicaid market, managed care health plans seek to provide a coordinated and efficient approach to managing the healthcare needs of their enrolled populations. By negotiating with providers, such as pharmacies, hospitals and physicians, and indirectly trying to influence physicians' behavior through various incentive and penalty schemes, managed care companies attempt to enhance their profitability by limiting their medical costs. These health plans have shown success in mitigating certain components of medical cost, but we believe they are limited by their indirect relationship with

physicians, who in the aggregate direct most of their patients' healthcare costs. We believe that physician-led and professionally-managed integrated medical systems such as HCP's have a greater opportunity to influence cost and improve quality due to the close coordination of care at the most effective point of contact with the patient—the primary care physician.

Capitation and FFS revenue

There are a number of different models under which an integrated medical system receives payment for managing and providing healthcare services to its members.

Fee-for-service structure. Under traditional FFS reimbursement, physicians are paid a specified FFS that they provide during a patient visit. Under this structure, physician compensation is solely related to the volume of patient visits and procedures performed, thus offering limited financial incentive to focus on cost containment and preventative care. FFS revenues are derived primarily from HCP's physician services and hospice care.

Capitation structure. Under capitation, payors pay a fixed amount per enrolled member, thereby subcontracting a significant portion of the responsibility and risks for managing patient care to physicians. Global capitation represents a prospective budget from which the provider system then manages care-related expenses including payments to associated providers outside the group, such as hospitals and specialists. Compared to traditional FFS models, we believe that capitation arrangements better align provider incentives with both quality and efficiency of care for a population of patients. We believe that this approach improves the quality of the experience for patients and the potential profitability for efficient care providers.

Since premiums paid represent a significant amount per person, the revenue and, when costs are effectively managed, profit opportunity available to an integrated medical system under a capitated arrangement can be significant. This is particularly the case for patients with multiple diseases and senior members. We believe that the advantages, savings and efficiencies made possible by the capitated model are most pronounced when the care demands of the population are the most severe and require the most coordination, such as for the senior population or patients with chronic, complex and follow-on diseases. While organized coordination of care is central to the capitated model, it is also well suited to the implementation of preventative care and disease management over the long-term since physicians have a financial incentive to improve the overall health of their patient population.

The inherent risk in assumption of global care risk relates to potential losses if a number of individual patients' medical costs exceed the expected amount. This risk is especially significant to individual practitioners or smaller physician groups who lack the scale required to spread the risk over a broad population. HCP has the scale, comprehensive medical delivery resources, significant infrastructure to support practicing physicians, and demonstrated care management know-how to spread the risk of losses over a large patient population.

Global model. In Florida and Arizona, HCP may contract directly with health plans under global capitation arrangements that include hospital services, because state law permits HCP to assume financial responsibility for both professional and institutional services. In New Mexico, HCP assumed financial responsibility for professional services only.

In California, entities that maintain full or restricted licenses under the California Knox-Keene Health Care Service Plan Act of 1975 (Knox-Keene) are permitted to assume financial responsibility for both professional and institutional services. As described below, in December 2013, HCP obtained a restricted Knox-Keene license and therefore may enter into global capitation arrangements with health plans through which HCP will assume financial responsibility for both professional and institutional services.

In Nevada, HCP enters into global capitation arrangements to assume financial responsibility for both professional and institutional services. However, the Nevada Division of Insurance (NDI) has not opined on whether it is appropriate for an entity like HCP to enter into global capitation arrangements and assume financial responsibility for the provision of both professional and institutional services to either Medicare Advantage enrollees or enrollees of commercial health plans. In order to avoid an adverse finding by the NDI with respect to HCP's global capitation arrangements in Nevada, HCP applied for an insurance license from the NDI and obtained the license in 2015. HCP is currently evaluating its ability to assign any of its existing contracts to the NDI license holder. Because of the current global capitation to HCP, and HCP's assumption of nearly the entire professional and institutional risk in Nevada, Florida and Arizona, HCP's health plan customers function primarily to support HCP in undertaking marketing and sales efforts to enroll members and processing claims in these states.

Risk-sharing model. In California, HCP currently utilizes a capitation model in several different forms. While there are variations specific to each arrangement, HealthCare Partners Affiliates Medical Group and HealthCare Partners Associates Medical Group, Inc. (collectively HCPAMG), which are medical groups that have entered into management services agreements with HCP, have historically contracted with health plans to receive a PMPM or percentage of premium (POP) capitation payment for professional (physician) services and assumed the financial responsibility for professional services. In some cases, the health plans separately enter into capitation contracts with third parties (typically hospitals) who directly receive a capitation payment and assume contractual financial responsibility for institutional (hospital) services. In other cases, the health plan does not pay a capitation payment to the

hospital, but rather administers and pays fee-for-service claims for hospital expenses. In both cases, HCPAMG has been responsible under its health plan agreements for managing the care dollars associated with both the professional and institutional services provided for in the HCPAMG capitation payment. In the case of institutional services and as a result of its managed care-related administrative services agreements with hospitals, HCPAMG has recognized a percentage of the surplus of institutional revenues less institutional expense as HCPAMG net revenues and has also been responsible for some percentage of any short-fall in the event that institutional expenses exceed institutional revenues. In connection with HCP's obtaining a restricted Knox-Keene license in California, substantially all of the California health plan contracts, along with the revenues received under such contracts, have been assigned from HCPAMG to DHPP. In addition, HCP now has the legal authority to transition these health plan contracts to global capitation arrangements in which HCP is responsible for arranging professional and institutional services in exchange for a single capitation payment. HCP is in the process of evaluating and identifying which risk-sharing arrangements, if any, will be converted to global capitation arrangements, subject to HCP's and the applicable health plan's satisfactory negotiation and approval, as well as approval from the Department of Managed Healthcare. Completion of such evaluation and possible conversion is expected to occur over time.

Government regulation

In addition to the laws and regulations to which our dialysis and related lab services business are subject to, the internal operations of HCP and its contractual relationships with healthcare providers such as hospitals, other healthcare facilities, and healthcare professionals are subject to extensive and increasing regulation by numerous federal, state, and local government entities. These laws and regulations often are interpreted broadly and enforced aggressively by multiple government agencies, including the OIG, the DOJ, and various state authorities. Many of these laws and regulations are the same as those that impact our dialysis and related lab services business. For example:

- HCP's financial relationships with healthcare providers including physicians and hospitals could subject HCP to criminal and civil sanctions and penalties under the federal Anti-Kickback Statute;
- The referral of Medicare patients by HCP-associated physicians for the provision of DHS may subject the parties to sanctions and penalties under the federal Stark Law;
- HCP's financial relationships and those of its associated physicians may subject the parties to penalties and sanctions under state fraud and abuse law;
- HCP's submission of claims to governmental payors such as the Medicare and Medicaid programs for services provided by its associated physicians and clinical personnel may subject HCP to sanction and penalties under the FCA; and
- HCP's handling of PHI may subject HCP to sanctions and penalties under HIPAA and its implementing privacy and security regulations, as amended by the HITECH Act and state medical privacy laws which often include penalties and restrictions that are more severe than those which arise under HIPAA.

A finding that claims for services were not covered or not payable, or the imposition of sanctions associated with a violation of any of these healthcare laws and regulations, could result in criminal or civil penalties and exclusion from participation in Medicare, Medicaid and other federal and state healthcare programs and could have a material adverse effect on HCP's business, financial condition and results of operations. We cannot guarantee that the arrangements or business practices of HCP will not be subject to government scrutiny or be found to violate certain healthcare laws. Government audits, investigations and prosecutions, even if we are ultimately found to be without fault, can be costly and disruptive to HCP's business. Moreover, changes in healthcare legislation or government regulation may restrict HCP's existing operations, limit their expansion or impose additional compliance requirements and costs, any of which could have a material adverse effect on HCP's business, financial condition and results of operations.

The following includes brief descriptions of some, but not all, of the laws and regulations that, in addition to those described in relation to our dialysis and related lab services business, affect HCP. HCP is also subject to the laws and regulations that apply to our U.S. dialysis and related lab services business, see "The dialysis and related lab services business overview—Government regulation" above.

Licensing, certification, accreditation and related laws and guidelines. HCP clinical personnel are subject to numerous federal, state and local licensing laws and regulations, relating to, among other things, professional credentialing and professional ethics. Since HCP clinical personnel perform services in medical office settings, hospitals and other types of healthcare facilities, HCP may indirectly be subject to laws applicable to those entities as well as ethical guidelines and operating standards of professional trade associations and private accreditation commissions, such as the American Medical Association and the Joint Commission. There are penalties for non-compliance with these laws and standards, including loss of professional license, civil or criminal fines and penalties, loss of hospital admitting privileges, federal healthcare program disenrollment, loss of billing privileges, and exclusion from participation in various governmental and other third-party healthcare programs.

Professional licensing requirements. HCP's clinical personnel, including physicians, must satisfy and maintain their professional licensing in the states where they practice medicine. Activities that qualify as professional misconduct under state law may subject them to sanctions, including the loss of their licenses and could subject HCP to sanctions as well. Many state boards of medicine impose reciprocal discipline, that is, if a physician is disciplined for having committed professional misconduct in one state where he or she is licensed, another state where he or she is also licensed may impose the same discipline even though the conduct did not occur in that state. Therefore, if an HCP-associated physician is licensed in multiple states, sanctions or loss of licensure in one state may result in sanction or the loss of licensure in other states. Professional licensing sanctions may also result in exclusion from participation in governmental healthcare programs, such as Medicare and Medicaid, as well as other third-party programs.

Corporate practice of medicine and fee splitting. California, Nevada and Arizona are three states in which HCP operates that have laws that prohibit business entities, such as our Company and our subsidiaries, from practicing medicine, employing physicians to practice medicine or exercising control over medical decisions by physicians (known collectively as the corporate practice of medicine). These states also prohibit entities from engaging in certain financial arrangements, such as fee-splitting, with physicians. In some states these prohibitions are expressly stated in a statute or regulation, while in other states the prohibition is a matter of judicial or regulatory interpretation.

In California, a violation of the corporate practice of medicine prohibition constitutes the unlawful practice of medicine, which is a public offense punishable by fines and other criminal penalties. In addition, any physician who participates in a scheme that violates California's corporate practice of medicine prohibition may be punished for aiding and abetting a lay entity in the unlawful practice of medicine. In Nevada, violation of the corporate practice of medicine rules by a lay entity also constitutes the unlawful practice of medicine. This violation is a felony punishable by fines and other criminal penalties. Physicians in Nevada can similarly be punished for aiding and abetting in the unlicensed practice of medicine. In Arizona, although state statutes establish professional corporations for the provision of professional services including medical services, state statutes and regulations do not specifically address the corporate practice of medicine prohibition or proscribe penalties for its violation. Accordingly, a violation of the corporate practice of medicine prohibition as set forth in Arizona case law would, at least, be deemed illegal and result in the voiding of the offending employment or contractual relationship at issue.

In California, Nevada and Arizona, where the corporate practice of medicine is prohibited, HCP has historically operated by maintaining long-term management contracts with multiple associated professional organizations which, in turn, employ or contract with physicians to provide those professional medical services required by the enrollees of the payors with which the professional organizations contract. Under these management agreements, HCP performs only non-medical administrative services, does not represent that it offers medical services, and does not exercise influence or control over the practice of medicine by the physicians or the associated physician groups with which it contracts. For example, in California, HCP has full-service management contracts with HCPAMG. The HCPAMG entities are owned by California-licensed physicians and professional medical corporations and contract with physicians to provide professional medical services. In Nevada, HCP's Nevada subsidiaries have similar management agreements with Nevada professional corporations that employ and contract with physicians to provide professional medical services.

In Arizona, HCP arranges for the provision of patient care services through an IPA named Arizona Integrated Physicians (AIP). AIP is a professional corporation that contracts with independent physicians and medical group practices. In this way, the professional medical services required by HCP members in Arizona are provided by AIP and structured to be in compliance with Arizona's corporate practice of medicine laws.

Some of the relevant laws, regulations, and agency interpretations in California, Nevada and Arizona have been subject to limited judicial and regulatory interpretation. Moreover, state laws are subject to change. Regulatory authorities and other parties, including HCP's associated physicians, may assert that, despite the management agreements and other arrangements through which HCP operates, we are engaged in the prohibited corporate practice of medicine or that HCP's arrangements constitute unlawful fee-splitting. If this were to occur, we could be subject to civil or criminal penalties, HCP's agreements could be found legally invalid and unenforceable (in whole or in part), or we could be required to restructure its contractual arrangements.

If we were required to restructure HCP's operating structures in California, Nevada or Arizona due to determination that a corporate practice of medicine violation existed, such a restructuring might include revisions of the California, Nevada or Arizona management services agreements, which might include a modification of the management fee, and/or establishing an alternative structure. For example, our subsidiaries in Nevada or Arizona might have to obtain the equivalent of a California Knox-Keene license in such state in order to comply with the corporate practice of medicine rules while contracting directly with payors and, in turn, physicians, to provide physician services to the payors' enrollees. In California, HCP's restricted Knox-Keene license has created potential flexibility for HCP in the event regulatory authorities seek to enforce corporate practice of medicine or fee splitting laws based upon current management services relationships with HCPAMG. HCP's restricted Knox-Keene license allows DHPP to contract with or employ physicians as a result of an exemption from California's corporate practice of medicine laws applicable to Knox-Keene licensees.

Knox-Keene. The California Department of Managed Health Care (DMHC) licenses and regulates Health Care Service Plans (HCSPs) pursuant to Knox-Keene. In addition to administering Knox-Keene's various patient's rights protections for HCSP-enrolled individuals, the DMHC is responsible for ensuring the financial sustainability over time of HCSPs and other regulated entities. As such, the DMHC is charged with continually monitoring the financial health of regulated entities. The DMHC's Division of Financial Oversight conducts examinations of the fiscal and administrative affairs of licensed HCSPs to protect consumers and providers from potential insolvencies. Financial examination reviews include examinations of cash flow, premium receivables, intercompany transactions and medical liabilities. The examination also ensures that there is adequate tangible net equity (TNE), as determined according to calculations included in Knox-Keene. The TNE regulations for organizations holding a Knox-Keene license, like HCP, vary depending on circumstances, but generally require any licensee to have on hand in cash or cash equivalents a minimum of the greater of (i) $1 million, (ii) the sum of 2% of the first $150 million of annualized premium revenues plus 1% of annualized premium revenues in excess of $150 million, or (iii) the sum of 8% of the first $150 million of annualized healthcare expenditures (except those paid on a capitated basis or managed hospital payment basis) plus 4% of the annualized healthcare expenditures, except those paid on a capitated basis or managed hospital payment basis, which are in excess of $150 million. In its sole discretion, DMHC may require, as a condition to obtaining or maintaining an HCSP license, that a licensee accept certain contractual undertakings such that the licensee is obligated to maintain TNE in amounts greater than the minimum amount described above. Such contractual undertakings may require 130% or more of TNE to be maintained by a licensee.

The DMHC interprets Knox-Keene to apply to both HCSPs and downstream contracting entities, including provider groups that enter into global risk contracts with licensed HCSPs. A global risk contract is a healthcare services contract in which a downstream contracting entity agrees to provide both professional (physician) services and institutional (hospital) services subject to an at-risk or capitated reimbursement methodology. According to DMHC, entities that accept global risk must obtain a restricted Knox-Keene license. Under a restricted Knox-Keene license, entities may enter into global risk contracts with other licensed HCSPs. Holders of restricted Knox-Keene licenses must comply with the same financial requirements as HCSPs with full licenses, including demonstrating specific levels of TNE, but are granted waivers from meeting marketing and other terms of full Knox-Keene licensure. The consequences of operating without a license include civil penalties, criminal penalties and the issuance of cease and desist orders.

DHPP holds a restricted Knox-Keene license, which was approved by DMHC on December 31, 2013. This allows HCP to contract directly with HCSPs to simplify its historic contractual and financial structure and to facilitate expansion into new markets in California. However, this also subjects HCP and DHPP to additional regulatory burdens, including (i) regulatory oversight of operations, (ii) the need to seek approval for all material business changes, (iii) significant requirements to maintain certain TNE levels, and (iv) other operating limitations imposed by Knox-Keene and its regulations. Under its restricted Knox-Keene license, DHPP is prohibited from declaring or paying any dividends or making any distribution of cash or property to DHPP's parent, affiliates, or shareholders, if such a distribution would cause DHPP to fail to maintain TNE, have insufficient working capital or cash flow as required by DMHC regulation or otherwise be unable to provide or arrange healthcare services. In addition, DHPP is subject to DMHC oversight and must seek approval before incurring any debt or guaranteeing any debt relating to DHPP's parent, affiliates, or shareholders. DHPP must also submit proposed global capitation contracts to DMHC for approval.

HCP services

Approximately 90% of HCP's operating revenues for the year ended December 31, 2015 were derived from multi-year capitation contracts with health plans. Under these contracts, HCP's health plan customers delegate full responsibility for member care to physicians and healthcare facilities that are part of HCP's provider network. In return, HCP receives a PMPM fee for each HCP member. As a result, HCP has financial and clinical accountability for a population of members. In California, HCP does not assume direct financial risk for institutional (hospital) services in most cases, but is responsible for managing the care dollars associated with both the professional (physician) and institutional services being provided for the PMPM fee attributable to both professional and institutional services. In those cases and as a result of its managed care-related administrative services agreements with hospitals, HCP recognizes the surplus of institutional revenues less institutional expense as HCP net revenues and is also responsible for any short-fall in the event that institutional expenses exceed institutional revenues. In addition to revenues recognized for financial reporting purposes, HCP measures its total care dollars under management. This includes the PMPM fee payable to third parties for institutional (hospital) services where HCP manages the care provided to its members by hospitals and other institutional services. These fees are not included in Generally Accepted Accounting Principles (GAAP) revenues. For the year ended December 31, 2015, HCP's total consolidated operating revenues were $3.755 billion and total care dollars under management were $4.952 billion.

HCP provides complete medical care through a network of participating physicians and other healthcare professionals. Through its group model, HCP employs, directly (where permitted by state law) and through its associated physician groups, approximately 547 associated group full-time primary care physicians. Through its IPA model, HCP contracts with a network of over 2,900 associated groups and other network primary care physicians who provide care for HCP's members in an independent office setting. These physicians are complemented by several thousand network specialists and 240 network hospitals that provide specialty or institutional care to the patients of HCP's associated physicians, physician groups and IPAs.

In order to comply with local regulations prohibiting the corporate practice of medicine, many of HCP's group physicians are employed by associated medical groups with which HCP has entered into long-term management agreements. The largest of these HCP managed medical groups is HCPAMG, which employs, directly or indirectly, over 600 full-time primary care physicians, specialists and hospitalists. See "Governmental Regulations—Corporate Practice of Medicine and Fee Splitting" above.

HCP does not own hospitals, although hospitals are an essential part of its provider network. In most cases, HCP contracts or otherwise aligns with hospitals to manage the utilization, readmission and cost of hospital services. Most HCP patients receive specialty care through HCP's network based on referrals made by their primary care physician. These specialists may be reimbursed based on capitation, case rates or on a discounted FFS rate.

HCP group physicians typically see 15 to 20 patients per day, which we believe is an appropriate benchmark to ensure there is sufficient time to understand all of the patients' clinical needs. HCP care teams, including nurses, engage in outreach to patients in order help monitor fragile and high risk patients, and help improve adherence to physicians' care plans. During these visits, HCP's physicians, nurses and educators use the time to educate patients and manage their healthcare needs. The goal of this preventative care delivery model is to keep patients healthy. Education improves self-management and compliance which allows the patient to recognize early signs of their disease and seek appropriate care. We believe this translates into earlier intervention, which in turn leads to fewer emergency room visits, fewer hospital admissions and fewer hospital bed days (the most expensive location for healthcare). This clinical model seeks to provide early diagnosis of disease or deterioration in a chronic and complex condition and provide preventive care to maintain optimal health and avert unnecessary hospitalization. Clinic-based case managers and hospitalists coordinate with the primary care physicians to ensure that patients are receiving proper care whether they are in the clinic, in the hospital or are not regularly accessing healthcare. Physicians and case managers encourage patients to regularly visit the clinics in order to enhance their day-to-day health and diagnose any illness or deterioration in condition as early as possible.

HCP's information technology system, including HCP's electronic health record and data warehouse, is designed to support the HCP delivery model with data-driven opportunities to improve the quality and cost effectiveness of the care received by its members. Using informatics technology, HCP has created disease registries that track large numbers of patients with defined medical conditions. HCP applies the data from these registries to manage the care for patients with similar medical conditions which we believe leads to a better medical outcome. We believe this approach to using data is effective because the information is communicated by the patient's physician rather than the health plan or disease management companies.

HCP employs a wide variety of other information applications to service IPA and network providers using web connectivity. The HCP Connect! on-line portal provides web-based eligibility, referrals, electronic claims submission and explanation of benefits, and other communication vehicles for individual physician offices. The success of this suite of applications has enhanced HCP's ability to manage its IPA networks, and has resulted in significant back-office efficiencies for HCP and its associated physician groups. HCP has further expanded its ability to share key utilization and clinical data with its internal and contracted physicians and specialists through the Physician Information Portal and the Clinical Viewer. Through these secure web portals, a physician is able to obtain web-based, point of care information regarding a patient, including diagnosis history, provide quality indicators, historical risk-adjustment coding information, pharmacy medication history, and other key information. In addition to its web-portals geared towards physicians, HCP has recently introduced a patient on-line portal to enable HCP's patients to securely view their own clinical information, schedule physician appointments and interact electronically with their physicians. HCP believes these tools help lead to high quality clinical outcomes, create internal efficiencies, and enhance the satisfaction of its associated physicians and patients.

In addition, HCP uses its data to carefully track high utilizing patients through robust data warehousing and data mining technologies. HCP filters the data warehouse to identify and reach out to patients with high-utilization patterns who are inefficiently using resources, such as visiting an emergency room when either a same-day appointment or urgent care center would be more appropriate and satisfactory for the member. High utilizing patients are identified and tracked as part of HCP's electronic health record by their physician and HCP's care management staff. Specific care plans are attached to each of these patients and tracked carefully for full compliance. The objective is to proactively manage their care at times when these patients are either not compliant with the care plan or when changing circumstances require care managers to develop new and more suitable care plans. By using these resources, HCP has achieved improvements in quality of care, satisfaction and cost.

We believe HCP is well positioned to effectively leverage marketplace demands for greater provider accountability, measurable quality results and cost efficient medical care. We believe that HCP's business model is likely to continue to be an attractive alternative for health plans looking for high quality, cost effective delivery systems, physicians seeking an attractive practice environment and patients interested in a highly integrated approach to managing their medical care. Additionally, we believe that the scale of HCP's business allows it to spread capitation risk over a large population of members, invest in comprehensive analytic and healthcare information tools as well as clinical and quality measurement infrastructure, and recognize administrative and operating efficiencies. For these reasons, we believe that HCP offers patients, physicians and health plans a proven platform for addressing many of the most pressing challenges facing the U.S. healthcare system, including rising medical costs.

We also believe HCP has the ability to demonstrably improve medical outcomes and patient satisfaction while effectively managing costs through the following unique competitive strategies and internal progress and systems:

- HCP's clinical leadership and associated group and network physicians devote significant efforts to ensure that HCP's members receive the most appropriate care in the most appropriate manner.
- HCP is committed to maximizing its patients' satisfaction levels.
- HCP has the scale which, combined with its strong reputation and high quality patient care, makes it an attractive partner for health plans, compared to smaller provider groups that may have a higher risk of default and may not have the same resources to devote and develop the same level of patient care.
- HCP has over two decades of experience in managing complex disease cases for its population of patients. As a result, HCP has developed a rich dataset of patient care experiences and outcomes which permits HCP to proactively monitor and intervene in improving the care of its members.
- HCP's senior management team possesses substantial experience with the healthcare industry with average experience of nearly 20 years, as of December 31, 2015.

Locations of HCP clinics

As of December 31, 2015, HCP managed a total of 226 medical clinics, of which 62 clinics were located in California, 13 clinics were located in Colorado, 79 clinics were located in Florida, 55 clinics were located in Nevada, 14 clinics were located in New Mexico and three clinics were located in Georgia. As described above, HCP members in Arizona receive services at independent physician and medical group practice offices. In this way, HCP does not directly manage clinics in Arizona.

Competition

U.S. and International dialysis competition

The U.S. dialysis industry has consolidated significantly over time but still remains highly competitive, particularly in terms of acquiring existing outpatient dialysis centers. We continue to face a high degree of competition in the U.S. dialysis industry from large and medium-sized providers who compete directly with us for the acquisition of dialysis businesses, relationships with physicians to act as medical directors and for individual patients, as well as skilled clinical personnel. In addition, as we continue our international dialysis expansion into various international markets, we face competition from large and medium-sized providers for acquisition targets as well as physician relationships. Because of the ease of entry into the dialysis business and the ability of physicians to own dialysis centers and/or also be medical directors for their own centers, competition for growth in existing and expanding markets is not limited to large competitors with substantial financial resources. Acquisitions, developing new outpatient dialysis centers, patient retention and physician relationships are a critical component of our growth strategy and our business could be adversely affected if we are not able to continue to make dialysis acquisitions on reasonable and acceptable terms, continue to develop new outpatient dialysis centers, maintain or establish new relationships with physicians or if we experience significant patient attrition to our competitors. Competition for qualified physicians to act as medical directors and for inpatient dialysis services agreements with hospitals is also intense. Occasionally, we have also experienced competition from former medical directors or referring physicians who have opened their own outpatient dialysis centers. We also experience competitive pressures from other dialysis providers in connection with negotiating contracts with commercial healthcare payors and in recruiting and retaining qualified skilled clinical personnel.

The two largest dialysis companies, Fresenius Medical Care (FMC) and our Company, account for approximately 72% of outpatient dialysis patients in the U.S. with our Company serving approximately 36% of the total outpatient dialysis patients. Approximately 45% of the centers not owned by us or FMC are owned or controlled by hospitals or non-profit organizations. Hospital-based and non-profit dialysis units typically are more difficult to acquire than physician-owned dialysis centers.

FMC also manufactures a full line of dialysis supplies and equipment in addition to owning and operating outpatient dialysis centers worldwide. This may give FMC cost advantages over us because of its ability to manufacture its own products. Additionally, FMC has been one of our largest suppliers of dialysis products and equipment over the last several years. In January 2010, we entered into and subsequently extended an agreement with FMC to purchase a certain amount of dialysis equipment, parts and supplies from FMC through February 29, 2016. We are currently renegotiating this agreement to extend the period of the agreement and to finalize the costs of our dialysis products. In addition, we entered in to a product supply agreement with Baxter Healthcare Corporation (Baxter) that commits us to purchase a certain amount of dialysis supplies through 2018. Our purchases of products in these categories generally offered by both FMC and Baxter represent approximately 4% of our total U.S. dialysis operating expenses. In 2015, we purchased hemodialysis products and supplies from both FMC and Baxter that each represented approximately 2% of our total U.S.

dialysis operating expenses. The amount of purchases in future years from FMC will depend upon a number of factors, including the operating requirements of our centers, the number of centers we acquire, and growth of our existing centers.

HCP's competition

HCP's business is highly competitive. HCP competes with managed care organizations, hospitals, medical groups and individual physicians in its markets. HCP competes with other primary care physician groups or physicians who contract with health plans for membership. Health plans contract with care providers on the basis of costs, reputation, scope, efficiency and stability. Individual members select a primary care physician at the time of membership with the health plan. Location, name recognition, quality indicators and other factors go into that decision. For example, in California, HCP competes with both Permanente Medical Group, which is the exclusive provider for Kaiser, and Heritage Provider Network. However, HCP's principal competitors for members and health plan contracts vary by market.

Corporate compliance program

Our businesses are subject to extensive federal, state and local government regulations. Management has designed and implemented a corporate compliance program as part of our commitment to comply fully with all applicable laws and regulations and to maintain the high standards of conduct we expect from all of our teammates. We continuously review this program and enhance it as necessary. The primary purposes of the program include:

- Assessing and identifying risks for existing and new businesses;
- Increasing, through training and education, the awareness of our teammates and affiliated professionals of the necessity of complying with all applicable laws, regulations and company policies and procedures;
- Auditing and monitoring the activities of our operating units and business support functions on a regular basis to identify potential instances of noncompliance in a timely manner; and
- Ensuring that we take steps to resolve instances of noncompliance or to address areas of potential noncompliance as promptly as we become aware of them.

We have a code of conduct that each of our teammates and affiliated professionals must follow and we have a confidential toll-free hotline for teammates and patients to report potential instances of noncompliance. Our Chief Compliance Officer administers the compliance program. The Chief Compliance Officer reports directly to our Chief Executive Officer, our Chief Executive Officer of Kidney Care and Chair of the Compliance Committee of our Board of Directors (Board Compliance Committee). On October 22, 2014, DaVita signed a CIA with the United States Department of Health and Human Services, Office of Inspector General. The CIA:

- requires that we maintain certain elements of our compliance programs;
- imposes certain expanded compliance-related requirements during the term of the CIA, including increased training for teammates, physician partners and board members, implementing a series of procedures prior to entering into arrangements with referrals sources, execution of annual certifications by senior executives that evidence compliance with federal healthcare laws and regulations, internal compliance policies and the CIA, imposition of an executive recoupment program and quarterly and annual reports to the OIG;
- requires the formal allocation of certain oversight responsibility to the Board Compliance Committee and a resolution from that committee that it has made reasonable inquiry into the operations of the compliance program and the retention of an independent compliance advisor in year three of the CIA;
- contains certain business restrictions related to a subset of our joint venture arrangements, including our agreeing to:
    1. unwind 11 joint venture transactions, all of which have been completed,
    2. not enter into certain types of partial divestiture joint venture transactions with nephrologists during the term of the CIA, and
    3. certain other restrictions;
- requires that we engage an Independent Monitor who will provide additional oversight and reporting to the OIG for the term of the CIA.

The costs associated with compliance with the CIA could be substantial and may be greater than we currently anticipate. In addition, in the event of a breach of the CIA, we may become liable for payment of certain stipulated penalties, and/or be excluded from participation on federal healthcare programs. The OIG notified us that it considered us to be in breach of the CIA because of three implementation deficiencies. We have remediated the deficiencies and have paid certain stipulated penalties. The costs associated with compliance with the CIA or any liability, or consequences associated with breach thereof, could have an adverse effect on our revenues, earnings and cash flows.

Insurance

We maintain insurance for property and general liability, professional liability, directors' and officers' liability, workers compensation and other coverage in amounts and on terms deemed adequate by management, based on our actual claims experience and expectations for future claims. Future claims could, however, exceed our applicable insurance coverage. Physicians practicing at our dialysis centers are required to maintain their own malpractice insurance, and our medical directors are required to maintain coverage for their individual private medical practices. Our liability policies cover our medical directors for the performance of their duties as medical directors at our outpatient dialysis centers. HCP also maintains general and professional liability insurance through various independent and related parties. HCP has purchased its primary general and professional liability insurance from California Medical Group Insurance (CMGI) in which HCP owns a 67% equity interest.

Teammates

As of December 31, 2015, we employed approximately 60,400 teammates, including our international teammates:

• Licensed professional staff (physicians, nurses and other healthcare professionals)	25,000
• Other patient care and center support staff and laboratory personnel	24,600
• Corporate, billing and regional administrative staff	10,800

Our businesses require skilled healthcare professionals with specialized training for treating patients with complex care needs. Recruitment and retention of nurses are continuing concerns for healthcare providers due to short supply. We have an active program of investing in our professional healthcare teammates to help ensure we meet our recruitment and retention targets, including expanded training opportunities, tuition reimbursements and other incentives.

Item 1A. Risk Factors.

This Annual Report on Form 10-K contains statements that are forward-looking statements within the meaning of the federal securities laws. These statements involve known and unknown risks and uncertainties including the risks discussed below. The risks discussed below are not the only ones facing our business. Please read the cautionary notice regarding forward-looking statements in Item 7 of this Part 1 under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Risk factors related to our U.S. dialysis and related lab services, ancillary services and strategic initiatives:

If the average rates that commercial payors pay us decline significantly, it would have a material adverse effect on our revenues, earnings and cash flows.

Approximately 34% of our dialysis services revenues for the year ended December 31, 2015 were generated from patients who have commercial payors as their primary payor. The majority of these patients have insurance policies that pay us on terms and at rates that are generally significantly higher than Medicare rates. The payments we receive from commercial payors generate nearly all of our profit and all of our nonacute dialysis profits come from commercial payors. We continue to experience downward pressure on some of our commercial payment rates as a result of general conditions in the market, recent and future consolidations among commercial payors, increased focus on dialysis services and other factors. Specifically, in the second quarter of 2015, two planned mergers of large commercial payors were announced. If completed, these announced mergers could put increased pressure on the dialysis rates we receive from commercial payors. There is no guarantee that commercial payment rates will not be materially lower in the future.

We are continuously in the process of negotiating our existing or potentially new agreements with commercial payors who tend to be aggressive in their negotiations with us. Sometimes many significant agreements are up for renewal or being renegotiated at the same time. In the event that our continual negotiations result in overall commercial rate reductions in excess of overall commercial rate increases, the cumulative effect could have a material adverse effect on our financial results. Consolidations have significantly increased the negotiating leverage of commercial payors. Our negotiations with payors are also influenced by competitive pressures, and we may experience decreased contracted rates with commercial payors or experience decreases in patient volume as our negotiations with commercial payors continue. In addition to downward pressure on contracted commercial payor rates, payors have been attempting to impose restrictions and limitations on non-contracted or out-of-network providers, and in some circumstances designate our centers as out-of-network providers. Rates for out-of-network providers are on average higher than rates for in-network providers. We believe commercial payors have or will begin to restructure their benefits to create disincentives for patients to select or remain with out-of-network providers and to decrease payment rates for out-of-network providers. Decreases in out-of-network rates and restrictions on out-of-network access, our turning away new patients in instances where we are unable to come to agreement on rates, or decreases in contracted rates could result in a significant decrease in our overall revenues derived from commercial payors. If the average rates that commercial payors pay us decline significantly, or if we see a decline in commercial patients, it would have a material adverse effect on our revenues, earnings and cash flows. For additional details regarding specific risks we face regarding regulatory changes that could result in fewer patients covered under commercial plans or an increase of patients covered under more restrictive commercial plans with lower reimbursement rates, see the discussion of individual and small group health plans in the risk factor below under the heading "Healthcare reform could substantially reduce our revenues, earnings and cash flows."

If the number of patients with higher-paying commercial insurance declines, then our revenues, earnings and cash flows would be substantially reduced.

Our revenue levels are sensitive to the percentage of our patients with higher-paying commercial insurance coverage. A patient's insurance coverage may change for a number of reasons, including changes in the patient's or a family member's employment status. Currently, for a patient covered by an employer group health plan, Medicare generally becomes the primary payor after 33 months, or earlier, if the patient's employer group health plan coverage terminates. Patients with commercial insurance who cannot otherwise maintain coverage frequently rely on financial assistance from charitable organizations, such as the American Kidney Fund. If these patients are unable to obtain or continue to receive such financial assistance, our revenues, earnings, and cash flow could be substantially reduced. When Medicare becomes the primary payor, the payment rate we receive for that patient decreases from the employer group health plan rate to the lower Medicare payment rate. We have seen an increase in the number of patients who have government-based programs as their primary payors which we believe is largely a result of improved mortality and recent economic conditions which have a negative impact on the percentage of patients covered under commercial insurance plans. To the extent there are sustained or increased job losses in the U.S., independent of whether general economic conditions might be improving, we could experience a continued decrease in the number of patients covered under commercial plans. We could also experience a further decrease if changes to the healthcare regulatory system result in fewer patients covered under commercial plans or an increase of patients covered under more restrictive commercial plans with lower reimbursement rates. In addition, our continuous process of negotiations with commercial payors under existing or potentially new agreements could result in a decrease in the number of patients under commercial plans to the extent that we cannot reach agreement with commercial payors on rates and

other terms, resulting in termination or non-renewals of existing agreements or our inability to enter into new ones. Commercial payors have taken and may continue to take steps to control the cost of and/or the eligibility for access to healthcare services. These efforts could impact the number of our patients who are eligible to enroll in commercial insurance plans, and remain on the plans, including plans offered through healthcare exchanges. If there is a significant reduction in the number of patients under higher-paying commercial plans relative to government-based programs that pay at lower rates, it would have a material adverse effect on our revenues, earnings and cash flows.

Changes in the structure of and payment rates under the Medicare ESRD program could substantially reduce our revenues, earnings and cash flows.

Approximately 44% of our dialysis services revenues for the year ended December 31, 2015 was generated from patients who have Medicare as their primary payor. For patients with Medicare coverage, all ESRD payments for dialysis treatments are made under a single bundled payment rate which provides a fixed payment rate to encompass all goods and services provided during the dialysis treatment, including pharmaceuticals that were historically separately reimbursed to the dialysis providers, such as EPO, vitamin D analogs and iron supplements, irrespective of the level of pharmaceuticals administered or additional services performed. Most lab services are also included in the bundled payment. The bundled payment rate is also adjusted for certain patient characteristics, a geographic usage index and certain other factors.

The current bundled payment system presents certain operating, clinical and financial risks, which include:

- Risk that our rates are reduced by CMS. Uncertainty about future payment rates remains a material risk to our business. In December 2013, CMS published the 2014 final rule for the ESRD PPS, which phases in the payment reductions mandated by the American Taxpayer Relief Act of 2012 as modified by the Protecting Access to Medicare Act of 2014, which will reduce our market basket inflation adjustment by 1.25% in 2016 and 2017, and 1% in 2018. In November 2014, CMS published the 2015 final rule for the ESRD PPS, which increased payments to dialysis facilities in 2015 by 0.3% to 0.5%, although rural facilities received a decrease of 0.5%. CMS also recently issued the 2016 final rule for the ESRD PPS, which cuts dialysis facilities' bundled payment rate for 2016 as compared to 2015 and includes adjustments for certain co-morbidities and other patient health factors and rural facilities. CMS believes its 2016 final rule for the ESRD PPS will (i) increase overall payments to both hospital-based and freestanding dialysis facilities by approximately 0.20%, and (ii) decrease overall payments to rural dialysis facilities by approximately 0.10%.

- Risk that increases in our operating costs will outpace the Medicare rate increases we receive. We expect to continue experiencing increases in operating costs that are subject to inflation, such as labor and supply costs, regardless of whether there is a compensating inflation-based increase in Medicare payment rates or in payments under the bundled payment rate system.

- Risk of federal budget sequestration cuts. As a result of the BCA and subsequent activity in Congress, a $1.2 trillion sequester (across-the-board spending cuts) in discretionary programs took effect on March 1, 2013. In particular, a 2% reduction to Medicare payments took effect on April 1, 2013, which was subsequently extended through 2014 and 2015. The Bipartisan Budget Act of 2015 extended the BCA's annual 2% reduction to Medicare payments through fiscal year 2025. These across-the-board spending cuts have affected and will continue to adversely affect our revenues, earnings and cash flows.

- Risk that, if our clinical systems fail to accurately capture the data we report to CMS in connection with claims for which at least part of the government's payments to us is based on clinical performance or patient outcomes or co-morbidities, we might be over-reimbursed by the government which could subject us to certain liability. For example, we are required to return overpayments including, federal funds, within sixty days of identification or claims associated with those overpayments are subject to FCA penalties.

For additional details regarding the risks we face for failing to adhere to our Medicare and Medicaid regulatory compliance obligations, see the risk factor below under the heading "If we fail to adhere to all of the complex government regulations that apply to our business, we could suffer severe consequences that would substantially reduce our revenues, earnings, cash flows and stock price."

Healthcare reform could substantially reduce our revenues, earnings and cash flows.

We cannot predict how employers, private payors or persons buying insurance might react to the changes brought on by broad U.S. healthcare reform legislation or what form many of these regulations will take before implementation.

The healthcare reform legislation, enacted in 2010, introduced healthcare insurance exchanges which provide a marketplace for eligible individuals and small employers to purchase healthcare insurance. While patients have begun receiving insurance coverage through these exchanges, the business and regulatory environment for these exchanges continues to evolve as the exchanges mature. Additionally, there is uncertainty about how the applicable state and federal agencies will enforce regulations relating to the exchanges. Although we cannot predict the short- or long-term effects of these factors, we believe the healthcare insurance exchanges could result in a reduction in ESRD patients covered by traditional commercial insurance policies and an increase in the number of patients covered through the exchanges under more restrictive commercial plans with lower reimbursement rates or higher deductibles and co-payments that patients may not be able to pay. Approximately eight million individuals were enrolled in the exchanges in 2014, with that number increasing to approximately 11 million in 2015. To the extent that the ongoing implementation of such exchanges or changes in regulations or enforcement of regulations regarding the exchanges results in a reduction in reimbursement rates for our services from commercial and/or government payors, our revenues, earnings and cash flows could be adversely affected.

In addition, the healthcare reform legislation broadened the potential for penalties under the FCA for the knowing and improper retention of overpayments collected from government payors and reduced the timeline to file Medicare claims. As a result, we made significant initial investments in new resources to accelerate the time it takes us to identify and process overpayments and we deployed significant resources to reduce our timeline and improve our claims processing methods to ensure that our Medicare claims are filed in a timely fashion. We may be required to make additional investments in the future. Failure to timely identify and return overpayments may result in significant penalties, which may have a negative impact on our revenues, earnings and cash flows. Failure to file a claim within the one year window could result in payment denials, adversely affecting our revenues, earnings and cash flows.

The healthcare reform legislation also added several new tax provisions that, among other things, impose various fees and excise taxes, and limit compensation deductions for health insurance providers and their affiliates. These rules could negatively impact our cash flow and tax liabilities. However, under the FY 2016 Omnibus budget agreement, Congress voted to delay certain new taxes that the Health Reform Acts had enacted, including the excise tax on certain high-cost health plans, the medical device tax, and the tax on health insurers. These and other changes contribute to the uncertainty of the ongoing implementation and impact of the Health Reform Acts; they also underscore the potential for additional reform going forward.

The Innovation Center is currently working with various healthcare providers to develop, refine and implement ACOs and other innovative models of care for Medicare and Medicaid beneficiaries. We are currently uncertain of the extent to which the long-term operation and evolution of these care models, including ACOs, Bundled Payments for Care Improvement Initiative, CEC Model (which includes the development of ESCOs), the Comprehensive Primary Care Initiative, the Duals Demonstration, and other models, will impact the healthcare market over time. Our U.S. dialysis business may choose to participate in one or several of these models either as a partner with other providers or independently. We are currently participating in the CEC Model with the Innovation Center, including with organizations in Arizona, Florida, New Jersey and Pennsylvania. Even in areas where DaVita is not directly participating in this or other Innovation Center models, some of our patients may be assigned to an ACO, another ESRD Care Model, or another program, in which case the quality and cost of care that we furnish will be included in an ACO's or other programs' calculations. As new models of care emerge and evolve, we may be at risk of losing our Medicare patient base, which would have a materially adverse effect on our revenues, earnings and cash flow. Other initiatives in the government or private sector may arise, including the development of models similar to ACOs, IPAs and integrated delivery systems or evolutions of those concepts which could adversely impact our business.

CMS instituted new screening procedures which we expect will delay the Medicare contractor approval process, potentially causing a delay in reimbursement. We anticipate the new screening and enrollment requirements will require additional personnel and financial resources and will potentially delay the enrollment and revalidation of our centers which in turn will delay payment. These delays may negatively impact our revenues, earnings and cash flows.

Other reform measures allow CMS to place a moratorium on new enrollment of providers and to suspend payment to providers upon a credible allegation of fraud from any source. These types of reform measures, as well as other measures, could adversely impact our revenues, earnings and cash flows depending upon the scope and breadth of the implementing regulations.

There is also a considerable amount of uncertainty as to the prospective implementation of the federal healthcare reform legislation and what similar measures might be enacted at the state level. There have been multiple attempts through legislative action and legal challenges to repeal or amend the Patient Protection and Affordable Care Act of 2010, as modified by the Health Reform Acts, including the case that was recently heard by the U.S. Supreme Court, King v. Burwell. Although the Supreme Court upheld the provision by the federal government of subsidies to individuals in federally facilitated healthcare exchanges in Burwell, which ultimately did not disrupt significantly the implementation of the healthcare reform legislation, we cannot predict whether other current or future efforts to repeal or amend these laws will be successful, nor can we predict the impact that such a repeal or amendment would have on our business and operations, or on our revenues and earnings. The enacted reforms as well as future legislative changes could have a material adverse effect on our results of operations, including lowering our reimbursement rates and increasing our expenses.

Changes in state Medicaid or other non-Medicare government-based programs or payment rates could reduce our revenues, earnings and cash flows.

Approximately 22% of our dialysis services revenues for the year ended December 31, 2015 was generated from patients who have state Medicaid or other non-Medicare government-based programs, such as coverage through the Department of Veterans Affairs (VA), as their primary coverage. As state governments and other governmental organizations face increasing budgetary pressure, we may in turn face reductions in payment rates, delays in the receipt of payments, limitations on enrollee eligibility or other changes to the applicable programs. For example, certain state Medicaid programs and the VA have recently considered, proposed or implemented payment rate reductions.

The VA adopted Medicare's bundled PPS pricing methodology for any veterans receiving treatment from non-VA providers under a national contracting initiative. Since we are a non-VA provider, these reimbursements are tied to a percentage of Medicare reimbursement, and we have exposure to any dialysis reimbursement changes made by CMS. Approximately 2% of our dialysis services revenues for the year ended December 31, 2015 was generated by the VA.

In 2013, we entered into a five-year Nationwide Dialysis Services contract with the VA which is subject to one-year renewal periods, consistent with all provider agreements with the VA under this contract. During the length of the contract, the VA has elected not to make adjustments to reimbursement percentages that are tied to a percentage of Medicare reimbursement rates. These agreements provide the VA with the right to terminate the agreements without cause on short notice. Should the VA not renew or cancel these agreements for any reason, we may cease accepting patients under this program and may be forced to close centers, which could adversely affect our revenues, earnings and cash flows.

State Medicaid programs are increasingly adopting Medicare-like bundled payment systems, but sometimes these payment systems are poorly defined and are implemented without any claims processing infrastructure, or patient or facility adjusters. If these payment systems are implemented without any adjusters and claims processing changes, Medicaid payments will be substantially reduced and the costs to submit such claims may increase, which will have a negative impact on our revenues, earnings and cash flows. In addition, some state Medicaid program eligibility requirements mandate that citizen enrollees in such programs provide documented proof of citizenship. If our patients cannot meet these proof of citizenship documentation requirements, they may be denied coverage under these programs, resulting in decreased patient volumes and revenue. These Medicaid payment and enrollment changes, along with similar changes to other non-Medicare government programs could reduce the rates paid by these programs for dialysis and related services, delay the receipt of payment for services provided, and further limit eligibility for coverage which could adversely affect our revenues, earnings and cash flows.

Changes in clinical practices, payment rates or regulations impacting EPO and other pharmaceuticals could adversely affect our operating results, reduce our revenues, earnings and cash flows and negatively impact our ability to care for patients.

Medicare bundles EPO into the PPS such that dosing variations do not change the amount paid to a dialysis facility. Although some Medicaid programs and other payors suggest movement towards a bundled payment system inclusive of EPO, some non-Medicare payors continue to pay for EPO separately from the treatment rate.

Additionally, evaluations on the utilization and reimbursement for ESAs, which have occurred in the past and may occur in the future, and related actions by the U.S. Congress and federal agencies, could result in further restrictions on the utilization and reimbursement for ESAs. Commercial payors have increasingly examined their administration policies for EPO and, in some cases, have modified those policies. Changes in labeling of EPO and other pharmaceuticals in a manner that alters physician practice patterns or accepted clinical practices, changes in private and governmental payment criteria, including the introduction of EPO administration policies could have a material adverse effect on our revenues, earnings and cash flows. Further increased utilization of EPO for patients for whom the cost of EPO is included in a bundled reimbursement rate, or further decreases in reimbursement for EPO and other pharmaceuticals that are not included in a bundled reimbursement rate, could also have a material adverse effect on our revenues, earnings and cash flows.

Additionally, as a result of the current high level of scrutiny and controversy, we may be subject to increased inquiries or audits from a variety of governmental bodies or claims by third parties. Although we believe our anemia management practices and other pharmaceutical administration practices have been compliant with existing laws and regulations, increased inquiries or audits from governmental bodies or claims by third parties would require management's attention, and could result in significant legal expense. Any negative findings could result in substantial financial penalties or repayment obligations, the imposition of certain obligations on and changes to our practices and procedures as well as the attendant financial burden on us to comply with the obligations, or exclusion from future participation in the Medicare and Medicaid programs, and could have a material adverse effect on our revenues, earnings and cash flows.

Changes in EPO pricing could materially reduce our earnings and cash flows and affect our ability to care for our patients.

Future increases in the cost of EPO without corresponding increases in payment rates for EPO from commercial payors and without corresponding increases in the Medicare bundled rate could have a material adverse effect on our earnings and cash flows and ultimately reduce our income. In November 2011, we entered into a seven year Sourcing and Supply Agreement with Amgen, pursuant to which we committed to purchase EPO in amounts necessary to meet no less than 90% of our requirements for ESAs. As long as we meet certain conditions, the agreement limits Amgen's ability to unilaterally increase the price for EPO during the term of the agreement. Our agreement with Amgen provides for discounted pricing and rebates for EPO. However, some of the rebates are subject to various conditions including, but not limited to, future pricing levels of EPO by Amgen and data submission by us. In addition, the rebates are subject to certain limitations. We cannot predict whether, over the seven year term of the agreement, we will continue to receive the rebates for EPO that we have received in the past, or whether we will continue to achieve the same levels of rebates within that structure as we have historically achieved. Factors that could impact our ability to qualify for rebates provided for in our agreement with Amgen in the future include, but are not limited to, our ability to track certain data elements. We cannot predict whether we will be able to meet the applicable qualification requirements for receiving rebates. Failure to meet certain targets and earn the specified rebates could have a material adverse effect on our earnings and cash flows.

If we fail to comply with our Corporate Integrity Agreement, we could be subject to substantial penalties and exclusion from participation in federal healthcare programs that may adversely impact our revenues, earnings and cash flows.

In October 2014, we entered into a Settlement Agreement with the United States and relator David Barbetta to resolve the then pending 2010 and 2011 U.S. Attorney physician relationship investigations and paid $406 million in settlement amounts, civil forfeiture, and interest to the United States and certain states. In connection with the resolution of these matters, and in exchange for the OIG's agreement not to exclude us from participating in the federal healthcare programs, we have entered into a five-year CIA with the OIG. The CIA (i) requires that we maintain certain elements of our compliance programs, (ii) imposes certain expanded compliance-related requirements during the term of the CIA, (iii) requires ongoing monitoring and reporting by an independent monitor, imposes certain reporting, certification, records retention and training obligations, allocates certain oversight responsibility to the Board's Compliance Committee, necessitates the creation of a Management Compliance Committee and the retention of an independent compliance advisor to the Board, and (iv) contains certain business restrictions related to a subset of our joint venture arrangements, including our agreeing to (i) unwind 11 joint venture transactions that were created through partial divestitures to, or partial acquisitions from, nephrologists and that cover 26 of our 2,119 clinics that existed at the time we entered into the Settlement Agreement, all of which have been completed, (ii) not enter into certain types of partial divestiture joint venture transactions with nephrologists during the term of the CIA, (iii) non-enforcement of certain patient-related non-solicitation restrictions, and (iv) certain other restrictions. The costs associated with compliance with the CIA could be substantial and may be greater than we currently anticipate. In addition, in the event of a breach of the CIA, we could become liable for payment of certain stipulated penalties, and could be excluded from participation in federal healthcare programs. The OIG notified us that it considered us to be previously in breach of the CIA because of three implementation deficiencies. While we have remediated the deficiencies and have paid certain stipulated penalties, we cannot provide any assurances that we may not be found in breach of the CIA in the future. In general, the costs associated with compliance with the CIA, or any liability or consequences associated with a breach, could have a material adverse effect on our revenues, earnings and cash flows. For our domestic dialysis business, we are required under the CIA to report to the OIG (i) probable violations of criminal, civil or administrative laws applicable to any federal health care program for which penalties or exclusions may be authorized under applicable laws and regulations, (ii) substantial overpayments of amounts of money we have received in excess of the amounts due and payable under the federal healthcare program requirements, and (iii) employment of or contracting with individuals ineligible from participating in the federal healthcare programs (we refer to these collectively as Reportable Events). We have provided the OIG notice of Reportable Events and we may identify and report additional events in the future. If any of our operations are found to violate government laws and regulations, we could suffer severe consequences that would have a material adverse effect on our revenues, earnings, cash flows and stock price, including those consequences described under the risk factor "If we fail to adhere to all of the complex government regulations that apply to our business, we could suffer severe consequences that would substantially reduce our revenues, earnings, cash flows and stock price."

Delays in state Medicare and Medicaid certification of our dialysis centers could adversely affect our revenues, earnings and cash flows.

Before we can begin billing for patients treated in our outpatient dialysis centers who are enrolled in government-based programs, we are required to obtain state and federal certification for participation in the Medicare and Medicaid programs. As state agencies responsible for surveying dialysis centers on behalf of the state and Medicare program face increasing budgetary pressure, certain states are having difficulty keeping up with certifying dialysis centers in the normal course resulting in significant delays in certification. If state governments continue to have difficulty keeping up with certifying new centers in the normal course and we continue to experience significant delays in our ability to treat and bill for services provided to patients covered under government programs, it could cause us to incur write-offs of investments or accelerate the recognition of lease obligations in the event we have to close centers or our centers' operating performance deteriorates, and it could have an adverse effect on our revenues, earnings and cash flows.

If our joint ventures were found to violate the law, we could suffer severe consequences that would have a material adverse effect on our revenues, earnings and cash flows.

As of December 31, 2015, we owned a controlling interest in numerous dialysis-related joint ventures, which represented approximately 23% of our dialysis and related lab services revenues for the year ended December 31, 2015. In addition, we also owned minority equity investments in several other dialysis related joint ventures. We may continue to increase the number of our joint ventures. Many of our joint ventures with physicians or physician groups also have certain physician owners providing medical director services to centers we own and operate. Because our relationships with physicians are governed by the federal and state anti-kickback statutes, we have sought to structure our joint venture arrangements to satisfy as many federal safe harbor requirements as we believe are commercially reasonable. However, although our joint venture arrangements do not satisfy all of the elements of any safe harbor under the federal Anti-Kickback Statute, they are not automatically prohibited under the federal Anti-Kickback Statute but are susceptible to government scrutiny. In October 2014, we entered into a Settlement Agreement with the United States and relator David Barbetta to resolve the then pending 2010 and 2011 U.S. Attorney physician relationship investigations regarding certain of our joint ventures and paid $406 million in settlement amounts, civil forfeiture, and interest to the United States and certain states. For further details, please see "If we fail to comply with our CIA, we could be subject to substantial penalties and exclusion from participation in federal healthcare programs that may adversely impact our revenues, earnings and cash flows".

There are significant estimating risks associated with the amount of dialysis revenues and related refund liabilities that we recognize and if we are unable to accurately estimate our revenues and related refund liabilities, it could impact the timing and the amount of our revenues recognition or have a significant impact on our operating results.

There are significant estimating risks associated with the amount of dialysis and related lab services revenues and related refund liabilities that we recognize in a reporting period. The billing and collection process is complex due to ongoing insurance coverage changes, geographic coverage differences, differing interpretations of contract coverage, and other payor issues. Determining applicable primary and secondary coverage for approximately 180,000 U.S. patients at any point in time, together with the changes in patient coverage that occur each month, requires complex, resource-intensive processes. Errors in determining the correct coordination of benefits may result in refunds to payors. Revenues associated with Medicare and Medicaid programs are also subject to estimating risk related to the amounts not paid by the primary government payor that will ultimately be collectible from other government programs paying secondary coverage, the patient's commercial health plan secondary coverage or the patient. Collections, refunds and payor retractions typically continue to occur for up to three years and longer after services are provided. We generally expect our range of dialysis and related lab services revenues estimating risk to be within 1% of net revenues for the segment, which represents approximately 5% of dialysis and related lab services adjusted operating income. If our estimates of dialysis and related lab services revenues and related refund liabilities are materially inaccurate, it could impact the timing and the amount of our revenues recognition and have a significant impact on our operating results.

Our ancillary services and strategic initiatives, including our international dialysis operations, that we invest in now or in the future may generate losses and may ultimately be unsuccessful. In the event that one or more of these activities is unsuccessful, we may have to write off our investment and incur other exit costs.

Our ancillary services and strategic initiatives currently include pharmacy services, disease management services, vascular access services, ESRD clinical research programs, physician services, physician practice management services, direct primary care and our international dialysis operations. We expect to add additional service offerings and pursue additional strategic initiatives in the future as circumstances warrant, which could include healthcare services not related to dialysis. Many of these initiatives require or would require investments of both management and financial resources and can generate significant losses for a substantial period of time and may not become profitable. There can be no assurance that any such strategic initiative will ultimately be successful. Any significant change in market conditions, or business performance, or in the political, legislative or regulatory environment, may impact the economic viability of any of these strategic initiatives. If any of our ancillary services or strategic initiatives, including our international dialysis operations, do not perform as planned, we may incur a material write-off or an impairment of our investment, including goodwill, in one or more of these activities or we could incur significant termination costs if we were to exit a certain line of business.

If a significant number of physicians were to cease referring patients to our dialysis centers, whether due to regulatory or other reasons, it would have a material adverse effect on our revenues, earnings and cash flows.

We believe that physicians prefer to have their patients treated at dialysis centers where they or other members of their practice supervise the overall care provided as medical director of the center. As a result, the primary referral source for most of our centers is often the physician or physician group providing medical director services to the center.

Our medical director contracts are for fixed periods, generally ten years, and at any given time a large number of them could be up for renewal at the same time. Medical directors have no obligation to extend their agreements with us and if we are unable to enforce noncompetition provisions contained in terminated medical director agreements, our former medical directors may choose to provide medical director services for competing providers or establish their own dialysis centers in competition with ours. Neither our current nor former medical directors have an obligation to refer their patients to our centers.

Opportunities presented by our competitors or different affiliation models in the changing healthcare environment, such as an increase in the number of physicians becoming employed by hospitals or a perceived decrease in the quality of service levels at our centers may negatively impact a medical director's decision to enter into or extend his or her agreement with us, refer patients to our centers or otherwise negatively impact treatment volumes.

In addition, we may take actions to restructure existing relationships or take positions in negotiating extensions of relationships to assure compliance with the federal Anti-Kickback Statute, Stark Law and other similar laws. If the terms of any existing agreement are found to violate applicable laws, we may not be successful in restructuring the relationship which could lead to the early termination of the agreement, or cause the physician to stop referring patients to our dialysis centers. These actions in an effort to comply with applicable laws and regulations could negatively impact the decision of physicians to extend their medical director agreements with us or to refer their patients to us. If a significant number of physicians were to cease referring patients to our dialysis centers, our revenues, earnings and cash flows would be substantially reduced.

Deterioration in economic conditions and further disruptions in the financial markets could have a material adverse effect on our revenues, earnings and cash flows and otherwise adversely affect our financial condition.

Deterioration in economic conditions could adversely affect our business and our profitability. Among other things, the potential decline in federal and state revenues that may result from such conditions may create additional pressures to contain or reduce reimbursements for our services from Medicare, Medicaid and other government sponsored programs. Increases in job losses in the U.S. as a result of adverse economic conditions has and may continue to result in a smaller percentage of our patients being covered by an employer group health plan and a larger percentage being covered by lower paying Medicare and Medicaid programs. Employers may also select more restrictive commercial plans with lower reimbursement rates. To the extent that payors are negatively impacted by a decline in the economy, we may experience further pressure on commercial rates, a further slowdown in collections and a reduction in the amounts we expect to collect. In addition, uncertainty in the financial markets could adversely affect the variable interest rates payable under our credit facilities or could make it more difficult to obtain or renew such facilities or to obtain other forms of financing in the future, if at all. Any or all of these factors, as well as other consequences of a deterioration in economic conditions which cannot currently be anticipated, could have a material adverse effect on our revenues, earnings and cash flows and otherwise adversely affect our financial condition.

If there are shortages of skilled clinical personnel or if we experience a higher than normal turnover rate, we may experience disruptions in our business operations and increases in operating expenses.

We are experiencing increased labor costs and difficulties in hiring nurses due to a nationwide shortage of skilled clinical personnel. We compete for nurses with hospitals and other healthcare providers. This nursing shortage may limit our ability to expand our operations. In addition, changes in certification requirements or increases in the required staffing levels for skilled clinical personnel can impact our ability to maintain sufficient staff levels to the extent our teammates are not able to meet new requirements or we experience a higher than normal turnover rate due to increased competition for qualified clinical personnel. If we are unable to hire skilled clinical personnel when needed, or if we experience a higher than normal turnover rate for our skilled clinical personnel, our operations and treatment growth will be negatively impacted, which would result in reduced revenues, earnings and cash flows.

Our business is labor intensive and could be adversely affected if we are unable to maintain satisfactory relations with our employees or if union organizing activities result in significant increases in our operating costs or decreases in productivity.

Our business is labor intensive, and our results are subject to variations in labor-related costs, productivity and the number of pending or potential claims against us related to labor and employment practices. If political efforts at the national and local level result in actions or proposals that increase the likelihood of union organizing activities at our facilities or if union organizing activities increase for other reasons, or if labor and employment claims, including the filing of class action suits, trend upwards, our operating costs could increase and our employee relations, productivity, earnings and cash flows could be adversely affected.

Complications associated with our new billing and collections system could have a material adverse effect on our revenues, cash flows and operating results.

We recently launched a new billing system that is critical to our billing operations. If there are defects in the new billing system, we may experience difficulties in our ability to successfully bill and collect for services rendered, including a delay in collections, a reduction in the amounts collected, increased risk of retractions from and refunds to commercial and government payors, an increase in our provision for uncollectible accounts receivable and noncompliance with reimbursement regulations. To mitigate this risk, we launched the new system in phases; however, any defects in the new billing and collection system could have a material adverse effect on our revenues, cash flows and operating results.

Our ability to effectively provide the services we offer could be negatively impacted if certain of our suppliers are unable to meet our needs or if we are unable to effectively access new technology, which could substantially reduce our revenues, earnings and cash flows.

We have significant suppliers that are either the sole or primary source of products critical to the services we provide, including Amgen, Baxter, FMC, NxStage Medical, Inc. and others or to which we have committed obligations to make purchases. If any of these suppliers are unable to meet our needs for the products they supply, including in the event of a product recall or shortage, and we are not able to find adequate alternative sources, or if some of the drugs that we purchase are not reimbursed or not adequately reimbursed by commercial payors or through the bundled payment rate by Medicare, our revenues, earnings and cash flows could be substantially reduced. In addition, the technology related to the products critical to the services we provide is subject to new developments and may result in superior products. If we are not able to access superior products on a cost-effective basis or if suppliers are not able to fulfill our requirements for such products, we could face patient attrition which could substantially reduce our revenues, earnings and cash flows.

Risk factors related to HCP:

HCP is subject to many of the same risks to which our dialysis business is subject.

As a participant in the healthcare industry, HCP is subject to many of the same risks to which our dialysis business is subject to as described in the risk factors set forth above in this Part I, Item 1A, any of which could materially and adversely affect HCP's revenues, earnings or cash flows. Among these risks are the following:

- The healthcare business is heavily regulated and changes in laws, regulations, or government programs could have a material impact on HCP;
- Failure to comply with complex governmental regulations could have severe consequences to HCP, including, without limitation, exclusion from governmental payor programs like Medicare and Medicaid;
- HCP could become the subject of governmental investigations, claims, and litigation;
- HCP may be unable to continue to explore potential acquisition candidates, make acquisitions or successfully integrate such acquisitions into its business, and such acquisitions may include liabilities of which HCP was not aware; and
- As a result of the broad scope of HCP's medical practice, HCP is exposed to medical malpractice claims, as well as claims for damages and other expenses, that may not be covered by insurance or for which adequate limits of insurance coverage may not be available.

Under most of HCP's agreements with health plans, HCP assumes some or all of the risk that the cost of providing services will exceed its compensation.

Over 90% of HCP's revenue for the year ended December 31, 2015 is derived from fixed PMPM fees paid by health plans under capitation agreements with HCP or its associated physician groups. While there are variations specific to each arrangement, HCP, through DHPP and, in certain instances, HCP's associated physician groups generally contract with health plans to receive a PMPM fee for professional services and assume the financial responsibility for professional services only. In some cases, the health plans separately enter into capitation contracts with third parties (typically hospitals) who receive directly a PMPM fee and assume contractual financial responsibility for hospital services. In other cases, the health plan does not pay any portion of the PMPM fee to the hospital, but rather administers claims for hospital expenses itself. In both scenarios, HCP enters into managed care-related administrative services agreements or similar arrangements with those third parties (typically hospitals) under which HCP agrees to be responsible for utilization review, quality assurance, and other managed care-related administrative functions and claim payments. As compensation for such administrative services, HCP is entitled to receive a percentage of the amount by which the institutional

capitation revenue received from health plans exceeds institutional expenses; any such risk-share amount to which HCP is entitled is recorded as medical revenues and HCP is also responsible for a percentage of any short-fall in the event that institutional expenses exceed institutional revenues. To the extent that members require more care than is anticipated, aggregate fixed PMPM amounts, or capitation payments, may be insufficient to cover the costs associated with treatment. If medical expenses exceed estimates, except in very limited circumstances, HCP will not be able to increase the PMPM fee received under these risk agreements during their then-current terms and could, directly or indirectly through its contracts with its associated physician groups, suffer losses with respect to such agreements.

Changes in HCP's or its associated physician groups' anticipated ratio of medical expense to revenue can significantly impact HCP's financial results. Accordingly, the failure to adequately predict and control medical expenses and to make reasonable estimates and maintain adequate accruals for incurred but not reported claims, may have a material adverse effect on HCP's financial condition, results of operations or cash flows.

Historically, HCP's and its associated physician groups' medical expenses as a percentage of revenue have fluctuated. Factors that may cause medical expenses to exceed estimates include:

- the health status of members;
- higher than expected utilization of new or existing healthcare services or technologies;
- an increase in the cost of healthcare services and supplies, including pharmaceuticals, whether as a result of inflation or otherwise;
- changes to mandated benefits or other changes in healthcare laws, regulations, and practices;
- periodic renegotiation of provider contracts with specialist physicians, hospitals, and ancillary providers;
- periodic renegotiation of contracts with HCP's affiliated primary care physicians and specialists;
- changes in the demographics of the participating members and medical trends;
- contractual or claims disputes with providers, hospitals, or other service providers within a health plan's network;
- the occurrence of catastrophes, major epidemics, or acts of terrorism; and
- the reduction of health plan premiums.

Risk-sharing arrangements that HCP and its associated physician groups have with health plans and hospitals could result in their costs exceeding the corresponding revenues, which could reduce or eliminate any shared risk profitability.

Most of the agreements between health plans and HCP and its associated physician groups contain risk-sharing arrangements under which the physician groups can earn additional compensation from the health plans by coordinating the provision of quality, cost-effective healthcare to members. However, such arrangements may require the physician group to assume a portion of any loss sustained from these arrangements, thereby reducing HCP's net income. Under these risk-sharing arrangements, HCP and its associated physician groups are responsible for a portion of the cost of hospital services or other services that are not capitated. The terms of the particular risk-sharing arrangement allocate responsibility to the respective parties when the cost of services exceeds the related revenue, which results in a deficit, or permit the parties to share in any surplus amounts when actual costs are less than the related revenue. The amount of non-capitated medical and hospital costs in any period could be affected by factors beyond the control of HCP, such as changes in treatment protocols, new technologies, longer lengths of stay by the patient, and inflation. Certain of HCP's agreements with health plans stipulate that risk-sharing pool deficit amounts are carried forward to offset any future years' surplus amounts HCP would otherwise be entitled to receive. HCP accrues for any such risk-sharing deficits. To the extent that such non-capitated medical and hospital costs are higher than anticipated, revenue may not be sufficient to cover the risk-sharing deficits the health plans and HCP are responsible for, which could reduce HCP's revenues and profitability.

Renegotiation, renewal, or termination of capitation agreements with health plans could have a significant impact on HCP's future profitability.

Under most of HCP's and its associated physician groups' capitation agreements with health plans, the health plan is generally permitted to modify the benefit and risk obligations and compensation rights from time to time during the terms of the agreements. If a health plan exercises its right to amend its benefit and risk obligations and compensation rights, HCP and its associated physician groups are generally allowed a period of time to object to such amendment. If HCP or its associated physician group so objects, under some of the risk agreements, the relevant health plan may terminate the applicable agreement upon 90 to 180 days written notice. If HCP or its associated physician groups enter into capitation contracts or other risk sharing arrangements with unfavorable economic terms, or a capitation contract is amended to include unfavorable terms, HCP could, directly or indirectly through its contracts with its associated physician groups, suffer losses with respect to such contract. Since HCP does not negotiate with CMS or any health plan regarding the benefits to be provided under their Medicare Advantage plans, HCP often has just a few months to familiarize itself with each new annual package of benefits it is expected to offer. Depending on the health plan at issue and the amount of revenue associated with the health plan's risk agreement, the renegotiated terms or termination may have a material adverse effect on our HCP division and the Company's future revenues and profitability.

Laws regulating the corporate practice of medicine could restrict the manner in which HCP is permitted to conduct its business and the failure to comply with such laws could subject HCP to penalties or require a restructuring of HCP.

Some states have laws that prohibit business entities, such as HCP, from practicing medicine, employing physicians to practice medicine, exercising control over medical decisions by physicians (also known collectively as the corporate practice of medicine) or engaging in certain arrangements, such as fee-splitting, with physicians. In some states these prohibitions are expressly stated in a statute or regulation, while in other states the prohibition is a matter of judicial or regulatory interpretation. Of the states in which HCP currently operates, Arizona, California and Nevada prohibit the corporate practice of medicine, and other states may as well.

In Arizona, California and Nevada, HCP operates by maintaining long-term contracts with its associated physician groups which are each owned and operated by physicians and which employ or contract with additional physicians to provide physician services. Under these arrangements, HCP provides management services and, receives a management fee for providing non-medical management services; however, HCP does not represent that it offers medical services, and does not exercise influence or control over the practice of medicine by the physicians or the associated physician groups.

In addition to the above management arrangements, HCP has certain contractual rights relating to the orderly transfer of equity interests in certain of its associated Arizona, California and Nevada physician groups through succession agreements and other arrangements with their physician equity holders. However, such equity interests cannot be transferred to or held by HCP or by any non-professional organization. Accordingly, neither HCP nor HCP's subsidiaries directly own any equity interests in any physician groups in Arizona, California and Nevada. In the event that any of these associated physician groups fail to comply with the management arrangement or any management arrangement is terminated and/or HCP is unable to enforce its contractual rights over the orderly transfer of equity interests in its associated physician groups, such events could have a material adverse effect on HCP's business, financial condition or results of operations.

It is possible that a state regulatory agency or a court could determine that HCP's agreements with physician equity holders of certain managed Arizona, California and Nevada associated physician groups as described above, either independently or coupled with the management services agreements with such associated physician groups, are in violation of the corporate practice of medicine doctrine. As a result, these arrangements could be deemed invalid, potentially resulting in a loss of revenues and an adverse effect on results of operations derived from such associated physician groups. Such a determination could force a restructuring of HCP's management arrangements with associated physician groups in Arizona, California and/or Nevada, which might include revisions of the management services agreements, including a modification of the management fee and/or establishing an alternative structure, which would permit HCP to contract with a physician network without violating the corporate practice of medicine prohibition. There can be no assurance that such a restructuring would be feasible, or that it could be accomplished within a reasonable time frame without a material adverse effect on HCP's operations and financial results. In December 2013, DHPP obtained a restricted Knox-Keene license in California, which permits DHPP to contract with health plans in California to accept global risk without violating the corporate practice of medicine prohibition. However, HCP and HCP's Arizona and Nevada associated physician groups, as well as those physician equity holders of associated physician groups who are subject to succession agreements with HCP, could be subject to criminal or civil penalties or an injunction for practicing medicine without a license or aiding and abetting the unlicensed practice of medicine.

If HCP's agreements or arrangements with any physician equity holder(s) of associated physicians, physician groups, or IPAs are deemed invalid under state law, including laws against the corporate practice of medicine, or federal law, or are terminated as a result of changes in state law, or if there is a change in accounting standards by the Financial Accounting Standards Board (FASB) or the interpretation thereof affecting consolidation of entities, it could impact HCP's consolidation of total revenues derived from such associated physician groups.

HCP's financial statements are consolidated in accordance with applicable accounting standards and include the accounts of its majority-owned subsidiaries and certain non-owned HCP-associated and managed physician groups. Such consolidation for accounting and/or tax purposes does not, is not intended to, and should not be deemed to, imply or provide to HCP any control over the medical or clinical affairs of such physician groups. In the event of a change in accounting standards promulgated by FASB or in interpretation of its standards, or if there were an adverse determination by a regulatory agency or a court, or a change in state or federal law relating to the ability to maintain present agreements or arrangements with such physician groups, HCP may not be permitted to continue to consolidate the total revenues of such organizations. A change in accounting for consolidation with respect to HCP's present agreement or arrangements would diminish HCP's reported revenues but would not be expected to materially adversely affect its reported results of operations, while regulatory or legal rulings or changes in law interfering with HCP's ability to maintain its present agreements or arrangements could materially diminish both revenues and results of operations.

If DHPP is not able to satisfy financial solvency or other regulatory requirements, DaVita HealthCare Partners could become subject to sanctions and its license to do business in California could be limited, suspended or terminated.

Knox-Keene requires healthcare service plans operating in California to comply with financial solvency and other requirements overseen by the DMHC. Under Knox-Keene, DHPP is required to, among other things:

- Maintain, at all times, a minimum TNE;
- Submit periodic financial solvency reports to the DMHC containing various data regarding performance and financial solvency;
- Comply with extensive regulatory requirements; and
- Submit to periodic regulatory audits and reviews concerning DaVita HealthCare Partner Plan operations and compliance with Knox-Keene.

In the event that DaVita HealthCare Partners Plan is not in compliance with the provisions of Knox-Keene, it could be subject to sanctions, or limitations on, or suspension of its license to do business in California.

If HCP's associated physician group is not able to satisfy the California DMHC's financial solvency requirements, HCP's associated physician group could become subject to sanctions and HCP's ability to do business in California could be limited or terminated.

The California DMHC has instituted financial solvency regulations to monitor the financial solvency of capitated physician groups. Under these regulations, HCP's associated physician group is required to, among other things:

- Maintain, at all times, a minimum cash-to-claims ratio (where cash-to-claims ratio means the organization's cash, marketable securities, and certain qualified receivables, divided by the organization's total unpaid claims liability). The regulation currently requires a cash-to-claims ratio of 0.75.
- Submit periodic reports to the California DMHC containing various data and attestations regarding performance and financial solvency, including incurred but not reported calculations and documentation, and attestations as to whether or not the organization was in compliance with Knox-Keene requirements related to claims payment timeliness had maintained positive TNE (i.e., at least $1.00), and had maintained positive working capital (i.e., at least $1.00).

In the event that HCP's associated physician group is not in compliance with any of the above criteria, HCP's associated physician group could be subject to sanctions, or limitations on, or removal of, its ability to do business in California.

Reductions in Medicare Advantage health plan reimbursement rates stemming from recent healthcare reforms and any future related regulations may negatively impact HCP's business, revenue and profitability.

A significant portion of HCP's revenue is directly or indirectly derived from the monthly premium payments paid by CMS to health plans for medical services provided to Medicare Advantage enrollees. As a result, HCP's results of operations are, in part, dependent on government funding levels for Medicare Advantage programs. Any changes that limit or reduce Medicare Advantage reimbursement levels, such as reductions in or limitations of reimbursement amounts or rates under programs, reductions in funding of programs, expansion of benefits without adequate funding, elimination of coverage for certain benefits, or elimination of coverage for certain individuals or treatments under programs, could have a material adverse effect on HCP's revenues, earnings and cash flows.

On April 6, 2015, CMS issued its final rule establishing the 2016 Medicare Advantage benchmark payment rates announcing the model it will use to blend risk acuity scores. In 2016, CMS will fully implement the 2014 CMS-Hierarchical Condition Categories (CMS-HCC) Model and will not blend the risk scores calculated using the 2013 CMS-HCC model. Based upon our preliminary analysis of the final rule, we estimate that the reduction in 2016 rates, including adjustments for the new Affordable Care Act (ACA) blended benchmark county rates and qualifying bonuses, will lead to a reduction in Medicare Advantage rates to HCP of approximately 2%, or a net impact of approximately $50 million to our 2016 operating income. This compares to an industry average rate increase of approximately 1.25% as indicated by CMS in its final rule regarding the 2016 rates. The final impact of 2016 Medicare Advantage rates can vary from this estimate and will be impacted by the relative growth of HCP's Medicare Advantage patient volumes across markets as well as by the benefit plan designs submitted. It is possible that we underestimated the impact of the 2016 Medicare Advantage rates on our business, which may have a material adverse effect on our financial position, results of operation or cash flows.

This more significant decline in Medicare Advantage rates for us compared to the industry average is driven by a larger-than-average decline associated with CMS's modification to the risk adjustment model calculation. The move to the 2014 CMS-HCC model negatively affects us and other providers like us who have differentially invested in wellness and prevention programs for patients with chronic conditions, because the 2014 model tends to over-predict costs for very low-cost beneficiaries and under-predict costs for very high-cost beneficiaries.

In addition, we took impairment charges against the goodwill of certain of our HCP reporting units in the fourth quarter of 2015 related to underperformance of the business in recent quarters, as well as changes in other market conditions, including government reimbursement cuts and our expected ability to mitigate them. We may also need to take additional goodwill impairment charges against earnings in a future period, depending on the impact of this decrease in rates on the value of our HCP reporting units. A goodwill impairment occurs when the carrying value of a reporting unit's goodwill is in excess of its implied fair value, and the amount of such non-cash charge, if any, could be significant. In estimating the fair value of our HCP reporting units, we will update our forecasts for each HCP reporting unit to reflect the expected future cash flows that we believe market participants would use in determining the fair values of our HCP reporting units if they were to acquire these reporting units. We will also use certain estimates and key assumptions in determining our estimate of these fair values, including discount and long-term growth rates, market data and future reimbursement rates. Our estimates of the fair value of our HCP reporting units could differ from the actual fair values a market participant would pay for these reporting units.

HCP's Medicare Advantage revenues may continue to be volatile in the future, which could have a material impact on HCP's ongoing financial performance.

The Health Reform Acts contain a number of provisions that negatively impact Medicare Advantage plans, which may each have an adverse effect on HCP's revenues, earnings, and cash flows. These provisions include the following:

- Medicare Advantage benchmarks for 2011 were frozen at 2010 levels. Beginning in 2012, Medicare Advantage benchmark rates are being phased down from prior levels to levels that are between 95% and 115% of the Medicare FFS costs, depending on a plan's geographic area. If our costs escalate faster than can be absorbed by the level of revenues implied by these benchmark rates, then it could have a significant negative impact on HCP's earnings and cash flows.

- Rebates received by Medicare Advantage plans that underbid based on payment benchmarks will be reduced, with larger reductions for plans failing to receive certain quality ratings.

- The Secretary of HHS has been granted the explicit authority to deny Medicare Advantage plan bids that propose significant increases in cost sharing or decreases in benefits. If the bids submitted by plans contracted with HCP are denied, this would have a significant negative impact on HCP's revenues, earnings and cash flows.

- Medicare Advantage plans with medical loss ratios below 85% are required to pay a rebate to the Secretary of HHS. The rebate amount is the total revenue under the contract year multiplied by the difference between 85% and the plan's actual medical loss ratio. The Secretary of HHS will halt enrollment in any plan failing to meet this ratio for three consecutive years, and terminate any plan failing to meet the ratio for five consecutive years. If an HCP-contracting Medicare Advantage plan experiences a limitation on enrollment or is otherwise terminated from the Medicare Advantage program, HCP may suffer materially adverse consequences to its business or financial condition.

- Prescription drug plans are now required to cover all drugs on a list developed by the Secretary of HHS, which could increase the cost of providing care to Medicare Advantage enrollees, and thereby reduce HCP's revenues and earnings. The Medicare Part D premium subsidy for high-income beneficiaries has been reduced by 25%, which could lower the number of Medicare Advantage enrollees, which would have a negative impact on HCP's revenues, earnings and cash flows.

- CMS increased coding intensity adjustments for Medicare Advantage plans beginning in 2014 and continuing through 2018, which reduces CMS payments to Medicare Advantage plans, which in turn will likely reduce the amounts payable to HCP and its associated physicians, physician groups, and IPAs under its capitation agreements.

The President's 2016 budget proposed nearly $500 billion in cuts to Medicare, Medicaid and other programs run by HHS over the next decade. Although the majority of the cuts were not targeted at Medicare Advantage plans, the broad cuts could signal further downward pressure on reimbursement to Medicare providers and Medicare Advantage plans, which would have a negative impact on HCP's revenues, earnings and cash flows. Future budget cuts could impact HCP's revenues.

There is uncertainty regarding both Medicare Advantage payment rates and beneficiary enrollment, which, if reduced as a result of the implementation of the Health Reform Acts, would reduce HCP's overall revenues and net income. For example, although the CBO predicted in 2012 that Medicare Advantage participation would drop precipitously by 2020, in 2013 the CBO reversed its prediction and instead predicted that enrollment in Medicare Advantage could increase by up to 50% in the next decade. Although Medicare Advantage enrollment increased by approximately 5.6 million, or by 50 percent, between the enactment of the ACA in 2010 and 2015, there can be no assurance that this trend will continue. Further, fluctuation in Medicare Advantage payment rates were evidenced by CMS's announcement in its final 2015 Call Letter that Medicare Advantage rates would rise an average of 0.4% in 2015, instead of falling 1.9% as it had predicted in February 2014. On April 6, 2015, CMS announced its Medicare Advantage rates for 2016. See above for further details. Uncertainty over Medicare Advantage enrollment and payment rates present a continuing risk to HCP's business.

Medicare Advantage enrollment continues to be highly concentrated among a few Medicare Advantage plans, both nationally and in local markets. In approximately 15 states, more than half of all enrollees are in plans offered by one company – an indicator that those markets may lack competition. Consolidation among Medicare Advantage plans, or the Medicare programs failure to attract additional plans to participate in the Medicare Advantage program, could have a negative impact of HCP's revenues, earnings, and/or cash flows.

HCP's operations are dependent on competing health plans and, at times, a health plan's and HCP's economic interests may diverge.

For the year ended December 31, 2015, 61% of HCP's consolidated capitated medical revenues were earned through contracts with three health plans.

HCP expects that, going forward, substantially all of its revenue will continue to be derived from its contracts with health plans. Each health plan may immediately terminate any of HCP's contracts and/or any individual credentialed physician upon the occurrence of certain events. They may also amend the material terms of the contracts under certain circumstances. Failure to maintain the contracts on favorable terms, for any reason, would materially and adversely affect HCP's results of operations and financial condition. A material decline in the number of members could also have a material adverse effect on HCP's results of operations.

Notwithstanding each health plan's and HCP's current shared interest in providing service to HCP's members who are enrolled in the subject health plans, the health plans may have different and, at times, opposing economic interests from those of HCP. The health plans provide a wide range of health insurance services across a wide range of geographic regions, utilizing a vast network of providers. As a result, they and HCP may have different views regarding the proper pricing of services and/or the proper pricing of the various service providers in their provider networks, the cost of which HCP bears to the extent that the services of such service providers are utilized. These health plans may also have different views than HCP regarding the efforts and expenditures that they, HCP, and/or other service providers should make to achieve and/or maintain various quality ratings. In addition, several health plans have acquired or announced their intent to acquire provider organizations. If health plans with which HCP contracts acquire a significant number of provider organizations, they may not continue to contract with HCP or contract on less favorable terms or seek

to prevent HCP from acquiring or entering into arrangements with certain providers. Similarly, as a result of changes in laws, regulations, consumer preferences, or other factors, the health plans may find it in their best interest to provide health insurance services pursuant to another payment or reimbursement structure. In the event HCP's interests diverge from the interests of the health plans, HCP may have limited recourse or alternative options in light of its dependence on these health plans. There can be no assurances that HCP will continue to find it mutually beneficial to work with these health plans. As a result of various restrictive provisions that appear in some of the managed care agreements with health plans, HCP may at times have limitations on its ability to cancel an agreement with a particular health plan and immediately thereafter contract with a competing health plan with respect to the same service area.

HCP and its associated physicians, physician groups and IPAs and other physicians may be required to continue providing services following termination or renegotiation of certain agreements with health plans.

There are circumstances under federal and state law pursuant to which HCP and its associated physician groups, IPAs, and other physicians could be obligated to continue to provide medical services to HCP members in their care following a termination of their applicable risk agreement with health plans and termination of the receipt of payments thereunder. In certain cases, this obligation could require the physician group or IPA to provide care to such member following the bankruptcy or insolvency of a health plan. Accordingly, the obligations to provide medical services to HCP members (and the associated costs) may not terminate at the time the applicable agreement with the health plan terminates, and HCP may not be able to recover its cost of providing those services from the health plan, which could have a material adverse effect on HCP's financial condition, results of operations, and/or cash flows.

HCP operates primarily in Arizona, California, Florida, Nevada, New Mexico and Colorado and may not be able to successfully establish a presence in new geographic regions.

HCP derives substantially all of its revenue from operations in Arizona, California, Florida, Nevada, New Mexico and Colorado (hereinafter referred to as the Existing Geographic Regions). As a result, HCP's exposure to many of the risks described herein is not mitigated by a greater diversification of geographic focus. Furthermore, due to the concentration of HCP's operations in the Existing Geographic Regions, it may be adversely affected by economic conditions, natural disasters (such as earthquakes or hurricanes), or acts of war or terrorism that disproportionately affect the Existing Geographic Regions as compared to other states and geographic markets.

To expand the operations of its network outside of the Existing Geographic Regions, HCP must devote resources to identifying and exploring such perceived opportunities. Thereafter, HCP must, among other things, recruit and retain qualified personnel, develop new offices, establish potentially new relationships with one or more health plans, and establish new relationships with physicians and other healthcare providers. The ability to establish such new relationships may be significantly inhibited by competition for such relationships and personnel in the healthcare marketplace in the targeted new geographic regions. Additionally, HCP may face the risk that a substantial portion of the patients served in a new geographic area may be enrolled in a Medicare FFS program and will not desire to transition to a Medicare Advantage program, such as those offered through the health plans that HCP serves, or they may enroll with other health plans with whom HCP does not contract to receive services, which could reduce substantially HCP's perceived opportunity in such geographic area. In addition, if HCP were to seek to expand outside of the Existing Geographic Regions, HCP would be required to comply with laws and regulations of states that may differ from the ones in which it currently operates, and could face competitors with greater knowledge of such local markets. HCP anticipates that any geographic expansion may require it to make a substantial investment of management time, capital, and/or other resources. There can be no assurance that HCP will be able to establish profitable operations or relationships in any new geographic markets.

Reductions in the quality ratings of the health plans HCP serves could have an adverse effect on its results of operations, financial condition, and/or cash flow.

As a result of the Health Reform Acts, HCP anticipates that the level of reimbursement each health plan receives from CMS will be dependent, in part, upon the quality rating of the Medicare plan that such health plan serves. Such ratings are expected to impact the percentage of any cost savings rebate and any bonuses earned by such health plan. Since a significant portion of HCP's revenue is expected to be calculated as a percentage of CMS reimbursements received by these health plans with respect to HCP members, reductions in the quality ratings of a health plan that HCP serves could have an adverse effect on its results of operations, financial condition, and/or cash flows. In addition, CMS has announced its intention to terminate any plan that has a rating of less than three stars for three consecutive years. Medicare Advantage plans with five stars are permitted to conduct enrollment throughout the year and enrollees in plans with 4.5 or fewer stars are permitted to change plans during the year. Given each health plan's control of its plans and the many other providers that serve such plans, HCP believes that it will have limited ability to influence the overall quality rating of any such plan. Accordingly, since low quality ratings can potentially lead to the termination of a plan that HCP serves, HCP may not be able to prevent the potential termination of a contracting plan or a shift of patients to other plans based upon quality issues which could, in turn, have an adverse effect on HCP's results of operations, financial condition, and/or cash flows.

HCP's records and submissions to a health plan may contain inaccurate or unsupportable information regarding risk adjustment scores of members, which could cause HCP to overstate or understate its revenue and subject it to various penalties.

HCP, on behalf of itself and its associated physicians, physician groups and IPAs, submits to health plans claims and encounter data that support the risk adjustment factor (RAF) scores attributable to members. These RAF scores determine, in part, the revenue to which the health plans and, in turn, HCP is entitled for the provision of medical care to such members. The data submitted to CMS by each health plan is based, in part, on medical charts and diagnosis codes prepared and submitted by HCP. Each health plan generally relies on HCP and its employed or affiliated physicians to appropriately document and support such RAF data in HCP's medical records. Each health plan also relies on HCP and its employed or affiliated physicians to appropriately code claims for medical services provided to members. Erroneous claims and erroneous encounter records and submissions could result in inaccurate PMPM fee revenue and risk adjustment payments, which may be subject to correction or retroactive adjustment in later periods. This corrected or adjusted information may be reflected in financial statements for periods subsequent to the period in which the revenue was recorded. HCP might also need to refund a portion of the revenue that it received, which refund, depending on its magnitude, could damage its relationship with the applicable health plan and could have a material adverse effect on HCP's results of operations, financial condition or cash flows. We have identified a potentially improper historical HCP coding practice related to a particular condition, which was discontinued following our acquisition of HCP. We have notified CMS and we intend to cooperate with government authorities to address this issue. We are continuing to review other HCP coding practices.

Additionally, CMS audits Medicare Advantage plans for documentation to support RAF-related payments for members chosen at random. The Medicare Advantage plans ask providers to submit the underlying documentation for members that they serve. It is possible that claims associated with members with higher RAF scores could be subject to more scrutiny in a CMS or plan audit. There is a possibility that a Medicare Advantage plan may seek repayment from HCP should CMS make any payment adjustments to the Medicare Advantage plan as a result of its audits. The plans also may hold HCP liable for any penalties owed to CMS for inaccurate or unsupportable RAF scores provided by HCP. In addition, HCP could be liable for penalties to the government.

CMS has indicated that payment adjustments will not be limited to RAF scores for the specific Medicare Advantage enrollees for which errors are found but may also be extrapolated to the entire Medicare Advantage plan subject to a particular CMS contract. CMS has described its audit process as plan-year specific and stated that it will not extrapolate audit results for plan years prior to 2011. Because CMS has not stated otherwise, there is a risk that payment adjustments made as a result of one plan year's audit would be extrapolated to prior plan years after 2011.

There can be no assurance that a health plan will not be randomly selected or targeted for review by CMS or that the outcome of such a review will not result in a material adjustment in HCP's revenue and profitability, even if the information HCP submitted to the plan is accurate and supportable.

Separately, as described in further detail below, on March 13, 2015, JSA HealthCare Corporation (JSA), a subsidiary of HCP, received a subpoena from the OIG that relates, in part, to risk adjustment practices and data. On June 18, 2015, we received a subpoena from the OIG requesting information relating to our and our subsidiaries', including HCP and its subsidiary JSA's, provision of services to Medicare Advantage plans and related patient diagnosis coding and risk adjustment submissions and payments.

A failure to accurately estimate incurred but not reported medical expense could adversely affect HCP's profitability.

Patient care costs include estimates of future medical claims that have been incurred by the patient but for which the provider has not yet billed HCP. These claim estimates are made utilizing actuarial methods and are continually evaluated and adjusted by management, based upon HCP's historical claims experience and other factors, including an independent assessment by a nationally recognized actuarial firm. Adjustments, if necessary, are made to medical claims expense and capitated revenues when the assumptions used to determine HCP's claims liability changes and when actual claim costs are ultimately determined.

Due to the inherent uncertainties associated with the factors used in these estimates and changes in the patterns and rates of medical utilization, materially different amounts could be reported in HCP's financial statements for a particular period under different conditions or using different, but still reasonable, assumptions. It is possible that HCP's estimates of this type of claim may be inadequate in the future. In such event, HCP's results of operations could be adversely impacted. Further, the inability to estimate these claims accurately may also affect HCP's ability to take timely corrective actions, further exacerbating the extent of any adverse effect on HCP's results.

HCP faces certain competitive threats which could reduce HCP's profitability and increase competition for patients.

HCP faces certain competitive threats based on certain features of the Medicare programs, including the following:

- As a result of the direct and indirect impacts of the Health Reform Acts, many Medicare beneficiaries may decide that an original Medicare FFS program is more attractive than a Medicare Advantage plan. As a result, enrollment in the health plans HCP serves may decrease.
- Managed care companies offer alternative products such as regional preferred provider organizations (PPOs) and private FFS plans. Medicare PPOs and private FFS plans allow their patients more flexibility in selecting physicians than Medicare Advantage health plans, which typically require patients to coordinate care with a primary care physician. The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 has encouraged the creation of regional PPOs through various incentives, including certain risk corridors, or cost reimbursement provisions, a stabilization fund for incentive payments, and special payments to hospitals not otherwise contracted with a Medicare Advantage plan that treat regional plan enrollees. The formation of regional Medicare PPOs and private FFS plans may affect HCP's relative attractiveness to existing and potential Medicare patients in their service areas.
- The payments for the local and regional Medicare Advantage plans are based on a competitive bidding process that may indirectly cause a decrease in the amount of the PMPM fee or result in an increase in benefits offered.
- The annual enrollment process and subsequent lock-in provisions of the Health Reform Acts may adversely affect HCP's level of revenue growth as it will limit the ability of a health plan to market to and enroll new Medicare beneficiaries in its established service areas outside of the annual enrollment period.
- CMS allows Medicare beneficiaries who are enrolled in a Medicare Advantage plan with a quality rating of 4.5 stars or less to enroll in a 5-star rated Medicare Advantage plan at any time during the benefit year. Therefore, HCP may face a competitive disadvantage in recruiting and retaining Medicare beneficiaries.

In addition to the competitive threats intrinsic to the Medicare programs, competition among health plans and among healthcare providers may also have a negative impact on HCP's profitability. For example, due to the large population of Medicare beneficiaries, HCP's Existing Geographic Regions have become increasingly attractive to health plans that may compete with HCP. HCP may not be able to continue to compete profitably in the healthcare industry if additional competitors enter the same market. If HCP cannot compete profitably, the ability of HCP to compete with other service providers that contract with competing health plans may be substantially impaired.

HCP competes directly with various regional and local companies that provide similar services in HCP's Existing Geographic Regions. HCP's competitors vary in size and scope and in terms of products and services offered. HCP believes that some of its competitors and potential competitors may be significantly larger than HCP and have greater financial, sales, marketing, and other resources. Furthermore, it is HCP's belief that some of its competitors may make strategic acquisitions or establish cooperative relationships among themselves.

A disruption in HCP's healthcare provider networks could have an adverse effect on HCP's operations and profitability.

In any particular service area, healthcare providers or provider networks could refuse to contract with HCP, demand higher payments, or take other actions that could result in higher healthcare costs, disruption of benefits to HCP's members, or difficulty in meeting applicable regulatory or accreditation requirements. In some service areas, healthcare providers or provider networks may have significant market positions. If healthcare providers or provider networks refuse to contract with HCP, use their market position to negotiate favorable contracts, or place HCP at a competitive disadvantage, then HCP's ability to market or to be profitable in those service areas could be adversely affected. HCP's provider networks could also be disrupted by the financial insolvency of a large provider group. Any disruption in HCP's provider networks could result in a loss of members or higher healthcare costs.

HCP's revenues and profits could be diminished if HCP fails to retain and attract the services of key primary care physicians.

Key primary care physicians with large patient enrollment could retire, become disabled, terminate their provider contracts, get lured away by a competing independent physician association or medical group, or otherwise become unable or unwilling to continue practicing medicine or contracting with HCP or its associated physicians, physician groups, or IPAs. In addition, HCP's associated physicians, physician groups and IPAs could view the business model as unfavorable or unattractive to such providers, which could cause such associated physicians, physician groups or IPAs to terminate their relationships with HCP. Moreover, given limitations relating to the enforcement of post-termination noncompetition covenants in California, it would be difficult to restrict a primary care physician from competing with HCP's associated physicians, physician groups, or IPAs. As a result, members who have been served

by such physicians could choose to enroll with competitors' physician organizations or could seek medical care elsewhere, which could reduce HCP's revenues and profits. Moreover, HCP may not be able to attract new physicians to replace the services of terminating physicians or to service its growing membership.

Participation in Accountable Care Organization programs is new and subject to federal regulation, supervision, and evolving regulatory developments and may result in financial liability.

The Health Reform Acts established Medicare Shared Savings Programs (MSSP) for ACOs, which took effect in January 2012. Under the MSSP, eligible organizations are accountable for the quality, cost and overall care of Medicare beneficiaries assigned to an ACO and may be eligible to share in any savings below a specified benchmark amount. The Secretary of HHS is also authorized, but not required, to use capitation payment models with ACOs. HCP has formed an MSSP ACO through a subsidiary, which operates in California, Florida, and Nevada and is evaluating whether to participate in more ACOs in the future. The continued development and expansion of ACOs will have an uncertain impact on HCP's revenue and profitability. We also are participating as a dialysis provider in Arizona, Florida, New Jersey, and Pennsylvania for the Innovation Center's CEC Model.

The ACO programs are relatively new and therefore operational and regulatory guidance is limited. It is possible that the operations of HCP's subsidiary ACO may not fully comply with current or future regulations and guidelines applicable to ACOs, may not achieve quality targets or cost savings, or may not attract or retain sufficient physicians or patients to allow HCP to meet its objectives. Additionally, poor performance could put the HCP ACO at financial risk with a potential obligation to CMS. Traditionally, other than FFS billing by the medical clinics and healthcare facilities operated by HCP, HCP has not directly contracted with CMS and has not operated any health plans or provider sponsored networks. Therefore, HCP may not have the necessary experience, systems, or compliance to successfully achieve a positive return on its investment in the ACO or to avoid financial or regulatory liability. HCP believes that its historical experience with fully delegated managed care will be applicable to operation of its subsidiary ACO, but there can be no such assurance.

California hospitals may terminate their agreements with HCPAMG or reduce the fees they pay to HCP.

In California, HCPAMG maintains significant hospital arrangements designed to facilitate the provision of coordinated hospital care with those services provided to members by HCPAMG and its associated physicians, physician groups, and IPAs. Through contractual arrangements with certain key hospitals, HCPAMG provides utilization review, quality assurance, and other management services related to the provision of patient care services to members by the contracted hospitals and downstream hospital contractors. In the event that any one of these key hospital agreements is amended in a financially unfavorable manner or is otherwise terminated, such events could have a material adverse effect on HCP's financial condition, and results of operations.

HCP's professional liability and other insurance coverage may not be adequate to cover HCP's potential liabilities.

HCP maintains primary professional liability insurance and other insurance coverage through California Medical Group Insurance Company, Risk Retention Group, an Arizona corporation in which HCP is the majority owner, and through excess coverage contracted through third-party insurers. HCP believes such insurance is adequate based on its review of what it believes to be all applicable factors, including industry standards. Nonetheless, potential liabilities may not be covered by insurance, insurers may dispute coverage or may be unable to meet their obligations, the amount of insurance coverage and/or related reserves may be inadequate, or the amount of any HCP self-insured retention may be substantial. There can be no assurances that HCP will be able to obtain insurance coverage in the future, or that insurance will continue to be available on a cost-effective basis, if at all. Moreover, even if claims brought against HCP are unsuccessful or without merit, HCP would have to defend itself against such claims. The defense of any such actions may be time-consuming and costly and may distract HCP management's attention. As a result, HCP may incur significant expenses and may be unable to effectively operate its business.

Changes in the rates or methods of third-party reimbursements may adversely affect HCP operations.

Any negative changes in governmental capitation or FFS rates or methods of reimbursement for the services HCP provides could have a significant adverse impact on HCP's revenue and financial results. Since governmental healthcare programs generally reimburse on a fee schedule basis rather than on a charge-related basis, HCP generally cannot increase its revenues from these programs by increasing the amount it charges for its services. Moreover, if HCP's costs increase, HCP may not be able to recover its increased costs from these programs. Government and private payors have taken and may continue to take steps to control the cost, eligibility for, use, and delivery of healthcare services due to budgetary constraints, and cost containment pressures as well as other financial issues. HCP believes that these trends in cost containment will continue. These cost containment measures, and other market changes in non-governmental insurance plans have generally restricted HCP's ability to recover, or shift to non-governmental payors, any increased costs that HCP experiences. HCP's business and financial operations may be materially affected by these cost containment measures, and other market changes.

HCP's business model depends on numerous complex management information systems and any failure to successfully maintain these systems or implement new systems could materially harm HCP's operations and result in potential violations of healthcare laws and regulations.

HCP depends on a complex, specialized, and integrated management information system and standardized procedures for operational and financial information, as well as for HCP's billing operations. HCP may experience unanticipated delays, complications, or expenses in implementing, integrating, and operating these integrated systems. Moreover, HCP may be unable to enhance its existing management information system or implement new management information systems where necessary. HCP's management information system may require modifications, improvements, or replacements that may require both substantial expenditures as well as interruptions in operations. HCP's ability to implement and operate its integrated systems is subject to the availability of information technology and skilled personnel to assist HCP in creating and maintaining these systems.

HCP's failure to successfully implement and maintain all of its systems could have a material adverse effect on its business, financial condition, and results of operations. For example, HCP's failure to successfully operate its billing systems could lead to potential violations of healthcare laws and regulations. If HCP is unable to handle its claims volume, or if HCP is unable to pay claims timely, HCP may become subject to a health plan's corrective action plan or de-delegation until the problem is corrected, and/or termination of the health plan's agreement with HCP. This could have a material adverse effect on HCP's operations and profitability. In addition, if HCP's claims processing system is unable to process claims accurately, the data HCP uses for its incurred but not reported (IBNR) estimates could be incomplete and HCP's ability to accurately estimate claims liabilities and establish adequate reserves could be adversely affected. Finally, if HCP's management information systems are unable to function in compliance with applicable state or federal rules and regulations, including, without limitation, medical information confidentiality laws such as HIPAA, possible penalties and fines due to this lack of compliance could have a material adverse effect on HCP's financial condition, and results of operations.

HCP may be impacted by eligibility changes to government and private insurance programs.

Due to potential decreased availability of healthcare through private employers, the number of patients who are uninsured or participate in governmental programs may increase. The Health Reform Acts have increased the participation of individuals in the Medicaid program in states that elected to participate in the expanded Medicaid coverage. A shift in payor mix from managed care and other private payors to government payors as well as an increase in the number of uninsured patients may result in a reduction in the rates of reimbursement to HCP or an increase in uncollectible receivables or uncompensated care, with a corresponding decrease in net revenue. Changes in the eligibility requirements for governmental programs such as the Medicaid program under the Health Reform Acts and state decisions on whether to participate in the expansion of such programs also could increase the number of patients who participate in such programs and the number of uninsured patients. Even for those patients who remain in private insurance plans, changes to those plans could increase patient financial responsibility, resulting in a greater risk of uncollectible receivables. These factors and events could have a material adverse effect on HCP's business, financial condition, and results of operations.

Negative publicity regarding the managed healthcare industry generally or HCP in particular could adversely affect HCP's results of operations or business.

Negative publicity regarding the managed healthcare industry generally, the Medicare Advantage program or HCP in particular, may result in increased regulation and legislative review of industry practices that further increase HCP's costs of doing business and adversely affect HCP's results of operations or business by:

- requiring HCP to change its products and services;
- increasing the regulatory, including compliance, burdens under which HCP operates, which, in turn, may negatively impact the manner in which HCP provides services and increase HCP's costs of providing services;
- adversely affecting HCP's ability to market its products or services through the imposition of further regulatory restrictions regarding the manner in which plans and providers market to Medicare Advantage enrollees; or
- adversely affecting HCP's ability to attract and retain members.

Risk factors related to our overall business and ownership of our common stock:

If we fail to adhere to all of the complex government regulations that apply to our business, we could suffer severe consequences that would substantially reduce our revenues, earnings, cash flows and stock price.

Our operations are subject to extensive federal, state and local government regulations, including Medicare and Medicaid payment rules and regulations, federal and state anti-kickback laws, the Stark Law and analogous state self-referral prohibition statutes, Federal Acquisition Regulations, the FCA and federal and state laws regarding the collection, use and disclosure of patient health information and the storage, handling and administration of pharmaceuticals. The Medicare and Medicaid reimbursement rules related to claims submission, enrollment and licensing requirements, cost reporting, and payment processes impose complex and extensive requirements upon dialysis providers as well. A violation or departure from any of these legal requirements may result in government audits, lower reimbursements, significant fines and penalties, the potential loss of certification, recoupment efforts or voluntary repayments.

We endeavor to comply with all legal requirements, however, there is no guarantee that we will be able to adhere to all of the complex government regulations that apply to our business. We further endeavor to structure all of our relationships with physicians to comply with state and federal anti-kickback and physician self-referral laws. We utilize considerable resources to monitor the laws and implement necessary changes. However, the laws and regulations in these areas are complex and often subject to varying interpretations. For example, if an enforcement agency were to challenge the level of compensation that we pay our medical directors or the number of medical directors whom we engage, we could be required to change our practices, face criminal or civil penalties, pay substantial fines or otherwise experience a material adverse effect as a result of a challenge to these arrangements. In addition, the FCA amended the Social Security Act to make the knowing failure to report and return overpayments within 60 days of when the overpayment was identified an obligation for purposes of the FCA, 31 U.S.C. § 3729(b)(3). These amendments could subject our procedures for identifying and processing overpayments to greater scrutiny. We have made significant investments in new resources to decrease the time it takes to identify and process overpayments and we may be required to make additional investments in the future. An acceleration in our ability to identify and process overpayments could result in us refunding overpayments to government and other payors more rapidly than we have in the past which could have a material adverse effect on our operating cash flows. In the fourth quarter of 2015, we recorded an estimated accrual of $22 million for potential damages and liabilities associated with write-offs and discounts of patient co-payment obligations, and credits to payors for returns of prescriptions drugs related to our pharmacy business that were identified during the course of an internally-initiated compliance review. We have disclosed the results of this ongoing review to the government. We may accrue additional reserves for refunds and related damages and potential liabilities arising out of this review. Additionally, amendments to the federal Anti-Kickback Statute in the health reform law make claims tainted by anti-kickback violations potentially subject to liability under the FCA, including *qui tam* or whistleblower suits. We are subject to a CIA which, for our domestic dialysis business, requires us to report probable violations of criminal, civil or administrative laws applicable to any federal health care program for which penalties or exclusions may be authorized under applicable healthcare laws and regulations. See "If we fail to comply with our Corporate Integrity Agreement, we could be subject to substantial penalties and exclusion from participation in federal healthcare programs that may adversely impact our revenues, earnings and cash flows."

The penalties for a violation of the FCA range from $5,500 to $11,000 (adjusted for inflation) for each false claim plus three times the amount of damages caused by each such claim which generally means the amount received directly or indirectly from the government. Given the high volume of claims processed by our various operating units, the potential is high for substantial penalties in connection with any alleged FCA violations. The federal government has used the FCA to prosecute a wide variety of alleged false claims and fraud allegedly perpetrated against Medicare and state healthcare programs, including coding errors, billing for services not rendered, the submission of false cost reports, billing for services at a higher payment rate than appropriate, billing under a comprehensive code as well as under one or more component codes included in the comprehensive code and billing for care that is not considered medically necessary. In addition to the provisions of the FCA, which provide for civil enforcement, the federal government can use several criminal statutes to prosecute persons who are alleged to have submitted false or fraudulent claims for payment to the federal government. The Civil Investigative Demand (CID) received by our wholly owned pharmacy services subsidiary, DaVita Rx, LLC, specifically references that it is in connection with an FCA investigation concerning allegations that this subsidiary presented or caused to be presented false claims for payment to the government. See the risk factor that immediately follows below for further details.

If any of our operations are found to violate these or other government regulations, we could suffer severe consequences that would have a material adverse effect on our revenues, earnings, cash flows and stock price, including:

- Suspension or termination of our participation in government payment programs;
- Refunds of amounts received in violation of law or applicable payment program requirements;
- Loss of required government certifications or exclusion from government payment programs;
- Loss of licenses required to operate healthcare facilities or administer pharmaceuticals in some of the states in which we operate;
- Reductions in payment rates or coverage for dialysis and ancillary services and related pharmaceuticals;
- Criminal or civil liability, fines, damages or monetary penalties for violations of healthcare fraud and abuse laws, including the federal Anti-Kickback Statute, Stark Law violations, FCA, or other failures to meet regulatory requirements;
- Enforcement actions by governmental agencies and/or state claims for monetary damages by patients who believe their PHI has been used, disclosed or not properly safeguarded in violation of federal or state patient privacy laws, including but not limited to HIPAA or the Privacy Act of 1974;
- Mandated changes to our practices or procedures that significantly increase operating expenses;
- Imposition of and compliance with corporate integrity agreements that could subject us to ongoing audits and reporting requirements as well as increased scrutiny of our billing and business practices which could lead to potential fines;
- Termination of relationships with medical directors; and
- Harm to our reputation which could impact our business relationships, affect our ability to obtain financing and decrease access to new business opportunities.

We are the subject of a number of investigations by the federal government and a private civil suit, any of which could result in substantial penalties or awards against us, the imposition of certain obligations on our practices and procedures, exclusion from future participation in the Medicare, Medicaid and other federal healthcare programs and possible criminal penalties.

We are the subject of a number of investigations by the federal government. We have received subpoenas or other requests for documents from the federal government in connection with the Swoben private civil suit, the 2011 U.S. Attorney Medicaid investigation, the 2015 U.S. Attorney Transportation Investigation, the investigations underlying the two subpoenas regarding patient diagnosis coding received by HCP and its JSA subsidiary, the 2015 DOJ Vascular Access Investigation, and the 2016 U.S. Attorney Prescription Drug Investigation described below.

In the Swoben private civil suit, a relator filed a complaint against us in federal court under the FCA *qui tam* provisions, as well as the provision of the California False Claims Act. In July 2013, the court granted HCP's motion and dismissed with prejudice all of the claims in the Third Amended Complaint, and in October 2013 the plaintiff filed an appeal of the dismissal, which is currently pending.

Additionally, in March 2015, JSA, a subsidiary of HCP, received a subpoena from the OIG. We have been advised by an attorney with the Civil Division of the DOJ in Washington, D.C. that the subpoena relates to an ongoing civil investigation concerning Medicare Advantage service providers' risk adjustment practices and data, including identification and verification of patient diagnoses and factors used in making the diagnoses. The subpoena requests documents and information for the period from January 1, 2008 through December 31, 2013, for certain Medicare Advantage plans for which JSA provided services. It also requests information regarding JSA's communications about patient diagnoses as they relate to certain Medicare Advantage plans generally, and more specifically as related to two Florida physicians with whom JSA previously contracted.

In June 2015, we received a subpoena from the OIG. This civil subpoena covers the period from January 1, 2008 through the present and seeks production of a wide range of documents relating to our and our subsidiaries' (including HealthCare Partners and its subsidiary JSA HealthCare Corporation) provision of services to Medicare Advantage plans and related patient diagnosis coding and risk adjustment submissions and payments. Some of the information requested relates to a potentially improper historical HCP coding practice related to a particular condition. The practice in question was discontinued following our November 1, 2012 acquisition of HCP and, as we previously disclosed, we notified CMS of the coding practice and potential overpayments. In connection with the

HCP merger, we have certain indemnification rights against the sellers secured by escrow for any and all liabilities incurred. We can make no assurances that the indemnification and escrow would cover the full amount of our potential losses related to this matter. We are cooperating with the government and will gather and produce the requested information.

In November 2015, we announced that RMS Lifeline, Inc., a wholly owned subsidiary of ours that operates under the name Lifeline Vascular Access (Lifeline), received a CID from the DOJ. The CID relates to two vascular access centers in Florida that are part of Lifeline's vascular access business. The CID covers the period from January 1, 2008 through the present. We acquired these two centers in December 2012. Based on the language of the CID, the DOJ appears to be looking at whether the angiograms of ten patients performed at the two centers were medically unnecessary and therefore whether related claims filed with federal healthcare programs possibly violated the FCA. Lifeline does not perform dialysis services but instead provides vascular access management services for dialysis patients. We are in the process of producing the requested documents to the DOJ.

In early February 2016, we announced that our pharmacy services wholly owned subsidiary, DaVita Rx, received a CID from the U.S. Attorney's Office for the Northern District of Texas. Based on the language of the CID, it appears the government is conducting an FCA investigation concerning allegations that DaVita Rx presented or caused to be presented false claims for payment to the government for prescription medications. The CID covers the period from January 1, 2006 through the present. In the spring of 2015, we initiated an internal compliance review of DaVita Rx during which we identified potential billing and operational issues. We notified the government in September 2015 that we were conducting this review of DaVita Rx and began providing regular updates of our review. In the fourth quarter of 2015, we recorded an estimated accrual of $22 million for potential damages and liabilities associated with write-offs and discounts of patient co-payment obligations, and credits to payors for returns of prescriptions drugs, related to DaVita Rx that were identified during the course of this internal compliance review. We may accrue additional reserves for refunds and related damages and potential liabilities arising out of this review. Upon completion of our review, we filed a self-disclosure with the OIG in early February 2016 and we have been working to address and update the practices we identified in the self-disclosure, some of which overlaps with information requested by the U.S. Attorney's Office. We do not know if the U.S. Attorney's Office, which is part of the DOJ, knew when it served the CID on us that we were already in the process of developing a self-disclosure to the OIG. The OIG informed us in late February that our submission was not accepted. They indicated that the OIG is not expressing an opinion regarding the conduct disclosed or our legal positions. We intend to cooperate with the government in this matter.

Responding to subpoenas, investigations and civil suits as well as defending ourselves in such matters will continue to require management's attention and we will continue to incur significant legal expense. Any negative findings or certain terms and conditions that we might agree to accept as part of a negotiated resolution could result in substantial financial penalties or awards against or substantial payments made by us, the imposition of certain obligations on our practices and procedures, exclusion from future participation in the Medicare and Medicaid programs and, in certain cases, criminal penalties. It is possible that criminal proceedings may be initiated against us in connection with investigations by the federal government. To our knowledge, no proceedings have been initiated by the federal government against us at this time. At this time, we cannot predict the ultimate outcome of these inquiries, or the potential outcome of the claims in the relators' civil suit (except as described above), or the potential range of damages, if any. See Note 17 to the consolidated financial statements of this report for additional details regarding these and other matters.

Disruptions in federal government operations and funding create uncertainty in our industry and could have a material adverse effect on our revenues, earnings and cash flows and otherwise adversely affect our financial condition.

A substantial portion of our revenues is dependent on federal healthcare program reimbursement, and any disruptions in federal government operations could have a material adverse effect on our revenues, earnings and cash flows. If the U.S. government defaults on its debt, there could be broad macroeconomic effects that could raise our cost of borrowing funds, and delay or prevent our future growth and expansion. Any future federal government shutdown, U.S. government default on its debt and/or failure of the U.S. government to enact annual appropriations could have a material adverse effect on our revenues, earnings and cash flows. Additionally, disruptions in federal government operations may negatively impact regulatory approvals and guidance that are important to our operations, and create uncertainty about the pace of upcoming healthcare regulatory developments.

Changes in CMS diagnosis and inpatient procedure coding require us to make modifications to processes and information systems, which could result in significant development costs and which if unsuccessful could adversely affect our revenues, earnings and cash flows.

CMS has mandated the use of new patient codes for reporting medical diagnosis and inpatient procedures, referred to as ICD-10, which requires all providers, payors, clearinghouses, and billing services to utilize ICD-10 when submitting claims for payment. ICD-10 will affect diagnosis and inpatient procedure coding for everyone covered by HIPAA, not just those who submit Medicare or Medicaid claims. Claims for services provided on or after October 1, 2015 must use ICD-10 for medical diagnosis and inpatient procedures or they will not be paid. If our services, processes or information systems or those of our payors do not comply with ICD-

10 requirements at any future date, it could potentially delay or even reduce reimbursement payments to us. These delays or reductions could negatively impact our revenues, earnings and cash flows.

Federal and state privacy and information security laws are complex, and if we fail to comply with applicable laws, regulations and standards, including with respect to third-party service providers that utilize sensitive personal information on our behalf, or if we fail to properly maintain the integrity of our data, protect our proprietary rights to our systems, or defend against cybersecurity attacks, we may be subject to government or private actions due to privacy and security breaches, and our business, reputation, results of operations, financial position and cash flows could be materially and adversely affected.

We must comply with numerous federal and state laws and regulations governing the collection, dissemination, access, use, security and privacy of PHI, including HIPAA and its implementing privacy and security regulations, as amended by the federal HITECH Act and collectively referred to as HIPAA. If we fail to comply with applicable privacy and security laws, regulations and standards, including with respect to third-party service providers that utilize sensitive personal information, including PHI, on our behalf, properly maintain the integrity of our data, protect our proprietary rights to our systems, or defend against cybersecurity attacks, our business, reputation, results of operations, financial position and cash flows could be materially and adversely affected.

Information security risks have significantly increased in recent years in part because of the proliferation of new technologies, the use of the internet and telecommunications technologies to conduct our operations, and the increased sophistication and activities of organized crime, hackers, terrorists and other external parties, including foreign state agents. Our operations rely on the secure processing, transmission and storage of confidential, proprietary and other information in our computer systems and networks.

We are continuously implementing multiple layers of security measures through technology, processes, and our people. We utilize current security technologies and our defenses are monitored and routinely tested internally and by external parties. Despite these efforts, our facilities and systems and those of our third-party service providers may be vulnerable to privacy and security incidents; security attacks and breaches; acts of vandalism or theft; computer viruses; coordinated attacks by activist entities; emerging cybersecurity risks; misplaced or lost data; programming and/or human errors; or other similar events. Emerging and advanced security threats, including coordinated attacks, require additional layers of security which may disrupt or impact efficiency of operations.

Any security breach involving the misappropriation, loss or other unauthorized disclosure or use of confidential information, including PHI, financial data, competitively sensitive information, or other proprietary data, whether by us or a third party, could have a material adverse effect on our business, reputation, financial condition, cash flows, or results of operations. The occurrence of any of these events could result in interruptions, delays, the loss or corruption of data, cessations in the availability of systems or liability under privacy and security laws, all of which could have a material adverse effect on our financial position and results of operations and harm our business reputation. If we are unable to protect the physical and electronic security and privacy of our databases and transactions, we could be subject to potential liability and regulatory action, our reputation and relationships with our patients and vendors would be harmed, and our business, operations, and financial results may be materially adversely affected. Failure to adequately protect and maintain the integrity of our information systems (including our networks) and data, or to defend against cybersecurity attacks, could subject us to monetary fines, civil suits, civil penalties or criminal sanctions and requirements to disclose the breach publicly, and may further result in a material adverse effect on our results of operations, financial position, and cash flows.

There have been increased federal and state HIPAA privacy and security enforcement efforts and we expect this trend to continue. Under HITECH, state attorneys general have the right to prosecute HIPAA violations committed against residents of their states. Several such actions have already been brought against both covered entities and a business associate, and continued enforcement actions are likely to occur in the future. In addition, HITECH mandates that the Secretary of HHS conduct periodic compliance audits of HIPAA covered entities and business associates. It also tasks HHS with establishing a methodology whereby individuals who are harmed by HIPAA violations may receive a percentage of the civil monetary penalty fine or monetary settlement paid by the violator.

In addition to HIPAA, numerous other state and federal laws govern the collection, dissemination, use, access to and confidentiality of individually identifiable health information. In addition, some states are considering new laws and regulations that further protect the confidentiality, privacy or security of medical records or other types of medical or personal information. These laws may be similar to or even more stringent than the federal provisions and are not preempted by HIPAA. Not only may some of these state laws impose fines and penalties upon violators, but some afford private rights of action to individuals who believe their personal information has been misused.

We may engage in acquisitions, mergers or dispositions, which may affect our results of operations, debt-to-capital ratio, capital expenditures or other aspects of our business, and if businesses we acquire have liabilities we are not aware of, we could suffer severe consequences that would materially and adversely affect our business.

Our business strategy includes growth through acquisitions of dialysis centers and other businesses. We may engage in acquisitions, mergers, dispositions or new business models, which may affect our results of operations, debt-to-capital ratio, capital expenditures, or other aspects of our business. There can be no assurance that we will be able to identify suitable acquisition targets or merger partners or that, if identified, we will be able to acquire these targets on acceptable terms or agree to terms with merger partners. There can also be no assurance that we will be successful in completing any acquisitions, mergers or dispositions that we announce, executing new business models or integrating any acquired business into our overall operations. There is no guarantee that we will be able to operate acquired businesses successfully as stand-alone businesses, or that any such acquired business will operate profitably or will not otherwise adversely impact our results of operations. Further, we cannot be certain that key talented individuals at the business being acquired will continue to work for us after the acquisition or that they will be able to continue to successfully manage or have adequate resources to successfully operate any acquired business.

Businesses we acquire may have unknown or contingent liabilities or liabilities that are in excess of the amounts that we originally estimated, and may have other issues, including those related to internal controls over financial reporting or issues that could affect our ability to comply with healthcare laws and regulations and other laws applicable to our expanded business. As a result, we cannot make any assurances that the acquisitions we consummate will be successful. Although we generally seek indemnification from the sellers of businesses we acquire for matters that are not properly disclosed to us, we are not always successful. In addition, even in cases where we are able to obtain indemnification, we may discover liabilities greater than the contractual limits, the amounts held in escrow for our benefit (if any), or the financial resources of the indemnifying party. In the event that we are responsible for liabilities substantially in excess of any amounts recovered through rights to indemnification or alternative remedies that might be available to us, or any applicable insurance, we could suffer severe consequences that would substantially reduce our earnings and cash flows or otherwise materially and adversely affect our business.

If we are not able to continue to make acquisitions, or maintain an acceptable level of non-acquired growth, or if we face significant patient attrition to our competitors or a reduction in the number of our medical directors or associated physicians, it could adversely affect our business.

Acquisitions, patient retention and medical director and physician retention are an important part of our growth strategy. We face intense competition from other companies for acquisition targets. In our U.S. dialysis business, we continue to face increased competition from large and medium-sized providers which compete directly with us for acquisition targets as well as for individual patients and medical directors. In addition, as we continue our international dialysis expansion into various international markets, we will face competition from large and medium-sized providers for these acquisition targets as well. Because of the ease of entry into the dialysis business and the ability of physicians to be medical directors for their own centers, competition for growth in existing and expanding markets is not limited to large competitors with substantial financial resources. Occasionally, we have experienced competition from former medical directors or referring physicians who have opened their own dialysis centers. In addition, FMC, our largest competitor, manufactures a full line of dialysis supplies and equipment in addition to owning and operating dialysis centers. This may give it cost advantages over us because of its ability to manufacture its own products. If we are not able to continue to make acquisitions, continue to maintain acceptable levels of non-acquired growth, or if we face significant patient attrition to our competitors or a reduction in the number of our medical directors or associated physicians, it could adversely affect our business.

HCP operates in a different line of business from our historical business, and we face challenges managing HCP as a new business and may not realize anticipated benefits.

As a result of the HCP transaction, we are now significantly engaged in a new line of business. We may not have the expertise, experience, and resources to pursue all of our businesses at once, and we may be unable to successfully operate all businesses in the combined company. The administration of HCP will require implementation of appropriate operations, management, and financial reporting systems and controls. We experience difficulties in effectively implementing these and other systems. The management of HCP requires and will continue to require the focused attention of our management team, including a significant commitment of its time and resources. The need for management to focus on these matters could have a material and adverse impact on our revenues and operating results. If the HCP operations are less profitable than we currently anticipate or we do not have the experience, the appropriate expertise, or the resources to pursue all businesses in the combined company, the results of operations and financial condition may be materially and adversely affected.

If we fail to successfully maintain an effective internal control over financial reporting, the integrity of our financial reporting could be compromised which could result in a material adverse effect on our reported financial results.

The integration of HCP into our internal control over financial reporting has required and will continue to require significant time and resources from our management and other personnel and will increase our compliance costs. Failure to maintain an effective internal control environment could have a material adverse effect on our ability to accurately report our financial results and the market's perception of our business and our stock price.

The market price of our common stock may be affected by factors different from those affecting the shares of our common stock prior to consummation of the HCP transaction.

Our historical business differs substantially from that of HCP. Accordingly, the results of operations of the combined company and the market price of our common stock may be affected by factors different from those that previously affected the independent results of operations of each of the Company and HCP.

Expansion of our operations to and offering our services in markets outside of the U.S. subjects us to political, economical, legal, operational and other risks that could adversely affect our business, results of operations and cash flows.

We are continuing an expansion of our operations by offering our services outside of the U.S., which increases our exposure to the inherent risks of doing business in international markets. Depending on the market, these risks include, without limitation, those relating to:

- changes in the local economic environment;
- political instability, armed conflicts or terrorism;
- social changes;
- intellectual property legal protections and remedies;
- trade regulations;
- procedures and actions affecting approval, production, pricing, reimbursement and marketing of products and services;
- foreign currency;
- repatriating or moving to other countries cash generated or held abroad, including considerations relating to tax-efficiencies and changes in tax laws;
- export controls;
- lack of reliable legal systems which may affect our ability to enforce contractual rights;
- changes in local laws or regulations;
- potentially longer ramp-up times for starting up new operations and for payment and collection cycles;
- financial and operational, and information technology systems integration; and
- failure to comply with U.S. or local laws that prohibit us or our intermediaries from making improper payments to foreign officials for the purpose of obtaining or retaining business.

Additionally, some factors that will be critical to the success of our international business and operations will be different than those affecting our domestic business and operations. For example, conducting international operations requires us to devote significant management resources to implement our controls and systems in new markets, to comply with local laws and regulations and to overcome the numerous new challenges inherent in managing international operations, including those based on differing languages, cultures and regulatory environments, and those related to the timely hiring, integration and retention of a sufficient number of skilled personnel to carry out operations in an environment with which we are not familiar.

We anticipate expanding our international operations through acquisitions of varying sizes or through organic growth, which could increase these risks. Additionally, though we might invest material amounts of capital and incur significant costs in connection

with the growth and development of our international operations, there is no assurance that we will be able to operate them profitably anytime soon, if at all. As a result, we would expect these costs to be dilutive to our earnings over the next several years as we start-up or acquire new operations.

These risks could have a material adverse effect on our financial condition, results of operations and cash flows.

The level of our current and future debt could have an adverse impact on our business and our ability to generate cash to service our indebtedness depends on many factors beyond our control.

We have substantial debt outstanding, we incurred a substantial amount of additional debt in connection with the HCP transaction and we may incur additional indebtedness in the future. Our substantial indebtedness could have important consequences to you, for example, it could:

- make it difficult for us to make payments on our debt securities;
- increase our vulnerability to general adverse economic and industry conditions;
- require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, acquisitions and investments and other general corporate purposes;
- limit our flexibility in planning for, or reacting to, changes in our business and the markets in which we operate;
- expose us to interest rate volatility that could adversely affect our earnings and cash flow and our ability to service our indebtedness;
- place us at a competitive disadvantage compared to our competitors that have less debt; and
- limit our ability to borrow additional funds.

In addition, we may incur substantial additional indebtedness in the future. The terms of the indentures governing our senior notes and the agreement governing our Senior Secured Credit Facilities will allow us to incur substantial additional debt. If new debt is added to current debt levels, the related risks described above could intensify.

Our ability to make payments on our indebtedness and to fund planned capital expenditures and expansion efforts, including any strategic acquisitions we may make in the future, will depend on our ability to generate cash. This, to a certain extent, is subject to general economic, financial, competitive, regulatory and other factors that are beyond our control.

We cannot provide assurance that our business will generate sufficient cash flow from operations in the future or that future borrowings will be available to us in an amount sufficient to enable us to service our indebtedness or to fund other liquidity needs. If we are unable to generate sufficient funds to service our outstanding indebtedness, we may be required to refinance, restructure, or otherwise amend some or all of such obligations, sell assets, or raise additional cash through the sale of our equity. We cannot make any assurances that we would be able to obtain such refinancing on terms as favorable as our existing financing terms or that such restructuring activities, sales of assets, or issuances of equity can be accomplished or, if accomplished, would raise sufficient funds to meet these obligations.

The borrowings under our Senior Secured Credit Facilities are guaranteed by a substantial portion of our direct and indirect wholly-owned domestic subsidiaries and are secured by a substantial portion of DaVita HealthCare Partners Inc.'s and its subsidiaries' assets.

We may be subject to liability claims for damages and other expenses not covered by insurance that could reduce our earnings and cash flows.

Our operations and how we manage the Company may subject the Company, as well as its officers and directors to whom the Company owes certain defense and indemnity obligations, to litigation and liability for damages. Our business, profitability and growth prospects could suffer if we face negative publicity or we pay damages or defense costs in connection with a claim that is outside the scope or limits of coverage of any applicable insurance coverage, including claims related to adverse patient events, contractual disputes, professional and general liability, and directors' and officers' duties. In addition, we have received several notices of claims from commercial payors and other third parties, as well as subpoenas and CIDs from the federal government, related to our historical billing practices and the historical billing practices of the centers acquired from Gambro Healthcare and other matters related to their settlement agreement with the DOJ. Although the ultimate outcome of these claims cannot be predicted, an adverse

result with respect to one or more of these claims could have a material adverse effect on our financial condition, results of operations, and cash flows. We currently maintain insurance coverage for those risks we deem are appropriate to insure against and make determinations about whether to self-insure as to other risks or layers of coverage. However, a successful claim, including a professional liability, malpractice or negligence claim which is in excess of any applicable insurance coverage, or that is subject to our self-insurance retentions, could have a material adverse effect on our earnings and cash flows.

In addition, if our costs of insurance and claims increase, then our earnings could decline. Market rates for insurance premiums and deductibles have been steadily increasing. Our earnings and cash flows could be materially and adversely affected by any of the following:

- the collapse or insolvency of our insurance carriers;
- further increases in premiums and deductibles;
- increases in the number of liability claims against us or the cost of settling or trying cases related to those claims; or
- an inability to obtain one or more types of insurance on acceptable terms, if at all.

Provisions in our charter documents, compensation programs and Delaware law may deter a change of control that our stockholders would otherwise determine to be in their best interests.

Our charter documents include provisions that may deter hostile takeovers, delay or prevent changes of control or changes in our management, or limit the ability of our stockholders to approve transactions that they may otherwise determine to be in their best interests. These include provisions prohibiting our stockholders from acting by written consent; requiring 90 days advance notice of stockholder proposals or nominations to our Board of Directors; and granting our Board of Directors the authority to issue preferred stock and to determine the rights and preferences of the preferred stock without the need for further stockholder approval.

Most of our outstanding employee stock-based compensation awards include a provision accelerating the vesting of the awards in the event of a change of control. We also maintain a change of control protection program for our employees who do not have a significant number of stock awards, which has been in place since 2001, and which provides for cash bonuses to the employees in the event of a change of control. Based on the market price of our common stock and shares outstanding on December 31, 2015, these cash bonuses would total approximately $577 million if a change of control transaction occurred at that price and our Board of Directors did not modify this program. These change of control provisions may affect the price an acquirer would be willing to pay for our Company.

We are also subject to Section 203 of the Delaware General Corporation Law that, subject to exceptions, would prohibit us from engaging in any business combinations with any interested stockholder, as defined in that section, for a period of three years following the date on which that stockholder became an interested stockholder.

These provisions may discourage, delay or prevent an acquisition of our Company at a price that our stockholders may find attractive. These provisions could also make it more difficult for our stockholders to elect directors and take other corporate actions and could limit the price that investors might be willing to pay for shares of our common stock.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

For our U.S. dialysis and related lab service business, we own the land and buildings for 26 of our outpatient dialysis centers. We also own the buildings for four other outpatient dialysis centers and the building at one of our Florida labs and we own eleven separate land parcels and sublease a total of three properties to third-party tenants. In addition, we also own the land and building for our corporate headquarters. Our remaining outpatient dialysis centers are located on premises that we lease.

For HCP, we own the land and buildings for nine of our clinics. We also own the building for one other clinic and we own one separate land parcel. Our remaining clinics are located on premises that we lease.

Our leases for our dialysis and related lab services and for HCP generally cover periods from five to 20 years and typically contain renewal options of five to ten years at the fair rental value at the time of renewal. Our leases are generally subject to periodic consumer price index increases, or contain fixed escalation clauses. Our outpatient dialysis centers range in size from approximately 500 to 33,000 square feet, with an average size of approximately 7,500 square feet. HCP's clinics range in size from approximately

800 to 73,000 square feet, with an average size of approximately 9,200 square feet. Our international leases generally range from one to ten years.

The following is a summary of our business, administrative offices, laboratories and pharmacies:

Office	Location	Square Feet	Expiration
U.S. Dialysis and related lab service and other ancillary business:			
Corporate Headquarters	Denver, CO	240,000	Owned
Corporate Headquarters	Denver, CO	116,000	2018
Administrative Office	Vernon Hills, IL	33,000	2019
Administrative Office	Washington DC	4,000	2019
Administrative Office	Centennial, CO	29,000	2018
Business Office	El Segundo, CA	73,700	2017 through 2023
Business Office	Tacoma, WA	119,000	2021
Business Office	Malvern, PA	138,000	2026
Business Office	Brentwood, TN	129,000	2016 through 2025
Business Office	Irvine, CA	66,000	2024
Business Office	Federal Way, WA	188,000	2023
DaVita Rx	Orlando, FL	51,000	2020
DaVita Rx	Coppell, TX	135,000	2019
DaVita Rx	Chandler, AZ	75,000	2027
DaVita Rx	San Bruno, CA	22,200	2017
Laboratory	DeLand, FL	36,000	Owned
Laboratory Warehouse and Offices	DeLand, FL	52,000	2014 through 2016
Laboratory	Hollywood, FL	43,000	2019
Laboratory Office	Miami, FL	1,000	2016
HCP business:			
Administrative Office	Albuquerque, NM	135,000	2016
Administrative Office	Arcadia, CA	24,000	2019

Administrative Office	Shanghai, China	2,920	2016
Administrative Office	Hamburg, Germany	2,205	2020
Administrative Office	Taipei , Taiwan	2,160	2017
Administrative Office	Wroclaw, Poland	1,162	2017
Administrative Office	Carnaxide, Portugal	842	2016

Some of our outpatient dialysis centers are operating at or near capacity. However, we believe that we have adequate capacity within most of our existing dialysis centers to accommodate additional patient volume through increased hours and/or days of operation, or, if additional space is available within an existing facility, by adding dialysis stations. We can usually relocate existing centers to larger facilities or open new centers if existing centers reach capacity. With respect to relocating centers or building new centers, we believe that we can generally lease space at economically reasonable rates in the areas planned for each of these centers, although there can be no assurances in this regard. Expansion of existing centers or relocation of our dialysis centers is subject to review for compliance with conditions relating to participation in the Medicare ESRD program. In states that require a certificate of need or center license, additional approvals would generally be necessary for expansion or relocation.

Item 3. Legal Proceedings.

Inquiries by the Federal Government and Certain Related Civil Proceedings

2011 U.S. Attorney Medicaid Investigation: In October 2011, we announced that we would be receiving a request for documents, which could include an administrative subpoena from the OIG. Subsequent to our announcement of this 2011 U.S. Attorney Medicaid Investigation, we received a request for documents in connection with the inquiry by the U.S. Attorney's Office for the Eastern District of New York. The request related to payments for infusion drugs covered by Medicaid composite payments for dialysis. It is our understanding that this inquiry is civil in nature. We understand further that certain other providers that operate dialysis clinics in New York may have received a similar request for documents. We have cooperated with the government and produced the requested documents. In April 2014, we reached an agreement in principle with the government and expect to execute in the first quarter of 2016 the settlement agreements with the government and the State of New York to finalize the terms of the settlement and to resolve this matter, and have accrued an amount that is immaterial.

Swoben Private Civil Suit: In April 2013, our HCP subsidiary was served with a civil complaint filed by a former employee of SCAN Health Plan (SCAN), an HMO. On July 13, 2009, pursuant to the *qui tam* provisions of the federal FCA and the California False Claims Act, James M. Swoben, as relator, filed a *qui tam* action in the United States District Court for the Central District of California purportedly on behalf of the United States of America and the State of California against SCAN, and certain other defendants whose identities were under seal. The allegations in the complaint relate to alleged overpayments received from government healthcare programs. In or about August 2012, SCAN entered into a Settlement Agreement with the United States of America and the State of California. The United States and the State of California partially intervened in the action for the purpose of settlement with and dismissal of the action against SCAN. In or about November 2011, the relator filed his Third Amended Complaint under seal alleging violations of the federal FCA and the California False Claims Act, which named additional defendants, including HCP and certain health insurance companies (the defendant HMOs). The allegations in the complaint against HCP relate to patient diagnosis coding to determine reimbursement in the Medicare Advantage program, referred to as Hierarchical Condition Coding (HCC) and RAF scores. The complaint sought monetary damages and civil penalties as well as costs and expenses. The DOJ reviewed these allegations and in January 2013 declined to intervene in the case. On June 26, 2013, HCP and the defendant HMOs filed their respective motions to dismiss the Third Amended Complaint pursuant to Federal Rules of Civil Procedure 12(b)(6) and 9(b), challenging the legal sufficiency of the claims asserted in the complaint. On July 30, 2013, the court granted HCP's motion and dismissed with prejudice all of the claims in the Third Amended Complaint and judgment was entered in September 2013. The court specifically determined that further amendments to the complaint would be futile because, in part, the allegations were publicly disclosed in reports and other sources relating to audits conducted by CMS. In October 2013, the plaintiff appealed to the United States Court of Appeals for the Ninth Circuit and the court's disposition of the appeal is pending.

2015 U.S. Attorney Transportation Investigation: In February 2015, we announced that we received six administrative subpoenas from the OIG for medical records from six different dialysis centers in southern California operated by us. Specifically, each subpoena seeks the medical records of a single patient of each respective dialysis center. In February 2016, we received four additional subpoenas for four additional dialysis centers in southern California. The subpoenas were similarly limited in scope to the subpoenas received in 2015. We have been advised by an attorney from the United States Attorney's Office for the Central District of California that the subpoenas relate to an investigation concerning the medical necessity of patient transportation. We do not provide transportation nor do we bill for the transport of our dialysis patients. We do not know the scope of the investigation by the government, nor what conduct or activities might be the subject of the investigation.

2015 U.S. OIG Medicare Advantage Civil Investigation: In March 2015, JSA HealthCare Corporation (JSA), a subsidiary of HCP, received a subpoena from the OIG. We have been advised by an attorney with the Civil Division of the United States DOJ in Washington, D.C. that the subpoena relates to an ongoing civil investigation concerning Medicare Advantage service providers' risk adjustment practices and data, including identification and verification of patient diagnoses and factors used in making the diagnoses. The subpoena requests documents and information for the period from January 1, 2008 through December 31, 2013, for certain Medicare Advantage plans for which JSA provided services. It also requests information regarding JSA's communications about patient diagnoses as they relate to certain Medicare Advantage plans generally, and more specifically as related to two Florida physicians with whom JSA previously contracted. We are producing the requested information and are cooperating with the government's investigation.

In addition to the subpoena described above, in June 2015, we received a subpoena from the OIG. This civil subpoena covers the period from January 1, 2008 through the present and seeks production of a wide range of documents relating to our and our subsidiaries' (including HCP and its subsidiary JSA HealthCare Corporation) provision of services to Medicare Advantage plans and related patient diagnosis coding and risk adjustment submissions and payments. We believe that the request is part of a broader industry investigation into Medicare Advantage patient diagnosis coding and risk adjustment practices and potential overpayments by the government. Some of the information requested relates to what we first disclosed in the risk factors of the Company's quarterly report on Form 10-Q for the first quarter of 2015 as a potentially improper historical HCP coding practice related to a particular condition. The practice in question was discontinued following our November 1, 2012 acquisition of HCP and, as we previously disclosed, we notified CMS of the coding practice and potential overpayments. In connection with the HCP merger, we have certain indemnification rights against the sellers and an escrow was established as security for the indemnification. We would pursue an indemnification claim against the sellers secured by the escrow for any and all liabilities incurred. We can make no assurances that the indemnification and escrow would cover the full amount of our potential losses related to this matter. We are cooperating with the government and producing the requested information.

2015 U.S. Department of Justice Vascular Access Investigation: In November 2015, we announced that RMS Lifeline, Inc., a wholly owned subsidiary of ours that operates under the name Lifeline Vascular Access (Lifeline), received a CID from the DOJ. The CID relates to two vascular access centers in Florida that are part of Lifeline's vascular access business. The CID covers the period from January 1, 2008 through the present. We acquired these two centers in December 2012. Based on the language of the CID, the DOJ appears to be looking at whether the angiograms of 10 patients performed at the two centers were medically unnecessary and therefore whether related claims filed with federal healthcare programs possibly violated the FCA. Lifeline does not perform dialysis services but instead provides vascular access management services for dialysis patients. We are in the process of producing the requested documents to the DOJ.

2016 U.S. Attorney Prescription Drug Investigation: In early February 2016, we announced that our pharmacy services wholly owned subsidiary, DaVita Rx, received a CID from the U.S. Attorney's Office for the Northern District of Texas. Based on the language of the CID, it appears the government is conducting an FCA investigation concerning allegations that DaVita Rx presented or caused to be presented false claims for payment to the government for prescription medications. The CID covers the period from January 1, 2006 through the present. In the spring of 2015, we initiated an internal compliance review of DaVita Rx during which we identified potential billing and operational issues. We notified the government in September 2015 that we were conducting this review of DaVita Rx and began providing regular updates of our review. In the fourth quarter of 2015, we recorded an estimated accrual of $22 million for potential damages and liabilities associated with write-offs and discounts of patient co-payment obligations, and credits to payors for returns of prescriptions drugs, related to DaVita Rx that were identified during the course of this internal compliance review. We may accrue additional reserves for refunds and related damages and potential liabilities arising out of this review. Upon completion of our review, we filed a self-disclosure with the OIG in early February 2016 and we have been working to address and update the practices we identified in the self-disclosure, some of which overlaps with information requested by the U.S. Attorney's Office. We do not know if the U.S. Attorney's Office, which is part of the DOJ, knew when it served the CID on us that we were already in the process of developing a self-disclosure to the OIG. The OIG informed us in late February that our submission was not accepted. They indicated that the OIG is not expressing an opinion regarding the conduct disclosed or our legal positions. We intend to cooperate with the government in this matter.

Except for the private civil complaints filed by the relators in the Swoben litigation as described above, to our knowledge, no proceedings have been initiated against us at this time in connection with any of the inquiries by the federal government. Although we cannot predict whether or when proceedings might be initiated or when these matters may be resolved, it is not unusual for inquiries such as these to continue for a considerable period of time through the various phases of document and witness requests and on-going discussions with regulators. Responding to the subpoenas or inquiries and defending the Company in the relator proceedings will continue to require management's attention and significant legal expense. Any negative findings in the inquiries or relator proceedings could result in substantial financial penalties or awards against us, exclusion from future participation in the Medicare and Medicaid programs and if criminal proceedings were initiated against us, possible criminal penalties. At this time, we cannot predict the ultimate

outcome of these inquiries, or the potential outcome of the relators' claims (except as described above), or the potential range of damages, if any.

Other

We have received several notices of claims from commercial payors and other third parties related to historical billing practices and claims against DVA Renal Healthcare (formerly known as Gambro Healthcare), a subsidiary of ours, related to historical Gambro Healthcare billing practices and other matters covered by its 2004 settlement agreement with the DOJ and certain agencies of the U.S. government. We have not received any further indication that any of these claims are active, except for one payor claim relating to a special needs plan, and some of the other claims may be barred by applicable statutes of limitations. We are working to resolve the one active claim of which we are aware and, based on the dollar amount of the claim, expect that its eventual resolution will involve an amount that is immaterial.

In April 2008, a wage and hour claim lawsuit was filed against us in the Superior Court of California that was styled as a class action and was subsequently amended. The complaint, as amended, alleges that we failed to provide meal periods, failed to pay compensation in lieu of providing rest or meal periods, failed to pay overtime, and failed to comply with certain other California Labor Code requirements. After we prevailed on certain trial court rulings, the plaintiffs later appealed to the California Court of Appeals, and some of the issues on appeal were remanded to the trial court. We reached an agreement with the plaintiffs to settle the case in June 2015. The settlement has now been approved by the court. The amount of the settlement is not material to our consolidated financial statements.

In addition to the foregoing, we are subject to claims and suits, including from time to time, contractual disputes and professional and general liability claims, as well as audits and investigations by various government entities, in the ordinary course of business. We believe that the ultimate resolution of any such pending proceedings, whether the underlying claims are covered by insurance or not, will not have a material adverse effect on our financial condition, results of operations or cash flows.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Our common stock is traded on the New York Stock Exchange under the symbol DVA. The following table sets forth, for the periods indicated, the high and low sales prices for our common stock as reported by the New York Stock Exchange.

	High	Low
Year ended December 31, 2015:		
1st quarter	$ 83.04	$ 71.89
2nd quarter	85.17	79.31
3rd quarter	81.89	70.12
4th quarter	78.94	67.34
Year ended December 31, 2014:		
1st quarter	$ 69.81	$ 62.74
2nd quarter	72.95	67.12
3rd quarter	74.94	70.44
4th quarter	78.07	72.03

The closing price of our common stock on January 29, 2016 was $67.12 per share. According to Computershare, our registrar and transfer agent, as of January 29, 2016, there were 10,273 holders of record of our common stock. We have not declared or paid cash dividends to holders of our common stock since 1994. We have no current plans to pay cash dividends and we are restricted from paying dividends under the terms of our Senior Secured Credit Facilities and the indentures governing our senior notes. Also, see the heading "Liquidity and Capital Resources" under "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and the notes to our consolidated financial statements.

Stock Repurchases

The following table summarizes our repurchases of our common stock during the fourth quarter of 2015:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (in millions)
October 1 - October 31, 2015	2,200	$ 71.01	2,200	$ 659.3
November 1 - November 30, 2015	—	$ —	—	$ 659.3
December 1 - December 31, 2015	2,154,751	$ 69.85	2,154,751	$ 508.7
Total	2,156,951	$ 69.86	2,156,951	$ 508.7

(1) In November 2010, our Board of Directors authorized repurchases of our common stock in an aggregate amount of up to $800 million. We are authorized to make purchases from time to time in the open market or in privately negotiated transactions, depending upon market conditions and other considerations. On April 14, 2015, our Board of Directors approved additional share repurchases in the amount of $726 million. These share repurchases were in addition to the approximately $274 million remaining under our Board of Directors' prior share repurchase approval announced in November 2010. During the twelve months ended December 31, 2015, we purchased a total of 7,779,958 shares of our common stock for $575 million, or an average price of $73.96. We also repurchased 3,689,738 shares of our common stock for $249 million, or an average price of $67.61 per share, during January 2016. As a result of these transactions, there was approximately $259 million available under our current Board authorizations for additional share repurchases. These share repurchase authorizations have no expiration dates. However, we are subject to share repurchase limitations under the terms of the Senior Secured Credit Facilities and the indentures governing our senior notes.

Item 6. Selected Financial Data.

The following financial and operating data should be read in conjunction with "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements filed as part of this report. The following table presents selected consolidated financial and operating data for the periods indicated. These selected consolidated financial results have been recast for all prior periods presented to reflect the retrospective application of these new presentation and disclosure requirements for patient service revenues.

	Year ended December 31,				
	2015	2014	2013	2012 (5)	2011
	(in thousands, except share data)				
Income statement data:					
Net revenues(1)	$ 13,781,837	$ 12,795,106	$ 11,764,050	$ 8,186,280	$ 6,731,806
Operating expenses and charges(2)	12,611,142	10,979,965	10,213,916	6,889,196	5,577,093
Operating income	1,170,695	1,815,141	1,550,134	1,297,084	1,154,713
Debt expense	(408,380)	(410,294)	(429,943)	(288,554)	(241,090)
Debt refinancing and redemption charges	(48,072)	(97,548)	—	(10,963)	—
Other income, net	8,893	2,374	4,787	3,737	2,982
Income from continuing operations before income taxes	723,136	1,309,673	1,124,978	1,001,304	916,605
Income tax expense	295,726	446,343	381,013	359,845	325,292
Income from continuing operations	427,410	863,330	743,965	641,459	591,313
Income from operations of discontinued operations, net of tax(3)	—	—	(139)	(222)	(13,162)
Loss on disposal of discontinued operations, net of tax(3)	—	—	13,375	—	(4,756)
Net income	$ 427,410	$ 863,330	$ 757,201	$ 641,237	573,395
Less: Net income attributable to noncontrolling interests	(157,678)	(140,216)	(123,755)	(105,220)	(95,394)
Net income attributable to DaVita HealthCare Partners Inc.	$ 269,732	$ 723,114	$ 633,446	$ 536,017	$ 478,001

(1) Effective January 1, 2012, we were required to present our provision for uncollectible accounts related to patient service revenues as a reduction from our patient service revenues, which changed the classification of our provision for uncollectible accounts related to patient service revenues. In 2015, we retrospectively adopted ASU 2015-03 related to simplification of debt issuance costs as well as ASU 2015-17 related to classification of deferred taxes (see "New Accounting Standards" below). All prior periods have been recast to conform to the current year presentation.

(2) Operating expenses and charges in 2015 include a settlement charge of $495,000 related to the Vainer private civil suit, estimated goodwill and intangible asset impairment charges of $210,234, primarily related to certain HCP reporting units, and an estimated accrual for damages and liabilities of $22,530 associated with our pharmacy business. Operating expenses and charges in 2014 and 2013 include an additional $17,000 and $397,000, loss contingency accrual related to the settlement of the 2010 and 2011 U.S. Attorney physician relationship investigations, respectively. Operating expenses and charges in 2013 also include a contingent earn-out obligation gain adjustment of $56,977 related to a decrease in HCP's 2013 contingent earn-out obligation and an adjustment to reduce a tax asset associated with the HCP acquisition escrow provisions of $7,721. In addition, 2012 included $85,837 for a legal settlement and related expenses, and $30,753 of transaction expenses associated with the acquisition of HCP.

(3) Income from operations of discontinued operations, net of tax includes the operations for all prior periods presented of HomeChoice Partners Inc. (HomeChoice) which was divested on February 1, 2013. The income from operations of discontinued operations in 2011 also includes a $24,000 non-cash goodwill impairment charge related to HomeChoice. During 2011, we divested a total of 28 outpatient dialysis centers in conjunction with a consent order issued by the Federal Trade Commission on September 30, 2011 in order for us to complete the acquisition of DSI. We completed the sale of two additional centers that were previously pending state regulatory approval in conjunction with the acquisition of DSI on October 31, 2011. The operating results of the historical DaVita HealthCare Partners Inc. divested centers are reflected as discontinued operations in our consolidated financial statements for all prior periods before the centers were sold. In addition, the operating results for the historical DSI divested centers are reflected as discontinued operation in our consolidated financial statements from September 1, 2011 until the dates of sale.

(4) In the third quarter of 2013, the Board of Directors approved a two-for-one stock split of our common stock in the form of a stock dividend payable on September 6, 2013 to stockholders of record on August 23, 2013. Our common stock began trading on a post-split basis on September 9, 2013. All share and per share data for all prior periods presented have been adjusted to reflect the effects of the stock split. Share repurchases consisted of 7,779,958 shares of common stock for $575,380 in 2015 and 7,589,372 shares of common stock for $323,348 in 2011. Shares issued in connection with stock awards were 1,479,217 in 2015, 2,179,766 in 2014, 1,928,137 in 2013, 4,751,142 in 2012, and 2,518,518 in 2011.

(5) On November 1, 2012, we completed our acquisition of HCP whereby HCP became a wholly-owned subsidiary of the Company. The total consideration paid for all of the outstanding common units of HCP was approximately $4.71 billion, which consisted of $3.65 billion in cash, net of cash acquired, and 18,760,624 shares of our common stock valued at approximately $1.06 billion. The operating results of HCP are included in our consolidated results beginning November 1, 2012.

(6) The ratio of earnings to fixed charges was computed by dividing earnings by fixed charges. Earnings for this purpose is defined as pretax income from continuing operations adjusted by adding back fixed charges expensed during the period, less noncontrolling interests. Fixed charges include debt expense (interest expense and the write-off and amortization of deferred financing costs), the estimated interest component of rental expense on operating leases and capitalized interest.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Forward-looking statements

This Annual Report on Form 10-K, including this Management's Discussion and Analysis of Financial Condition and Results of Operations, contains statements that are forward-looking statements within the meaning of the federal securities laws. All statements that do not concern historical facts are forward-looking statements and include, among other things, statements about our expectations, beliefs, intentions and/or strategies for the future. These forward-looking statements include statements regarding our future operations, financial condition and prospects, expectations for treatment growth rates, revenue per treatment, expense growth, levels of the provision for uncollectible accounts receivable, operating income, cash flow, operating cash flow, estimated tax rates, capital expenditures, the development of new dialysis centers and dialysis center acquisitions, government and commercial payment rates, revenue estimating risk and the impact of our level of indebtedness on our financial performance and including earnings per share. These statements involve substantial known and unknown risks and uncertainties that could cause our actual results to differ materially from those described in the forward-looking statements, including but not limited to, risks resulting from the concentration of profits generated by higher-paying commercial payor plans for which there is continued downward pressure on average realized payment rates, and a reduction in the number of patients under such plans, which may result in the loss of revenues or patients, a reduction in government payment rates under the Medicare ESRD program or other government-based programs, the impact of the CMS 2015 Medicare Advantage benchmark structure, risks arising from potential federal and/or state legislation that could have an adverse effect on our operations and profitability, changes in pharmaceutical or anemia management practice patterns, payment policies, or pharmaceutical pricing, legal compliance risks, including our continued compliance with complex government regulations including compliance with the provisions of our current CIA and current or potential investigations by various government entities and related government or private-party proceedings, and the related restrictions on our business and operations required by the CIA and other settlement terms, and the financial impact thereof, continued increased competition from large- and medium-sized dialysis providers that compete directly with us, our ability to maintain contracts with physician medical directors, changing affiliation models for physicians, and the emergence of new models of care introduced by the government or private sector that may erode our patient base and reimbursement rates such as ACOs, IPAs and integrated delivery systems, or to businesses outside of dialysis and HCP's business, our ability to complete acquisitions, mergers or dispositions that we might be considering or announce, or to integrate and successfully operate any business we may acquire or have acquired, including HCP, or to expand our operations and services to markets outside the U.S., the variability of our cash flows, the risk that we might invest material amounts of capital and incur significant costs in connection with the growth and development of our international operations, yet we might not be able to operate them profitably anytime soon, if at all, risks arising from the use of accounting estimates, judgments and interpretations in our financial statements, risk of losing key HCP employees, potential disruption from the HCP transaction making it more difficult to maintain business and operational relationships with customers, partners, associated physicians and physician groups, hospitals and others, the risk that laws regulating the corporate practice of medicine could restrict the manner in which HCP conducts its business, the risk that the cost of providing services under HCP's agreements may exceed our compensation, the risk that reductions in reimbursement rates, including Medicare Advantage rates, and future regulations may negatively impact HCP's business, revenue and profitability, the risk that HCP may not be able to successfully establish a presence in new geographic regions or successfully address competitive threats that could reduce its profitability, the risk that a disruption in HCP's healthcare provider networks could have an adverse effect on HCP's business operations and profitability, the risk that reductions in the quality ratings of health maintenance organization plan customers of HCP could have an adverse effect on HCP's business, or the risk that health plans that acquire health maintenance organizations may not be willing to contract with HCP or may be willing to contract only on less favorable terms, and the other risk factors set forth in Part II, Item 1A. of this Annual Report on Form 10-K. We base our forward-looking statements on information currently available to us at the time of this Annual Report on Form 10-K, and except as required by law we undertake no obligation to update or revise any forward-looking statements, whether as a result of changes in underlying factors, new information, future events or otherwise.

The following should be read in conjunction with our consolidated financial statements and "Item 1. Business".

Company overview

The Company consists of two major divisions, Kidney Care and HCP. Kidney Care is comprised of our U.S. dialysis and related lab services, our ancillary services and strategic initiatives, including our international operations, and our corporate administrative support. Our U.S. dialysis and related lab services business is our largest line of business, which is a leading provider of kidney dialysis services in the U.S. for patients suffering from chronic kidney failure, also known as ESRD. Our HCP division is a patient- and physician-focused integrated healthcare delivery and management company with over two decades of providing coordinated, outcomes-based medical care in a cost-effective manner.

Our overall financial performance was once again strong for 2015, excluding certain non-GAAP items, and was characterized by solid treatment volume growth, primarily from non-acquired growth at existing and new dialysis centers, cost control initiatives, and productivity and payor mix improvements in our dialysis business, and solid growth in HCP's adjusted operating income. However, HCP continued to experience a reduction in Medicare Advantage reimbursement rates in 2015, which negatively impacted its operations. In addition, our dialysis segment experienced a large increase in our pharmaceutical costs.

Some of our major accomplishments and financial operating performance indicators in 2015 and year over year were as follows:

- improved clinical outcomes in our U.S. dialysis operations, including second year in a row as leader of the CMS five star rating system;
- consolidated net revenue growth of approximately 7.7%;
- a 5.2% net revenue growth related to our U.S. dialysis segment operations related to an increase of $6 per treatment;
- an increase in HCP's net revenue of approximately 9.6% related to an increase of its FFS business and senior capitated revenue;
- an increase in other ancillary services and strategic initiatives net revenue of 21.3%;
- continued growth in U.S. dialysis treatments related to an increase of approximately 4.1% in the overall number of U.S. dialysis related treatments;
- normalized non-acquired U.S. dialysis treatment growth of 3.9%;
- added a net total of 72 U.S. dialysis centers and added a net total of 27 international dialysis centers; and
- strong operating cash flows of $1.557 billion, which have been reduced by approximately $304 million of after-tax payments made in connection with the settlement of the Vainer private civil suit.

However, we face uncertainty and various challenges in 2016 as we undertake initiatives to mitigate increases in clinical costs that we expect to experience due to inflation and other factors without any corresponding increase in our dialysis Medicare reimbursement rates. In addition, Congress could still make significant changes to Medicare and Medicaid under the healthcare reform legislation that was enacted in the U.S. and there is uncertainty around the potential negative impact of healthcare insurance exchanges. We could also experience delays in state certification and other regulatory issues. HCP also faces uncertainty in Medicare Advantage reimbursement rates as the government continues to modify adjustments to the rates. Additionally, there is the potential for non-renewal of payor contracts for HCP, which could cause significant patient and employer disruption. Physician practices of prescribing pharmaceuticals and pharmaceutical costs could also have a significant impact on our operating results. We also remain committed to our international expansion plans that will continue to require investment. In addition, if the percentage of our dialysis patients with commercial payors deteriorates or if we experience a decrease in our overall commercial rates, our operating results could be adversely affected.

Following is a summary of consolidated operating results for reference in the discussion that follows.

	Year ended December 31,					
	2015		2014		2013	
	(dollar amounts rounded to nearest million)					
Net revenues:						
Patient service revenues	$ 9,481		$ 8,869		$ 8,307	
Less: Provision for uncollectible accounts	(428)		(367)		(293)	
Net patient service revenues	9,053		8,502		8,014	
Capitated revenues	3,509		3,261		2,987	
Other revenues	1,220		1,032		763

Total net segment revenues	13,861	12,852	11,812
Elimination of intersegment revenues	(79)	(57)	(48)
Consolidated net revenues	$ 13,782	$ 12,795	$ 11,764

The following table summarizes consolidated operating income and adjusted consolidated operating income:

	Year ended December 31,		
	2015	2014	2013
	(dollar amounts rounded to nearest million)		
Dialysis and related lab services	$ 1,260	$ 1,638	$ 1,200
HCP services	34	215	385
Other — ancillary services and strategic initiatives loss	(104)	(25)	(39)
Total segment operating income	1,190	1,828	1,546
Reconciling corporate items:			
Contingent earn-out obligations	—	—	57
Corporate administrative support	(19)	(13)	(45)
Adjustment to reduce a tax asset associated with HCP acquisition escrow provisions	—	—	(8)
Consolidated operating income	1,171	1,815	1,550
Reconciliation of non-GAAP measure:			
Add:			
Goodwill and other intangible asset impairment charges	210	—	—
Pharmacy accrual	22		
Settlement charge	495	—	—
Loss contingency accruals	—	17	397
Contingent earn-out obligation adjustment	—	—	(57)
Adjustment to reduce a tax asset associated with HCP acquisition escrow provisions	—	—	8
Adjusted consolidated operating income[1]	$ 1,898	$ 1,832	$ 1,898

(1) For the year ended December 31, 2015, we have excluded estimated non-cash goodwill and other intangible asset impairment charges of $210 million primarily related to certain HCP reporting units, an estimated accrual of $22 million for damages and liabilities associated with our pharmacy business, which is included in general and administrative expenses, and $495 million related to a settlement charge in connection with the Vainer private civil suit. In addition, for the years ended December 31, 2014 and 2013, we have excluded $17 million and $397 million, respectively, related to loss contingency accruals for the settlement of the 2010 and 2011 U.S. Attorney physician relationship investigations. In 2013, we have also excluded $57 million related to a decrease in HCP's 2013 contingent earn-out obligation and an adjustment of $8 million to reduce a tax asset associated with the HCP acquisition escrow provisions. These are non-GAAP measures and are not intended as substitutes for the GAAP equivalent measures. We have presented these adjusted amounts because management believes that these presentations enhance a user's understanding of our normal consolidated operating income by excluding certain unusual items which we do not believe are indicative of our ordinary results of operations. As a result, adjusting for these amounts allows for comparison to our normal prior period results.

Consolidated net revenues

Consolidated net revenues for 2015 increased by approximately $987 million, or 7.7%, from 2014. This increase in consolidated net revenues was due to an increase in dialysis and related lab services net revenues of approximately $431 million, principally due to solid volume growth from additional treatments from non-acquired growth and from an increase of $6 in the average dialysis revenue per treatment, primarily from an increase in our average commercial payment rates and improvement in our commercial payor mix. Consolidated net revenues also increased by $335 million as a result of HCP's growth from acquisitions and timing of the recognition of additional Medicaid risk sharing revenue, as described below. In addition, revenue increased by approximately $243 million in our ancillary services and strategic initiatives driven primarily from growth in our pharmacy services and our disease management services, as well as expansion in our international operations. These increases were partially offset by an increase in reserves for refunds of prior period pharmacy reimbursements.

Consolidated net revenues for 2014 increased by approximately $1.031 billion, or 8.8%, from 2013. This increase in consolidated net revenues was due to an increase in dialysis and related lab services net revenues of approximately $447 million, principally due to strong volume growth from additional treatments from non-acquired growth and dialysis center acquisitions and from an increase of $2 in the average dialysis revenue per treatment, primarily from the recognition of certain California Medicaid revenue that was previously reserved and an increase in some of our commercial payment rates, partially offset by changes in our commercial payor mix. Consolidated net revenues also increased by $306 million as a result of an increase in HCP's senior capitated members and growth from acquisitions. In addition, revenue increased by approximately $287 million in our ancillary services and strategic initiatives driven primarily from growth in our pharmacy services, our international operations and our disease management services.

Consolidated operating income

Consolidated operating income of $1.171 billion for 2015 decreased by approximately $644 million from 2014, which includes estimated goodwill and other intangible asset impairment charges of approximately $210 million, an estimated pharmacy accrual of $22 million and a private litigation settlement charge of $495 million in 2015 and a $17 million loss contingency accrual in 2014. Excluding these items from their respective periods, adjusted consolidated operating income for 2015 would have increased by $66 million, or 3.6%. Adjusted consolidated operating income increased primarily as a result of strong volume growth from additional treatments from non-acquired growth in the dialysis and related lab services business, as well as an increase in our average dialysis revenue per treatment of approximately $6, as discussed above. Adjusted consolidated operating income also increased due to improved results at HCP, excluding the impairment charges, due to growth from acquisitions and an increase in Medicaid risk sharing revenue. These increases were negatively impacted by an increase in the amount of losses in our ancillary services and strategic initiatives and increased losses in our international operations, as discussed below. In addition, we experienced higher pharmaceutical unit costs, an increase in long-term incentive compensation, an increase in HCP's medical claims expenses from higher utilization, and an increase in our dialysis provision for uncollectible accounts of approximately $53 million.

Consolidated operating income of $1.815 billion for 2014 increased by approximately $265 million, or 17.1% from 2013, which includes the estimated loss contingency reserve of $17 million and $397 million in 2014 and 2013, respectively. In addition, 2013 includes a contingent earn-out obligation adjustment of $57 million and an adjustment to reduce a tax asset associated with the HCP acquisition escrow provisions of $8 million. Excluding these items from their respective periods, adjusted consolidated operating income would have decreased by $66 million, or 3.5%, primarily as a result of a decrease in HCP's operating income of approximately $170 million, principally driven by a decline in Medicare Advantage rates. Adjusted consolidated operating income for 2014 also decreased as a result of higher pharmaceutical unit costs, an increase in long-term incentive compensation, an increase in HCP's medical claims expenses from higher utilization and an increase in our dialysis provision for uncollectible accounts of approximately $72 million. Adjusted consolidated operating income was positively impacted by an increase in the dialysis and related lab services net revenues as a result of strong volume growth from additional treatments due to non-acquired growth and acquisitions. In addition, our average dialysis revenue per treatment increased by approximately $2. Adjusted consolidated income also benefited from improved productivity, lower losses associated with our ancillary services and strategic initiatives and growth in HCP's senior capitated members.

U.S. dialysis and related lab services business

Our U.S. dialysis and related lab services business is a leading provider of kidney dialysis services through a network of 2,251 outpatient dialysis centers in 46 states and the District of Columbia, serving a total of approximately 180,000 patients. We also provide acute inpatient dialysis services in approximately 900 hospitals. We estimate that we have approximately a 36% market share in the U.S. based upon the number of patients that we serve. In 2015, our overall network of U.S. outpatient dialysis centers net increased by 72 dialysis centers primarily as a result of the opening new dialysis centers and from acquisitions of dialysis centers. In addition, the overall number of patients that we serve in the U.S. increased by approximately 4.1% in 2015 as compared to 2014. All references in this document to dialysis and related lab services refer only to our U.S. dialysis and related lab services business.

Our dialysis and related lab services stated mission is to be the provider, partner and employer of choice. We believe our attention to these three stakeholders—our patients, our business partners, and our teammates—represents the major driver of our long-term performance, although we are subject to the impact of several external factors such as government policy, physician practice patterns, commercial payor payment rates and the mix of commercial and government patients. Two principal non-financial metrics we track are quality clinical outcomes and teammate turnover. We have developed our own composite index for measuring improvements in our clinical outcomes, which we refer to as the DaVita Quality Index (DQI). Our clinical outcomes as measured by DQI have improved over each of the past several years which we believe directly decreases patient mortalities. Our patient mortality percentages have decreased from 19.0% in 2001 to 13.7% in 2014. Although it is difficult to reliably measure clinical performance across our industry, we believe our clinical outcomes compare favorably with other dialysis providers in the U.S. and generally exceed the dialysis outcome quality indicators of the National Kidney Foundation. In addition, over the past several years our clinical teammate turnover has remained relatively constant and we believe that a relatively stable teammate turnover in 2015 was a major

contributor to our continued clinical performance improvements and can also be a major driver of our ability to maintain or improve clinical hours per treatment. We will continue to focus on these three stakeholders and our clinical outcomes as we believe these are fundamental long-term value drivers.

We believe our national scale, size and commitment to our patients, among other things, allows us to provide industry-leading quality care with superior clinical outcomes that attracts patients, referring physicians, and qualified medical directors to our network, which provides our dialysis patient base with a large number of out-patient dialysis centers to choose from with convenient locations and access to a full range of other integrated services which provides us the ability to effectively and efficiently manage a patient's care and certain costs while still maintaining strong legal and compliance programs.

Approximately 62% of our 2015 consolidated net revenues were derived directly from our dialysis and related lab services business. Approximately 79% of our 2015 dialysis and related lab services revenues were derived from outpatient hemodialysis services in the 2,220 U.S. centers that we consolidate. Other dialysis services, which are operationally integrated with our dialysis operations, are peritoneal dialysis, home-based hemodialysis, hospital inpatient hemodialysis services and management and administrative services provided to minority-owned and non-owned dialysis centers. These services collectively accounted for the balance of our 2015 dialysis and related lab services revenues.

The principal drivers of our dialysis and related lab services revenues are:

- the number of treatments, which is primarily a function of the number of chronic patients requiring approximately three treatments per week, as well as, to a lesser extent, the number of treatments for peritoneal dialysis services and home-based dialysis and hospital inpatient dialysis services; and
- average dialysis revenue per treatment including the mix of commercial and government patients.

The total patient base is a relatively stable factor, which we believe is influenced by a demographically growing need for dialysis services as indicated by the United States Renal Data System that reported an approximate compound growth rate of 3.6% over the last several years for the dialysis patient population, our relationships with referring physicians, together with the quality of our clinical care which can lead to reduced patient mortality rates as indicated above, and our ability to open and acquire new dialysis centers.

Our average dialysis and related lab services revenue per treatment is driven by changes in our mix of commercial and government (principally Medicare and Medicaid) patients, commercial and government payment rates, our billing and collecting operations performance, and to a lesser extent the mix and intensity of physician-prescribed pharmaceuticals that are separately billable since payment for these pharmaceuticals are primarily included in Medicare's single bundled payment rate system and can also be included as part of a single bundled payment rate for all dialysis services provided under some of our commercial contracts.

On average, dialysis-related payment rates from contracted commercial payors are significantly higher than Medicare, Medicaid and other government program payment rates, and therefore the percentage of commercial patients as a relationship to total patients represents a major driver of our total average dialysis revenue per treatment. The percentage of commercial patients covered under contracted plans as compared to commercial patients with out-of-network providers continued to increase, which can significantly affect our average dialysis revenue per treatment since commercial payment rates for patients with out-of-network providers are on average higher than in-network payment rates that are covered under commercial contracted plans. For the first time in several years, the growth of our commercial patients slightly outpaced the growth of our government-based patients as more of our patients are covered by commercial contracted plans.

The following table summarizes our U.S. dialysis and related lab services revenues by source for the year ended December 31, 2015:

Source	Revenue percentages
Medicare and Medicare-assigned plans	56%
Medicaid and Medicaid-assigned plans	6%
Other government-based programs	4%
Total government-based programs	66%
Commercial (including hospital inpatient dialysis services)	34%
Total dialysis and related lab services' revenues	100%

Government dialysis-related payment rates in the U.S. are principally determined by federal Medicare and state Medicaid policy. For patients with Medicare coverage, all ESRD payments for dialysis treatments are made under a single bundled payment rate which provides a fixed payment rate to encompass all goods and services provided during the dialysis treatment, including certain pharmaceuticals, such as EPO, vitamin D analogs and iron supplements, irrespective of the level of pharmaceuticals administered to the patient or additional services performed. Most lab services are also included in the bundled payment. The bundled payment rate is also adjusted for certain patient characteristics, a geographic usage index and certain other factors.

The bundled payment system presents operating, clinical and financial risks. For example, with regard to the expanded list of case-mix adjustors, there is a risk that our dialysis centers or billing and other systems may not accurately document and track the appropriate patient-specific characteristics, resulting in a reduction or overpayment in the amounts of the payments that we would otherwise be entitled to receive.

An important provision in the law is an annual adjustment, or market basket update, to the ESRD PPS base rate. Absent action by Congress, the PPS base rate is automatically updated annually by a formulaic inflation adjustment.

In December 2013, CMS issued the 2014 final rule for the ESRD PPS, which phases in the payment reductions mandated by ATRA, as modified by the "Protecting Access to Medicare Act of 2014" which will reduce our market basket inflation adjustment by 1.25% in 2016 and 2017, and 1% in 2018. CMS published the 2015 final rule for the ESRD PPS, which increased payments to dialysis facilities by 0.3% to 0.5%, although rural facilities received a decrease of 0.5%. CMS recently issued the 2016 final rule for the ESRD PPS, which cuts dialysis facilities' bundled payment rate for 2016 as compared to 2015 while increasing funds for certain co-morbidities and other patient health factors, and rural facilities. CMS believes its 2016 final rule for the ESRD PPS will (i) increase overall payments to both hospital-based and freestanding dialysis facilities by approximately 0.2%, and (ii) decrease overall payments to rural dialysis facilities by approximately 0.1%.

As a result of the BCA and subsequent activity in Congress, a $1.2 trillion sequester (across-the-board spending cuts) in discretionary programs took effect on March 1, 2013. In particular, a 2% reduction to Medicare payments took effect on April 1, 2013, which was subsequently extended through 2014 and 2015. The Bipartisan Budget Act of 2015 extended the BCA's annual 2% reduction to Medicare payments through fiscal year 2025. These across-the-board spending cuts have affected and will continue to adversely affect our revenues, earnings and cash flows.

The Innovation Center is currently working with various healthcare providers to develop, refine and implement ACOs and other innovative models of care for Medicare and Medicaid beneficiaries. We are currently uncertain of the extent to which the long-term operation and evolution of these models of care, including ACOs, Bundled Payments for Care Improvement Initiative, CEC Model (which includes the development of ESCOs), the Comprehensive Primary Care Initiative, the Duals Demonstration, or other models, will impact the healthcare market over time. Our U.S. dialysis business may choose to participate in one or several of these models either as a partner with other providers or independently. We currently participate in the CEC Model with the Innovation Center, including with organizations in Arizona, Florida, New Jersey and Pennsylvania. In areas where DaVita is not directly participating in this or other Innovation Center models, some of our patients may be assigned to an ACO, another ESRD Care Model, or another program, in which case the quality and cost of care that we furnish will be included in an ACO's, another ESRD Care Model's or other programs' calculations. As new models of care emerge and evolve, we may be at risk for losing our Medicare patient base, which would have a materially adverse effect on our revenues, earnings and cash flow. Other initiatives in the government or private sector also may arise, including the development of models similar to ACOs, IPAs and integrated delivery systems or evolutions of those concepts which could adversely impact our business.

We anticipate that we will continue to experience increases in our operating costs in 2016 that will outpace any net Medicare rate increases that we may receive, which could significantly impact our operating results. In addition, we expect to continue experiencing increases in operating costs that are subject to inflation, such as labor and supply costs, regardless of whether there is a compensating inflation-based increase in Medicare payment rates or in payments under the bundled payment rate system.

Dialysis payment rates from commercial payors can vary and a major portion of our commercial rates are set at contracted amounts with payors and are subject to intense negotiation pressure. Our commercial payment rates also include payments for out-of-network patients that on average are higher than our in-network commercial contract rates. In 2015, we were successful in increasing some of our commercial contracted payment rates which contributed to an increase in our average dialysis revenue per treatment. We continue to enter into some commercial contracts covering certain patients that will primarily pay us a single bundled payment rate for all dialysis services provided to these patients. However, some of the contracts will pay us for certain other services and pharmaceuticals in addition to the bundled payment. We are continuously in the process of negotiating agreements with our commercial payors, and if our negotiations result in overall commercial contract payment rate reductions in excess of our commercial contract payment rate increases, our revenues and operating results could be negatively impacted. In addition, if there is an increase in job losses in the U.S., or depending upon changes to the healthcare regulatory system by CMS and/or the impact of healthcare insurance exchanges, we could experience a decrease in the number of patients covered under traditional commercial insurance plans. Patients with commercial insurance who cannot otherwise maintain coverage frequently rely on financial assistance from charitable

organizations, such as the American Kidney Fund. If these patients are unable to obtain or continue to receive such financial assistance, our revenues, earnings, and cash flows could be substantially reduced.

Approximately 2% of our dialysis and related lab services revenues for the year ended December 31, 2015, were from physician-prescribed pharmaceuticals that are separately billable, with EPO accounting for approximately 1% of our dialysis and related lab services revenues. The impact of physician-prescribed pharmaceuticals on our overall revenues that are separately billable has significantly decreased since Medicare's single bundled payment system went into effect, as well as some additional commercial contracts that pay us a single bundled payment rate.

Our operating performance with respect to dialysis services billing and collection can also be a significant factor in the average dialysis and related lab services revenue per treatment we recognize and are able to collect. Over the past several years we have invested heavily in upgrades to our systems and internal processes that we believe have helped improve our operating performance and reduced our regulatory compliance risks, and we expect to continue to improve these systems and processes. In 2015, we continued to upgrade our information technology systems and implemented process changes. We continue to upgrade our billing and other systems and modify our processes to improve our ability to capture the necessary patient characteristics, co-morbidities and certain other factors under Medicare's bundled payment system. We believe this will potentially enable us to capture additional reimbursement amounts from Medicare and enhance our overall billing and collection performance. However, as we continue to make upgrades to our systems and processes, or as payors change their systems and requirements, such as changes to Medicare's billing codes, we could experience a negative impact to our cash collection performance which would affect our average dialysis and related lab services revenue per treatment.

Our dialysis and related lab services revenue recognition involves significant estimation risks. Our estimates are developed based on the best information available to us and our best judgment as to the reasonably assured collectability of our billings as of the reporting date based upon our actual historical collection experience. Changes in estimates are reflected in the then-current period financial statements based upon on-going actual experience trends, or subsequent settlements and realizations depending on the nature and predictability of the estimates and contingencies.

Our annual average dialysis and related lab services revenue per treatment was approximately $348, $342 and $340 for 2015, 2014 and 2013, respectively. In 2015, the average dialysis and related lab services revenue per treatment increased by approximately $6 per treatment due to an increase in our average commercial payment rates and improvements in our commercial payor mix, partially offset by an increase in our provision for uncollectible accounts. In 2014, the average dialysis and related lab services revenue per treatment increased by approximately $2 per treatment primarily from the recognition of certain California Medicaid revenue that was previously reserved, an increase in some of our commercial payment rates, partially offset by changes in our commercial payor mix.

Our average dialysis and related lab services revenue per treatment can be significantly impacted by several major factors, including our commercial payment rates; government payment policies regarding reimbursement amounts for dialysis treatments covered under Medicare's bundled payment rate system, including our ability to capture certain patient characteristics; changes in the mix of government and commercial patients and the number of commercial patients that are either covered under commercial contracts or are out of network.

The principal drivers of our dialysis and related lab services patient care costs are clinical hours per treatment, labor rates, vendor pricing of pharmaceuticals, utilization levels of pharmaceuticals, business infrastructure costs, which include the operating costs of our dialysis centers, and certain professional fees. However, other cost categories can also represent significant cost variability, such as employee benefit costs, payroll taxes, insurance costs and medical supply costs. Our average clinical hours per treatment or productivity levels in 2015 improved slightly compared to 2014, which was primarily the result of improvements in our internal procedures and processes. We are always striving for improved productivity levels, however, changes in federal and state policies or regulatory billing requirements can lead to increased labor costs in order to implement these new requirements, which can adversely impact our ability to achieve optimal productivity levels. In addition, improvements in the U.S. economy have stimulated additional competition for skilled clinical personnel resulting in slightly higher teammate turnover in 2015, which we believe negatively affected productivity levels. In 2015 and 2014, we experienced an increase in our clinical labor rates of approximately 0.9% and 1.5%, respectively, as clinical labor rates have increased consistent with general industry trends, mainly due to the high demand for skilled clinical personnel, along with general inflation increases. In 2015, we experienced a significant increase in our pharmaceutical unit costs. We also continue to experience increases in our infrastructure and operating costs of our dialysis centers, primarily due to the number of new dialysis centers opened, and general increases in rent, utilities and repairs and maintenance. However, in 2015, we continued to implement certain cost control initiatives to manage our overall operating costs, including labor productivity.

Our dialysis and related lab services general and administrative expenses represented 8.2% and 8.3% of our dialysis and related lab services net revenues in 2015 and 2014, respectively. The slight decrease was primarily due to a decrease in professional fees for compliance matters and information technology initiatives and lower travel expenses, partially offset by higher labor and benefit costs and long-term incentive compensation. Increases in general and administrative expenses over the last several years primarily related to strengthening our dialysis business, improving our regulatory compliance and other operational processes, responding to certain legal and compliance matters, and professional fees associated with enhancing our information technology systems. We expect that these levels of expenditures on our dialysis and related lab services general and administrative expenses will continue in 2016 and could possibly increase as we seek out new business opportunities within the dialysis industry and continue to invest in improving our information technology infrastructure and the level of support required for our regulatory compliance and legal matters.

Results of Operations

The following table reflects the results of operations for the U.S. dialysis and related lab services business:

	Year ended December 31,					
	2015		2014		2013	
	(dollar amounts rounded to nearest million)					
Dialysis and related lab services patient service revenues	$ 9,034		$ 8,551		$ 8,033	
Less: Provision for uncollectible accounts	(406)		(353)		(281)	
Dialysis and related lab services net patient service revenues	8,628		8,198		7,752	
Other revenues	14		13		12	
Total net dialysis and related lab services revenues	$ 8,642	100%	$ 8,211	100%	$ 7,764	100%
Operating expenses and charges:						
Patient care costs	5,755	67%	5,485	67%	5,117	66%
General and administrative	709	8%	682	8%	706	9%
Depreciation and amortization	438	5%	403	5%	356	4%
Settlement charge and loss contingency accruals	495	6%	17	—	397	5%
Equity investment income	(15)	—	(14)	—	(12)	—
Total operating expenses and charges	7,382	85%	6,573	80%	6,564	84%
Operating income	$ 1,260	15%	$ 1,638	20%	$ 1,200	16%
Dialysis treatments	25,986,719		24,981,553		23,637,584	
Average dialysis treatments per treatment day	83,104		79,864		75,495	
Average dialysis and related lab services revenue per treatment	$ 348		$ 342		$ 340	

Net revenues

Dialysis and related lab services net revenues for 2015 increased by approximately $431 million, or 5.2%, from 2014. The increase in net revenues was primarily due to solid volume growth from additional treatments of approximately 4.0% due to an increase in non-acquired treatment growth at existing and new dialysis centers and an increase in the average dialysis revenue per treatment of approximately $6. The increase in the average dialysis revenue per treatment in 2015, as compared to 2014, was due to an increase in our average commercial payment rates and improvements in our commercial payor mix. Dialysis and related lab services net revenues were negatively impacted by an increase in the provision for uncollectible accounts of $53 million.

Dialysis and related lab services net revenues for 2014 increased by approximately $447 million, or 5.8%, from 2013. The increase in net revenues was primarily due to strong volume growth from additional treatments of approximately 5.7% due to an increase in non-acquired treatment growth at existing and new dialysis centers and growth through acquisitions of dialysis centers and an increase in the average dialysis revenue per treatment of approximately $2. The increase in the average dialysis revenue per treatment in 2014, as compared to 2013, was due to the recognition of certain California Medicaid revenue that was previously reserved, an increase in some of our commercial payment rates, partially offset by changes in the commercial payor mix. Dialysis and related lab services net revenues were negatively impacted by an increase in the provision for uncollectible accounts of $72 million.

The following table summarizes our dialysis and related lab services revenues by modality for the year ended December 31, 2015:

Modality	Revenue percentages
Outpatient hemodialysis centers	79%
Peritoneal dialysis and home-based hemodialysis	16%
Hospital inpatient hemodialysis	5%
Total dialysis and related lab services' revenues	100%

Approximately 66% of our total dialysis and related lab services revenues for the year ended December 31, 2015 were from government-based programs, principally Medicare, Medicaid, and Medicare-assigned plans, representing approximately 89% of our total patients. Prior to 2015, we had experienced growth in our government-based patients that had been outpacing the growth in our commercial patients which had negatively impacted our average dialysis and related lab services revenue per treatment since we receive higher reimbursement rates from our commercial payors. However, in 2015, for the first time in several years, the growth of our commercial patients slightly outpaced the growth of our government-based patients as more of our patients are covered by commercial contracted plans. Less than 1% of our dialysis and related lab services revenues are due directly from patients. There is no single commercial payor associated with our dialysis and related lab services business that accounted for more than 10% of total dialysis and related lab services revenues for the year ended December 31, 2015.

On average, dialysis-related payment rates from contracted commercial payors are significantly higher than Medicare, Medicaid and other government program payment rates, and therefore the percentage of commercial patients as a relationship to total patients represents a major driver of our total average dialysis revenue per treatment. For a patient covered by a commercial insurance plan, Medicare generally becomes the primary payor after 33 months, which includes the three month waiting period, or earlier if the patient's commercial insurance plan coverage terminates. When Medicare becomes the primary payor, the payment rates we receive for that patient shifts from the commercial insurance plan rates to Medicare payment rates, which are significantly lower than commercial insurance rates. Medicare payment rates are insufficient to cover our costs associated with providing dialysis services, and therefore we lose money on each Medicare treatment that we provide.

Nearly all of our net earnings from our dialysis and related lab services are derived from commercial payors, some of which pay at established contract rates and others which pay negotiated payment rates based on our usual and customary fee schedule for our out-of-network patients, which are typically higher than commercial contracted rates. If we experience a net overall reduction in our contracted and non-contracted commercial payment rates as a result of negotiations, restrictions or changes to the healthcare regulatory system, including the potential impact of healthcare insurance exchanges, it could have a material adverse effect on our operating results.

Operating expenses and charges

Patient care costs. Dialysis and related lab services patient care costs are those costs directly associated with operating and supporting our dialysis centers and consist principally of labor, benefits, pharmaceuticals, medical supplies and other operating costs of the dialysis centers. The dialysis and related lab services patient care costs on a per treatment basis were $221 and $219 for 2015 and 2014, respectively. The $2 increase in the per treatment costs in 2015 as compared to 2014 was primarily attributable to higher overall pharmaceutical costs due to higher pharmaceutical unit costs, an increase in our other direct operating expenses associated with our dialysis centers, and a slight increase in labor costs, partially offset by improvements in productivity, and lower general and professional insurance costs.

The dialysis and related lab services patient care costs on a per treatment basis were $219 and $216 for 2014 and 2013, respectively. The $3 increase in the per treatment costs in 2014 as compared to 2013 was primarily attributable to higher overall pharmaceutical costs due to an increase in intensities of physician-prescribed pharmaceuticals and higher pharmaceutical unit costs, an increase in our other direct operating expenses associated with our dialysis centers, and a slight increase in labor costs, partially offset by improvements in productivity and lower general and professional insurance costs.

General and administrative expenses. Dialysis and related lab services general and administrative expenses in 2015 increased by approximately $27 million as compared to 2014. The increase was primarily due to an increase in our labor and benefit costs and long-term compensation costs.

Dialysis and related lab services general and administrative expenses in 2014 decreased by approximately $24 million as compared to 2013. The decrease was primarily due to a decrease in our professional expenses for legal and compliance matters and for information technology initiatives, a decrease in labor costs and related payroll taxes, a decrease in travel expenses for management meetings, and the write-off of certain obsolete software costs that occurred in 2013, partially offset by higher long-term incentive compensation.

Depreciation and amortization. Dialysis and related lab services depreciation and amortization expenses for 2015 increased by approximately $35 million as compared to 2014 and increased by $47 million in 2014 as compared to 2013. The increases were primarily due to both growth through new dialysis center developments and additional informational technology initiatives.

Provision for uncollectible accounts receivable. The provision for uncollectible accounts receivable for U.S. dialysis and related lab services was 4.5% for 2015, 4.1% for 2014, and 3.5% for 2013. The increase in the provision for uncollectible accounts receivable in 2015 and 2014 was primarily due to higher write-offs of Medicare secondary billings. We currently expect the 2015 level of the provision for uncollectible accounts to continue into 2016, although it may increase if we encounter any collection issues.

Settlement charge. In June 2015, we finalized the terms of the settlement agreement with plaintiffs regarding the Vainer private civil suit, which includes a settlement amount of $450 million and attorney fees and other costs of $45 million.

Equity investment income. Equity investment income was approximately $15 million, $14 million and $12 million in 2015, 2014 and 2013, respectively. The increases in equity investment income in 2015 and 2014 were primarily due to the profitability of certain of our dialysis nonconsolidated joint ventures.

Segment operating income

Dialysis and related lab services operating income for 2015 decreased by approximately $378 million as compared to 2014, which includes a settlement charge of $495 million in 2015 and a loss contingency accrual of $17 million in 2014. Excluding these items from their respective periods, dialysis and related lab services adjusted operating income for 2015 would have increased by $100 million. The increase in the adjusted operating income for 2015 as compared to 2014 was primarily due to solid treatment growth as a result of additional dialysis treatments and an increase in the average dialysis revenue per treatment of approximately $6, as described above. In addition, dialysis and related lab services adjusted operating income also increased due to improved productivity and lower general and professional insurance costs, partially offset by higher overall pharmaceutical costs, as described above, and an increase in our provision for uncollectible accounts of $53 million.

Dialysis and related lab services operating income for 2014 increased by approximately $438 million as compared to 2013, which includes loss contingency accruals of $17 million and $397 million in 2014 and 2013, respectively. Excluding these items from their respective periods, dialysis and related lab services adjusted operating income would have increased by $58 million. The increase in the adjusted operating income for 2014 as compared to 2013 was primarily due to strong treatment growth as a result of additional dialysis treatments from non-acquired growth and acquisitions of dialysis centers, and an increase in the average dialysis revenue per treatment of approximately $2 as described above. In addition, dialysis and related lab services adjusted operating income also increased due to a decrease in professional expenses, the write-off of certain obsolete software costs that occurred in 2013 and improved productivity. Dialysis and related lab services adjusted operating income was negatively impacted by higher overall pharmaceutical costs as described above and an increase in our provision for uncollectible accounts of $72 million.

HCP business

HCP is a patient- and physician-focused, integrated healthcare delivery and management company with over two decades of experience providing coordinated, outcomes-based medical care in a cost-effective manner. As of December 31, 2015, HCP had approximately 807,400 members under its care in southern California, Colorado, central and south Florida, southern Nevada, central New Mexico and central Arizona through capitation contracts with some of the nation's leading health plans. Of these 807,400 members, approximately 317,400 individuals were patients enrolled in Medicare Advantage, and the remaining approximately 490,000 individuals were managed care members whose health coverage is provided through their employer or who have individually acquired health coverage directly from a health plan or as a result of their eligibility for Medicaid benefits. In addition to its managed care business, during the year ended December 31, 2015, HCP provided care in all markets to over 612,100 patients whose health coverage is structured on a FFS basis, including patients enrolled through traditional Medicare and Medicaid programs, preferred provider organizations and other third party payors.

HCP's patients as well as the patients of HCP's associated physicians, physician groups and IPAs benefit from an integrated approach to medical care that places the physician at the center of patient care. As of December 31, 2015, HCP delivered services to its members via a network of approximately 547 associated full-time primary care physicians, over 2,900 associated groups and other network primary care physicians, 240 network hospitals, and several thousand associated group and network specialists. Together with

hundreds of case managers, registered nurses and other care coordinators, these medical professionals utilize a comprehensive information technology system, sophisticated risk management techniques and clinical protocols to provide high-quality, cost-effective care to HCP's members. The total amount of revenue from HCP for the year ended December 31, 2015, was approximately $3.837 billion, or approximately 27.8% of our consolidated net revenues.

Key Financial Measures and Indicators

Operating revenues

HCP's consolidated revenues consist primarily of capitated revenues, including revenues attributable to capitated contracts with health plans and, to a lesser extent, revenues from patient services rendered and other operating revenues, each as described in more detail below.

HCP capitated revenues consist primarily of fees for medical services provided under capitated contracts with various health plans or under FFS arrangements with privately insured individuals. Capitation revenue derived from health plans typically results from either (i) premium payments by CMS to HCP's health plan customers under Medicare Advantage with respect to seniors, disabled and other eligible persons (which are referred to herein as HCP's senior membership), (ii) premium payments by state governments to HCP's health plan customers under Medicaid managed care programs (which are referred to herein as HCP's Medicaid membership), and (iii) premium payments from public and private employers and individuals to HCP's health plan customers with respect to their employees (which are referred to herein as HCP's commercial membership). Capitation payments under health plan contracts are made monthly based on the number of enrollees selecting an HCP associated group physician employed or associated with one of HCP's medical group entities as their primary healthcare provider. The amount of monthly capitation HCP receives from health plans on behalf of a member generally does not vary during a given calendar year, regardless of the level of actual medical services utilized by the member. As described in more detail below, in central Florida, southern Nevada and Arizona, HCP principally utilizes a global capitation model in which it assumes the financial responsibility for both professional (physician) and institutional (or hospital) services for covered benefits, whereas in New Mexico, HCP assumes the financial responsibility for professional services only. In southern California, HCP utilizes variants of a different model for capitation under which it is directly financially responsible for covered professional services, but indirectly financially responsible for covered institutional expenses. See below for further discussion regarding changes to HCP's revenue recognition for hospital services. HCP's associated medical groups also receive specified incentive payments from health plans based on specified performance and quality criteria. These amounts are accrued when earned, and the amounts can be reasonably estimated.

- *Global capitation model*. HCP records the aggregate global capitation PMPM fee as revenue and the amounts paid with respect to claims as medical expenses or hospital expenses, as applicable, in its combined financial statements (see "Patient Care Costs-Medical Expenses" and "Operating Expenses-Hospital Expenses" below). Revenue with respect to both professional and institutional capitation is recorded in the month in which enrollees are entitled to receive healthcare. In HCP's central Florida market, HCP also receives capitation revenue and is liable for corresponding expenses for prescription drug activity rendered on behalf of HCP's senior members through the Part D component under the Medicare Advantage program.

- *Risk-sharing model*. As compensation under its various managed care-related administrative services agreements with hospitals, HCP is entitled to receive a percentage of the amount by which the institutional capitation revenue received from health plans exceeds institutional expenses, and any such risk-share amount to which HCP is entitled is recorded as medical revenues. In addition, pursuant to such managed care-related administrative services agreements, HCP agrees to be responsible should the third party incur institutional expenses in excess of institutional capitation revenue. As with global capitation, revenue with respect to professional capitation is reported in the month in which enrollees are entitled to receive healthcare. However, risk-share revenues (that is, the portion of the excess or deficit of institutional capitation revenue to which HCP is entitled less institutional expenses), in contrast, are based on the number of enrollees and estimates of institutional utilization and associated costs incurred by assigned health plan enrollees, and the amounts accrued when earned can be reasonably estimated. Differences between actual contract settlements and estimated receivables and payables are recorded in the year of final settlement. In December 2013, HCP obtained a restricted Knox-Keene license in California, which permits HCP to enter into global capitation agreements with health plans that allow HCP to assume financial responsibility for both professional and institutional services. HCP is in the process of evaluating and identifying which risk-sharing arrangements, if any, will be converted to global capitation arrangements, subject to HCP's and the applicable health plan's satisfactory negotiation and approval, as well as approval from the Department of Managed Healthcare. Completion of such evaluation and possible conversion is expected to occur over time.

- *Retroactive revenue-adjustments.* The Medicare Advantage revenue received by HCP's health plan customers is adjusted periodically to give effect to the relative clinical and demographic profile of the members for whom HCP is financially responsible. The model employed by CMS bases a portion of the total reimbursement payments on various clinical and demographic factors, including hospital inpatient diagnoses, additional diagnosis data from ambulatory treatment settings, hospital outpatient department and physician visits, gender, age and Medicaid eligibility. CMS requires that all managed care companies capture, collect and submit the necessary diagnosis code information to CMS twice a year for reconciliation with CMS's internal database. Capitation payments under this methodology are paid at interim rates during the year and retroactive adjustments occur in subsequent periods (generally in the third quarter of the same year, with a final adjustment in the third quarter of the following year) after the data is compiled by CMS. HCP estimates the amount of the current year adjustments in revenues during the first and second quarters of any given year and adjusts its estimates during the third quarter, upon receipt of payments from CMS. Differences between actual contract settlements and estimated revenues are recorded in the year of final settlement. To date, all such adjustments have resulted in increases in revenue.

- *Patient service revenues.* Patient service revenues are recorded when the services are provided. Such revenues are based on a negotiated fixed-fee schedule with the applicable health plan.

- *Other operating revenues.* In addition to the revenues discussed above, other operating revenues primarily represents, (i) management fees HCP receives with respect to its role as the manager of its unconsolidated joint ventures, (ii) revenues from the maintenance of existing physicians' networks, (iii) revenues recognized under meaningful use programs established by federal and state governments which provide financial incentives for providers to implement and utilize electronic health record technology to improve patient care, and (iv) medical consulting revenues.

Patient care costs

HCP's largest patient care costs are the costs of medical services provided pursuant to its capitation contracts, which consist of medical expenses, hospital expenses and clinical support and other operating costs, as further described below. Under both the global capitation and the risk-share capitation models, costs of medical services are recognized in the month in which the related services are provided. In addition, medical expenses and hospital expenses include an estimate of such expenses that have been incurred but not yet reported. For further information on how HCP estimates such claims, see "Critical accounting policies, estimates and judgments–Medical liability claims associated with HCP" below.

Medical expenses. Medical expenses consist of payments for professional and ancillary services to independent primary care physicians, specialists, ancillary providers and hospitals (including, with respect to hospitals, for outpatient services) pursuant to agreements with those entities. The structure of such expenses can consist of, among other things, sub-capitation and FFS payments. In addition, medical expenses include compensation and related expenses incurred with respect to HCP's associated group primary care physicians and specialists, registered nurses, physician assistants and hospitalists.

Hospital expenses. Hospital expenses consist of payments for institutional services to contracted and non-contracted hospitals for both inpatient and outpatient services, skilled nursing facilities, and to other institutional providers. Hospital expenses are only incurred in connection with the services HCP provides in Florida, Nevada and Arizona. In those regions, as described above, HCP enters into contracts with health plans pursuant to which it assumes the risk for institutional hospital services. In contrast in California, HCP's medical groups were not permitted to contract with health plans to directly assume the risk for institutional services. Accordingly, the risk-share revenue that HCP records in California is net of reported claims and estimates of hospital utilization and associated costs incurred by assigned health plan enrollees, and no portion of institutional hospital costs incurred with respect to HCP's California operations is included in hospital expenses as presented. However, as a result of HCP obtaining a restricted Knox-Keene license in December 2013 as discussed above, HCP may now assume the risk for institutional services in California.

Clinic support and other operating costs. Clinic support and other operating costs primarily consist of the costs incurred with respect to compensation of administrative and other support staff employed at HCP's medical clinics, clinic rent and utilities, medical supplies and other direct costs incurred to support clinic operations.

Other operating expenses

General and administrative. General and administrative expenses are those costs directly related to corporate administrative functions in supporting HCP and consist primarily of salaries and benefits, professional fees and occupancy costs.

Equity investment income. HCPAMG is a 50% owner of the Magan joint venture with The Magan Medical Clinic, Inc. HCP also owns a 67% ownership interest in CMGI. HCP is a 50% owner of a joint venture with Independence Blue Cross, Tandigm Health, LLC, and is also a 50% owner of FullWell, LLC, a joint venture with Centura Health Corporation. We account for these equity investment interests under the equity method of accounting, meaning that their assets and liabilities are not consolidated with ours, but we recognize our pro rata ownership share of the entities' earnings as equity investment income.

Results of Operations

The following table reflects the results of operations for the HCP business:

	Year ended December 31,					
	2015		2014		2013	
	(dollar amounts rounded to nearest millions)					
Net revenues:						
HCP capitated revenue	$ 3,437	90%	$ 3,191	91%	$ 2,920	91%
Patient service revenue	333	—	232	—	232	—
Less: Provision for uncollectible accounts	(15)	—	(13)	—	(12)	—
Net patient service revenue	318	8%	219	6%	220	7%
Other revenues	82	2%	92	3%	56	2%
Total net revenues	$ 3,837	100%	$ 3,502	100%	$ 3,196	100%
Operating expenses:						
Patient care costs	$ 3,006	78%	$ 2,796	80%	$ 2,405	75%
General and administrative expense	421	11%	331	9%	270	9%
Depreciation and amortization	174	5%	170	5%	159	5%
Goodwill and other intangible asset impairment charges	206	5%	—	—	—	—
Equity investment income	(4)	—	(10)	—	(23)	(1%)
Total expenses	3,803	99%	3,287	94%	2,811	88%
Operating income	$ 34	1%	$ 215	6%	$ 385	12%

Capitated membership information

The table set forth below provides (i) the total number of capitated members to whom HCP provided healthcare services as of December 31, 2015, 2014 and 2013, and (ii) the aggregate member months as of December 31, 2015, 2014 and 2013. Member months represent the aggregate number of months of healthcare services HCP has provided to capitated members during a period of time.

	Members at December 31,			Member months for the year ended December 31,		
	2015	2014	2013	2015	2014	2013
Payor classification:						
Senior	317,400	310,500	265,000	3,774,300	3,587,900	2,911,700
Commercial	367,400	387,400	403,400	4,497,900	4,713,100	4,955,000
Medicaid	122,600	139,400	96,100	1,556,400	1,465,200	1,106,700
	807,400	837,300	764,500	9,828,600	9,766,200	8,973,400

In addition to the members above, HCP provided healthcare services to members in two of its operating unconsolidated joint ventures that are accounted for as equity investments. These joint ventures provided healthcare services for approximately 131,000, 45,700 and 45,100 members as of December 31, 2015, 2014 and 2013, respectively, and for approximately 1,564,200, 538,000 and 557,000 member months as of December 31, 2015, 2014 and 2013, respectively. The increase in members and member months was due to Tandigm Health beginning operations in 2015.

During the year ended December 31, 2015, HCP members decreased by approximately 29,900 and member months increased approximately 62,400. The decrease in members is due to a planned reduction in Medicaid members and a decline in commercial members as employers shift to less expensive options for medical services for their employees, partially offset by an increase in senior members due to non-acquired growth. The increase in member months was primarily attributable to an increase in senior members resulting from non-acquired growth, new acquisitions and an increase in Medicaid members due to Medicaid expansion. This increase in member months was partially offset by a planned non-renewal of certain plans in certain markets due to unfavorable economics.

During the year ended December 31, 2014, HCP members and member months increased by approximately 72,800 and 792,800, respectively. The increases in members and member months were primarily attributable to an increase in senior members resulting from non-acquired growth, new acquisitions and an increase in Medicaid members due to Medicaid expansion, partially offset by a decline in commercial members.

Revenues

The following table provides a breakdown of HCP's revenue by source:

	Year ended December 31,					
	2015		2014		2013	
	(dollars in millions)					
HCP revenues:						
Commercial revenues	$ 727	19%	$ 726	21%	$ 715	22%
Senior revenues	2,473	65%	2,319	66%	2,137	67%
Medicaid revenues	237	6%	146	4%	68	2%
Total capitated revenues	3,437	90%	3,191	91%	2,920	91%
Patient service revenue, net of provision for uncollectible accounts	318	8%	219	6%	220	7%
Other revenues	82	2%	92	3%	56	2%
Total net revenues	$ 3,837	100%	$ 3,502	100%	$ 3,196	100%

Net revenues

HCP's net revenue for 2015 increased $335 million, or 9.6%, primarily driven by an increase in FFS revenue from acquisitions, an increase in senior capitated revenue due to an increase in the number of senior capitated members during the year that is attributable to non-acquired growth and acquisitions, an increase in Medicaid memberships due to Medicaid expansion, recognition of additional Medicaid risk-share revenue due to decreased costs related to lower claims, as well as higher commercial negotiated rates for commercial members. These increases in net revenues are partially offset by a decrease in senior capitated revenues due to the planned non-renewal of some plans due to unfavorable economics in certain markets.

HCP's net revenue for 2014 increased $306 million, or 9.6%, primarily driven by an increase in the number of senior capitated members during the year due to organic growth and acquisitions, an increase in Medicaid memberships due to Medicaid expansion and recognition of additional HCP revenue related to the maintenance of existing physician networks, partially offset by a decline in Medicare Advantage reimbursement rates, and a decline in the number of commercial members to whom HCP provides healthcare services.

On April 6, 2015, CMS issued final guidance for 2016 Medicare Advantage rates, which incorporated a modification to the risk adjustment model calculation that CMS utilizes to determine the risk acuity scores of Medicare Advantage patients. We estimate that the final cumulative impact of the 2016 rate structure will represent a decrease of approximately 2.0% of HCP's average Medicare Advantage revenues it manages on behalf of its senior capitated population as compared to 2015, which compares to the industry average rate increase of approximately 1.25% as indicated by CMS.

The more significant decline in Medicare Advantage rates for HCP compared to the industry average is driven by a larger-than-average decline associated with CMS's modification to the risk adjustment model calculations. The full implementation of the 2014 CMS-HCC Risk Adjustment model negatively affects HCP and other providers like us who have invested more heavily in wellness and prevention programs for patients with chronic conditions.

Patient care costs

The following table reflects HCP's patient care costs comprised of medical expenses, hospital expenses, clinic support and other operating costs:

	Year ended December 31,		
	2015	2014	2013
	(dollars in millions)		
Medical expenses	$ 1,865	$ 1,734	$ 1,545
Hospital expenses	602	586	434
Clinic support and other operating costs	539	476	426
Total	$ 3,006	$ 2,796	$ 2,405

Operating expenses

Patient care costs. HCP's patient care costs for 2015 increased by approximately $210 million from 2014. The increase was primarily attributable to increases in medical claim expenses and hospital expenses due to increases in senior and Medicaid member months from acquisitions, non-acquired growth, Medicaid expansion, as well as market expansion and the timing of the recognition of additional benefit expense related to higher Medicaid risk sharing revenues. The increase was also driven by an increase in clinic support costs due to acquisitions. The increase in costs was partially offset by a decrease in commercial members to whom HCP provides healthcare services and a decrease in costs due to the planned non-renewal of some plans due to unfavorable economics in certain markets.

HCP's patient care costs for 2014 increased by approximately $391 million from 2013. The increase was primarily attributable to increases in medical claim expenses and hospital expenses due to increases in senior and Medicaid memberships from acquisitions, non-acquired growth, Medicaid expansion, and an increase in utilization. The increase was also driven by an increase in clinic support costs due to acquisitions.

General and administrative expenses. HCP's general and administrative costs for 2015 increased $90 million from 2014. The increase was primarily attributable to an increase in corporate administrative support costs related to growth initiatives, professional fees, recognition of additional compensation expense, and travel costs.

HCP's general and administrative costs for 2014 increased $61 million from 2013. The increase was primarily attributable to an increase in corporate administrative support departments to accommodate additional acquisitions during 2014, an increase in utilization of professional services related to IT infrastructure projects and management bonuses related to retention of key personnel.

Depreciation and amortization. HCP's depreciation and amortization for 2015 increased $4 million from 2014. The increase is primarily attributable to depreciation and amortization of assets associated with acquisitions.

HCP's depreciation and amortization for 2014 increased $11 million from 2013. The increase is primarily attributable to depreciation and amortization of assets associated with acquisitions.

Goodwill and other intangible asset impairment charges. During the quarter ended December 31, 2015, we determined that circumstances indicated it had become more likely than not that the goodwill and an indefinite-lived intangible asset of certain HCP reporting units had become impaired. These circumstances included underperformance of the business in recent quarters, as well as changes in other market conditions, including government reimbursement cuts and our expected ability to mitigate them. We are performing the required valuation of these reporting units and have estimated the fair value of their net assets and implied goodwill with the assistance of a third-party valuation firm. Based on the current assessments, we recorded an estimated $206 million in goodwill and other intangible asset impairment charges. The final amount of these impairment charges will depend upon the final outcome of this valuation work, which we expect will be completed in the first quarter of 2016.

Equity investment income. HCP's share of equity investment income from our unconsolidated joint venture relationships for 2015 decreased $6 million from 2014. The decrease in equity income is primarily attributable to our share of expenses from a certain newly formed joint venture that provides integrated healthcare and reduced commercial risk pool performance.

HCP's share of equity investment income from our joint venture relationships for 2014 decreased $13 million from 2013. The decrease in equity income is primarily attributable to our share of initial expenses of a newly formed joint venture and increased professional capitation costs related to our other joint venture.

Segment operating income

HCP's operating income for 2015 decreased $181 million, including estimated goodwill and other intangible asset impairment charges of $206 million in 2015 related to certain reporting units. Excluding the impairment charges from 2015, adjusted HCP operating income for the year ended December 31, 2015 would have increased by approximately $25 million, or 11.6%. The increase in adjusted HCP operating income was primarily attributable to an increase in FFS revenue from acquisitions and non-acquired growth, an increase in Medicaid members due to Medicaid expansion, the timing of recognition of additional Medicare risk share revenue and a reduction of claims expense due to the planned non-renewal of some plans due to unfavorable economics in certain markets. This increase was partially offset by a decrease in commercial members, and higher general and administrative costs.

HCP's operating income for 2014 decreased $170 million. The decrease was primarily attributable to a decrease in Medicare Advantage rates, a decrease in commercial memberships and higher medical expenses, partially offset by an increase in Medicare and Medicaid revenues due to increases in senior capitated members from acquisitions and Medicaid expansion.

Other—Ancillary services and strategic initiatives business

Our other operations include ancillary services and strategic initiatives which are primarily aligned with our core business of providing dialysis services to our network of patients. As of December 31, 2015, these consisted primarily of pharmacy services, disease management services, vascular access services, clinical research programs, physician services, direct primary care and our international dialysis operations. The ancillary services and strategic initiatives generated approximately $1.382 billion of net revenues in 2015, representing approximately 10% of our consolidated net revenues. We currently expect to continue to invest in our ancillary services and strategic initiatives including our continued expansion into certain international markets as we work to develop successful new business operations. However, any significant change in market conditions, business performance or in the regulatory environment may impact the economic viability of any of these strategic initiatives. Any unfavorable changes in these strategic initiatives could result in a write-off or an impairment of some or all of our investments, including goodwill, and could also result in significant termination costs if we were to exit a certain line of business or one or more of our international markets.

As of December 31, 2015, we provided dialysis and administrative services to a total of 118 outpatient dialysis centers located in ten countries outside of the U.S., and we owned a minority equity investment in a primary care and multi-specialty chain in India. Our international dialysis operations are still in an early phase of development as we primarily commenced operations during the fourth quarter of 2011. The total net revenues generated from our international operations, as reflected below, were approximately 1% of our 2015 consolidated net revenues.

The following table reflects the results of operations for the ancillary services and strategic initiatives:

	Year ended December 31,		
	2015	2014	2013
	(dollar amounts rounded to nearest million)		
U.S. revenues			
Net patient service revenues	$ 26	$ 20	$ 15
Other revenues	1,144	941	703
Capitated revenues	72	70	67
Total	1,242	1,031	785
International revenues			
Net patient service revenues	134	102	61
Other revenues	6	6	6
Total	140	108	67
Total net revenues	$ 1,382	$ 1,139	$ 852
Total segment operating loss	$ (104)	$ (25)	$ (39)

Net revenues

The ancillary services and strategic initiatives net revenues for 2015 increased by approximately $243 million, or 21.3%, as compared to 2014. The increase was primarily related to an increase in pharmacy services volume and pharmaceutical rates, as well as an increase in net revenues from growth in our international business and other strategic initiatives. These increases were partially offset by an increase in reserves for refunds of prior period pharmacy reimbursements.

The ancillary services and strategic initiatives net revenues for 2014 increased by approximately $287 million, or 33.7%, as compared to 2013, primarily from growth in prescriptions dispensed, increases in other pharmacy services revenue and growth in our international operations.

Operating expenses

Ancillary services and strategic initiatives operating expenses for 2015 increased by approximately $322 million from 2014 which includes an estimated accrual for damages and liabilities associated with our pharmacy business of $22 million, as well as a goodwill impairment charge of $4 million related to one of our international reporting units during the second quarter of 2015. Excluding these items from 2015, the ancillary services and strategic initiatives adjusted operating expenses would have increased by $296 million. The increase in adjusted operating expenses was primarily due to an increase in prescription dispensing volume, higher pharmaceutical costs, higher labor costs and related payroll taxes and benefit costs, additional expenses associated with our international dialysis expansion, and an increase in costs associated with the right to use intellectual property and general and administrative and corporate administrative support expenses.

Ancillary services and strategic initiatives operating expenses for 2014 increased by approximately $273 million from 2013. The increase in operating expenses was primarily due to an increase in prescription dispensing volume and costs in our pharmacy business, an increase in expenses associated with our international dialysis expansion into Europe, Middle East, South America and Asia Pacific, higher labor costs and related payroll taxes, an increase in benefit costs and an increase in business related licensing and the right to use newly developed intellectual property and corporate administrative support expenses.

Operating loss

Ancillary services and strategic initiatives operating losses for 2015 increased by approximately $79 million from 2014 which includes an estimated accrual for damages and liabilities of $22 million, as well as a goodwill impairment charge of $4 million related to our international operations during the second quarter of 2015. Excluding these items from 2015, the ancillary services and strategic initiatives adjusted operating losses would have increased by $53 million. This increase in adjusted operating losses was primarily due to an increase in drug prescription costs associated with our pharmacy business, higher labor costs, increases in expenses related to our international expansion, an increase in costs associated with the right to use intellectual property and an increase in general and administrative costs. The increase in adjusted operating losses was partially offset by an increase in net revenue in our pharmacy business, primarily from additional volume and increases in pharmaceutical rates.

Ancillary services and strategic initiatives operating losses for 2014 decreased by approximately $14 million from 2013. This decrease in operating losses was primarily due to improved operating performance of our pharmacy business related to increased prescriptions dispensed and pharmacy services rendered, partially offset by an increase in labor costs and related payroll taxes, an increase in benefit costs and an increase in costs associated with international dialysis expansion.

Corporate level charges

Debt expense. Debt expense for 2015, 2014, and 2013 consisted of interest expense of approximately $390 million, $386 million, and $401 million, respectively, and the amortization and accretion of debt discounts and premiums, the amortization of deferred financing costs and the amortization of interest rate cap agreements of approximately $18 million in 2015, $25 million in 2014 and $29 million in 2013. The increase in debt expense in 2015 as compared to 2014, was primarily related to an increase in weighted average outstanding principal balances offset by lower weighted average interest rates as a result of the issuance of our 5.0% Senior Notes in April 2015, as well as the entry into a new credit agreement and the issuance of senior notes in June 2014, as discussed below. Our overall weighted average effective interest rate in 2015 was 4.42% as compared to 4.68% in 2014.

The decrease in debt expense in 2014 as compared to 2013 was primarily related to our credit agreement issued in June 2014, as well as the issuance of our 5 ⅛% Senior Notes that were entered into in the second quarter of 2014 that contain lower weighted average interest rates and from lower average interest rates associated with the unhedged portion of Term Loan A. Our overall weighted average effective interest rate in 2014 was 4.68% as compared to 4.84% in 2013.

Other income. Other income was approximately $9 million, $2 million, and $5 million in 2015, 2014, and 2013, respectively, and consisted principally of interest income. Other income increased in 2015 as compared to 2014 due to an increase in short-term investment interest income and a decrease in foreign currency transaction losses. Other income in 2014 decreased from 2013, primarily as a result of the impact of certain foreign currency transactions, partially offset by an increase in short-term investment interest income.

Provision for income taxes. The provision for income taxes for 2015 represented an effective annualized tax rate of 40.9%, compared with 34.1% and 33.9% of income from continuing operations in 2014 and 2013, respectively. The effective tax rate in 2015 was higher primarily due to the impairment of goodwill in 2015.

Noncontrolling interests

Net income attributable to noncontrolling interests for 2015, 2014 and 2013 was approximately $158 million, $140 million and $124 million, respectively. The increases in noncontrolling interests in 2015 and 2014 were primarily due to increases in the number of new joint ventures and increases in the profitability of our dialysis-related joint ventures. The percentage of U.S. dialysis and related lab services net revenues generated from dialysis-related joint ventures was approximately 23%, 22% and 21% in 2015, 2014 and 2013, respectively.

Accounts receivable

Our U.S. dialysis and related lab services accounts receivable balances at December 31, 2015 and December 31, 2014 were $1.255 billion and $1.157 billion, respectively, representing approximately 53 days and 50 days of revenue, respectively, net of bad debt provision. The increase in day sales outstanding (DSO) for the U.S. dialysis and related lab services business, was primarily the result of the continued rollout of our billing system in 2015, as well as improved cash collection performance in 2014 that positively impacted the DSO in 2014 which we did not experience in 2015. Our DSO calculation is based on the current quarter's average revenues per day.

As of December 31, 2015 and 2014, our dialysis and related lab services unreserved accounts receivable balances that were more than six months old were approximately $233 million and $152 million, respectively, representing approximately 18% and 13% of our dialysis accounts receivable balances, respectively. There were no significant unreserved balances over one year old. Less than 1% of our revenues are classified as patient pay. Substantially all revenue realized is from government and commercial payors, as discussed above.

Amounts pending approval from third-party payors as of December 31, 2015 and 2014, other than the standard monthly billing, consisted of approximately $106 million in 2015 and $119 million in 2014, associated with Medicare bad debt claims, classified as other receivables. Currently, a significant portion of our Medicare bad debt claims are typically paid to us before the Medicare fiscal intermediary audits the claims. However, the payment received from Medicare is subject to adjustment based upon the actual results of the audits. Such audits typically occur one to four years after the claims are filed. As a kidney dialysis provider, our revenue is not subject to cost report settlements, except for potentially limiting the collectability of these Medicare bad debt claims.

Liquidity and capital resources

Available liquidity. As of December 31, 2015, our cash balance was $1.5 billion and we also had approximately $408 million in short-term investments. We also had an undrawn revolving line of credit under our Senior Secured Credit Facilities totaling $1.0 billion, of which approximately $92.2 million was committed for outstanding letters of credit. In addition, HCP has an outstanding letter of credit of approximately $1.3 million that is secured by a certificate of deposit. We believe that we will have sufficient liquidity, operating cash flows and access to borrowings to fund our scheduled debt service payments and other obligations for the foreseeable future. Our primary sources of liquidity are cash from operations and cash from borrowings.

Cash flow from operations during 2015 amounted to $1.6 billion, compared with $1.5 billion for 2014. The increase in our operating cash flows in 2015 as compared to 2014 was primarily due to the timing of other working capital items, a decrease in our income tax payments and a reduction in our net settlement payments and charges, offset by an increase in our cash interest payments. Cash flow from operations in 2015 included cash interest payments of approximately $405 million and cash tax payments of $156 million. Cash flow from operations in 2014 included cash interest payments of approximately $352 million and cash tax payments of $239 million.

Non-operating cash outflows in 2015 included $708 million for capital asset expenditures, including $381 million for new center developments and relocations, and $327 million for maintenance and information technology. We also spent an additional $97 million for acquisitions. During 2015, we also received $1.6 billion from the maturity and sale of investments. However, some of these proceeds were either used to repurchase other investments or were used to fund distributions from our deferred compensation plans. In addition, during 2015, we received $54 million associated with stock option exercises and other share issuances and the related excess tax benefits. We also made distributions to noncontrolling interests of $175 million, and received contributions from noncontrolling interests of $55 million associated with new joint ventures and from additional equity contributions. We also repurchased a total of 7,779,958 shares of our common stock for $575 million, or an average price of $73.96 per share, of which $25 million was unsettled at December 31, 2015.

Non-operating cash outflows in 2014 included $641 million for capital asset expenditures, including $376 million for new center developments and relocations, and $265 million for maintenance and information technology. We also spent an additional $272 million for acquisitions. During 2014, we also received $144 million from the maturity and sale of investments. However, some of these proceeds were either used to repurchase other investments or were used to fund distributions from our deferred compensation plans. In addition, during 2014, we received $65 million associated with stock option exercises and other share issuances and the related excess tax benefits. We also made distributions to noncontrolling interests of $149 million, and received contributions from noncontrolling interests of $65 million associated with new joint ventures and from additional equity contributions. We did not repurchase any shares of our common stock in 2014.

On August 17, 2015, we entered into a definitive agreement to acquire Colorado-based Renal Ventures Limited, LLC (Renal Ventures), including a 100% interest in all dialysis centers owned by Renal Ventures, for approximately $415 million in cash, subject to, among other things, adjustments for certain items such as working capital. Renal Ventures currently operates 36 dialysis clinics in six states serving approximately 2,400 patients, and also operates other ancillary businesses. The transaction is subject to approval by the Federal Trade Commission (FTC) including Hart-Scott-Rodino antitrust clearance. We anticipate that we will be required by the FTC to divest a certain number of outpatient dialysis centers as a condition of the transaction. We currently expect this transaction to close in 2016.

On November 23, 2015, we entered into a definitive merger agreement to acquire The Everett Clinic Medical Group (TEC), a Washington state physician group, for approximately $385 million in cash, subject to, among other things, adjustments for certain items such as working capital. TEC has 500 providers in primary and specialty care locations throughout Snohomish County, Washington who care for more than 315,000 patients. We currently expect this transaction to close in early 2016.

During 2015, we opened 72 new U.S. dialysis centers, acquired a total of six U.S. dialysis centers, sold one center, merged five centers, added two centers in which we operate under a management and administrative services agreement and closed two centers. Outside the U.S., we acquired 21 dialysis centers, opened seven new dialysis and hospital operated centers, and terminated one management and administration services agreement.

During 2015, our HCP business acquired three family practices, one management services organization, two primary care practices, and six private medical practices.

During the year ended December 31, 2015, we made mandatory principal payments under our Senior Secured Credit Facilities totaling $50 million on the Term Loan A and $35 million on the Term Loan B.

During 2014, we opened 105 new U.S. dialysis centers, acquired a total of 18 U.S. dialysis centers, sold one center, merged 16 centers and closed one center. Outside the U.S., we acquired seven dialysis centers, opened 11 new dialysis and hospital operated centers, closed two dialysis centers and added a net two centers in which we operate under management and administration services agreements. During 2014, our HCP business acquired a family practice, a management services organization, two primary care practices, and eight private medical practices.

Debt transactions

In April 2015, we issued $1.5 billion 5.0% Senior Notes due 2025 (5.0% Senior Notes). The 5.0% Senior Notes pay interest on May 1 and November 1 of each year beginning November 1, 2015. The 5.0% Senior Notes are unsecured senior obligations and rank equally in right of payment with our existing and future unsecured senior indebtedness. The 5.0% Senior Notes are guaranteed by certain of our domestic subsidiaries. We may redeem up to 35% of the 5.0% Senior Notes at any time prior to May 1, 2018 at a certain specified price from the proceeds of one or more equity offerings. In addition, we may redeem some or all of the 5.0% Senior Notes at any time prior to May 1, 2020 at make whole redemption rates and on or after such date at certain specified redemption prices. The net proceeds from the 5.0% Senior Notes offering were used to repurchase all of the outstanding $775 million aggregate principal amount of 6 ⅝% Senior Notes due 2020 (6 ⅝% Senior Notes) through a combination of a tender offer and a redemption process and to pay fees and expenses. The remaining net offering proceeds will be used for general corporate purposes, future acquisitions and share repurchases. As a result of these transactions, we incurred $48 million in debt redemption charges consisting of tender and redemption premiums as well as the write-off of deferred financing fees associated with the repurchase of the 6 ⅝% Senior Notes.

Interest rate swap and cap agreements

As of December 31, 2015, we maintain several interest rate swap agreements that were entered into in March 2013 with amortizing notional amounts of these swap agreements totaling $760 million. These agreements have the economic effect of modifying the LIBOR variable component of our interest rate on an equivalent amount of our Term Loan A to fixed rates ranging from 0.49% to 0.52%, resulting in an overall weighted average effective interest rate of 2.26%, including the Term Loan A margin of 1.75%. The overall weighted average effective interest rate also includes the effects of $165 million of unhedged Term Loan A debt that bears interest at LIBOR plus an interest rate margin of 1.75%. The swap agreements expire on September 30, 2016 and require monthly interest payments. During the year ended December 31, 2015, we recognized debt expense of $2.7 million from these swaps. As of December 31, 2015, the total fair value of these swap agreements was a net asset of approximately $0.5 million. During the year ended December 31, 2015, we recorded a loss of $4.0 million in other comprehensive income due to a decrease in the unrealized fair value of these swap agreements. We estimate that approximately $0.5 million of existing unrealized pre-tax gains in other comprehensive income at December 31, 2015 will be reclassified into income over the next twelve months.

As of December 31, 2015, we maintain several forward interest rate cap agreements that were entered into in October 2015 with notional amounts totaling $3.5 billion. These forward cap agreements will be effective June 29, 2018 and will have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 3.50% on an equivalent amount of our debt. These cap agreements expire on June 30, 2020. As of December 31, 2015, the total fair value of these cap agreements was an asset of approximately $13.8 million. During the year ended December 31, 2015, we recorded a loss of $3.5 million in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

As of December 31, 2015, we maintain several forward interest rate cap agreements that were entered into in November 2014 with notional amounts totaling $3.5 billion. These forward cap agreements will be effective September 30, 2016 and will have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 3.50% on an equivalent amount of our debt. The cap agreements expire on June 30, 2018. As of December 31, 2015, the total fair value of these cap agreements was an asset of approximately $1.3 million. During the year ended December 31, 2015, we recorded a loss of $11.0 million in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

As of December 31, 2015, we maintain several interest rate cap agreements that were entered into in March 2013 with notional amounts totaling $2.7 billion on our Term Loan B debt. These agreements have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 2.50% on an equivalent amount of our Term Loan B. During the year ended December 31, 2015, we recognized debt expense of $2.4 million from these caps. The cap agreements expire on September 30, 2016. As of December 31, 2015, the total fair value of these cap agreements was immaterial. During the year ended December 31, 2015, we recorded a loss of $1.6 million in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

Other items

As a result of an embedded LIBOR floor on the Term Loan B debt agreement and the swap and cap agreements, our overall weighted average effective interest rate on the Senior Secured Credit Facilities was 3.46%, based on the current margins in effect of 1.75% for the Term Loan A and 2.75% for the Term Loan B, as of December 31, 2015.

As of December 31, 2015, the interest rate on our Term Loan B debt is effectively fixed subject to an embedded LIBOR floor which is higher than actual LIBOR as of such date and the Term Loan B is also subject to an interest rate cap if LIBOR should rise above 2.50%. Interest rates on our senior notes are fixed by their terms. The LIBOR variable component of our interest rate on the majority of our Term Loan A is economically fixed as a result of interest rate swaps.

Our overall weighted average effective interest rate during the year ended December 31, 2015 was 4.42% and as of December 31, 2015 was 4.39%.

As of December 31, 2015, we had undrawn revolving credit facilities totaling $1.0 billion of which approximately $92.2 million was committed for outstanding letters of credit. The remaining amount is unencumbered. In addition, HCP has an outstanding letter of credit of approximately $1.3 million that is secured by a certificate of deposit.

Goodwill and indefinite-lived intangible assets

During the quarter ended December 31, 2015, we determined that circumstances indicated it had become more likely than not that the goodwill and an indefinite-lived intangible asset of certain HCP reporting units had become impaired.

These circumstances included underperformance of the business in recent quarters, as well as changes in other market conditions, including government reimbursement cuts and our expected ability to mitigate them. We are performing the required

valuation of certain HCP reporting units and have estimated the fair value of their net assets and implied goodwill with the assistance of a third-party valuation firm. Based on our current assessments, we recorded an estimated $206 million in non-cash goodwill and other intangible asset impairment charges of certain HCP reporting units. The final amount of these impairment charges will depend upon the final outcome of this valuation work, which we expect will be completed in the first quarter of 2016.

Our HCP Nevada, HCP Florida, HCP Colorado and Kidney Care Malaysia reporting units remain at risk of further goodwill impairment. As of December 31, 2015, these reporting units have goodwill amounts of $424,468, $530,075, $16,897, and $13,329, respectively. As of December 31, 2015, the estimated fair values of the HCP Nevada, HCP Florida, HCP Colorado and Kidney Care Malaysia reporting units exceeded (fell short of) from their total carrying amounts by approximately (3.4)%, 0.7%, 9.5% and 11.2%, respectively.

For our at-risk HCP reporting units, further reductions in reimbursement rates or other significant adverse changes in expected future cash flows or valuation assumptions could result in further goodwill impairment charges in the future. For example, a sustained, long-term reduction of 3% in operating income for HCP Nevada or HCP Florida could reduce their estimated fair values by up to 2.0% and 1.6%, respectively. Separately, an increase in their respective discount rates of 100 basis points could reduce the estimated fair values of HCP Nevada and HCP Florida by up to 2.9% and 2.8%, respectively.

In addition, we recorded a $4 million impairment charge related to one of our international reporting units.

Long-term incentive compensation

Long-term incentive program (LTIP) compensation includes both stock-based awards (principally stock-settled stock appreciation rights, restricted stock units and performance stock units) as well as long-term performance-based cash awards. Long-term incentive compensation expense, which was primarily general and administrative in nature, was attributed among the dialysis and related lab services business, the HCP business, corporate administrative support, and the ancillary services and strategic initiatives.

Our stock-based compensation awards are measured at their estimated fair values on the date of grant if settled in shares or at their estimated fair values at the end of each reporting period if settled in cash. The value of stock-based awards so measured is recognized as compensation expense on a cumulative straight-line basis over the vesting terms of the awards, adjusted for expected forfeitures.

During 2015, we granted approximately 994 thousand stock-settled stock appreciation rights (SSARs) with an aggregate grant-date fair value of $17.9 million and a weighted-average expected life of approximately 4.1 years and approximately 279 thousand stock units with an aggregate grant-date fair value of $22.4 million and a weighted-average expected life of approximately 3.1 years.

Long-term incentive compensation costs of $130.7 million for the year ended December 31, 2015 increased by approximately $11.7 million as compared to 2014. The increase in long-term incentive compensation was primarily due to an increase in the value of LTIP awards that contributed expense during this period and LTIP award forfeitures realized at a lower rate than previously expected.

Long-term incentive compensation costs in 2014 increased by approximately $34.1 million as compared to 2013, primarily due to an increase in the value of LTIP awards that contributed expense during this period and LTIP award forfeitures realized at a lower rate than previously expected.

As of December 31, 2015, there was $124.0 million in total estimated but unrecognized long-term incentive compensation costs for LTIP awards outstanding, including $63.6 million relating to stock-based awards under our equity compensation plans. We expect to recognize the performance-based cash component of these LTIP costs over a weighted average remaining period of 1.0 years and the stock-based component of these LTIP costs over a weighted average remaining period of 1.3 years.

For the years ended December 31, 2015, 2014 and 2013, we received $45.7 million, $59.1 million and $46.9 million, respectively, in actual tax benefits upon the exercise of stock awards. As a result of issuing SSARs, beginning in 2013 we no longer have stock options outstanding and did not receive cash proceeds from stock option exercises during the years ended December 31, 2015, 2014 and 2013.

Stock repurchases

In 2015, we repurchased a total of 7,779,958 shares of our common stock for $575 million, or an average price of $73.96 per share. We also repurchased a total of 3,689,738 shares of our common stock for $249 million, or an average price of $67.61 per share, during January 2016.

On April 14, 2015, our Board of Directors approved additional share repurchases in the amount of $726 million. These approved share repurchases are in addition to the $274 million remaining at that time under our Board of Directors' prior share repurchase

approval announced in November 2010. As a result of the above transactions, there was approximately $259 million available under our current Board authorizations for additional share repurchases as of January 31, 2016. Our share repurchase authorizations have no expiration dates. However, we are subject to share repurchase limitations under the terms of our Senior Secured Credit Facility and the indentures governing our senior notes.

Off-balance sheet arrangements and aggregate contractual obligations

In addition to the debt obligations reflected on our balance sheet, we have commitments associated with operating leases and letters of credit, as well as potential obligations associated with our equity investments in nonconsolidated businesses and to dialysis centers that are wholly-owned by third parties. Substantially all of our U.S. dialysis facilities are leased. We have potential obligations to purchase the noncontrolling interests held by third parties in several of our majority-owned joint ventures, non-owned and minority-owned entities. These obligations are in the form of put provisions and are exercisable at the third-party owners' discretion within specified periods as outlined in each specific put provision. If these put provisions were exercised, we would be required to purchase the third-party owners' noncontrolling interests at either the appraised fair market value or a predetermined multiple of earnings or cash flow attributable to the noncontrolling interests put to us, which is intended to approximate fair value. The methodology we use to estimate the fair values of noncontrolling interests subject to put provisions assumes the higher of either a liquidation value of net assets or an average multiple of earnings, based on historical earnings, patient mix and other performance indicators that can affect future results, as well as other factors. The estimated fair values of the noncontrolling interests subject to put provisions is a critical accounting estimate that involves significant judgments and assumptions and may not be indicative of the actual values at which the noncontrolling interests may ultimately be settled, which could vary significantly from our current estimates. The estimated fair values of noncontrolling interests subject to put provisions can fluctuate and the implicit multiple of earnings at which these noncontrolling interests obligations may be settled will vary significantly depending upon market conditions including potential purchasers' access to the capital markets, which can impact the level of competition for dialysis and non-dialysis related businesses, the economic performance of these businesses and the restricted marketability of the third-party owners' noncontrolling interests. The amount of noncontrolling interests subject to put provisions that employ a contractually predetermined multiple of earnings rather than fair value are immaterial. For additional information see Note 18 to the consolidated financial statements.

We also have certain other potential commitments to provide operating capital to several dialysis centers that are wholly-owned by third parties or centers in which we own a minority equity investment as well as to physician-owned vascular access clinics or medical practices that we operate under management and administrative services agreements. We have certain other potential commitments related to service agreements of approximately $5.6 million.

The following is a summary of these contractual obligations and commitments as of December 31, 2015 (in millions):

	Less Than 1 year	2-3 years	4-5 years	After 5 years	Total
Scheduled payments under contractual obligations:					
Long-term debt	$ 113	$ 284	$ 765	$ 7,781	$ 8,943
Interest payments on the senior notes	237	473	473	840	2,023
Interest payments on the Term Loan B(1)	122	240	235	58	655
Interest payments on the Term Loan A(2)	20	35	7	—	62
Capital lease obligations	16	35	41	191	283
Operating leases	432	791	615	1,084	2,922
	$ 940	$ 1,858	$ 2,136	$ 9,954	$ 14,888
Potential cash requirements under existing commitments:					
Letters of credit	$ 94	$ —	$ —	$ —	$ 94
Noncontrolling interests subject to put provisions	501	126	128	109	864
Non-owned and minority owned put provisions	47	—	—	—	47
Operating capital advances	6	—	—	—	6
	$ 648	$ 126	$ 128	$ 109	$ 1,011

(1) Assuming no changes to LIBOR-based interest rates as the Term Loan B currently bears interest at LIBOR (floor of 0.75%) plus an interest rate margin of 2.75%.

(2) Based upon current LIBOR-based interest rates in effect at December 31, 2015 plus an interest rate margin of 1.75% for the Term Loan A.

The pay-fixed swap's obligations represent the estimated fair market values of our interest rate swap agreements that are based upon valuation models utilizing the income approach and commonly accepted valuation techniques that use inputs from closing prices for similar assets and liabilities in active markets as well as other relevant observable market inputs and other current market conditions that existed as of December 31, 2015. Currently all of our swaps are in an asset position. However, we could have a potential obligation that we would be required to pay based upon the estimated future settlement of each specific tranche over the term of the swap agreements, assuming no future changes in the forward yield curve if we were required to pay an amount in excess of what we would receive. The actual amount of our obligation associated with these swaps in the future will depend upon changes in the LIBOR-based interest rates that can fluctuate significantly depending upon market conditions, and other relevant factors that can affect the fair market value of these swap agreements.

We are committed to purchase a certain amount of our hemodialysis non-equipment product supplies, such as dialyzers, from Baxter at fixed prices through 2018.

In January 2010, we entered into and subsequently extended an agreement with FMC to purchase a certain amount of dialysis equipment, parts and supplies from FMC through February 29, 2016. We are currently renegotiating this agreement to extend the period of the agreement and to finalize the costs of our dialysis products. Our total expenditures for the year ended December 31, 2015 on such products were approximately 2% of our total U.S. operating expenses. The actual amount of purchases in future years from FMC will depend upon a number of factors, including the operating requirements of our centers, the number of centers we acquire, and growth of our existing centers.

In November 2011, we entered into a seven year Sourcing and Supply Agreement with Amgen that expires on December 31, 2018. Under the terms of the agreement we will purchase EPO in amounts necessary to meet no less than 90% of our requirements for ESAs. The actual amount of EPO that we will purchase from Amgen will depend upon the amount of EPO administered during dialysis as prescribed by physicians and the overall number of patients that we serve.

Settlements of approximately $51 million of existing income tax liabilities for unrecognized tax benefits, including interest, penalties and other long-term tax liabilities, are excluded from the above table as reasonably reliable estimates of their timing cannot be made.

Supplemental information concerning certain Physician Groups and unrestricted subsidiaries

The following information is presented as supplemental data as required by the indentures governing our senior notes.

We provide services to certain physician groups that, while consolidated in our financial statements for financial reporting purposes, are not subsidiaries of or owned by us, do not constitute "Subsidiaries", as defined in the indentures governing our outstanding senior notes, and do not guarantee those senior notes. In addition, we have entered into management agreements with these physician groups pursuant to which we receive management fees from the physician groups.

As of December 31, 2015, if these physician groups were not consolidated in our financial statements, our consolidated indebtedness would have been approximately $9.226 billion, our consolidated other liabilities (excluding indebtedness) would have been approximately $3.056 billion and our consolidated assets would have been approximately $17.956 billion. If these physician groups were not consolidated in our financial statements for the year ended December 31, 2015, our consolidated total net revenues (including approximately $650 million of management fees payable to us), consolidated operating income and consolidated net income would be reduced by approximately $1.132 billion, $82 million, and $52 million, respectively.

In addition, we own a 67% equity interest in CMGI, which is an Unrestricted Subsidiary as defined in the indentures governing our outstanding senior notes, and does not guarantee those senior notes. Our equity interest in CMGI is accounted for under the equity method of accounting, meaning that, although CMGI is not consolidated in our financial statements for financial reporting purposes, our consolidated income statement reflects our pro rata share of CMGI's net income as equity investment income.

For the year ended December 31, 2015, excluding our equity investment income attributable to CMGI, our consolidated operating income and consolidated net income would be decreased by approximately $13 thousand and $8 thousand, respectively. See Note 29 to the consolidated financial statements for further details.

Contingencies

The information in Note 17 to the consolidated financial statements of this report is incorporated by reference in response to this item.

Critical accounting policies, estimates and judgments

Our consolidated financial statements and accompanying notes are prepared in accordance with United States generally accepted accounting principles. These accounting principles require us to make estimates, judgments and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities, contingencies and temporary equity. All significant estimates, judgments and assumptions are developed based on the best information available to us at the time made and are regularly reviewed and updated when necessary. Actual results will generally differ from these estimates. Changes in estimates are reflected in our financial statements in the period of change based upon on-going actual experience trends, or subsequent settlements and realizations depending on the nature and predictability of the estimates and contingencies. Interim changes in estimates are applied prospectively within annual periods. Certain accounting estimates, including those concerning revenue recognition and accounts receivable, impairments of goodwill or other long-lived assets, accounting for income taxes, quarterly and annual variable compensation accruals, consolidation of variable interest entities, purchase accounting valuation estimates, fair value estimates, stock-based compensation and medical liability claims are considered to be critical to evaluating and understanding our financial results because they involve inherently uncertain matters and their application requires the most difficult and complex judgments and estimates.

Dialysis and related lab services revenue recognition and accounts receivable. There are significant estimating risks associated with the amount of dialysis and related lab services revenue that we recognize in a given reporting period. Payment rates are often subject to significant uncertainties related to wide variations in the coverage terms of the commercial healthcare plans under which we receive payments. In addition, ongoing insurance coverage changes, geographic coverage differences, differing interpretations of contract coverage, and other payor issues complicate the billing and collection process. Net revenue recognition and allowances for uncollectible billings require the use of estimates of the amounts that will ultimately be realized considering, among other items, retroactive adjustments that may be associated with regulatory reviews, audits, billing reviews and other matters.

Revenues associated with Medicare and Medicaid programs are recognized based on (a) the payment rates that are established by statute or regulation for the portion of the payment rates paid by the government payor (e.g., 80% for Medicare patients) and (b) for the portion not paid by the primary government payor, the estimated amounts that will ultimately be collectible from other government programs paying secondary coverage (e.g., Medicaid secondary coverage), the patient's commercial health plan secondary coverage, or the patient. Effective January 1, 2011, our dialysis related reimbursements from Medicare became subject to certain variations under Medicare's new single bundled payment rate system whereby our reimbursements can be adjusted for certain patient characteristics and certain other factors. Our revenue recognition depends upon our ability to effectively capture, document and bill for Medicare's base payment rate and these other factors. In addition, as a result of the potential range of variations that can occur in our dialysis-related reimbursements from Medicare under the new single bundled payment rate system, our revenue recognition is now subject to a greater degree of estimating risk.

Commercial healthcare plans, including contracted managed-care payors, are billed at our usual and customary rates; however, revenue is recognized based on estimated net realizable revenue for the services provided. Net realizable revenue is estimated based on contractual terms for the patients covered under commercial healthcare plans with which we have formal agreements, non-contracted commercial healthcare plan coverage terms if known, estimated secondary collections, historical collection experience, historical trends of refunds and payor payment adjustments (retractions), inefficiencies in our billing and collection processes that can result in denied claims for payments, a slowdown in collections, a reduction in the amounts that we expect to collect and regulatory compliance issues. Determining applicable primary and secondary coverage for our approximately 180,000 U.S. patients at any point in time, together with the changes in patient coverage's that occur each month, requires complex, resource-intensive processes. Collections, refunds and payor retractions typically continue to occur for up to three years or longer after services are provided.

We generally expect our range of dialysis and related lab services revenues estimating risk to be within 1% of its revenue, which can represent as much as 5% of dialysis and related lab services' adjusted operating income. Changes in estimates are reflected in the then-current financial statements based on on-going actual experience trends, or subsequent settlements and realizations depending on the nature and predictability of the estimates and contingencies. Changes in revenue estimates for prior periods are separately disclosed and reported if material to the current reporting period and longer term trend analyses, and have not been significant.

Lab service revenues for current period dates of services are recognized at the estimated net realizable amounts to be received.

HCP revenue recognition. HCP revenues consist primarily of fees for medical services provided under capitated contracts with various health plans and under risk-sharing programs. Revenues with respect to both professional and institutional capitation are recognized in the month in which enrollees are entitled to receive healthcare and are based on the number of enrollees selecting an HCP associated group physician employed or affiliated with one of HCP's medical group entities as their primary healthcare provider. Capitation payments received for enrollees under Medicare Advantage plans are subject to retroactive adjustment depending upon certain clinical and demographic factors. We estimate the amount of current year adjustments in revenues during the first and second quarters of any given year and adjust our estimates during the third quarter upon receipt of payments from CMS related to prior year. Any difference between actual contract settlements and estimated revenues are recorded in the year of final settlement.

In addition, as compensation under HCP's various managed care-related agreements with hospitals, we are entitled to receive a percentage of the amount by which the institutional capitation revenue received from health plans exceeds institutional expenses, and any such risk-share amount to which we are entitled is recorded as HCP revenues. In addition, pursuant to such managed care-related agreements, HCP agrees to be responsible should the third party incur a deficit as a result of institutional expenses being in excess of institutional capitation revenue. As with global capitation, revenue with respect to professional capitation is reported in the month in which enrollees are entitled to receive healthcare. However, risk-share revenues (that is, the portion of the excess of institutional capitation revenue to which HCP is entitled less institutional expenses), in contrast, are based on the number of enrollees and significant estimating risk relating to institutional utilization and associated costs incurred by assigned health plan enrollees. The medical groups also receive other incentive payments from health plans based on specified performance and quality criteria and the amounts accrued when earned can be reasonably estimated. Differences between actual contract settlements and estimated receivables and payables are recorded in the year of final settlement. In 2013, HCP obtained a restricted Knox-Keene license in California, which now permits HCP to enter into contracts with health plans allowing it to recognize revenue under global capitation arrangements for both professional and institutional services.

Impairments of long-lived assets. We account for impairments of long-lived assets, which include property and equipment, equity investments in non-consolidated businesses, amortizable intangible assets, indefinite-lived intangible assets and goodwill, in accordance with the provisions of applicable accounting guidance. Goodwill is not amortized, but is assessed for valuation impairment as circumstances warrant and at least annually. An impairment charge would be recorded to the extent that the carrying amount of a reporting unit's goodwill exceeds its implied fair value. Impairment reviews on other long-lived assets are also performed at least annually and whenever a change in condition occurs which indicates that the carrying amounts of assets may not be recoverable.

Such changes include changes in our business strategies and plans, changes in the quality or structure of our relationships with our partners, changes in reimbursement rates, deteriorating operating performance of individual dialysis centers or other operations. We use a variety of factors to assess the realizable value of assets depending on their nature and use. Such assessments are primarily based upon the sum of expected future undiscounted net cash flows over the expected period the asset will be utilized, as well as market values and conditions. The computation of expected future undiscounted net cash flows can be complex and involves a number of subjective assumptions. Any changes in these factors or assumptions could impact the assessed value of an asset and result in an impairment charge equal to the amount by which its carrying value exceeds its actual or estimated fair value.

Accounting for income taxes. Our income tax expense, deferred tax assets and liabilities, and liabilities for unrecognized tax benefits reflect management's best assessment of estimated current and future taxes to be paid. We are subject to income taxes in the United States and numerous state and foreign jurisdictions. Significant judgments and estimates are required in determining the consolidated income tax expense. Deferred income taxes arise from temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements, which will result in taxable or deductible amounts in the future. In evaluating our ability to recover our deferred tax assets within the jurisdiction from which they arise, we consider all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax-planning strategies, and results of recent operations, assumptions about the amount of future state, federal, and foreign pre-tax operating income adjusted for items that do not have tax consequences. The assumptions about future taxable income require significant judgment and are consistent with the plans and estimates we are using to manage the underlying businesses. To the extent that recovery is not likely, a valuation allowance is established. The allowance is regularly reviewed and updated for changes in circumstances that would cause a change in judgment about the realizability of the related deferred tax assets.

Variable compensation accruals. We estimate variable compensation accruals quarterly based upon the amounts expected to be earned and paid out resulting from the achievement of certain teammate-specific and/or corporate financial and operating goals. Our estimates, which include compensation incentives for bonuses and other awards, including long-term incentive programs, are updated periodically based on changes in our economic condition or cash flows that could ultimately impact the actual final award. Actual results reflected in each fiscal quarter may vary due to the subjectivity involved in anticipating fulfillment of specific and/or corporate goals, as well as the final determination and approval of amounts by our Board of Directors, as applicable.

Consolidation of variable interest entities. We rely on the operating activities of certain entities that we do not directly own or control, but over which we have indirect influence and of which we are considered the primary beneficiary. Under accounting guidance applicable to variable interest entities, we have determined that these entities are to be included in our consolidated financial statements. The analyses upon which these determinations rest are complex, involve uncertainties, and require significant judgment on various matters, some of which could be subject to reasonable disagreement. While these determinations have a meaningful effect on the description and classification of various amounts in our consolidated financial statements, non-consolidation of these entities would not have had a material effect on our results of operations.

Purchase accounting valuation estimates. We make various assumptions and estimates regarding the valuation of tangible and intangible assets, liabilities, contingent earn-out consideration, noncontrolling interests and contractual as well as non-contractual contingencies associated with our acquisitions. These assumptions can have a material effect on our balance sheet valuations and the related amount of depreciation and amortization expense and any contingent earn-out adjustments that will be recognized in the future.

Fair value estimates. We have recorded certain assets, liabilities and noncontrolling interests (temporary equity) subject to put provisions at fair value. The FASB defines fair value which is measured based upon certain valuation techniques that include inputs and assumptions that market participants would use in pricing assets, liabilities and noncontrolling interests subject to put provisions. We have measured the fair values of our applicable assets, liabilities and noncontrolling interests subject to put provisions based upon certain market inputs and assumptions that are either observable or unobservable in determining fair values and have also classified these assets, liabilities and noncontrolling interests subject to put provisions into the appropriate fair value hierarchy levels. The fair value of our investments available for sale are based upon quoted market prices from active markets and the fair value of our swap and cap agreements were based upon valuation models utilizing the income approach and commonly accepted valuation techniques that use inputs from closing prices for similar assets and liabilities in active markets as well as other relevant observable market inputs at quoted intervals such as current interest rates, forward yield curves, implied volatility and credit default swap pricing. The fair value of funds on deposit with third parties are based primarily on quoted close or bid market prices of the same or similar assets. The fair value of our contingent earn-out considerations were primarily based upon unobservable inputs including projected EBITDA, the estimated probabilities of achieving other performance targets and the estimated probability of the earn-out payments being made by using option pricing techniques and simulation models of expected EBITDA and operating income and other performance targets. For our noncontrolling interests subject to put provisions we have estimated the fair values of these based upon either the higher of a liquidation value of net assets or an average multiple of earnings based on historical earnings, patient mix and other performance indicators that can affect future results, as well as other factors. The estimate of the fair values of the noncontrolling interests subject to put provisions involves significant judgments and assumptions and may not be indicative of the actual values at which the noncontrolling interests may ultimately be settled, which could vary significantly from our current estimates. The estimated fair values of the noncontrolling interests subject to put provisions can also fluctuate and the implicit multiple of earnings at which these noncontrolling interests obligations may be settled will vary depending upon market conditions including potential purchasers' access to the capital markets, which can impact the level of competition for dialysis and non-dialysis related businesses, the economic performance of these businesses and the restricted marketability of the third-party owners' noncontrolling interests.

Stock-based compensation. Stock-based compensation awards are measured at their estimated fair values on the date of grant if settled in shares or at their estimated fair values at the end of each reporting period if settled in cash. The value of stock-based awards so measured is recognized as compensation expense on a cumulative straight-line basis over the vesting terms of the awards, adjusted for expected forfeitures. We estimate the fair value of stock awards using complex option pricing models that rely heavily on estimates from us about uncertain future events, including the expected term of the awards, the expected future volatility of our stock price, and expected future risk-free interest rates.

Medical liability claims associated with HCP. The medical groups are responsible for the medical services that associated physicians and contracted hospitals provide to assigned HMO enrollees. We provide medical services to health plan enrollees through a network of contracted providers under sub-capitation and FFS arrangements, company-operated clinics and staff physicians. Medical costs for professional and institutional services rendered by contracted providers are recorded as medical expenses and hospital expenses, respectively, in the consolidated statements of income. Costs for operating medical clinics, including the salaries of medical and non-medical personnel and support costs, are recorded in clinic support and other operating costs.

An estimate of amounts due to contracted physicians, hospitals, and other professional providers is included in medical payables in the accompanying consolidated balance sheets. Medical claims payable include claims reported as of the balance sheet date and estimates of IBNR. Such estimates are developed using actuarial methods and are based on many variables, including the utilization of healthcare services, historical payment patterns, cost trends, product mix, seasonality, changes in membership, and other factors. The estimation methods and the resulting reserves are continually reviewed and updated. Many of the medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. We engage a third-party actuary to assist in the evaluation of the estimated IBNR reserves. Such differing interpretations may not come to light until a substantial period of time has passed following the contract implementation. Any adjustments to reserves are reflected in current operations.

Significant new accounting standards

New accounting standards

We elected to early adopt Accounting Standards Update (ASU) No. 2015-03, *Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs*, retrospectively effective as of January 1, 2014. The amendments in this ASU require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from

the carrying amount of that debt liability, consistent with debt discounts. In August 2015, the FASB issued ASU 2015-15, *Interest – Imputation of Interest (Subtopic 835-30) – Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements,* which clarifies that the treatment of debt issuance costs related to a line-of-credit may continue to be deferred in an asset position and subsequently amortized over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this ASU. Adoption of this standard did not have a material impact on our consolidated financial statements.

We elected to early adopt ASU No. 2015-17, *Income Taxes (ASC 740): Balance Sheet Classification of Deferred Taxes*, retrospectively effective as of January 1, 2014. The amendments in this ASU serve to simplify the presentation of deferred income taxes. The update requires that deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. Adoption of this standard did not have a material impact on our consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)*. The amendments in this ASU revise the accounting related to lessee accounting. Under the new guidance, lessees will be required to recognize a lease liability and a right-of-use asset for all leases. The new lease guidance also simplified the accounting for sale and leaseback transactions primarily because lessees must recognize lease assets and lease liabilities. The amendments in this ASU are effective for us beginning on January 1, 2019 and should be applied through a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. Early adoption is permitted. We have not yet determined what the effects of adopting this ASU will be on our consolidated financial statements.

In January 2016, the FASB issued ASU No. 2016-01, *Financial Statements – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities.* The amendments in this ASU revise the accounting related to (i) the classification and measurement of investments in equity securities and (ii) the presentation of certain fair value changes for financial liabilities at fair value. The amendments in this ASU are effective for us beginning on January 1, 2018 and should be applied through a cumulative-effect adjustment to the statement of financial position. Early adoption is permitted under certain circumstances. The adoption of this standard is not expected to have a material impact on our consolidated financial statements.

In September 2015, the FASB issued ASU No. 2015-16, *Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments.* The amendments in this ASU allow an acquirer to recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. This will be inclusive of the effect on earnings of changes in depreciation, amortization, or other income effects as a result of the change to provisional amounts, calculated as if the accounting had been completed at the acquisition date. The amendments in this ASU became effective for us on January 1, 2016, and are applied prospectively. Early adoption was permitted. The adoption of this standard is not expected to have a material impact on our consolidated financial statements.

In July 2015, the FASB issued ASU No. 2015-11, *Inventory (Topic 330): Simplifying the Measurement of Inventory.* The amendments in this ASU apply to all inventory with the exception of inventory measured using last-in, first-out or the retail inventory method. This ASU simplifies the measurement of inventory. Under this new standard, inventory should be measured using the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. The amendments in this ASU are effective for us beginning January 1, 2017 and should be applied prospectively. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on our consolidated financial statements.

In April 2015, the FASB issued ASU No. 2015-05, *Customer's Accounting for Fees Paid in a Cloud Computing Arrangement*, which amends ASC 350-40, *Intangibles-Goodwill and Other-Internal-Use Software*. This ASU provides guidance to customers about whether a cloud computing arrangement includes a software license. If an arrangement includes a software license, the accounting for the license will be consistent with licenses of other intangible assets. If the arrangement does not include a license, the arrangement will be accounted for as a service contract. The amendments in this ASU are effective for us beginning January 1, 2016 and can be adopted prospectively or retrospectively. We are currently assessing the effects of adopting this ASU on our consolidated financial statements, however, the adoption is not expected to have a material impact on our consolidated financial statements.

In February 2015, the FASB issued ASU No. 2015-02, *Consolidation (Topic 810): Amendments to the Consolidation Analysis*. The amendments in the ASU clarify consolidation of VIEs regarding which reporting entity consolidates the legal entity. The amendments in the ASU became effective for us on January 1, 2016. The adoption of this standard is not expected to have a material impact on our consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard as issued

was to be effective for us on January 1, 2017. In July 2015, the FASB issued ASU 2015-14, *Revenue from Contracts with Customers (Topic 606): Deferral of Effective Date*. This guidance approves a one-year deferral of the effective date of ASU 2014-09. The final ASU now requires us to adopt this standard on January 1, 2018. Early application is permitted as of the initial effective date of January 1, 2017, but not prior to that date. The standard permits the use of either the retrospective or cumulative effect transition method. We have assembled an internal revenue task force that meets regularly to discuss and evaluate the overall impact this guidance will have on the various revenue streams in the consolidated financial statements and related disclosures, as well as the expected timing and method of adoption. We have not yet selected a transition method nor have we determined the effect of the standard on our ongoing financial reporting.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

Interest rate sensitivity

The tables below provide information about our financial instruments that are sensitive to changes in interest rates. The table below presents principal repayments and current weighted average interest rates on our debt obligations as of December 31, 2015. The variable rates presented reflect the weighted average LIBOR rates in effect for all debt tranches plus interest rate margins in effect as of December 31, 2015. The Term Loan A margin in effect is 1.75% at December 31, 2015, and along with the revolving line of credit, is subject to adjustment depending upon changes in certain of our financial ratios, including a leverage ratio. The Term Loan B currently bears interest at LIBOR (floor of 0.75%) plus an interest rate margin of 2.75%.

	Expected maturity date					Thereafter	Total	Average interest rate	Fair value
	2016	2017	2018	2019	2020				
	(dollars in millions)								
Long term debt:									
Fixed rate	$ 65	$ 61	$ 61	$ 61	$ 61	$ 7,967	$ 8,276	4.64%	$ 8,240
Variable rate	$ 64	$ 92	$ 105	$ 680	$ 4	$ 5	$ 950	2.19%	$ 948

	Notional amount	Contract maturity date					Pay fixed	Receive variable	Fair value
		2016	2017	2018	2019	2020			
	(dollars in millions)								
Swaps:									
Pay-fixed rate	$ 760	$ 760	$ —	$ —	$ —	$ —	0.49% to 0.52%	LIBOR	$ 0.5
Cap agreements	$ 9,735	$ 2,735	$ —	$ 3,500	$ —	$ 3,500		LIBOR above 2.5% and 3.5%	$ 15.1

Our Senior Secured Credit Facilities, which include the Term Loan A and Term Loan B, consist of various individual tranches of debt that can range in maturity from one month to twelve months (currently, all tranches are one month in duration). For the Term Loan A, each tranche bears interest at a LIBOR rate that is determined by the duration of such tranche plus an interest rate margin. The LIBOR variable component of the interest rate for each tranche is reset as such tranche matures and a new tranche is established. LIBOR can fluctuate significantly depending upon conditions in the credit and capital markets. However, the LIBOR variable component of the interest rate for the majority of the Term Loan A is economically fixed as a result of our swap agreements, as described below.

The Term Loan B is subject to a LIBOR floor of 0.75%. Because actual LIBOR, as of December 31, 2015, was lower than this embedded LIBOR floors, the interest rate on the Term Loan B is treated as "effectively fixed" for purposes of the table above. We have included the Term Loan B in the fixed rate totals in the table above until such time as the actual LIBOR-based variable component of our interest rate exceeds 0.75% on the Term Loan B. At such time, we will then be subject to LIBOR-based interest rate volatility on the LIBOR variable component of our interest rate for the Term Loan B, but limited to a maximum LIBOR rate of 2.50% on $2.7 billion of outstanding principal debt on the Term Loan B as a result of the interest rate cap agreements, as described below. The remaining $712.5 million outstanding principal balance of the Term Loan B is subject to LIBOR-based interest rate volatility above a floor of 0.75%.

As of December 31, 2015, we maintain several interest rate swap agreements that were entered into in March 2013 with amortizing notional amounts totaling $760 million. These agreements have the economic effect of modifying the LIBOR variable component of our interest rate on an equivalent amount of our Term Loan A to fixed rates ranging from 0.49% to 0.52%, resulting in an overall weighted average effective interest rate of 2.26%, including the Term Loan A margin of 1.75%. The overall weighted

average effective interest rate also includes the effects of $165 million of unhedged Term Loan A debt that bears interest at LIBOR plus an interest rate margin of 1.75%. The swap agreements expire on September 30, 2016 and require monthly interest payments. During the year ended December 31, 2015, we recognized debt expense of $2.7 million from these swaps. As of December 31, 2015, the total fair value of these swap agreements was a net asset of approximately $0.5 million. During the year ended December 31, 2015, we recorded a loss of $4.0 million in other comprehensive income due to a decrease in the unrealized fair value of these swap agreements. We estimate that approximately $0.5 million of existing unrealized pre-tax gains in other comprehensive income at December 31, 2015 will be reclassified into income over the next twelve months.

As of December 31, 2015, we maintain several forward interest rate cap agreements that were entered into in October 2015 with notional amounts totaling $3.5 billion. These forward cap agreements will be effective June 29, 2018 and will have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 3.50% on an equivalent amount of our debt. These cap agreements expire on June 30, 2020. As of December 31, 2015, the total fair value of these cap agreements was an asset of approximately $13.8 million. During the year ended December 31, 2015, we recorded a loss of $3.5 million in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

As of December 31, 2015, we maintain several forward interest rate cap agreements that were entered into in November 2014 with notional amounts totaling $3.5 billion. These forward cap agreements will be effective September 30, 2016 and will have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 3.50% on an equivalent amount of our debt. The cap agreements expire on June 30, 2018. As of December 31, 2015, the total fair value of these cap agreements was an asset of approximately $1.3 million. During the year ended December 31, 2015, we recorded a loss of $11.0 million in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

As of December 31, 2015, we maintain several interest rate cap agreements that were entered into in March 2013 with notional amounts totaling $2.7 billion on our Term Loan B debt. These agreements have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 2.50% on an equivalent amount of our Term Loan B. During the year ended December 31, 2015, we recognized debt expense of $2.4 million from these caps. The cap agreements expire on September 30, 2016. As of December 31, 2015, the total fair value of these cap agreements was immaterial. During the year ended December 31, 2015, we recorded a loss of $1.6 million in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

As a result of an embedded LIBOR floor on the Term Loan B debt agreement and the swap and cap agreements, our overall weighted average effective interest rate on the Senior Secured Credit Facilities was 3.46%, based on the current margins in effect of 1.75% for the Term Loan A and 2.75% for the Term Loan B, as of December 31, 2015.

As of December 31, 2015, the interest rate on our Term Loan B debt is effectively fixed subject to an embedded LIBOR floor which is higher than actual LIBOR as of such date. The Term Loan B is also subject to interest rate caps if LIBOR should rise above 2.50%. Interest rates on our senior notes are fixed by their terms. The LIBOR variable component of our interest rate on the majority of our Term Loan A is economically fixed as a result of interest rate swaps.

Our overall weighted average effective interest rate during the year ended December 31, 2015 was 4.42% and as of December 31, 2015 was 4.39%.

As of December 31, 2015, we had undrawn revolving credit facilities totaling $1.0 billion of which approximately $92.2 million was committed for outstanding letters of credit. The remaining amount is unencumbered. In addition, HCP has an outstanding letter of credit of approximately $1.3 million which is secured by a certificate of deposit.

We believe that we will have sufficient liquidity and will generate significant operating cash flows to fund our scheduled debt service and other obligations and working capital needs for the foreseeable future, including the next 12 months, under the terms of our debt agreements. Our primary sources of liquidity are cash from operations and cash from borrowings.

One mean of assessing exposure to debt-related interest rate changes is a duration-based analysis that measures the potential loss in net income resulting from a hypothetical increase in interest rates of 100 basis points across all variable rate maturities (referred to as a parallel shift in the yield curve). Under this model, with all else constant, it is estimated that such an increase would have reduced net income by approximately $6.3 million, $5.7 million, and $4.0 million, net of tax, for the years ended December 31, 2015, 2014, and 2013, respectively.

Exchange rate sensitivity

We are currently not exposed to any significant foreign currency exchange rate risk.

Item 8. Financial Statements and Supplementary Data.

See the Index to Financial Statements and Index to Financial Statement Schedules included at "Item 15. Exhibits, Financial Statement Schedules."

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Management has established and maintains disclosure controls and procedures designed to ensure that information required to be disclosed in the reports that it files or submits pursuant to the Securities Exchange Act of 1934 (Exchange Act) as amended is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management including our Chief Executive Officer and Chief Financial Officer as appropriate to allow for timely decisions regarding required disclosures.

At the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures in accordance with the Exchange Act requirements. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective for timely identification and review of material information required to be included in our Exchange Act reports, including this report on Form 10-K. Management recognizes that these controls and procedures can provide only reasonable assurance of desired outcomes, and that estimates and judgments are still inherent in the process of maintaining effective controls and procedures.

There has not been any change in our internal control over financial reporting that was identified during the evaluation that occurred during the fourth fiscal quarter and that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

We intend to disclose any amendments or waivers to the Code of Ethics applicable to our principal executive officer, principal financial officer, principal accounting officer or controller or persons performing similar functions, on our website. In 2002, we adopted a Corporate Governance Code of Ethics that applies to our principal executive officer, principal financial officer, principal accounting officer or controller, and to all of our financial accounting and legal professionals who are directly or indirectly involved in the preparation, reporting and fair presentation of our financial statements and Exchange Act reports. The Code of Ethics is posted on our website, located at http://www.davita.com. We also maintain a Corporate Code of Conduct that applies to all of our employees, which is posted on our website.

Under our Corporate Governance Guidelines all Board Committees including the Audit Committee, Nominating and Governance Committee and the Compensation Committee, which are comprised solely of independent directors as defined within the listing standards of the New York Stock Exchange, have written charters that outline the committee's purpose, goals, membership requirements and responsibilities. These charters are regularly reviewed and updated as necessary by our Board of Directors. All Board Committee charters as well as the Corporate Governance Guidelines are posted on our website located at http://www.davita.com.

The other information required to be disclosed by this item will appear in, and is incorporated by reference from, the sections entitled "Proposal No. 1. Election of Directors", "Corporate Governance", and "Security Ownership of Certain Beneficial Owners and Management" included in our definitive proxy statement relating to our 2016 annual stockholder meeting.

Item 11. Executive Compensation.

The information required by this item will appear in, and is incorporated by reference from, the sections entitled "Executive Compensation" and "Compensation Committee Interlocks and Insider Participations" included in our definitive proxy statement relating to our 2016 annual stockholder meeting. The information required by Item 407(e)(5) of Regulation S-K will appear in and is incorporated by reference from the section entitled "Compensation Committee Report" included in our definitive proxy statement relating to our 2016 annual stockholder meeting; however, this information shall not be deemed to be filed.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The following table provides information about our common stock that may be issued upon the exercise of stock-settled stock appreciation rights, restricted stock units and other rights under all of our existing equity compensation plans as of December 31, 2015, which consist of our 2011 Incentive Award Plan and our Employee Stock Purchase Plan. The material terms of these plans are described in Note 19 to the Consolidated Financial Statements.

Plan category	Number of shares to be issued upon exercise of outstanding options, warrants and rights	Weighted average exercise price of outstanding options, warrants and rights	Number of shares remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))	Total of shares reflected in columns (a) and (c)
	(a)	*(b)*	*(c)*	*(d)*
Equity compensation plans approved by shareholders	9,298,621	$ 54.19	32,906,935	42,205,556
Equity compensation plans not requiring shareholder approval	—	—	—	—
Total	9,298,621	$ 54.19	32,906,935	42,205,556

Other information required to be disclosed by Item 12 will appear in, and is incorporated by reference from, the section entitled "Security Ownership of Certain Beneficial Owners and Management" included in our definitive proxy statement relating to our 2016 annual stockholder meeting.

Item 13. Certain Relationships and Related Transactions and Director Independence.

The information required by this item will appear in, and is incorporated by reference from, the section entitled "Certain Relationships and Related Transactions" and the section entitled "Corporate Governance" included in our definitive proxy statement relating to our 2016 annual stockholder meeting.

Item 14. Principal Accounting Fees and Services.

The information required by this item will appear in, and is incorporated by reference from, the section entitled "Ratification of Appointment of Independent Registered Public Accounting Firm" included in our definitive proxy statement relating to our 2016 annual stockholder meeting.

PART IV

Item 15. Exhibits, Financial Statement Schedules.

(a) Documents filed as part of this Report:

(1) Index to Financial Statements:

(2) Index to Financial Statement Schedules:

(1) *Exhibits:*

2.1	Agreement and Plan of Merger, dated as of May 20, 2012, by and among DaVita Inc., Seismic Acquisition LLC, HealthCare Partners Holdings, LLC, and the Member Representative.(36)
2.2	Amendment, dated as of July 6, 2012, to the Agreement and Plan of Merger, dated as of May 20, 2012, by and among DaVita Inc., Seismic Acquisition LLC, HealthCare Partners Holdings, LLC, and the Member Representative.(37)
3.1	Amended and Restated Certificate of Incorporation of Total Renal Care Holdings, Inc. (TRCH), dated December 4, 1995.(1)
3.2	Certificate of Amendment of Certificate of Incorporation of TRCH, dated February 26, 1998.(2)
3.3	Certificate of Amendment of Certificate of Incorporation of DaVita Inc. (formerly Total Renal Care Holdings, Inc.), dated October 5, 2000.(3)
3.4	Certificate of Amendment of Amended and Restated Certificate of Incorporation of DaVita Inc., as amended dated May 30, 2007.(16)
3.5	Certificate of Ownership and Merger Merging DaVita Name Change, Inc. with and into DaVita Inc., as filed with Secretary of State of the State of Delaware on November 1, 2012.(40)
3.6	Amended and Restated Bylaws for DaVita Inc. dated as of March 10, 2011.(17)
4.1	Indenture, dated August 28, 2012, by and among DaVita Inc., the Guarantors named therein and The Bank of New York Mellon Trust Company, N.A., as Trustee.(38)
4.2	Form of 5.750% Senior Notes due 2022 and related Guarantee (included in Exhibit 4.1).(38)
4.3	Indenture, dated June 13, 2014, by and among DaVita HealthCare Partners Inc., the Guarantors named therein and The Bank of New York Mellon Trust Company, N.A., as Trustee. (44)
4.4	Form of 5.125% Senior Notes due 2024 and related Guarantee (included in Exhibit 4.3). (44)

4.5	Second Supplemental Indenture for the 5.750% Senior Notes due 2022, dated June 13, 2014, by and among DaVita HealthCare Partners Inc., the guarantors named therein and The Bank of New York Mellon Trust Company, N.A., as Trustee. (45)
4.6	Indenture for the 5.000% Senior Notes due 2025, dated April 17, 2015, by and among DaVita HealthCare Partners Inc., the Guarantors named therein and The Bank of New York Mellon Trust Company, N.A., as Trustee. (28)
4.7	Form of 5.000% Senior Notes due 2025 and related Guarantee (included in Exhibit 4.6). (28)
10.1	Employment Agreement, dated as of October 19, 2009, by and between DaVita Inc. and Kim M. Rivera.(29)*
10.2	Employment Agreement, dated as of October 31, 2005, effective October 24, 2005, by and between DaVita Inc. and Dennis Kogod.(8)*
10.3	Amendment to Mr. Kogod's Employment Agreement, effective December 12, 2008.(23)*
10.4	Second Amendment to Mr. Kogod's Employment Agreement, effective December 31, 2012.(23)*
10.5	Employment Agreement, effective September 22, 2005, by and between DaVita Inc. and James Hilger.(10)*
10.6	Amendment to Mr. Hilger's Employment Agreement, effective December 12, 2008.(23)*
10.7	Second Amendment to Mr. Hilger's Employment Agreement, effective December 27, 2012.(42)*
10.8	Employment Agreement, effective July 25, 2008, between DaVita Inc. and Kent J. Thiry.(20)*
10.9	Employment Agreement, effective August 1, 2008, between DaVita Inc. and Allen Nissenson.(21)*
10.10	Employment Agreement, effective March 3, 2008, between DaVita Inc. and David Shapiro.(23)*
10.11	Amendment to Mr. Shapiro's Employment Agreement, effective December 4, 2008.(23)*
10.12	Employment Agreement, effective March 17, 2010, by and between DaVita Inc. and Javier Rodriguez.(25)*
10.13	Memorandum Relating to Bonus Structure for Kent J. Thiry.(26)*
10.14	Memorandum Relating to Bonus Structure for Dennis L. Kogod.(26)*
10.15	Form of Indemnity Agreement.(15)*
10.16	Form of Indemnity Agreement.(9)*
10.17	Executive Incentive Plan (as Amended and Restated effective January 1, 2009).(24)*
10.18	Executive Retirement Plan.(23)*
10.19	DaVita Voluntary Deferral Plan.(7)*
10.20	Deferred Bonus Plan (Prosperity Plan).(22)*
10.21	Amendment No. 1 to Deferred Bonus Plan (Prosperity Plan).(23)*
10.22	Amended and Restated Employee Stock Purchase Plan.(18)*
10.23	Amended and Restated DaVita Healthcare Partners Inc. Severance Plan.(42)*
10.24	Change in Control Bonus Program.(23)*
10.25	Non-Management Director Compensation Philosophy and Plan.(19)*
10.26	Amended and Restated 2002 Equity Compensation Plan.(6)*
10.27	Amended and Restated 2002 Equity Compensation Plan.(14)*
10.28	Amended and Restated 2002 Equity Compensation Plan.(18)*
10.29	Amended and Restated 2002 Equity Compensation Plan.(23)*
10.30	DaVita Inc. 2002 Equity Compensation Plan.(27)*
10.31	Form of Non-Qualified Stock Option Agreement—Employee (DaVita Inc. 1999 Non-Executive Officer and Non-Director Equity Compensation Plan.(13)*

10.32 Form of Non-Qualified Stock Option Agreement—Employee (DaVita Inc. 2002 Equity Compensation Plan).(4)*

10.33 Form of Non-Qualified Stock Option Agreement—Employee (DaVita Inc. 2002 Equity Compensation Plan).(11)*

10.34 Form of Non-Qualified Stock Option Agreement—Employee (DaVita Inc. 2002 Equity Compensation Plan).(13)*

10.35 Form of Restricted Stock Units Agreement—Employee (DaVita Inc. 2002 Equity Compensation Plan).(4)*

10.36 Form of Restricted Stock Units Agreement—Employee (DaVita Inc. 2002 Equity Compensation Plan).(11)*

10.37 Form of Restricted Stock Units Agreement—Employee (DaVita Inc. 2002 Equity Compensation Plan).(13)*

10.38 Form of Restricted Stock Units Agreement—Employee (DaVita Inc. 2002 Equity Compensation Plan).(23)*

10.39 Form of Stock Appreciation Rights Agreement—Employee (DaVita Inc. 2002 Equity Compensation Plan).(11)*

10.40 Form of Stock Appreciation Rights Agreement—Employee (DaVita Inc. 2002 Equity Compensation Plan).(13)*

10.41 Form of Stock Appreciation Rights Agreement—Board (DaVita Inc. 2002 Equity Compensation Plan).(21)*

10.42 Form of Stock Appreciation Rights Agreement—Board members (DaVita Inc. 2011 Incentive Award Plan).(32)*

10.43 Form of Restricted Stock Units Agreement—Board (DaVita Inc. 2002 Equity Compensation Plan).(21)*

10.44 Form of Restricted Stock Units Agreement—Board members (DaVita Inc. 2011 Incentive Award Plan).(32)*

10.45 Form of Non-Qualified Stock Option Agreement—Board (DaVita Inc. 2002 Equity Compensation Plan).(21)*

10.46 Form of Stock Appreciation Rights Agreement—Executives (DaVita Inc. 2011 Incentive Award Plan).(32)*

10.47 Form of Restricted Stock Units Agreement—Executives (DaVita Inc. 2011 Incentive Award Plan).(32)*

10.48 Form of Restricted Stock Units Agreement (DaVita Inc. 2011 Incentive Award Plan). (42)*

10.49 Form of Stock Appreciation Rights Agreement (DaVita Inc. 2011 Incentive Award Plan). (42)*

10.50 Form of Long-Term Incentive Program Award Agreement (For 162(m) designated teammates) (DaVita Inc. 2011 Incentive Award Plan).(42)*

10.51 Form of Long-Term Incentive Program Award Agreement (DaVita Inc. 2011 Incentive Award Plan). (42)*

10.52 Credit Agreement, dated as of June 24, 2014, by and among DaVita Healthcare Partners Inc., the guarantors the guarantors party thereto, the lenders party thereto, JPMorgan Chase Bank, N.A., as Administrative Agent and Collateral Agent, Barclays Bank PLC, and Wells Fargo Bank, National Association as Co-Syndication Agents, Bank of America, N.A., Credit Suisse AG, Goldman Sachs Bank USA, JPMorgan Chase Bank, N.A., Morgan Stanley Senior Funding, Inc., and SunTrust Bank, as Co-Documentation Agents, Barclays Bank PLC, Wells Fargo Securities, LLC, Credit Suisse Securities (USA) LLC, Goldman Sachs Bank USA, J.P. Morgan Securities, LLC, Bank of America, N.A., Morgan Stanley Senior Funding, Inc., and SunTrust Robinson Humphrey, Inc. as Joint Lead Arrangers and Joint Bookrunners, The Bank of Nova Scotia, Credit Agricole Securities (USA) Inc., The Bank of Tokyo-Mitsubishi UFJ, Ltd., and Sumitomo Mitsui Banking Corporation, as Senior Managing Agents, HSBC Securities (USA) Inc., Fifth Third Bank, and Compass Bank as Managing Agents. (45)

10.53 Perfection Certificate executed as of October 20, 2010 and delivered in connection with the closing of the Credit Agreement filed as Exhibit 10.68.(34)**

10.54 Dialysis Organization Agreement between DaVita Inc. and Amgen USA Inc. dated December 20, 2007.(22)**

10.55 Dialysis Organization Agreement between DaVita Inc. and Amgen USA Inc. dated December 17, 2010.(30)**

10.56 Amended and Restated DaVita HealthCare Partners Inc. 2011 Incentive Award Plan.(45)*

10.57 Amendment No. 2 to Dialysis Organization Agreement between DaVita Inc. and Amgen USA Inc. effective as of July 1, 2011.(33)**

10.58 Sourcing and Supply Agreement between DaVita Inc. and Amgen USA Inc. effective as of January 1, 2012.(35)**

10.59 Amendment No. 1 to Sourcing and Supply Agreement between DaVita HealthCare Partners Inc. and Amgen USA Inc. effective as of January 1, 2013. (42)**

10.60	Voting Agreement, dated as of May 20, 2012, by and among DaVita Inc., HealthCare Partners Holdings, LLC, and HealthCare Partners Medical Group.(36)
10.61	Support Agreement, dated as of May 20, 2012, by and among DaVita Inc., HealthCare Partners Holdings, LLC, and Dr. Robert Margolis.(36)
10.62	Support Agreement, dated as of May 20, 2012, by and among DaVita Inc., HealthCare Partners Holdings, LLC, and Dr. William Chin.(36)

DAVITA HEALTHCARE PARTNERS INC.
MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining an adequate system of internal control over financial reporting designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles and which includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

During the last fiscal year, the Company conducted an evaluation, under the oversight of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's internal control over financial reporting. This evaluation was completed based on the criteria established in the report titled "Internal Control—Integrated Framework (2013)" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Based upon our evaluation under the COSO framework, we have concluded that the Company's internal control over financial reporting was effective as of December 31, 2015.

The Company's independent registered public accounting firm, KPMG LLP, has issued an attestation report on the Company's internal control over financial reporting, which report is included in this Annual Report.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders
DaVita HealthCare Partners Inc.:

We have audited the accompanying consolidated balance sheets of DaVita HealthCare Partners Inc. and subsidiaries as of December 31, 2015 and 2014, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the years in the three-year period ended December 31, 2015. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of DaVita HealthCare Partners Inc. and subsidiaries as of December 31, 2015 and 2014, and the results of their operations and their cash flows for each of the years in the three year period ended December 31, 2015, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 1 to the consolidated financial statements, the Company has changed its method of accounting for the presentation of debt issuance costs due to the adoption of ASU No. 2015-03, *Simplifying the Presentation of Debt Issuance Costs*, and has changed its method of accounting for the presentation of deferred tax liabilities and deferred tax assets due to the adoption of ASU No. 2015-17, *Balance Sheet Classification of Deferred Taxes*.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), DaVita HealthCare Partners Inc.'s internal control over financial reporting as of December 31, 2015, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 26, 2016 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

February 26, 2016

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
DaVita HealthCare Partners Inc.:

We have audited DaVita HealthCare Partners Inc.'s internal control over financial reporting as of December 31, 2015, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). DaVita HealthCare Partners, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying "Management's Report on Internal Control Over Financial Reporting." Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, DaVita HealthCare Partners Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of DaVita HealthCare Partners Inc. and subsidiaries as of December 31, 2015 and 2014, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the years in the three-year period ended December 31, 2015, and our report dated February 26, 2016 expressed an unqualified opinion on those consolidated financial statements.

1. Organization and summary of significant accounting policies

Organization

DaVita HealthCare Partners Inc. operates two major divisions, Kidney Care and HealthCare Partners (HCP). Kidney Care is comprised of the Company's U.S. dialysis and related lab services, its ancillary services and strategic initiatives, including its international operations, and its corporate administrative support. The Company's largest line of business is its U.S. dialysis and related lab services business, which operates kidney dialysis centers in the U.S. for patients suffering from chronic kidney disease also known as end stage renal disease (ESRD). As of December 31, 2015, the Company operated or provided administrative services through a network of 2,251 U.S. outpatient dialysis centers in 46 states and the District of Columbia, serving approximately 180,000 patients. The Company's HCP division is a patient- and physician-focused integrated healthcare delivery and management company that provides medical services to members primarily through capitation contracts with some of the nation's leading health plans.

In addition, as of December 31, 2015, the Company operated or provided administrative services to 118 outpatient dialysis centers serving approximately 10,000 patients located in ten countries outside of the U.S.

The Company's U.S. dialysis and related lab services business and HCP qualify as separately reportable segments and the Company's other ancillary services and strategic initiatives, including its international operations, have been combined and disclosed in the other segments category.

Basis of presentation

These consolidated financial statements are prepared in accordance with United States generally accepted accounting principles (U.S. GAAP). The financial statements include DaVita HealthCare Partners Inc. and its subsidiaries, partnerships and other entities in which it maintains a 100% or majority voting interest, another controlling financial interest, or of which it is considered the primary beneficiary (collectively, the Company). All significant intercompany transactions and balances have been eliminated. Non-marketable equity investments are recorded under the equity or cost method of accounting based upon whether the Company has significant influence over the investee. For the Company's international subsidiaries, local currencies are considered their functional currencies. Translation adjustments result from translating the Company's international subsidiaries' financial statements from their functional currencies into the Company's reporting currency (USD). Prior year balances and amounts have been reclassified to conform to the current year presentation and retrospectively revised to reflect purchase accounting entries.

The Company has evaluated subsequent events through the date these consolidated financial statements were issued and has included all necessary adjustments and disclosures.

Use of estimates

The preparation of financial statements in conformity with U.S. GAAP requires the use of estimates and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities, contingencies and noncontrolling interests subject to put provisions. Although actual results in subsequent periods will differ from these estimates, such estimates are developed based on the best information available to management and management's best judgments at the time. All significant assumptions and estimates underlying the amounts reported in the financial statements and accompanying notes are regularly reviewed and updated when necessary. Changes in estimates are reflected in the financial statements based upon on-going actual experience trends, or subsequent settlements and realizations depending on the nature and predictability of the estimates and contingencies. Interim changes in estimates related to annual operating costs are applied prospectively within annual periods.

The most significant assumptions and estimates underlying these financial statements and accompanying notes involve revenue recognition and accounts receivable, contingencies, impairments of long-lived assets including goodwill, valuation adjustments, accounting for income taxes, quarterly, annual and long-term variable compensation accruals, consolidation of variable interest entities, purchase accounting valuation estimates, other fair value estimates, stock-based compensation and medical liability claims. Specific estimating risks and contingencies are further addressed within these notes to the consolidated financial statements.

Patient service net revenues and accounts receivable

Patient service net revenues are recognized in the period services are provided. Revenues consist primarily of payments from Medicare, Medicaid and commercial health plans for dialysis and ancillary services provided to patients. A usual and customary fee schedule is maintained for the Company's dialysis treatments and other patient services; however, actual collectible revenue is normally recognized at a discount from the fee schedule.

Revenues associated with Medicare and Medicaid programs are recognized based on: (a) the payment rates that are established by statute or regulation for the portion of payment rates paid by the government payor (e.g., 80% for Medicare patients) and (b) for the portion not paid by the primary government payor, estimates of the amounts ultimately collectible from other government programs paying secondary coverage (e.g., Medicaid secondary coverage), the patient's commercial health plan secondary coverage, or the patient. The Company's reimbursements from Medicare are subject to certain variations under Medicare's single bundled payment rate system, whereby reimbursements can be adjusted for certain patient characteristics and other factors. The Company's revenue recognition will depend upon its ability to effectively capture, document and bill for Medicare's base payment rate as well as these other variable factors.

Revenues associated with commercial health plans are estimated based on contractual terms for the patients under healthcare plans with which the Company has formal agreements, non-contracted health plan coverage terms if known, estimated secondary collections, historical collection experience, historical trends of refunds and payor payment adjustments (retractions), inefficiencies in the Company's billing and collection processes that can result in denied claims for payments, and regulatory compliance matters.

Commercial revenue recognition also involves significant estimating risks. With many larger, commercial insurers the Company has several different contracts and payment arrangements, and these contracts often include only a subset of the Company's centers. It is often not possible to determine which contract, if any, should be applied prior to billing. In addition, for services provided by non-contracted centers, final collection may require specific negotiation of a payment amount, typically at a significant discount from the Company's usual and customary rates.

Under Medicare's bundled payment rate system, services covered by Medicare are subject to estimating risk, whereby reimbursements from Medicare can vary significantly depending upon certain patient characteristics and other variable factors. Even with the bundled payment rate system, Medicare payments for bad debt claims as established by cost reports require evidence of collection efforts. As a result, billing and collection of Medicare bad debt claims can be delayed significantly and final payment is subject to audit.

Medicaid payments, when Medicaid coverage is secondary, can also be difficult to estimate. For many states, Medicaid payment terms and methods differ from Medicare, and may prevent accurate estimation of individual payment amounts prior to billing.

The Company's range of revenue estimating risk for the dialysis and related lab services segment is generally expected to be within 1% of its revenue. Changes in revenue estimates for prior periods are not material.

Patient service revenues earned by HCP are recognized in the period services are provided, net of an estimated contractual allowance and are mainly attributable to primary care physician services and certain other specialty care services provided to patients.

Capitated revenue

HCP capitated revenue

The Company's associated medical groups are licensed to contract with health maintenance organizations (HMOs), to provide physician services in California under capitation contracts, and to provide both hospital and physician services under global risk capitation contracts in Florida, Nevada and Arizona. HCP's revenues consist primarily of fees for medical services provided by these medical group entities' payments from capitated contracts with various HMOs and revenues under risk-sharing programs. Capitation revenue under HMO contracts is prepaid monthly based on the number of enrollees electing physicians affiliated with one of the medical group entities as their healthcare provider, regardless of the level of actual medical services utilized. Capitation revenue is reported as revenue in the month in which enrollees are entitled to receive healthcare. A portion of the capitation revenue pertaining to Medicare enrollees is subject to possible retroactive premium risk adjustments based on their individual acuity. Due to lack of sufficient data to project the amount of such retroactive adjustments, the Company records any corresponding retroactive revenues in the year of receipt.

Depending on the applicable state regulation regarding global risk capitation, revenues may be received by the Company or by an independent hospital with which the Company contracts under various managed care-related administrative services agreements. In the Florida, Nevada and Arizona service markets, the global capitation revenue is recorded by the Company with the corresponding cost of medical care reported by the Company as patient care costs. In California, the Company receives professional capitation and either the health plan retains the capitated revenues in a shared risk pool or the independent hospitals receive the institutional capitation revenues. The revenues are used to pay medical claims for the related enrollees. The Company is entitled to any residual amounts and bears the risk of any deficits. In all cases, an estimate is made for the cost of medical services that have been incurred and where no medical claim has been received (IBNR). HCP recently obtained a restricted Knox-Keene license in California, which now

permits HCP to enter into contracts with health plans allowing it to recognize revenue effective in 2014 under global capitation arrangements for both professional and institutional services.

Under risk-sharing programs, the medical groups share in the risk for hospitalization services and earn additional incentive revenues or incur penalties based on the utilization of hospital services. Estimated shared-risk receivables from the HMOs are recorded based upon hospital utilization and associated costs incurred by assigned HMO enrollees, including an estimate of IBNR compared to budgeted funding. Differences between actual contract settlements and estimated receivables or payables are recorded in the year of final settlement. The medical groups also receive other incentive payments from health plans based on specified performance and quality criteria. These amounts are accrued when earned and the amounts can be reasonably estimated, and are included in HCP's capitated revenues.

Other capitated revenues

One of the Company's subsidiaries operates a Medicare Advantage ESRD Special Needs Plan in partnership with a payor that works with CMS to provide ESRD patients full service healthcare. The Company is at risk for all medical costs of the program in excess of the capitation payments.

Other revenues

Other revenues consist of the non-patient service revenues associated with the ancillary services and strategic initiatives, management and administrative support services that are provided to outpatient dialysis centers that the Company does not own or in which the Company owns a minority equity interest, retail pharmacies and medical consulting services. The Company also provides administrative and management support services to a medical services joint venture in which the Company owns a 50% interest. Management fees are principally determined as a percentage of the managed operations' revenues or cash collections and in some cases an additional component based upon a percentage of operating income. Management fees are included in net revenues when earned and represent less than 1% of total consolidated operating revenues. Revenues related to medical consulting services are recognized in the period services are provided.

Allowance for uncollectible accounts

Net revenue recognition and allowances for uncollectible billings require the use of estimates of the amounts that will ultimately be realized considering, among other items, retroactive adjustments that may be associated with regulatory reviews, audits, billing reviews and other matters. The Company's policy is to write off any uncollectible accounts receivable balance only after all collection efforts have been exhausted or when write off is mandated by federal or state policies or required by certain payor contracts. It is also the Company's policy to write off any accounts receivable balance associated with any payors or patients when the Company receives notification of a bankruptcy filing.

Other income

Other income includes interest income on cash investments and other non-operating gains from investment transactions.

Cash and cash equivalents

Cash equivalents are short-term highly liquid investments with maturities of three months or less at date of purchase.

Inventories

Inventories are stated at the lower of cost (first-in, first-out) or market and consist principally of pharmaceuticals and dialysis-related supplies. Rebates related to inventory purchases are recorded when earned and are based on certain qualification requirements which are dependent on a variety of factors including future pricing levels by the manufacturer and data submission.

Funds on deposit with a third party

The Company has established a risk sharing arrangement with a California hospital, wherein the Company shares in any surplus or deficit. One of the terms of this agreement is the establishment of a segregated investment fund to ensure adequate cash to pay IBNR. The Company and the hospital monitor the reserve balance to maintain the adequacy of funds on deposit. The Company has $82,679 in such funds as of December 31, 2015, in other current assets on the consolidated balance sheet.

Property and equipment

Property and equipment is stated at cost less accumulated depreciation and amortization and is further reduced by any impairments. Maintenance and repairs are charged to expense as incurred. Depreciation and amortization expenses are computed using the straight-line method over the useful lives of the assets estimated as follows: buildings, 20 to 40 years; leasehold improvements, the shorter of their economic useful life or the expected lease term; and equipment and information systems, principally three to eight years. Disposition gains and losses are included in current operating expenses.

Amortizable intangibles

Amortizable intangible assets and liabilities include customer relationships, trade names, provider networks, supply agreements, practice management tools, non-competition and similar agreements, lease agreements and hospital acute services contracts, each of which have finite useful lives. Amortization expense is computed using the straight-line method over the useful lives of the assets estimated as follows: customer relationships, ten to twenty years; trade names, provider networks and practice management tools, two to fifteen years; non-competition and similar agreements, two to ten years; and lease agreements and hospital acute service contracts, over the term of the lease or contract period, respectively.

Investments

Based upon the Company's intentions and strategy concerning investments in debt and equity securities, the Company classifies certain debt securities as held-to-maturity and measures them at amortized cost. The Company classifies equity securities that have readily determinable fair values and certain other debt securities as available for sale and measures them at fair value. Unrealized gains or losses from available for sale investments are recorded in other comprehensive income until realized.

Goodwill

Goodwill represents the difference between the fair value of businesses acquired and the fair value of the identifiable tangible and intangible net assets acquired. Goodwill is not amortized, but is assessed for valuation impairment as circumstances warrant and at least annually. An impairment charge would be recorded to the extent the carrying amount of goodwill exceeds its implied fair value. The Company operates several reporting units for goodwill impairment assessments. See Note 10 to the consolidated financial statements for further details.

Impairment of long-lived assets

Long-lived assets, including property and equipment, equity investments in non-consolidated businesses, and amortizable intangible assets are reviewed for possible impairment whenever significant events or changes in circumstances indicate that an impairment may have occurred, including changes in the Company's business strategy and plans, changes in the quality or structure of its relationships with its partners or deteriorating operating performance of individual outpatient dialysis centers or other operations. An impairment is indicated when the sum of the expected future undiscounted net cash flows identifiable to an asset group is less than its carrying amount. Impairment losses are measured based upon the difference between the actual or estimated fair values, which are based on market values, net realizable values or projections of discounted net cash flows, as appropriate, and the carrying amount of the asset. Impairment charges are included in operating expenses. Indefinite-lived intangible assets are reviewed for possible impairment at least annually or whenever significant events or changes in circumstances indicate that an impairment may have occurred.

Self insurance

The Company's Kidney Care division maintains insurance reserves for professional and general liability and workers' compensation in excess of certain individual and or aggregate amounts not covered by third-party carriers. The Company's Kidney Care division estimates the self-insured retention portion of professional and general liability and workers' compensation risks using third-party actuarial calculations that are based upon historical claims experience and expectations for future claims. In addition, HCP has purchased its primary professional and general liability insurance from California Medical Group Insurance (CMGI) in which the Company owns an equity interest of 67%.

Medical liability costs

The medical groups are responsible for integrated care that the associated physicians and contracted hospitals provide to assigned HMO enrollees. The Company provides integrated care to health plan enrollees through a network of contracted providers under sub-capitation and direct patient service arrangements, company-operated clinics and staff physicians. Medical costs for professional and institutional services rendered by contracted providers are recorded as patient care costs in the consolidated statements of income. Costs for operating medical clinics, including the salaries of medical and non-medical personnel and support costs, are also recorded in patient care costs.

An estimate of amounts due to contracted physicians, hospitals, and other professional providers for members under global and professional risk arrangements is included in medical payables in the accompanying consolidated balance sheets. Medical payables include claims reported as of the balance sheet date and estimates of IBNR. Such estimates are developed using actuarial methods and are based on many variables, including the utilization of healthcare services, historical payment patterns, cost trends, product mix, seasonality, changes in membership, and other factors. The estimation methods and the resulting reserves are continually reviewed and updated. Many of the medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations may not come to light until a substantial period of time has passed following the contract implementation. Any adjustments to reserves are reflected in current operations.

Income taxes

Federal and state income taxes are computed at currently enacted tax rates less tax credits using the asset and liability method. Deferred taxes are adjusted both for items that do not have tax consequences and for the cumulative effect of any changes in tax rates from those previously used to determine deferred tax assets or liabilities. Tax provisions include amounts that are currently payable, changes in deferred tax assets and liabilities that arise because of temporary differences between the timing of when items of income and expense are recognized for financial reporting and income tax purposes, changes in the recognition of tax positions and any changes in the valuation allowance caused by a change in judgment about the realizability of the related deferred tax assets. A valuation allowance is established when necessary to reduce deferred tax assets to amounts expected to be realized.

The Company uses a recognition threshold of more-likely-than-not and a measurement attribute on all tax positions taken or expected to be taken in a tax return in order to be recognized in the financial statements. Once the recognition threshold is met, the tax position is then measured to determine the actual amount of benefit to recognize in the financial statements.

Stock-based compensation

The Company's stock-based compensation awards are measured at their estimated fair values on the date of grant if settled in shares or at their estimated fair values at the end of each reporting period if settled in cash. The value of stock-based awards so measured is recognized as compensation expense on a cumulative straight-line basis over the vesting terms of the awards, adjusted for expected forfeitures. Stock-based compensation to be settled in shares is recorded to the Company's shareholders' equity, while stock-based compensation to be settled in cash is recorded to a liability.

Interest rate swap and cap agreements

The Company has several interest rate swap agreements as a means of hedging its exposure to and volatility from LIBOR variable-based interest rate changes as part of its overall interest rate risk management strategy. These agreements are designated as cash flow hedges and are not held for trading or speculative purposes. The swap agreements have the economic effect of converting the majority of the LIBOR variable component of the Company's interest rate to fixed rates on the Company's Term Loan A outstanding balances. In addition, the Company has several interest rate cap agreements that have the economic effect of capping the Company's maximum exposure to LIBOR variable interest rate changes on specific portions of the Company's Term Loan B totaling $2,735,000. The Company also maintains several forward interest rate cap agreements with notional amounts totaling $7,000,000, of which $3,500,000 will be effective September 30, 2016 and the remainder of the cap agreements will be effective June 29, 2018. These cap agreements will have economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 3.50% on an equivalent of the Company's debt. See Note 14 to the consolidated financial statements for further details.

Noncontrolling interests

Noncontrolling interests represent third-party minority equity ownership interests in consolidated entities which are majority-owned by the Company, as well as the equity ownership interests in entities that are not owned by the Company but which are consolidated for financial statement reporting purposes. As of December 31, 2015, third parties held noncontrolling ownership interests in 440 consolidated legal entities.

(dollars in thousands, except per share data)

Fair value estimates

The Company currently measures the fair value of certain assets, liabilities (including contingent earn-out consideration) and noncontrolling interests subject to put provisions (temporary equity) based upon certain valuation techniques that include observable or unobservable market inputs and assumptions that market participants would use in pricing these assets, liabilities and temporary equity. The Company has also classified its assets, liabilities and temporary equity into the appropriate fair value hierarchy levels as defined by the Financial Accounting Standards Board (FASB). See Note 24 to the consolidated financial statements for further details.

New accounting standards

The Company elected to early adopt Accounting Standards Update (ASU) No. 2015-03, *Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs*, retrospectively effective as of January 1, 2014. The amendments in this ASU require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. In August 2015, the FASB issued ASU 2015-15, *Interest – Imputation of Interest (Subtopic 835-30) – Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements,* which clarifies that the treatment of debt issuance costs related to a line-of-credit may continue to be deferred in an asset position and subsequently amortized over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this ASU. Adoption of this standard did not have a material impact on the Company's consolidated financial statements. The following table summarizes the retrospective adjustments made to conform prior period classifications to the new guidance:

	December 31, 2014		
	As filed	Reclassification	As Adjusted
Intangible assets, net of accumulated amortization (included deferred financing costs)	$ 1,949,498	$ (84,656)	$ 1,864,842
Long-term debt, net of current portion and deferred financing costs	$ (8,383,280)	$ 84,656	$ (8,298,624)

The Company elected to early adopt ASU No. 2015-17, *Income Taxes (ASC 740): Balance Sheet Classification of Deferred Taxes*, retrospectively effective as of January 1, 2014. The amendments in this ASU serve to simplify the presentation of deferred income taxes. The update requires that deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. Adoption of this standard did not have a material impact on the Company's consolidated financial statements. The following table summarizes the adjustments made to conform prior period classifications to the new guidance:

	December 31, 2014		
	As filed	Reclassification	As Adjusted
Current deferred income tax assets	$ 240,626	$ (240,626)	$ —
Long-term deferred income tax liabilities	$ (890,701)	$ 240,626	$ (650,075)
Net deferred tax liability	$ (650,075)	$ —	$ (650,075)

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)*. The amendments in this ASU revise the accounting related to lessee accounting. Under the new guidance, lessees will be required to recognize a lease liability and a right-of-use asset for all leases. The new lease guidance also simplified the accounting for sale and leaseback transactions primarily because lessees must recognize lease assets and lease liabilities. The amendments in this ASU are effective for the Company beginning on January 1, 2019 and should be applied through a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. Early adoption is permitted. The Company has not yet determined what the effects of adopting this ASU will be on its consolidated financial statements.

In January 2016, the FASB issued ASU No. 2016-01, *Financial Statements – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities.* The amendments in this ASU revise the accounting related to (1) the classification and measurement of investments in equity securities and (2) the presentation of certain fair value changes for financial liabilities at fair value. The amendments in this ASU are effective for the Company beginning on January 1, 2018 and should be applied through a cumulative-effect adjustment to the statement of financial position. Early adoption is permitted under certain circumstances. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial statements.

In September 2015, the FASB issued ASU No. 2015-16, *Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments.* The amendments in this ASU allow an acquirer to recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. This will be inclusive of the effect on earnings of changes in depreciation, amortization, or other income effects as a result of the change to provisional amounts, calculated as if the accounting had been completed at the acquisition date. The amendments in this ASU became effective for the Company beginning on January 1, 2016, and are applied prospectively. Early adoption was permitted. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial statements.

In July 2015, the FASB issued ASU No. 2015-11, *Inventory (Topic 330): Simplifying the Measurement of Inventory.* The amendments in this ASU apply to all inventory with the exception of inventory measured using last-in, first-out or the retail inventory method. This ASU simplifies the measurement of inventory. Under this new standard, inventory should be measured using the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. The amendments in this ASU are effective for the Company beginning January 1, 2017 and should be applied prospectively. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial statements.

In April 2015, the FASB issued ASU No. 2015-05, *Customer's Accounting for Fees Paid in a Cloud Computing Arrangement*, which amends ASC 350-40, *Intangibles-Goodwill and Other-Internal-Use Software*. This ASU provides guidance to customers about whether a cloud computing arrangement includes a software license. If an arrangement includes a software license, the accounting for the license will be consistent with licenses of other intangible assets. If the arrangement does not include a license, the arrangement will be accounted for as a service contract. The amendments in this ASU are effective for the Company beginning January 1, 2016 and can be adopted prospectively or retrospectively. The Company is currently assessing the effects of adopting this ASU on its consolidated financial statements, however the adoption is not expected to have a material impact.

In February 2015, the FASB issued ASU No. 2015-02, *Consolidation (Topic 810): Amendments to the Consolidation Analysis*. The amendments in the ASU clarify consolidation of VIEs regarding which reporting entity consolidates the legal entity. The amendments in the ASU became effective for the Company beginning January 1, 2016. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard as issued was to be effective for the Company on January 1, 2017. In July 2015, the FASB issued ASU 2015-14, *Revenue from Contracts with Customers (Topic 606): Deferral of Effective Date*. This guidance approves a one-year deferral of the effective date of ASU 2014-09. The final ASU now requires the Company to adopt this standard on January 1, 2018. Early application is permitted as of the initial effective date of January 1, 2017, but not prior to that date. The standard permits the use of either the retrospective or cumulative effect transition method. The Company has assembled an internal revenue task force that meets regularly to discuss and evaluate the overall impact this guidance will have on various revenue streams in the consolidated financial statements and related disclosures, as well as the expected timing and method of adoption. The Company has not yet selected a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

2. Earnings per share

Basic net income per share is calculated by dividing net income attributable to the Company, adjusted for any change in noncontrolling interest redemption rights in excess of fair value, by the weighted average number of common shares and vested stock units outstanding, net of shares held in escrow that under certain circumstances may be returned to the Company.

Diluted net income per share includes the dilutive effect of outstanding stock-settled stock appreciation rights (SSARs), stock options and unvested stock units (under the treasury stock method) as well as shares held in escrow that the Company expects will remain outstanding.

The reconciliations of the numerators and denominators used to calculate basic and diluted net income per share are as follows:

	Year ended December 31,		
	2015	2014	2013
	(shares in thousands)		
Basic:			
Income from continuing operations attributable to DaVita HealthCare Partners Inc.	$ 269,732	$ 723,114	$ 620,197
Discontinued operations attributable to DaVita HealthCare Partners Inc.	—	—	13,249
Net income attributable to DaVita HealthCare Partners Inc. for basic earnings per share calculation	$ 269,732	$ 723,114	$ 633,446
Weighted average shares outstanding during the period	214,062	214,496	212,128
Vested stock units	—	—	5
Contingently returnable shares held in escrow for the DaVita HealthCare Partners merger	(2,194)	(2,194)	(2,194)
Weighted average shares for basic earnings per share calculation	211,868	212,302	209,939
Basic income from continuing operations per share attributable to DaVita HealthCare Partners Inc.	$ 1.27	$ 3.41	$ 2.95
Basic income from discontinued operations per share attributable to DaVita HealthCare Partners Inc.	—	—	0.07
Basic net income per share attributable to DaVita HealthCare Partners Inc.	$ 1.27	$ 3.41	$ 3.02
Diluted:			
Income from continuing operations attributable to DaVita HealthCare Partners Inc.	$ 269,732	$ 723,114	$ 620,197
Discontinued operations attributable to DaVita HealthCare Partners Inc.	—	—	13,249
Net income attributable to DaVita HealthCare Partners Inc. for diluted earnings per share calculation	$ 269,732	$ 723,114	$ 633,446
Weighted average shares outstanding during the period	214,062	214,496	212,128
Vested stock units	—	—	5
Assumed incremental shares from stock plans	2,190	2,432	2,631
Weighted average shares for diluted earnings per share calculation	216,252	216,928	214,764
Diluted income from continuing operations per share attributable to DaVita HealthCare Partners Inc.	$ 1.25	$ 3.33	$ 2.89
Diluted income from discontinued operations per share attributable to DaVita HealthCare Partners Inc.	—	—	0.06
Diluted net income per share attributable to DaVita HealthCare Partners Inc.	$ 1.25	$ 3.33	$ 2.95
Anti-dilutive stock-settled awards excluded from calculation(1)	1,365	1,715	4,194

(1) Shares associated with stock-settled stock appreciation rights and stock options excluded from the diluted denominator calculation because they are anti-dilutive under the treasury stock method.

3. Accounts receivable

Approximately 14% and 11% of the Company's net accounts receivable balances as of December 31, 2015 and 2014, respectively, were more than six months old, and there were no significant balances over one year old. Accounts receivable are principally from Medicare and Medicaid programs and commercial insurance plans.

Accounts receivable are reduced by an allowance for doubtful accounts. In evaluating the ultimate collectability of its accounts receivable, the Company analyzes its historical cash collection experience and trends for each of its government payors and commercial payors to estimate the adequacy of the allowance for doubtful accounts and the amount of the provision for uncollectible accounts. Management regularly updates its analysis based upon the most recent information available to it to determine its current provision for uncollectible accounts and the adequacy of its allowance for doubtful accounts.

(dollars in thousands, except per share data)

For receivables associated with dialysis and related lab services covered by government payors, like Medicare, the Company receives 80% of the payment directly from Medicare as established under the government's bundled payment system and determines an appropriate allowance for doubtful accounts and provision for uncollectible accounts on the remaining balance due depending upon the Company's estimate of the amounts ultimately collectible from other secondary coverage sources or from the patients. For receivables associated with services to patients covered by commercial payors that are either based upon contractual terms or for non-contracted health plan coverage, the Company provides an allowance for doubtful accounts by recording a provision for uncollectible accounts based upon its historical collection experience, potential inefficiencies in its billing processes and for which collectability is determined to be unlikely. Approximately 1% of the Company's dialysis and related lab services net accounts receivable are associated with patient pay and it is the Company's policy to reserve 100% of the outstanding accounts receivable balances for dialysis services when those amounts due are outstanding for more than four months.

During the year ended December 31, 2015, the Company's allowance for doubtful accounts increased by $21,470. The increase in 2015 was primarily due to an increase in the provision for uncollectible accounts due to an increase in the write-offs of Medicare secondary billings. The increase was also due to an increase in the reserved amounts for accounts receivable older than six months. During the year ended December 31, 2014, the Company's allowance for doubtful accounts increased by $5,531. The increase in 2014 was primarily due to an increase in the provision for uncollectible accounts due to an increase in the write-offs of Medicare secondary billings.

4. Other receivables

Other receivables were comprised of the following:

	December 31,	
	2015	2014
Supplier rebates and non-trade receivables	$ 316,644	$ 265,693
Medicare bad debt claims	105,714	118,504
Operating advances under management and administrative services agreements	13,527	16,719
	$ 435,885	$ 400,916

Operating advances under management and administrative services agreements are generally unsecured.

5. Other current assets

Other current assets consist principally of prepaid expenses and funds on deposit with third parties.

	December 31,	
	2015	2014
Prepaid expenses	$ 105,216	$ 102,466
Funds on deposit with third parties	82,679	81,276
Other	2,427	3,100
	$ 190,322	$ 186,842

(dollars in thousands, except per share data)

6. Property and equipment

Property and equipment were comprised of the following:

	December 31,	
	2015	2014
Land	$ 42,080	$ 35,885
Buildings	437,283	387,621
Leasehold improvements	2,289,425	2,002,735
Equipment and information systems, including internally developed software	2,080,446	1,836,704
New center and capital asset projects in progress	336,513	235,660
	5,185,747	4,498,605
Less accumulated depreciation	(2,397,007)	(2,029,506)
	$ 2,788,740	$ 2,469,099

Depreciation expense on property and equipment was $475,484, $428,309 and $373,107 for 2015, 2014 and 2013, respectively.

Interest on debt incurred during the development of new centers and other capital asset projects is capitalized as a component of the asset cost based on the respective in-process capital asset balances. Interest capitalized was $9,723, $7,888 and $6,408 for 2015, 2014 and 2013, respectively.

7. Intangibles

Intangible assets other than goodwill were comprised of the following:

	December 31,	
	2015	2014
Customer relationships	$ 1,575,865	$ 1,575,865
Trade names	170,883	171,168
Provider network and practice management tools	183,724	183,688
Noncompetition and other agreements	510,521	506,867
Lease agreements	7,306	7,982
Indefinite-lived assets	9,310	24,818
Other	408	402
	2,458,017	2,470,790
Less accumulated amortization	(770,691)	(605,948)
	$ 1,687,326	$ 1,864,842

The 2014 intangible assets have been retrospectively recast as a result of the Company adopting ASU No. 2015-03. See Note 1 to the consolidated financial statements for further details. Amortization expense from amortizable intangible assets, other than lease agreements, was $166,537, $167,956 and $160,960 for 2015, 2014 and 2013, respectively. Lease agreement intangible assets and liabilities were amortized to rent expense in the amounts of $(1,613), $(1,798) and $(1,447) for 2015, 2014 and 2013, respectively.

During the quarter ended December 31, 2015, and in conjunction with the annual goodwill impairment assessment for its HCP reporting units as of November 1, the Company determined that circumstances indicated it had become more likely than not that an indefinite-lived intangible asset of the Company's HCP Nevada reporting unit had become impaired. See Note 10 to the consolidated financial statements for further details.

(dollars in thousands, except per share data)

Amortizable intangible liabilities were comprised of the following:

	December 31,	
	2015	2014
Alliance and product supply agreement	$ 68,200	$ 68,200
Less accumulated amortization	(68,200)	(64,203)
Net Alliance and product supply agreement	—	3,997
Lease agreements (net of accumulated amortization of $6,936 and $4,785)	8,969	10,407
	$ 8,969	$ 14,404

Amortization benefit recognized from the alliance and product supply agreement was $3,997 for 2015 and $5,330 for both 2014 and 2013. Lease agreement intangible liabilities are classified in other long-term liabilities and amortized to rent expense.

Scheduled amortization charges from amortizable intangible assets and liabilities as of December 31, 2015 were as follows:

	Customer relationships	Trade names	Provider network and practice management tools	Noncompetition and other agreements	Lease agreements	Other
2016	82,617	16,634	26,187	30,619	(1,549)	67
2017	82,685	16,623	26,250	29,775	(1,228)	102
2018	82,638	16,235	26,273	19,545	(892)	53
2019	82,408	16,235	22,536	15,817	(832)	3
2020	82,066	16,235	541	10,209	(678)	2
Thereafter	909,798	37,320	—	28,543	(3,790)	—

8. Equity investments and other investments

Equity investments in non-consolidated businesses were $73,368 and $65,637 at December 31, 2015 and 2014, respectively. During 2015, 2014 and 2013, the Company recognized income of $18,325, $23,234 and $34,558, respectively, relating to equity investments in non-consolidated businesses under the equity method of accounting.

9. Investments in debt and equity securities

Based on the Company's intentions and strategy concerning investments in debt securities, the Company classifies certain debt securities as held-to-maturity and records them at amortized cost. Equity securities that have readily determinable fair values including those of mutual funds and other debt securities are classified as available for sale and recorded at fair value.

The Company's investments in securities consist of the following:

	December 31, 2015			December 31, 2014		
	Held to maturity	Available for sale	Total	Held to maturity	Available for sale	Total
Certificates of deposit, commercial paper and money market funds due within one year	$ 406,884	$ —	$ 406,884	$ 335,975	$ —	$ 335,975
Investments in mutual funds and common stock	—	33,482	33,482	—	28,123	28,123
	$ 406,884	$ 33,482	$ 440,366	$ 335,975	$ 28,123	$ 364,098
Short-term investments	$ 406,884	$ 1,200	$ 408,084	$ 335,975	$ 1,424	$ 337,399
Long-term investments	—	32,282	32,282	—	26,699	26,699
	$ 406,884	$ 33,482	$ 440,366	$ 335,975	$ 28,123	$ 364,098

The cost of certificates of deposit, commercial paper and money market funds at December 31, 2015 and 2014 approximate their fair value. As of December 31, 2015 and 2014, available for sale investments included $2,589 and $5,181, respectively, of gross pre-tax unrealized gains. During 2015 and 2014 the Company recorded gross pre-tax unrealized (losses) and gains of $(1,974) and $425, respectively, in other comprehensive income associated with changes in the fair value of these investments. During 2015, the

(dollars in thousands, except per share data)

Company sold investments in mutual funds and common stock for net proceeds of $1,295, and recognized a pre-tax gain of $618, or $377 after tax, that was previously recorded in other comprehensive income. During 2014, the Company sold investments in mutual funds for net proceeds of $1,262, and recognized a pre-tax gain of $340, or $207 after tax, that was previously recorded in other comprehensive income.

Investments in mutual funds classified as available for sale are held within a trust to fund existing obligations associated with several of the Company's non-qualified deferred compensation plans.

10. Goodwill

Changes in the carrying value of goodwill by reportable segments were as follows:

	U.S. dialysis and related lab services	HCP	Other ancillary services and strategic initiatives	Consolidated total
Balance at January 1, 2014	$ 5,469,473	$ 3,516,162	$ 227,339	$ 9,212,974
Acquisitions	143,021	48,649	29,844	$ 221,514
Divestitures	(1,851)	—	—	$ (1,851)
Foreign currency and other adjustments	—	(2,277)	(15,065)	$ (17,342)
Balance at December 31, 2014	$ 5,610,643	$ 3,562,534	$ 242,118	$ 9,415,295
Acquisitions	21,910	29,910	45,273	97,093
Divestitures	(3,370)	(5,411)	—	(8,781)
Goodwill impairment charges	—	(188,769)	(4,065)	(192,834)
Foreign currency and other adjustments	—	—	(16,294)	(16,294)
Balance at December 31, 2015	$ 5,629,183	$ 3,398,264	$ 267,032	$ 9,294,479

Each of the Company's operating segments described in Note 25 to these consolidated financial statements represents an individual reporting unit for goodwill impairment testing purposes, except that each sovereign jurisdiction within our international operating segments is considered a separate reporting unit.

Within the U.S. dialysis and related lab services operating segment, the Company considers each of its dialysis centers to constitute an individual business for which discrete financial information is available. However, since these dialysis centers have similar operating and economic characteristics, and the allocation of resources and significant investment decisions concerning these businesses are highly centralized and the benefits broadly distributed, the Company has aggregated these centers and deemed them to constitute a single reporting unit.

The Company has applied a similar aggregation to its consolidated HCP operations in each region, to the vascular access service centers in its vascular access services reporting unit, to the physician practices in its physician services reporting unit, and to the dialysis centers within each international reporting unit. For the Company's other operating segments, no component below the operating segment level is considered a discrete business and therefore these operating segments directly constitute individual reporting units.

During the quarter ended December 31, 2015, and in conjunction with the annual goodwill impairment assessment for its HCP reporting units as of November 1, the Company determined that circumstances indicated it had become more likely than not that the goodwill and an indefinite-lived intangible asset of certain HCP reporting units had become impaired.

These circumstances included underperformance of the business in recent quarters as well as changes in other market conditions, including government reimbursement cuts and our expected ability to mitigate them. We are performing the required "step 1" and "step 2" valuations for these HCP reporting units and have estimated the fair value of their net assets and implied goodwill with the assistance of a third-party valuation firm. The Company also recorded a minor goodwill impairment charge on one of its international operations during 2015.

(dollars in thousands, except per share data)

Based on these preliminary assessments of the HCP reporting units as well as assessments of other reporting units, the Company recorded the following goodwill and indefinite-lived intangible asset impairment charges during the year ended December 31, 2015:

Reporting unit	Impairment charge	Intangible asset impaired	Quarter ended
HCP Nevada	181,253	Goodwill	December 31, 2015
HCP Arizona	1,716	Goodwill	December 31, 2015
HCP Florida	5,800	Goodwill	December 31, 2015
International operations	4,065	Goodwill	June 30, 2015
Total goodwill impairment charges	192,834		
HCP Nevada	17,400	Indefinite-lived license	December 31, 2015
Total intangible impairment charges	$ 210,234		

The final amount of the impairment charges for the Company's HCP reporting units included above will depend upon the final outcome of the related valuation work, which we expect will be completed in the first quarter of 2016.

The Company's HCP Nevada, HCP Florida, HCP Colorado and Kidney Care Malaysia reporting units remain at risk of further goodwill impairment. As of December 31, 2015, these reporting units have goodwill amounts of $424,468, $530,075, $16,897, and $13,329, respectively. As of December 31, 2015, the estimated fair values of the HCP Nevada, HCP Florida, HCP Colorado and Kidney Care Malaysia reporting units exceeded (fell short of) from their total carrying amounts by approximately (3.4)%, 0.7%, 9.5% and 11.2%, respectively.

For the Company's at-risk HCP reporting units, further reductions in reimbursement rates or other significant adverse changes in expected future cash flows or valuation assumptions could result in further goodwill impairment charges in the future. For example, a sustained, long-term reduction of 3% in operating income for HCP Nevada or HCP Florida could reduce their estimated fair values by up to 2.0% and 1.6%, respectively. Separately, an increase in their respective discount rates of 100 basis points could reduce the estimated fair values of HCP Nevada and HCP Florida by up to 2.9% and 2.8%, respectively.

Except as described above, none of the goodwill associated with the Company's various other reporting units was considered at risk of impairment as of December 31, 2015. Since the dates of the Company's last annual goodwill impairment tests, there have been certain developments, events, changes in operating performance and other changes in key circumstances that have affected the Company's businesses. However, these did not cause management to believe it is more likely than not that the fair value of any of its reporting units would be less than its carrying amount.

11. Other liabilities

Other liabilities were comprised of the following:

	December 31,	
	2015	2014
Payor refunds and retractions	$ 153,104	$ 125,435
Contingent earn-out consideration	29,050	15,614
Insurance and self-insurance accruals	80,355	92,928
Accrued interest	81,585	87,224
Other medical payables	53,687	39,867
Accrued non-income tax liabilities	29,291	25,909
Other	255,051	123,246
	$ 682,123	$ 510,223

12. Medical payables

The healthcare costs shown in the following table include estimates for the cost of professional medical services provided by non-employed physicians and other providers, as well as inpatient and other ancillary costs for all markets, other than California, where state regulation allows for the assumption of global risk. Healthcare costs payable are included in medical payables.

(dollars in thousands, except per share data)

The following table shows the components of changes in the healthcare costs payable for the year ended December 31, 2015 and 2014:

	December 31,	
	2015	2014
Healthcare costs payable, beginning of the year	$ 214,405	$ 172,310
Add: Components of incurred healthcare costs		
Current year	1,587,036	1,572,723
Prior years	1,523	3,429
Total incurred healthcare costs	1,588,559	1,576,152
Less: Claims paid		
Current year	1,397,378	1,378,137
Prior years	192,945	155,920
Total claims paid	1,590,323	1,534,057
Healthcare costs payable, end of the year	$ 212,641	$ 214,405

The Company's prior year estimates of healthcare costs payable increased by $1,523 and $3,429 in 2015 and 2014, respectively. The increase in 2015 resulted from certain medical claims being settled for amounts more than originally estimated. When significant increases (decreases) in prior-year healthcare cost estimates occur that the Company believes significantly impacts its current year operating results, the Company discloses that amount as unfavorable (favorable) development of prior-year's healthcare cost estimates. Actual claim payments for prior year services have not been materially different from the Company's year-end estimates.

13. Income taxes

The Company accounts for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements. Under this method, deferred tax assets and liabilities are determined on the basis of the differences between the financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse.

Income tax expense (benefit) consisted of the following:

	Year ended December 31,		
	2015	2014	2013
Current:			
Federal	$ 183,263	$ 188,302	$ 334,258
State	30,766	30,789	68,715
International	856	1,687	1,764
Total current income tax	$ 214,885	$ 220,778	$ 404,737
Deferred:			
Federal	88,718	192,267	(6,695)
State	(8,307)	32,360	(8,941)
International	430	938	746
Total deferred income tax	$ 80,841	$ 225,565	$ (14,890)
	$ 295,726	$ 446,343	$ 389,847

The allocation of income tax expense (benefit) was as follows:

	Year ended December 31,		
	2015	2014	2013
Continuing operations	$ 295,726	$ 446,343	$ 381,013
Discontinued operations	—	—	(84)
Gain on discontinued operations	—	—	8,918
	$ 295,726	$ 446,343	$ 389,847

(dollars in thousands, except per share data)

The reconciliation between the Company's effective tax rate from continuing operations and the U.S. federal income tax rate is as follows:

	Year ended December 31,		
	2015	2014	2013
Federal income tax rate	35.0%	35.0%	35.0%
State income taxes, net of federal benefit	2.5	3.5	3.8
International rate differential	(1.1)	(0.2)	0.1
Goodwill and intangible impairments	11.7	—	—
Changes in deferred tax valuation allowances	2.6	0.6	0.3
Contingent earn-out adjustments	—	—	(2.6)
Other	1.5	(0.8)	1.4
Impact of noncontrolling interests primarily attributable to non-tax paying entities	(11.3)	(4.0)	(4.1)
Effective tax rate	40.9%	34.1%	33.9%

The Company has not recognized any deferred taxes for the undistributed earnings of its foreign subsidiaries because the Company currently expects those earnings to be permanently reinvested. Determination of the amount of unrecognized deferred taxes related to undistributed earnings of foreign subsidiaries is not practicable because such liability, if any, is dependent on circumstances that will exist if and when remittance occurs.

Deferred tax assets and liabilities arising from temporary differences were as follows:

	December 31,	
	2015	2014
Receivables	$ 43,393	$ 42,976
Accrued liabilities	272,080	253,228
Net operating loss carryforwards	130,977	102,212
Other	114,805	93,567
Deferred tax assets	561,255	491,983
Valuation allowance	(57,811)	(28,784)
Net deferred tax assets	503,444	463,199
Intangible assets	(927,761)	(839,824)
Property and equipment	(205,071)	(187,198)
Investments in partnerships	(83,584)	(78,619)
Other	(13,990)	(7,633)
Deferred tax liabilities	(1,230,406)	(1,113,274)
Net deferred tax liabilities	$ (726,962)	$ (650,075)

At December 31, 2015, the Company had federal net operating loss carryforwards of approximately $182,200 that expire through 2035, although a substantial amount expire by 2028. The Company also had state net operating loss carryforwards of $761,686 that expire through 2035 and international net operating loss carryforwards of $96,847, some of which have an indefinite life. The utilization of a portion of these losses may be limited in future years based on the profitability of certain entities. The valuation allowance increase of $29,027 is primarily due to the realizability of losses in certain foreign and state jurisdictions.

(dollars in thousands, except per share data)

Unrecognized tax benefits

A reconciliation of the beginning and ending liability for unrecognized tax benefits that do not meet the more-likely-than-not threshold were as follows:

	Year ended December 31,	
	2015	2014
Balance beginning	$ 31,877	$ 60,538
Additions for tax positions related to current year	6,131	914
Additions (reductions) for tax positions related to prior years	2,999	(27,312)
Reductions related to lapse of applicable statute	(1,996)	(2,077)
Reductions related to settlements with taxing authorities	—	(186)
Balance ending	$ 39,011	$ 31,877

As of December 31, 2015, the Company's total liability for unrecognized tax benefits relating to tax positions that do not meet the more-likely-than-not threshold is $39,011, all of which would impact the Company's effective tax rate if recognized. This balance represents an increase of $7,134 from the December 31, 2014 balance of $31,877.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits in its income tax expense. At December 31, 2015 and 2014, the Company had approximately $9,918 and $10,123, respectively, accrued for interest and penalties related to unrecognized tax benefits, net of federal tax benefit.

The Company and its subsidiaries file U.S. federal and state income tax returns and various international income tax returns. The Company is no longer subject to U.S. federal and state examinations by tax authorities for years before 2011 and 2008, respectively.

14. Long-term debt

Long-term debt was comprised of the following:

	December 31,	
	2015	2014
Senior Secured Credit Facilities:		
Term Loan A	$ 925,000	$ 975,000
Term Loan B	3,447,500	3,482,500
Senior notes	4,500,000	3,775,000
Acquisition obligations and other notes payable	70,645	69,045
Capital lease obligations	283,185	218,097
Total debt principal outstanding	9,226,330	8,519,642
Discount and deferred financing costs	(95,985)	(100,864)
	9,130,345	8,418,778
Less current portion	(129,037)	(120,154)
	$ 9,001,308	$ 8,298,624

Scheduled maturities of long-term debt at December 31, 2015 were as follows:

2016	129,037
2017	152,768
2018	166,132
2019	740,895
2020	65,171
Thereafter	7,972,327

Term Loans

Total outstanding borrowings under Term Loan A and Term Loan B can consist of various individual tranches that can range in maturity from one month to twelve months (currently all tranches are one month in duration). Each tranche for the Term Loan A bears interest at a London Interbank Offered Rate (LIBOR) rate determined by the duration of such tranche plus an interest rate margin, currently 1.75%. The LIBOR variable component of the interest rate for each tranche is reset as such tranche matures and a new tranche is established. At December 31, 2015, the overall weighted average interest rate for the Term Loan A was determined based upon the LIBOR interest rates in effect for all of the individual tranches plus the interest rate margin. The Company has several interest rate swap agreements that have the economic effect of fixing the majority of the Term Loan A LIBOR variable component of the Company's interest rate, as described below. At December 31, 2015, the Term Loan B bears interest at LIBOR (floor of 0.75%) plus a margin of 2.75%. The Company is subject to a LIBOR-based floor until such time as the LIBOR-based component of the interest rate exceeds 0.75% on the Term Loan B. At such time, the Company will then be subject to LIBOR-based interest rate volatility on the LIBOR variable component of its interest rate and the overall weighted average interest rate for the Term Loan B will then be determined based upon the LIBOR interest rates in effect for all individual tranches plus the interest rate margin. The Company has several interest rate cap agreements that have the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 2.50% on $2,735,000 of outstanding principal debt. The remaining $712,500 outstanding principal balance of the Term Loan B would still be subject to LIBOR-based interest rate volatility above a floor of 0.75%. In addition, the Company maintains several forward interest rate cap agreements with notional amounts totaling $7,000,000 of which $3,500,000 will be effective September 30, 2016 and the remainder of the cap agreements will be effective June 29, 2018. The cap agreements will have the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 3.50% on an equivalent amount of the Company's debt. See below for further details.

During the year ended December 31, 2015, the Company made mandatory principal payments under its then existing Senior Secured Credit Facilities totaling $50,000 on the Term Loan A and $35,000 on the Term Loan B.

Credit agreement and other debt transactions

In June 2014 the Company entered into a Credit Agreement that consists of a five year Revolving Credit Facility in the aggregate principal amount of $1,000,000 (the Revolver), a five year Term Loan A facility in the aggregate principal amount of $1,000,000 (the Term Loan A) and a seven year Term Loan B facility in the aggregate principal amount of $3,500,000 (the Term Loan B). In addition, the Company can increase the existing revolving commitments and enter into one or more incremental term loan facilities in an amount not to exceed the sum of $1,500,000 (less the amount of other permitted indebtedness incurred or issued in reliance on such amount), plus an amount of indebtedness such that the senior secured leverage ratio is not in excess of 3.50 to 1.00 after giving effect to such borrowings. The Credit Agreement contains certain customary affirmative and negative covenants such as various restrictions or limitations on certain items depending on the Company's leverage ratio.

In addition, in June 2014, the Company issued $1,750,000 5 1/8% Senior Notes due 2024 (5 1/8% Senior Notes). The 5 1/8% Senior Notes pay interest on January 15 and July 15 and are unsecured and are guaranteed by the Company's domestic subsidiaries as discussed above.

The Company used a portion of the proceeds to pay off the total outstanding principal balances under the Company's then existing Senior Secured Credit Facilities plus accrued interest totaling $5,362,400 and in addition, paid off the outstanding principal balances of the Company's $775,000 6 3/8% Senior Notes plus accrued interest.

The Company also terminated $1,137,500 notional amounts of amortizing swaps and also terminated $600,000 of forward swaps during June 2014.

As a result of the 2014 transactions, the Company recorded debt refinancing charges of $97,548 that consist of the cash tender premiums, the redemption premium, the write-off of existing deferred financing costs, the write-off of certain new refinancing costs, other professional fees and losses associated with the termination of several of the Company's interest rate swap agreements.

In 2014, the Company made mandatory principal payments under its then existing New Senior Secured Credit Facility (before entering into a secured credit agreement and repaying all outstanding amounts under the then existing Senior Secured Credit Facilities, as discussed below) totaling $62,500 on the Term Loan A, $16,875 on the Term Loan A-3, $21,875 on the Term Loan B and $4,125 on the Term Loan B-2.

Revolving lines of credit

The Company has an undrawn revolving line under the Senior Secured Credit Facilities totaling $1,000,000, of which approximately $92,238 was committed for outstanding letters of credit. In addition, the Company has approximately $1,286 of committed outstanding letters of credit related to HCP, which is backed by a certificate of deposit.

Senior Notes

The Company's senior notes as of December 31, 2015, consisted of $1,500,000 of 5.0% Senior Notes due 2025, $1,750,000 5 1/8% senior notes due 2024 and $1,250,000 of 5 3/4% senior notes due 2022 (collectively Senior Notes), as described below.

In April 2015, the Company issued $1,500,000 5.0% Senior Notes due 2025 (5.0% Senior Notes). The 5.0% Senior Notes pay interest on May 1 and November 1 of each year beginning November 1, 2015. The 5.0% Senior Notes are unsecured senior obligations and rank equally in right of payment with the Company's existing and future unsecured senior indebtedness. The 5.0% Senior Notes are guaranteed by certain of the Company's domestic subsidiaries. The Company may redeem up to 35% of the 5.0% Senior Notes at any time prior to May 1, 2018 at a certain specified price from the proceeds of one or more equity offerings. In addition, the Company may redeem some or all of the 5.0% Senior Notes at any time prior to May 1, 2020 at make whole redemption rates and on or after such date at certain specified redemption prices. The net proceeds from the 5.0% Senior Notes offering were used to repurchase all of the $775,000 aggregate outstanding principal balances of 6 5/8% Senior Notes due 2020 (6 5/8% Senior Notes) through a combination of a tender offer and a redemption process and to pay fees and expenses. The remaining net offering proceeds will be used for general corporate purposes, future acquisitions and share repurchases. As a result of these transactions, the Company incurred $48,072 in debt redemption charges consisting of tender and redemption premiums as well as the write-off of deferred financing costs associated with the repurchase of the 6 5/8% Senior Notes.

The Senior Notes are also unsecured obligations and rank equally in right of payment with the Company's existing and future unsecured senior indebtedness. These Senior Notes are guaranteed by substantially all of the Company's direct and indirect wholly-owned domestic subsidiaries and require semi-annual interest payments. The Company may redeem some or all of the senior notes at any time on or after certain specific dates and at certain specific redemption prices as outlined in each senior note agreement.

Interest rate swaps and caps

The Company has entered into several interest rate swap agreements as a means of hedging its exposure to and volatility from variable-based interest rate changes as part of its overall interest rate risk management strategy. These agreements are not held for trading or speculative purposes and have the economic effect of converting the LIBOR variable component of the Company's interest rate to a fixed rate. These swap agreements are designated as cash flow hedges, and as a result, hedge-effective gains or losses resulting from changes in the fair values of these swaps are reported in other comprehensive income until such time as the hedged forecasted cash flows occur, at which time the amounts are reclassified into net income. Net amounts paid or received for each specific swap tranche that have settled have been reflected as adjustments to debt expense. In addition, the Company has entered into several interest rate cap agreements and several forward interest rate cap agreements that have the economic effect of capping the Company's maximum exposure to LIBOR variable interest rate changes on specific portions of the Company's floating rate debt, as described below. Certain cap agreements are also designated as cash flow hedges and, as a result, changes in the fair values of these cap agreements are reported in other comprehensive income. The amortization of the original cap premium is recognized as a component of debt expense on a straight-line basis over the term of the cap agreements. The swap and cap agreements do not contain credit-risk contingent features.

As of December 31, 2015, the Company maintains several interest rate swap agreements that were entered into in March 2013 with amortizing notional amounts totaling $760,000. These agreements have the economic effect of modifying the LIBOR variable component of the Company's interest rate on an equivalent amount of the Company's Term Loan A to fixed rates ranging from 0.49% to 0.52%, resulting in an overall weighted average effective interest rate of 2.26%, including the Term Loan A margin of 1.75%. The overall weighted average effective interest rate also includes the effects of $165,000 of unhedged Term Loan A debt that bears interest at LIBOR plus an interest rate margin of 1.75%. The swap agreements expire on September 30, 2016 and require monthly interest payments. During the year ended December 31, 2015, the Company recognized debt expense of $2,664 from these swaps. As of December 31, 2015, the total fair value of these swap agreements was a net asset of approximately $516. During the year ended December 31, 2015, the Company recorded a loss of $3,971 in other comprehensive income due to a decrease in the unrealized fair value of these swap agreements. The Company estimates that approximately $516 of existing unrealized pre-tax gains in other comprehensive income at December 31, 2015 will be reclassified into income over the next twelve months.

(dollars in thousands, except per share data)

As of December 31, 2015, the Company maintains several forward interest rate cap agreements that were entered into in October 2015 with notional amounts totaling $3,500,000. These forward cap agreements will be effective June 29, 2018 and will have the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 3.50% on an equivalent amount of its debt. These cap agreements expire on June 30, 2020. As of December 31, 2015, the total fair value of these cap agreements was an asset of approximately $13,815. During the year ended December 31, 2015, the Company recorded a loss of $3,492 in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

As of December 31, 2015, the Company maintains several forward interest rate cap agreements that were entered into in November 2014 with notional amounts totaling $3,500,000. These forward cap agreements will be effective September 30, 2016 and will have the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 3.50% on an equivalent amount of the Company's debt. The cap agreements expire on June 30, 2018. As of December 31, 2015, the total fair value of these cap agreements was an asset of approximately $1,312. During the year ended December 31, 2015, the Company recorded a loss of $11,029 in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

As of December 31, 2015, the Company maintains several interest rate cap agreements that were entered into in March 2013 with notional amounts totaling $2,735,000 on the Company's Term Loan B debt. These agreements have the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 2.50% on an equivalent amount of the Company's Term Loan B. During the year ended December 31, 2015, the Company recognized debt expense of $2,439 from these caps. The cap agreements expire on September 30, 2016. As of December 31, 2015, the total fair value of these cap agreements was immaterial. During the year ended December 31, 2015, the Company recorded a loss of $1,593 in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

The following table summarizes the Company's derivative instruments as of December 31, 2015 and 2014:

	Interest rate swap and cap agreements (liabilities and assets)			
	December 31, 2015		December 31, 2014	
Derivatives designated as hedging instruments	Balance sheet location	Fair value	Balance sheet location	Fair value
Interest rate swap agreements	Other short-term assets	$ 516	Other short-term liabilities	$ 1,457
Interest rate swap agreements	Other long-term assets	$ —	Other long-term assets	$ 3,281
Interest rate cap agreements	Other long-term assets	$ 15,127	Other long-term assets	$ 13,934

The following table summarizes the effects of the Company's interest rate swap and cap agreements for the years ended December 31, 2015, 2014 and 2013:

	Amount of gains (losses) recognized in OCI on interest rate swap and cap agreements			Location of (losses) gains reclassified from accumulated OCI into income	Amount of gains (losses) reclassified from accumulated OCI into income		
	Years ended December 31,				Years ended December 31,		
Derivatives designated as cash flow hedges	2015	2014	2013		2015	2014	2013
Interest rate swap agreements	$ (3,971)	$ (8,390)	$ 1,251	Debt expense	$ 2,664	$ 12,279	$ 15,678
Interest rate cap agreements	(16,114)	(8,119)	(974)	Debt expense	2,439	5,130	5,418
Tax (expense) benefit	7,844	6,450	(108)		(1,992)	(6,801)	(8,207)
Total	$ (12,241)	$ (10,059)	$ 169		$ 3,111	$ 10,608	$ 12,889

As of December 31, 2015, the interest rate on the Company's Term Loan B debt is effectively fixed subject to an embedded LIBOR floor which is higher than actual LIBOR as of such date and the Term Loan B is also subject to an interest rate cap if LIBOR should rise above 2.50%. See above for further details. Interest rates on the Company's senior notes are fixed by their terms. The majority of the LIBOR variable component of the Company's interest rates on the Company's Term Loan A are economically fixed as a result of interest rate swaps.

(dollars in thousands, except per share data)

As a result of embedded LIBOR floors in some of the Company's debt agreements and the swap and cap agreements, the Company's overall weighted average effective interest rate on the Senior Secured Credit Facilities was 3.46%, based upon the current margins in effect of 1.75% for the Term Loan A and 2.75% for the Term Loan B, as of December 31, 2015.

The Company's overall weighted average effective interest rate for the year ended December 31, 2015 was 4.42% and as of December 31, 2015 was 4.39%.

Debt expense

Debt expense consisted of interest expense of $389,755, $385,750 and $401,140, and the amortization and accretion of debt discounts and premiums, amortization of deferred financing costs and the amortization of interest rate cap agreements of $18,625, $24,544 and $28,803 for 2015, 2014 and 2013, respectively. The interest expense amounts are net of capitalized interest.

15. Leases

The majority of the Company's facilities are leased under non-cancelable operating leases, ranging in terms from five to fifteen years, which contain renewal options of five to ten years at the fair rental value at the time of renewal. The Company's leases are generally subject to periodic consumer price index increases or contain fixed escalation clauses. The Company also leases certain facilities and equipment under capital leases.

Future minimum lease payments under non-cancelable operating leases and capital leases are as follows:

	Operating leases	Capital leases
2016	$ 431,658	$ 30,538
2017	415,746	30,848
2018	375,516	31,196
2019	331,575	32,065
2020	283,633	32,443
Thereafter	1,083,825	235,285
	$ 2,921,953	392,375
Less portion representing interest		(109,190)
Total capital lease obligations, including current portion		$ 283,185

Rent expense under all operating leases for 2015, 2014, and 2013 was $514,287, $460,093 and $424,096, respectively. Rent expense is recorded on a straight-line basis, over the term of the lease, for leases that contain fixed escalation clauses or include abatement provisions. Leasehold improvement incentives are deferred and amortized to rent expense over the term of the lease. The net book value of property and equipment under capital leases was $261,960 and $197,344 at December 31, 2015 and 2014, respectively. Capital lease obligations are included in long-term debt. See Note 14 to the consolidated financial statements.

16. Employee benefit plans

The Company has a savings plan for substantially all of its non-HCP employees which has been established pursuant to the provisions of Section 401(k) of the Internal Revenue Code (IRC). The plan allows for employees to contribute a percentage of their base annual salaries on a tax-deferred basis not to exceed IRC limitations. The Company does not provide any matching contributions.

The Company also has various savings plans covering substantially all of its HCP employees which have been established pursuant to the provisions of Section 401(k) of the IRC. These plans provide for multiple employer matching contributions ranging from 0% to 6% of employee contributions. For the year ended December 31, 2015, the Company made matching contributions totaling approximately $8,324.

The Company also maintains a voluntary compensation deferral plan, the DaVita Voluntary Deferral Plan. This plan is non-qualified and permits certain employees whose annualized base salary equals or exceeds a minimum annual threshold amount as set by the Company to elect to defer all or a portion of their annual bonus payment and up to 50% of their base salary into a deferral account maintained by the Company. Total contributions to this plan in 2015, 2014 and 2013 were $4,234, $3,772 and $4,089, respectively. Deferred amounts are generally paid out in cash at the participant's election either in the first or second year following retirement or in a specified future period at least three to four years after the deferral election was effective. During 2015, 2014 and

2013 the Company distributed $1,270, $1,111 and $4,158, respectively, to participants in this plan. Participants are credited with their proportional amount of annual earnings from the plan. The assets of this plan are held in a rabbi trust and as such are subject to the claims of the Company's general creditors in the event of its bankruptcy. As of December 31, 2015 and 2014, the total fair value of assets held in this plan's trust were $23,800 and $21,208, respectively. In addition, the Company maintains a non-qualified voluntary compensation deferral plan, the HealthCare Partners, LLC Deferred Compensation Plan. As of December 31, 2015 and 2014, the total fair value of the assets held in this plan's trust were $8,578 and $5,347, respectively.

The Company maintains an Executive Retirement Plan for certain members of management. This plan is non-qualified and contributions to the plan were made at the discretion of DVA Renal Healthcare based upon a pre-determined percentage of a participant's base salary. Effective November 2005, all contributions to this plan were discontinued and the balance of the plan assets will be paid out upon termination or retirement of each individual participant. During 2015 and 2014 the Company distributed $25 and $152, respectively, to participants in this plan. During 2013 the Company did not make any distributions to participants under this plan. As of December 31, 2015 and 2014, the total fair value of assets held under this plan's trust was $1,104 and $1,344, respectively.

The Company also maintains a non-qualified deferred compensation program for certain key employees of HCP. Under the program, the employees can defer a portion of their salary which is invested at the direction of the employee into certain phantom investments as offered by the program. A portion of the amount deferred by the employees is used to purchase life insurance policies on each of the participating employees, with the Company named as beneficiary of the policies. The total cash surrender value of all of the life insurance policies totaled approximately $56,840 and $57,690 at December 31, 2015 and 2014, respectively, and is included in long-term investments. In addition, the total deferred compensation liabilities owed to the participants totaled approximately $52,128 and $60,409 at December 31, 2015 and 2014, respectively, and are included in other long-term liabilities. During 2015 and 2014, the Company did not make any contributions on behalf of its participants. During the year ended December 31, 2013, the Company contributed a total of approximately $4,658 into the deferred compensation program on behalf of its participants.

The fair value of all of the assets held in plan trusts as of December 31, 2015, and 2014 totaled $33,482 and $27,899, respectively. These assets are available for sale and as such are recorded at fair market value with changes in the fair market values being recorded in other comprehensive income. Any fair market value changes to the corresponding liability balance are recorded as compensation expense. See Note 9 to the consolidated financial statements.

Most of the Company's outstanding employee stock plan awards include a provision accelerating the vesting of the award in the event of a change of control. The Company also maintains a change of control protection program for its employees who do not have a significant number of stock awards, which has been in place since 2001, and which provides for cash bonuses to employees in the event of a change of control. Based on the market price of the Company's common stock and shares outstanding on December 31, 2015, these cash bonuses would total approximately $577,363 if a change of control transaction occurred at that price and the Company's Board of Directors did not modify the program. This amount has not been accrued at December 31, 2015, and would only be accrued upon a change of control. These change of control provisions may affect the price an acquirer would be willing to pay for the Company.

17. Contingencies

The majority of the Company's revenues are from government programs and may be subject to adjustment as a result of: (i) examination by government agencies or contractors, for which the resolution of any matters raised may take extended periods of time to finalize; (ii) differing interpretations of government regulations by different Medicare contractors or regulatory authorities; (iii) differing opinions regarding a patient's medical diagnosis or the medical necessity of services provided; and (iv) retroactive applications or interpretations of governmental requirements. In addition, the Company's revenues from commercial payors may be subject to adjustment as a result of potential claims for refunds, as a result of government actions or as a result of other claims by commercial payors.

Inquiries by the Federal Government and Certain Related Civil Proceedings

Vainer Private Civil Suit: As previously disclosed, the Company received a subpoena for documents from the Office of Inspector General (OIG) for the U.S. Department of Health and Human Services (HHS) relating to the pharmaceutical products Zemplar, Hectorol, Venofer, Ferrlecit and erythropoietin (EPO), as well as other related matters, covering the period from January 2003 to December 2008. The Company subsequently learned that the allegations underlying this inquiry were made as part of a civil complaint filed by relators, Daniel Barbir and Dr. Alon Vainer, pursuant to the *qui tam* provisions of the federal False Claims Act. The relators also alleged that the Company's drug administration practices for the Company's dialysis operations for Vitamin D and iron agents from 2003 through 2010 fraudulently created unnecessary waste, which was billed to and paid for by the government. In June 2015, the Company finalized the terms of the settlement with plaintiffs, including a settlement amount of $450,000 and attorney fees and other costs of $45,000 which was paid in 2015.

2011 U.S. Attorney Medicaid Investigation: In October 2011, the Company announced that it would be receiving a request for documents, which could include an administrative subpoena from the OIG. Subsequent to the Company's announcement of this 2011 U.S. Attorney Medicaid Investigation, the Company received a request for documents in connection with the inquiry by the U.S. Attorney's Office for the Eastern District of New York. The request related to payments for infusion drugs covered by Medicaid composite payments for dialysis. It is the Company's understanding that this inquiry is civil in nature. The Company understands further that certain other providers that operate dialysis clinics in New York may have received a similar request for documents. The Company has cooperated with the government and produced the requested documents. In April 2014, the Company reached an agreement in principle with the government and expects to execute in the first quarter of 2016 the settlement agreements with the government and the state of New York to finalize the terms of the settlement and to resolve this matter, and has accrued an amount that is immaterial.

Swoben Private Civil Suit: In April 2013, the Company's HCP subsidiary was served with a civil complaint filed by a former employee of SCAN Health Plan (SCAN), a health maintenance organization (HMO). On July 13, 2009, pursuant to the *qui tam* provisions of the federal False Claims Act (FCA) and the California False Claims Act, James M. Swoben, as relator, filed a *qui tam* action in the United States District Court for the Central District of California purportedly on behalf of the United States of America and the State of California against SCAN, and certain other defendants whose identities were under seal. The allegations in the complaint relate to alleged overpayments received from government healthcare programs. In or about August 2012, SCAN entered into a Settlement Agreement with the United States of America and the State of California. The United States and the State of California partially intervened in the action for the purpose of settlement with and dismissal of the action against SCAN. In or about November 2011, the relator filed his Third Amended Complaint under seal alleging violations of the federal FCA and the California False Claims Act, which named additional defendants, including HCP and certain health insurance companies (the defendant HMOs). The allegations in the complaint against HCP relate to patient diagnosis coding to determine reimbursement in the Medicare Advantage program, referred to as Hierarchical Condition Coding (HCC) and Risk Adjustment Factor (RAF) scores. The complaint sought monetary damages and civil penalties as well as costs and expenses. The United States Department of Justice reviewed these allegations and in January 2013 declined to intervene in the case. On June 26, 2013, HCP and the defendant HMOs filed their respective motions to dismiss the Third Amended Complaint pursuant to Federal Rules of Civil Procedure 12(b)(6) and 9(b), challenging the legal sufficiency of the claims asserted in the complaint. On July 30, 2013, the court granted HCP's motion and dismissed with prejudice all of the claims in the Third Amended Complaint and judgment was entered in September 2013. The court specifically determined that further amendments to the complaint would be futile because, in part, the allegations were publicly disclosed in reports and other sources relating to audits conducted by the Centers of Medicare & Medicaid Services (CMS). In October 2013, the plaintiff appealed to the United States Court of Appeals for the Ninth Circuit and the court's disposition of the appeal is pending.

2015 U.S. Attorney Transportation Investigation: In February 2015, the Company announced that it received six administrative subpoenas from the OIG for medical records from six different dialysis centers in southern California operated by the Company. Specifically, each subpoena seeks the medical records of a single patient of each respective dialysis center. In February 2016, the Company received four additional subpoenas for four additional dialysis centers in southern California. The subpoenas were similarly limited in scope to the subpoenas received in 2015. The Company has been advised by an attorney with the United States Attorney's Office for the Central District of California that the subpoenas relate to an investigation concerning the medical necessity of patient transportation. The Company does not provide transportation nor does it bill for the transport of its dialysis patients. The Company does not know the scope of the investigation by the government, nor what conduct or activities might be the subject of the investigation.

2015 U.S. OIG Medicare Advantage Civil Investigation: In March 2015, JSA HealthCare Corporation (JSA), a subsidiary of HCP, received a subpoena from the OIG. The Company has been advised by an attorney with the Civil Division of the United States Department of Justice in Washington, D.C. that the subpoena relates to an ongoing civil investigation concerning Medicare Advantage service providers' risk adjustment practices and data, including identification and verification of patient diagnoses and factors used in making the diagnoses. The subpoena requests documents and information for the period from January 1, 2008 through December 31, 2013, for certain Medicare Advantage plans for which JSA provided services. It also requests information regarding JSA's communications about patient diagnoses as they relate to certain Medicare Advantage plans generally, and more specifically as related to two Florida physicians with whom JSA previously contracted. The Company is producing the requested information and is cooperating with the government's investigation.

In addition to the subpoena described above, in June 2015, the Company received a subpoena from the OIG. This civil subpoena covers the period from January 1, 2008 through the present and seeks production of a wide range of documents relating to the Company's and its subsidiaries' (including HealthCare Partners and its subsidiary JSA HealthCare Corporation) provision of services to Medicare Advantage plans and related patient diagnosis coding and risk adjustment submissions and payments. The Company believes that the request is part of a broader industry investigation into Medicare Advantage patient diagnosis coding and risk adjustment practices and potential overpayments by the government. Some of the information requested relates to what the Company first disclosed in the risk factors of the Company's quarterly report on Form 10-Q for the first quarter of 2015 as a potentially improper historical HCP coding practice related to a particular condition. The practice in question was discontinued following the Company's November 1, 2012 acquisition of HCP and, as the Company previously disclosed, the Company notified CMS of the coding practice and potential overpayments. In connection with the HCP merger, the Company has certain indemnification rights against the sellers and an escrow was established as security for the indemnification. The Company would pursue an indemnification claim against the sellers secured by the escrow for any and all liabilities incurred. The Company can make no assurances that the indemnification and escrow would cover the full amount of the Company's potential losses related to this matter. The Company is cooperating with the government and is producing the requested information.

2015 U.S. Department of Justice Vascular Access Investigation: In November 2015, the Company announced that RMS Lifeline, Inc., a wholly owned subsidiary of the Company that operates under the name Lifeline Vascular Access (Lifeline), received a Civil Investigative Demand (CID) from the U.S. Department of Justice (DOJ). The CID relates to two vascular access centers in Florida that are part of Lifeline's vascular access business. The CID covers the period from January 1, 2008 through the present. The Company acquired these two centers in December 2012. Based on the language of the CID, the DOJ appears to be looking at whether the angiograms of 10 patients performed at the two centers were medically unnecessary and therefore whether related claims filed with federal healthcare programs possibly violated the FCA. Lifeline does not perform dialysis services but instead provides vascular access management services for dialysis patients. The Company is in the process of producing the requested documents to the DOJ.

2016 U.S. Attorney Prescription Drug Investigation: In early February 2016, the Company announced that its pharmacy services wholly owned subsidiary, DaVita Rx, received a CID from the U.S. Attorney's Office for the Northern District of Texas. Based on the language of the CID, it appears the government is conducting an FCA investigation concerning allegations that DaVita Rx presented or caused to be presented false claims for payment to the government for prescription medications. The CID covers the period from January 1, 2006 through the present. In the spring of 2015, the Company initiated an internal compliance review of DaVita Rx during which it identified potential billing and operational issues. The Company notified the government in September of 2015 that it was conducting this review of DaVita Rx and began providing regular updates of its review. In the fourth quarter of 2015, the Company recorded an estimated accrual of $22 million for potential damages and liabilities associated with write-offs and discounts of patient co-payment obligations, and credits to payors for returns of prescriptions drugs, related to DaVita Rx that were identified during the course of this internal compliance review. The Company may accrue additional reserves for refunds and related damages and potential liabilities arising out of this review. Upon completion of its review, the Company filed a self-disclosure with the OIG in early February 2016 and has been working to address and update the practices it identified in the self-disclosure, some of which overlaps with information requested by the U.S. Attorney's Office. The Company does not know if the U.S. Attorney's Office, which is part of the DOJ, knew when it served the CID on the Company that it was already in the process of developing a self-disclosure to the OIG. The OIG informed the Company in late February that its submission was not accepted. They indicated that the OIG is not expressing an opinion regarding the conduct disclosed or the Company's legal positions. The Company intends to cooperate with the government in this matter.

Except for the private civil complaints filed by the relators as described above, to the Company's knowledge, no proceedings have been initiated against the Company at this time in connection with any of the inquiries by the federal government. Although the Company cannot predict whether or when proceedings might be initiated or when these matters may be resolved, it is not unusual for inquiries such as these to continue for a considerable period of time through the various phases of document and witness requests and on-going discussions with regulators. Responding to the subpoenas or inquiries and defending the Company in the relator proceedings will continue to require management's attention and significant legal expense. Any negative findings in the inquiries or relator

proceedings could result in substantial financial penalties or awards against the Company, exclusion from future participation in the Medicare and Medicaid programs and if criminal proceedings were initiated against the Company, possible criminal penalties. At this time, the Company cannot predict the ultimate outcome of these inquiries, or the potential outcome of the relators' claims (except as described above), or the potential range of damages, if any.

Shareholder Derivative Claims

DaVita HealthCare Partners Inc. Derivative Litigation: On January 7, 2014, the U.S. District Court for the District of Colorado consolidated the two previously disclosed shareholder derivative lawsuits: the Haverhill Retirement System action filed on May 17, 2013 and the Clark Shareholder action filed on August 7, 2012. The court appointed Haverhill lead plaintiff. The complaints filed against the directors of the Company and against the Company, as nominal defendant allege, among other things, that the Company's directors breached fiduciary duties to the Company relating to the 2010 and 2011 U.S. Attorney physician relationship investigations described above, the Vainer *qui tam* private civil suit described above and the Woodard *qui tam* private civil suit for which the Company previously announced a settlement in July 2012. The Company entered into a settlement with the lead plaintiff, which as previously disclosed, were described in a court-ordered notice sent to shareholders in late January 2015, and included enhancements to the Company's corporate governance practices and provides that the Company will not oppose the derivative plaintiff's application for an award of fees and expenses, the dollar amount of which is not material to the Company. The Court approved the settlement and entered an order granting final approval of the settlement on June 5, 2015 and final judgment in the case was entered on June 9, 2015.

Other

The Company received several notices of claims from commercial payors and other third parties related to historical billing practices and claims against DVA Renal Healthcare (formerly known as Gambro Healthcare), a subsidiary of the Company, related to historical Gambro Healthcare billing practices and other matters covered by its 2004 settlement agreement with the DOJ and certain agencies of the U.S. government. The Company has not received any further indication that any of these claims are active except for one payor claim relating to a special needs plan, and some of the other claims may be barred by applicable statutes of limitations. The Company is working to resolve the one active claim of which it is aware and, based on the dollar amount of the claim, expects that its eventual resolution will involve an amount that is immaterial.

In April 2008, a wage and hour lawsuit was filed against the Company in the Superior Court of California which was styled as a class action and was subsequently amended. The complaint, as amended, alleged that the Company failed to provide meal periods, failed to pay compensation in lieu of providing rest or meal periods, failed to pay overtime, and failed to comply with certain other California Labor Code requirements. After the Company prevailed on certain trial court rulings, the plaintiffs later appealed to the California Court of Appeals, and some of the issues on appeal were remanded to the trial court. The Company reached an agreement with the plaintiffs to settle the case in June 2015. The settlement has now been approved by the court. The amount of the settlement is not material to the Company's consolidated financial statements.

In addition to the foregoing, the Company is subject to claims and suits, including from time to time, contractual disputes and professional and general liability claims, as well as audits and investigations by various government entities, in the ordinary course of business. The Company believes that the ultimate resolution of any such pending proceedings, whether the underlying claims are covered by insurance or not, will not have a material adverse effect on its financial condition, results of operations or cash flows.

18. Noncontrolling interests subject to put provisions and other commitments

Noncontrolling interests subject to put provisions

The Company has potential obligations to purchase the noncontrolling interests held by third parties in several of its majority-owned joint ventures, non-owned and minority-owned entities. These obligations are in the form of put provisions and are exercisable at the third-party owners' discretion within specified periods as outlined in each specific put provision. If these put provisions were exercised, the Company would be required to purchase the third-party owners' noncontrolling interests at either the appraised fair market value or a predetermined multiple of earnings or cash flow attributable to the noncontrolling interests put to the Company, which is intended to approximate fair value. The methodology the Company uses to estimate the fair values of noncontrolling interests subject to put provisions assumes the higher of either a liquidation value of net assets or an average multiple of earnings, based on historical earnings, patient mix and other performance indicators that can affect future results, as well as other factors. The estimated fair values of the noncontrolling interests subject to put provisions is a critical accounting estimate that involves significant judgments and assumptions and may not be indicative of the actual values at which the noncontrolling interests may ultimately be settled, which could vary significantly from the Company's current estimates. The estimated fair values of noncontrolling interests subject to put provisions can fluctuate and the implicit multiple of earnings at which these noncontrolling interests obligations may be settled will

vary significantly depending upon market conditions including potential purchasers' access to the capital markets, which can impact the level of competition for dialysis and non-dialysis related businesses, the economic performance of these businesses and the restricted marketability of the third-party owners' noncontrolling interests. The amount of noncontrolling interests subject to put provisions that employ a contractually predetermined multiple of earnings rather than fair value are immaterial.

Additionally, the Company has certain other potential commitments to provide operating capital to several dialysis centers that are wholly-owned by third parties or centers in which the Company owns a minority equity investment as well as to physician-owned vascular access clinics or medical practices that the Company operates under management and administrative service agreements of approximately $5,600.

Certain consolidated joint ventures are originally contractually scheduled to dissolve after terms ranging from 10 to 50 years. Accordingly, the noncontrolling interests in these joint ventures are considered mandatorily redeemable instruments, for which the classification and measurement requirements have been indefinitely deferred. Future distributions upon dissolution of these entities would be valued below the related noncontrolling interest carrying balances in the consolidated balance sheet.

Other commitments

In November 2011, the Company entered into a seven year Sourcing and Supply Agreement with Amgen USA Inc. (Amgen) that expires on December 31, 2018. Under terms of the agreement, the Company will purchase EPO in amounts necessary to meet no less than 90% of its requirements for ESAs. The actual amount of EPO that the Company will purchase from Amgen will depend upon the amount of EPO administered during dialysis as prescribed by physicians and the overall number of patients that the Company serves.

In December 2012, the Company entered into an amendment to its agreement with Amgen that made non-material changes to certain terms of the agreement for the period from January 1, 2013 through December 31, 2013. Under the terms of the original agreement before the amendment, the Company was required to purchase EPO in amounts necessary to meet no less than 90% of its requirements of ESAs and is still required to do so after 2013. In addition, all of the other conditions as specified in the original agreement entered into in November 2011 still apply.

In January 2010, the Company entered into an agreement with Fresenius Medical Care (FMC) which committed the Company to purchase a certain amount of dialysis equipment, parts and supplies from FMC through 2013. This agreement has been subsequently extended through February 2016. During 2015, 2014 and 2013, the Company purchased $154,566 and $154,266 and $144,030, respectively, of certain equipment, parts and supplies from FMC.

In 2014, the Company entered into an agreement with Baxter Healthcare (Baxter) which committed the Company to purchase a certain amount of its hemodialysis non-equipment product supplies, such as dialyzers, at fixed prices through 2018. During 2015, 2014 and 2013, the Company purchased $112,931, $112,645 and $124,555 of hemodialysis product supplies from Baxter under this agreement and a prior agreement with Gambro Healthcare Inc. which was acquired by Baxter.

Certain HCP entities are required to maintain minimum cash balances in order to comply with regulatory requirements in conjunction with medical claim reserves. As of December 31, 2015, this minimum cash balance was approximately $59,897.

Other than operating leases disclosed in Note 15 to the consolidated financial statements, the letters of credit disclosed in Note 14 to the consolidated financial statements, and the arrangements as described above, the Company has no off balance sheet financing arrangements as of December 31, 2015.

19. Long-term incentive compensation and shareholders' equity

Long-term incentive compensation

Long-term incentive program (LTIP) compensation includes both stock-based awards (principally stock-settled stock appreciation rights, restricted stock units and performance stock units) as well as long-term performance-based cash awards. Long-term incentive compensation expense, which was primarily general and administrative in nature, was attributed to the dialysis and related lab services business, the HCP business, corporate administrative support, and the ancillary services and strategic initiatives.

The Company's stock-based compensation awards are measured at their estimated fair values on the date of grant if settled in shares or at their estimated fair values at the end of each reporting period if settled in cash. The value of stock-based awards so measured is recognized as compensation expense on a cumulative straight-line basis over the vesting terms of the awards, adjusted for expected forfeitures.

(dollars in thousands, except per share data)

Stock-based compensation to be settled in shares is recorded to the Company's shareholders' equity, while stock-based compensation to be settled in cash is recorded to a liability. Shares issued upon exercise of stock awards have generally been issued from authorized but unissued shares.

Stock split

In the third quarter of 2013, the Board of Directors approved a two-for-one stock split of the Company's common stock in the form of a stock dividend payable on September 6, 2013 to stockholders of record on August 23, 2013. The Company's common stock began trading on a post-split basis on September 9, 2013. All share and per share data for all periods presented have been adjusted to reflect the effects of the stock split.

Long-term incentive compensation plans

On June 17, 2013, the stockholders of the Company approved an amendment to the DaVita HealthCare Partners Inc. 2011 Incentive Award Plan to increase the number of shares of common stock available for issuance under the Plan by 17,000,000 shares.

On June 11, 2012, the Company's stockholders approved an amendment to the Company's 2011 Incentive Award Plan (the 2011 Plan) to increase the number of shares of common stock available for issuance under the plan by 9,000,000 shares and to increase the amount by which share reserves under the plan are reduced by grants of full value share awards to 3.5 times from 3.0 times the number of shares subject to the award.

The Company's 2011 Incentive Award Plan is the Company's omnibus equity compensation plan and provides for grants of stock-based awards to employees, directors and other individuals providing services to the Company, except that incentive stock options may only be awarded to employees. The 2011 Plan authorizes the Company to award stock options, stock appreciation rights, restricted stock units, restricted stock, and other stock-based or performance-based awards, and is designed to enable the Company to grant equity and cash awards that qualify as performance-based compensation under Section 162(m) of the Internal Revenue Code. The 2011 Plan mandates a maximum award term of five years and stipulates that stock appreciation rights and stock options be granted with prices not less than fair market value on the date of grant. The 2011 Plan also requires that full value share awards such as restricted stock units reduce shares available under the Plan at a ratio of 3.5:1. The Company's nonqualified stock appreciation rights and stock units awarded under the Plan generally vest over 36 to 48 months from the date of grant. At December 31, 2015, there were 8,533,561 stock-settled stock appreciation rights, 765,060 stock-settled stock units, 54,688 cash-settled stock appreciation rights and 3,867 cash-settled stock units outstanding, and 32,484,534 shares available for future grants, under the Plan.

A combined summary of the status of the Company's stock-settled awards under the 2011 Plan, including base shares for stock-settled stock appreciation rights and stock-settled stock unit awards is as follows:

	Year ended December 31, 2015				
	Stock appreciation rights			Stock units	
	Awards	Weighted average exercise price	Weighted average remaining contractual life	Awards	Weighted average remaining contractual life
Outstanding at beginning of year	10,585,172	$ 53.21		921,898	
Granted	993,953	81.22		279,485	
Exercised	(2,409,579)	41.62		(348,127)	
Cancelled	(635,985)	62.42		(88,196)	
Outstanding at end of period	8,533,561	$ 59.05	2.3	765,060	0.4
Exercisable at end of period	2,856,959	$ 47.88	1.2	—	—
Weighted-average fair value of grants in 2015	$ 17.97			$ 80.25	
Weighted-average fair value of grants in 2014	$ 16.41			$ 72.24	
Weighted-average fair value of grants in 2013	$ 13.47			$ 58.90	

(dollars in thousands, except per share data)

Range of SSAR base prices	Awards outstanding	Weighted average exercise price	Awards exercisable	Weighted average exercise price
$30.01–$40.00	369,301	36.56	358,969	36.54
$40.01–$50.00	1,437,708	43.02	1,390,300	42.86
$50.01–$60.00	4,143,205	57.54	843,384	55.30
$60.01–$70.00	1,293,564	68.12	216,000	65.08
$70.01–$80.00	588,733	73.80	48,306	70.31
$80.01–$90.00	701,050	83.60	—	—
Total	8,533,561	$ 59.05	2,856,959	$ 47.88

Liability-classified awards contributed $(236), $1,774 and $338 to stock-based compensation expense for the years ended December 31, 2015, 2014 and 2013, respectively. As of December 31, 2015 the Company had 58,555 liability-classified share awards outstanding, 10,313 of which were vested, and a total stock-based compensation liability balance of $691. The Company did not grant any cash-settled stock-based awards during 2015.

For the years ended December 31, 2015, 2014, and 2013, the aggregate intrinsic value of stock-based awards exercised was $116,933, $151,342 and $120,775, respectively. At December 31, 2015, the aggregate intrinsic value of stock awards outstanding was $157,397 and the aggregate intrinsic value of stock awards exercisable was $62,655.

Estimated fair value of stock-based compensation awards

The Company has estimated the grant-date fair value of stock-settled stock appreciation rights awards using the Black-Scholes-Merton valuation model and stock-settled stock unit awards at intrinsic value on the date of grant. The following assumptions were used in estimating these values and determining the related stock-based compensation attributable to the current period:

Expected term of the awards: The expected term of awards granted represents the period of time that they are expected to remain outstanding from the date of grant. The Company determines the expected term of its stock awards based on its historical experience with similar awards, considering the Company's historical exercise and post-vesting termination patterns, and the terms expected by peer companies in near industries.

Expected volatility: Expected volatility represents the volatility anticipated over the expected term of the award. The Company determines the expected volatility for its awards based on the volatility of the price of its common stock over the most recent retrospective period commensurate with the expected term of the award, considering the volatility expectations implied by the market price of its exchange-traded options and the volatilities expected by peer companies in near industries.

Expected dividend yield: The Company has not paid dividends on its common stock and does not currently expect to pay dividends during the term of stock awards granted.

Risk-free interest rate: The Company bases the expected risk-free interest rate on the implied yield currently available on stripped interest coupons of U.S. Treasury issues with a remaining term equivalent to the expected term of the award.

A summary of the weighted average valuation inputs described above used for estimating the grant-date fair value of stock-settled stock appreciation rights awards granted in the periods indicated is as follows:

	Year ended December 31,		
	2015	2014	2013
Expected term	4.1 years	4.2 years	4.1 years
Expected volatility	24.6%	25.8%	27.2%
Expected dividend yield	0.0%	0.0%	0.0%
Risk-free interest rate	1.5%	1.5%	0.7%

The Company estimates expected forfeitures based upon historical experience with separate groups of employees that have exhibited similar forfeiture behavior in the past. Stock-based compensation expense is recorded only for awards that are expected to vest.

Employee stock purchase plan

The Employee Stock Purchase Plan entitles qualifying employees to purchase up to $25 of the Company's common stock during each calendar year. The amounts used to purchase stock are accumulated through payroll withholdings or through optional lump sum payments made in advance of the first day of the purchase right period. This compensatory plan allows employees to purchase stock for the lesser of 100% of the fair market value on the first day of the purchase right period or 85% of the fair market value on the last day of the purchase right period. Purchase right periods begin on January 1 and July 1, and end on December 31. Payroll withholdings and lump-sum payments related to the plan, included in accrued compensation and benefits and used to purchase the Company's common stock for 2015, 2014 and 2013 participation periods, were $24,523, $19,010 and $12,817, respectively. Shares purchased pursuant to the plan's 2015, 2014 and 2013 participation periods were 413,859, 297,954 and 237,961, respectively. At December 31, 2015, there were 422,401 shares remaining available for future grants under this plan.

The fair value of employees' purchase rights was estimated as of the beginning dates of the purchase right periods using the Black-Scholes-Merton valuation model with the following weighted average assumptions for purchase right periods in 2015, 2014 and 2013, respectively: expected volatility of 26%, 27% and 28%; risk-free interest rate of 0.2%, 0.2% and 0.2%, and no dividends. Using these assumptions, the weighted average estimated fair value of these purchase rights was $18.76, $16.40 and $14.24 for 2015, 2014 and 2013, respectively.

Long-term incentive compensation expense and proceeds

For the years ended December 31, 2015, 2014 and 2013, the Company recognized $130,682, $118,970 and $84,841, respectively, in total LTIP expense, of which $56,664, $56,743 and $59,998, respectively, was stock-based compensation expense for stock appreciation rights, stock options, stock units and discounted employee stock plan purchases, which are primarily included in general and administrative expenses. The estimated tax benefits recorded for stock-based compensation in 2015, 2014 and 2013 were $19,689, $20,351 and $22,187, respectively. As of December 31, 2015, there was $123,966 total estimated unrecognized compensation cost for outstanding LTIP awards, including $63,599 related to stock-based compensation arrangements under the Company's equity compensation and stock purchase plans. The Company expects to recognize the performance-based cash component of these LTIP costs over a weighted average remaining period of 1.0 year and the stock-based component of these LTIP costs over a weighted average remaining period of 1.3 years.

For the years ended December 31, 2015, 2014 and 2013, the Company received $45,749, $59,119 and $46,898, respectively, in actual tax benefits upon the exercise of stock awards. As a result of the Company issuing SSARs, beginning in 2013, the Company no longer has stock options outstanding and did not receive cash proceeds from stock option exercises during the years ended December 31, 2015, 2014 and 2013.

Stock repurchases

During the year ended December 31, 2015, the Company repurchased a total of 7,779,958 shares of its common stock for $575,380, or an average price of $73.96 per share. The Company also repurchased a total of 3,689,738 shares of its common stock during January 2016 for $249,481, or an average price of $67.61 per share.

On April 14, 2015, the Company's Board of Directors approved additional share repurchases in the amount of $725,944. These share repurchases are in addition to the $274,056 remaining at that time under the Company's Board of Directors' prior share repurchase approval announced in November 2010. As a result of these transactions, the Company now has a total of $259,225 available under the current Board authorizations for additional share repurchases as of January 31, 2016. These share repurchase authorizations have no expiration dates. However, the Company is subject to share repurchase limitations under the terms of its Senior Secured Credit Facilities and the indentures governing its Senior Notes.

The Company did not repurchase any of its common stock during 2014 or 2013.

Charter documents & Delaware law

The Company's charter documents include provisions that may deter hostile takeovers, delay or prevent changes of control or changes in management, or limit the ability of stockholders to approve transactions that they may otherwise determine to be in their best interests. These include provisions prohibiting stockholders from acting by written consent, requiring 90 days advance notice of stockholder proposals or nominations to the Board of Directors and granting the Board of Directors the authority to issue up to five million shares of preferred stock and to determine the rights and preferences of the preferred stock without the need for further stockholder approval.

(dollars in thousands, except per share data)

The Company is also subject to Section 203 of the Delaware General Corporation Law that, subject to exceptions, would prohibit the Company from engaging in any business combinations with any interested stockholder, as defined in that section, for a period of three years following the date on which that stockholder became an interested stockholder. These restrictions may discourage, delay or prevent a change in the control of the Company.

Changes in DaVita HealthCare Partners Inc.'s ownership interest in consolidated subsidiaries

The effects of changes in DaVita HealthCare Partners Inc.'s ownership interest on the Company's equity are as follows:

	Year ended December 31,		
	2015	2014	2013
Net income attributable to DaVita HealthCare Partners Inc.	$ 269,732	$ 723,114	$ 633,446
Increase (decrease) in paid-in capital for sales of noncontrolling interest	—	355	(1,442)
Decrease in paid-in capital for the purchase of noncontrolling interests	(55,826)	(5,357)	(3,119)
Net transfer to noncontrolling interests	(55,826)	(5,002)	(4,561)
Change from net income attributable to DaVita HealthCare Partners Inc. and transfers to noncontrolling interests	$ 213,906	$ 718,112	$ 628,885

During 2015, the Company acquired additional ownership interests in several existing majority-owned joint ventures for $66,382 in cash. In 2014, the Company also acquired additional ownership interests in several existing majority-owned joint ventures for $17,876 in cash and deferred purchase price of $136. In 2013, the Company acquired additional ownership interest in several existing majority-owned joint ventures for $3,569 and deferred purchase price of $209.

(dollars in thousands, except per share data)

20. Other comprehensive (loss) income

Charges and credits to other comprehensive (loss) income have been as follows:

	Interest rate swap and cap agreements	Investment securities	Foreign currency translation adjustments	Accumulated other comprehensive income (loss)
Balance at December 31, 2012	$ (15,402)	$ 1,310	$ (1,205)	$ (15,297)
Unrealized (losses) gains	277	3,752	(2,216)	1,813
Related income tax	(108)	(1,452)	—	(1,560)
	169	2,300	(2,216)	253
Reclassification from accumulated other comprehensive losses (income) into net income	21,096	(802)	—	20,294
Related income tax	(8,207)	312	—	(7,895)
	12,889	(490)	—	12,399
Balance at December 31, 2013	$ (2,344)	$ 3,120	$ (3,421)	$ (2,645)
Unrealized (losses) gains	(16,509)	425	(22,952)	(39,036)
Related income tax	6,450	(187)	—	6,263
	(10,059)	238	(22,952)	(32,773)
Reclassification from accumulated other comprehensive losses (income) into net income	17,409	(340)	—	17,069
Related income tax	(6,801)	133	—	(6,668)
	10,608	(207)	—	10,401
Balance at December 31, 2014	$ (1,795)	$ 3,151	$ (26,373)	$ (25,017)
Unrealized losses	(20,085)	(1,974)	(23,889)	(45,948)
Related income tax	7,844	561	—	8,405
	(12,241)	(1,413)	(23,889)	(37,543)
Reclassification from accumulated other comprehensive losses (income) into net income	5,103	(618)	—	4,485
Related income tax	(1,992)	241	—	(1,751)
	3,111	(377)	—	2,734
Balance at December 31, 2015	$ (10,925)	$ 1,361	$ (50,262)	$ (59,826)

The reclassification of net swap and cap realized losses into income are recorded as debt expense in the corresponding consolidated statements of income. See Note 14 to the consolidated financial statements for further details.

The reclassification of net investment realized gains into income are recorded in other income in the corresponding consolidated statements of income. See Note 9 to the consolidated financial statements for further details.

21. Acquisitions

On August 17, 2015, the Company entered into a definitive agreement to acquire Colorado-based Renal Ventures Limited, LLC (Renal Ventures), including a 100 percent interest in all dialysis centers owned by Renal Ventures, for approximately $415,000 in cash, subject to, among other things, adjustments for certain items such as working capital. Renal Ventures currently operates 36 dialysis clinics in six states serving approximately 2,400 patients, and also operates other ancillary businesses. The transaction is subject to approval by the Federal Trade Commission (FTC) including Hart-Scott-Rodino antitrust clearance. The Company anticipates that it will be required by the FTC to divest a certain number of outpatient dialysis centers as a condition of the transaction. The Company currently expects this transaction to close in 2016.

On November 23, 2015, the Company entered into a definitive merger agreement to acquire The Everett Clinic Medical Group (TEC), a Washington state physician group, for approximately $385,000 in cash, subject to, among other things, adjustments for certain items such as working capital. TEC has 500 providers in primary and specialty care locations throughout Snohomish County, Washington who care for more than 315,000 patients. The Company currently expects this transaction to close in early 2016.

(dollars in thousands, except per share data)

During 2015, the Company acquired dialysis-related and other ancillary businesses consisting of six dialysis centers in the U.S., 21 dialysis centers outside of the U.S., three vascular access centers, and other medical businesses for a total of $96,469 in net cash and deferred purchase price and earn-outs of $8,395. During 2014, the Company acquired dialysis-related and other ancillary businesses consisting of 18 dialysis centers in the U.S., seven dialysis centers outside of the U.S. and other medical businesses for a total of $272,094 in net cash and deferred purchase price of $23,781. During 2013, the Company acquired dialysis-related and other ancillary businesses consisting of 26 dialysis centers in the U.S., 38 dialysis centers outside of the U.S. and other medical businesses for a total of $310,394 in net cash and deferred purchase price of $24,683.

The assets and liabilities for all acquisitions were recorded at their estimated fair values at the dates of the acquisitions and are included in the Company's financial statements and operating results from the effective dates of the acquisitions. For several of the 2015 acquisitions, certain income tax amounts are pending final evaluation and quantification of any pre-acquisition tax contingencies. In addition, valuation of medical claims liabilities and certain other working capital items relating to several of these acquisitions are pending final quantification.

The following table summarizes the assets acquired and liabilities assumed in the above described transactions and recognized at their acquisition dates at estimated fair values, as well as the estimated fair value of the noncontrolling interests assumed in these transactions:

	Year ended December 31,		
	2015	2014	2013
Current assets	$ 3,843	$ 915	$ 7,215
Property and equipment	12,436	5,999	23,760
Customer relationships	—	74,515	31,838
Non-compete agreements	8,959	16,585	17,710
Amortizable intangible and other long-term assets	4,345	4,193	31,098
Goodwill	97,093	221,514	271,267
Long-term deferred income taxes	(1,467)	—	(5,666)
Noncontrolling interests assumed	(18,905)	(25,963)	(22,880)
Liabilities assumed	(1,440)	(1,883)	(19,265)
Aggregate purchase cost	$ 104,864	$ 295,875	$ 335,077

Amortizable intangible assets acquired during 2015, 2014 and 2013 had weighted-average estimated useful lives of 8, 10 and 14 years, respectively. The majority of the intangible assets acquired relate to customer relationships and non-compete agreements. The weighted-average amortization period for customer relationships was 10 and 17 years for 2014 and 2013, respectively. The weighted-average amortization period for non-compete agreements was 8 years for both 2015 and 2014, and 9 years for 2013. The total amount of goodwill deductible for tax purposes associated with these acquisitions for 2015, 2014, and 2013 was approximately $73,733, $175,247 and $221,454, respectively.

Contingent earn-out obligations

The Company has several contingent earn-out obligations associated with acquisitions that could result in the Company paying the former shareholders of acquired companies a total of up to approximately $129,626 if certain EBITDA, operating income performance targets or quality margins are met over the next one to two years.

Contingent earn-out obligations are remeasured to fair value at each reporting date until the contingencies are resolved with changes in the liability due to the remeasurement recorded in earnings. See Note 24 to the consolidated financial statements for further details. As of December 31, 2015, the Company has estimated the fair value of these contingent earn-out obligations to be $34,135, of which a total of $29,050 is included in other liabilities and the remaining $5,085 is included in other long-term liabilities in the Company's consolidated balance sheet.

The following is a reconciliation of changes in the contingent earn-out obligations for the year ended December 31, 2015:

Beginning balance, January 1, 2015	$ 39,129
Contingent earn-out obligations associated with acquisitions	990
Remeasurement of fair value	(428)
Payments of contingent earn-out obligations	(5,556)
	$ 34,135

(dollars in thousands, except per share data)

Pro forma financial information (unaudited)

The following summary, prepared on a pro forma basis, combines the results of operations as if all acquisitions and divestitures in 2015 and 2014 had been consummated as of the beginning of 2014, including the impact of certain adjustments such as amortization of intangibles, interest expense on acquisition financing and income tax effects.

	Year ended December 31,	
	2015	2014
	(unaudited)	
Pro forma net revenues	$ 13,798,581	$ 13,040,206
Pro forma net income attributable to DaVita HealthCare Partners Inc.	273,614	738,991
Pro forma basic net income per share attributable to DaVita HealthCare Partners Inc.	1.29	3.48
Pro forma diluted net income per share attributable to DaVita HealthCare Partners Inc.	1.27	3.41

22. Variable interest entities

The Company relies on the operating activities of certain entities that it does not directly own or control, but over which it has indirect influence and of which it is considered the primary beneficiary. These entities are subject to the consolidation guidance applicable to variable interest entities (VIEs).

Under U.S. GAAP, VIEs typically include entities for which (i) the entity's equity is not sufficient to finance its activities without additional subordinated financial support; (ii) the equity holders as a group lack the power to direct the activities that most significantly influence the entity's economic performance, the obligation to absorb the entity's expected losses, or the right to receive the entity's expected returns; or (iii) the voting rights of some investors are not proportional to their obligations to absorb the entity's losses.

The Company has determined that substantially all of the entities it is associated with that qualify as VIEs must be included in its consolidated financial statements. The Company manages these entities and provides operating and capital funding as necessary for the entities to accomplish their operational and strategic objectives. A number of these entities are subject to nominee share ownership or share transfer restriction agreements that effectively transfer the majority of the economic risks and rewards of their ownership to the Company. In other cases the Company's management agreements with these entities include both financial terms and protective and participating rights to the entities' operating, strategic and non-clinical governance decisions which transfer substantial powers over and economic responsibility for the entities to the Company. In some cases such entities are subject to broad exclusivity or noncompetition restrictions that benefit the Company. Further, in some cases the Company has contractual arrangements with its related party nominee owners that effectively indemnify these parties from the economic losses from, or entitle the Company to the economic benefits of, these entities.

The analyses upon which these consolidation determinations rest are complex, involve uncertainties, and require significant judgment on various matters, some of which could be subject to different interpretations. At December 31, 2015, these consolidated financial statements include total assets of VIEs of $706,978 and total liabilities and noncontrolling interests of VIEs to third parties of $330,213.

The Company also sponsors certain deferred compensation plans whose trusts qualify as VIEs and the Company consolidates each of these plans as their primary beneficiary. The assets of these plans are recorded in short-term or long-term investments with related liabilities recorded in accrued compensation and benefits and other long-term liabilities. See Note 16 for disclosures on the assets of these consolidated non-qualified deferred compensation plans.

23. Concentrations

Approximately 66%, 67% and 66% of total U.S. dialysis services revenues in 2015, 2014 and 2013, respectively, are from government-based programs, principally Medicare and Medicaid. Related net accounts receivable and other receivables from Medicare, including Medicare-assigned plans, and Medicaid, including Medicaid-assigned plans, were approximately $827,258 and $705,532, as of December 31, 2015 and 2014, respectively.

(dollars in thousands, except per share data)

Approximately 70%, 71% and 69% of HCP's revenues in 2015, 2014 and 2013, respectively, are from government-based programs, principally Medicare and Medicaid. Approximately 61%, 64% and 67% for 2015, 2014 and 2013, respectively, of HCP's capitated medical revenues are associated with three health plans. In addition, approximately 71% and 73% at December 31, 2015 and 2014, respectively, of HCP's capitated accounts receivables are associated with three health plans.

There is no single commercial payor that accounted for more than 10% of total consolidated accounts receivable at December 31, 2015 and 2014.

24. Fair values of financial instruments

The Company measures the fair value of certain assets, liabilities and noncontrolling interests subject to put provisions (temporary equity) based upon certain valuation techniques that include observable or unobservable inputs and assumptions that market participants would use in pricing these assets, liabilities, temporary equity and commitments. The Company has also classified certain assets, liabilities and temporary equity that are measured at fair value into the appropriate fair value hierarchy levels as defined by FASB.

The following tables summarize the Company's assets, liabilities and temporary equity measured at fair value on a recurring basis as of December 31, 2015 and 2014:

	Total	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
December 31, 2015				
Assets				
Available for sale securities	$ 33,482	$ 33,482	$ —	$ —
Interest rate cap agreements	$ 15,127	$ —	$ 15,127	$ —
Interest rate swap agreements	$ 516	$ —	$ 516	$ —
Funds on deposit with third parties	$ 82,679	$ 82,679	$ —	$ —
Liabilities				
Contingent earn-out obligations	$ 34,135	$ —	$ —	$ 34,135
Temporary equity				
Noncontrolling interests subject to put provisions	$ 864,066	$ —	$ —	$ 864,066
December 31, 2014				
Assets				
Available for sale securities	$ 28,123	$ 28,123	$ —	$ —
Interest rate cap agreements	$ 13,934	$ —	$ 13,934	$ —
Interest rate swap agreements	$ 3,281	$ —	$ 3,281	$ —
Funds on deposit with third parties	$ 81,276	$ 81,276	$ —	$ —
Liabilities				
Interest rate swap agreements	$ 1,457	$ —	$ 1,457	$ —
Contingent earn-out obligations	$ 39,129	$ —	$ —	$ 39,129
Temporary equity				
Noncontrolling interests subject to put provisions	$ 829,965	$ —	$ —	$ 829,965

The available for sale securities represent investments in various open-ended registered investment companies, or mutual funds, and are recorded at fair value based upon quoted prices reported by each mutual fund. See Note 9 to these consolidated financial statements for further discussion.

The interest rate swap and cap agreements are recorded at fair value based upon valuation models utilizing the income approach and commonly accepted valuation techniques that use inputs from closing prices for similar assets and liabilities in active markets as well as other relevant observable market inputs at quoted intervals such as current interest rates, forward yield curves, implied volatility and credit default swap pricing. The Company does not believe the ultimate amount that could be realized upon settlement of these interest rate swap and cap agreements would be materially different from the fair values currently reported. See Note 14 to the consolidated financial statements for further discussion.

The funds on deposit with third parties represent funds held with various third parties as required by regulation or contract and invested by those parties in various investments, which are measured at estimated fair value based primarily on quoted market prices.

The estimated fair value measurements of contingent earn-out obligations are primarily based on unobservable inputs including projected EBITDA, estimated probabilities of achieving gross margin of certain medical procedures and the estimated probability of earn-out payments being made using an option pricing technique and a simulation model for expected EBITDA and operating income. In addition, a probability adjusted model was used to estimate the fair values of the quality results amounts. The estimated fair value of these contingent earn-out obligations will be remeasured as of each reporting date and could fluctuate based upon any significant changes in key assumptions, such as changes in the Company credit risk adjusted rate that is used to discount obligations to present value.

See Note 18 to these consolidated financial statements for a discussion of the Company's methodology for estimating the fair value of noncontrolling interests subject to put obligations.

Other financial instruments consist primarily of cash, accounts receivable, accounts payable, other accrued liabilities and debt. The balances of the non-debt financial instruments are presented in the consolidated financial statements at December 31, 2015 and 2014 at their approximate fair values due to the short-term nature of their settlements. The carrying balance of the Company's Senior Secured Credit Facilities totaled $4,372,500 as of December 31, 2015, and the fair value was approximately $4,370,188 based upon quoted market prices. The fair value of the Company's senior notes was approximately $4,463,750 at December 31, 2015 based upon quoted market prices, as compared to the carrying amount of $4,500,000.

25. Segment reporting

The Company operates two major divisions, Kidney Care and HCP. The Kidney Care division is comprised of the Company's U.S. dialysis and related lab services business, various other ancillary services and strategic initiatives, including its international operations, and the Company's corporate administrative support. The Company's U.S. dialysis and related lab services business is the Company's largest line of business, and is a leading provider of kidney dialysis services in the U.S. for patients suffering from chronic kidney failure, also known as ESRD. The Company's HCP division is a patient- and physician-focused integrated healthcare delivery and management company with over two decades of providing coordinated outcomes-based medical care in a cost-effective manner.

The Company's ancillary services and strategic initiatives consist primarily of pharmacy services, disease management services, vascular access services, clinical research programs, physician services, direct primary care and the Company's international operations.

The Company's operating segments have been defined based on the separate financial information that is regularly produced and reviewed by the Company's chief operating decision maker in making decisions about allocating resources to and assessing the financial results of the Company's different operating lines of business. The chief operating decision maker for the Company is its Chief Executive Officer.

The Company's separate operating segments include its U.S. dialysis and related lab services business, its HCP operations in each region, each of its ancillary services and strategic initiatives, and its international operations in the Asia Pacific, Latin American, and European and Middle Eastern markets and under the Saudi Ministry of Health charter. The U.S. dialysis and related lab services business and the HCP business each qualify as separately reportable segments, while all of the other ancillary services and strategic initiatives operating segments, including the international operating segments, have been combined and disclosed in the other segments category.

The Company's operating segment financial information included in this report is prepared on the internal management reporting basis that the chief operating decision maker uses to allocate resources and assess the financial results of the operating segments. For internal management reporting, segment operations include direct segment operating expenses but exclude (i) the HCP contingent earn-out obligation adjustment, (ii) corporate administrative support costs, which consists primarily of indirect labor, benefits and long-term incentive based compensation of certain departments which provide support to all of the Company's different operating lines of business and the reduction of a tax asset associated with the HCP acquisition escrow provisions.

(dollars in thousands, except per share data)

The following is a summary of segment revenues, segment operating margin (loss), and a reconciliation of segment operating margin to consolidated income from continuing operations before income taxes:

	Year ended December 31,		
	2015	2014	2013
Segment revenues:			
U.S. dialysis and related lab services			
Patient service revenues:			
External sources	$ 8,980,515	$ 8,513,089	$ 7,998,692
Intersegment revenues	53,476	37,112	34,080
Total dialysis and related lab services revenues	9,033,991	8,550,201	8,032,772
Less: Provision for uncollectible accounts	(406,530)	(353,028)	(281,146)
Net dialysis and related lab services patient service revenues	8,627,461	8,197,173	7,751,626
Other revenues(1)	13,971	13,498	12,600
Total net dialysis and related lab services revenues	8,641,432	8,210,671	7,764,226
HCP			
HCP revenues:			
Capitated revenues	$ 3,436,705	$ 3,190,903	$ 2,919,964
Net patient service revenues	317,950	219,306	220,251
Other revenues(2)	82,470	91,374	55,723
Intersegment capitated and other revenues	136	716	250
Total revenues	$ 3,837,261	$ 3,502,299	$ 3,196,188
Other - Ancillary services and strategic initiatives			
Net patient service revenues	$ 160,484	$ 122,087	$ 75,852

28. Consolidating financial statements

The following information is presented in accordance with Rule 3-10 of Regulation S-X. The operating and investing activities of the separate legal entities included in the Company's consolidated financial statements are fully interdependent and integrated. Revenues and operating expenses of the separate legal entities include intercompany charges for management and other services. The Company's Senior Notes are guaranteed by substantially all of its domestic subsidiaries. Each of the guarantor subsidiaries has guaranteed the Senior Notes on a joint and several basis. However, the guarantor subsidiaries can be released from their obligations in the event of a sale or other disposition of all or substantially all of the assets of such subsidiary, including by merger or consolidation or the sale of all equity interests in such subsidiary owned by the Company, if such subsidiary guarantor is designated as an unrestricted subsidiary or otherwise ceases to be a restricted subsidiary, and if such subsidiary guarantor no longer guaranties any other indebtedness of the Company. Certain domestic subsidiaries, foreign subsidiaries, joint ventures, partnerships and third parties are not guarantors of the Senior Notes.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders
DaVita HealthCare Partners Inc.:

Under date of February 26, 2016, we reported on the consolidated balance sheets of DaVita HealthCare Partners Inc. and subsidiaries as of December 31, 2015 and 2014, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the years in the three-year period ended December 31, 2015, which are included in the Annual Report on Form 10-K. In connection with our audits of the aforementioned consolidated financial statements, we also audited the related financial statement Schedule II-Valuation and Qualifying Accounts included in the Annual Report on Form 10-K. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement schedule based on our audits.

In our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

(46) Filed on November 6, 2014 as an exhibit to the Company's Quarterly Report on Form 10-Q for the quarter ended September 30, 2014.
(47) Filed on October 23, 2014 as an exhibit to the Company's Current Report on Form 8-K.

Exhibit 12.1

DAVITA HEALTHCARE PARTNERS INC.
RATIO OF EARNINGS TO FIXED CHARGES

The ratio of earnings to fixed charges is computed by dividing earnings by fixed charges. Earnings for this purpose are defined as pretax income from continuing operations adjusted by adding back fixed charges expensed during the period less noncontrolling interests. Fixed charges include debt expense (interest expense and the amortization of deferred financing costs), the estimated interest component of rent expense on operating leases, and capitalized interest.

	Year ended December 31,				
	2015	2014	2013	2012	2011
	(in thousands, except share data)				
Earnings adjusted for fixed charges:					
Income from continuing operations before income taxes	$ 723,136	$ 1,309,673	$ 1,124,978	$ 1,001,304	$ 916,605
Add:					
Debt expense	408,380	410,294	429,943	288,554	241,090
Interest portion of rent expense	166,821	149,432	137,558	112,424	95,919
Less: Noncontrolling interests	(158,304)	(140,949)	(124,276)	(105,891)	(95,899)
	416,897	418,777	443,225	295,087	241,110
	$ 1,140,033	$ 1,728,450	$ 1,568,203	$ 1,296,391	$ 1,157,715
Fixed charges:					
Debt expense	408,380	410,294	429,943	288,554	241,090
Interest portion of rent expense	166,821	149,432	137,558	112,424	95,919
Capitalized interest	9,723	7,888	6,408	8,127	4,887
	$ 584,924	$ 567,614	$ 573,909	$ 409,105	$ 341,896
Ratio of earnings to fixed charges	1.95	3.05	2.73	3.17	3.39

SECTION 302 CERTIFICATION

I, Kent J. Thiry, certify that:

1. I have reviewed this annual report on Form 10-K of DaVita HealthCare Partners Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and we have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

SECTION 302 CERTIFICATION

I, James K. Hilger, certify that:

1. I have reviewed this annual report on Form 10-K of DaVita HealthCare Partners Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and we have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

(State of incorporation)	**(I.R.S. Employer Identification No.)**

Securities registered pursuant to Section 12(b) of the Act:

Class of Security:	**Registered on:**
Common Stock, $0.001 par value	**New York Stock Exchange**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	☒	Accelerated filer	☐
Non-accelerated filer	☐ (Do not check if a smaller reporting company)	Smaller reporting company	☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

As of June 30, 2016, the number of shares of the Registrant's common stock outstanding was approximately 206.9 million shares and the aggregate market value of the common stock outstanding held by non-affiliates based upon the closing price of these shares on the New York Stock Exchange was approximately $16.0 billion.

As of January 31, 2017, the number of shares of the Registrant's common stock outstanding held by non-affiliates was approximately 194.6 million shares.

Documents incorporated by reference

Portions of the Registrant's proxy statement for its 2017 annual meeting of stockholders are incorporated by reference in Part III of this Form 10-K.

PART I

Item 1. Business

We were incorporated as a Delaware corporation in 1994. Our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to section 13(a) or 15(d) of the Exchange Act are made available free of charge through our website, located at http://www.davita.com, as soon as reasonably practicable after the reports are filed with or furnished to the Securities and Exchange Commission (SEC). The SEC also maintains a website at http://www.sec.gov where these reports and other information about us can be obtained. The contents of our website are not incorporated by reference into this report.

Overview of DaVita Inc.

The Company consists of two major divisions, DaVita Kidney Care (Kidney Care) and DaVita Medical Group (DMG, formerly known as HealthCare Partners or HCP). Kidney Care is comprised of our U.S. dialysis and related lab services, our ancillary services and strategic initiatives, including our international operations and our corporate administrative support. Our U.S. dialysis and related lab services business is our largest line of business, which is a leading provider of kidney dialysis services in the U.S. for patients suffering from chronic kidney failure, also known as end stage renal disease (ESRD). Our DMG division is a patient- and physician-focused integrated healthcare delivery and management company with over two decades of providing coordinated, outcomes-based medical care in a cost-effective manner.

For financial information about our reportable segments see Note 25 to the consolidated financial statements included in this report.

Kidney Care Division

U.S. dialysis and related lab services business overview

Our U.S. dialysis and related lab services business is a leading provider of kidney dialysis services for patients suffering from ESRD. As of December 31, 2016, we provided dialysis and administrative services in the U.S. through a network of 2,350 outpatient dialysis centers in 46 states and the District of Columbia, serving a total of approximately 187,700 patients. We also provide acute inpatient dialysis services in approximately 900 hospitals and related laboratory services throughout the U.S. All references in this document to dialysis and related lab services refer only to our U.S. dialysis and related lab services business.

The loss of kidney function is normally irreversible. Kidney failure is typically caused by Type I and Type II diabetes, high blood pressure, polycystic kidney disease, long-term autoimmune attack on the kidney and prolonged urinary tract obstruction. ESRD is the stage of advanced kidney impairment that requires continued dialysis treatments or a kidney transplant to sustain life. Dialysis is the removal of toxins, fluids and salt from the blood of patients by artificial means. Patients suffering from ESRD generally require dialysis at least three times a week for the rest of their lives.

According to the United States Renal Data System, there were approximately 477,000 ESRD dialysis patients in the U.S. in 2014. The underlying ESRD dialysis patient population has grown at an approximate compound rate of 3.8% from 2000 to 2014, the latest period for which such data is available. The growth rate is attributable to the aging of the U.S. population, increased incidence rates for diseases that cause kidney failure such as diabetes and hypertension, lower mortality rates for dialysis patients and growth rates of minority populations with higher than average incidence rates of ESRD.

Since 1972, the federal government has provided healthcare coverage for ESRD patients under the Medicare ESRD program regardless of age or financial circumstances. ESRD is the first and only disease state eligible for Medicare coverage both for dialysis and dialysis-related services and for all benefits available under the Medicare program. For patients with Medicare coverage, all ESRD payments for dialysis treatments are made under a single bundled payment rate. See page 5 for further details.

Although Medicare reimbursement limits the allowable charge per treatment, it provides industry participants with a relatively predictable and recurring revenue stream for dialysis services provided to patients without commercial insurance. For the year ended December 31, 2016, approximately 88% of our total dialysis patients were covered under some form of government-based programs, with approximately 75% of our dialysis patients covered under Medicare and Medicare-assigned plans.

Treatment options for ESRD

Treatment options for ESRD are dialysis and kidney transplantation.

Dialysis options

- *Hemodialysis*

Hemodialysis, the most common form of ESRD treatment, is usually performed at a freestanding outpatient dialysis center, at a hospital-based outpatient center, or at the patient's home. The hemodialysis machine uses an artificial kidney, called a dialyzer, to remove toxins, fluids and salt from the patient's blood. The dialysis process occurs across a semi-permeable membrane that divides the dialyzer into two distinct chambers. While blood is circulated through one chamber, a pre-mixed fluid is circulated through the other chamber. The toxins, salt and excess fluids from the blood cross the membrane into the fluid, allowing cleansed blood to return back into the patient's body. Each hemodialysis treatment that occurs in the outpatient dialysis centers typically lasts approximately three and one-half hours and is usually performed three times per week.

Hospital inpatient hemodialysis services are required for patients with acute kidney failure primarily resulting from trauma, patients in early stages of ESRD and ESRD patients who require hospitalization for other reasons. Hospital inpatient hemodialysis is generally performed at the patient's bedside or in a dedicated treatment room in the hospital, as needed.

Some ESRD patients who are healthier and more independent may perform home-based hemodialysis in their home or residence through the use of a hemodialysis machine designed specifically for home therapy that is portable, smaller and easier to use. Patients receive training, support and monitoring from registered nurses, usually in our outpatient dialysis centers, in connection with their dialysis treatment. Home-based hemodialysis is typically performed with greater frequency than dialysis treatments performed in outpatient dialysis centers and on varying schedules.

- *Peritoneal dialysis*

Peritoneal dialysis uses the patient's peritoneal or abdominal cavity to eliminate fluid and toxins and is typically performed at home. The most common methods of peritoneal dialysis are continuous ambulatory peritoneal dialysis (CAPD), and continuous cycling peritoneal dialysis (CCPD). Because it does not involve going to an outpatient dialysis center three times a week for treatment, peritoneal dialysis is an alternative to hemodialysis for patients who are healthier, more independent and desire more flexibility in their lifestyle. However, peritoneal dialysis is not a suitable method of treatment for many patients, including patients who are unable to perform the necessary procedures and those at greater risk of peritoneal infection.

CAPD introduces dialysis solution into the patient's peritoneal cavity through a surgically placed catheter. Toxins in the blood continuously cross the peritoneal membrane into the dialysis solution. After several hours, the patient drains the used dialysis solution and replaces it with fresh solution. This procedure is usually repeated four times per day.

CCPD is performed in a manner similar to CAPD, but uses a mechanical device to cycle dialysis solution through the patient's peritoneal cavity while the patient is sleeping or at rest.

Kidney transplantation

Although kidney transplantation, when successful, is generally the most desirable form of therapeutic intervention, the shortage of suitable donors, side effects of immunosuppressive pharmaceuticals given to transplant recipients and dangers associated with transplant surgery for some patient populations limit the use of this treatment option.

Dialysis and related lab services we provide

Outpatient hemodialysis services

As of December 31, 2016, we operated or provided administrative services through a network of 2,350 outpatient dialysis centers in the U.S. that are designed specifically for outpatient hemodialysis. In 2016, our overall network of U.S. outpatient dialysis centers increased by 99 primarily as a result of the opening of new dialysis centers, net of center closures and divestitures, and acquisitions, representing a total increase of approximately 4.4% from 2015.

As a condition of our enrollment in Medicare for the provision of dialysis services, we contract with a nephrologist or a group of associated nephrologists to provide medical director services at each of our dialysis centers. In addition, other nephrologists may apply for practice privileges to treat their patients at our centers. Each center has an administrator, typically a registered nurse, who supervises the day-to-day operations of the center and its staff. The staff of each center typically consists of registered nurses, licensed practical or vocational nurses, patient care technicians, a social worker, a registered dietician, biomedical technician support and other administrative and support personnel.

Under Medicare regulations, we cannot promote, develop or maintain any kind of contractual relationship with our patients that would directly or indirectly obligate a patient to use or continue to use our dialysis services, or that would give us any preferential rights other than those related to collecting payments for our dialysis services. Our total patient turnover, which is based upon all causes, averaged approximately 25% in both 2016 and 2015. However, in 2016, the overall number of patients to whom we provided services in the U.S. increased by approximately 4.5% from 2015, primarily from the opening of new dialysis centers and acquisitions, and continued growth within the industry.

Hospital inpatient hemodialysis services

As of December 31, 2016, we provided hospital inpatient hemodialysis services, excluding physician services, to patients in approximately 900 hospitals throughout the U.S. We render these services based on a contracted per-treatment fee that is individually negotiated with each hospital. When a hospital requests our services, we typically administer the dialysis treatment at the patient's bedside or in a dedicated treatment room in the hospital, as needed. In 2016, hospital inpatient hemodialysis services accounted for approximately 4.7% of our U.S. dialysis revenues and 4.0% of our total U.S. dialysis treatments.

Home-based hemodialysis services

Many of our outpatient dialysis centers offer certain support services for dialysis patients who prefer and are able to perform either home-based hemodialysis or peritoneal dialysis in their homes. Home-based hemodialysis support services consist of providing equipment and supplies, training, patient monitoring, on-call support services and follow-up assistance. Registered nurses train patients and their families or other caregivers to perform either home-based hemodialysis or peritoneal dialysis.

ESRD laboratory services

We own two separately incorporated, licensed, clinical laboratories which specialize in ESRD patient testing. These specialized laboratories provide routine laboratory tests for dialysis and other physician-prescribed laboratory tests for ESRD patients and are an integral component of overall dialysis services that we provide. Our laboratories provide these tests predominantly for our network of ESRD patients throughout the U.S. These tests are performed to monitor a patient's ESRD condition, including the adequacy of dialysis, as well as other medical conditions of the patient. Our laboratories utilize information systems which provide information to certain members of the dialysis centers' staff and medical directors regarding critical outcome indicators.

Management services

We currently operate or provide management and administrative services pursuant to management and administrative services agreements to 34 outpatient dialysis centers located in the U.S. in which we either own a noncontrolling interest or are wholly-owned by third parties. Management fees are established by contract and are recognized as earned typically based on a percentage of revenues or cash collections generated by the outpatient dialysis centers.

Quality care

Centers for Medicare and Medicaid Services' (CMS) Five-Star Quality Rating system, is a rating system that assigns one to five stars to rate the quality of outcomes for dialysis facilities. The rating system provides patients reported information about any given dialysis facility and identifies differences in quality between facilities so that patients can make more informed decisions about where to receive treatment. For the third consecutive year, we are a leader in the industry under the CMS Five-Star Quality Rating system.

In addition, CMS promotes high quality services in outpatient dialysis facilities treating patients with ESRD through its Quality Incentive Program (QIP). QIP associates a portion of payment directly with a facility's performance on quality of care measures. Payment reductions result when a facility's overall score on applicable measures does not meet established standards. For the fourth year in a row, we are an industry leader in QIP standards.

Our facilities employ registered nurses, licensed practical or vocational nurses, patient care technicians, social workers, registered dieticians, biomedical technicians and other administrative and support teammates whom aim to achieve superior clinical outcomes at our centers.

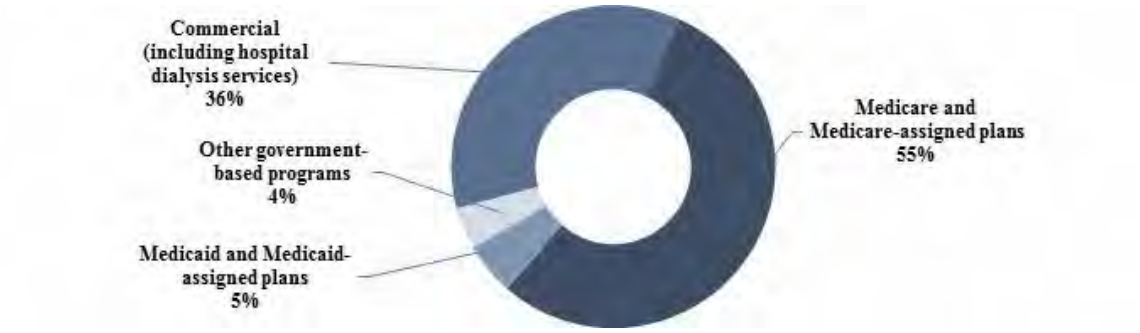
Our physician leadership in the Office of the Chief Medical Officer (OCMO) for our dialysis and related lab services business includes 13 senior nephrologists, led by our Chief Medical Officer, with a variety of academic, clinical practice, and clinical research backgrounds. Our Physician Council is an advisory body to senior management composed of nine physicians with extensive experience in clinical practice. In addition, we currently have nine Group Medical Directors.

Sources of revenue—concentrations and risks

Our U.S. dialysis and related lab services business net revenues represent approximately 62% of our consolidated net revenues for the year ended December 31, 2016. Our U.S. dialysis and related lab services revenues are derived primarily from our core business of providing dialysis services and related laboratory services and, to a lesser extent, the administration of pharmaceuticals and management fees generated from providing management and administrative services to certain outpatient dialysis centers, as discussed above.

The sources of our dialysis and related lab services revenues are principally from government-based programs, including Medicare and Medicare-assigned plans, Medicaid and Medicaid-assigned plans and commercial insurance plans.

The following graph summarizes our U.S. dialysis services revenues by source for the year ended December 31, 2016:



The following graph summarizes our U.S. dialysis services revenues by modality for the year ended December 31, 2016:

Medicare revenue

Government dialysis related payment rates in the U.S. are principally determined by federal Medicare and state Medicaid policy. For patients with Medicare coverage, all ESRD payments for dialysis treatments are made under a single bundled payment rate which provides a fixed payment rate to encompass all goods and services provided during the dialysis treatment, including certain pharmaceuticals, such as Epogen® (EPO), vitamin D analogs and iron supplements, irrespective of the level of pharmaceuticals administered to the patient or additional services performed. Most lab services are also included in the bundled payment. Under the ESRD Prospective Payment System (PPS), the bundled payments to a dialysis facility may be reduced by as much as 2% based on the facility's performance in specified quality measures set annually by CMS through QIP, which was established by the Medicare Improvements for Patients and Providers Act of 2008. The bundled payment rate is also adjusted for certain patient characteristics, a geographic usage index and certain other factors.

An important provision in the law is an annual adjustment, or market basket update, to the PPS base rate. Absent action by Congress, the PPS base rate is automatically updated annually by a formulaic inflation adjustment. In December 2013, CMS issued the 2014 final rule for the ESRD PPS, which phases in the payment reductions mandated by the American Taxpayer Relief Act of 2012 (ATRA), as modified by the Protecting Access to Medicare Act of 2014, which reduced our market basket inflation adjustment by

1.25% in 2016 and will reduce our market basket inflation adjustment by 1.25% in 2017 and by 1% in 2018. In November 2016, CMS published the 2017 final rule for the ESRD PPS, which increased dialysis facilities' bundled payment rate for 2017 relative to prior years. In particular, CMS projects that the 2017 final rule for the ESRD PPS will (i) increase the total payments to all ESRD facilities by 0.73% in 2017 compared to 2016; (ii) increase total payments to hospital-based ESRD facilities by 0.9% in 2017 compared to 2016; and (iii) increase total payments for freestanding facilities by 0.7% in 2017 compared to 2016. The 2017 final rule for the ESRD PPS also implements the Trade Preferences Extension Act of 2015 provisions regarding the coverage and payment of renal dialysis services furnished by ESRD facilities to individuals with acute kidney injury.

As a result of the Budget Control Act of 2011 (BCA) and subsequent activity in Congress, a $1.2 trillion sequester (across-the-board spending cuts) in discretionary programs took effect in 2013 reducing Medicare payments by 2%, which was subsequently extended through fiscal year 2025. These across-the-board spending cuts have affected and will continue to adversely affect our revenues, earnings and cash flows.

The CMS Center for Medicare & Medicaid Innovation Center (Innovation Center) is currently working with various healthcare providers to develop, refine and implement Accountable Care Organizations (ACOs) and other innovative models of care for Medicare and Medicaid beneficiaries. We are currently uncertain of the extent to which the long-term operation and evolution of these models of care, including ACOs, Bundled Payments for Care Improvement Initiative, Comprehensive ESRD Care (CEC) Model (which includes the development of ESRD Seamless Care Organizations (ESCOs)), the Comprehensive Primary Care Initiative, the Duals Demonstration, or other models, will impact the healthcare market over time. Our U.S. dialysis business may choose to participate in one or several of these models either as a partner with other providers or independently. We currently participate in the CEC Model with the Innovation Center, including the ESCO organizations in the Arizona, Florida, and adjacent New Jersey and Pennsylvania markets. In areas where our U.S. dialysis business is not directly participating in this or other Innovation Center models, some of our patients may be assigned to an ACO, another ESRD Care Model, or another program, in which case the quality and cost of care that we furnish will be included in an ACO's, another ESRD Care Model's or other program's calculations.

The Department of Health and Human Services (HHS) has also pledged to tie 50% of Medicare payments to quality or alternate payment models by the end of 2018. As new models of care emerge and evolve, we may be at risk for losing our Medicare patient base, which would have a materially adverse effect on our revenues, earnings and cash flow. Other initiatives in the government or private sector may also arise, including the development of models similar to ACOs, independent practice associations (IPAs) and integrated delivery systems or evolutions of those concepts which could adversely impact our business.

We anticipate that we will continue to experience increases in our operating costs in 2017 that will outpace any net Medicare rate increases that we may receive, which could significantly impact our operating results. In addition, we expect to continue experiencing increases in operating costs that are subject to inflation, such as labor and supply costs, regardless of whether there is a compensating inflation-based increase in Medicare payment rates or in payments under the bundled payment rate system.

ESRD patients receiving dialysis services become eligible for primary Medicare coverage at various times, depending on their age or disability status, as well as whether they are covered by a commercial insurance plan. Generally, for a patient not covered by a commercial insurance plan, Medicare becomes the primary payor for ESRD patients receiving dialysis services either immediately or after a three-month waiting period. For a patient covered by a commercial insurance plan, Medicare generally becomes the primary payor after 33 months, which includes the three-month waiting period, or earlier if the patient's commercial insurance plan coverage terminates. When Medicare becomes the primary payor, the payment rates we receive for that patient shift from the commercial insurance plan rates to Medicare payment rates, which are significantly lower than commercial insurance rates.

Medicare pays 80% of the amount set by the Medicare system for each covered dialysis treatment. The patient is responsible for the remaining 20%. In most cases, a secondary payor, such as Medicare supplemental insurance, a state Medicaid program or a commercial health plan, covers all or part of these balances. Some patients who do not qualify for Medicaid, but otherwise cannot afford secondary insurance, can apply for premium payment assistance from charitable organizations through a program offered by the American Kidney Fund. If a patient does not have secondary insurance coverage, we are generally unsuccessful in our efforts to collect from the patient the remaining 20% portion of the ESRD composite rate that Medicare does not pay. However, we are able to recover some portion of this unpaid patient balance from Medicare through an established cost reporting process by identifying these Medicare bad debts on each center's Medicare cost report.

The 21st Century Cures Act, enacted in December 2016, included a provision that will allow Medicare beneficiaries with ESRD to choose a Medicare Advantage plan. Until the effective date of this law, this choice is available only to Medicare beneficiaries without ESRD. The ESRD related provisions of the 21st Century Cures Act are scheduled to take effect in 2021.

Medicaid revenue

Medicaid programs are state-administered programs partially funded by the federal government. These programs are intended to provide health coverage for patients whose income and assets fall below state-defined levels and who are otherwise uninsured. These programs also serve as supplemental insurance programs for co-insurance payments due from Medicaid-eligible patients with primary coverage under the Medicare program. Some Medicaid programs also pay for additional services, including some oral medications that are not covered by Medicare. We are enrolled in the Medicaid programs in the states in which we conduct our business.

Commercial revenue

Before a patient becomes eligible to have Medicare as their primary payor for dialysis services, a patient's commercial insurance plan, if any, is responsible for payment of such dialysis services for the first 33 months, as discussed above. Although commercial payment rates vary, average commercial payment rates established under commercial contracts are generally significantly higher than Medicare rates. The payments we receive from commercial payors generate nearly all of our profits. Payment methods from commercial payors can include a single lump-sum per treatment, referred to as bundled rates, or in other cases separate payments for dialysis treatments and pharmaceuticals, if used as part of the treatment, referred to as Fee-for-Service (FFS) rates. Commercial payment rates are the result of negotiations between us and insurers or third-party administrators. Our out-of-network payment rates are on average higher than in-network commercial contract payment rates. We continue to enter into some commercial contracts, covering certain patients that will primarily pay us under a single bundled payment rate for all dialysis services provided to these patients. However, some contracts will pay us for certain other services and pharmaceuticals in addition to the bundled payment. These contracts typically contain annual price escalator provisions. We are continuously in the process of negotiating agreements with our commercial payors and if our negotiations result in overall commercial contract payment rate reductions in excess of our commercial contract payment rate increases, our revenues and operating results could be negatively impacted. In addition, if there is an increase in job losses in the U.S., or depending upon changes to the healthcare regulatory system by CMS and/or the impact of healthcare insurance exchanges, we could experience a decrease in the number of patients covered under traditional commercial insurance plans. Patients with commercial insurance who cannot otherwise maintain coverage frequently rely on financial assistance from charitable organizations, such as the American Kidney Fund. If these patients are unable to obtain or continue to receive such financial assistance, our revenues, earnings, and cash flow could be substantially reduced.

Approximately 31% of our dialysis services revenues and approximately 12% of our dialysis treatments and patients are associated with non-acute commercial payors for the year ended December 31, 2016. Non-acute commercial patients as a percentage of our total dialysis patients increased 1% as compared to 2015. Less than 1% of our dialysis and related lab services revenues are due directly from patients. There is no single commercial payor that accounted for more than 10% of total dialysis and related lab services revenues for the year ended December 31, 2016. See Note 23 to the consolidated financial statements included in this report for disclosure on our concentration related to our commercial payors on a total consolidated net revenue basis.

The healthcare reform legislation enacted in 2010 introduced healthcare insurance exchanges which provide a marketplace for eligible individuals and small employers to purchase healthcare insurance. The business and regulatory environment continues to evolve as the exchanges mature, and regulations are challenged, changed and enforced. If commercial payor participation in the exchanges continues to decrease, our revenues, earnings and cash flows could be adversely affected. Although we cannot predict the short- or long-term effects of these factors, we believe the healthcare insurance exchanges could result in a reduction in ESRD patients covered by traditional commercial insurance policies and an increase in the number of patients covered through the exchanges under more restrictive commercial plans with lower reimbursement rates or higher deductibles and co-payments that patients may not be able to pay. To the extent that the ongoing implementation of such exchanges or changes in regulations or enforcement of regulations regarding the exchanges results in a reduction in reimbursement rates for our services from commercial and/or government payors, our revenues, earnings and cash flows could be adversely affected.

In addition, CMS published an interim final rule that establishes new Conditions for Coverage standards for dialysis facilities that require any facility making payments of premiums for individual market health plans to notify patients of potential coverage options and educate them about the benefits of each option. The interim final rule requires facilities to ensure that insurers are informed of and have agreed to accept the payments. On January 25, 2017, the federal court issued a preliminary injunction on CMS's interim final rule. At this time CMS has not appealed the court's ruling and we await the final decision from the court. This and any other guidance or rule issued that limits or prohibits the use of charitable premium assistance and/or the ability of patients with access to alternative coverage from selecting a marketplace plan on or off exchange could have a material adverse effect on our revenue, earnings and cash flows.

Revenue from other pharmaceuticals and EPO

The impact of physician-prescribed pharmaceuticals on our overall revenues that are separately billable has significantly decreased since Medicare's single bundled payment system went into effect beginning in January 2011, as well as some additional

commercial contracts that pay us a single bundled payment rate. Approximately 2% of our total dialysis and related lab services revenues for the years ended December 31, 2016 and 2015, are associated with the administration of separately-billable physician-prescribed pharmaceuticals. Of this, the administration of EPO that was separately billable, accounted for approximately half of our separately billable pharmaceuticals of our dialysis and related lab services revenues for both years. EPO is produced by a single manufacturer, Amgen USA Inc. (Amgen). In January 2017, we entered into a six year Sourcing and Supply Agreement with Amgen that expires on December 31, 2022, replacing our prior agreement that was to expire in 2018. Under the terms of the agreement, we will purchase EPO in amounts necessary to meet no less than 90% of our requirements for ESAs. The actual amount of EPO that we will purchase from Amgen will depend upon the amount of EPO administered during dialysis as prescribed by physicians and the overall number of patients that we serve. Any interruption in the supply of EPO or product cost increases could impact our operations.

Evaluations on the utilization and reimbursement for erythropoiesis stimulating agents (ESAs), like EPO, which have occurred in the past and may occur in the future, and related actions by the U.S. Congress and federal agencies, could result in further restrictions on the utilization and reimbursement for ESAs. Additionally, commercial payors have also increasingly examined their administration policies for EPO and, in some cases, have modified those policies. Changes in labeling of EPO and other pharmaceuticals in a manner that alters physician practice patterns or accepted clinical practices, changes in private and governmental payment criteria, including the introduction of EPO administration policies or the conversion to alternate types of administration of EPO or other pharmaceuticals that result in further decreases in utilization of EPO for patients covered by commercial payors, which pay for pharmaceuticals separately, could have a material impact on our operating results. Further increased utilization of EPO for patients for whom the cost of EPO is included in a bundled reimbursement rate could also have a material impact on our operating results.

Physician relationships

An ESRD patient generally seeks treatment at an outpatient dialysis center near his or her home where his or her treating nephrologist has practice privileges. Our relationships with local nephrologists and our ability to meet their needs and the needs of their patients are key factors in the success of our dialysis operations. Approximately 5,100 nephrologists currently refer patients to our outpatient dialysis centers. As is typical in the dialysis industry, one or a few physicians, including the outpatient dialysis center's medical director, usually account for all or a significant portion of an outpatient dialysis center's patient base.

Participation in the Medicare ESRD program requires that dialysis services at an outpatient dialysis center be under the general supervision of a medical director who is a licensed physician. We have engaged physicians or groups of physicians to serve as medical directors for each of our outpatient dialysis centers. At some outpatient dialysis centers, we also separately contract with one or more other physicians to serve as assistant or associate medical directors or to direct specific programs, such as home dialysis training programs. We have approximately 970 individual physicians and physician groups under contract to provide medical director services.

Medical directors for our dialysis centers enter into written contracts with us that specify their duties and fix their compensation generally for periods of ten years. The compensation of our medical directors is the result of arm's length negotiations and generally depends upon an analysis of various factors such as the physician's duties, responsibilities, professional qualifications and experience, among others.

Our medical director contracts for our dialysis centers generally include covenants not to compete. Also, except as described below, when we acquire an outpatient dialysis center from one or more physicians or where one or more physicians own minority interests in our outpatient dialysis centers, these physicians have agreed to refrain from owning interests in other competing outpatient dialysis centers within a defined geographic area for various time periods. These non-compete agreements restrict the physicians from owning or providing medical director services to other outpatient dialysis centers, but do not prohibit the physicians from referring patients to any outpatient dialysis center, including competing centers. Many of these non-compete agreements continue for a period of time beyond expiration of the corresponding medical director agreements, although some expire at the same time as the medical director agreement. Occasionally, we experience competition from a new outpatient dialysis center established by a former medical director following the termination of his or her relationship with us. As part of our Corporate Integrity Agreement (CIA), as described below, we also have agreed not to enforce investment non-compete restrictions relating to dialysis clinics or programs that were established pursuant to a partial divestiture joint venture transaction. Therefore, to the extent a joint venture partner or medical director has a contract(s) with us covering dialysis clinics or programs that were established pursuant to a partial divestiture, we will not enforce the investment non-compete provision relating to those clinics and/or programs.

If a significant number of physicians, including an outpatient dialysis center's medical directors, were to cease referring patients to our outpatient dialysis centers, our business could be adversely affected.

Government regulation

Our dialysis operations are subject to extensive federal, state and local governmental regulations. These regulations require us to meet various standards relating to, among other things, government payment programs, dialysis facilities and equipment, management of centers, personnel qualifications, maintenance of proper records, and quality assurance programs and patient care.

Because we are subject to a number of governmental regulations, our business could be adversely impacted by any of the following:

- Loss or suspension of required government certifications;
- Loss or suspension of licenses under the laws of any state or governmental authority from which we generate substantial revenues;
- Suspension or termination of our participation in government healthcare programs;
- Exclusion from government healthcare programs, including Medicare and Medicaid;
- Significant reductions or lack of inflation-adjusted increases in payment rates or reduction of coverage for dialysis and ancillary services and related pharmaceuticals;
- Civil or criminal liability, fines, damages and monetary penalties for violations of healthcare fraud and abuse laws, including the federal Anti-Kickback Statute, the Physician Self-Referral law (Stark Law), the federal False Claims Act (FCA) and other violations of law or failures to meet regulatory requirements;
- Enforcement actions by governmental agencies and/or claims for monetary damages from patients who believe their protected health information (PHI) or other confidential health information has been used or disclosed in violation of federal and state patient privacy laws;
- Mandated changes to our practices or procedures that significantly increase operating expenses;
- Refunds of payments received from government payors and government healthcare program beneficiaries in violation of law or because of any failures to meet applicable requirements;
- Imposition of and compliance with corporate integrity agreements that could subject us to ongoing audits and reporting requirements as well as increased scrutiny of our billing and business practices and potential fines;
- Termination of relationships with medical directors; or
- Harm to our reputation which could impact our business relationships, affect our ability to obtain financing and decrease access to new business opportunities.

We expect that our industry will continue to be subject to substantial regulation, the scope and effect of which are difficult to predict. Our activities could be reviewed or challenged by regulatory authorities at any time in the future. This regulation and scrutiny could have a material adverse impact on us.

Licensure and certification

Our dialysis centers are certified by CMS, as is required for the receipt of Medicare payments. In some states, our outpatient dialysis centers also are required to secure additional state licenses and permits. Governmental authorities, primarily state departments of health, periodically inspect our centers to determine if we satisfy applicable federal and state standards and requirements, including the conditions of participation in the Medicare ESRD program.

To date, we have not experienced significant difficulty in maintaining our licenses or enrolling in state Medicaid programs. However, we have experienced some delays in obtaining Medicare certifications from CMS.

Federal Anti-Kickback Statute

The federal anti-kickback statute contained in the Social Security Act of 1935, as amended (Anti-Kickback Statute), prohibits, among other things, knowingly and willfully offering, paying, soliciting or receiving remuneration, directly or indirectly, in cash or kind, to induce or reward either the referral of an individual for, or the purchase, or order or recommendation of, any good or service, for which payment may be made under federal and state healthcare programs such as Medicare and Medicaid.

Federal criminal penalties for the violation of the federal Anti-Kickback Statute include imprisonment, fines and exclusion of the provider from future participation in the federal healthcare programs, including Medicare and Medicaid. Violations of the federal Anti-Kickback Statute are punishable by imprisonment for up to five years and fines of up to $25,000 or both. Larger fines can be imposed upon corporations under the provisions of the U.S. Sentencing Guidelines and the Alternate Fines Statute. Individuals and entities convicted of violating the federal Anti-Kickback Statute are subject to mandatory exclusion from participation in Medicare, Medicaid and other federal healthcare programs for a minimum of five years. Civil penalties for violation of this law include up to $50,000 in monetary penalties per violation, repayments of up to three times the total payments between the parties and suspension from future participation in Medicare and Medicaid. Court decisions have held that the statute may be violated even if only one purpose of remuneration is to induce referrals. The Patient Protection and Affordable Care Act of 2010, as amended by the Health Care and Education Reconciliation Act of 2010 (Affordable Care Act (ACA)) amended the federal Anti-Kickback Statute to clarify the intent that is required to prove a violation. Under the statute as amended, the defendant does not need to have actual knowledge of the federal Anti-Kickback Statute or have the specific intent to violate it. In addition, the ACA amended the federal Anti-Kickback Statute to provide that any claims for items or services resulting from a violation of the federal Anti-Kickback Statute are considered false or fraudulent for purposes of the FCA.

The federal Anti-Kickback Statute includes statutory exceptions and regulatory safe harbors that protect certain arrangements. Business transactions and arrangements that are structured to comply fully with an applicable safe harbor do not violate the federal Anti-Kickback Statute. However, transactions and arrangements that do not satisfy all elements of a relevant safe harbor do not necessarily violate the law. When an arrangement does not satisfy a safe harbor, the arrangement must be evaluated on a case-by-case basis in light of the parties' intent and the arrangement's potential for abuse. Arrangements that do not satisfy a safe harbor may be subject to greater scrutiny by enforcement agencies.

We enter into several arrangements with physicians that potentially implicate the Anti-Kickback Statute, such as:

Medical Director Agreements. Because our medical directors refer patients to our dialysis centers, our arrangements with these physicians are designed to substantially comply with the safe harbor for personal service arrangements. Although the Medical Director Agreements we enter into with physicians substantially comply with the safe harbor for personal service arrangements, including the requirement that compensation be consistent with fair market value, the safe harbor requires that when services are provided on a part-time basis, the agreement must specify the schedule of intervals of services, and their precise length and the exact charge for such services. Because of the nature of our medical directors' duties, it is impossible to fully satisfy this technical element of the safe harbor. We believe that our fair market value arrangements with physicians who serve as medical directors do not violate the federal Anti-Kickback Statute; however, these arrangements could be subject to scrutiny since they do not expressly describe the schedule of part-time services to be provided under the arrangement.

Joint Ventures. We own a controlling interest in numerous U.S. dialysis related joint ventures. For the year ended December 31, 2016, these joint ventures represented approximately 24% of our dialysis and related lab services revenues. We may continue to increase the number of our joint ventures. Our relationships with physicians and other referral sources relating to these joint ventures do not fully satisfy the safe harbor for investments in small entities. Although failure to comply with a safe harbor does not render an arrangement illegal under the federal Anti-Kickback Statute, an arrangement that does not operate within a safe harbor may be subject to scrutiny and the Department of Health and Human Services' Office of Inspector General (OIG) has warned in the past that certain joint venture relationships have a potential for abuse. Based upon the foregoing, physician joint ventures that fall outside the safe harbors are not, by definition, prohibited by law. Instead, such joint ventures require case-by-case evaluation under the federal Anti-Kickback Statute.

In this regard, we have structured our joint ventures to satisfy as many elements of the safe harbor for investments in small entities as we believe are commercially reasonable. For example, we believe that these investments are offered and made by us on a fair market value basis and provide returns to the investors in proportion to their actual investment in the venture. We believe that our joint venture arrangements do not violate the federal Anti-Kickback Statute; however, since the arrangements do not satisfy all of the requirements of an applicable safe harbor, these arrangements could be subject to challenge on the ground that they are intended to induce patient referrals. In that regard, we were subject to investigation by the United States Attorney's Office for the District of Colorado, the Civil Division of the United States Department of Justice (DOJ) and the OIG related to our relationships with physicians, including our joint ventures, and whether those relationships and joint ventures comply with the federal Anti-Kickback Statute and the FCA. In October 2014, we entered into a Settlement Agreement with the United States and relator David Barbetta to

resolve the then pending 2010 and 2011 U.S. Attorney physician relationship investigations. In connection with the resolution of this matter, and in exchange for the OIG's agreement not to exclude us from participating in the federal healthcare programs, we have entered into a five-year CIA with the OIG. The CIA (i) requires that we maintain certain elements of our compliance programs; (ii) imposes certain expanded compliance-related requirements during the term of the CIA; (iii) requires ongoing monitoring and reporting by an independent monitor, imposes certain reporting, certification, records retention and training obligations, allocates certain oversight responsibility to the Board's Compliance Committee, and necessitates the creation of a Management Compliance Committee and the retention of an independent compliance advisor to the Board; and (iv) contains certain business restrictions related to a subset of our joint venture arrangement. The costs associated with compliance with the CIA could be substantial and may be greater than we currently anticipate. In addition, in the event of a breach of the CIA, we could become liable for payment of certain stipulated penalties, and could be excluded from participation in federal healthcare programs.

Lease Arrangements. We lease space for numerous dialysis centers from entities in which physicians, hospitals or medical groups hold ownership interests, and we sublease space to referring physicians at approximately 250 of our dialysis centers as of December 31, 2016. These arrangements comply with the federal Anti-Kickback Statute safe harbor for space rentals in all material respects. Therefore, we believe that these lease arrangements should not be subject to challenge under the federal Anti-Kickback Statute.

Common Stock. Some medical directors and other referring physicians may own our common stock. We believe that these interests materially satisfy the requirements of the Anti-Kickback Statute safe harbor for investments in large publicly traded companies. Therefore, we believe that these investments should not be subject to challenge under the federal Anti-Kickback Statute.

Discounts. Our dialysis centers sometimes acquire certain items and services that may be reimbursed by a federal healthcare program at a discount. We believe that our vendor contracts that include discount or rebate provisions are in compliance with the federal Anti-Kickback Statute safe harbor for discounts, and accordingly, we believe that our discounted vendor contracts should not be subject to challenge under the federal Anti-Kickback Statute.

If any of our business transactions or arrangements, including those described above, were found to violate the federal Anti-Kickback Statute, we could face criminal, civil or administrative sanctions, including possible exclusion from participation in Medicare, Medicaid and other state and federal healthcare programs. Any findings that we have violated these laws could have a material adverse impact on our operations.

Stark Law

The Stark Law prohibits a physician who has a financial relationship, or who has an immediate family member who has a financial relationship, with entities providing Designated Health Services (DHS), from referring Medicare and Medicaid patients to such entities for the furnishing DHS, unless an exception applies. DHS includes enumerated items and services, including home health services, outpatient prescription drugs, inpatient and outpatient hospital services and clinical laboratory services. The types of financial arrangements between a physician and a DHS entity that trigger the self-referral prohibitions of the Stark Law are broad and include direct and indirect ownership and investment interests and compensation arrangements. The Stark Law also prohibits the DHS entity receiving a prohibited referral from presenting, or causing to be presented, a claim or billing for the services arising out of the prohibited referral. The prohibition applies regardless of the reasons for the financial relationship and the referral; unlike the federal Anti-Kickback Statute, intent to induce referrals is not required. Sanctions for violation of the Stark Law include denial of payment for claims for services provided in violation of the prohibition, refunds of amounts collected in violation of the prohibition, a civil penalty of up to $15,000 for each service arising out of the prohibited referral, a civil penalty of up to $100,000 against parties that enter into a scheme to circumvent the Stark Law prohibition, civil assessment of up to three times the amount claimed, and potential exclusion from the federal healthcare programs, including Medicare and Medicaid. Amounts collected for prohibited claims must be reported and refunded generally within 60 days after the date on which the overpayment was identified. Furthermore, Stark Law violations and failure to return overpayments timely can form the basis for FCA liability as discussed below.

The definition of DHS under the Stark Law excludes services paid under a composite rate, even if some of the components bundled in the composite rate are DHS, unless the DHS services are themselves payable through a composite rate. Although the ESRD bundled payment system is no longer titled a composite rate, we believe that the former composite rate payment system and the current bundled system are both composite systems excluded from the Stark Law. Since most services furnished to Medicare beneficiaries provided in our dialysis centers are reimbursed through a composite or bundled rate, the services performed in our facilities generally are not DHS, and the Stark Law referral prohibition does not apply to those services. Likewise, the definition of inpatient hospital services, for purposes of the Stark Law, also excludes inpatient dialysis performed in hospitals that are not certified to provide ESRD services. Consequently, our arrangements with such hospitals for the provision of dialysis services to hospital inpatients do not trigger the Stark Law referral prohibition.

In addition, although prescription drugs are DHS, there is an exception in the Stark Law for EPO and other specifically enumerated dialysis drugs when furnished in or by an ESRD facility such that the arrangement for the furnishing of the drugs does not violate the federal Anti-Kickback Statute, and all billing and claims submission for the drugs does not violate any laws or regulations governing billing or claims submission. The exception is available only for drugs included on a list of Current Procedural Terminology/Healthcare Common Procedure Coding System (CPT/HCPCS) codes published by CMS, and for EPO, Aranesp® and equivalent drugs dispensed by the ESRD facility for use at home. While we believe that most drugs furnished by our dialysis centers are covered by the exception, dialysis centers may administer drugs that are not on the list of CPT/HCPCS codes and therefore do not meet this exception. In order for a physician who has a financial relationship with a dialysis center to order one of these drugs from the center and for the center to obtain Medicare reimbursement, another exception must apply.

We have entered into several types of financial relationships with referring physicians, including compensation arrangements. If an arrangement does not meet a Stark Law exception, we could in the future be required to change our practices, face civil penalties, pay substantial fines, return certain payments received from Medicare and beneficiaries or otherwise experience a material adverse effect as a result of a challenge to payments made pursuant to referrals from these physicians under the Stark Law.

Medical Director Agreements. We believe that our medical director agreements satisfy the personal services arrangement exception to the Stark Law. While we believe that the compensation provisions included in our medical director agreements are the result of arm's length negotiations and result in fair market value payments for medical director services, an enforcement agency could nevertheless challenge the level of compensation that we pay our medical directors.

Lease Agreements. Some of our dialysis centers are leased from entities in which referring physicians hold interests and we sublease space to referring physicians at some of our dialysis centers. The Stark Law provides an exception for lease arrangements if specific requirements are met. We believe that our leases and subleases with referring physicians satisfy the requirements for this exception.

Common Stock. Some medical directors and other referring physicians may own our common stock. We believe that these interests satisfy the Stark Law exception for investments in large publicly traded companies.

Joint Ventures. Some of our referring physicians also own equity interests in entities that operate our dialysis centers. None of the Stark Law exceptions applicable to physician ownership interests in entities to which they make DHS referrals apply to the kinds of ownership arrangements that referring physicians hold in several of our subsidiaries that operate dialysis centers. Accordingly, these dialysis centers do not bill Medicare for DHS referrals from physician owners. If the dialysis centers bill for DHS referred by physician owners, the dialysis center would be subject to the Stark Law penalties described above.

While we believe that most of our operations do not implicate the Stark Law, particularly under the ESRD bundled payment system, and that to the extent that our dialysis centers furnish DHS, they either meet an exception or do not bill for services that do not meet a Stark Law exception, if CMS determined that we have submitted claims in violation to the Stark Law, we would be subject to the penalties described above. In addition, it might be necessary to restructure existing compensation agreements with our medical directors and to repurchase or to request the sale of ownership interests in subsidiaries and partnerships held by referring physicians or, alternatively, to refuse to accept referrals for DHS from these physicians. Any such penalties and restructuring could have a material adverse effect on our operations.

Fraud and abuse under state law

Many states in which we operate dialysis centers have statutes prohibiting physicians from holding financial interests in various types of medical facilities to which they refer patients. Some of these statutes could potentially be interpreted broadly as prohibiting physicians who hold shares of our publicly traded stock from referring patients to our dialysis centers if the centers use our laboratory subsidiary to perform laboratory services for their patients. States also have laws similar to or stricter than the federal Anti-Kickback Statute that may affect our ability to receive referrals from physicians with whom we have financial relationships, such as our medical directors. Some state anti-kickback statutes also include civil and criminal penalties. Some of these statutes include exemptions that may be applicable to our medical directors and other physician relationships or for financial interests limited to shares of publicly traded stock. Some, however, include no explicit exemption for medical director services or other services for which we contract with and compensate referring physicians or for joint ownership interests of the type held by some of our referring physicians or for financial interests limited to shares of publicly traded stock. If these statutes are interpreted to apply to referring physicians with whom we contract for medical director and similar services, to referring physicians with whom we hold joint ownership interests or to physicians who hold interests in DaVita Inc. limited solely to our publicly traded stock, we may be required to terminate or restructure some or all of our relationships with or refuse referrals from these referring physicians and could be subject to criminal, civil and administrative sanctions, refund requirements and exclusions from government healthcare programs, including Medicare and Medicaid. Such events could negatively affect the decision of referring physicians to refer patients to our centers.

The False Claims Act

The federal FCA is a means of policing false bills or false requests for payment in the healthcare delivery system. In part, the FCA authorizes the imposition of up to three times the government's damages and civil penalties on any person who, among other acts:

- Knowingly presents or causes to be presented to the federal government, a false or fraudulent claim for payment or approval;
- Knowingly makes, uses or causes to be made or used, a false record or statement material to a false or fraudulent claim;
- Knowingly makes, uses, or causes to be made or used, a false record or statement material to an obligation to pay the government, or knowingly conceals or knowingly and improperly, avoids or decreases an obligation to pay or transmit money or property to the federal government; or
- Conspires to commit the above acts.

In addition, amendments to the FCA impose severe penalties for the knowing and improper retention of overpayments collected from government payors. Under these provisions, within 60 days of identifying an overpayment, a provider is required to notify CMS or the Medicare Administrative Contractor of the overpayment and the reason for it and return the overpayment. An overpayment impermissibly retained could subject us to liability under the FCA, exclusion, and penalties under the federal Civil Monetary Penalty statute. As a result of these provisions, our procedures for identifying and processing overpayments may be subject to greater scrutiny. We have made significant investments to accelerate the time it takes us to identify and process overpayments and we may be required to make additional investments in the future. Acceleration in our ability to identify and process overpayments could result in us refunding overpayments to government or other payors sooner than we have in the past. A significant acceleration of these refunds could have a material adverse effect on our operating cash flows.

The penalties for a violation of the FCA range from $5,500 to $11,000 (adjusted for inflation) for each false claim, plus up to three times the amount of damages caused by each false claim, which can be as much as the amounts received directly or indirectly from the government for each such false claim. On February 3, 2017, the DOJ issued a final rule announcing adjustments to FCA penalties, under which the per claim penalty range increases to $10,957 to $21,916 for penalties assessed after February 3, 2017, so long as the underlying conduct occurred after November 2, 2015. The federal government has used the FCA to prosecute a wide variety of alleged false claims and fraud allegedly perpetrated against Medicare and state healthcare programs, including coding errors, billing for services not rendered, the submission of false cost reports, billing for services at a higher payment rate than appropriate, billing under a comprehensive code as well as under one or more component codes included in the comprehensive code and billing for care that is not considered medically necessary. The ACA provides that claims tainted by a violation of the federal Anti-Kickback Statute are false for purposes of the FCA. Some courts have held that filing claims or failing to refund amounts collected in violation of the Stark Law can form the basis for liability under the FCA. In addition to the provisions of the FCA, which provide for civil enforcement, the federal government can use several criminal statutes to prosecute persons who are alleged to have submitted false or fraudulent claims for payment to the federal government.

Privacy and Security

The Health Insurance Portability and Accountability Act of 1996 and its implementing privacy and security regulations, as amended by the federal Health Information Technology for Economic and Clinical Health Act (HITECH Act), (collectively referred to as HIPAA), require us to provide certain protections to patients and their health information. The HIPAA privacy and security regulations extensively regulate the use and disclosure of PHI and require covered entities, which include healthcare providers, to implement and maintain administrative, physical and technical safeguards to protect the security of such information. Additional security requirements apply to electronic PHI. These regulations also provide patients with substantive rights with respect to their health information.

The HIPAA privacy and security regulations also require us to enter into written agreements with certain contractors, known as business associates, to whom they disclose PHI. Covered entities may be subject to penalties as a result of a business associate violating HIPAA if the business associate is found to be an agent of the covered entity and acting within the scope of the agency. Business associates are also directly subject to liability under the HIPAA privacy and security regulations. In instances where our centers act as a business associate to a covered entity, there is the potential for additional liability beyond the center's covered entity status.

Covered entities must report breaches of unsecured PHI to affected individuals without unreasonable delay but not to exceed 60 days of discovery of the breach by a covered entity or its agents. Notification must also be made to the HHS, and, for breaches of unsecured PHI involving more than 500 residents of a state or jurisdiction, to the media. All non-permitted uses or disclosures of

unsecured PHI are presumed to be breaches unless the covered entity or business associate establishes that there is a low probability the information has been compromised. Various state laws and regulations may also require us to notify affected individuals in the event of a data breach involving individually identifiable information without regard to whether there is a low probability of the information being compromised.

Penalties for impermissible use or disclosure of PHI were increased by the HITECH Act by imposing tiered penalties of more than $50,000 per violation and up to $1.5 million per year for identical violations. In addition, HIPAA provides for criminal penalties of up to $250,000 and ten years in prison, with the severest penalties for obtaining and disclosing PHI with the intent to sell, transfer or use such information for commercial advantage, personal gain or malicious harm. Further, state attorneys general may bring civil actions seeking either injunction or damages in response to violations of the HIPAA privacy and security regulations that threaten the privacy of state residents. We believe our HIPAA Privacy and Security Program sufficiently addresses HIPAA and state privacy law requirements.

Healthcare reform

In March 2010, broad healthcare reform legislation was enacted in the U.S. Although many of the provisions of the legislation did not take effect immediately and continue to be implemented, and some have been and may be modified before or during their implementation, the reforms could have an impact on our business in a number of ways. We cannot predict how employers, private payors or persons buying insurance might react to these changes or what form many of these regulations will take before implementation.

The law requires that all non-grandfathered individual and small group health plans sold in a state, including plans sold through the state-based exchanges created pursuant to the healthcare reform laws, cover essential health benefits (EHBs) in ten general categories. The scope of the benefits is intended to equal the scope of benefits under a typical employer plan.

In December 2011, the CMS Center for Consumer Information and Insurance Oversight published an Essential Health Benefits Bulletin (EHB Bulletin) describing the approach it was taking regarding the implementation of the EHB Bulletin requirement. For the two year transition period (from 2014 through 2015) the law required states to define an EHB benchmark plan that would set the general standards for the EHB that must be covered by plans in the state, subject to certain overarching federal requirements. States that did not define an EHB benchmark plan must use the small group plan with the largest enrollment in the state.

On February 25, 2013, for example, HHS issued the final rule governing the standards applicable to EHB benchmark plans, new definitions, actuarial value requirements and methodology, and published a list of plan benchmark options that states can use to develop EHBs. The rule describes specific coverage requirements that (i) prohibit discrimination against individuals because of pre-existing or chronic conditions on health plans applicable to EHBs, (ii) ensure network adequacy of essential health providers, and (iii) prohibit benefit designs that limit enrollment and that prohibit access to care for enrollees. Subsequent regulations relevant to the EHB have continued the benchmark plan approach for 2016 and future years and have implemented clarifications and modifications to the existing EHB regulations, including the prohibition on discrimination, network adequacy standards and other requirements. In recent years, CMS has issued an annual Notice of Benefit and Payment Parameters rulemaking and related guidance setting for standards for insurance plans provided through the exchanges.

Other aspects of the 2010 healthcare reform laws may affect our business, as well, including changes affecting the Medicare and Medicaid programs. We note, however, that the 2016 Presidential and Congressional elections have caused the future state of the exchanges and other ACA reforms to be very unclear. The Republicans, who now control the Administration and Congress, have repeatedly expressed a desire to repeal and replace the ACA. As a result, there is considerable uncertainty regarding the future with respect to the exchanges, and, indeed, many core aspects of the current health care marketplace. While specific changes and their timing are not yet apparent, it does appear likely that there will be significant changes to the healthcare environment in the near and short term. The enacted reforms as well as future legislative changes could have a material adverse effect on our results of operations, including lowering our reimbursement rates and increasing our expenses.

Other regulations

Our dialysis and related lab services operations are subject to various state hazardous waste and non-hazardous medical waste disposal laws. These laws do not classify as hazardous most of the waste produced from dialysis services. Occupational Safety and Health Administration regulations require employers to provide workers who are occupationally subject to blood or other potentially infectious materials with prescribed protections. These regulatory requirements apply to all healthcare facilities, including dialysis centers, and require employers to make a determination as to which employees may be exposed to blood or other potentially infectious materials and to have in effect a written exposure control plan. In addition, employers are required to provide or employ hepatitis B vaccinations, personal protective equipment and other safety devices, infection control training, post-exposure evaluation and follow-

up, waste disposal techniques and procedures and work practice controls. Employers are also required to comply with various record-keeping requirements. We believe that we are in material compliance with these laws and regulations.

A few states have certificate of need programs regulating the establishment or expansion of healthcare facilities, including dialysis centers. We believe that we are in material compliance with all applicable state certificate of need laws.

Capacity and location of our U.S. dialysis centers

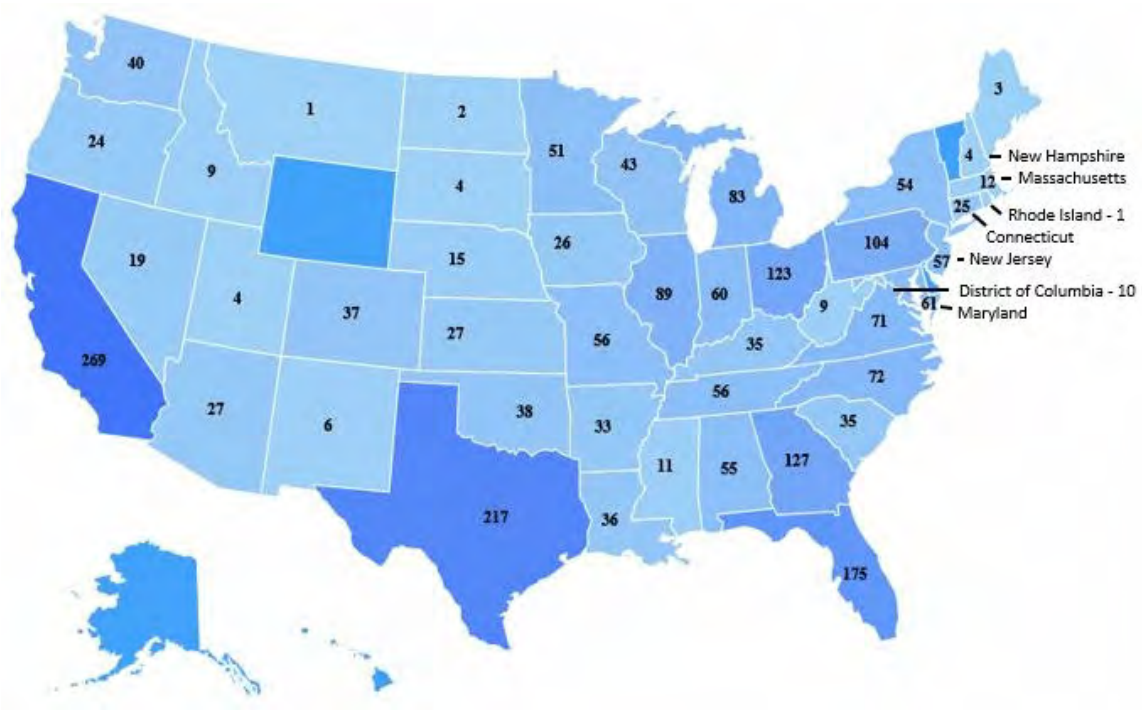
Typically we are able to increase our capacity by extending hours at our existing dialysis centers, expanding our existing dialysis centers, relocating our dialysis centers, developing new dialysis centers and by acquiring dialysis centers. The development of a typical outpatient dialysis center by us generally requires approximately $2.8 million for leasehold improvements, equipment and first-year working capital. Based on our experience, a new outpatient dialysis center typically opens within a year after the property lease is signed, normally achieves operating profitability in the second year after Medicare certification and normally reaches maturity within three to five years. Acquiring an existing outpatient dialysis center requires a substantially greater initial investment, but profitability and cash flows are generally accelerated and more predictable. To a limited extent, we enter into agreements to provide management and administrative services to outpatient dialysis centers in which we either own a noncontrolling equity investment, or are wholly-owned by third parties in return for management fees, which are typically based on a percentage of revenues or cash collections of the managed center's operations.

The table below shows the growth of our U.S. dialysis operations by number of dialysis centers.

	2016	2015	2014	2013	2012
Number of centers at beginning of year	2,251	2,179	2,074	1,954	1,809
Acquired centers	8	6	18	26	93
Developed centers	100	72	105	98	70
Net change in centers with management and administrative services agreements[1][4]	—	2	—	4	(8)
Sold and closed centers[2]	(4)	(3)	(2)	(5)	(1)
Closed centers[3]	(5)	(5)	(16)	(3)	(9)
Number of centers at end of year	2,350	2,251	2,179	2,074	1,954

(1) Represents dialysis centers in which we either own a noncontrolling equity investment, or are wholly-owned by third parties.
(2) Represents dialysis centers that were sold and/or closed for which patients were not retained.
(3) Represents dialysis centers that were closed for which the majority of patients were retained and transferred to one of our other existing outpatient dialysis centers.
(4) Includes dialysis centers in which we deconsolidated and transferred to management services agreements.

As of December 31, 2016, we operated or provided administrative services to a total of 2,350 U.S. outpatient dialysis centers. A total of 2,316 of such centers are consolidated in our financial statements. Of the remaining 34 unconsolidated U.S. outpatient dialysis centers, we own a noncontrolling interest in 27 centers and provide management and administrative services to seven centers that are wholly-owned by third parties. The locations of the 2,316 U.S. outpatient dialysis centers consolidated in our financial statements at December 31, 2016 were as follows:



Ancillary services and strategic initiatives businesses, including our international operations

As of December 31, 2016, our ancillary services and strategic initiatives consisted primarily of pharmacy services, disease management services, vascular access services, clinical research, physician services, direct primary care and our international dialysis operations and relate primarily to our core business of providing kidney care services.

Ancillary services and strategic initiatives consist primarily of the following as of December 31, 2016:

- *Pharmacy services*. DaVita Rx is a pharmacy that specializes in providing oral medications and medication management services to patients with ESRD and other chronic diseases. The main objective of the pharmacy is to improve clinical outcomes and reduce total healthcare costs by facilitating increased patient compliance and to provide our patients a convenient way to fill their prescription needs. Revenues are recognized as prescriptions are filled and shipped to patients or when services are completed.

- *Disease management services.* VillageHealth provides advanced integrated care management services to health plans and government programs for members/beneficiaries diagnosed with ESRD and/or chronic kidney failure. Through a combination of clinical coordination, innovative interventions, medical claims analysis and information technology, we endeavor to assist our customers and patients in obtaining superior renal healthcare and improved clinical outcomes, as well as helping to reduce overall medical costs. Integrated care management revenues are typically based upon an established contract fee and are recognized as earned over the contract period and can include additional fees for cost savings recognized by certain customers. VillageHealth also operates Medicare Advantage ESRD Special Needs Plans in partnership with payors that work with CMS to provide ESRD patients full service healthcare. We are at risk for all medical costs of the program in excess of the capitation payments. Furthermore, in October 2015, VillageHealth entered into a management service agreement to support three ESCO joint ventures in which we are an investor through certain wholly- or majority-owned dialysis clinics. The ESCOs were formed under the Innovation Center's CEC Model to demonstrate the coordination of care for ESRD patients in a dialysis-center oriented ACO setting. Each ESCO joint venture has a shared risk arrangement with CMS for this program.

- *Vascular access services.* Lifeline provides management and administrative services to physician-owned vascular access clinics that provide vascular services for dialysis and other patients. Lifeline is also the majority-owner of nine vascular access clinics and wholly-owns one vascular access clinic. Management fees generated from providing management and administrative services are recognized as earned typically based on a percentage of revenues or cash collections generated by the clinics. Revenues associated with the vascular access clinics that are majority-owned are recognized in the period when the services are provided.

- *Clinical research programs.* DaVita Clinical Research (DCR) is a provider-based specialty clinical research organization with a full spectrum of services for clinical drug research and device development. DCR uses its extensive, applied database and real-world healthcare experience to assist in the design, recruitment and completion of retrospective, prospective pragmatic and clinical trials. Revenues are based upon an established fee per study, as determined by contract with drug companies and other sponsors and are recognized as earned according to the contract terms.

- *Physician services.* Nephrology Practice Solutions (NPS) is an independent business that partners with physicians committed to providing outstanding clinical and integrated care to patients. NPS provides nephrologist employment opportunities in select markets and offers physician practice management services to nephrologists under administrative services agreements. These services include physician practice management, billing and collections, credentialing, coding, and other support services that enable physician practices to increase efficiency and manage their administrative needs. Fees generated from these services are recognized as earned typically based upon flat fees or cash collections generated by the physician practice. NPS also provides leading nephrology recruitment and staffing services which are billed on a per search basis.

- *Direct primary care.* Paladina Health is a healthcare services organization that operates membership-based primary care clinics mainly through employer-based on-site and near-site clinics. The clinics offer patients more personalized and improved access to primary care physicians, including unlimited visits and same-day or next-day appointments. Physicians focus on clinical outcomes and patient satisfaction. Revenues are recognized over the membership period.

International dialysis operations

As of December 31, 2016, we operated or provided administrative services to a total of 154 outpatient dialysis centers, which includes consolidated and nonconsolidated centers, located in 11 countries outside of the U.S., serving approximately 15,100 patients. Our international dialysis operations continue to grow steadily and expand as a result of developing and acquiring outpatient dialysis centers in various strategic markets. Our international operations are included as a component of our ancillary services and strategic initiatives. The table below summarizes the number and locations of our international outpatient dialysis centers.

	2016	2015	2014	2013	2012
Number of centers at beginning of year	118	91	73	36	11
Acquired centers	21	21	9	38	13
Developed and hospital operated centers	15	7	11	2	9
Managed centers, net	—	(1)	—	—	3
Closed centers	—	—	(2)	(3)	—
Number of centers at end of year	154	118	91	73	36

The locations of our international outpatient dialysis centers are as follows:

Malaysia(1)	38
Germany	34
India(1)	19
Colombia	18
Saudi Arabia	15
Poland	8
Brazil	8
Portugal	5
Taiwan(1)	5
China(1)	3
Singapore(1)	1
	154

(1) Includes centers that are operated or managed by our Asia Pacific Joint Venture (APAC JV).

Corporate Administrative Support

Corporate administrative support consists primarily of labor, benefits and long-term incentive compensation costs for departments which provide support to all of our different operating lines of business. These expenses are included in our consolidated general and administrative expenses and are partially offset by the allocation of management fees.

DaVita Medical Group (DMG) Division

DMG business overview

DMG is a patient- and physician-focused integrated healthcare delivery and management company with over two decades of experience providing coordinated, outcomes-based medical care in a cost-effective manner. As of December 31, 2016, DMG served approximately 749,300 members under its care in southern California, central and south Florida, southern Nevada and central New Mexico through capitation contracts with some of the nation's leading health plans. Of these members, approximately 305,200 individuals were patients enrolled in Medicare and Medicare Advantage, and the remaining approximately 444,100 individuals were managed care members whose health coverage is provided through their employer or who have individually acquired health coverage directly from a health plan or as a result of their eligibility for Medicaid benefits. In addition to its managed care business, during the year ended December 31, 2016, DMG provided care across all markets to over 896,200 patients whose health coverage is structured on a FFS basis, including patients enrolled through traditional Medicare and Medicaid programs, preferred provider organizations and other third party payors.

DMG patients as well as the patients of DMG's associated physicians, physician groups and IPAs benefit from an integrated approach to medical care that places the physician at the center of patient care. As of December 31, 2016, DMG delivered services to its members via a network of approximately 700 primary care physicians, over 2,500 associated group and other network primary care physicians, approximately 200 network hospitals, and several thousand associated group and network specialists. Together with hundreds of case managers, registered nurses and other care coordinators, these medical professionals utilize a comprehensive

information technology system, sophisticated risk management techniques and clinical protocols to provide high-quality, cost-effective care to DMG's members.

U.S. healthcare spending has increased steadily over the past twenty years. These increases have been driven, in part, by the aging of the baby boomer generation, lack of healthy lifestyle both in terms of exercise and diet, rapidly increasing costs in medical technology and pharmaceutical research, and provider reimbursement structures that may promote volume over quality in a FFS environment. These factors, as well as the steady growth of the U.S. population, have made the healthcare industry a growing market. In 2015, CMS reported that healthcare accounted for 17.8% of the U.S. gross domestic product and that healthcare spending increased 5.8% to reach $3.2 trillion. Medicare spending grew 4.5% to $646 billion in 2015 or 20% of National Health Expenditures, according to CMS. Medicare's share of the federal budget was 14.8% in 2015 according to the Congressional Budget Office (CBO). Medicare is frequently the focus of discussions on how to moderate the growth of both federal spending and healthcare spending in the U.S.

Growth in Medicare spending is expected to continue due to population demographics. According to the U.S. Census Bureau, the U.S. population aged 65 and over is expected to be 83.7 million in 2050 — almost double its estimated population of 43.1 million in 2012.

Medicare Advantage is an alternative to the traditional FFS Medicare program, which permits Medicare beneficiaries to receive benefits from a managed care health plan. Medicare Advantage plans contract with CMS to provide benefits that are at least comparable to those offered under the traditional FFS Medicare program in exchange for a fixed monthly premium payment per member from CMS. The monthly premium varies based on the county in which the member resides, as adjusted to reflect the plan members' demographics and the members' risk scores. Individuals who elect to participate in the Medicare Advantage program typically receive greater benefits than traditional FFS Medicare Part B beneficiaries, including additional preventive services, vision, dental and prescription drug benefits, and often have lower deductibles and co-payments than traditional FFS Medicare.

CMS pays Medicare Advantage health plans under a bidding process. Plans bid against county-level benchmarks. If a plan's bid is higher than the benchmark, enrollees pay the difference in the form of a monthly premium. If the bid is lower than the benchmark, the plan receives the difference between its payment amount and its bid as a rebate, which must be returned to enrollees in the form of additional benefits, reduced premiums, or lower cost sharing.

Managed care health plans were developed, primarily during the 1980s, in an attempt to mitigate the rising cost of providing healthcare benefits to populations covered by traditional health insurance. These managed care health plans often enroll members through their employers. As a result of the prevalence of these health plans, many seniors now becoming eligible for Medicare have been interacting with managed care companies through their employers for the last 30 years. Individuals turning 65 now are likely to be far more familiar with the managed care setting than previous Medicare populations. According to Kaiser Family Foundation, in 2016, Medicare Advantage represented 31% of total Medicare members, creating a significant opportunity for additional Medicare Advantage penetration of newly eligible seniors.

In an effort to reduce the number of uninsured and to begin to control healthcare expenditures, President Obama signed the ACA into law in March 2010, which was affirmed, in substantial part, by the U.S. Supreme Court in June 2012. As of the end of 2015, the number of uninsured nonelderly Americans was 28.5 million, a decrease of nearly 13 million since 2013. These previously uninsured Americans and potentially newly eligible Medicaid beneficiaries represent a significant new market opportunity for health plans. We believe that health plans looking to cover these newly eligible individuals under fixed premium arrangements will seek provider arrangements that can effectively manage the cost and quality of the care being provided to these newly eligible individuals, although the 2016 Presidential and Congressional elections have caused the future state of the ACA to be unclear.

One of the primary ways in which the ACA funded increased health insurance coverage is through cuts in Medicare Advantage reimbursement. County benchmarks are transitioning to a system in which each county's benchmark in 2017 will be a certain percentage (ranging from 95% to 115%) of FFS. In a March 2016 report to Congress, the Medicare Payment Advisory Commission (MedPAC) estimated that 2016 Medicare Advantage benchmarks (including the average 4% for quality bonuses), bids, and payments would average 107%, 94%, and 102% of FFS spending, respectively.

Despite the fact that the plan bids average less than FFS spending, payments for enrollees in these plans usually exceed FFS spending because the benchmarks are high relative to FFS spending. For example, health maintenance organizations (HMOs) as a group bid an average of 90% of FFS spending, yet 2016 payments for HMO enrollees are estimated to average 101% of FFS spending because the benchmarks, including the quality bonuses, average 106% of FFS spending.

Nonetheless, changes in benchmarks and/or bids that lower payments to Medicare Advantage plans could adversely affect DMG's operating results.

Many health plans recognize both the opportunity for growth from senior members as well as the potential risks and costs associated with managing additional senior members. In regions operated by DMG and numerous other markets, many health plans subcontract a significant portion of the responsibility for managing patient care to integrated medical networks such as DMG. These integrated healthcare networks, whether medical groups or IPAs, offer a comprehensive medical delivery system and sophisticated care management know-how and infrastructure to more efficiently provide for the healthcare needs of the population enrolled with that health plan. While reimbursement models for these arrangements vary around the country, health plans in California, Florida, Nevada and New Mexico often prospectively pay the integrated healthcare network a fixed Per Member Per Month (PMPM) amount, or capitation payment, which is often based on a percentage of the amount received by the health plan. The capitation payment is for much—and sometimes virtually all—of the care needs of the applicable membership. Capitation payments to integrated healthcare networks, in the aggregate, represent a prospective budget from which the network manages care-related expenses on behalf of the population enrolled with that network. To the extent that these networks manage care-related expenses under the capitated levels, the network realizes an operating profit. On the other hand, if care-related expenses exceed projected levels, the network will realize an operating deficit. Since premiums paid represent a significant amount per person, there is a significant revenue opportunity for an integrated medical network like DMG that is able to effectively manage its costs under a capitated arrangement.

Integrated medical networks, such as DMG, that have scale are positioned to spread an individual member's cost experience across a wider population and realize the benefits of pooling medical risk among large numbers of patients. In addition, integrated medical networks with years of managed care experience can utilize their sizeable medical experience data to identify specific medical care and quality management strategies and interventions for potential high cost cases and aggressively manage them to improve the health of its population base and, thus, lower cost. Many integrated medical networks, like DMG, have also established physician performance metrics that allow them to monitor quality and service outcomes achieved by participating physicians in order to reward efficient, high quality care delivered to members and initiate improvement efforts for physicians whose results can be enhanced.

Brand name

In 2016, we started the transition of the medical group brand name from HealthCare Partners (HCP) and several other names to DaVita Medical Group (DMG). The marketing plan as it relates to the transition will be a phased approach and will occur over the course of one to two years with the exception of the Washington market which is still in the planning stages. Coming together under one name is part of DMG's vision to strive to be the leading independent medical group in the U.S.

Healthcare reform

The U.S. healthcare system, including the Medicare Advantage program, is subject to a broad array of new laws and regulations as a result of the ACA. This legislation made significant changes to the Medicare program and to the health insurance market overall. The ACA is considered by some to be the most dramatic change to the U.S. healthcare system in decades. The U.S. Supreme Court found that the individual mandate to obtain health insurance coverage under this legislation is constitutional and also found that the expanded Medicaid benefit included in the legislation is constitutional if states can opt out of the expanded Medicaid benefit without losing their funding under the pre-reform Medicaid program. In a separate, subsequent case, the U.S. Supreme Court also upheld the use of subsidies to individuals in federally-facilitated healthcare exchanges, rejecting an argument that such subsidies would apply only in the state-run healthcare exchanges.

The ACA reflects sweeping legislation that, once fully implemented, may have a significant impact on the U.S. healthcare system generally and the operations of DMG's business. There are numerous steps required to implement the ACA, and implementation remains ongoing. Congress also has enacted, and may continue to seek, legislative changes that alter, delay, or eliminate some of their provisions. For example, under the 2016 Omnibus budget agreement, Congress voted to delay certain new taxes that the ACA had enacted, including the excise tax on certain high-cost health plans, the medical device tax, and the tax on health insurers. In addition, the 2016 Presidential and Congressional elections have caused the future state of the ACA to be unclear. While specific changes and their timing are not yet apparent, the enacted reforms as well as future legislative changes could have a material adverse effect on our results of operations, including lowering our reimbursement rates and increasing our expenses.

One provision of the ACA required CMS to establish a Medicare Shared Savings Program (MSSP) that promotes accountability and coordination of care through the creation of ACOs. The program allows certain providers and suppliers (including hospitals, physicians and other designated professionals) to voluntarily form ACOs and work together along with other ACO participants to invest in infrastructure and redesign delivery processes to achieve high quality and efficient delivery of services. In 2014, DMG entered into an agreement with CMS to participate in the MSSP in California, Florida and Nevada. Under this program, which ran through 2016, DMG strove to attain improved clinical outcomes to its Medicare FFS patients in a more cost-effective manner, and had the opportunity to share with CMS in any financial savings created. To date, DMG has not received a shared savings payment associated with this program, with one final measurement period still remaining. As part of our commitment to the Medicare ACO space, DMG applied for and was selected to participate in the CMS Innovation Center's Next Generation ACO in our California market, which begins in 2017.

Payor environment

Government programs

DMG derives a significant portion of its revenues from services rendered to beneficiaries of Medicare (including Medicare Advantage), Medicaid, and other governmental healthcare programs.

Medicare. The Medicare program was established in 1965 and became effective in 1967 as a federally funded U.S. health insurance program for persons aged 65 and older, and it was later expanded to include individuals with ESRD and certain disabled persons, regardless of income or age. Since its formation, Medicare has grown to an approximately $646 billion program in 2015, covering approximately 57 million Americans and, based on the growing number of eligible beneficiaries and increases in the cost of healthcare, CBO projects that net Medicare spending will increase from $592 billion in 2016 to $1.1 trillion in 2026.

Initially, Medicare was offered only on a FFS basis. Under the Medicare FFS payment system, an individual can choose any licensed physician enrolled in Medicare and use the services of any hospital, healthcare provider or facility certified by Medicare. CMS reimburses providers for covered services if CMS considers them medically necessary.

FFS Medicare pays for physician services according to a physician fee schedule (PFS) set each year by CMS in accordance with formulas mandated by Congress. Historically, CMS annually adjusted the Medicare Physician Fee Schedule (Medicare PFS) payment rates based on an updated formula that included application of the Sustainable Growth Rate (SGR). On April 16, 2015, President Obama signed and enacted into law H.R. 2, the Medicare Access and CHIP Reauthorization Act of 2015, which, among other things, repealed the SGR and instituted a 0% update to the single conversion factor under the Medicare PFS from January 1 through June 30, 2015, a 0.5% update for July 2015 through the end of 2019, and a 0% update for 2020 through 2025. For 2026 and subsequent years, the update will be either 0.75% or 0.25%, depending on which Alternate Payment Model (APM) the physician participates. On October 14, 2016, CMS released a final rule implementing, among other changes, the Advanced APM incentive applicable to the physician fee schedule, under which physicians may receive bonus payments for participating in an Advanced APM. Among other things, the final rule identifies the criteria an APM must satisfy to be considered an Advanced APM, which could include some MSSP ACOs or providers participating in the CEC Model. Whether DMG's subsidiary ACO or dialysis providers participating in CEC are considered to be Advanced APMs could potentially affect physicians' willingness to participate in such entities, which may indirectly impact the operations of DMG's subsidiary ACO or its providers participating in the CEC Model. In addition, under the final rule, DMG's subsidiary ACO may also be required to submit certain quality data to CMS on behalf of its Merit-Based Incentive Payment System MIPS-eligible clinicians, which could result in an increase in operational costs. Given that the payment updates for APMs have yet to take effect, we cannot determine the impact of such payment models on our business at this time.

In addition, in recent years, Congress has enacted various laws seeking to reduce the federal debt level and contain healthcare expenditures. For example, the BCA called for the establishment of a Joint Select Committee (the Committee) on Deficit Reduction, tasked with reducing the federal debt level. However, because the Committee did not draft a proposal by the BCA's deadline, President Obama issued an initial sequestration order that imposed automatic spending cuts on various federal programs. In particular, a 2% reduction to Medicare payments took effect on April 1, 2013, which was subsequently extended through 2025.

The instability of the federal budget may lead to legislation that could result in further cuts in Medicare and Medicaid payments to providers. In recent years, the government has enacted a patchwork of appropriations legislation to temporarily suspend the debt ceiling and continue government operations. The Medicare program is frequently mentioned as a target for spending cuts. Spending cuts to the Medicare program could adversely affect our operating results.

Medicare Advantage. Medicare Advantage is a Medicare health plan program developed and administered by CMS as an alternative to the original FFS Medicare program. Under the Medicare Advantage program, Medicare beneficiaries may choose to receive benefits under a managed care health plan that provides benefits at least comparable to those offered under the original Medicare FFS payment system in exchange for which the health plan receives a monthly per patient premium payment from CMS. The Medicare Advantage monthly premium varies based on the county in which the member resides, and is adjusted to reflect the demographics and estimated risk profile of the members that enroll. Once a person is authorized by CMS to participate in Medicare Advantage, health plans compete for enrollment based on benefit design differences such as co-payments or deductibles, availability of preventive care, attractiveness of and access to a network of hospitals, physicians and ancillary providers and premium contribution or, most often in Medicare Advantage plans, the absence of any monthly premium. In certain parts of the country, many health plans that provide Medicare Advantage benefits subcontract with integrated medical networks such as DMG to transfer the responsibility for managing patient care.

In 2004, CMS adopted a risk adjustment payment system for Medicare Advantage health plans in which the participating health plans' premiums are adjusted based on the actual illness burden of the members that enroll. The model bases a portion of the total CMS reimbursement payments on various clinical and demographic factors, including hospital inpatient diagnoses, additional

diagnosis data from ambulatory treatment settings, hospital outpatient department and physician visits, gender, age and Medicaid eligibility. CMS requires that all managed care companies capture, collect and submit the necessary diagnosis code information to CMS twice a year for reconciliation with CMS's internal database. Medical providers, such as DMG, provide this diagnosis code information to health plan customers for submission to CMS. Under this system, the risk-adjusted portion of the total CMS payment to the Medicare Advantage plans will equal the local rate set forth in the traditional demographic rate book, adjusted to reflect the plan members' gender, age and morbidity.

Most Medicare beneficiaries have the option to enroll in private health insurance plans that contract with Medicare under the Medicare Advantage program. According to the Kaiser Family Foundation, the share of Medicare beneficiaries in such plans has risen rapidly in recent years; it reached approximately 31% in 2016 from approximately 13% in 2004. Plan costs for the standard benefit package can be significantly lower or higher than the corresponding cost for beneficiaries in the traditional Medicare FFS payment program, but prior to the ACA, private plans were generally paid a higher average amount, and they used the additional payments to reduce enrollee cost-sharing requirements, provide extra benefits, and/or reduce Medicare premiums. These enhancements were valuable to enrollees, but also resulted in higher Medicare costs overall and higher premiums for all Medicare Part B beneficiaries and not just those enrolled in Medicare Advantage plans. The ACA requires that future payments to plans be based on benchmarks in a range of 95% to 115% of local FFS Medicare costs, with bonus amounts payable to plans meeting high quality-of-care standards. In addition, health plans offering Medicare Advantage are required to spend at least 85% of their premium dollars on medical care, the so-called medical loss ratio (MLR). Since DMG is not a health plan, except for DaVita Health Plan of California, Inc. (DHPC), it is not subject to the 85% MLR requirement. See "DaVita Medical Group Division (DMG)—Knox-Keene" below. However, payments that health plans make to DMG will apply in full towards the health plans' 85% MLR requirement. If a health plan does not meet the 85% MLR requirement, it must provide a rebate to its customers. Any such shortfalls would not impact amounts paid by health plans to DMG.

Medicaid. Medicaid is a federal entitlement program administered by the states that provides healthcare and long-term care services and support to low-income Americans. Medicaid is funded jointly by the states and the federal government. The federal government guarantees matching funds to states for qualifying Medicaid expenditures based on each state's federal medical assistance percentage, which is calculated annually and varies inversely with average personal income in the state. Subject to federal rules, each state establishes its own eligibility standards, benefit packages, payment rates and program administration within broad federal statutory and regulatory guidelines. Every state Medicaid program must balance a number of potentially competing demands, including the need for quality care, adequate provider access, and cost-effectiveness. In an effort to improve quality and provide more uniform and cost-effective care, many states have implemented Medicaid managed care programs to improve access to coordinated healthcare services, including preventative care, and to control healthcare costs. Under Medicaid managed care programs, a health plan receives capitation payments from the state. The health plan, in turn, arranges for the provision of healthcare services by contracting with a network of medical providers, such as DMG. DMG has entered into capitation agreements with health plans to manage approximately 105,800 Medicaid managed care members in its southern California market.

Commercial payors

According to the 2016 Annual Survey conducted by the Kaiser Family Foundation, approximately 150 million non-elderly people in the U.S. received their health insurance through their employers, which contracted with health plans to administer these healthcare benefits. Patients enrolled in health plans offered through an employment setting are generally referred to as commercial members. According to the survey, the percentage of workers covered was 55% in 2016, similar to the 56% covered in 2015. Under the ACA, many uninsured individuals and many individuals who receive their health insurance benefits through small employers may purchase their healthcare benefits through insurance exchanges in which health plans compete directly for individual or small group members' enrollment. DMG derives a significant amount of its enrollment from commercial members; however, these members represent a disproportionately small share of DMG's operating profits.

Whether in the Medicare Advantage, commercial or Medicaid market, managed care health plans seek to provide a coordinated and efficient approach to managing the healthcare needs of their enrolled populations. By negotiating with providers, such as pharmacies, hospitals and physicians, and implementing various quality programs, managed care companies attempt to enhance their profitability by limiting their medical costs. These health plans have shown success in mitigating certain components of medical cost, but we believe they are limited by their indirect relationship with physicians, who in the aggregate direct most of their patients' healthcare costs. We believe that physician-led and professionally-managed integrated medical networks such as DMG's have a greater opportunity to influence cost and improve quality due to the close coordination of care at the most effective point of contact with the patient—the primary care physician.

Capitation and FFS revenue

There are a number of different models under which an integrated medical network receives payment for managing and providing healthcare services to its members.

Fee-for-service structure. Under traditional FFS reimbursement, physicians are paid a specified FFS that they provide during a patient visit. Under this structure, physician compensation is based on the volume of patient visits and procedures performed, thus offering limited financial incentive to focus on cost containment and preventative care. FFS revenues are derived primarily from DMG's physician services.

Capitation structure. Under capitation, payors pay a fixed amount per enrolled member, thereby subcontracting a significant portion of the responsibility and risks for managing patient care to physicians. Global capitation represents a prospective budget from which the provider network then manages care-related expenses including payments to associated providers outside the group, such as hospitals and specialists. Compared to traditional FFS models, we believe that capitation arrangements better align provider incentives with both quality and efficiency of care for a population of patients. We believe that this approach improves the quality of the experience for patients and the potential profitability for efficient care providers.

Since premiums paid represent a significant amount per person, the revenue and, when costs are effectively managed, profit opportunity available to an integrated medical network under a capitated arrangement can be significant. This is particularly the case for patients with multiple diseases and senior members. We believe that the advantages, savings and efficiencies made possible by the capitated model are most pronounced when the care demands of the population are the most severe and require the most coordination, such as for the senior population or patients with chronic, complex and follow-on diseases. While organized coordination of care is central to the capitated model, it is also well suited to the implementation of preventative care and disease management over the long-term since physicians have a financial incentive to improve the overall health of their patient population.

The inherent risk in assumption of global care risk relates to potential losses if a number of individual patients' medical costs exceed the expected amount. This risk is especially significant to individual practitioners or smaller physician groups who lack the scale required to spread the risk over a broad population. DMG has the scale, comprehensive medical delivery resources, significant infrastructure to support practicing physicians, and demonstrated care management know-how to spread the risk of losses over a large patient population.

Global model. In Florida, DMG may contract directly with health plans under global capitation arrangements that include hospital services, because state law permits DMG to assume financial responsibility for both professional and institutional services. In New Mexico, DMG assumed financial responsibility for professional services only.

In Nevada, DMG enters into global capitation arrangements to assume financial responsibility for both professional and institutional services. However, the Nevada Division of Insurance (NDI) has not opined on whether it is appropriate for an entity like DMG to enter into global capitation arrangements and assume financial responsibility for the provision of both professional and institutional services to either Medicare Advantage enrollees or enrollees of commercial health plans. In order to avoid an adverse finding by the NDI with respect to DMG's global capitation arrangements in Nevada, DMG applied for an insurance license from the NDI and obtained the license in 2015. DMG is currently evaluating its ability to assign any of its existing contracts to the NDI license holder. Because of the current global capitation to DMG, and DMG's assumption of nearly the entire professional and institutional risk in Nevada and Florida, DMG's health plan customers function primarily to support DMG in undertaking marketing and sales efforts to enroll members and processing claims in these states.

In California, entities that maintain full or restricted licenses under the California Knox-Keene Health Care Service Plan Act of 1975 (Knox-Keene) are permitted to assume financial responsibility for both professional and institutional services. As described below, in December 2013, DMG obtained a restricted Knox-Keene license and therefore may enter into global capitation arrangements with health plans through which DMG will assume financial responsibility for both professional and institutional services.

Risk-sharing model. In California, DMG currently utilizes a capitation model in several different forms. While there are variations specific to each arrangement, HealthCare Partners Affiliates Medical Group and DaVita Medical Group Associates California, Inc. (collectively AMG), which are medical groups that have entered into management services agreements with DMG, have historically contracted with health plans to receive a PMPM or percentage of premium (POP) capitation payment for professional (physician) services and assumed the financial responsibility for professional services. In some cases, the health plans separately enter into capitation contracts with third parties (typically hospitals) who directly receive a capitation payment and assume contractual financial responsibility for institutional (hospital) services. In other cases, the health plan does not pay a capitation payment to the hospital, but rather administers and pays fee-for-service claims for hospital expenses. In both cases, AMG has been responsible under its health plan agreements for managing the care dollars associated with both the professional and institutional services provided for in the AMG capitation payment. In the case of institutional services and as a result of its managed care-related administrative services agreements with hospitals, AMG has recognized a percentage of the surplus of institutional revenues less institutional expense as AMG net revenues and has also been responsible for some percentage of any short-fall in the event that institutional expenses exceed institutional revenues. In connection with DMG's obtaining a restricted Knox-Keene license in California, substantially all of the California health plan contracts, along with the revenues received under such contracts, have been assigned from AMG to DHPC. In

addition, DMG now has the legal authority to transition these health plan contracts to global capitation arrangements in which DMG is responsible for arranging professional and institutional services in exchange for a single capitation payment. DMG has evaluated its various risk sharing arrangements, and is working with the Department of Managed Health Care and several health plans to accept global capitation. DMG has converted three separate contracts covering approximately 3% of total DHPC membership to global risk and is in the approval and implementation process to convert additional contracts to global risk in 2017. Completion of evaluation of possible additional conversions is expected to continue over time.

Government regulation

In addition to the laws and regulations to which our dialysis and related lab services business are subject to, the internal operations of DMG and its contractual relationships with healthcare providers such as hospitals, other healthcare facilities, and healthcare professionals are subject to extensive and increasing regulation by numerous federal, state, and local government entities. These laws and regulations often are interpreted broadly and enforced aggressively by multiple government agencies, including the OIG, the DOJ, and various state authorities. Many of these laws and regulations are the same as those that impact our dialysis and related lab services business. For example:

- DMG's financial relationships with healthcare providers including physicians and hospitals could subject DMG to criminal and civil sanctions and penalties under the federal Anti-Kickback Statute;
- The referral of Medicare patients by DMG-associated physicians for the provision of DHS may subject the parties to sanctions and penalties under the Stark Law;
- DMG's financial relationships and those of its associated physicians may subject the parties to penalties and sanctions under state fraud and abuse laws;
- DMG's submission of claims to governmental payors such as the Medicare and Medicaid programs for services provided by its associated physicians and clinical personnel may subject DMG to sanction and penalties under the FCA; and
- DMG's handling of PHI may subject DMG to sanctions and penalties under HIPAA and its implementing privacy and security regulations, as amended by the HITECH Act, and state medical privacy laws which can include penalties and restrictions that are more severe than those which arise under HIPAA.

A finding that claims for services were not covered or not payable, or the imposition of sanctions associated with a violation of any of these healthcare laws and regulations, could result in criminal and/or civil penalties and exclusion from participation in Medicare, Medicaid and other federal and state healthcare programs and could have a material adverse effect on DMG's business, financial condition and results of operations. We cannot guarantee that the arrangements or business practices of DMG will not be subject to government scrutiny or be found to violate certain healthcare laws. Government audits, investigations and prosecutions, even if we are ultimately found to be without fault, can be costly and disruptive to DMG's business. Moreover, changes in healthcare legislation or government regulation may restrict DMG's existing operations, limit their expansion or impose additional compliance requirements and costs, any of which could have a material adverse effect on DMG's business, financial condition and results of operations.

The following includes brief descriptions of some, but not all, of the laws and regulations that, in addition to those described in relation to our dialysis and related lab services business, affect DMG. DMG is also subject to the laws and regulations that apply to our U.S. dialysis and related lab services business. See "Kidney Care Division—Government regulation" above.

Licensing, certification, accreditation and related laws and guidelines. DMG clinical personnel are subject to numerous federal, state and local laws and regulations, relating to, among other things, licensing, professional credentialing and professional ethics. Since DMG clinical personnel perform services in medical office settings, hospitals and other types of healthcare facilities, DMG may indirectly be subject to laws applicable to those entities as well as ethical guidelines and operating standards of professional trade associations and private accreditation commissions, such as the American Medical Association and the Joint Commission. There are penalties for non-compliance with these laws, including discipline or loss of professional license, civil and/or criminal fines and penalties, loss of hospital admitting privileges, federal healthcare program disenrollment, loss of billing privileges, and exclusion from participation in various governmental and other third-party healthcare programs.

Professional licensing requirements. DMG's clinical personnel, including physicians, must satisfy and maintain their professional licensing in the states where they practice medicine. Activities that qualify as professional misconduct under state law may subject them to sanctions, including the loss of their licenses and could subject DMG to sanctions as well. Many state boards of medicine impose reciprocal discipline, that is, if a physician is disciplined for having committed professional misconduct in one state where he or she is licensed, another state where he or she is also licensed may impose the same discipline even though the conduct did

not occur in that state. Therefore, if a DMG-associated physician is licensed in multiple states, sanctions or loss of licensure in one state may result in sanction or the loss of licensure in other states. Professional licensing sanctions may also result in exclusion from participation in governmental healthcare programs, such as Medicare and Medicaid, as well as other third-party programs.

Corporate practice of medicine and fee splitting. California, Colorado, Nevada, and Washington are states in which DMG operates that have laws that prohibit business entities, such as our Company and our subsidiaries, from practicing medicine, employing physicians to practice medicine or exercising control over medical decisions by physicians (known collectively as the corporate practice of medicine). These states also prohibit entities from engaging in certain financial arrangements, such as fee-splitting, with physicians. In some states these prohibitions are expressly stated in a statute or regulation, while in other states the prohibition is a matter of judicial or regulatory interpretation.

Violations of the corporate practice of medicine vary by state and may result in physicians being subject to disciplinary action, as well as to forfeiture of revenues from payors for services rendered. For lay entities, violations may also bring both civil and, in more extreme cases, criminal liability for engaging in medical practice without a license.

In California, a violation of the corporate practice of medicine prohibition constitutes the unlawful practice of medicine, which is a public offense punishable by fines and other criminal penalties. In addition, any person who conspires with or aids and abets another in the unlawful practice of medicine is similarly guilty of a public offense and may be subject to comparable fines and criminal penalties. In Nevada, engaging in the corporate practice of medicine where not provided by a specific statute may also constitute the unlawful practice of medicine. This violation is a felony punishable by fines and other civil and criminal penalties. Physicians in Nevada can similarly be punished for aiding or assisting in the unlicensed practice of medicine.

In Colorado, any physician found to have abetted or assisted or conspired to engage in unprofessional conduct with respect to the practice of medicine is subject to disciplinary action, including the loss of licensure. Corporate entities or lay persons who are found to have engaged in the unauthorized practice of medicine may be subject to injunctive action and other criminal penalties. In Washington, the Secretary of Health is responsible for investigating complaints concerning the unlicensed practice of medicine and violations may be subject to a cease and desist order, civil fines, injunctive action, and other criminal penalties. In our markets where the corporate practice of medicine is prohibited, DMG has historically operated by maintaining long-term management contracts with multiple associated professional organizations which, in turn, employ or contract with physicians to provide those professional medical services required by the enrollees of the payors with which the professional organizations contract. Under these management agreements, DMG performs only non-medical administrative services, does not represent that it offers medical services, and does not exercise influence or control over the practice of medicine by the physicians or the associated physician groups with which it contracts. For example, in California, DMG has full-service management contracts with AMG. The AMG entities are owned by California-licensed physicians and professional medical corporations and contract with physicians to provide professional medical services. In Nevada and Washington, DMG's Nevada and Washington subsidiaries have similar management agreements with Nevada and Washington professional corporations, as applicable, that employ and contract with physicians to provide professional medical services. In Colorado, the physician groups contract through a provider network to include a pharmacy and ambulatory surgery center.

Some of the relevant laws, regulations, and agency interpretations in states with corporate practice of medicine restrictions have been subject to limited judicial and regulatory interpretation. Moreover, state laws are subject to change. Regulatory authorities and other parties, including DMG's associated physicians, may assert that, despite the management agreements and other arrangements through which DMG operates, we are engaged in the prohibited corporate practice of medicine or that DMG's arrangements constitute unlawful fee-splitting. If this were to occur, we could be subject to civil and/or criminal penalties, DMG's agreements could be found legally invalid and unenforceable (in whole or in part), or we could be required to restructure its contractual arrangements.

If we were required to restructure DMG's operating structures in our markets due to determination that a corporate practice of medicine violation existed, such a restructuring might include revisions of the California, Colorado, Nevada or Washington management services agreements, which might include a modification of the management fee, and/or establishing an alternative structure. For example, our subsidiaries in those states might have to obtain the equivalent of a California Knox-Keene license in such state in order to comply with the corporate practice of medicine rules while contracting directly with payors and, in turn, physicians, to provide physician services to the payors' enrollees. In California, DMG's restricted Knox-Keene license has created potential flexibility for DMG in the event regulatory authorities seek to enforce corporate practice of medicine or fee splitting laws based upon current management services relationships with AMG. DMG's restricted Knox-Keene license allows DHPC to contract with or employ physicians as a result of an exemption from California's corporate practice of medicine laws applicable to Knox-Keene licensees.

Knox-Keene. The California Department of Managed Health Care (DMHC) licenses and regulates Health Care Service Plans (HCSPs) pursuant to the Knox-Keene Health Care Service Plan Act of 1975, as amended. In addition to regulating Knox-Keene's various patient's rights protections for HCSP-enrolled individuals, the DMHC is responsible for ensuring the financial sustainability over time of HCSPs and other regulated entities. As such, the DMHC is charged with continually monitoring the financial health of

regulated entities. The DMHC's Division of Financial Oversight conducts examinations of the fiscal and administrative affairs of licensed HCSPs to protect consumers and providers from potential insolvencies. Financial examination reviews include examinations of cash flow, premium receivables, intercompany transactions and medical liabilities. The examination also ensures that there is adequate tangible net equity (TNE), as determined according to calculations included in Knox-Keene. The TNE regulations for organizations holding a Knox-Keene license, like DMG, vary depending on circumstances, but generally require any licensee to have on hand in cash or cash equivalents a minimum of the greater of (i) $1 million, (ii) the sum of 2% of the first $150 million of annualized premium revenues plus 1% of annualized premium revenues in excess of $150 million, or (iii) the sum of 8% of the first $150 million of annualized healthcare expenditures (except those paid on a capitated basis or managed hospital payment basis) plus 4% of the annualized healthcare expenditures, except those paid on a capitated basis or managed hospital payment basis, which are in excess of $150 million; plus 4% of annualized hospital expenditures paid on a managed hospital payment basis. In its sole discretion, the DMHC may require, as a condition to obtaining or maintaining an HCSP license, that a licensee accept certain contractual undertakings such that the licensee is obligated to maintain TNE in amounts greater than the minimum amount described above. Such contractual undertakings may require 130% or more of TNE to be maintained by a licensee. During the 2016 financial examination, DaVita Health Plan of California, Inc. (DHPC, formerly known as DaVita HealthCare Partners Plan, Inc.) was required to provide evidence of exclusive fidelity bond coverage in the amount of at least $2 million, with a deductible amount not in excess of $100,000 with a requirement to notify the Director of DMHC 30 days prior to cancellation.

The DMHC interprets Knox-Keene to apply to both HCSPs and downstream contracting entities, including provider groups that enter into global risk contracts with licensed HCSPs. A global risk contract is a healthcare services contract in which a downstream contracting entity agrees to provide both professional (physician) services and institutional (hospital) services subject to an at-risk or capitated reimbursement methodology. According to the DMHC, entities that accept global risk must obtain a restricted Knox-Keene license. Under a restricted Knox-Keene license, entities may enter into global risk contracts with other licensed HCSPs. Holders of restricted Knox-Keene licenses must comply with the same financial requirements as HCSPs with full licenses, including demonstrating specific levels of TNE, but are granted waivers from meeting marketing and other terms of full Knox-Keene licensure requirements. The consequences of operating without a license include civil penalties, criminal penalties and the issuance of cease and desist orders.

DHPC holds a restricted Knox-Keene license, which was approved by the DMHC on December 31, 2013. This allows DMG, under its DHPC plan to contract directly with HCSPs to simplify its historic contractual and financial structure and to facilitate expansion into new markets in California. However, this also subjects DMG and DHPC to additional regulatory obligations, including (i) regulatory oversight of operations, (ii) the need to seek approval for all material business changes, (iii) significant requirements to maintain certain TNE levels, and (iv) other operating limitations imposed by Knox-Keene and its regulations. Under its restricted Knox-Keene license, DHPC is prohibited from declaring or paying any dividends or making any distribution of cash or property to its parent, affiliates, or shareholders, if such a distribution would cause it to fail to maintain the minimum applicable TNE, have insufficient working capital or cash flow as required by DMHC regulation or otherwise be unable to provide or arrange healthcare services. In addition, DHPC is subject to DMHC oversight and must seek approval before incurring any debt or guaranteeing any debt relating to its parent, affiliates, or shareholders. DHPC must also submit proposed global capitation contracts to the DMHC for approval.

DMG services

Approximately 83% of DMG's operating revenues for the year ended December 31, 2016 were derived from multi-year capitation contracts with health plans. Under these contracts, DMG's health plan customers delegate full responsibility for member care to physicians and healthcare facilities that are part of DMG's provider network. In return, DMG receives a PMPM fee for each DMG member. As a result, DMG has financial and clinical accountability for a population of members. In California, DMG does not assume direct financial risk for institutional (hospital) services in most cases, but is responsible for managing the care dollars associated with both the professional (physician) and institutional services being provided for the PMPM fee attributable to both professional and institutional services. In those cases and as a result of its managed care-related administrative services agreements with hospitals, DMG recognizes the surplus of institutional revenues less institutional expense as DMG net revenues and is also responsible for any short-fall in the event that institutional expenses exceed institutional revenues. In addition to revenues recognized for financial reporting purposes, DMG measures its total care dollars under management. This includes the PMPM fee payable to third parties for institutional (hospital) services where DMG manages the care provided to its members by hospitals and other institutional services. These fees are not included in generally accepted accounting principles (GAAP) revenues.

DMG provides comprehensive and quality medical care through a network of participating physicians and other healthcare professionals. Through its group model, DMG employs, directly (where permitted by state law) and through its associated physician groups, approximately 700 primary care physicians. Through its IPA model, DMG contracts with a network of over 2,500 associated groups and other network primary care physicians who provide care for DMG's members in an independent office setting. These physicians are complemented by several thousand network specialists and approximately 200 network hospitals that provide specialty or institutional care to the patients of DMG's associated physicians, physician groups and IPAs.

In order to comply with local regulations prohibiting the corporate practice of medicine, many of DMG's group physicians are employed by associated medical groups with which DMG has entered into long-term management agreements. The largest of these DMG managed medical groups is AMG, which employs, directly or indirectly, over 700 primary care physicians, specialists and hospitalists. See "Government Regulation—Corporate practice of medicine and fee splitting" above.

DMG does not own hospitals, although hospitals are an essential part of its provider network. In most cases, DMG contracts or otherwise aligns with hospitals to manage the utilization, readmission and cost of hospital services. Most DMG patients receive specialty care through DMG's network based on referrals made by their primary care physician. These specialists may be reimbursed based on capitation, case rates or on a discounted FFS rate.

DMG group physicians typically see 15 to 20 patients per day, which we believe is an appropriate benchmark to ensure there is sufficient time to understand all of the patients' clinical needs. DMG care teams, including nurses, engage in outreach to patients in order help monitor fragile and high risk patients, and help improve adherence to physicians' care plans. During these visits, DMG's physicians, nurses and educators use the time to educate patients and manage their healthcare needs. The goal of this preventative care delivery model is to keep patients healthy. Education improves self-management and compliance which allows the patient to recognize early signs of their disease and seek appropriate care. We believe this translates into earlier intervention, which in turn leads to fewer emergency room visits, fewer hospital admissions and fewer hospital bed days (the most expensive location for healthcare). This clinical model seeks to provide early diagnosis of disease or deterioration in a chronic and complex condition and provide preventive care to maintain optimal health and avert unnecessary hospitalization. Clinic-based case managers and hospitalists coordinate with the primary care physicians to ensure that patients are receiving proper care whether they are in the clinic, in the hospital or are not regularly accessing healthcare. Physicians and case managers encourage patients to regularly visit the clinics in order to enhance their day-to-day health and diagnose any illness or deterioration in condition as early as possible.

DMG's information technology system, including DMG's electronic health record and data warehouse, is designed to support the DMG delivery model with data-driven opportunities to improve the quality and cost effectiveness of the care received by its members. Using informatics technology, DMG has created disease registries that track large numbers of patients with defined medical conditions. DMG applies the data from these registries to manage the care for patients with similar medical conditions which we believe leads to a better medical outcome. We believe this approach to using data is effective because the information is communicated by the patient's physician rather than the health plan or disease management companies.

DMG employs a wide variety of other information applications to service IPA and network providers using web connectivity. The HCP Connect! on-line portal provides web-based eligibility, referrals, electronic claims submission and explanation of benefits, and other communication vehicles for individual physician offices. The success of this suite of applications has enhanced DMG's ability to manage its IPA networks, and has resulted in significant back-office efficiencies for DMG and its associated physician groups. DMG has further expanded its ability to share key utilization and clinical data with its internal and contracted physicians and specialists through the Physician Information Portal and the Clinical Viewer. Through these secure web portals, a physician is able to obtain web-based, point of care information regarding a patient, including diagnosis history, provide quality indicators, historical risk-adjustment coding information, pharmacy medication history, and other key information. In addition to its web-portals geared towards physicians, DMG has recently introduced a patient on-line portal to enable DMG's patients to securely view their own clinical information, schedule physician appointments and interact electronically with their physicians. DMG believes these tools help lead to high quality clinical outcomes, create internal efficiencies, and enhance the satisfaction of its associated physicians and patients.

In addition, DMG uses its data to carefully track high utilizing patients through robust data warehousing and data mining technologies. DMG filters the data warehouse to identify and reach out to patients with high-utilization patterns who are inefficiently using resources, such as visiting an emergency room when either a same-day appointment or urgent care center would be more appropriate and satisfactory for the member. High utilizing patients are identified and tracked as part of DMG's electronic health record by their physician and DMG's care management staff. Specific care plans are attached to each of these patients and tracked carefully for full compliance. The objective is to proactively manage their care at times when these patients are either not compliant with the care plan or when changing circumstances require care managers to develop new and more suitable care plans. By using these resources, DMG has achieved improvements in quality of care, satisfaction and cost.

We believe DMG is well positioned to effectively leverage marketplace demands for greater provider accountability, measurable quality results and cost efficient medical care. We believe that DMG's business model is likely to continue to be an attractive alternative for health plans looking for high quality, cost effective delivery networks, physicians seeking an attractive practice environment and patients interested in a highly integrated approach to managing their medical care. Additionally, we believe that the scale of DMG's business allows it to spread capitation risk over a large population of members, invest in comprehensive analytic and healthcare information tools as well as clinical and quality measurement infrastructure, and recognize administrative and operating efficiencies. For these reasons, we believe that DMG offers patients, physicians and health plans a proven platform for addressing many of the most pressing challenges facing the U.S. healthcare system, including rising medical costs.

We also believe DMG has the ability to demonstrably improve medical outcomes and patient satisfaction while effectively managing costs through the following unique competitive strategies and internal progress and systems:

- DMG's clinical leadership and associated group and network physicians devote significant efforts to ensure that DMG's members receive the most appropriate care in the most appropriate manner.
- DMG is committed to maximizing its patients' satisfaction levels.
- DMG has the scale which, combined with its strong reputation and high quality patient care, makes it an attractive partner for health plans, compared to smaller provider groups that may have a higher risk of default and may not have the same resources to devote and develop the same level of patient care.
- DMG has over two decades of experience in managing complex disease cases for its population of patients. As a result, DMG has developed a rich dataset of patient care experiences and outcomes which permits DMG to proactively monitor and intervene in improving the care of its members.
- DMG's senior management team possesses substantial experience with the healthcare industry with average experience over 20 years, as of December 31, 2016.

Locations of DMG clinics

As of December 31, 2016, DMG managed a total of 247 medical clinics, of which 59 clinics were located in California, 13 clinics were located in Colorado, 85 clinics were located in Florida, 52 clinics were located in Nevada, 15 clinics were located in New Mexico, two clinics were located in Georgia and 21 clinics were located in Washington.

Competition

U.S. and International dialysis competition

The U.S. dialysis industry has consolidated significantly over time but still remains highly competitive, particularly in terms of acquiring existing outpatient dialysis centers. We continue to face a high degree of competition in the U.S. dialysis industry from large and medium-sized providers who compete directly with us for the acquisition of dialysis businesses, relationships with physicians to act as medical directors and skilled clinical personnel, as well as for individual patients. In addition, as we continue our international dialysis expansion into various international markets, we face competition from large and medium-sized providers for acquisition targets as well as physician relationships. Because of the ease of entry into the dialysis business and the ability of physicians to own dialysis centers and/or also be medical directors for their own centers, competition for growth in existing and expanding markets is not limited to large competitors with substantial financial resources. Acquisitions, developing new outpatient dialysis centers, patient retention and physician relationships are a critical component of our growth strategy and our business could be adversely affected if we are not able to continue to make dialysis acquisitions on reasonable and acceptable terms, continue to develop new outpatient dialysis centers, maintain or establish new relationships with physicians or if we experience significant patient attrition to our competitors. Competition for qualified physicians to act as medical directors and for inpatient dialysis services agreements with hospitals is also intense. Occasionally, we have also experienced competition from former medical directors or referring physicians who have opened their own outpatient dialysis centers. We also experience competitive pressures from other dialysis providers in connection with negotiating contracts with commercial healthcare payors and in recruiting and retaining qualified skilled clinical personnel.

The two largest dialysis companies, Fresenius Medical Care (FMC) and our Company, account for approximately 72% of outpatient dialysis patients in the U.S. with our Company serving approximately 36% of the total outpatient dialysis patients. Approximately 44% of the centers not owned by us or FMC are owned or controlled by hospitals or non-profit organizations. Hospital-based and non-profit dialysis units typically are more difficult to acquire than physician-owned dialysis centers.

FMC also manufactures a full line of dialysis supplies and equipment in addition to owning and operating outpatient dialysis centers worldwide. This may give FMC cost advantages over us because of its ability to manufacture its own products. Additionally, FMC has been one of our largest suppliers of dialysis products and equipment over the last several years. In January 2010, we entered into and subsequently extended an agreement with FMC to purchase a certain amount of dialysis equipment, parts and supplies from FMC through December 31, 2017. In addition, we entered in to a product supply agreement with Baxter Healthcare Corporation (Baxter) that commits us to purchase a certain amount of dialysis supplies through 2018. Our purchases of products in these categories generally offered by both FMC and Baxter represent approximately 4% of our total U.S. dialysis and related lab services operating expenses for the year ended December 31, 2016. In 2016, we purchased hemodialysis products and supplies from both FMC and Baxter that each represented approximately 2% of our total U.S. dialysis operating expenses. The amount of purchases in future years

from FMC will depend upon a number of factors, including the operating requirements of our centers, the number of centers we acquire, and growth of our existing centers.

DMG's competition

DMG's business is highly competitive. DMG competes with managed care organizations, hospitals, medical groups and individual physicians in its markets. DMG competes with other primary care physician groups or physicians who contract with health plans for membership. Health plans contract with care providers on the basis of costs, reputation, scope, efficiency and stability. Individual members select a primary care physician at the time of membership with the health plan. Location, name recognition, quality indicators and other factors go into that decision. For example, in California, DMG competes with both Permanente Medical Group, which is the exclusive provider for Kaiser, and Heritage Provider Network. However, DMG's principal competitors for members and health plan contracts vary by market.

Corporate compliance program

Our businesses are subject to extensive federal, state and local government regulations. Management has designed and implemented a corporate compliance program as part of our commitment to comply fully with all applicable laws and regulations and to maintain the high standards of conduct we expect from all of our teammates. We continuously review this program and enhance it as necessary. The primary purposes of the program include:

- Assessing and identifying risks for existing and new businesses;
- Increasing, through training and education, the awareness of our teammates and affiliated professionals of the necessity of complying with all applicable laws, regulations and company policies and procedures;
- Developing and implementing compliance policies and procedures and creating controls to support compliance with the law and such policies and procedures;
- Auditing and monitoring the activities of our operating units and business support functions on a regular basis to identify potential instances of noncompliance in a timely manner; and
- Ensuring that we take steps to resolve instances of noncompliance or to address areas of weakness or potential noncompliance as promptly as we become aware of them.

We have a code of conduct that each of our teammates and affiliated professionals must follow and we have a confidential toll-free hotline for teammates and patients to report potential instances of noncompliance. Our Chief Compliance Officer administers the compliance program. The Chief Compliance Officer reports directly to our Chief Executive Officer, our Chief Executive Officer of Kidney Care and Chair of the Compliance Committee of our Board of Directors (Board Compliance Committee). On October 22, 2014, DaVita signed a CIA with HHS and the OIG. The CIA:

- requires that we maintain certain elements of our compliance programs;
- imposes certain expanded compliance-related requirements during the term of the CIA, including increased training for teammates, physician partners and board members, implementing a series of procedures prior to entering into arrangements with referrals sources, execution of annual certifications by senior executives that evidence compliance with federal healthcare laws and regulations, internal compliance policies and the CIA, imposition of an executive recoupment program and quarterly and annual reports to the OIG;
- requires the formal allocation of certain oversight responsibility to the Board Compliance Committee and a resolution from that committee that it has made reasonable inquiry into the operations of the compliance program and the retention of an independent compliance advisor in year three of the CIA;
- contains certain business restrictions related to a subset of our joint venture arrangements, including our agreeing to not enter into certain types of partial divestiture joint venture transactions with nephrologists during the term of the CIA, among other restrictions; and
- requires that we engage an Independent Monitor who will provide additional oversight and reporting to the OIG for the term of the CIA.

The costs associated with compliance with the CIA could be substantial and may be greater than we currently anticipate. In addition, in the event of a breach of the CIA, we may become liable for payment of certain stipulated penalties, and/or be excluded from participation on federal healthcare programs. The OIG notified us that it considered us to be in breach of the CIA because of three implementation deficiencies. We have remediated the deficiencies and have paid certain stipulated penalties. The costs associated with compliance with the CIA or any liability, or consequences associated with breach thereof, could have an adverse effect on our revenues, earnings and cash flows.

Insurance

We maintain insurance for property and general liability, professional liability, directors' and officers' liability, workers compensation and other coverage in amounts and on terms deemed adequate by management, based on our actual claims experience and expectations for future claims. Future claims could, however, exceed our applicable insurance coverage. Physicians practicing at our dialysis centers are required to maintain their own malpractice insurance, and our medical directors are required to maintain coverage for their individual private medical practices. Our liability policies cover our medical directors for the performance of their duties as medical directors at our outpatient dialysis centers. DMG also maintains general and professional liability insurance through various independent and related parties. DMG has purchased its primary general and professional liability insurance from California Medical Group Insurance (CMGI) in which DMG owns a 67% equity interest.

Teammates

As of December 31, 2016, we employed approximately 70,300 teammates, including our international teammates:

• Licensed professional staff (physicians, nurses and other healthcare professionals)	29,500
• Other patient care and center support staff and laboratory personnel	27,400
• Corporate, billing and regional administrative staff	13,400

Our businesses require skilled healthcare professionals with specialized training for treating patients with complex care needs. Recruitment and retention of nurses are continuing concerns for healthcare providers due to short supply. We have an active program of investing in our professional healthcare teammates to help ensure we meet our recruitment and retention targets, including expanded training opportunities, tuition reimbursements and other incentives.

Item 1A. Risk Factors.

This Annual Report on Form 10-K contains statements that are forward-looking statements within the meaning of the federal securities laws. These statements involve known and unknown risks and uncertainties including the risks discussed below. The risks discussed below are not the only ones facing our business. Please read the cautionary notice regarding forward-looking statements in Item 7 of this Part 1 under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Risk factors related to our overall business:

If we fail to adhere to all of the complex government regulations that apply to our business, we could suffer severe consequences that could have a material adverse effect on our revenues, earnings, cash flows and stock price.

Our operations are subject to extensive federal, state and local government regulations, including Medicare and Medicaid payment rules and regulations, federal and state anti-kickback laws, the Stark Law and analogous state self-referral prohibition statutes, Federal Acquisition Regulations, the False Claims Act (FCA), the Civil Monetary Penalty statute, the Foreign Corrupt Practices Act (FCPA) and federal and state laws regarding the collection, use and disclosure of patient health information (e.g., Health Insurance Portability and Accountability Act of 1996 (HIPAA)) and the storage, handling and administration of pharmaceuticals. The Medicare and Medicaid reimbursement rules related to claims submission, enrollment and licensing requirements, cost reporting, and payment processes impose complex and extensive requirements upon dialysis providers as well. Moreover, additional laws and regulations potentially affecting providers continue to be promulgated. For example, on December 13, 2016, the 21st Century Cures Act was signed into law and, among other provisions, authorizes the Office of Inspector General (OIG) to impose penalties on providers that engage in information blocking where there is knowledge that such practice is unreasonable and likely to interfere with, prevent, or materially discourage access, exchange, or use of electronic health information.

We endeavor to comply with all legal requirements; however, there is no guarantee that we will be able to adhere to all of the complex government regulations that apply to our business. We further endeavor to structure all of our relationships with physicians to comply with state and federal anti-kickback and physician self-referral laws. We utilize considerable resources to monitor the laws and implement necessary changes. However, the laws and regulations in these areas are complex and often subject to varying interpretations. For example, if an enforcement agency were to challenge the level of compensation that we pay our medical directors or the number of medical directors whom we engage, we could be required to change our practices, face criminal or civil penalties, pay substantial fines or otherwise experience a material adverse effect as a result of a challenge to these arrangements.

In addition, failure to report and return overpayments within 60 days of when the overpayment was identified can lead to a violation of the FCA and associated penalties, as described in further detail below, and exclusion and penalties under the federal Civil Monetary Penalty statute, including civil monetary penalties of up to $10,000 (adjusted for inflation) for each item or service for which a person received an identified overpayment and failed to report and return such overpayment. These obligations to report and return overpayments could subject our procedures for identifying and processing overpayments to greater scrutiny. We have made significant investments in resources to decrease the time it takes to identify and process overpayments, and we may be required to make additional investments in the future. From time to time we may conduct internal compliance reviews, the results of which may involve the identification of overpayments or other liabilities. An acceleration in our ability to identify and process overpayments could result in us refunding overpayments to government and other payors more rapidly than we have in the past which could have a material adverse effect on our operating cash flows. As of December 31, 2016, we recorded an estimated accrual of $38 million for potential damages and liabilities associated with write-offs and discounts of patient co-payment obligations, and credits to payors for returns of prescriptions drugs related to our pharmacy business that were identified during the course of an internally-initiated compliance review. We have disclosed the results of this ongoing review to the government. We may accrue additional reserves for refunds and related damages and potential liabilities arising out of this review.

Additionally, the federal government has used the FCA to prosecute a wide variety of alleged false claims and fraud allegedly perpetrated against Medicare and state health care programs, including coding errors, billing for services not rendered, submitting false cost reports, billing for services at a higher payment rate than appropriate, billing under a comprehensive code as well as under one or more component codes included in the comprehensive code, and billing for care that is not considered medically necessary. Moreover, amendments to the federal Anti-Kickback Statute in the health reform law make claims tainted by anti-kickback violations potentially subject to liability under the FCA, including *qui tam* or whistleblower suits. The penalties for a violation of the FCA range from $5,500 to $11,000 (adjusted for inflation) for each false claim plus three times the amount of damages caused by each such claim which generally means the amount received directly or indirectly from the government. On February 3, 2017, the Department of Justice (DOJ) issued a final rule announcing adjustments to FCA penalties, under which the per claim penalty range increases to $10,957 to $21,916 for penalties assessed after February 3, 2017, so long as the underlying conduct occurred after November 2, 2015. Given the high volume of claims processed by our various operating units, the potential is high for substantial penalties in connection with any alleged FCA violations.

In addition to the provisions of the FCA, which provide for civil enforcement, the federal government can use several criminal statutes to prosecute persons who are alleged to have submitted false or fraudulent claims for payment to the federal government.

The civil investigative demand received by our wholly-owned pharmacy services subsidiary, DaVita Rx, LLC, specifically references that it is in connection with an FCA investigation concerning allegations that this subsidiary presented or caused to be presented false claims for payment to the government for prescription medications, as well as into our relationship with pharmaceutical manufacturers. See "Item 3. Legal Proceedings" and Note 17 to the consolidated financial statements included in this report for further details.

We are subject to a Corporate Integrity Agreement (CIA) which, for our domestic dialysis business, requires us to report probable violations of criminal, civil or administrative laws applicable to any federal health care program for which penalties or exclusions may be authorized under applicable healthcare laws and regulations. See "If we fail to comply with our Corporate Integrity Agreement, we could be subject to substantial penalties and exclusion from participation in federal healthcare programs that may adversely impact our revenues, earnings and cash flows".

If any of our operations are found to violate these or other government regulations, we could suffer severe consequences that would have a material adverse effect on our revenues, earnings, cash flows and stock price, including:

- Suspension or termination of our participation in government payment programs;
- Refunds of amounts received in violation of law or applicable payment program requirements;
- Loss of required government certifications or exclusion from government payment programs;
- Loss of licenses required to operate healthcare facilities or administer pharmaceuticals in some of the states in which we operate;
- Reductions in payment rates or coverage for dialysis and ancillary services and related pharmaceuticals;
- Criminal or civil liability, fines, damages or monetary penalties for violations of healthcare fraud and abuse laws, including the federal Anti-Kickback Statute, Stark Law violations, FCA or other failures to meet regulatory requirements;
- Enforcement actions by governmental agencies and/or state claims for monetary damages by patients who believe their protected health information (PHI) has been used, disclosed or not properly safeguarded in violation of federal or state patient privacy laws, including HIPAA or the Privacy Act of 1974;
- Mandated changes to our practices or procedures that significantly increase operating expenses;
- Imposition of and compliance with corporate integrity agreements that could subject us to ongoing audits and reporting requirements as well as increased scrutiny of our billing and business practices which could lead to potential fines;
- Termination of relationships with medical directors; and
- Harm to our reputation which could impact our business relationships, affect our ability to obtain financing and decrease access to new business opportunities, among other things.

We are, and may in the future be, a party to various lawsuits, claims, governmental investigations and audits (including investigations resulting from our obligation to self-report suspected violations of law) and other legal proceedings, any of which could result in, among other things, substantial financial penalties or awards against us, substantial payments made by us, harm to our reputation, required changes to our business practices, exclusion from future participation in the Medicare, Medicaid and other federal healthcare programs and possible criminal penalties, any of which could have a material adverse effect on us.

We are the subject of a number of investigations and audits by the federal government. We have received subpoenas or other requests for documents from the federal government in connection with the Swoben private civil suit, the 2015 U.S. Attorney Transportation Investigation, the investigations underlying the two subpoenas regarding patient diagnosis coding received by DMG and its JSA subsidiary, the 2015 DOJ Vascular Access Investigation, the 2016 U.S. Attorney Prescription Drug Investigation and the 2017 U.S. Attorney American Kidney Fund Investigation. In addition to the foregoing inquiries and proceedings, we are frequently subject to other investigations and audits by state or federal government agencies and/or private civil *qui tam* complaints filed by relators and other lawsuits, claims and legal proceedings.

Responding to subpoenas, investigations and other lawsuits, claims and legal proceedings as well as defending ourselves in such matters will continue to require management's attention and cause us to incur significant legal expense. Negative findings or terms and conditions that we might agree to accept as part of a negotiated resolution of pending or future government inquiries or relator proceedings could result in, among other things, substantial financial penalties or awards against us, substantial payments made by us, harm to our reputation, required changes to our business practices, exclusion from future participation in the Medicare, Medicaid and other federal healthcare programs and, in certain cases, criminal penalties, any of which could have a material adverse effect on us. It is possible that criminal proceedings may be initiated against us in connection with investigations by the federal government. To our knowledge, no such proceedings have been initiated by the federal government against us at this time. Other than as described in "Item 3. Legal Proceedings" and Note 17 to the consolidated financial statements included in this report, we cannot predict the ultimate outcomes of the various legal proceedings and regulatory matters to which we are or may be subject from time to time, including those described in the aforementioned sections of this report, or the timing of their resolution or the ultimate losses or impact of developments in those matters, which could have a material adverse effect on our revenues, earnings, and cash flows. See "Item 3. Legal Proceedings" and Note 17 to the consolidated financial statements included in this report for further details regarding these and other matters.

Disruptions in federal government operations and funding create uncertainty in our industry and could have a material adverse effect on our revenues, earnings and cash flows and otherwise adversely affect our financial condition.

A substantial portion of our revenues is dependent on federal healthcare program reimbursement, and any disruptions in federal government operations could have a material adverse effect on our revenues, earnings and cash flows. If the U.S. government defaults on its debt, there could be broad macroeconomic effects that could raise our cost of borrowing funds, and delay or prevent our future growth and expansion. Any future federal government shutdown, U.S. government default on its debt and/or failure of the U.S. government to enact annual appropriations could have a material adverse effect on our revenues, earnings and cash flows. Additionally, disruptions in federal government operations may negatively impact regulatory approvals and guidance that are important to our operations, and create uncertainty about the pace of upcoming healthcare regulatory developments.

Healthcare reform could substantially reduce our revenues, earnings and cash flows.

We cannot predict how employers, private payors or persons buying insurance might react to the changes brought on by federal and state healthcare reform legislation or what form many of these regulations will take before implementation.

The federal healthcare reform legislation, enacted in 2010, introduced healthcare insurance exchanges which provide a marketplace for eligible individuals and small employers to purchase healthcare insurance. The business and regulatory environment continues to evolve as the exchanges mature, and regulations are challenged, changed and enforced. If commercial payor participation in the exchanges continues to decrease, our revenues, earnings and cash flows could be adversely affected. Although we cannot predict the short- or long-term effects of these factors, we believe the healthcare insurance exchanges could result in a reduction in ESRD patients covered by traditional commercial insurance policies and an increase in the number of patients covered through the exchanges under more restrictive commercial plans with lower reimbursement rates or higher deductibles and co-payments that patients may not be able to pay. To the extent that the ongoing implementation of such exchanges or changes in regulations or enforcement of regulations regarding the exchanges results in a reduction in reimbursement rates for our services from commercial and/or government payors, our revenues, earnings and cash flows could be adversely affected.

The healthcare reform legislation also added several new tax provisions that, among other things, impose various fees and excise taxes, and limit compensation deductions for health insurance providers and their affiliates. These rules could negatively impact our cash flow and tax liabilities. In addition, the healthcare reform legislation broadened the potential for penalties under the FCA for the knowing and improper retention of overpayments collected from government payors and reduced the timeline to file Medicare claims. As a result, we made significant investments in new resources to accelerate the time it takes us to identify and process overpayments and we deployed significant resources to reduce our timeline and improve our claims processing methods to ensure that our Medicare claims are filed in a timely fashion. However, we may be required to make additional investments in the future. Failure to timely identify and return overpayments may result in significant penalties, which may have a negative impact on our revenues, earnings and cash flows. Failure to file a claim within the one year window could result in payment denials, adversely affecting our revenues, earnings and cash flows.

With the healthcare reform legislation, new models of care emerge and evolve and other initiatives in the government or private sector may arise, which could adversely impact our business. For example, the CMS Innovation Center (Innovation Center) is currently working with various healthcare providers to develop, refine and implement Accountable Care Organizations (ACOs) and other innovative models of care for Medicare and Medicaid beneficiaries, including Bundled Payments for Care Improvement Initiative, CEC Model (which includes the development of ESRD Seamless Care Organizations), the Comprehensive Primary Care Initiative, the Duals Demonstration, and other models. We are currently participating in the CEC Model with the Innovation Center, including with organizations in Arizona, Florida, and adjacent New Jersey and Pennsylvania markets. Our U.S. dialysis business may

choose to participate in additional models either as a partner with other providers or independently. Even in areas where we are not directly participating in this or other Innovation Center models, some of our patients may be assigned to an ACO, another ESRD Care Model, or another program, in which case the quality and cost of care that we furnish will be included in an ACO's, another ESRD Care Model's, or other program's calculations. Additionally, CMS instituted new screening procedures which we expect will delay the Medicare contractor approval process, potentially causing a delay in reimbursement. We anticipate the new screening and enrollment requirements will require additional personnel and financial resources and will potentially delay the enrollment and revalidation of our centers which in turn will delay payment. These delays may negatively impact our revenues, earnings and cash flows.

Other reform measures allow CMS to place a moratorium on new enrollment of providers and to suspend payment to providers upon a credible allegation of fraud from any source. These types of reform measures, as well as other measures, could adversely impact our revenues, earnings and cash flows depending upon the scope and breadth of the implementing regulations.

There is also a considerable amount of uncertainty as to the prospective implementation of the federal healthcare reform legislation and what similar measures might be enacted at the state level. There have been multiple attempts through legislative action and legal challenges to repeal or amend the ACA. In addition, the 2016 Presidential and Congressional elections have caused the future state of the exchanges and other ACA reforms to be unclear. As a result, there is considerable uncertainty regarding the future with respect to the exchanges, and, indeed, many core aspects of the current health care marketplace. While specific changes and their timing are not yet apparent, it does appear likely that there will be significant changes to the healthcare environment in the near and short term. The enacted reforms as well as future legislative changes could have a material adverse effect on our results of operations, including lowering our reimbursement rates and increasing our expenses.

In addition, CMS published an interim final rule that establishes new Conditions for Coverage standards for dialysis facilities that require any facility making payments of premiums for individual market health plans to notify patients of potential coverage options and educate them about the benefits of each option. The interim final rule requires facilities to ensure that insurers are informed of and have agreed to accept the payments. On January 25, 2017, the federal court issued a preliminary injunction on CMS' interim final rule. At this time CMS has not appealed the court's ruling and we await the final decision from the court. This and any other law, rule or guidance or rule issued by CMS limiting or prohibiting the use of charitable premium assistance and/or the ability of patients with access to alternative coverage from selecting a marketplace plan on or off exchange could have a material adverse effect on our revenues, earnings and cash flows.

Federal and state privacy and information security laws are complex, and if we fail to comply with applicable laws, regulations and standards, including with respect to third-party service providers that utilize sensitive personal information on our behalf, or if we fail to properly maintain the integrity of our data, protect our proprietary rights to our systems or defend against cybersecurity attacks, we may be subject to government or private actions due to privacy and security breaches, and our business, reputation, results of operations, financial position and cash flows could be materially and adversely affected.

We must comply with numerous federal and state laws and regulations governing the collection, dissemination, access, use, security and privacy of PHI, including HIPAA and its implementing privacy and security regulations, as amended by the federal Health Information Technology for Economic and Clinical Health Act (HITECH) and collectively referred to as HIPAA. If we fail to comply with applicable privacy and security laws, regulations and standards, including with respect to third-party service providers that utilize sensitive personal information, including PHI, on our behalf, properly maintain the integrity of our data, protect our proprietary rights to our systems, or defend against cybersecurity attacks, our business, reputation, results of operations, financial position and cash flows could be materially and adversely affected.

Information security risks have significantly increased in recent years in part because of the proliferation of new technologies, the use of the Internet and telecommunications technologies to conduct our operations, and the increased sophistication and activities of organized crime, hackers, terrorists and other external parties, including foreign state agents. Our operations rely on the secure processing, transmission and storage of confidential, proprietary and other information in our computer systems and networks.

We are continuously implementing multiple layers of security measures through technology, processes, and our people. We utilize current security technologies and our defenses are monitored and routinely tested internally and by external parties. Despite these efforts, our facilities and systems and those of our third-party service providers may be vulnerable to privacy and security incidents; security attacks and breaches; acts of vandalism or theft; computer viruses and other malicious code; coordinated attacks by activist entities; emerging cybersecurity risks; misplaced or lost data; programming and/or human errors; or other similar events that could impact the security, reliability, and availability of our systems. Emerging and advanced security threats, including coordinated attacks, require additional layers of security which may disrupt or impact efficiency of operations. Cybersecurity requires ongoing investment and diligence against evolving threats.

Any security breach involving the misappropriation, loss or other unauthorized disclosure or use of confidential information, including PHI, financial data, competitively sensitive information, or other proprietary data, whether by us or a third party, could have

a material adverse effect on our business, reputation, financial condition, cash flows, or results of operations. We may be required to expend significant additional resources to modify our protective measures, to investigate and remediate vulnerabilities or other exposures, or to make required notifications. The occurrence of any of these events could result in interruptions, delays, the loss or corruption of data, cessations in the availability of systems or liability under privacy and security laws, all of which could have a material adverse effect on our financial position and results of operations and harm our business reputation and trigger regulatory actions and private party litigation. If we are unable to protect the physical and electronic security and privacy of our databases and transactions, we could be subject to potential liability and regulatory action, our reputation and relationships with our patients and vendors would be harmed, and our business, operations, and financial results may be materially adversely affected. Failure to adequately protect and maintain the integrity of our information systems (including our networks) and data, or to defend against cybersecurity attacks, could subject us to monetary fines, civil suits, civil penalties or criminal sanctions and requirements to disclose the breach publicly, and may further result in a material adverse effect on our results of operations, financial position, and cash flows. As malicious cyber activity escalates, including activity that originates outside of the United States, the risks we face relating to transmission of data and our use of service providers outside of our network, as well as the storing or processing of data within our network, intensify. There have been increased federal and state HIPAA and other privacy and security enforcement efforts and we expect this trend to continue. While we maintain cyber liability insurance, this insurance may not cover us for all losses and may not be sufficient to protect us against all losses.

We may engage in acquisitions, mergers, joint ventures or dispositions, which may affect our results of operations, debt-to-capital ratio, capital expenditures or other aspects of our business, and if businesses we acquire have liabilities we are not aware of, we could suffer severe consequences that would materially and adversely affect our business.

Our business strategy includes growth through acquisitions of dialysis centers and other businesses, as well as entry into joint ventures. We may engage in acquisitions, mergers, joint ventures, dispositions or new business models, which may affect our results of operations, debt-to-capital ratio, capital expenditures or other aspects of our business. There can be no assurance that we will be able to identify suitable acquisition targets or merger partners or that, if identified, we will be able to acquire these targets on acceptable terms or agree to terms with merger partners. There can also be no assurance that we will be successful in completing any acquisitions, mergers or dispositions that we announce, executing new business models or integrating any acquired business into our overall operations. There is no guarantee that we will be able to operate acquired businesses successfully as stand-alone businesses, or that any such acquired business will operate profitably or will not otherwise adversely impact our results of operations. Further, we cannot be certain that key talented individuals at the business being acquired will continue to work for us after the acquisition or that they will be able to continue to successfully manage or have adequate resources to successfully operate any acquired business.

Businesses we acquire may have unknown or contingent liabilities or liabilities that are in excess of the amounts that we originally estimated, and may have other issues, including those related to internal controls over financial reporting or issues that could affect our ability to comply with healthcare laws and regulations and other laws applicable to our expanded business. As a result, we cannot make any assurances that the acquisitions we consummate will be successful. Although we generally seek indemnification from the sellers of businesses we acquire for matters that are not properly disclosed to us, we are not always successful. In addition, even in cases where we are able to obtain indemnification, we may discover liabilities greater than the contractual limits, the amounts held in escrow for our benefit (if any), or the financial resources of the indemnifying party. In the event that we are responsible for liabilities substantially in excess of any amounts recovered through rights to indemnification or alternative remedies that might be available to us, or any applicable insurance, we could suffer severe consequences that would substantially reduce our earnings and cash flows or otherwise materially and adversely affect our business.

Additionally, joint ventures, including our Asia Pacific Joint Venture (APAC JV), and minority investments inherently involve a lesser degree of control over business operations, thereby potentially increasing the financial, legal, operational and/or compliance risks associated with the joint venture or minority investment. In addition, we may be dependent on joint venture partners, controlling shareholders or management who may have business interests, strategies or goals that are inconsistent with ours. Business decisions or other actions or omissions of the joint venture partner, controlling shareholders or management may adversely affect the value of our investment, result in litigation or regulatory action against us, result in reputational harm to us or adversely affect the value of our investment or partnership.

If we are not able to continue to make acquisitions, or maintain an acceptable level of non-acquired growth, or if we face significant patient attrition to our competitors or a reduction in the number of our medical directors or associated physicians, it could adversely affect our business.

Acquisitions, patient retention and medical director and physician retention are an important part of our growth strategy. We face intense competition from other companies for acquisition targets. In our U.S. dialysis business, we continue to face increased competition from large and medium-sized providers, which compete directly with us for acquisition targets as well as for individual patients and medical directors. In addition, as we continue our international dialysis expansion into various international markets, we will face competition from large and medium-sized providers for these acquisition targets as well. Because of the ease of entry into the

dialysis business and the ability of physicians to be medical directors for their own centers, competition for growth in existing and expanding markets is not limited to large competitors with substantial financial resources. Occasionally, we have experienced competition from former medical directors or referring physicians who have opened their own dialysis centers. In addition, FMC, our largest competitor, manufactures a full line of dialysis supplies and equipment in addition to owning and operating dialysis centers. This may give it cost advantages over us because of its ability to manufacture its own products. If we are not able to continue to make acquisitions, continue to maintain acceptable levels of non-acquired growth, or if we face significant patient attrition to our competitors or a reduction in the number of our medical directors or associated physicians, it could adversely affect our business.

Our ability to effectively provide the services we offer could be negatively impacted if certain of our suppliers do not meet our needs, if there are material price increases, or if we are unable to effectively access new technology, which could substantially reduce our revenues, earnings and cash flows.

We have significant suppliers that are either the sole or primary source of products critical to the services we provide, including Amgen, Baxter, FMC, NxStage Medical, Inc. and others or to which we have committed obligations to make purchases. If any of these suppliers do not meet our needs for the products they supply, including in the event of a product recall, shortage or dispute, and we are not able to find adequate alternative sources, if we experience material price increases from these suppliers that we are unable to mitigate, or if some of the drugs that we purchase are not reimbursed or not adequately reimbursed by commercial payors or through the bundled payment rate by Medicare, our revenues, earnings and cash flows could be substantially reduced. In addition, the technology related to the products critical to the services we provide is subject to new developments and may result in superior products. If we are not able to access superior products on a cost-effective basis or if suppliers are not able to fulfill our requirements for such products, we could face patient attrition which could substantially reduce our revenues, earnings and cash flows.

DMG operates in a different line of business from our historical business, and we face challenges managing DMG and may not realize anticipated benefits.

DMG operates in a different line of business from our historical business. We may not have the expertise, experience and resources to pursue all of our businesses at once, and we may be unable to successfully operate all businesses in the combined company. The administration of DMG requires implementation of appropriate operations, management, and financial reporting systems and controls. We experience difficulties in effectively implementing these and other systems. The management of DMG requires and will continue to require the focused attention of our management team, including a significant commitment of its time and resources. The need for management to focus on these matters could have a material and adverse impact on our revenues and operating results. If the DMG operations are less profitable than we currently anticipate or we do not have the experience, the appropriate expertise or the resources to pursue all businesses in the combined company, the results of operations and financial condition may be materially and adversely affected, and in that regard, we have taken goodwill impairment charges of $189 million, $77 million and $176 million in December 2015, March 2016 and June 2016, respectively, and may continue incurring additional impairment charges.

The level of our current and future debt could have an adverse impact on our business and our ability to generate cash to service our indebtedness depends on many factors beyond our control.

We have substantial debt outstanding, we incurred a substantial amount of additional debt in connection with the DMG transaction and we may incur additional indebtedness in the future. Our substantial indebtedness could have important consequences to you, for example, it could:

- make it difficult for us to make payments on our debt securities;
- increase our vulnerability to general adverse economic and industry conditions;
- require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, acquisitions and investments and other general corporate purposes;
- limit our flexibility in planning for, or reacting to, changes in our business and the markets in which we operate;
- expose us to interest rate volatility that could adversely affect our earnings and cash flow and our ability to service our indebtedness;
- place us at a competitive disadvantage compared to our competitors that have less debt; and
- limit our ability to borrow additional funds.

In addition, we may incur substantial additional indebtedness in the future. The terms of the indentures governing our senior notes and the agreement governing our senior secured credit facilities will allow us to incur substantial additional debt. If new debt is added to current debt levels, the related risks described above could intensify.

Our ability to make payments on our indebtedness and to fund planned capital expenditures and expansion efforts, including any strategic acquisitions we may make in the future, will depend on our ability to generate cash. This, to a certain extent, is subject to general economic, financial, competitive, regulatory and other factors that are beyond our control.

We cannot provide assurance that our business will generate sufficient cash flow from operations in the future or that future borrowings will be available to us in an amount sufficient to enable us to service our indebtedness or to fund other liquidity needs. If we are unable to generate sufficient funds to service our outstanding indebtedness, we may be required to refinance, restructure, or otherwise amend some or all of such obligations, sell assets, or raise additional cash through the sale of our equity. We cannot make any assurances that we would be able to obtain such refinancing on terms as favorable as our existing financing terms or that such restructuring activities, sales of assets, or issuances of equity can be accomplished or, if accomplished, would raise sufficient funds to meet these obligations.

The borrowings under our senior secured credit facilities are guaranteed by a substantial portion of our direct and indirect wholly-owned domestic subsidiaries and are secured by a substantial portion of DaVita Inc.'s and its subsidiaries' assets.

We may be subject to liability claims for damages and other expenses that are not covered by insurance or exceed our existing insurance coverage that could reduce our earnings and cash flows.

Our operations and how we manage our Company may subject us, as well as our officers and directors to whom we owe certain defense and indemnity obligations, to litigation and liability for damages. Our business, profitability and growth prospects could suffer if we face negative publicity or we pay damages or defense costs in connection with a claim that is outside the scope or limits of coverage of any applicable insurance coverage, including claims related to adverse patient events, contractual disputes, professional and general liability and directors' and officers' duties. In addition, we have received several notices of claims from commercial payors and other third parties, as well as subpoenas and CIDs from the federal government, related to our business practices, including our historical billing practices and the historical billing practices of acquired businesses. Although the ultimate outcome of these claims cannot be predicted, an adverse result with respect to one or more of these claims could have a material adverse effect on our financial condition, results of operations and cash flows. We currently maintain insurance coverage for those risks we deem are appropriate to insure against and make determinations about whether to self-insure as to other risks or layers of coverage. However, a successful claim, including a professional liability, malpractice or negligence claim which is in excess of any applicable insurance coverage, or that is subject to our self-insurance retentions, could have a material adverse effect on our earnings and cash flows. Additionally, as a result of the broad scope of our DMG division's medical practice, we are exposed to medical malpractice claims, as well as claims for damages and other expenses, that may not be covered by insurance or for which adequate limits of insurance coverage may not be available.

In addition, if our costs of insurance and claims increase, then our earnings could decline. Market rates for insurance premiums and deductibles have been steadily increasing. Our earnings and cash flows could be materially and adversely affected by any of the following:

- the collapse or insolvency of our insurance carriers;
- further increases in premiums and deductibles;
- increases in the number of liability claims against us or the cost of settling or trying cases related to those claims; or
- an inability to obtain one or more types of insurance on acceptable terms, if at all.

If we fail to successfully maintain an effective internal control over financial reporting, the integrity of our financial reporting could be compromised, which could result in a material adverse effect on our reported financial results.

The integration of DMG into our internal control over financial reporting has required and will continue to require significant time and resources from our management and other personnel and will increase our compliance costs. Failure to maintain an effective internal control environment could have a material adverse effect on our ability to accurately report our financial results and the market's perception of our business and our stock price.

Deterioration in economic conditions and further disruptions in the financial markets could have a material adverse effect on our revenues, earnings and cash flows and otherwise adversely affect our financial condition.

Deterioration in economic conditions could adversely affect our business and our profitability. Among other things, the potential decline in federal and state revenues that may result from such conditions may create additional pressures to contain or reduce reimbursements for our services from Medicare, Medicaid and other government sponsored programs. Increases in job losses in the U.S. as a result of adverse economic conditions has and may continue to result in a smaller percentage of our patients being covered by an employer group health plan and a larger percentage being covered by lower paying Medicare and Medicaid programs. Employers may also select more restrictive commercial plans with lower reimbursement rates. To the extent that payors are negatively impacted by a decline in the economy, we may experience further pressure on commercial rates, a further slowdown in collections and a reduction in the amounts we expect to collect. In addition, uncertainty in the financial markets could adversely affect the variable interest rates payable under our credit facilities or could make it more difficult to obtain or renew such facilities or to obtain other forms of financing in the future, if at all. Any or all of these factors, as well as other consequences of a deterioration in economic conditions which cannot currently be anticipated, could have a material adverse effect on our revenues, earnings and cash flows and otherwise adversely affect our financial condition.

Expansion of our operations to and offering our services in markets outside of the U.S. subjects us to political, economic, legal, operational and other risks that could adversely affect our business, results of operations and cash flows.

We are continuing to expand our operations by offering our services outside of the U.S., which increases our exposure to the inherent risks of doing business in international markets. Depending on the market, these risks include those relating to:

- changes in the local economic environment;
- political instability, armed conflicts or terrorism;
- social changes;
- intellectual property legal protections and remedies;
- trade regulations;
- procedures and actions affecting approval, production, pricing, reimbursement and marketing of products and services;
- foreign currency;
- repatriating or moving to other countries cash generated or held abroad, including considerations relating to tax-efficiencies and changes in tax laws;
- export controls;
- lack of reliable legal systems which may affect our ability to enforce contractual rights;
- changes in local laws or regulations;
- potentially longer ramp-up times for starting up new operations and for payment and collection cycles;
- financial and operational, and information technology systems integration; and
- failure to comply with U.S. laws, such as the FCPA, or local laws that prohibit us, our partners, or our partners' or our intermediaries from making improper payments to foreign officials for the purpose of obtaining or retaining business.

Issues relating to the failure to comply with any of the above may impact our domestic business and/or raise scrutiny on our domestic practices.

Additionally, some factors that will be critical to the success of our international business and operations will be different than those affecting our domestic business and operations. For example, conducting international operations requires us to devote significant management resources to implement our controls and systems in new markets, to comply with local laws and regulations and to overcome the numerous new challenges inherent in managing international operations, including those based on differing languages, cultures and regulatory environments, and those related to the timely hiring, integration and retention of a sufficient number of skilled personnel to carry out operations in an environment with which we are not familiar.

We anticipate expanding our international operations through acquisitions of varying sizes or through organic growth, which could increase these risks. Additionally, though we might invest material amounts of capital and incur significant costs in connection with the growth and development of our international operations, there is no assurance that we will be able to operate them profitably anytime soon, if at all. As a result, we would expect these costs to be dilutive to our earnings over the next several years as we start-up or acquire new operations.

These risks could have a material adverse effect on our financial condition, results of operations and cash flows.

Risk factors related to our U.S. dialysis and related lab services, ancillary services and strategic initiatives:

If patients in commercial plans are subject to restriction in plan designs or the average rates that commercial payors pay us decline significantly, it would have a material adverse effect on our revenues, earnings and cash flows.

Approximately 36% of our dialysis services revenues for the year ended December 31, 2016 were generated from patients who have commercial payors (including hospital dialysis services) as their primary payor. The majority of these patients have insurance policies that pay us on terms and at rates that are generally significantly higher than Medicare rates. The payments we receive from commercial payors generate nearly all of our profit and all of our nonacute dialysis profits come from commercial payors. We continue to experience downward pressure on some of our commercial payment rates as a result of general conditions in the market, including as employers shift to less expensive options for medical services, recent and future consolidations among commercial payors, increased focus on dialysis services and other factors. In addition, many commercial payors that sell individual plans both on and off exchange have publicly announced losses in the marketplace. These payors may seek discounts on rates for marketplace plans on and off exchange. There is no guarantee that commercial payment rates will not be materially lower in the future.

We are continuously in the process of negotiating existing and potential new agreements with commercial payors who aggressively negotiate terms with us. Sometimes many significant agreements are being renegotiated at the same time. In the event that our continual negotiations result in overall commercial rate reductions in excess of overall commercial rate increases, the cumulative effect could have a material adverse effect on our financial results. Consolidations have significantly increased the negotiating leverage of commercial payors. Our negotiations with payors are also influenced by competitive pressures, and we may experience decreased contracted rates with commercial payors or experience decreases in patient volume as our negotiations with commercial payors continue. In addition to downward pressure on contracted commercial payor rates, payors have been attempting to design and implement plans to restrict access to coverage, and the duration and/or the breadth of benefits, which may result in decreased payments. In addition, payors have been attempting to impose restrictions and limitations on patient access to commercial exchange plans and non-contracted or out-of-network providers, and in some circumstances designate our centers as out-of-network providers. Rates for commercial exchange products and out-of-network providers are on average higher than rates for government products and in-network providers, respectively. In 2017, a number of commercial payors have incorporated policies into their provider manuals refusing to accept charitable premium assistance from bona fide non-profit organizations, such as the American Kidney Fund, which may impact the number of patients who are able to afford commercial exchange plans. We also believe commercial payors have or will begin to restructure their benefits to create disincentives for patients to select or remain with out-of-network providers and to decrease payment rates for out-of-network providers. Decreases in the number of patients with commercial exchange plans, decreases in out-of-network rates and restrictions on out-of-network access, our turning away new patients in instances where we are unable to come to agreement on rates, or decreases in contracted rates could result in a significant decrease in our overall revenues derived from commercial payors. If the average rates that commercial payors pay us decline significantly, or if we see a decline in commercial patients, it would have a material adverse effect on our revenues, earnings and cash flows. For additional details regarding specific risks we face regarding regulatory changes that could result in fewer patients covered under commercial plans or an increase of patients covered under more restrictive commercial plans with lower reimbursement rates, see the discussion in the risk factor under the heading “Healthcare reform could substantially reduce our revenues, earnings and cash flows.”

If the number of patients with higher-paying commercial insurance declines, then our revenues, earnings and cash flows would be substantially reduced.

Our revenue levels are sensitive to the percentage of our patients with higher-paying commercial insurance coverage. A patient's insurance coverage may change for a number of reasons, including changes in the patient's or a family member's employment status. Currently, for a patient covered by an employer group health plan, Medicare generally becomes the primary payor after 33 months, or earlier, if the patient's employer group health plan coverage terminates. Patients with commercial insurance frequently rely on financial assistance from charitable organizations, such as the American Kidney Fund. However, certain payors are challenging our patients' and other providers' patients' ability to utilize assistance from charitable organizations for the payment of premiums, including through litigation and other legal proceedings. Regulators have also questioned the use of charitable premium assistance for ESRD patients, including CMS, which had issued an interim final rule on charitable premium assistance in December 2016. Although CMS' interim final rule is currently subject to a preliminary injunction issued by a federal court judge, CMS or a regulatory agency may issue a new rule to challenge charitable premium assistance. If any of these challenges to kidney patients' use of premium assistance are successful or regulators impose restrictions on the use of financial assistance from such charitable organizations such that these patients are unable to obtain, or continue to receive or receive for a limited duration, such financial assistance, our revenues, earnings, and cash flow could be substantially reduced.

When Medicare becomes the primary payor, the payment rate we receive for that patient decreases from the employer group health plan rate to the lower Medicare payment rate. The number of our patients who have government-based programs as their primary payors could increase and the percentage of our patients covered under commercial insurance plans could be negatively impacted as a result of improved mortality or declining macroeconomic conditions. To the extent there are sustained or increased job losses in the U.S., independent of whether general economic conditions improve, we could experience a decrease in the number of patients covered under commercial plans. We could also experience a further decrease in the payments we receive for services if changes to the healthcare regulatory system result in fewer patients covered under commercial plans or an increase of patients covered under more restrictive commercial plans with lower reimbursement rates. In addition, our continual negotiations with commercial payors under existing and potential new agreements could result in a decrease in the number of our patients covered by commercial plans to the extent that we cannot reach agreement with commercial payors on rates and other terms, resulting in termination or non-renewals of existing agreements and our inability to enter into new agreements. Commercial payors have taken and may continue to take steps to control the cost of and/or the eligibility for access to healthcare services, including relative to products on and off the healthcare exchanges. These efforts could impact the number of our patients who are eligible to enroll in commercial insurance plans, and remain on the plans, including plans offered through healthcare exchanges. If there is a significant reduction in the number of patients under higher-paying commercial plans relative to government-based programs that pay at lower rates, it would have a material adverse effect on our revenues, earnings and cash flows.

Changes in the structure of and payment rates under the Medicare ESRD program could substantially reduce our revenues, earnings and cash flows.

Approximately 42% of our dialysis services revenues for the year ended December 31, 2016 were generated from patients who have Medicare as their primary payor. For patients with Medicare coverage, all ESRD payments for dialysis treatments are made under a single bundled payment rate which provides a fixed payment rate to encompass all goods and services provided during the dialysis treatment, including pharmaceuticals that were historically separately reimbursed to the dialysis providers, such as EPO, vitamin D analogs and iron supplements, irrespective of the level of pharmaceuticals administered or additional services performed. Most lab services are also included in the bundled payment. Under the ESRD Prospective Payment System (PPS), the bundled payments to a dialysis facility may be reduced by as much as 2% based on the facility's performance in specified quality measures set annually by CMS through the ESRD Quality Incentive Program, which was established by the Medicare Improvements for Patients and Providers Act of 2008. The bundled payment rate is also adjusted for certain patient characteristics, a geographic usage index and certain other factors.

The current bundled payment system presents certain operating, clinical and financial risks, which include:

- Risk that our rates are reduced by CMS. Uncertainty about future payment rates remains a material risk to our business. Each year, CMS publishes a final rule for the ESRD Prospective Payment System (PPS), which phases in the reductions to the ESRD PPS base rate mandated by the American Taxpayer Relief Act of 2012 as modified by the Protecting Access to Medicare Act of 2014.

- Risk that increases in our operating costs will outpace the Medicare rate increases we receive. We expect operating costs to continue to increase due to inflationary factors, such as increases in labor and supply costs, regardless of whether there is a compensating inflation-based increase in Medicare payment rates or in payments under the bundled payment rate system.

- Risk of federal budget sequestration cuts. As a result of the Budget Control Act of 2011 and the Bipartisan Budget Act of 2015, an annual 2% reduction to Medicare payments took effect on April 1, 2013 and has been extended through 2025. These across-the-board spending cuts have affected and will continue to adversely affect our revenues, earnings and cash flows.

- Risk that, if our clinical systems fail to accurately capture the data we report to CMS in connection with claims for which at least part of the government's payments to us is based on clinical performance or patient outcomes or co-morbidities, we might be over-reimbursed by the government which could subject us to certain liability. For example, CMS published a final rule that implemented a statute under the ACA. This statute requires providers to report and return Medicare and Medicaid overpayments within the later of (a) 60 days after the overpayment is identified, or (b) the date any corresponding cost report is due, if applicable. An overpayment impermissibly retained under this statute could subject us to liability under the FCA, exclusion, and penalties under the federal Civil Monetary Penalty statute.

For additional details regarding the risks we face for failing to adhere to our Medicare and Medicaid regulatory compliance obligations, see the risk factor below under the heading "If we fail to adhere to all of the complex government regulations that apply to our business, we could suffer severe consequences that could have a material adverse effect on our revenues, earnings, cash flows and stock price."

Changes in state Medicaid or other non-Medicare government-based programs or payment rates could reduce our revenues, earnings and cash flows.

Approximately 22% of our dialysis services revenues for the year ended December 31, 2016 were generated from patients who have state Medicaid or other non-Medicare government-based programs, such as coverage through the Department of Veterans Affairs (VA), as their primary coverage. As state governments and other governmental organizations face increasing budgetary pressure, we may in turn face reductions in payment rates, delays in the receipt of payments, limitations on enrollee eligibility or other changes to the applicable programs. For example, certain state Medicaid programs and the VA have recently considered, proposed or implemented payment rate reductions.

The VA adopted Medicare's bundled PPS pricing methodology for any veterans receiving treatment from non-VA providers under a national contracting initiative. Since we are a non-VA provider, these reimbursements are tied to a percentage of Medicare reimbursement, and we have exposure to any dialysis reimbursement changes made by CMS. Approximately 2% of our dialysis services revenues for the year ended December 31, 2016 were generated by the VA.

In 2013, we entered into a five-year Nationwide Dialysis Services contract with the VA which is subject to one-year renewal periods, consistent with all provider agreements with the VA under this contract. During the length of the contract, the VA has elected not to make adjustments to reimbursement percentages that are tied to a percentage of Medicare reimbursement rates. These agreements provide the VA with the right to terminate the agreements without cause on short notice. Should the VA not renew or cancel these agreements for any reason, we may cease accepting patients under this program and may be forced to close centers, which could adversely affect our revenues, earnings and cash flows.

State Medicaid programs are increasingly adopting Medicare-like bundled payment systems, but sometimes these payment systems are poorly defined and are implemented without any claims processing infrastructure, or patient or facility adjusters. If these payment systems are implemented without any adjusters and claims processing changes, Medicaid payments will be substantially reduced and the costs to submit such claims may increase, which will have a negative impact on our revenues, earnings and cash flows. In addition, some state Medicaid program eligibility requirements mandate that citizen enrollees in such programs provide documented proof of citizenship. If our patients cannot meet these proof of citizenship documentation requirements, they may be denied coverage under these programs, resulting in decreased patient volumes and revenue. These Medicaid payment and enrollment changes, along with similar changes to other non-Medicare government programs could reduce the rates paid by these programs for dialysis and related services, delay the receipt of payment for services provided and further limit eligibility for coverage which could adversely affect our revenues, earnings and cash flows.

Changes in clinical practices, payment rates or regulations impacting EPO and other pharmaceuticals could adversely affect our operating results, reduce our revenues, earnings and cash flows and negatively impact our ability to care for patients.

Medicare bundles EPO into the PPS such that dosing variations do not change the amount paid to a dialysis facility. Although some Medicaid programs and other payors suggest movement towards a bundled payment system inclusive of EPO, some non-Medicare payors continue to pay for EPO separately from the treatment rate.

Additionally, evaluations on the utilization and reimbursement for ESAs, which have occurred in the past and may occur in the future, and related actions by the U.S. Congress and federal agencies, could result in further restrictions on the utilization and

reimbursement for ESAs. Commercial payors have increasingly examined their administration policies for EPO and, in some cases, have modified those policies. Changes in labeling of EPO and other pharmaceuticals in a manner that alters physician practice patterns or accepted clinical practices, and/or changes in private and governmental payment criteria, including the introduction of EPO administration policies could have a material adverse effect on our revenues, earnings and cash flows. Further increased utilization of EPO for patients for whom the cost of EPO is included in a bundled reimbursement rate, or further decreases in reimbursement for EPO and other pharmaceuticals that are not included in a bundled reimbursement rate, could also have a material adverse effect on our revenues, earnings and cash flows.

Additionally, as a result of the current high level of scrutiny and controversy, we may be subject to increased inquiries or audits from a variety of governmental bodies or claims by third parties. Although we believe our anemia management practices and other pharmaceutical administration practices have been compliant with existing laws and regulations, increased inquiries or audits from governmental bodies or claims by third parties would require management's attention, and could result in significant legal expense. Any negative findings could result in substantial financial penalties or repayment obligations, the imposition of certain obligations on and changes to our practices and procedures as well as the attendant financial burden on us to comply with the obligations, or exclusion from future participation in the Medicare and Medicaid programs, and could have a material adverse effect on our revenues, earnings and cash flows.

If we fail to comply with our Corporate Integrity Agreement, we could be subject to substantial penalties and exclusion from participation in federal healthcare programs that may adversely impact our revenues, earnings and cash flows.

In October 2014, we entered into a Settlement Agreement with the United States and relator David Barbetta to resolve the then pending 2010 and 2011 U.S. Attorney physician relationship investigations and paid $406 million in settlement amounts, civil forfeiture, and interest to the United States and certain states. In connection with the resolution of these matters, and in exchange for the OIG's agreement not to exclude us from participating in the federal healthcare programs, we have entered into a five-year CIA with the OIG. The CIA (i) requires that we maintain certain elements of our compliance programs; (ii) imposes certain expanded compliance-related requirements during the term of the CIA; (iii) requires ongoing monitoring and reporting by an independent monitor, imposes certain reporting, certification, records retention and training obligations, allocates certain oversight responsibility to the Board's Compliance Committee, and necessitates the creation of a Management Compliance Committee and the retention of an independent compliance advisor to the Board; and (iv) contains certain business restrictions related to a subset of our joint venture arrangements, including our agreeing to (1) unwind 11 joint venture transactions that were created through partial divestitures to, or partial acquisitions from, nephrologists, and that cover 26 of our 2,119 clinics that existed at the time we entered into the Settlement Agreement, all of which have been completed, (2) not enter into certain types of partial divestiture joint venture transactions with nephrologists during the term of the CIA, (3) non-enforcement of certain patient-related non-solicitation restrictions, and (4) certain other restrictions. The costs associated with compliance with the CIA could be substantial and may be greater than we currently anticipate. In addition, in the event of a breach of the CIA, we could become liable for payment of certain stipulated penalties, and could be excluded from participation in federal healthcare programs. The OIG notified us that it considered us to be previously in breach of the CIA because of three implementation deficiencies. While we have remediated the deficiencies and have paid certain stipulated penalties, we cannot provide any assurances that we may not be found in breach of the CIA in the future. In general, the costs associated with compliance with the CIA, or any liability or consequences associated with a breach, could have a material adverse effect on our revenues, earnings and cash flows. For our domestic dialysis business, we are required under the CIA to report to the OIG (i) probable violations of criminal, civil or administrative laws applicable to any federal health care program for which penalties or exclusions may be authorized under applicable laws and regulations; (ii) substantial overpayments of amounts of money we have received in excess of the amounts due and payable under the federal healthcare program requirements; and (iii) employment of or contracting with individuals ineligible from participating in the federal healthcare programs (we refer to these collectively as Reportable Events). We have provided the OIG notice of Reportable Events, and we may identify and report additional events in the future. If any of our operations are found to violate government laws and regulations, we could suffer severe consequences that would have a material adverse effect on our revenues, earnings, cash flows and stock price, including those consequences described under the risk factor "If we fail to adhere to all of the complex government regulations that apply to our business, we could suffer severe consequences that would substantially reduce our revenues, earnings, cash flows and stock price."

Delays in state Medicare and Medicaid certification of our dialysis centers could adversely affect our revenues, earnings and cash flows.

Before we can begin billing for patients treated in our outpatient dialysis centers who are enrolled in government-based programs, we are required to obtain state and federal certification for participation in the Medicare and Medicaid programs. As state agencies responsible for surveying dialysis centers on behalf of the state and Medicare program face increasing budgetary pressure, certain states are having difficulty keeping up with certifying dialysis centers in the normal course resulting in significant delays in certification. If state governments continue to have difficulty keeping up with certifying new centers in the normal course and we continue to experience significant delays in our ability to treat and bill for services provided to patients covered under government programs, it could cause us to incur write-offs of investments or accelerate the recognition of lease obligations in the event we have to

close centers or our centers' operating performance deteriorates, and it could have an adverse effect on our revenues, earnings and cash flows.

If our joint ventures were found to violate the law, we could suffer severe consequences that would have a material adverse effect on our revenues, earnings and cash flows.

As of December 31, 2016, we owned a controlling interest in numerous dialysis-related joint ventures, which represented approximately 24% of our dialysis and related lab services revenues for the year ended December 31, 2016. In addition, we also owned noncontrolling equity investments in several other dialysis related joint ventures. We may continue to increase the number of our joint ventures. Many of our joint ventures with physicians or physician groups also have certain physician owners providing medical director services to centers we own and operate. Because our relationships with physicians are governed by the federal and state anti-kickback statutes, we have sought to structure our joint venture arrangements to satisfy as many federal safe harbor requirements as we believe are commercially reasonable. However, although our joint venture arrangements do not satisfy all of the elements of any safe harbor under the federal Anti-Kickback Statute, they are not automatically prohibited under the federal Anti-Kickback Statute but are susceptible to government scrutiny. For example, in October 2014, we entered into a Settlement Agreement with the United States and relator David Barbetta to resolve the then pending 2010 and 2011 U.S. Attorney physician relationship investigations regarding certain of our joint ventures and paid $406 million in settlement amounts, civil forfeiture, and interest to the United States and certain states. For further details, see "If we fail to comply with our Corporate Integrity Agreement, we could be subject to substantial penalties and exclusion from participation in federal healthcare programs that could have a material effect on our revenues, earnings and cash flows".

There are significant estimating risks associated with the amount of dialysis revenues and related refund liabilities that we recognize, and if we are unable to accurately estimate our revenues and related refund liabilities, it could impact the timing and the amount of our revenues recognition or have a significant impact on our operating results.

There are significant estimating risks associated with the amount of dialysis and related lab services revenues and related refund liabilities that we recognize in a reporting period. The billing and collection process is complex due to ongoing insurance coverage changes, geographic coverage differences, differing interpretations of contract coverage and other payor issues. Determining applicable primary and secondary coverage for approximately 187,700 U.S. patients at any point in time, together with the changes in patient coverage that occur each month, requires complex, resource-intensive processes. Errors in determining the correct coordination of benefits may result in refunds to payors. Revenues associated with Medicare and Medicaid programs are also subject to estimating risk related to the amounts not paid by the primary government payor that will ultimately be collectible from other government programs paying secondary coverage, the patient's commercial health plan secondary coverage or the patient. Collections, refunds and payor retractions typically continue to occur for up to three years and longer after services are provided. We generally expect our range of dialysis and related lab services revenues estimating risk to be within 1% of net revenues for the segment. If our estimates of dialysis and related lab services revenues and related refund liabilities are materially inaccurate, it could impact the timing and the amount of our revenues recognition and have a significant impact on our operating results.

Our ancillary services and strategic initiatives, including our pharmacy services and our international dialysis operations, that we invest in now or in the future may generate losses and may ultimately be unsuccessful. In the event that one or more of these activities is unsuccessful, our revenues, earnings and cash flows may be negatively impacted and we may have to write off our investment and incur other exit costs.

Our ancillary services and strategic initiatives currently include pharmacy services, disease management services, vascular access services, ESRD clinical research programs, physician services, physician practice management services, direct primary care and our international dialysis operations. We expect to add additional service offerings and pursue additional strategic initiatives in the future as circumstances warrant, which could include healthcare services not related to dialysis. Many of these initiatives require or would require investments of both management and financial resources and can generate significant losses for a substantial period of time and may not become profitable. There can be no assurance that any such strategic initiative will ultimately be successful. Any significant change in market conditions, or business performance, or in the political, legislative or regulatory environment, may impact the economic viability of any of these strategic initiatives.

If any of our ancillary services or strategic initiatives, including our pharmacy services and our international dialysis operations, do not perform as planned, our revenues, earnings and cash flows may be negatively impacted, we may incur a material write-off or an impairment of our investment, including goodwill, in one or more of these activities, or we could incur significant termination costs if we were to exit a certain line of business.

If a significant number of physicians were to cease referring patients to our dialysis centers, whether due to regulatory or other reasons, it would have a material adverse effect on our revenues, earnings and cash flows.

We believe that physicians prefer to have their patients treated at dialysis centers where they or other members of their practice supervise the overall care provided as medical director of the center. As a result, the primary referral source for most of our centers is often the physician or physician group providing medical director services to the center.

Our medical director contracts are for fixed periods, generally ten years, and at any given time a large number of them could be up for renewal at the same time. Medical directors have no obligation to extend their agreements with us and if we are unable to enforce noncompetition provisions contained in terminated medical director agreements, our former medical directors may choose to provide medical director services for competing providers or establish their own dialysis centers in competition with ours. Neither our current nor former medical directors have an obligation to refer their patients to our centers.

Opportunities presented by our competitors or different affiliation models in the changing healthcare environment, such as an increase in the number of physicians becoming employed by hospitals or a perceived decrease in the quality of service levels at our centers, may negatively impact a medical director's decision to enter into or extend his or her agreement with us, refer patients to our centers or otherwise negatively impact treatment volumes.

In addition, we may take actions to restructure existing relationships or take positions in negotiating extensions of relationships to assure compliance with the federal Anti-Kickback Statute, Stark Law and other similar laws. If the terms of any existing agreement are found to violate applicable laws, we may not be successful in restructuring the relationship, which could lead to the early termination of the agreement, or cause the physician to stop referring patients to our dialysis centers. These actions, in an effort to comply with applicable laws and regulations, could negatively impact the decision of physicians to extend their medical director agreements with us or to refer their patients to us. If a significant number of physicians were to cease referring patients to our dialysis centers, it would have a material adverse effect on our revenues, earnings and cash flows.

If there are shortages of skilled clinical personnel or if we experience a higher than normal turnover rate, we may experience disruptions in our business operations and increases in operating expenses.

We are experiencing increased labor costs and difficulties in hiring nurses due to a nationwide shortage of skilled clinical personnel. We compete for nurses with hospitals and other healthcare providers. This nursing shortage may limit our ability to expand our operations. In addition, changes in certification requirements or increases in the required staffing levels for skilled clinical personnel can impact our ability to maintain sufficient staff levels to the extent our teammates are not able to meet new requirements, or we experience a higher than normal turnover rate due to increased competition for qualified clinical personnel. If we are unable to hire skilled clinical personnel when needed, or if we experience a higher than normal turnover rate for our skilled clinical personnel, our operations and treatment growth will be negatively impacted, which would result in reduced revenues, earnings and cash flows.

Our business is labor intensive and could be adversely affected if we are unable to maintain satisfactory relations with our employees or if union organizing activities result in significant increases in our operating costs or decreases in productivity.

Our business is labor intensive, and our results are subject to variations in labor-related costs, productivity and the number of pending or potential claims against us related to labor and employment practices. If political efforts at the national and local level result in actions or proposals that increase the likelihood of union organizing activities at our facilities or if union organizing activities increase for other reasons, or if labor and employment claims, including the filing of class action suits, or work stoppages, trend upwards, our operating costs could increase and our employee relations, productivity, earnings and cash flows could be adversely affected.

Complications associated with our billing and collections system could have a material adverse effect on our revenues, cash flows and operating results.

Our billing system is critical to our billing operations. If there are defects in the billing system, we may experience difficulties in our ability to successfully bill and collect for services rendered, including a delay in collections, a reduction in the amounts collected, increased risk of retractions from and refunds to commercial and government payors, an increase in our provision for uncollectible accounts receivable and noncompliance with reimbursement regulations, any or all of which could have a material adverse effect on our revenues, cash flows and operating results.

Risk factors related to DMG:

DMG is subject to many of the same risks to which our dialysis business is subject.

As a participant in the healthcare industry, DMG is subject to many of the same risks as our dialysis business is, as described in the risk factors set forth above in this Part I, Item 1A, any of which could materially and adversely affect DMG's revenues, earnings or cash flows.

Under most of DMG's agreements with health plans, DMG assumes some or all of the risk that the cost of providing services will exceed its compensation.

Over 83% of DMG's revenue for the year ended December 31, 2016 is derived from fixed per member per month (PMPM) fees paid by health plans under capitation agreements with DMG or its associated physician groups. While there are variations specific to each arrangement, DMG, through DaVita Health Plan of California, Inc. (DHPC), a subsidiary of HealthCare Partners Holdings, LLC and a restricted Knox-Keene licensed entity, and, in certain instances, DMG's associated physician groups generally contract with health plans to receive a PMPM fee for professional services and assume the financial responsibility for professional services only. In some cases, the health plans separately enter into capitation contracts with third parties (typically hospitals) who receive directly a PMPM fee and assume contractual financial responsibility for hospital services. In other cases, the health plan does not pay any portion of the PMPM fee to the hospital, but rather administers claims for hospital expenses itself. In both scenarios, DMG enters into managed care-related administrative services agreements or similar arrangements with those third parties (typically hospitals) under which DMG agrees to be responsible for utilization review, quality assurance, and other managed care-related administrative functions and claim payments. As compensation for such administrative services, DMG is entitled to receive a percentage of the amount by which the institutional capitation revenue received from health plans exceeds institutional expenses; any such risk-share amount to which DMG is entitled is recorded as medical revenues, and DMG is also responsible for a percentage of any short-fall in the event that institutional expenses exceed institutional revenues. To the extent that members require more care than is anticipated, aggregate fixed PMPM amounts, or capitation payments, may be insufficient to cover the costs associated with treatment. If medical expenses exceed estimates, except in very limited circumstances, DMG will not be able to increase the PMPM fee received under these risk agreements during their then-current terms and could, directly or indirectly through its contracts with its associated physician groups, suffer losses with respect to such agreements.

Changes in DMG's or its associated physician groups' anticipated ratio of medical expense to revenue can significantly impact DMG's financial results. Accordingly, the failure to adequately predict and control medical expenses and to make reasonable estimates and maintain adequate accruals for incurred but not reported claims, may have a material adverse effect on DMG's financial condition, results of operations or cash flows.

Historically, DMG's and its associated physician groups' medical expenses as a percentage of revenue have fluctuated. Factors that may cause medical expenses to exceed estimates include:

- the health status of members;
- higher than expected utilization of new or existing healthcare services or technologies;
- an increase in the cost of healthcare services and supplies, including pharmaceuticals, whether as a result of inflation or otherwise;
- changes to mandated benefits or other changes in healthcare laws, regulations and practices;
- periodic renegotiation of provider contracts with specialist physicians, hospitals and ancillary providers;
- periodic renegotiation of contracts with DMG's affiliated primary care physicians and specialists;
- changes in the demographics of the participating members and medical trends;
- contractual or claims disputes with providers, hospitals or other service providers within a health plan's network;
- the occurrence of catastrophes, major epidemics or acts of terrorism; and
- the reduction of health plan premiums.

Risk-sharing arrangements that DMG and its associated physician groups have with health plans and hospitals could result in their costs exceeding the corresponding revenues, which could reduce or eliminate any shared risk profitability.

Most of the agreements between health plans and DMG and its associated physician groups contain risk-sharing arrangements under which the physician groups can earn additional compensation from the health plans by coordinating the provision of quality, cost-effective healthcare to members. However, such arrangements may require the physician group to assume a portion of any loss sustained from these arrangements, thereby reducing DMG's net income. Under these risk-sharing arrangements, DMG and its associated physician groups are responsible for a portion of the cost of hospital services or other services that are not capitated. The terms of the particular risk-sharing arrangement allocate responsibility to the respective parties when the cost of services exceeds the related revenue, which results in a deficit, or permit the parties to share in any surplus amounts when actual costs are less than the related revenue. The amount of non-capitated medical and hospital costs in any period could be affected by factors beyond the control of DMG, such as changes in treatment protocols, new technologies, longer lengths of stay by the patient and inflation. Certain of DMG's agreements with health plans stipulate that risk-sharing pool deficit amounts are carried forward to offset any future years' surplus amounts DMG would otherwise be entitled to receive. DMG accrues for any such risk-sharing deficits. To the extent that such non-capitated medical and hospital costs are higher than anticipated, revenue may not be sufficient to cover the risk-sharing deficits the health plans and DMG are responsible for, which could reduce DMG's revenues and profitability.

Renegotiation, renewal or termination of capitation agreements with health plans could have a significant impact on DMG's future profitability.

Under most of DMG's and its associated physician groups' capitation agreements with health plans, the health plan is generally permitted to modify the benefit and risk obligations and compensation rights from time to time during the terms of the agreements. If a health plan exercises its right to amend its benefit and risk obligations and compensation rights, DMG and its associated physician groups are generally allowed a period of time to object to such amendment. If DMG or its associated physician group so objects, under some of the risk agreements, the relevant health plan may terminate the applicable agreement upon 90 to 180 days written notice. If DMG or its associated physician groups enter into capitation contracts or other risk sharing arrangements with unfavorable economic terms, or a capitation contract is amended to include unfavorable terms, DMG could, directly or indirectly through its contracts with its associated physician groups, suffer losses with respect to such contract. Since DMG does not negotiate with CMS or any health plan regarding the benefits to be provided under their Medicare Advantage plans, DMG often has just a few months to familiarize itself with each new annual package of benefits it is expected to offer. Depending on the health plan at issue and the amount of revenue associated with the health plan's risk agreement, the renegotiated terms or termination may have a material adverse effect on our DMG division and the Company's future revenues and profitability.

Laws regulating the corporate practice of medicine could restrict the manner in which DMG is permitted to conduct its business, and the failure to comply with such laws could subject DMG to penalties or require a restructuring of DMG.

Some states have laws that prohibit business entities, such as DMG, from practicing medicine, employing physicians to practice medicine, exercising control over medical decisions by physicians (also known collectively as the corporate practice of medicine) or engaging in certain arrangements, such as fee-splitting, with physicians. In some states these prohibitions are expressly stated in a statute or regulation, while in other states the prohibition is a matter of judicial or regulatory interpretation. Of the states in which DMG currently operates, California, Colorado, Nevada and Washington generally prohibit the corporate practice of medicine, and other states may as well.

In California, Colorado, Nevada and Washington, DMG operates by maintaining long-term contracts with its associated physician groups which are each owned and operated by physicians and which employ or contract with additional physicians to provide physician services. Under these arrangements, DMG provides management services and, receives a management fee for providing non-medical management services; however, DMG does not represent that it offers medical services, and does not exercise influence or control over the practice of medicine by the physicians or the associated physician groups.

In addition to the above management arrangements, DMG has certain contractual rights relating to the orderly transfer of equity interests in certain of its associated California, Colorado, Nevada and Washington physician groups through succession agreements and other arrangements with their physician equity holders. However, such equity interests cannot be transferred to or held by DMG or by any non-professional organization. Accordingly, neither DMG nor DMG's subsidiaries directly own any equity interests in any physician groups in California, Colorado, Nevada and Washington. In the event that any of these associated physician groups fail to comply with the management arrangement or any management arrangement is terminated and/or DMG is unable to enforce its contractual rights over the orderly transfer of equity interests in its associated physician groups, such events could have a material adverse effect on DMG's business, financial condition or results of operations.

It is possible that a state regulatory agency or a court could determine that DMG's agreements with physician equity holders of certain managed California, Colorado, Nevada and Washington associated physician groups as described above, either independently

or coupled with the management services agreements with such associated physician groups, are in violation of the corporate practice of medicine doctrine. As a result, these arrangements could be deemed invalid, potentially resulting in a loss of revenues and an adverse effect on results of operations derived from such associated physician groups. Such a determination could force a restructuring of DMG's management arrangements with associated physician groups in California, Colorado, Nevada and/or Washington, which might include revisions of the management services agreements, including a modification of the management fee and/or establishing an alternative structure that would permit DMG to contract with a physician network without violating the corporate practice of medicine prohibition. There can be no assurance that such a restructuring would be feasible, or that it could be accomplished within a reasonable time frame without a material adverse effect on DMG's operations and financial results. In December 2013, DHPC obtained a restricted Knox-Keene license in California, which permits DHPC to contract with health plans in California to accept global risk without violating the corporate practice of medicine prohibition. However, DMG and DMG's Colorado, Nevada and Washington associated physician groups, as well as those physician equity holders of associated physician groups who are subject to succession agreements with DMG, could be subject to criminal or civil penalties or an injunction for practicing medicine without a license or aiding and abetting the unlicensed practice of medicine.

If DMG's agreements or arrangements with any physician equity holder(s) of associated physicians, physician groups or IPAs are deemed invalid under state law, including laws against the corporate practice of medicine, or federal law, or are terminated as a result of changes in state law, or if there is a change in accounting standards by the Financial Accounting Standards Board (FASB) or the interpretation thereof affecting consolidation of entities, it could impact DMG's consolidation of total revenues derived from such associated physician groups.

DMG's financial statements are consolidated in accordance with applicable accounting standards and include the accounts of its majority-owned subsidiaries and certain non-owned DMG-associated and managed physician groups. Such consolidation for accounting and/or tax purposes does not, is not intended to, and should not be deemed to, imply or provide to DMG any control over the medical or clinical affairs of such physician groups. In the event of a change in accounting standards promulgated by FASB or in interpretation of its standards, or if there is an adverse determination by a regulatory agency or a court, or a change in state or federal law relating to the ability to maintain present agreements or arrangements with such physician groups, DMG may not be permitted to continue to consolidate the total revenues of such organizations. A change in accounting for consolidation with respect to DMG's present agreement or arrangements would diminish DMG's reported revenues but would not be expected to materially adversely affect its reported results of operations, while regulatory or legal rulings or changes in law interfering with DMG's ability to maintain its present agreements or arrangements could materially diminish both revenues and results of operations.

If DHPC is not able to satisfy financial solvency or other regulatory requirements, we could become subject to sanctions and its license to do business in California could be limited, suspended or terminated.

Knox-Keene requires healthcare service plans operating in California to comply with financial solvency and other requirements overseen by the California Department of Managed HealthCare (DMHC). Under Knox-Keene, DHPC is required to, among other things:

- Maintain, at all times, a minimum tangible net equity (TNE);
- Submit periodic financial solvency reports to the DMHC containing various data regarding performance and financial solvency;
- Comply with extensive regulatory requirements; and
- Submit to periodic regulatory audits and reviews concerning DHPC operations and compliance with Knox-Keene.

In the event that DHPC is not in compliance with the provisions of Knox-Keene, we could be subject to sanctions, or limitations on, or suspension of its license to do business in California.

If DMG's associated physician group is not able to satisfy the California DMHC's financial solvency requirements, DMG's associated physician group could become subject to sanctions and DMG's ability to do business in California could be limited or terminated.

The California DMHC has instituted financial solvency regulations to monitor the financial solvency of capitated physician groups. Under these regulations, DMG's associated physician group is required to, among other things:

- Maintain, at all times, a minimum cash-to-claims ratio (where cash-to-claims ratio means the organization's cash, marketable securities and certain qualified receivables, divided by the organization's total unpaid claims liability). The regulation currently requires a cash-to-claims ratio of 0.75.

- Submit periodic reports to the California DMHC containing various data and attestations regarding performance and financial solvency, including incurred but not reported calculations and documentation, and attestations as to whether or not the organization was in compliance with Knox-Keene requirements related to claims payment timeliness, had maintained positive TNE (i.e., at least $1.00) and had maintained positive working capital (i.e., at least $1.00).

In the event that DMG's associated physician group is not in compliance with any of the above criteria, DMG's associated physician group could be subject to sanctions, or limitations on, or removal of, its ability to do business in California.

Reductions in Medicare Advantage health plan reimbursement rates stemming from recent healthcare reforms and any future related regulations may negatively impact DMG's business, revenue and profitability.

A significant portion of DMG's revenue is directly or indirectly derived from the monthly premium payments paid by CMS to health plans for medical services provided to Medicare Advantage enrollees. As a result, DMG's results of operations are, in part, dependent on government funding levels for Medicare Advantage programs. Any changes that limit or reduce Medicare Advantage reimbursement levels, such as reductions in or limitations of reimbursement amounts or rates under programs, reductions in funding of programs, expansion of benefits without adequate funding, elimination of coverage for certain benefits, or elimination of coverage for certain individuals or treatments under programs, could have a material adverse effect on DMG's revenues, earnings and cash flows.

Each year, CMS issues a final rule to establish the Medicare Advantage benchmark payment rates for the following calendar year. Any reduction to Medicare Advantage rates to DMG that is greater compared to the industry average rate may have material adverse effect on DMG's operations and cash flows. The final impact of the Medicare Advantage rates can vary from any estimate we may have and may be further impacted by the relative growth of DMG's Medicare Advantage patient volumes across markets as well as by the benefit plan designs submitted. It is possible that we may underestimate the impact of the Medicare Advantage rates on our business, which may have a material adverse effect on our financial position, results of operation or cash flows.

We have taken impairment charges against the goodwill of three of our DMG reporting units in the fourth quarter of 2015 and the first and second quarters of 2016 based on continuing developments at our DMG reporting units, including the Medicare Advantage final benchmark rates for 2017 announced on April 4, 2016, further changes in our expectations concerning future government reimbursement rates and our expected ability to mitigate them, as well as medical cost and utilization trends, underperformance of certain at-risk units in recent quarters and other market conditions. We may also need to take additional goodwill impairment charges against earnings in a future period, depending on the impact of continuing changes on the value of our DMG reporting units. A goodwill impairment occurs when the carrying amount of a reporting unit's goodwill is in excess of its implied fair value, and the amount of such non-cash charge, if any, could be significant. In estimating the fair value of our DMG reporting units, we update our forecasts for our at-risk DMG reporting units to reflect the expected future cash flows that we believe market participants would use in determining fair values of our DMG reporting units if they were to acquire these businesses. We and our independent advisors also use certain estimates and key assumptions in determining the estimate of these fair values, including applicable market multiples, discount and long-term growth rates, market data and future reimbursement rates. Our estimates of the fair value of our DMG reporting units could differ from the actual values that a market participant would pay for these reporting units.

DMG's Medicare Advantage revenues may continue to be volatile in the future, which could have a material impact on DMG's ongoing financial performance.

The Health Reform Acts contain a number of provisions that negatively impact Medicare Advantage plans, which may each have an adverse effect on DMG's revenues, earnings and cash flows. These provisions include the following:

- Medicare Advantage benchmarks for 2011 were frozen at 2010 levels. From 2012 through 2016, Medicare Advantage benchmark rates were phased down from prior levels. The new benchmarks will be fully phased-in in 2017 and will range between 95% and 115% of the Medicare FFS costs, depending on a plan's geographic area. If our costs escalate faster than can be absorbed by the level of revenues implied by these benchmark rates, then it could have a significant negative impact on DMG's earnings and cash flows.

- Rebates received by Medicare Advantage plans that were reduced, with larger reductions for plans failing to receive certain quality ratings.

- The Secretary of HHS has been granted the explicit authority to deny Medicare Advantage plan bids that propose significant increases in cost sharing or decreases in benefits. If the bids submitted by plans contracted with DMG are denied, this would have a significant negative impact on DMG's revenues, earnings and cash flows.

- Medicare Advantage plans with medical loss ratios below 85% are required to pay a rebate to the Secretary of HHS. The rebate amount is the total revenue under the contract year multiplied by the difference between 85% and the plan's actual medical loss ratio. The Secretary of HHS will halt enrollment in any plan failing to meet this ratio for three consecutive years, and terminate any plan failing to meet the ratio for five consecutive years. If a DMG-contracting Medicare Advantage plan experiences a limitation on enrollment or is otherwise terminated from the Medicare Advantage program, DMG may suffer materially adverse consequences to its business or financial condition.

- Prescription drug plans are required to provide coverage of certain drug categories on a list developed by the Secretary of HHS, which could increase the cost of providing care to Medicare Advantage enrollees, and thereby reduce DMG's revenues and earnings. The Medicare Part D premium amount subsidized for high-income beneficiaries has been reduced, which could lower the number of Medicare Advantage enrollees, which would have a negative impact on DMG's revenues, earnings and cash flows.

- CMS increased coding intensity adjustments for Medicare Advantage plans beginning in 2014 and continuing through 2018, which reduces CMS payments to Medicare Advantage plans, which in turn will likely reduce the amounts payable to DMG and its associated physicians, physician groups, and IPAs under its capitation agreements.

However, the 2016 Presidential and Congressional elections have caused the future state of the Health Reform Acts to be unclear. While specific changes and their timing are not yet apparent, enacted reforms and future legislative changes could have a material adverse effect on our results of operations.

There is also uncertainty regarding both Medicare Advantage payment rates and beneficiary enrollment, which, if reduced, would reduce DMG's overall revenues and net income. For example, although the Congressional Budget Office (CBO) predicted in 2010 that Medicare Advantage participation would drop substantially by 2020, the CBO now predicts that enrollment in Medicare Advantage (and other contracts covering Medicare Parts A and B) could reach 30 million by 2026. Although Medicare Advantage enrollment increased by approximately 5.6 million, or by 50%, between the enactment of the ACA in 2010 and 2015, there can be no assurance that this trend will continue. Further, fluctuation in Medicare Advantage payment rates are evidenced by CMS's annual announcement of the expected average change in revenue from the prior year: for 2015, CMS announced an average increase of 0.4%; for 2016, 1.25%; and for 2017, 0.85%. Uncertainty over Medicare Advantage enrollment and payment rates present a continuing risk to DMG's business.

Medicare Advantage enrollment continues to be highly concentrated among a few payors, both nationally and in local markets. In 2017, in 439 counties in 26 states, only one company will offer Medicare Advantage plans– an indicator that those markets may lack competition. Consolidation among Medicare Advantage plans, or the Medicare program's failure to attract additional plans to participate in the Medicare Advantage program, could have a negative impact of DMG's revenues, earnings, and/or cash flows.

DMG's operations are dependent on competing health plans and, at times, a health plan's and DMG's economic interests may diverge.

For the year ended December 31, 2016, 63% of DMG's consolidated capitated medical revenues were earned through contracts with three health plans.

DMG expects that, going forward, substantially all of its revenue will continue to be derived from its contracts with health plans. Each health plan may immediately terminate any of DMG's contracts and/or any individual credentialed physician upon the occurrence of certain events. They may also amend the material terms of the contracts under certain circumstances. Failure to maintain the contracts on favorable terms, for any reason, would materially and adversely affect DMG's results of operations and financial condition. A material decline in the number of members could also have a material adverse effect on DMG's results of operations.

Notwithstanding each health plan's and DMG's current shared interest in providing service to DMG's members who are enrolled in the subject health plans, the health plans may have different and, at times, opposing economic interests from those of DMG. The health plans provide a wide range of health insurance services across a wide range of geographic regions, utilizing a vast network of providers. As a result, they and DMG may have different views regarding the proper pricing of services and/or the proper pricing of the various service providers in their provider networks, the cost of which DMG bears to the extent that the services of such service providers are utilized. These health plans may also have different views than DMG regarding the efforts and expenditures that they, DMG, and/or other service providers should make to achieve and/or maintain various quality ratings. In addition, several health plans have acquired or announced their intent to acquire provider organizations. If health plans with which DMG contracts acquire a significant number of provider organizations, they may not continue to contract with DMG or contract on less favorable terms or seek to prevent DMG from acquiring or entering into arrangements with certain providers. Similarly, as a result of changes in laws, regulations, consumer preferences, or other factors, the health plans may find it in their best interest to provide health insurance services pursuant to another payment or reimbursement structure. In the event DMG's interests diverge from the interests of the health plans, DMG may have limited

recourse or alternative options in light of its dependence on these health plans. There can be no assurances that DMG will continue to find it mutually beneficial to work with these health plans. As a result of various restrictive provisions that appear in some of the managed care agreements with health plans, DMG may at times have limitations on its ability to cancel an agreement with a particular health plan and immediately thereafter contract with a competing health plan with respect to the same service area.

DMG and its associated physicians, physician groups and IPAs and other physicians may be required to continue providing services following termination or renegotiation of certain agreements with health plans.

There are circumstances under federal and state law pursuant to which DMG and its associated physician groups, IPAs and other physicians could be obligated to continue to provide medical services to DMG members in their care following a termination of their applicable risk agreement with health plans and termination of the receipt of payments thereunder. In certain cases, this obligation could require the physician group or IPA to provide care to such member following the bankruptcy or insolvency of a health plan. Accordingly, the obligations to provide medical services to DMG members (and the associated costs) may not terminate at the time the applicable agreement with the health plan terminates, and DMG may not be able to recover its cost of providing those services from the health plan, which could have a material adverse effect on DMG's financial condition, results of operations and/or cash flows.

DMG operates primarily in California, Florida, Nevada, New Mexico, Washington and Colorado and may not be able to successfully establish a presence in new geographic regions.

DMG derives substantially all of its revenue from operations in California, Florida, Nevada, New Mexico, Washington and Colorado (which we refer to as the Existing Geographic Regions). As a result, DMG's exposure to many of the risks described herein is not mitigated by a greater diversification of geographic focus. Furthermore, due to the concentration of DMG's operations in the Existing Geographic Regions, it may be adversely affected by economic conditions, natural disasters (such as earthquakes or hurricanes), or acts of war or terrorism that disproportionately affect the Existing Geographic Regions as compared to other states and geographic markets.

To expand the operations of its network outside of the Existing Geographic Regions, DMG must devote resources to identify and explore perceived opportunities. Thereafter, DMG must, among other things, recruit and retain qualified personnel, develop new offices, establish potential new relationships with one or more health plans, and establish new relationships with physicians and other healthcare providers. The ability to establish such new relationships may be significantly inhibited by competition for such relationships and personnel in the healthcare marketplace in the targeted new geographic regions. Additionally, DMG may face the risk that a substantial portion of the patients served in a new geographic area may be enrolled in a Medicare FFS program and will not desire to transition to a Medicare Advantage program, such as those offered through the health plans that DMG serves, or they may enroll with other health plans with whom DMG does not contract to receive services, which could reduce substantially DMG's perceived opportunity in such geographic area. In addition, if DMG were to seek to expand outside of the Existing Geographic Regions, DMG would be required to comply with laws and regulations of states that may differ from the ones in which it currently operates, and could face competitors with greater knowledge of such local markets. DMG anticipates that any geographic expansion may require it to make a substantial investment of management time, capital and/or other resources. There can be no assurance that DMG will be able to establish profitable operations or relationships in any new geographic markets.

Reductions in the quality ratings of the health plans DMG serves could have an adverse effect on its results of operations, financial condition and/or cash flow.

As a result of the Health Reform Acts, the level of reimbursement each health plan receives from CMS is dependent, in part, upon the quality rating of the Medicare plan. Such ratings impact the percentage of any cost savings rebate and any bonuses earned by such health plan. Since a significant portion of DMG's revenue is expected to be calculated as a percentage of CMS reimbursements received by these health plans with respect to DMG members, reductions in the quality ratings of a health plan that DMG serves could have an adverse effect on its results of operations, financial condition, and/or cash flows.

Given each health plan's control of its plans and the many other providers that serve such plans, DMG believes that it will have limited ability to influence the overall quality rating of any such plan. In addition, CMS has begun terminating plans that have had a rating of less than three stars for three consecutive years, whereas Medicare Advantage plans with five stars are permitted to conduct enrollment throughout almost the entire year. Accordingly, since low quality ratings can potentially lead to the termination of a plan that DMG serves, DMG may not be able to prevent the potential termination of a contracting plan or a shift of patients to other plans based upon quality issues which could, in turn, have an adverse effect on DMG's results of operations, financial condition and/or cash flows.

DMG's records and submissions to a health plan may contain inaccurate or unsupportable information regarding risk adjustment scores of members, which could cause DMG to overstate or understate its revenue and subject it to various penalties.

DMG, on behalf of itself and its associated physicians, physician groups and IPAs, submits to health plans claims and encounter data that support the Medicare Risk Adjustment Factor (RAF) scores attributable to members. These RAF scores determine, in part, the revenue to which the health plans and, in turn, DMG is entitled for the provision of medical care to such members. The data submitted to CMS by each health plan is based, in part, on medical charts and diagnosis codes prepared and submitted by DMG. Each health plan generally relies on DMG and its employed or affiliated physicians to appropriately document and support such RAF data in DMG's medical records. Each health plan also relies on DMG and its employed or affiliated physicians to appropriately code claims for medical services provided to members. Erroneous claims and erroneous encounter records and submissions could result in inaccurate PMPM fee revenue and risk adjustment payments, which may be subject to correction or retroactive adjustment in later periods. This corrected or adjusted information may be reflected in financial statements for periods subsequent to the period in which the revenue was recorded. DMG might also need to refund a portion of the revenue that it received, which refund, depending on its magnitude, could damage its relationship with the applicable health plan and could have a material adverse effect on DMG's results of operations, financial condition or cash flows.

In June 2015, we received a subpoena from the OIG requesting information relating to our and our subsidiaries' (including DMG's and its subsidiary JSA's) provision of services to Medicare Advantage plans and related patient diagnosis coding and risk adjustment submissions and payments. See "Item 3. Legal Proceedings" and Note 17 to the consolidated financial statements included in this report for further details.

Additionally, CMS audits Medicare Advantage plans for documentation to support RAF-related payments for members chosen at random. The Medicare Advantage plans ask providers to submit the underlying documentation for members that they serve. It is possible that claims associated with members with higher RAF scores could be subject to more scrutiny in a CMS or plan audit. There is a possibility that a Medicare Advantage plan may seek repayment from DMG should CMS make any payment adjustments to the Medicare Advantage plan as a result of its audits. The plans also may hold DMG liable for any penalties owed to CMS for inaccurate or unsupportable RAF scores provided by DMG. In addition, DMG could be liable for penalties to the government under the FCA that range from $5,500 to $11,000 (adjusted for inflation) for each false claim, plus up to three times the amount of damages caused by each false claim, which can be as much as the amounts received directly or indirectly from the government for each such false claim. On February 3, 2017, the DOJ issued a final rule announcing adjustments to FCA penalties, under which the per claim penalty range increases to $10,957 to $21,916 for penalties assessed after February 3, 2017, so long as the underlying conduct occurred after November 2, 2015.

CMS has indicated that payment adjustments will not be limited to RAF scores for the specific Medicare Advantage enrollees for which errors are found but may also be extrapolated to the entire Medicare Advantage plan subject to a particular CMS contract. CMS has described its audit process as plan-year specific and stated that it will not extrapolate audit results for plan years prior to 2011. Because CMS has not stated otherwise, there is a risk that payment adjustments made as a result of one plan year's audit would be extrapolated to prior plan years after 2011.

There can be no assurance that a health plan will not be randomly selected or targeted for review by CMS or that the outcome of such a review will not result in a material adjustment in DMG's revenue and profitability, even if the information DMG submitted to the plan is accurate and supportable.

Separately, as described in further detail in "Item 3. Legal Proceedings" and Note 17 to the consolidated financial statements included in this report, on March 13, 2015, JSA, a subsidiary of DMG, received a subpoena from the OIG that relates, in part, to risk adjustment practices and data.

A failure to accurately estimate incurred but not reported medical expense could adversely affect DMG's profitability.

Patient care costs include estimates of future medical claims that have been incurred by the patient but for which the provider has not yet billed DMG. These claim estimates are made utilizing actuarial methods and are continually evaluated and adjusted by management, based upon DMG's historical claims experience and other factors, including an independent assessment by a nationally recognized actuarial firm. Adjustments, if necessary, are made to medical claims expense and capitated revenues when the assumptions used to determine DMG's claims liability changes and when actual claim costs are ultimately determined.

Due to the inherent uncertainties associated with the factors used in these estimates and changes in the patterns and rates of medical utilization, materially different amounts could be reported in DMG's financial statements for a particular period under different conditions or using different, but still reasonable, assumptions. It is possible that DMG's estimates of this type of claim may be inadequate in the future. In such event, DMG's results of operations could be adversely impacted. Further, the inability to estimate

these claims accurately may also affect DMG's ability to take timely corrective actions, further exacerbating the extent of any adverse effect on DMG's results.

DMG faces certain competitive threats which could reduce DMG's profitability and increase competition for patients.

DMG faces certain competitive threats based on certain features of the Medicare programs, including the following:

- As a result of the direct and indirect impacts of the Health Reform Acts, many Medicare beneficiaries may decide that an original Medicare FFS program is more attractive than a Medicare Advantage plan. As a result, enrollment in the health plans DMG serves may decrease.

- Managed care companies offer alternative products such as regional preferred provider organizations (PPOs) and private FFS plans. Medicare PPOs and private FFS plans allow their patients more flexibility in selecting physicians than Medicare Advantage health plans, which typically require patients to coordinate care with a primary care physician. The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 has encouraged the creation of regional PPOs through various incentives, including certain risk corridors, or cost reimbursement provisions, a stabilization fund for incentive payments, and special payments to hospitals not otherwise contracted with a Medicare Advantage plan that treat regional plan enrollees. The formation of regional Medicare PPOs and private FFS plans may affect DMG's relative attractiveness to existing and potential Medicare patients in their service areas.

- The payments for the local and regional Medicare Advantage plans are based on a competitive bidding process that may indirectly cause a decrease in the amount of the PMPM fee or result in an increase in benefits offered.

- The annual enrollment process and subsequent lock-in provisions of the Health Reform Acts may adversely affect DMG's level of revenue growth as it will limit the ability of a health plan to market to and enroll new Medicare beneficiaries in its established service areas outside of the annual enrollment period.

- CMS allows Medicare beneficiaries who are enrolled in a Medicare Advantage plan with a quality rating of 4.5 stars or less to enroll in a 5-star rated Medicare Advantage plan at any time during the benefit year. Therefore, DMG may face a competitive disadvantage in recruiting and retaining Medicare beneficiaries.

In addition to the competitive threats intrinsic to the Medicare programs, competition among health plans and among healthcare providers may also have a negative impact on DMG's profitability. For example, due to the large population of Medicare beneficiaries, DMG's Existing Geographic Regions have become increasingly attractive to health plans that may compete with DMG. DMG may not be able to continue to compete profitably in the healthcare industry if additional competitors enter the same market. If DMG cannot compete profitably, the ability of DMG to compete with other service providers that contract with competing health plans may be substantially impaired. Furthermore, if DMG is unable to obtain new members or experiences a loss of existing members to competitors during the open enrollment period for Medicare it could have a material adverse effect on DMG's financial condition and results of operations.

DMG competes directly with various regional and local companies that provide similar services in DMG's Existing Geographic Regions. DMG's competitors vary in size and scope and in terms of products and services offered. DMG believes that some of its competitors and potential competitors may be significantly larger than DMG and have greater financial, sales, marketing and other resources. Furthermore, it is DMG's belief that some of its competitors may make strategic acquisitions or establish cooperative relationships among themselves.

A disruption in DMG's healthcare provider networks could have an adverse effect on DMG's operations and profitability.

In any particular service area, healthcare providers or provider networks could refuse to contract with DMG, demand higher payments, or take other actions that could result in higher healthcare costs, disruption of benefits to DMG's members, or difficulty in meeting applicable regulatory or accreditation requirements. In some service areas, healthcare providers or provider networks may have significant market positions. If healthcare providers or provider networks refuse to contract with DMG, use their market position to negotiate favorable contracts, or place DMG at a competitive disadvantage, then DMG's ability to market or to be profitable in those service areas could be adversely affected. DMG's provider networks could also be disrupted by the financial insolvency of a large provider group. Any disruption in DMG's provider networks could result in a loss of members or higher healthcare costs.

DMG's revenues and profits could be diminished if DMG fails to retain and attract the services of key primary care physicians.

Key primary care physicians with large patient enrollment could retire, become disabled, terminate their provider contracts, get lured away by a competing independent physician association or medical group, or otherwise become unable or unwilling to continue practicing medicine or contracting with DMG or its associated physicians, physician groups or IPAs. In addition, DMG's associated physicians, physician groups and IPAs could view the business model as unfavorable or unattractive to such providers, which could cause such associated physicians, physician groups or IPAs to terminate their relationships with DMG. Moreover, given limitations relating to the enforcement of post-termination noncompetition covenants in California, it would be difficult to restrict a primary care physician from competing with DMG's associated physicians, physician groups or IPAs. As a result, members who have been served by such physicians could choose to enroll with competitors' physician organizations or could seek medical care elsewhere, which could reduce DMG's revenues and profits. Moreover, DMG may not be able to attract new physicians to replace the services of terminating physicians or to service its growing membership.

Participation in ACO programs is subject to federal regulation, supervision, and evolving regulatory developments that may result in financial liability.

The Health Reform Acts established Medicare Shared Savings Programs (MSSP) for ACOs, which took effect in January 2012. Under the MSSP, eligible organizations are accountable for the quality, cost and overall care of Medicare beneficiaries assigned to an ACO and may be eligible to share in any savings below a specified benchmark amount. The Secretary of HHS is also authorized, but not required, to use capitation payment models with ACOs. DMG has formed an MSSP ACO through a subsidiary, which operates in California, Florida, and Nevada and is evaluating whether to participate in more ACOs in the future. The continued development and expansion of ACOs will have an uncertain impact on DMG's revenue and profitability. We also are participating as a dialysis provider in Arizona, Florida, New Jersey, and Pennsylvania for the Innovation Center's CEC Model.

The ACO programs are relatively new and therefore operational and regulatory guidance is limited. It is possible that the operations of DMG's subsidiary ACO may not fully comply with current or future regulations and guidelines applicable to ACOs, may not achieve quality targets or cost savings, or may not attract or retain sufficient physicians or patients to allow DMG to meet its objectives. Additionally, poor performance could put the DMG ACO at financial risk with a potential obligation to CMS. Traditionally, other than FFS billing by the medical clinics and healthcare facilities operated by DMG, DMG has not directly contracted with CMS and has not operated any health plans or provider sponsored networks. Therefore, DMG may not have the necessary experience, systems or compliance to successfully achieve a positive return on its investment in the ACO or to avoid financial or regulatory liability. DMG believes that its historical experience with fully delegated managed care will be applicable to operation of its subsidiary ACO, but there can be no such assurance.

California hospitals may terminate their agreements with HealthCare Partners Affiliates Medical Group and DaVita Health Plan of California, Inc. (formerly HealthCare Partners Plan, Inc., and, together with HealthCare Partners Affiliates Medical Group, AMG) or reduce the fees they pay to DMG.

In California, AMG maintains significant hospital arrangements designed to facilitate the provision of coordinated hospital care with those services provided to members by AMG and its associated physicians, physician groups and IPAs. Through contractual arrangements with certain key hospitals, AMG provides utilization review, quality assurance and other management services related to the provision of patient care services to members by the contracted hospitals and downstream hospital contractors. In the event that any one of these key hospital agreements is amended in a financially unfavorable manner or is otherwise terminated, such events could have a material adverse effect on DMG's financial condition, and results of operations.

DMG's professional liability and other insurance coverage may not be adequate to cover DMG's potential liabilities.

DMG maintains primary professional liability insurance and other insurance coverage through California Medical Group Insurance Company, Risk Retention Group, an Arizona corporation in which DMG is the majority owner, and through excess coverage contracted through third-party insurers. DMG believes such insurance is adequate based on its review of what it believes to be all applicable factors, including industry standards. Nonetheless, potential liabilities may not be covered by insurance, insurers may dispute coverage or may be unable to meet their obligations, the amount of insurance coverage and/or related reserves may be inadequate, or the amount of any DMG self-insured retention may be substantial. There can be no assurances that DMG will be able to obtain insurance coverage in the future, or that insurance will continue to be available on a cost-effective basis, if at all. Moreover, even if claims brought against DMG are unsuccessful or without merit, DMG would have to defend itself against such claims. The defense of any such actions may be time-consuming and costly and may distract DMG management's attention. As a result, DMG may incur significant expenses and may be unable to effectively operate its business.

Changes in the rates or methods of third-party reimbursements may adversely affect DMG operations.

Any negative changes in governmental capitation or FFS rates or methods of reimbursement for the services DMG provides could have a significant adverse impact on DMG's revenue and financial results. Since governmental healthcare programs generally reimburse on a fee schedule basis rather than on a charge-related basis, DMG generally cannot increase its revenues from these programs by increasing the amount it charges for its services. Moreover, if DMG's costs increase, DMG may not be able to recover its increased costs from these programs. Government and private payors have taken and may continue to take steps to control the cost, eligibility for, use, and delivery of healthcare services due to budgetary constraints, and cost containment pressures as well as other financial issues. DMG believes that these trends in cost containment will continue. These cost containment measures, and other market changes in non-governmental insurance plans have generally restricted DMG's ability to recover, or shift to non-governmental payors, any increased costs that DMG experiences. DMG's business and financial operations may be materially affected by these cost containment measures, and other market changes.

DMG's business model depends on numerous complex management information systems and any failure to successfully maintain these systems or implement new systems could materially harm DMG's operations and result in potential violations of healthcare laws and regulations.

DMG depends on a complex, specialized, and integrated management information system and standardized procedures for operational and financial information, as well as for DMG's billing operations. DMG may experience unanticipated delays, complications or expenses in implementing, integrating, and operating these integrated systems. Moreover, DMG may be unable to enhance its existing management information system or implement new management information systems where necessary. DMG's management information system may require modifications, improvements or replacements that may require both substantial expenditures as well as interruptions in operations. DMG's ability to implement and operate its integrated systems is subject to the availability of information technology and skilled personnel to assist DMG in creating and maintaining these systems.

DMG's failure to successfully implement and maintain all of its systems could have a material adverse effect on its business, financial condition and results of operations. For example, DMG's failure to successfully operate its billing systems could lead to potential violations of healthcare laws and regulations. If DMG is unable to handle its claims volume, or if DMG is unable to pay claims timely, DMG may become subject to a health plan's corrective action plan or de-delegation until the problem is corrected, and/or termination of the health plan's agreement with DMG. This could have a material adverse effect on DMG's operations and profitability. In addition, if DMG's claims processing system is unable to process claims accurately, the data DMG uses for its incurred but not reported (IBNR) estimates could be incomplete and DMG's ability to accurately estimate claims liabilities and establish adequate reserves could be adversely affected. Finally, if DMG's management information systems are unable to function in compliance with applicable state or federal rules and regulations, including medical information confidentiality laws such as HIPAA, possible penalties and fines due to this lack of compliance could have a material adverse effect on DMG's financial condition, and results of operations.

DMG may be impacted by eligibility changes to government and private insurance programs.

Due to potential decreased availability of healthcare through private employers, the number of patients who are uninsured or participate in governmental programs may increase. The Health Reform Acts have increased the participation of individuals in the Medicaid program in states that elected to participate in the expanded Medicaid coverage. A shift in payor mix from managed care and other private payors to government payors as well as an increase in the number of uninsured patients may result in a reduction in the rates of reimbursement to DMG or an increase in uncollectible receivables or uncompensated care, with a corresponding decrease in net revenue. Changes in the eligibility requirements for governmental programs such as the Medicaid program under the Health Reform Acts and state decisions on whether to participate in the expansion of such programs also could increase the number of patients who participate in such programs and the number of uninsured patients. Even for those patients who remain in private insurance plans, changes to those plans could increase patient financial responsibility, resulting in a greater risk of uncollectible receivables. These factors and events could have a material adverse effect on DMG's business, financial condition and results of operations.

Negative publicity regarding the managed healthcare industry generally or DMG in particular could adversely affect DMG's results of operations or business.

Negative publicity regarding the managed healthcare industry generally, the Medicare Advantage program or DMG in particular, may result in increased regulation and legislative review of industry practices that further increase DMG's costs of doing business and adversely affect DMG's results of operations or business by:

- requiring DMG to change its products and services;

- increasing the regulatory, including compliance, burdens under which DMG operates, which, in turn, may negatively impact the manner in which DMG provides services and increase DMG's costs of providing services;
- adversely affecting DMG's ability to market its products or services through the imposition of further regulatory restrictions regarding the manner in which plans and providers market to Medicare Advantage enrollees; or
- adversely affecting DMG's ability to attract and retain members.

Risk factors related to ownership of our common stock:

Provisions in our charter documents, compensation programs and Delaware law may deter a change of control that our stockholders would otherwise determine to be in their best interests.

Our charter documents include provisions that may deter hostile takeovers, delay or prevent changes of control or changes in our management, or limit the ability of our stockholders to approve transactions that they may otherwise determine to be in their best interests. These include provisions prohibiting our stockholders from acting by written consent; requiring 90 days advance notice of stockholder proposals or nominations to our Board of Directors (or 120 days for nominations made using proxy access); and granting our Board of Directors the authority to issue preferred stock and to determine the rights and preferences of the preferred stock without the need for further stockholder approval.

Most of our outstanding employee stock-based compensation awards include a provision accelerating the vesting of the awards in the event of a change of control. We also maintain a change of control protection program for our employees who do not have a significant number of stock awards, which has been in place since 2001, and which provides for cash bonuses to the employees in the event of a change of control. Based on the market price of our common stock and shares outstanding on December 31, 2016, these cash bonuses would total approximately $493 million if a change of control transaction occurred at that price and our Board of Directors did not modify this program. These change of control provisions may affect the price an acquirer would be willing to pay for our Company.

We are also subject to Section 203 of the Delaware General Corporation Law that, subject to exceptions, would prohibit us from engaging in any business combinations with any interested stockholder, as defined in that section, for a period of three years following the date on which that stockholder became an interested stockholder.
These provisions may discourage, delay or prevent an acquisition of our Company at a price that our stockholders may find attractive. These provisions could also make it more difficult for our stockholders to elect directors and take other corporate actions and could limit the price that investors might be willing to pay for shares of our common stock.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Our corporate headquarters are located in Denver, Colorado, consisting of one owned 240,000 square foot building and one leased 116,000 square foot building. Our headquarters are occupied by teammates engaged in management, finance, marketing, strategy, legal, compliance and other administrative functions. We lease six business offices located in California, Pennsylvania, Tennessee and Washington for our U.S. dialysis and related lab services business. For our DMG business we lease nine business offices located in California, Colorado, Nevada, New Mexico, Florida and Washington. Our laboratories are based in Florida where we operate our lab services out of five buildings, one owned and four leased. DaVita Rx leases four buildings located in Arizona, California, Florida and Texas. We also own four administrative offices and lease administrative offices worldwide. Our leases on the properties listed above expire at various dates through the year 2031.

For our U.S. dialysis and related lab services business we own the land and buildings for 16 of our outpatient dialysis centers. We also own eight separate land and buildings and nine land parcels for development. We lease a total of three owned properties to third-party tenants. Our remaining outpatient dialysis centers are located on premises that we lease.

For DMG, we own the land and buildings for 18 of our clinics. We also own the building for one other clinic and we own one separate land parcel. Our remaining clinics are located on premises that we lease.

Our leases for our U.S. dialysis and related lab services and for DMG generally cover periods from five to 20 years and typically contain renewal options of five to ten years at the fair rental value at the time of renewal. Our leases are generally subject to periodic

consumer price index increases, or contain fixed escalation clauses. Our outpatient dialysis centers range in size from approximately 600 to 33,000 square feet, with an average size of approximately 7,500 square feet. DMG's clinics range in size from approximately 800 to 86,000 square feet, with an average size of approximately 10,500 square feet. Our international leases generally range from one to ten years.

Some of our outpatient dialysis centers are operating at or near capacity. However, we believe that we have adequate capacity within most of our existing dialysis centers to accommodate additional patient volume through increased hours and/or days of operation, or, if additional space is available within an existing facility, by adding dialysis stations. We can usually relocate existing centers to larger facilities or open new centers if existing centers reach capacity. With respect to relocating centers or building new centers, we believe that we can generally lease space at economically reasonable rates in the areas planned for each of these centers, although there can be no assurances in this regard. Expansion of existing centers or relocation of our dialysis centers is subject to review for compliance with conditions relating to participation in the Medicare ESRD program. In states that require a certificate of need or center license, additional approvals would generally be necessary for expansion or relocation.

Item 3. Legal Proceedings.

We operate in a highly regulated industry and are a party to various lawsuits, claims, governmental investigations and audits (including investigations resulting from our obligation to self-report suspected violations of law) and other legal proceedings. We record accruals for certain legal proceedings and regulatory matters to the extent that we determine an unfavorable outcome is probable and the amount of the loss can be reasonably estimated. While these accruals reflect our best estimate of the probable loss for those matters as the dates of those accruals, the recorded amounts may differ materially from the actual amount of the losses for those matters. Additionally, in some cases, no estimate of the possible loss or range of loss in excess of amounts accrued, if any, can be made because of the inherently unpredictable nature of legal proceedings and regulatory matters, which may be exacerbated by various factors, including that they may involve indeterminate claims for monetary damages or may involve fines, penalties or non-monetary remedies; present novel legal theories or legal uncertainties; involve disputed facts; represent a shift in regulatory policy; are in the early stages of the proceedings; or result in a change of business practices. Further, there may be various levels of judicial review available to us in connection with any such proceeding.

The following is a description of certain lawsuits, claims, governmental investigations and audits and other legal proceedings to which we are subject.

Swoben Private Civil Suit: In April 2013, HealthCare Partners (HCP), now known as our DaVita Medical Group (DMG) subsidiary, was one of several defendants served with a civil complaint filed by a former employee of SCAN Health Plan (SCAN), an HMO. On July 13, 2009, pursuant to the *qui tam* provisions of the federal False Claims Act (FCA) and the California False Claims Act, James M. Swoben, as relator, filed his initial *qui tam* action in the United States District Court for the Central District of California purportedly on behalf of the United States of America and the State of California against SCAN, and certain other defendants whose identities were under seal. The allegations in the complaint relate to alleged overpayments received from government healthcare programs. In 2009 and 2010, the relator twice amended his complaint and added additional defendants, and in November 2011, he filed his Third Amended Complaint under seal alleging violations of the federal FCA and the California False Claims Act, and added additional defendants, including HCP and certain health insurance companies (the defendant HMOs). The allegations in the complaint against HCP relate to patient diagnosis coding to determine reimbursement in the Medicare Advantage program, referred to as HCC and RAF scores. The complaint sought monetary damages and civil penalties as well as costs and expenses. The U.S. Department of Justice (DOJ) reviewed these allegations and in January 2013 declined to intervene in the case. HCP and the other defendants filed motions to dismiss the Third Amended Complaint, and the court dismissed with prejudice the claims and judgment was entered in September 2013. Upon the plaintiff's appeal, a panel of the Ninth Circuit overturned the trial court's ruling and vacated the dismissal of the case. Together with certain defendants, we petitioned the Ninth Circuit for a rehearing, but in December 2016, the Ninth Circuit rejected the petition and determined the relator should be given an opportunity to amend the complaint, and remanded the case back to district court.

2015 U.S. Attorney Transportation Investigation: In February 2015, we announced that we received six administrative subpoenas from the OIG for medical records from six different dialysis centers in southern California operated by us. Specifically, each subpoena sought the medical records of a single patient of each respective dialysis center. In February 2016, we received four additional subpoenas for four additional dialysis centers in southern California. The subpoenas were similarly limited in scope to the subpoenas received in 2015. On February 8, 2017, we were served with a *qui tam* complaint in the U.S. District Court for the Central District of California. We have been advised by an attorney with the United States Attorney's Office for the Central District of California that the *qui tam* is related to the investigation concerning the medical necessity of patient transportation, which was the basis for the subpoenas. The relator alleges that an ambulance company submitted false claims for patient transportation. Although we do not provide transportation ourselves nor do we bill for the transport of our dialysis patients, the relator alleges that two of our purported clinical staff caused the submission of a small number of those claims through improper certifications of medical necessity. We are investigating these allegations and intend to defend accordingly. The DOJ has declined to intervene.

2015 U.S. Office of Inspector General (OIG) Medicare Advantage Civil Investigation: In March 2015, JSA HealthCare Corporation (JSA), a subsidiary of DMG, received a subpoena from the OIG. We have been advised by an attorney with the Civil Division of the DOJ in Washington, D.C. that the subpoena relates to an ongoing civil investigation concerning Medicare Advantage service providers' risk adjustment practices and data, including identification and verification of patient diagnoses and factors used in making the diagnoses. The subpoena requests documents and information for the period from January 1, 2008 through December 31, 2013, for certain Medicare Advantage plans for which JSA provided services. It also requests information regarding JSA's communications about patient diagnoses as they relate to certain Medicare Advantage plans generally, and more specifically as related to two Florida physicians with whom JSA previously contracted. We are producing the requested information and are cooperating with the government's investigation.

In addition to the subpoena described above, in June 2015, we received a subpoena from the OIG. This civil subpoena covers the period from January 1, 2008 through the present and seeks production of a wide range of documents relating to our and our subsidiaries' (including DMG's and its subsidiary JSA's) provision of services to Medicare Advantage plans and related patient diagnosis coding and risk adjustment submissions and payments. We believe that the request is part of a broader industry investigation into Medicare Advantage patient diagnosis coding and risk adjustment practices and potential overpayments by the government. The information requested includes information relating to patient diagnosis coding practices for a number of conditions, including potentially improper historical DMG coding for a particular condition. With respect to that condition, the guidance related to that coding issue was discontinued following our November 1, 2012 acquisition of DMG, and we notified CMS in April 2015 of the coding practice and potential overpayments. In that regard, we have identified certain additional coding practices which may have been problematic and are in discussions with the DOJ about the scope and nature of a review of claims relating to those practices. We are cooperating with the government and are producing the requested information. In addition, we are continuing to review other DMG coding practices to determine whether there were any improper coding issues. In connection with the DMG merger, we have certain indemnification rights against the sellers and an escrow was established as security for the indemnification. We have submitted an indemnification claim against the sellers secured by the escrow for any and all liabilities incurred relating to these matters and intend to pursue recovery from the escrow. However, we can make no assurances that the indemnification and escrow will cover the full amount of our potential losses related to these matters.

2015 U.S. Department of Justice Vascular Access Investigation and Related *Qui Tam* Litigation: In November 2015, we announced that RMS Lifeline, Inc., a wholly-owned subsidiary of ours that operates under the name Lifeline Vascular Access (Lifeline), received a Civil Investigative Demand (CID) from the DOJ. The CID relates to two vascular access centers in Florida that are part of Lifeline's vascular access business. The CID covers the period from January 1, 2008 through the present. We acquired these two centers in December 2012. Based on the language of the CID, the DOJ appeared to be looking at whether angiograms performed at the two centers were medically unnecessary and therefore whether related claims filed with federal healthcare programs possibly violated the FCA. Lifeline does not perform dialysis services but instead provides vascular access management services for dialysis patients. We cooperated with the government and produced the requested information. The DOJ investigation was initiated pursuant to a complaint brought under the *qui tam* provisions of the FCA (the Complaint). The Complaint was originally filed under seal in August 2014 in the U.S. District Court, Middle District of Florida, United States ex. rel James Spafford v. DaVita HealthCare Partners, Inc., et al., Case Number 6:14-cv-1251-Orl-41DAB, naming several doctors with us as defendants. In December 2015, a First Amended Complaint was filed under seal. In May 2016, the First Amended Complaint was unsealed. The First Amended Complaint alleges violations of the FCA due to the submission of claims to the government for allegedly medically unnecessary angiograms and angiography procedures at the two vascular access centers as well as employment-related claims. The Complaint covers alleged conduct dating from July 2008, prior to our acquisition of the centers, to the present. The DOJ declined to intervene. In the third quarter of 2016 we recorded an accrual of a non-material amount for potential damages and liabilities. In January 2017, we finalized and executed a settlement agreement with the relator and the government for an immaterial amount.

2016 U.S. Attorney Prescription Drug Investigation: In early February 2016, we announced that our pharmacy services' wholly-owned subsidiary, DaVita Rx, received a CID from the U.S. Attorney's Office for the Northern District of Texas. It appears the government is conducting an FCA investigation concerning allegations that DaVita Rx presented or caused to be presented false claims for payment to the government for prescription medications, as well as into our relationship with pharmaceutical manufacturers. The CID covers the period from January 1, 2006 through the present. In the spring of 2015, we initiated an internal compliance review of DaVita Rx during which we identified potential billing and operational issues. We notified the government in September 2015 that we were conducting this review of DaVita Rx and began providing regular updates of our review. Through the fourth quarter of 2016, we recorded estimated accruals totaling $38 million for potential damages and liabilities associated with write-offs and discounts of patient co-payment obligations, and credits to payors for returns of prescriptions drugs, related to DaVita Rx that were identified during the course of this internal compliance review. Upon completion of our review, we filed a self-disclosure with the OIG in early February 2016 and we have been working to address and update the practices we identified in the self-disclosure, some of which overlap with information requested by the U.S. Attorney's Office. We may accrue additional reserves for refunds and related damages and potential liabilities arising out of this review. We do not know if the U.S. Attorney's Office, which is part of the DOJ, knew when it served the CID on us that we were already in the process of developing a self-disclosure to the OIG. The OIG

informed us in February 2016 that our submission was not accepted. They indicated that the OIG is not expressing an opinion regarding the conduct disclosed or our legal positions. We are cooperating with the government and are producing the requested information.

2017 U.S. Attorney American Kidney Fund Investigation. On January 4, 2017, we were served with an administrative subpoena for records by the United States Attorney's Office, District of Massachusetts, relating to an investigation into possible federal health care offenses. The subpoena covers the period from January 1, 2007 through the present, and seeks documents relevant to charitable patient assistance organizations, particularly the American Kidney Fund, including documents related to efforts to provide patients with information concerning the availability of charitable assistance. We intend to cooperate with the government in this investigation.

Although we cannot predict whether or when proceedings might be initiated or when these matters may be resolved (other than as described above), it is not unusual for inquiries such as these to continue for a considerable period of time through the various phases of document and witness requests and on-going discussions with regulators. In addition to the inquiries and proceedings specifically identified above, we are frequently subject to other inquiries by state or federal government agencies and/or private civil *qui tam* complaints filed by relators. Negative findings or terms and conditions that we might agree to accept as part of a negotiated resolution of pending or future government inquiries or relator proceedings could result in, among other things, substantial financial penalties or awards against us, substantial payments made by us, harm to our reputation, required changes to our business practices, exclusion from future participation in the Medicare, Medicaid and other federal health care programs and, if criminal proceedings were initiated against us, possible criminal penalties, any of which could have a material adverse effect on us.

Shareholder Claims

Peace Officers' Annuity and Benefit of Georgia Securities Laws Class Action Civil Suit: On February 1, 2017, the Peace Officers' Annuity and Benefit Fund of Georgia filed a putative federal securities class action complaint in the U.S. District Court for the District of Colorado against us and certain executives. The complaint covers the time period of August 2015 to October 2016 and alleges, generally, that we and our executives violated federal securities laws concerning our financial results and revenue derived from patients who received charitable premium assistance from an industry-funded non-profit organization. The complaint further alleges that the process by which patients obtained commercial insurance and received charitable premium assistance was improper and "created a false impression of DaVita's business and operational status and future growth prospects." We dispute these allegations and intend to defend this action accordingly.

Blackburn Shareholder Derivative Civil Suit: On February 10, 2017, Charles Blackburn filed a derivative shareholder lawsuit in the U.S. District Court for the District of Delaware against us, as nominal defendant, the Board of Directors and certain executives. The complaint covers the time period from 2015 to present and alleges, generally, breach of fiduciary duty, unjust enrichment and misrepresentations and/or failures to disclose certain information in violation of the federal securities laws in our 2016 proxy statement in connection with an alleged practice to direct patients with government-subsidized health insurance into private health insurance plans to maximize our profits. We dispute these allegations and intend to defend this action accordingly.

Other Proceedings

In addition to the foregoing, from time to time we are subject to other lawsuits, claims, governmental investigations and audits and legal proceedings that arise due to the nature of our business, including contractual disputes, such as with payors, suppliers and others, employee-related matters and professional and general liability claims.

From time to time, we initiate litigation or other legal proceedings as a plaintiff arising out of contracts or other matters. In that regard, we had a pending lawsuit in the U.S. Court of Federal Claims against the federal government which was originally filed in May 2011. The lawsuit related to the U.S. Department of Veterans Affairs (VA) underpayment of dialysis services that we provided from 2005 through 2011 to veterans pursuant to VA regulations. In January 2017, we reached a resolution of our claims with the government for $538 million, which we expect to recognize in our first quarter 2017 financial statements.

* * *

Other than as described above, we cannot predict the ultimate outcomes of the various legal proceedings and regulatory matters to which we are or may be subject from time to time, including those described in this "Item 3. Legal Proceedings," or the timing of their resolution or the ultimate losses or impact of developments in those matters, which could have a material adverse effect on our revenues, earnings and cash flows. Further, any legal proceedings or regulatory matters we are involved in, whether meritorious or not, are time consuming, and often require management's attention and result in significant legal expense, and may result in the diversion of significant operational resources, or otherwise harm our business or reputation.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Our common stock is traded on the New York Stock Exchange under the symbol DVA. The following table sets forth, for the periods indicated, the high and low sales prices for our common stock as reported by the New York Stock Exchange.

	High	Low
Year ended December 31, 2016:		
1st quarter	$ 74.18	$ 61.36
2nd quarter	78.00	72.31
3rd quarter	78.77	62.76
4th quarter	67.44	54.50
Year ended December 31, 2015:		
1st quarter	$ 83.04	$ 71.89
2nd quarter	85.17	79.31
3rd quarter	81.89	70.12
4th quarter	78.94	67.34

The closing price of our common stock on January 31, 2017 was $63.75 per share. According to Computershare, our registrar and transfer agent, as of January 31, 2017, there were 9,853 holders of record of our common stock. We have not declared or paid cash dividends to holders of our common stock since 1994. We have no current plans to pay cash dividends and we are restricted from paying dividends under the terms of our senior secured credit facilities and the indentures governing our senior notes. See "Liquidity and capital resources" under "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and the notes to our consolidated financial statements.

Stock Repurchases

The following table summarizes our repurchases of our common stock during the fourth quarter of 2016:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (in millions)
October 1 - October 31, 2016	3,367,024	$ 63.07	3,367,024	$ 881.0
November 1 - November 30, 2016	3,351,634	$ 60.85	3,351,634	$ 677.1
December 1 - December 31, 2016	—	—	—	$ 677.1
Total	6,718,658	$ 61.96	6,718,658	$ 677.1

(1) On July 13, 2016, our Board of Directors approved share repurchases in the amount of approximately $1.2 billion. These share repurchases were in addition to the approximately $259 million remaining at that time under our Board of Directors' prior share repurchase authorization announced in April 2015. We are authorized to make purchases from time to time in the open market or in privately negotiated transactions, depending upon market conditions and other considerations. During the twelve months ended December 31, 2016, we purchased a total of 16,649,090 shares of our common stock for $1.072 billion, or an average price of $64.41. As of December 31, 2016, there was approximately $677 million available under our current Board authorizations for additional share repurchases. We have not repurchased any shares from January 1, 2017 through February 24, 2017. Although these share repurchase authorizations have no expiration dates, we are subject to share repurchase limitations under the terms of the senior secured credit facilities and the indentures governing our senior notes.

Item 6. Selected Financial Data.

The following financial and operating data should be read in conjunction with "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements filed as part of this report. The following table presents selected consolidated financial and operating data for the periods indicated. These selected consolidated financial results have been recast for all prior periods presented to reflect the retrospective application of these new presentation and disclosure requirements for patient service revenues.

	Year ended December 31,				
	2016	2015	2014	2013	2012 (5)
	(in thousands, except share data)				
Income statement data:					
Net revenues	$ 14,745,105	$ 13,781,837	$ 12,795,106	$ 11,764,050	$ 8,186,280
Operating expenses and charges(2)	12,850,562	12,611,142	10,979,965	10,213,916	6,889,196
Operating income	1,894,543	1,170,695	1,815,141	1,550,134	1,297,084

Total DaVita Inc. shareholders equity(4)	4,648,047	4,870,780	5,170,513	4,432,479	3,763,137

(1) In 2015, we retrospectively adopted ASU 2015-03 related to simplification of debt issuance costs as well as ASU 2015-17 related to classification of deferred taxes. See "New Accounting Standards" below. All prior periods have been recast to conform to the current year presentation.

(2) Operating expenses and charges in 2016 include estimated goodwill impairment charges of $253,000 related to our DMG reporting units and $28,415 related to our vascular access reporting unit, an impairment of a minority equity investment of $14,993, a gain on the APAC JV ownership changes of $374,374, a gain related to the sale of our Tandigm ownership interest of $40,280, a loss on the sale of our DMG Arizona business of $10,489, an adjustment to reduce receivables associated with the DMG acquisition escrow provision relating to income tax items of $30,934, and an estimated accrual for damages and liabilities associated with our DMG Nevada hospice business of $16,000 and $15,770 associated with our pharmacy business. 2015 included a settlement charge of $495,000 related to a private civil suit, estimated goodwill and intangible asset impairment charges of $210,234, primarily related to certain DMG reporting units, and an estimated accrual for damages and liabilities of $22,530 associated with our pharmacy business. Operating expenses and charges in 2014 and 2013 include an additional $17,000 and $397,000, loss contingency accrual related to the settlement of the 2010 and 2011 U.S. Attorney physician relationship investigations, respectively. Operating expenses and charges in 2013 also include a contingent earn-out obligation gain adjustment of $56,977 related to a decrease in DMG's 2013 contingent earn-out obligation and an adjustment to reduce a tax asset associated with the DMG acquisition escrow provisions of $7,721. In addition, 2012 included $85,837 for a legal settlement and related expenses, and $30,753 of transaction expenses associated with the acquisition of DMG.

(3) Income from operations of discontinued operations, net of tax includes the operations for all prior periods presented of HomeChoice Partners Inc. (HomeChoice) which was divested on February 1, 2013.

(4) In the third quarter of 2013, the Board of Directors approved a two-for-one stock split of our common stock in the form of a stock dividend payable on September 6, 2013 to stockholders of record on August 23, 2013. Our common stock began trading on a post-split basis on September 9, 2013. All share and per share data for all prior periods presented have been adjusted to reflect the effects of the stock split. Share repurchases consisted of 16,649,090 shares of common stock for $1,072,377 in 2016, and 7,779,958 shares of common stock for $575,380 in 2015. Shares issued in connection with stock awards were $1,011,328 in 2016, 1,479,217 in 2015, 2,179,766 in 2014, 1,928,137 in 2013 and 4,751,142 in 2012.

(5) On November 1, 2012, we completed our acquisition of DMG whereby DMG became a wholly-owned subsidiary of the Company. The total consideration paid for all of the outstanding common units of DMG was approximately $4.71 billion, which consisted of $3.65 billion in cash, net of cash acquired, and 18,760,624 shares of our common stock valued at approximately $1.06 billion. The operating results of DMG are included in our consolidated results beginning November 1, 2012.

(6) The ratio of earnings to fixed charges was computed by dividing earnings by fixed charges. Earnings for this purpose is defined as pretax income from continuing operations adjusted by adding back fixed charges expensed during the period, less noncontrolling interests. Fixed charges include debt expense (interest expense and the write-off and amortization of deferred financing costs), the estimated interest component of rental expense on operating leases and capitalized interest.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Forward-looking statements

This Annual Report on Form 10-K, including this Management's Discussion and Analysis of Financial Condition and Results of Operations, contains statements that are forward-looking statements within the meaning of the federal securities laws. All statements that do not concern historical facts are forward-looking statements and include, among other things, statements about our expectations, beliefs, intentions and/or strategies for the future. These forward-looking statements include statements regarding our future operations, financial condition and prospects, including the expected impact of the policy change for Medicaid patients seeking Affordable Care Act (ACA) plans, including on our future operating income and other impacts of this policy change, expectations for treatment growth rates, revenue per treatment, expense growth, levels of the provision for uncollectible accounts receivable, operating income, cash flow, operating cash flow, estimated tax rates, estimated charges and accruals, capital expenditures, the development of new dialysis centers and dialysis center acquisitions, government and commercial payment rates, revenue estimating risk and the impact of our level of indebtedness on our financial performance, and including earnings per share. These statements involve substantial known and unknown risks and uncertainties that could cause our actual results to differ materially from those described in the forward-looking statements, including risks resulting from the concentration of profits generated by higher-paying commercial payor plans for which there is continued downward pressure on average realized payment rates, and a reduction in the number of patients under such plans, which may result in the loss of revenues or patients, and the extent to which the ongoing implementation of healthcare exchanges or changes in regulations or enforcement of regulations regarding the exchanges results in a reduction in reimbursement rates for our services from and/or the number of patients enrolled in higher-paying commercial plans, a reduction in government payment rates under the Medicare ESRD program or other government-based programs, the impact of the CMS Medicare Advantage benchmark structure, risks arising from potential federal and/or state legislation that could have an adverse effect on our operations and profitability, the impact of the 2016 Congressional and Presidential elections on the current health care marketplace and on our business, including with respect to the future of the ACA, the exchanges, and many other core aspects of the current health care marketplace, changes in pharmaceutical or anemia management practice patterns, payment policies, or pharmaceutical pricing, legal compliance risks, including our continued compliance with complex government regulations and the provisions of our current Corporate Integrity Agreement (CIA), and current or potential investigations by various government entities and related government or private-party proceedings, the restrictions on our business and operations required by the CIA and other settlement terms, and the financial impact thereof, continued increased competition from large- and medium-sized dialysis providers that compete directly with us, our ability to maintain contracts with physician medical directors, changing affiliation models for physicians, and the emergence of new models of care introduced by the government or private sector that may erode our patient base and reimbursement rates such as Accountable Care Organizations (ACOs), independent practice associations (IPAs) and integrated delivery networks, our ability to complete acquisitions, mergers or dispositions that we might be considering or announce, or to integrate and successfully operate any business we may acquire or have acquired, including DaVita Medical Group (DMG), or to expand our operations and services to markets outside the U.S., or to businesses outside of dialysis and DMG's business, the variability of our cash flows, the risk that we might invest material amounts of capital and incur significant costs in connection with the growth and development of our international operations, yet we might not be able to operate them profitably anytime soon, if at all, risks arising from the use of accounting estimates, judgments and interpretations in our financial statements, the risk that laws regulating the corporate practice of medicine could restrict the manner in which DMG conducts its business, the risk that the cost of providing services under DMG's agreements may exceed our compensation, the risk that reductions in reimbursement rates, including Medicare Advantage rates, and future regulations may negatively impact DMG's business, revenue and profitability, the risk that DMG may not be able to successfully establish a presence in new geographic regions or successfully address competitive threats that could reduce its profitability, the risk that a disruption in DMG's healthcare provider networks could have an adverse effect on DMG's business operations and profitability, the risk that reductions in the quality ratings of health maintenance organization plan customers of DMG could have an adverse effect on DMG's business, or the risk that health plans that acquire health maintenance organizations may not be willing to contract with DMG or may be willing to contract only on less favorable terms, and the other risk factors set forth in Part II, Item 1A. of this Annual Report on Form 10-K. We base our forward-looking statements on information currently available to us at the time of this Annual Report on Form 10-K, and except as required by law we undertake no obligation to update or revise any forward-looking statements, whether as a result of changes in underlying factors, new information, future events or otherwise.

The following should be read in conjunction with our consolidated financial statements and "Item 1. Business".

Company overview

The Company consists of two major divisions, DaVita Kidney Care (Kidney Care) and DaVita Medical Group (DMG). Kidney Care is comprised of our U.S. dialysis and related lab services, our ancillary services and strategic initiatives, including our international operations, and our corporate administrative support. Our U.S. dialysis and related lab services business is our largest line of business, which is a leading provider of kidney dialysis services in the U.S. for patients suffering from chronic kidney failure, also known as end stage renal disease (ESRD). DMG is a patient- and physician-focused integrated healthcare delivery and management company with over two decades of providing coordinated, outcomes-based medical care in a cost-effective manner.

Our overall financial performance for 2016 in U.S. dialysis and related lab services benefited from increased treatment volume, primarily from non-acquired growth at existing and new dialysis centers, cost control initiatives, and payor mix improvements in our dialysis business. This was partially offset by an increase in labor costs and other center related costs. DMG experienced a decrease in adjusted operating income primarily due to a reduction in Medicare Advantage reimbursement rates and an increase in medical costs.

Some of our major accomplishments and financial operating performance indicators in 2016 and year over year were as follows:

- improved clinical outcomes in our U.S. dialysis operations, including third consecutive year as a leader in CMS' Five –Star Quality Rating system;
- consolidated net revenue growth of 7.0%;
- 5.7% total net revenue growth in our U.S. dialysis segment, including an increase of $4 per treatment;
- improved performance in our normalized non-acquired U.S. dialysis treatment growth of 4.2%, which contributed to an increase of approximately 4.5% in the overall number of U.S. dialysis treatments;
- net increase of 99 U.S. dialysis centers and 36 international dialysis centers;
- an increase in DMG's net revenue of 7.2% related to an increase in its fee-for-service (FFS) business from the acquisition of The Everett Clinic Medical Group (TEC);
- formation of a strategic joint venture in our Asia-Pacific market;
- an increase in other ancillary services and strategic initiatives net revenue of 17.3%; and
- strong operating cash flows of $1.963 billion.

We believe that 2017 will be challenging due to the uncertainty around the ACA and the ability of our patients to utilize charitable premium assistance, average commercial rate pressure, increases in clinical costs due to inflation, employee turnover and other factors affecting U.S. dialysis and related lab services. In addition, the 2016 Presidential and Congressional elections have caused the future state of the exchanges and other ACA reforms and the healthcare landscape in general to be very unclear. DMG continues to face challenges due to announced decreases in Medicare Advantage and Medicaid reimbursement rates as the government continues to modify the rate structure. We also remain committed to our international expansion plans that will continue to require investment.

Following is a summary of our consolidated operating results for reference in the discussion that follows.

	Year ended December 31,					
	2016		2015		2014	
	(dollar amounts rounded to nearest million)					
Net revenues:						
Patient service revenues	10,354		9,481		8,869	
Less: Provision for uncollectible accounts	(451)		(428)		(367)

Gain on sale of Tandigm ownership interest	(40)	—	—
Adjusted consolidated operating income[1]	$ 1,849	$ 1,898	$ 1,832

(1) For the year ended December 31, 2016, we have excluded goodwill impairment charges of $253 million related to our DMG reporting units and $28 million related to our vascular access reporting unit, an impairment of $15 million related to a minority equity investment, the loss on sale of our DMG Arizona business of $10 million, estimated accruals for damages and liabilities associated with our DMG Nevada hospice business of $16 million and our pharmacy business of $16 million, an adjustment to reduce receivables associated with the DMG acquisition escrow provision relating to income tax items of $31 million, the gain on changes in ownership interest upon the formation of the Asia Pacific joint venture (APAC JV) of $374 million and the gain related to the sale of a portion of our Tandigm ownership interest of $40 million. For the year ended December 31, 2015, we have excluded estimated goodwill and other intangible asset impairment charges of $210 million primarily related to certain DMG reporting units, an estimated accrual of $22 million for damages and liabilities associated with our pharmacy business, which is included in general and administrative expenses, and $495 million related to a settlement charge in connection with a private civil suit. In addition, for the year ended December 31, 2014, we have excluded $17 million, related to a loss contingency accrual for the settlement of the 2010 and 2011 U.S. Attorney physician relationship investigations. These are non-GAAP measures and are not intended as substitutes for the equivalent GAAP measures. We have presented these adjusted amounts because management believes that these presentations enhance a user's understanding of our normal consolidated operating income by excluding certain items which we do not believe are indicative of our ordinary results of operations. As a result, adjusting for these amounts allows for comparison to our normal prior period results.

Consolidated net revenues

Consolidated net revenues for 2016 increased by approximately $963 million, or 7.0%, from 2015. This increase in consolidated net revenues was due to an increase in dialysis and related lab services net revenues of approximately $496 million, principally due to solid volume growth from additional treatments from non-acquired growth, one additional treatment day in 2016, and an increase of $4 in the average dialysis revenue per treatment, as discussed below. Consolidated net revenues also increased due to an increase in DMG's net revenues of $277 million, primarily due to an increase in FFS revenues from acquisitions and an increase in senior capitated revenues, as described below. In addition, revenue increased by approximately $239 million in our ancillary services and strategic initiatives driven primarily from growth in our pharmacy services and an increase in net revenues from our expansion in our international business and other strategic initiatives.

Consolidated net revenues for 2015 increased by approximately $987 million, or 7.7%, from 2014. This increase in consolidated net revenues was due to an increase in dialysis and related lab services net revenues of approximately $431 million, principally due to solid volume growth from additional treatments from non-acquired growth and from an increase of $6 in the average dialysis revenue per treatment, primarily from an increase in our average commercial payment rates and improvement in our commercial payor mix. Consolidated net revenues also increased by $335 million as a result of DMG's growth from acquisitions and timing of the recognition of additional Medicaid risk sharing revenue, as described below. In addition, revenue increased by approximately $243 million in our ancillary services and strategic initiatives driven primarily from growth in our pharmacy services and our disease management services, as well as expansion in our international operations. These increases were partially offset by an increase in reserves for refunds of prior period pharmacy reimbursements.

Consolidated operating income

Consolidated operating income of $1.895 billion for 2016, which includes impairment charges of $296 million, estimated accruals for damages and liabilities associated with our pharmacy and DMG Nevada hospice businesses of $32 million, an adjustment to reduce receivables associated with the DMG acquisition escrow provision of $31 million, and the net gain on the APAC JV, Tandigm and DMG Arizona ownership changes of $404 million, increased by approximately $724 million from 2015, which included estimated impairment charges of approximately $210 million, an estimated pharmacy accrual of $22 million and a private litigation settlement charge of $495 million. Excluding these items from their respective periods, adjusted consolidated operating income for 2016 would have decreased by $49 million. Adjusted consolidated operating income decreased primarily as a result of a decrease in adjusted operating income related to DMG of $105 million, partially offset by an increase in adjusted operating income for the dialysis and related lab services of $22 million and a decrease in adjusted operating losses in our ancillary services and strategic initiatives of $30 million, each discussed in detail below.

Consolidated operating income of $1.171 billion for 2015, which included estimated impairment charges of approximately $210 million, an estimated pharmacy accrual of $22 million and a private litigation settlement charge of $495 million, decreased by approximately $644 million from 2014, which included a $17 million loss contingency accrual. Excluding these items from their respective periods, adjusted consolidated operating income for 2015 would have increased by $66 million, or 3.6%. Adjusted consolidated operating income increased primarily as a result of an increase in adjusted operating income in dialysis and related lab services of $100 million and an increase in adjusted operating income at DMG of $25 million, partially offset by an increase in the amount of adjusted operating losses in our ancillary services and strategic initiatives of $53 million, each discussed in detail below.

U.S. dialysis and related lab services business

Our U.S. dialysis and related lab services business is a leading provider of kidney dialysis services through a network of 2,350 outpatient dialysis centers which we own and manage through management services agreements, in 46 states and the District of Columbia, serving a total of approximately 187,700 patients. We also provide acute inpatient dialysis services in approximately 900 hospitals. We estimate that we have approximately a 36% market share in the U.S. based upon the number of patients that we serve. In 2016, our overall network of U.S. outpatient dialysis centers increased by 99 dialysis centers primarily as a result of opening new dialysis centers and from acquisitions of existing dialysis centers. In addition, the overall number of patients that we serve in the U.S. increased by approximately 4.5% in 2016 as compared to 2015.

Our dialysis and related lab services stated mission is to be the provider, partner and employer of choice. We believe our attention to these three stakeholders—our patients, our business partners, and our teammates—represents the major driver of our long-term performance, although we are subject to the impact of several external factors such as government policy, physician practice patterns, commercial payor payment rates and the mix of commercial and government patients. Two principal non-financial metrics we track are quality clinical outcomes and teammate turnover. We have developed our own composite index for measuring improvements in our clinical outcomes, which we refer to as the DaVita Quality Index (DQI). Our clinical outcomes as measured by DQI have improved over each of the past several years which we believe directly decreases patient mortalities. Our patient mortality percentages have decreased from 19.0% in 2001 to 13.8% in 2015. For the third consecutive year, we continue to be a leader in the industry under both the CMS QIP and Five-Star quality Rating systems. Over the last two years our clinical teammate turnover has increased slightly, causing productivity to slightly decrease; however, despite this, we have continued to improve our clinical performance. We will continue to focus on these three stakeholders and our clinical outcomes as we believe these are fundamental long-term value drivers.

We believe our national scale, size and commitment to our patients, among other things, allows us to provide industry-leading quality care with superior clinical outcomes that attracts patients, referring physicians, and qualified medical directors to our network, which provides our dialysis patient base with a large number of out-patient dialysis centers to choose from with convenient locations and access to a full range of other integrated services which provides us the ability to effectively and efficiently manage a patient's care and certain costs while still maintaining strong legal and compliance programs.

The following graph summarizes our dialysis services revenues by modality for the year ended December 31, 2016:

Approximately 62% of our 2016 consolidated net revenues were derived directly from our dialysis and related lab services business. Approximately 79% of our 2016 dialysis and related lab services revenues were derived from outpatient hemodialysis services in the 2,316 U.S. dialysis centers that we consolidate. Other dialysis services, which are operationally integrated with our dialysis operations, are peritoneal dialysis, home-based hemodialysis, hospital inpatient hemodialysis services and management and administrative services provided to dialysis centers in which we own a noncontrolling interest or which are wholly owned by third parties. These services collectively accounted for the balance of our 2016 dialysis and related lab services revenues.

The principal drivers of our dialysis and related lab services revenues are:

- the number of treatments, which is primarily a function of the number of chronic patients requiring approximately three treatments per week as well as, to a lesser extent, the number of treatments for peritoneal dialysis services and home-based dialysis and hospital inpatient dialysis services; and
- average dialysis revenue per treatment, including the mix of commercial and government patients.

The total patient base is a relatively stable factor, which we believe is influenced by a demographically growing need for dialysis services as indicated by the United States Renal Data System which reported an approximate compound growth rate of 3.8% from 2000 to 2014 for the dialysis patient population, our relationships with referring physicians, together with the quality of our clinical care which can lead to reduced patient mortality rates as indicated above, and our ability to open and acquire new dialysis centers.

Our average dialysis and related lab services revenue per treatment is driven by changes in our mix of commercial and government (principally Medicare and Medicaid) patients, commercial and government payment rates, and our billing and collecting operations performance.

On average, dialysis-related payment rates from contracted commercial payors are significantly higher than Medicare, Medicaid and other government program payment rates, and therefore the percentage of commercial patients in relation to total patients represents a major driver of our total average dialysis revenue per treatment. The percentage of commercial patients covered under contracted plans as compared to commercial patients with out-of-network providers continued to increase, which can significantly affect our average dialysis revenue per treatment since commercial payment rates for patients with out-of-network providers are on average higher than in-network payment rates that are covered under commercial contracted plans. For the last two years, the growth of our commercial patients slightly outpaced the growth of our government-based patients as more of our patients are covered by commercial contracted plans.

Government dialysis-related payment rates in the U.S. are principally determined by federal Medicare and state Medicaid policy. For patients with Medicare coverage, all ESRD payments for dialysis treatments are made under a single bundled payment rate which provides a fixed payment rate encompassing all goods and services provided during the dialysis treatment, including certain pharmaceuticals, such as Epogen® (EPO), vitamin D analogs and iron supplements, irrespective of the level of pharmaceuticals administered to the patient or additional services performed. Most lab services are also included in the bundled payment. The bundled payment rate is also adjusted for certain patient characteristics, a geographic usage index and certain other factors.

The bundled payment system presents operating, clinical and financial risks. For example, with regard to the expanded list of case-mix adjustors, there is a risk that our dialysis centers or billing and other systems may not accurately document and track the

appropriate patient-specific characteristics, resulting in a reduction or overpayment in the amounts of the payments that we would otherwise be entitled to receive.

An important provision in the law is an annual adjustment, or market basket update, to the ESRD Prospective Payment System (PPS) base rate. Absent action by Congress, the PPS base rate is automatically updated annually by a formulaic inflation adjustment.

In December 2013, CMS issued the 2014 final rule for the ESRD PPS, which phases in the payment reductions mandated by ATRA, as modified by the Protecting Access to Medicare Act of 2014 which reduced our market basket inflation adjustment by 1.25% in 2016 and will reduce our market basket inflation adjustment by 1.25% in 2017 and 1% in 2018. CMS recently published the 2017 final rule for the ESRD PPS and projects it will (i) increase the total payments to all ESRD facilities by 0.73% in 2017 compared to 2016; (ii) increase total payments to hospital-based ESRD facilities by 0.9% in 2017 compared to 2016; and (iii) increase total payments for freestanding facilities by 0.7% in 2017 compared to 2016. The 2017 final rule for the ESRD PPS also implements the Trade Preferences Extension Act of 2015 provisions regarding the coverage and payment for renal dialysis services furnished by ESRD facilities to individuals with acute kidney injury.

As a result of the BCA and subsequent activity in Congress, a $1.2 trillion sequester (across-the-board spending cuts) in discretionary programs took effect on March 1, 2013. In particular, a 2% reduction to Medicare payments took effect on April 1, 2013, which was subsequently extended through 2014 and 2015. The Bipartisan Budget Act of 2015 extended the BCA's annual 2% reduction to Medicare payments through fiscal year 2025. These across-the-board spending cuts have affected and will continue to adversely affect our revenues, earnings and cash flows.

The CMS Innovation Center is currently working with various healthcare providers to develop, refine and implement ACOs and other innovative models of care for Medicare and Medicaid beneficiaries. We are currently uncertain of the extent to which the long-term operation and evolution of these models of care, including ACOs, Bundled Payments for Care Improvement Initiative, the CEC Model (which includes the development of ESCOs), the Comprehensive Primary Care Initiative, the Duals Demonstration, or other models, will impact the healthcare market over time. Our U.S. dialysis business may choose to participate in one or several of these models either as a partner with other providers or independently. We currently participate in the CEC Model with the Innovation Center, including with the ESCO organizations in the Arizona, Florida, and adjacent New Jersey and Pennsylvania markets. In areas where DaVita is not directly participating in this or other Innovation Center models, some of our patients may be assigned to an ACO, another ESRD Care Model, or another program, in which case the quality and cost of care that we furnish will be included in an ACO's, another ESRD Care Model's or other programs' calculations. As new models of care emerge and evolve, we may be at risk of losing our Medicare patient base, which would have a materially adverse effect on our revenues, earnings and cash flow. Other initiatives in the government or private sector may also arise, including the development of models similar to ACOs, IPAs and integrated delivery networks or evolutions of those concepts which could adversely impact our business.

We anticipate that we will continue to experience increases in our operating costs in 2017 that will outpace any net Medicare rate increases that we may receive, which could significantly impact our operating results. In addition, we expect to continue experiencing increases in operating costs that are subject to inflation, such as labor and supply costs, regardless of whether there is a compensating inflation-based increase in Medicare payment rates or in payments under the bundled payment rate system.

Dialysis payment rates from commercial payors can vary and a major portion of our commercial rates are set at contracted amounts with payors and are subject to intense negotiation pressure. Our commercial payment rates also include payments for out-of-network patients that on average are higher than our in-network commercial contract rates. We continue to enter into some commercial contracts covering certain patients that will primarily pay us a single bundled payment rate for all dialysis services provided to these patients. However, some contracts will pay us for certain other services and pharmaceuticals in addition to the bundled payment. We are continuously in the process of negotiating agreements with our commercial payors, and if our negotiations result in overall commercial contract payment rate reductions in excess of our commercial contract payment rate increases, our revenues and operating results could be negatively impacted. In addition, if there is an increase in job losses in the U.S., or depending upon changes to the healthcare regulatory system by CMS and/or the impact of healthcare insurance exchanges, we could experience a decrease in the number of patients covered under traditional commercial insurance plans. Patients with commercial insurance who cannot otherwise maintain coverage frequently rely on financial assistance from charitable organizations, such as the American Kidney Fund. If these patients are unable to obtain or continue to receive such financial assistance, our revenues, earnings, and cash flows could be substantially reduced. For further details, see the risk factor in Item 1A Risk Factors under the heading "If patients in commercial plans are subject to restriction in plan designs or the average rates that commercial payors pay us decline significantly, it would have a material adverse effect on our revenues, earnings and cash flows."

Our operating performance with respect to dialysis services billing and collection can also be a significant factor in the average dialysis and related lab services revenue per treatment we recognize and are able to collect. Over the past several years we have invested heavily in upgrades to our systems and internal processes that we believe have helped improve our operating performance and reduced our regulatory compliance risks, and we expect to continue to improve these systems and processes. We continue to

upgrade our billing and other systems and modify our processes to improve our ability to capture the necessary patient characteristics, co-morbidities and certain other factors under Medicare's bundled payment system. We believe this will potentially enable us to capture additional reimbursement amounts from Medicare and enhance our overall billing and collection performance. However, as we continue to make upgrades to our systems and processes, or as payors change their systems and requirements, such as changes to Medicare's billing codes, we could experience a negative impact to our cash collection performance, which would affect our average dialysis and related lab services revenue per treatment.

Our dialysis and related lab services revenue recognition involves significant estimation risks. Our estimates are developed based on the best information available to us and our best judgment as to the reasonably assured collectability of our billings as of the reporting date based upon our actual historical collection experience. Changes in estimates are reflected in the then-current period financial statements based upon on-going actual experience trends, or subsequent settlements and realizations depending on the nature and predictability of the estimates and contingencies.

Our annual average dialysis and related lab services revenue per treatment was approximately $352, $348 and $342 for 2016, 2015 and 2014, respectively. In 2016, the average dialysis and related lab services revenue per treatment increased by approximately $4 per treatment due to an increase in our average commercial payment rates and improvements in our commercial payor mix. In 2015, the average dialysis and related lab services revenue per treatment increased by approximately $6 per treatment due to an increase in our average commercial payment rates and improvements in our commercial payor mix, partially offset by an increase in our provision for uncollectible accounts.

Our average dialysis and related lab services revenue per treatment can be significantly impacted by several major factors, including our commercial payment rates; government payment policies regarding reimbursement amounts for dialysis treatments covered under Medicare's bundled payment rate system, including our ability to capture certain patient characteristics; and changes in the mix of government and commercial patients and the number of commercial patients that are either covered under commercial contracts or are out of network.

The principal drivers of our dialysis and related lab services patient care costs are clinical hours per treatment, labor rates, vendor pricing of pharmaceuticals, utilization levels of pharmaceuticals, business infrastructure costs, which include the operating costs of our dialysis centers, and certain professional fees. However, other cost categories can also represent significant cost variability, such as employee benefit costs, payroll taxes, insurance costs and medical supply costs. Our average clinical hours per treatment, or productivity levels, declined slightly in 2016 compared to 2015. We are always striving for improved productivity levels, however, changes in federal and state policies or regulatory billing requirements can lead to increased labor costs in order to implement these new requirements, which can adversely impact our ability to achieve optimal productivity levels. In addition, improvements in the U.S. economy have stimulated additional competition for skilled clinical personnel resulting in slightly higher teammate turnover in 2016, which we believe negatively affected productivity levels. In 2016 and 2015, we experienced an increase in our clinical labor rates of approximately 2.8% and 0.9%, respectively, as clinical labor rates have increased, consistent with general industry trends, mainly due to the high demand for skilled clinical personnel, along with general inflation increases. We also continue to experience increases in our infrastructure and operating costs of our dialysis centers, primarily due to the number of new dialysis centers opened, and general increases in rent, utilities and repairs and maintenance. In 2016, we continued to implement certain cost control initiatives to manage our overall operating costs, including labor productivity.

Our dialysis and related lab services general and administrative expenses represented 8.2% of our dialysis and related lab services net revenues in both 2016 and 2015. Although relatively flat as a percentage of net revenue, general and administrative expenses increased by $42 million, primarily due to an increase in labor and benefit costs and legal costs, partially offset by lower long-term incentive compensation. Increases in general and administrative expenses over the last several years primarily related to strengthening our dialysis business, improving our regulatory compliance and other operational processes, responding to certain legal and compliance matters, and professional fees associated with enhancing our information technology systems. We expect that these levels of expenditures on our dialysis and related lab services general and administrative expenses will continue in 2017 and could possibly increase as we seek out new business opportunities within the dialysis industry and continue to invest in improving our information technology infrastructure and the level of support required for our regulatory compliance and legal matters.

Results of Operations

The following table reflects the results of operations for the U.S. dialysis and related lab services business:

	Year ended December 31,					
	2016		2015		2014	
	(dollar amounts rounded to nearest million)					
Dialysis and related lab services patient service revenues	$ 9,551		$ 9,034		$ 8,551	
Less: Provision for uncollectible accounts	(430)		(406)		(353)	
Dialysis and related lab services net patient service revenues	9,121		8,628		8,198	
Other revenues	17		14		13	
Total net dialysis and related lab services revenues	9,138	100%	8,642	100%	8,211	100%
Operating expenses and charges:						
Patient care costs	6,145	67%	5,755	67%	5,485	67%
General and administrative	751	8%	709	8%	682	8%
Depreciation and amortization	483	5%	438	5%	403	5%
Settlement charge and loss contingency accruals	—	—	495	6%	17	—
Equity investment income	(18)	—	(15)	—	(14)	—
Total operating expenses and charges	7,361	81%	7,382	85%	6,573	80%
Operating income	1,777	19%	1,260	15%	1,638	20%
Reconciliation of non-GAAP measures:						
Settlement charge	—		495		—	
Loss contingency accruals	—		—		17	
Adjusted operating income[1]	$ 1,777		$ 1,755		$ 1,655	
Dialysis treatments	27,162,545		25,986,719		24,981,553	
Average dialysis treatments per treatment day	86,532		83,104		79,864	
Average dialysis and related lab services revenue per treatment	$ 352		$ 348		$ 342	

(1) For the year ended December 31, 2015, we have excluded $495 million related to a settlement charge in connection with a private civil suit. In addition, for the year ended December 31, 2014, we have excluded $17 million, related to loss contingency accrual for the settlement of the 2010 and 2011 U.S. Attorney physician relationship investigations. These are non-GAAP measures and are not intended as substitutes for the equivalent GAAP measures. We have presented these adjusted amounts because management believes that these presentations enhance a user's understanding of our normal consolidated operating income by excluding certain items which we do not believe are indicative of our ordinary results of operations. As a result, adjusting for these amounts allows for comparison to our normal prior period results.

Net revenues

Dialysis and related lab services net revenues for 2016 increased by approximately $496 million, or 5.7%, from 2015. The increase in net revenues was primarily driven by solid volume growth from additional treatments of approximately 4.5% due to an increase in acquired and non-acquired treatment growth at existing and new dialysis centers, as well as one additional treatment day in 2016 as compared to 2015. Dialysis and related lab services' net revenues also benefited from an increase in the average dialysis revenue per treatment of approximately $4, primarily due to an increase in our average commercial payment rates and improvements in our commercial payor mix, offset by an increase in the provision for uncollectible accounts of $24 million.

Dialysis and related lab services net revenues for 2015 increased by approximately $431 million, or 5.2%, from 2014. The increase in net revenues was primarily due to solid volume growth from additional treatments of approximately 4.0% due to an increase in non-acquired treatment growth at existing and new dialysis centers and an increase in the average dialysis revenue per treatment of approximately $6. The increase in the average dialysis revenue per treatment in 2015, as compared to 2014, was due to an increase in our average commercial payment rates and improvements in our commercial payor mix, offset by an increase in the provision for uncollectible accounts of $53 million.

The following table summarizes our U.S. dialysis services revenues by source:

	2016	2015	2014
Medicare and Medicare-assigned plans	55%	56%	58%
Medicaid and Medicaid-assigned plans	5%	6%	6%
Other government-based programs	4%	4%	3%
Total government-based programs	64%	66%	67%
Commercial (including hospital dialysis services)	36%	34%	33%
Total dialysis and related lab services revenues	100%	100%	100%

Approximately 64% of our total dialysis and related lab services revenues for the year ended December 31, 2016 were from government-based programs, principally Medicare, Medicaid, Medicare-assigned and Medicaid-assigned plans, representing approximately 88% of our total patients. Over the last two years, the growth of our commercial patients slightly outpaced the growth of our government-based patients as more of our patients are covered by commercial contracted plans. Less than 1% of our dialysis and related lab services revenues are due directly from patients. There is no single commercial payor that accounted for more than 10% of total dialysis and related lab services revenues for the year ended December 31, 2016.

On average, dialysis-related payment rates from contracted commercial payors are significantly higher than Medicare, Medicaid and other government program payment rates, and therefore the percentage of commercial patients as a relationship to total patients represents a major driver of our total average dialysis revenue per treatment. For a patient covered by a commercial insurance plan, Medicare generally becomes the primary payor after 33 months, which includes the three month waiting period, or earlier if the patient's commercial insurance plan coverage terminates. When Medicare becomes the primary payor, the payment rates we receive for that patient shifts from the commercial insurance plan rates to Medicare payment rates, which are significantly lower than commercial insurance rates. Medicare payment rates are insufficient to cover our costs associated with providing dialysis services, and we therefore lose money on each Medicare treatment that we provide.

Nearly all of our net earnings from our dialysis and related lab services are derived from commercial payors, some of which pay at established contract rates and others of which pay negotiated payment rates based on our usual and customary fee schedule for our out-of-network patients, which are typically higher than commercial contracted rates. If we experience an overall net reduction in our contracted and non-contracted commercial payment rates as a result of negotiations, restrictions or changes to the healthcare regulatory system, including the potential impact of healthcare insurance exchanges, it could have a material adverse effect on our operating results.

Operating expenses and charges

Patient care costs. Dialysis and related lab services patient care costs are those costs directly associated with operating and supporting our dialysis centers and consist principally of labor, benefits, pharmaceuticals, medical supplies and other operating costs of the dialysis centers. Dialysis and related lab services patient care costs on a per treatment basis were $226 and $221 for 2016 and 2015, respectively. The $5 increase in per treatment costs in 2016 as compared to 2015 was primarily attributable to an increase in labor and benefit costs due to a decrease in productivity, increased turnover and clinical labor rates, an increase in other direct operating expenses associated with our dialysis centers and an increase in pharmaceutical unit costs. These increases were partially offset by a decrease in professional fees.

Dialysis and related lab services patient care costs on a per treatment basis were $221 and $219 for 2015 and 2014, respectively. The $2 increase in per treatment costs in 2015 as compared to 2014 was primarily attributable to higher overall pharmaceutical costs due to higher pharmaceutical unit costs, an increase in other direct operating expenses associated with our dialysis centers, and a slight increase in labor costs, partially offset by improvements in productivity, and lower general and professional insurance costs.

General and administrative expenses. Dialysis and related lab services general and administrative expenses in 2016 increased by approximately $42 million as compared to 2015. The increase was primarily due to an increase in our labor and benefit costs, occupancy, and legal costs, partially offset by a decrease in long-term compensation costs.

Dialysis and related lab services general and administrative expenses in 2015 increased by approximately $27 million as compared to 2014. The increase was primarily due to an increase in our labor and benefit costs and long-term compensation costs.

Depreciation and amortization. Dialysis and related lab services depreciation and amortization expenses for 2016 increased by approximately $45 million as compared to 2015 and increased by $35 million in 2015 as compared to 2014. The increases were primarily due to both growth through new dialysis center developments and additional informational technology initiatives.

Provision for uncollectible accounts receivable. The provision for uncollectible accounts receivable for our dialysis and related lab services business was 4.5% for 2016 and 2015, and 4.1% for 2014. The provision for uncollectible accounts receivable was flat as a percent of revenue in 2016 and 2015. We currently expect the level of the provision for uncollectible accounts in 2017 to be consistent with 2016 although it may increase if we encounter collection issues.

Equity investment income. Equity investment income was approximately $18 million, $15 million and $14 million in 2016, 2015 and 2014, respectively. The increases in equity investment income over the last three years were primarily due to the increase in the number of nonconsolidated dialysis joint ventures and an increase in profitability at some of these joint ventures.

Accounts receivable. Our U.S. dialysis and related lab services accounts receivable balances at December 31, 2016 and December 31, 2015 were $1.358 billion and $1.255 billion, respectively, representing approximately 55 days and 53 days of revenue, respectively, net of the allowance for uncollectible accounts. The increase in day sales outstanding (DSO) for our dialysis and related lab services business was primarily the result of improved cash collection performance in 2015 which we did not experience in 2016. Our DSO calculation is based on the current quarter's average revenues per day.

As of December 31, 2016 and 2015, our dialysis and related lab services unreserved accounts receivable balances that were more than six months old were approximately $216 million and $233 million, respectively, representing approximately 16% and 18% of our dialysis accounts receivable balances, respectively. There were no significant unreserved balances over one year old. Less than 1% of our revenues are classified as patient pay. Substantially all revenue realized is from government and commercial payors, as discussed above.

Amounts pending approval from third-party payors associated with Medicare bad debt claims as of December 31, 2016 and 2015, other than the standard monthly billing, consisted of approximately $105 million in 2016 and $106 million in 2015 and is classified as other receivables. Currently, a significant portion of our Medicare bad debt claims are typically paid to us before the Medicare fiscal intermediary audits the claims. However, the payment received from Medicare is subject to adjustment based upon the actual results of the audits. Such audits typically occur one to four years after the claims are filed.

Segment operating income

Dialysis and related lab services operating income for 2016 increased by approximately $517 million as compared to 2015, which included a settlement charge of $495 million. Excluding this item from 2015, dialysis and related lab services adjusted operating income would have increased by $22 million. This increase in adjusted operating income was primarily due to treatment growth as a result of additional dialysis treatments, one additional treatment day, and an increase in the average dialysis revenue per treatment of approximately $4, as described above. Adjusted operating income also increased due to a decrease in long-term compensation costs, partially offset by higher patient care costs and an increase general administrative expenses.

Dialysis and related lab services operating income for 2015, which included a settlement charge of $495 million, decreased by approximately $378 million as compared to 2014, which included a loss contingency accrual of $17 million. Excluding these items from their respective periods, dialysis and related lab services adjusted operating income for 2015 would have increased by $100 million. This increase in adjusted operating income for 2015 as compared to 2014 was primarily due to solid treatment growth as a result of additional dialysis treatments and an increase in the average dialysis revenue per treatment of approximately $6, as described above. Adjusted operating income also increased due to improved productivity and lower general and professional insurance costs, partially offset by higher overall pharmaceutical costs, as described above, and an increase in our provision for uncollectible accounts of $53 million.

DMG business

DMG is a patient- and physician-focused, integrated healthcare delivery and management company with over two decades of experience providing coordinated, outcomes-based medical care in a cost-effective manner. As of December 31, 2016, DMG served approximately 749,300 members under its care in southern California, central and south Florida, southern Nevada and central New Mexico through capitation contracts with some of the nation's leading health plans. Of these 749,300 members, approximately 305,200 individuals were patients enrolled in Medicare and Medicare Advantage, and the remaining approximately 444,100 individuals were managed care members whose health coverage is provided through their employer or who have individually acquired health coverage directly from a health plan or as a result of their eligibility for Medicaid benefits. In addition to its managed care business, during the year ended December 31, 2016, DMG provided care across all markets to over 896,200 patients whose health coverage is structured on a FFS basis, including patients enrolled through traditional Medicare and Medicaid programs, preferred provider organizations and other third party payors.

DMG's patients as well as the patients of DMG's associated physicians, physician groups and IPAs benefit from an integrated approach to medical care that places the physician at the center of patient care. As of December 31, 2016, DMG delivered services to

its members via a network of approximately 700 primary care physicians, over 2,500 associated groups and other network primary care physicians, approximately 200 network hospitals, and several thousand associated group and network specialists. Together with hundreds of case managers, registered nurses and other care coordinators, these medical professionals utilize a comprehensive information technology system, sophisticated risk management techniques and clinical protocols to provide high-quality, cost-effective care to DMG's members. DMG's total revenue for the year ended December 31, 2016, was approximately $4.114 billion, or approximately 28% of our consolidated net revenues.

Key Financial Measures and Indicators

Operating revenues

DMG's consolidated revenues consist primarily of capitated revenues, including revenues attributable to capitated contracts with health plans, patient fee-for-service revenues and other operating revenues, each as described in more detail below.

Capitation revenue derived from health plans typically results from either (i) premium payments by CMS to DMG's health plan customers under Medicare Advantage with respect to seniors, disabled and other eligible persons (which are referred to herein as DMG's senior membership), (ii) premium payments by state governments to DMG's health plan customers under Medicaid managed care programs (which are referred to herein as DMG's Medicaid membership), and (iii) premium payments from public and private employers and individuals to DMG's health plan customers with respect to their employees (which are referred to herein as DMG's commercial membership). Capitation payments under health plan contracts are made monthly based on the number of enrollees selecting a DMG associated group physician employed or associated with one of DMG's medical group entities as their primary healthcare provider. The amount of PMPM capitation payments that DMG receives monthly from health plans on behalf of a member generally does not vary during a given calendar year, regardless of the level of actual medical services utilized by the member. As described in more detail below, in central Florida and southern Nevada DMG principally utilizes a global capitation model in which it assumes the financial responsibility for both professional (physician) and institutional (hospital) services for covered benefits, whereas in New Mexico, DMG assumes the financial responsibility for professional services only. In southern California, DMG utilizes variants of a different model for capitation under which it is directly financially responsible for covered professional services, but indirectly financially responsible for covered institutional expenses. See below for further discussion regarding changes to DMG's revenue recognition for hospital services. DMG's associated medical groups also receive specified incentive payments from health plans based on specified performance and quality criteria. These amounts are accrued when earned and the amounts can be reasonably estimated.

- *Global capitation model*. DMG records the aggregate global capitation PMPM fee as revenue and the amounts paid with respect to claims as medical expenses or hospital expenses, as applicable. See "Patient care costs-Medical expenses" and "Patient care costs-Hospital expenses" below. Revenue with respect to both professional and institutional capitation is recorded in the month in which enrollees are entitled to receive healthcare. In DMG's central Florida market, DMG also receives capitation revenue and is liable for corresponding expenses for prescription drug activity rendered on behalf of DMG's senior members through the Part D component under the Medicare Advantage program.

- *Risk-sharing model*. As compensation under its various managed care-related administrative services agreements with hospitals, DMG is entitled to receive a percentage of the amount by which the institutional capitation revenue received from health plans exceeds institutional expenses, and any such risk-share amount to which DMG is entitled is recorded as medical revenues. In addition, pursuant to such managed care-related administrative services agreements, DMG agrees to be responsible should the third party incur institutional expenses in excess of institutional capitation revenue. As with global capitation, revenue with respect to professional capitation is reported in the month in which enrollees are entitled to receive healthcare. However, risk-share revenues (that is, the portion of the excess or deficit of institutional capitation revenue to which DMG is entitled less institutional expenses), in contrast, are based on the number of enrollees and estimates of institutional utilization and associated costs incurred by assigned health plan enrollees, and the amounts earned are accrued when they can be reasonably estimated. Differences between actual contract settlements and estimated receivables and payables are recorded in the year of final settlement. In December 2013, DMG obtained a restricted Knox-Keene license in California, which permits DMG to enter into global capitation agreements with health plans that allow DMG to assume financial responsibility for both professional and institutional services. DMG has evaluated its various risk sharing arrangements, and is working with the Department of Managed Health Care and several health plans to accept global capitation. DMG has converted three separate contracts covering approximately 3% of total DHPC's membership to global risk and is in the approval and implementation process to convert additional contracts to global risk in 2017. Completion of evaluation of possible additional conversions is expected to continue to occur over time.

- *Retroactive revenue adjustments.* The Medicare Advantage revenue received by DMG's health plan customers is adjusted periodically to give effect to the relative clinical and demographic profile of the members for whom DMG is financially responsible. The model employed by CMS bases a portion of the total reimbursement payments on various clinical and demographic factors, including hospital inpatient diagnoses, additional diagnosis data from ambulatory treatment settings, hospital outpatient department and physician visits, gender, age and Medicaid eligibility. CMS requires that all managed care companies capture, collect and submit the necessary diagnosis code information to CMS twice a year for reconciliation with CMS's internal database. Capitation payments under this methodology are paid at interim rates during the year and retroactive adjustments occur in subsequent periods (generally in the third quarter of the same year, with a final adjustment in the third quarter of the following year) after the data is compiled by CMS. DMG estimates the amount of the current year adjustments in revenues during the first and second quarters of any given year and adjusts its estimates during the third quarter, upon receipt of payments from CMS. Differences between actual contract settlements and estimated revenues are recorded in the year of final settlement. To date, all such adjustments have resulted in increases in revenue.

- *Patient service revenues.* Patient service revenues are recorded when the services are provided to patients on a FFS basis. Such revenues are based on a negotiated fixed-fee schedule with the applicable payor.

- *Other operating revenues.* In addition to the revenues discussed above, other operating revenues primarily consists of (i) hospital subsidy payments, (ii) management fees DMG receives as the manager of its unconsolidated joint ventures, (iii) revenues from the maintenance of existing physicians' networks, (iv) medical consulting revenues, and (v) revenues recognized under meaningful use programs established by federal and state governments which provide financial incentives for providers to implement and utilize electronic health record technology to improve patient care.

Patient care costs

DMG's largest patient care costs are the costs of medical services provided pursuant to its capitation contracts, which consist of medical expenses, hospital expenses and clinical support and other operating costs, as further described below. Under both the global capitation and the risk-share capitation models, costs of medical services are recognized in the month in which the related services are provided. In addition, medical expenses and hospital expenses include an estimate of such expenses that have been incurred but not yet reported. For further information on how DMG estimates such claims, see "Critical accounting policies, estimates and judgments–Medical liability claims associated with DMG" below.

Medical expenses. Medical expenses consist of payments for professional and ancillary services to independent primary care physicians, specialists, ancillary providers and hospitals (including, with respect to hospitals, for outpatient services) pursuant to agreements with those entities. The structure of such expenses can consist of, among other things, sub-capitation and FFS payments. In addition, medical expenses include compensation and related expenses incurred with respect to DMG's associated group primary care physicians and specialists, registered nurses, physician assistants and hospitalists.

Hospital expenses. Hospital expenses consist of payments for institutional services to contracted and non-contracted hospitals for both inpatient and outpatient services, skilled nursing facilities, and to other institutional providers. Hospital expenses are only incurred in connection with the services DMG provides in Florida and Nevada. In those regions, as described above, DMG enters into contracts with health plans pursuant to which it assumes the risk for institutional hospital services. In contrast in California, DMG's medical groups were not permitted to contract with health plans to directly assume the risk for institutional services. Accordingly, the risk-share revenue that DMG records in California is net of reported claims and estimates of hospital utilization and associated costs incurred by assigned health plan enrollees, and no portion of institutional hospital costs incurred with respect to DMG's California operations is included in hospital expenses as presented. However, as a result of DMG obtaining a restricted Knox-Keene license in December 2013 as discussed above, DMG now assumes some risk for institutional services in California.

Clinic support and other operating costs. Clinic support and other operating costs primarily consist of the costs incurred with respect to compensation of administrative and other support staff employed at DMG's medical clinics, clinic rent and utilities, medical supplies and other direct costs incurred to support clinic operations.

Other operating expenses

General and administrative. General and administrative expenses are those costs directly related to corporate administrative functions in supporting DMG and consist primarily of salaries and benefits, professional fees and occupancy costs.

Results of Operations

The following table reflects the results of operations for the DMG business:

	Year ended December 31,					
	2016		2015		2014	
	(dollar amounts rounded to nearest millions)					
Net revenues:						
DMG capitated revenue	$ 3,431		$ 3,437		$ 3,191	
Patient service revenue	642		333		232	
Less: Provision for uncollectible accounts	(20)		(15)		(13)	
Net patient service revenue	622		318		219	
Other revenues	61		82		92	
Total net revenues	$ 4,114	100%	$ 3,837	100%	$ 3,502	100%
Operating expenses:						
Patient care costs	$ 3,291	80%	$ 3,006	78%	$ 2,796	80%
General and administrative expense	489	12%	421	11%	331	9%
Depreciation and amortization	211	5%	174	5%	170	5%
Goodwill and other asset impairment charges	253	6%	206	5%	—	—
Gains on changes in ownership interests, net	(30)	(1%)	—	—	—	—
Equity investment loss (income)	4	—	(4)	—	(10)	—
Total expenses	4,218	103%	3,803	99%	3,287	94%
Operating income	$ (104)	(3%)	$ 34	1%	$ 215	6%
Reconciliation of non-GAAP measures:						
Add:						
Goodwill and other intangible asset impairment charges	253		206		—	
Loss on sale of DMG Arizona	10		—		—	
Hospice accrual	16		—		—	
Less: Gain on sale of Tandigm ownership interest	(40)		—		—	
Adjusted operating income[1]	$ 135	3%	$ 240	6%	$ 215	6%

(1) For the year ended December 31, 2016, we have excluded the goodwill impairment charges of $253 million, the loss on sale of our DMG Arizona business of $10 million, an estimated accrual for damages and liabilities associated with our DMG Nevada hospice business of $16 million, which is included in general and administrative expenses, and the gain related to the sale of a portion of our Tandigm ownership interest of $40 million. For the year ended December 31, 2015, we have excluded estimated goodwill and other intangible asset impairment charges of $206 million related to certain DMG reporting units. These are non-GAAP measures and are not intended as substitutes for the equivalent GAAP measures. We have presented these adjusted amounts because management believes that these presentations enhance a user's understanding of our normal consolidated operating income by excluding certain items which we do not believe are indicative of our ordinary results of operations. As a result, adjusting for these amounts allows for comparison to our normal prior period results.

Capitated membership information

The table set forth below provides (i) the total number of capitated members to whom DMG provided healthcare services as of December 31, 2016, 2015 and 2014, and (ii) the aggregate member months for the years ended December 31, 2016, 2015 and 2014. Member months represent the aggregate number of months of healthcare services DMG has provided to capitated members during a period of time.

	Senior	Commercial	Medicaid
2014	310,500	387,400	139,400
2015	317,400	367,400	122,600
2016	305,200	338,300	105,800

	Senior	Commercial	Medicaid
2014	3,587,900	4,713,100	1,465,200
2015	3,774,300	4,497,900	1,556,400
2016	3,760,000	4,130,800	1,320,800

In addition to the members above, DMG provided healthcare services to members in two of its operating unconsolidated joint ventures that are accounted for as equity investments. These joint ventures provided healthcare services for approximately 148,700, 130,700 and 45,700 members as of December 31, 2016, 2015 and 2014, respectively, and for approximately 1,760,000, 1,564,200 and 538,000 member months for the years ended December 31, 2016, 2015 and 2014, respectively. The increase in members and member months was primarily due to an increase in members related to Tandigm.

During the year ended December 31, 2016, DMG members decreased by approximately 58,100 and member months decreased by approximately 617,000. The decrease in members and member months was due to planned non-renewals of certain commercial and Medicaid contracts, a decrease in commercial members as employers shift to less expensive options for medical services for their employees, and the sale of our DMG Arizona business which caused a decrease in senior members, partially offset by an increase in senior members from new acquisitions and non-acquired growth.

During the year ended December 31, 2015, DMG members decreased by approximately 29,900 and member months increased approximately 62,400. The decrease in members was due to a planned reduction in Medicaid members and a decline in commercial members as employers shift to less expensive options for medical services for their employees, partially offset by an increase in senior members due to non-acquired growth. The increase in member months was primarily attributable to an increase in senior members resulting from non-acquired growth, new acquisitions and an increase in Medicaid members due to Medicaid expansion. This increase in member months was partially offset by a planned non-renewal of certain plans in certain markets due to unfavorable economics.

Revenues

The following table provides a breakdown of DMG's revenue by source:

	Year ended December 31,		
	2016	2015	2014
	(dollars in millions)		
DMG revenues:			
Commercial revenues	$ 701	$ 727	$ 726
Senior revenues	2,537	2,473	2,319
Medicaid revenues	193	237	146
Total capitated revenues	3,431	3,437	3,191
Patient service revenue, net of provision for uncollectible accounts	622	318	219
Other revenues	61	82	92
Total net revenues	$ 4,114	$ 3,837	$ 3,502

Net revenues

DMG's net revenues for 2016 increased $277 million, or 7.2%, primarily due to an increase in FFS revenues due to the acquisition of The Everett Clinic Medical Group (TEC) in March 2016 and an increase in senior capitated revenues due to an increase in the number of senior capitated members during the year attributable to non-acquired growth and acquisitions. These increases were partially offset by a decrease in Medicare Advantage and Medicaid rates, as described below, a decrease in senior capitated revenues from the sale of our DMG Arizona business, a decrease in Medicaid revenues due to the timing of the recognition of additional Medicaid risk sharing revenue in 2015, a decrease in other revenues due to the recognition of additional revenues related to the maintenance of existing physician networks in 2015, a decrease in other consulting revenues and a decrease in commercial and Medicaid members to whom DMG provides health care services.

DMG's net revenue for 2015 increased $335 million, or 9.6%, primarily driven by an increase in FFS revenue from acquisitions, an increase in senior capitated revenue due to an increase in the number of senior capitated members during the year that is attributable to non-acquired growth and acquisitions, an increase in Medicaid memberships due to Medicaid expansion, recognition of additional Medicaid risk-share revenue due to decreased costs related to lower claims, and higher commercial negotiated rates for commercial members. These increases in net revenues were partially offset by a decrease in senior capitated revenues due to the planned non-renewal of some plans due to unfavorable economics in certain markets.

On April 4, 2016, CMS issued final guidance for 2017 Medicare Advantage benchmark payment rates (Rate Announcement). In 2017, CMS will fully implement the 2017 Risk Adjustment model proposed in the Rate Announcement, but with updated coefficients. Based upon our preliminary analysis of the final rule, we estimate that the reduction in 2017 rates, including adjustments for the new ACA blended benchmark county rates and qualifying bonuses, will lead to a reduction in Medicare Advantage rates to DMG of approximately 1.0%, or a net decrease of approximately $25 million to our 2017 operating income. This compares, according to CMS, to an industry average rate increase of approximately 0.85% without accounting for the expected growth in coding acuity that has typically added another 2.2%. The final impact of 2017 Medicare Advantage rates may vary from this estimate and will be impacted by the relative growth of DMG's Medicare Advantage patient volumes across markets as well as by the benefit plan designs submitted. It is possible that we have underestimated the impact of the 2017 Medicare Advantage rates on our business, which may have a material adverse effect on our financial position, results of operation or cash flows. The more significant decreases in Medicare Advantage rates for the Company compared to the industry average are largely driven by two factors: DMG's higher mix of Medicare Advantage patients in counties that will receive a lower-than-average benchmark rate increase, and a higher-than-average impact from a revision to the risk model to differentiate payment levels between dual-eligible and non-dual-eligible patients.

The 2016 Medicare Advantage rates incorporated a modification to the risk adjustment model calculation that CMS utilizes to determine the risk acuity scores of Medicare Advantage patients. These changes to the rate structure and risk model calculation decreased DMG's 2016 Medicare Advantage rates by approximately 2.0% of the Medicare Advantage revenues DMG manages on behalf of its senior capitated population as compared to 2015. This compares, according to CMS, to the industry average rate increase of approximately 1.25%.

The more significant decline in Medicare Advantage rates for DMG compared to the industry average is driven by a larger-than-average decline associated with CMS's modification to the risk adjustment model calculations. We believe the full implementation of the 2014 CMS-HCC Risk Adjustment model negatively affects DMG and other providers like us who have invested more heavily in wellness and prevention programs for patients with chronic conditions.

Patient care costs

The following table reflects DMG's patient care costs which are comprised of medical expenses, hospital expenses, clinic support and other operating costs:

	Year ended December 31,		
	2016	2015	2014
	(dollars in millions)		
Medical expenses	$ 1,991	$ 1,865	$ 1,734
Hospital expenses	617	602	586
Clinic support and other operating costs	683	539	476
Total	$ 3,291	$ 3,006	$ 2,796

Operating expenses

Patient care costs. DMG's patient care costs for 2016 increased by approximately $285 million from 2015. The increase was primarily attributable to the acquisition of TEC, an increase in medical claim expenses, hospital expenses, and clinic support costs due

to increased senior capitated members from acquisitions and non-acquired growth, and increased headcount. The increase in costs was partially offset by a decrease due to the sale of our Arizona business, decreased consulting expenses, a decrease in benefits, and a decrease in commercial and Medicaid members to whom DMG provides healthcare services.

DMG's patient care costs for 2015 increased by approximately $210 million from 2014. The increase was primarily attributable to increases in medical claim expenses and hospital expenses due to increases in senior and Medicaid member months from acquisitions, non-acquired growth, Medicaid expansion, market expansion and the timing of the recognition of additional benefit expense related to higher Medicaid risk sharing revenues. The increase was also driven by an increase in clinic support costs due to acquisitions. The increase in costs was partially offset by a decrease in commercial members to whom DMG provides healthcare services and a decrease in costs due to the planned non-renewal of some plans due to unfavorable economics in certain markets.

General and administrative expenses. DMG's general and administrative costs for 2016, which includes an estimated accrual for damages and liabilities associated with our DMG Nevada hospice business of $16 million, increased $68 million from 2015. Excluding this item, adjusted general and administrative expenses would have increased by $52 million. This increase was primarily attributable to the acquisition of TEC, an increase in corporate administrative support expenses due to increased labor costs and costs associated with growth initiatives, partially offset by a decrease due to the sale of our DMG Arizona business and a decrease in benefits.

DMG's general and administrative costs for 2015 increased $90 million from 2014. This increase was primarily attributable to an increase in corporate administrative support costs related to growth initiatives, professional fees, recognition of additional compensation expense, and travel costs.

Depreciation and amortization. DMG's depreciation and amortization for 2016 increased $37 million from 2015. The increase was primarily attributable to the acquisition of TEC, an increase in amortization related to the acceleration of the HCP-related trade names, and an increase in technology and property investments as part of our growth initiatives. As of September 1, 2016, we committed to a plan to change HCP trade names to DMG. As a result of this decision we began to accelerate the amortization of the remaining carrying value of HCP trade names, which resulted in additional amortization of $9 million for 2016. This additional amortization will continue at a rate of approximately $7 million per quarter through the first quarter of 2019 which represents the remaining life of these assets.

DMG's depreciation and amortization for 2015 increased $4 million from 2014. The increase is primarily attributable to depreciation and amortization of assets associated with acquisitions.

Goodwill and other intangible asset impairment charges. During the year ended December 31, 2015, we recognized impairment charges of $189 million on goodwill and $17 million on other intangible assets of certain DMG reporting units based on assessments performed after circumstances indicated it had become more likely than not that the goodwill of certain DMG reporting units had become impaired. These circumstances included underperformance of the business in recent quarters, as well as changes in other market conditions, including government reimbursement cuts and our expected ability to mitigate them.

Based on continuing developments at our DMG reporting units during 2016, including the Medicare Advantage final benchmark rates for 2017 announced on April 4, 2016, further changes in our expectations concerning future government reimbursement rates and our expected ability to mitigate them, as well as medical cost and utilization trends, underperformance of certain at-risk units in recent quarters and other market conditions, we performed additional goodwill impairment assessments for certain at-risk DMG reporting units during each of the first three quarters of 2016 and as of their November 1 annual assessment date.

As a result of the assessments described above, we have recognized the DMG goodwill impairment charges shown below:

Reporting unit	Year ended December 31, 2016	2015	2014
	(dollar amounts rounded to nearest million)		
DMG Nevada	$ 162	$ 181	$ —
DMG Florida	91	6	—
DMG Arizona	—	2	—
Total	$ 253	$ 189	$ —

Gain on sales of business interests. Effective June 30, 2016, we sold a portion of our ownership interest in Tandigm, reducing our ownership from 50% to 19% and resulting in a pre-tax gain of $40 million. In addition, on June 1, 2016, we sold our DMG Arizona business for a pre-tax loss of $10 million.

Equity investment loss (income). DMG's share of equity investment income from our nonconsolidated joint ventures for 2016 decreased $8 million from 2015. This increase in equity losses was primarily attributable to a decrease in profitability of certain joint ventures, partially offset by the sale of a portion of our Tandigm ownership interest during second quarter which resulted in a reduced share of equity investment losses during the third and fourth quarters of 2016.

DMG's share of equity investment income from our nonconsolidated joint venture relationships for 2015 decreased $6 million from 2014. This decrease in equity income was primarily attributable to our share of expenses from a certain newly formed joint venture that provides integrated healthcare and reduced commercial risk pool performance.

Segment operating income

DMG's operating income for 2016, which includes the goodwill impairment charges of $253 million, the gain related to the sale of a portion of our Tandigm ownership interest of $40 million, the loss on the sale of our DMG Arizona business of $10 million and an estimated accrual for damages and liabilities associated with our DMG Nevada hospice business of $16 million, decreased $138 million from 2015, which included estimated goodwill and other intangible asset impairment charges of $206 million related to certain reporting units. Excluding these items from their respective periods, adjusted operating income for the year ended December 31, 2016 would have decreased by approximately $105 million. This decrease in adjusted operating income was primarily attributable to a decrease in Medicare Advantage and Medicaid rates, a decrease in revenue due to the timing of Medicaid risk sharing revenue and additional revenues related to the maintenance of existing physicians networks recognized in 2015, the acquisition of TEC, an increase in depreciation and amortization related to the trade names acceleration, and an increase in technology and property investments and corporate administrative support costs, partially offset by a decrease in benefits and an increase in senior capitated members due to acquisitions and non-acquired growth.

DMG's operating income for 2015, which included estimated goodwill and other intangible asset impairment charges of $206 million related to certain reporting units decreased $181 million from 2014. Excluding this item from 2015, adjusted operating income for the year ended December 31, 2015 would have increased by approximately $25 million, or 11.6%. This increase in adjusted operating income was primarily attributable to an increase in FFS revenue from acquisitions and non-acquired growth, an increase in Medicaid members due to Medicaid expansion, the timing of recognition of additional Medicare risk share revenue and a reduction of claims expense due to the planned non-renewal of some plans due to unfavorable economics in certain markets. This increase was partially offset by a decrease in commercial members, and higher general and administrative costs.

Other—Ancillary services and strategic initiatives business

Our other operations include ancillary services and strategic initiatives which are primarily aligned with our core business of providing dialysis services to our network of patients. As of December 31, 2016, these consisted primarily of pharmacy services, disease management services, vascular access services, clinical research programs, physician services, direct primary care and our international dialysis operations. The ancillary services and strategic initiatives generated approximately $1.621 billion of net revenues in 2016, representing approximately 10% of our consolidated net revenues. We currently expect to continue to invest in our ancillary services and strategic initiatives, including our continued expansion into certain international markets, as we work to develop successful new business operations. However, any significant change in market conditions, business performance or in the regulatory environment may impact the economic viability of any of these strategic initiatives. Any unfavorable changes in these strategic initiatives could result in a write-off or an impairment of some or all of our investments, including goodwill, and could also result in significant termination costs if we were to exit a certain line of business or one or more of our international markets.

As of December 31, 2016, we provided dialysis and administrative services to a total of 154 outpatient dialysis centers located in 11 countries outside of the U.S. Our international dialysis operations are still in an early phase of development as we primarily commenced operations during the fourth quarter of 2011. The total net revenues generated from our international operations, as reflected below, were approximately 1% of our 2016 consolidated net revenues.

The following table reflects the results of operations for the ancillary services and strategic initiatives:

	Year ended December 31,		
	2016	2015	2014
	(dollar amounts rounded to nearest million)		
U.S. revenues			
Net patient service revenues	$ 26	$ 26	$ 20
Other revenues	1,299	1,144	941
Capitated revenues	88	72	70
Total	1,413	1,242	1,031
International revenues			
Net patient service revenues	202	134	102
Other revenues	6	6	6
Total	208	140	108
Total net revenues	$ 1,621	$ 1,382	$ 1,139
U.S. operating income	$ (65)	$ (45)	$ 17
Reconciliation of non-GAAP:			
Add:			
Goodwill impairment	28	—	—
Pharmacy accrual	16	22	—
Adjusted operating loss(1)	$ (21)	$ (23)	$ 17
International operating income	$ 332	$ (59)	$ (42)
Reconciliation of non-GAAP:			
Add: Impairment of minority equity investment	15	4	—
Less: Gain from APAC JV	(374)	—	—
Adjusted operating loss(1)	(27)	(55)	(42)
Total Adjusted operating loss(1)	$ (48)	$ (78)	$ (25)

(1) For the year ended December 31, 2016, we have excluded a goodwill impairment charge of $28 million related to our vascular access reporting unit, an estimated accrual of $16 million for damages and liabilities associated with our pharmacy business, an impairment of $15 million related to a minority equity investment, and a gain on the APAC JV ownership changes of $374 million. For the year ended December 31, 2015, we have excluded estimated goodwill impairment charges of $4 million and an estimated accrual of $22 million for damages and liabilities associated with our pharmacy business. These are non-GAAP measures and are not intended as substitutes for the equivalent GAAP measures. We have presented these adjusted amounts because management believes that these presentations enhance a user's understanding of our normal consolidated operating income by excluding certain items which we do not believe are indicative of our ordinary results of operations. As a result, adjusting for these amounts allows for comparison to our normal prior period results.

Net revenues

Ancillary services and strategic initiatives net revenues for 2016 increased by approximately $239 million, or 17.3%, as compared to 2015. The increase was primarily related to an increase in pharmaceutical rates, a decrease in reserves due to refunds of pharmacy reimbursements taken in 2015 that did not reoccur in 2016, an increase in VillageHealth special needs plan revenues and an increase in net revenues from our expansion in our international business and other strategic initiatives. These increases were partially offset by a decrease in our pharmacy services volume.

Ancillary services and strategic initiatives net revenues for 2015 increased by approximately $243 million, or 21.3%, as compared to 2014. The increase was primarily related to an increase in pharmacy services volume and pharmaceutical rates, as well as an increase in net revenues from growth in our international business and other strategic initiatives. These increases were partially offset by an increase in reserves for refunds of prior period pharmacy reimbursements.

Operating and general expenses

Ancillary services and strategic initiatives operating expenses for 2016, which includes an estimated accrual for damages and liabilities associated with our pharmacy business of $16 million, increased by approximately $203 million from 2015, which included an estimated accrual for damages and liabilities associated with our pharmacy business of $22 million. Excluding these items from their respective periods, ancillary services and strategic initiatives adjusted operating expenses would have increased by $209 million. This increase in adjusted operating expenses was primarily due to an increase in pharmaceutical unit costs, labor and benefit costs, professional fees, other general and administration expenses, and additional expenses associated with our international dialysis expansion, partially offset by a decrease in prescription dispensing volume and long-term incentive compensation expense.

Ancillary services and strategic initiatives operating expenses for 2015, which included an estimated accrual for damages and liabilities associated with our pharmacy business of $22 million, increased by approximately $318 million from 2014. Excluding this item from 2015, the ancillary services and strategic initiatives adjusted operating expenses would have increased by $296 million. This increase in adjusted operating expenses was primarily due to an increase in prescription dispensing volume, higher pharmaceutical costs, higher labor costs and related payroll taxes and benefit costs, additional expenses associated with our international dialysis expansion, and an increase in costs associated with the right to use intellectual property and general and administrative and corporate administrative support expenses.

Goodwill and other asset impairment charges. During the quarter ended December 31, 2016, we determined that circumstances indicated it had become more likely than not that the goodwill of our vascular access reporting unit had become impaired. These circumstances included changes in governmental reimbursement and our expected ability to mitigate them. Specifically, on November 2, 2016, CMS released the 2017 Physician Fee Schedule Final Rule and the Ambulatory Surgical Center Payment Final Rule which reflected significant changes in reimbursement structure for this business unit. We have performed the required valuations to estimate the fair value of the net assets and implied goodwill of this reporting unit with the assistance of a third-party valuation firm. Based on this assessment, we recorded a goodwill impairment charge of $28 million.

In 2016, we also recorded an impairment of $15 million related to a minority equity investment in one of our international reporting units.

In 2015, we recorded a goodwill impairment charge of $4 million in one of our international reporting units.

Gain on changes in ownership interests in Asia Pacific joint venture (APAC JV)

On August 1, 2016, we consummated an agreement with Khazanah Nasional Berhad (Khazanah) and Mitsui and Co., Ltd (Mitsui) whereby Khazanah and Mitsui subscribed to invest a total of $300 million over three years in exchange for a 40% total equity interest in our APAC JV. Khazanah and Mitsui each made related initial investments of $50 million in this business on August 1, 2016.

As a result of this transaction, we deconsolidated our Asia Pacific dialysis business in the third quarter and recognized a non-cash non-taxable gain of $374 million on our retained investment in the APAC JV net of contingent obligations as a result of adjusting the carrying value of our retained interest in the APAC JV to our proportionate share of the estimated fair value of the business.

Segment operating income (loss)

Ancillary services and strategic initiatives operating income for 2016, which includes a gain on the APAC JV ownership changes of $374 million, a goodwill impairment charge of $28 million related to our vascular access reporting unit, an estimated accrual for damages and liabilities associated with our pharmacy business of $16 million and an impairment of $15 million related to a minority equity investment, increased by approximately $371 million from 2015, which includes an estimated accrual for damages and liabilities of $22 million, as well as a goodwill impairment charge of $4 million related to our international operations. Excluding these items from their respective periods, adjusted operating losses would have decreased by $30 million. This decrease in adjusted operating losses was primarily due to an increase in pharmaceutical rates, a decrease in reserves due to refunds of pharmacy reimbursements taken in 2015 that did not reoccur in 2016, an increase in VillageHealth special needs plan revenues and an increase in net revenues from our expansion in our international business and other strategic initiatives. The decrease in adjusted operating losses was partially offset by an increase in pharmaceutical unit costs, higher labor and benefits costs and additional expenses associated with our international dialysis expansion.

Ancillary services and strategic initiatives operating losses for 2015 increased by approximately $79 million from 2014 which includes an estimated accrual for damages and liabilities of $22 million, as well as a goodwill impairment charge of $4 million related to our international operations during the second quarter of 2015. Excluding these items from 2015, adjusted operating losses would have increased by $53 million. This increase in adjusted operating losses was primarily due to an increase in drug prescription costs associated with our pharmacy business, higher labor costs, increases in expenses related to our international expansion, an increase in

costs associated with the right to use intellectual property and an increase in general and administrative costs. The increase in adjusted operating losses was partially offset by an increase in net revenue in our pharmacy business, primarily from additional volume and increases in pharmaceutical rates.

Corporate level charges

Debt expense. Debt expense for 2016, 2015, and 2014 consisted of interest expense of approximately $394 million, $390 million, and $386 million, respectively, and amortization and accretion of debt discounts and premiums, amortization of deferred financing costs and amortization of interest rate cap agreements of approximately $20 million in 2016, $18 million in 2015 and $25 million in 2014. The increase in debt expense in 2016 as compared to 2015 was primarily related to an increase in our weighted average outstanding principal balances as a result of a full year of interest on our 5.0% Senior Notes, which were issued in April 2015, and an increase in our interest rate on the amortization of our cap agreements in the fourth quarter of 2016. Our overall weighted average effective interest rate in 2016 was 4.43% as compared to 4.42% in 2015.

The increase in debt expense in 2015 as compared to 2014 was primarily related to an increase in weighted average outstanding principal balances offset by lower weighted average interest rates as a result of the issuance of our 5.0% Senior Notes in April 2015, as well as the entry into a new credit agreement and the issuance of senior notes in June 2014. Our overall weighted average effective interest rate in 2015 was 4.42% as compared to 4.68% in 2014.

Corporate administrative support. Corporate administrative support consists primarily of labor, benefits and long-term incentive compensation costs, as well as professional fees for departments which provide support to all of our various operating lines of business. In 2016, it also included an adjustment to reduce receivables associated with the DMG acquisition escrow provision relating to income tax items of $31 million, as discussed below. These expenses are included in our consolidated general and administrative expenses.

In connection with the acquisition of DMG, we recorded receivables against the acquisition escrow balance to offset specific potential tax liabilities. Certain of these potential tax liabilities expired, resulting in the reduction of these assets during 2016. This negatively impacted our corporate administrative support cost by $31 million. This cost was directly offset by a corresponding reduction in income tax expense due to the expiration of the corresponding tax liabilities.

Corporate administrative support costs were approximately $45 million in 2016, which included the adjustment to reduce receivables associated with the DMG acquisition escrow provision relating to an income tax item of $31 million, as compared to $19 million in 2015. This increase of approximately $26 million in corporate administrative support costs is primarily attributable to the tax receivables related to the DMG acquisition escrow provision, as well as increases in labor and benefits, professional fees, and other general and administrative expenses. These increases were offset by a decrease in long-term incentive compensation, primarily due to reductions in ultimate expected pay-outs as well as the departure of a senior executive.

Corporate administrative support costs were approximately $19 million in 2015, as compared to $13 million in 2014. The change of approximately $6 million in corporate administrative support costs was primarily attributable to an increase in labor and benefits and professional fees, offset by an increase in management fee allocations.

Other income. Other income was approximately $9 million in both 2016 and 2015, and $2 million in 2014, and consisted principally of interest income. Other income in 2016 as compared to 2015 was flat, as short-term investment interest income increased but was offset by an increase in foreign currency transaction losses. Other income increased in 2015 as compared to 2014 due to an increase in short-term investment interest income and a decrease in foreign currency transaction losses.

Provision for income taxes. The provision for income taxes for 2016, 2015 and 2014 represented an effective annualized tax rate of 30.6%, 40.9% and 34.1% of income from continuing operations, respectively. The effective tax rate in 2016 was lower primarily due to the gain on the APAC JV ownership changes, offset by goodwill impairment charges.

Noncontrolling interests

Net income attributable to noncontrolling interests for 2016, 2015 and 2014 was approximately $153 million, $158 million and $140 million, respectively. The decrease in noncontrolling interests in 2016 was primarily due to the impairment of our vascular access reporting unit, which resulted in a decrease in noncontrolling interest of $8 million. The increase in noncontrolling interests expense in 2015 was primarily due to increases in the profitability of our dialysis-related joint ventures. The percentage of U.S. dialysis and related lab services net revenues generated from dialysis-related joint ventures was approximately 24%, 23% and 22% in 2016, 2015 and 2014, respectively.

Accounts receivable

Our accounts receivable balances at December 31, 2016 and December 31, 2015 were $1.917 billion and $1.724 billion, respectively, representing approximately 49 days and 46 days of revenue, respectively, net of the allowance for uncollectible accounts. The increase in DSO was primarily related to our U.S. dialysis and related lab services business, mainly as a result of improved cash collection performance in 2015 which we did not experience in 2016. Our DSO calculation is based on the current quarter's average revenues per day.

As of December 31, 2016 and 2015, our unreserved patient services accounts receivable balances more than six months old were approximately $252 million and $246 million, respectively, representing approximately 16% and 18% of our net patient and other services accounts receivable balances, respectively. There were no significant unreserved balances over one year old. Less than 1% of our revenues are classified as patient pay. Substantially all revenue realized is from government and commercial payors, as discussed above.

For receivables associated with our capitated health plans, the balances remain on the balance sheet for as long as the respective plan years are open, which varies by health plan, but is generally two years in length. The majority of our capitated health plans accounts receivable is three to six months old with collections occurring on a periodic basis throughout the duration of the corresponding plan year.

Liquidity and capital resources

Available liquidity. As of December 31, 2016, our cash balance was $913 million and we also had approximately $310 million in short-term investments. We also had an undrawn revolving line of credit under our senior secured credit facilities totaling $1.0 billion, of which approximately $95.2 million was committed for outstanding letters of credit. The remaining amount is unencumbered. In addition, DMG has an outstanding letter of credit of approximately $1.3 million that is secured by a certificate of deposit. We believe that we will have sufficient liquidity, operating cash flows and access to borrowings to fund our scheduled debt service payments and other obligations for the foreseeable future. Our primary sources of liquidity are cash from operations and cash from borrowings.

Cash flow from operations during 2016 amounted to $2.0 billion compared with $1.6 billion for 2015. The increase in our operating cash flows in 2016 as compared to 2015 was primarily due to payments of $494 million, or $304 million after-tax, made in connection with the settlement of a private civil suit in 2015 and due to the timing of other working capital items, offset by an increase in our income tax payments and a slight increase in our cash interest payments. Cash flow from operations in 2016 included cash interest payments of approximately $407 million and cash tax payments of $339 million. Cash flow from operations in 2015 included cash interest payments of approximately $405 million and cash tax payments of $156 million.

Non-operating cash outflows in 2016 included $829 million for capital asset expenditures, including $470 million for new center developments and relocations, and $359 million for maintenance and information technology. We also spent an additional $564 million for acquisitions. During 2016, we also received $1.3 billion from the maturity and sale of investments. However, these proceeds were principally used to repurchase other investments or to fund distributions from our deferred compensation plans. In addition, during 2016 we received $37 million associated with stock award exercises and other share issuances and related excess tax benefits. We also made distributions to noncontrolling interests of $192 million, and received contributions from noncontrolling interests of $48 million associated with new joint ventures and from additional equity contributions. We also repurchased a total of 16,649,090 shares of our common stock for $1.072 billion, or an average price of $64.41 per share. In addition, we settled $25 million in share repurchases related to 2015.

Non-operating cash outflows in 2015 included $708 million for capital asset expenditures, including $381 million for new center developments and relocations and $327 million for maintenance and information technology. We also spent an additional $97 million for acquisitions. During 2015, we also received $1.6 billion from the maturity and sale of investments. However, these proceeds were principally used to repurchase other investments or to fund distributions from our deferred compensation plans. In addition, during 2015, we received $54 million associated with stock award exercises and other share issuances and the related excess tax benefits. We also made distributions to noncontrolling interests of $175 million, and received contributions from noncontrolling interests of $55 million associated with new joint ventures and from additional equity contributions. We also repurchased a total of 7,779,958 shares of our common stock for $575 million, or an average price of $73.96 per share, of which $25 million was unsettled at December 31, 2015.

On August 9, 2016, we entered into an amendment to our agreement to acquire Colorado-based Renal Ventures Limited, LLC (Renal Ventures). As a result of the amended agreement, we will acquire a 100% interest in all 38 outpatient dialysis centers owned by Renal Ventures, including one new center under construction, and a 51% interest in one vascular access clinic. The purchase price will be approximately $360 million in cash subject to, among other things, adjustments for certain items such as working capital. The transaction is subject to approval by the Federal Trade Commission (FTC) including Hart-Scott-Rodino antitrust clearance. We

anticipate that we will be required by the FTC to divest some outpatient dialysis centers as a condition of the transaction. We currently expect the transaction to close in mid 2017.

During 2016, we opened 100 new U.S. dialysis centers, acquired a total of eight U.S. dialysis centers, merged five centers, added two centers which we operate under a management and administrative services agreement, terminated two management and administration services agreements, deconsolidated three centers which we now operate under management and administrative services agreements and closed four centers. Outside the U.S., we acquired 21 dialysis centers and opened 15 new dialysis and hospital operated centers.

During 2016, our DMG business acquired three primary care physician practices including the acquisition of TEC, and four private medical practices.

During 2015, we opened 72 new U.S. dialysis centers, acquired a total of six U.S. dialysis centers, sold one center, merged five centers, added two centers in which we operate under a management and administrative services agreement and closed two centers. Outside the U.S., we acquired 21 dialysis centers, opened seven new dialysis and hospital operated centers, and terminated one management and administration services agreement.

During 2015, our DMG business acquired three family practices, one management services organization, two primary care practices, and six private medical practices.

During the year ended December 31, 2016, we made mandatory principal payments under our senior secured credit facilities totaling $63 million on Term Loan A and $35 million on Term Loan B. During the year ended December 31, 2015, we made mandatory principal payments under our senior secured credit facilities totaling $50 million on Term Loan A and $35 million on Term Loan B.

Interest rate swap and cap agreements

As of December 31, 2016, we maintain several interest rate cap agreements that were entered into in November 2014 with notional amounts totaling $3.5 billion. These previously forward cap agreements became effective September 30, 2016 and have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 3.50% on an equivalent amount of our debt. These cap agreements expire on June 30, 2018. As of December 31, 2016, the total fair value of these cap agreements was an asset of approximately $0.1 million. During the year ended December 31, 2016, we recorded a loss of $1.2 million in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

As of December 31, 2016, we maintain several forward interest rate cap agreements that were entered into in October 2015 with notional amounts totaling $3.5 billion. These forward cap agreements will become effective June 29, 2018 and will have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 3.50% on an equivalent amount of our debt. These cap agreements expire on June 30, 2020. As of December 31, 2016, the total fair value of these cap agreements was an asset of approximately $9.8 million. During the year ended December 31, 2016, we recorded a loss of $4.0 million in other comprehensive income due to a decrease in the unrealized fair value of these forward cap agreements.

Previously, we maintained several interest rate cap agreements with notional amounts totaling $2.7 billion on our Term Loan B debt. These agreements had the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 2.50% on an equivalent amount of our Term Loan B. These interest rate cap agreements expired September 30, 2016. During the year ended December 31, 2016, we recognized debt expense of $1.8 million from these caps.

We also previously maintained several interest rate swap agreements. These agreements had the economic effect of modifying the LIBOR variable component of our interest rate on an equivalent amount of our Term Loan A to fixed rates ranging from 0.49% to 0.52%. These interest rate swap agreements required monthly interest payments and expired September 30, 2016. During the year ended December 31, 2016, we recognized debt expense of $0.3 million from these swaps and recorded a loss of $0.8 million in other comprehensive income due to a decrease in the unrealized fair value of these swap agreements.

Other items

As of December 31, 2016, the interest rate on our Term Loan B debt bears interest at LIBOR plus an interest rate margin of 2.75%. Term Loan B is subject to interest rate caps, if LIBOR should rise above 3.50%. Term Loan A bears interest at LIBOR plus an interest rate margin of 1.75%. The capped portion of Term Loan A is $87.5 million. In addition, the uncapped portion of Term Loan A, which is subject to the variability of LIBOR, is $775 million. Interest rates on our senior notes are fixed by their terms.

Our overall weighted average effective interest rate on the senior secured credit facilities was 3.68%, based on the current margins in effect of 1.75% for Term Loan A and 2.75% for Term Loan B, as of December 31, 2016.

As of December 31, 2016, our interest rates are fixed on approximately 53% of our total debt.

Our overall weighted average effective interest rate during the year ended December 31, 2016 was 4.43% and as of December 31, 2016 was 4.52%.

As of December 31, 2016, we had undrawn revolving credit facilities totaling $1.0 billion of which approximately $95.2 million was committed for outstanding letters of credit. In addition, we have approximately $1.3 million of committed letters of credit outstanding related to DMG which are backed by a certificate of deposit.

We believe that we will generate significant operating cash flows and will have sufficient liquidity to fund our scheduled debt service and other obligations for the foreseeable future, including the next 12 months, under the terms of our debt agreements. Our primary sources of liquidity are cash from operations and cash from borrowings.

Goodwill and indefinite-lived intangible assets

During the year ended December 31, 2015, we recognized impairment charges of $189 million on goodwill and $17 million on other intangible assets of certain DMG reporting units based on assessments performed after circumstances indicated it had become more likely than not that the goodwill of certain DMG reporting units had become impaired. These circumstances included underperformance of the businesses in recent quarters, as well as changes in other market conditions, including government reimbursement cuts and our expected ability to mitigate them.

Based on continuing developments at our DMG reporting units during 2016, including the Medicare Advantage final benchmark rates for 2017 announced on April 4, 2016, further changes in our expectations concerning future government reimbursement rates and our expected ability to mitigate them, as well as medical cost and utilization trends, underperformance of certain at-risk units in recent quarters and other market conditions, we performed additional goodwill impairment assessments for certain at-risk DMG reporting units during each of the first three quarters of 2016 and as of their November 1 annual assessment date.

In addition, during the quarter ended December 31, 2016, we determined that circumstances indicated it had become more likely than not that the goodwill of our vascular access reporting unit had become impaired. These circumstances included changes in future governmental reimbursement and our expected ability to mitigate them. Specifically, on November 2, 2016, CMS released the 2017 Physician Fee Schedule Final Rule and the Ambulatory Surgical Center Payment Final Rule which reflected significant changes in reimbursement structure for this business unit. Accordingly, we performed the required valuations to estimate the fair value of the net assets and implied goodwill of this reporting unit with the assistance of a third-party valuation firm.

As a result of the assessments described above, we have recognized the goodwill impairment charges below:

	Year ended December 31,		
Reporting unit	**2016**	**2015**	**2014**
	(dollar amounts rounded to nearest million)		
DMG Nevada	$ 162	$ 181	$ —
DMG Florida	91	6	—
DMG Arizona	—	2	—
Vascular access	28	—	—
International operations	—	4	1
Total	$ 281	$ 193	$ 1

Further reductions in reimbursement rates, increases in medical cost or utilization trends, or other significant adverse changes in expected future cash flows or valuation assumptions could result in goodwill impairment charges in the future for the following reporting units, which remain at risk of goodwill impairment:

Reporting unit	Goodwill balance as of December 31, 2016	Carrying amount coverage(1)	Sensitivities	
			Operating income(2)	Discount rate(3)
	(in millions)			
DMG Nevada	$ 261	11.4%	-2.2%	-3.9%
DMG Florida	$ 443	7.1%	-1.7%	-3.2%
DMG New Mexico	$ 71	2.6%	-1.5%	-2.2%
DMG Washington	$ 245	3.7%	-1.8%	-3.4%
Vascular access	$ 35	4.3%	-2.7%	-5.3%

(1) Excess of estimated fair value of the reporting unit over carrying amount as of the latest assessment date.
(2) Potential impact on estimated fair value of a sustained, long-term reduction of 3% in operating income as of the latest assessment date.
(3) Potential impact on estimated fair value of an increase in discount rates of 100 basis points as of the latest assessment date.

There were no major changes in the business, prospects, or expected future results of these reporting units from their latest assessment date.

Except as described above, none of our various other reporting units was considered at risk of goodwill impairment as of December 31, 2016. Since the dates of our last annual goodwill impairment tests, there have been certain developments, events, changes in operating performance and other changes in key circumstances that have affected our businesses. However, except as further described above, these did not cause management to believe it is more likely than not that the fair value of any of our other reporting units would be less than their respective carrying amount.

Long-term incentive compensation

Long-term incentive program (LTIP) compensation includes both stock-based awards (principally stock-settled stock appreciation rights, restricted stock units and performance stock units) as well as long-term performance-based cash awards. Long-term incentive compensation expense, which was primarily general and administrative in nature, was attributed among our U.S. dialysis and related lab services business, DMG business, corporate administrative support, and the ancillary services and strategic initiatives.

Our stock-based compensation awards are measured at their estimated fair values on the date of grant if settled in shares or at their estimated fair values at the end of each reporting period if settled in cash. The value of stock-based awards so measured is recognized as compensation expense on a cumulative straight-line basis over the vesting terms of the awards, adjusted for expected forfeitures.

During 2016, we granted approximately 1,280,034 stock-settled stock appreciation rights (SSARs) with an aggregate grant-date fair value of $17.6 million and a weighted-average expected life of approximately 4.2 years and approximately 328,457 stock units with an aggregate grant-date fair value of $23.6 million and a weighted-average expected life of approximately 3.3 years. We also granted 9,600 cash-settled stock-based awards with an aggregate grant-date fair value of $0.2 million.

Long-term incentive compensation costs of $73.3 million for the year ended December 31, 2016 decreased by approximately $57.3 million as compared to 2015. This decrease in long-term incentive compensation was primarily due to a cumulative revaluation of liability-based awards for reductions in estimated ultimate payouts, as well as the final vesting of a prior broad grant that is no longer contributing expense.

Long-term incentive compensation costs of $130.7 million for the year ended December 31, 2015 increased by approximately $11.7 million as compared to 2014. This increase in long-term incentive compensation was primarily due to an increase in the value of LTIP awards that contributed expense during this period and LTIP award forfeitures realized at a lower rate than previously expected.

As of December 31, 2016, there was $93.0 million in total estimated but unrecognized long-term incentive compensation costs for LTIP awards outstanding, including $59.0 million relating to stock-based awards under our equity compensation plans. We expect to recognize the performance-based cash component of these LTIP costs over a weighted average remaining period of 1.0 year and the stock-based component of these LTIP costs over a weighted average remaining period of 1.4 years.

For the years ended December 31, 2016, 2015 and 2014, we received $28.4 million, $45.7 million and $59.1 million, respectively, in actual tax benefits upon the exercise of stock awards. Since the Company issues stock-settled stock appreciation rights rather than stock options, it did not receive cash proceeds from stock option exercises during the years ended December 31, 2016, 2015 and 2014.

Stock repurchases

In 2016, we repurchased a total of 16,649,090 shares of our common stock for $1.072 billion, or an average price of $64.41 per share. In 2015, we repurchased 7,779,958 shares of our common stock for $575 million, or an average price of $73.96 per share. In 2014, we did not repurchase any of our common stock. We have not repurchased any additional shares of our common stock from January 1, 2017 through February 24, 2017.

On July 13, 2016, our Board of Directors approved a share repurchase authorization in the amount of approximately $1.241 billion. This share repurchase authorization is in addition to the $259 million remaining at that time under our Board of Directors' prior share repurchase authorization announced in April 2015. As a result of the above transactions, there was approximately $677 million available under our current Board authorizations for additional share repurchases as of February 24, 2017. Although our share repurchase authorizations have no expiration dates, we are subject to share repurchase limitations under the terms of our senior secured credit facility and the indentures governing our senior notes.

Off-balance sheet arrangements and aggregate contractual obligations

In addition to the debt obligations reflected on our balance sheet, we have commitments associated with operating leases and letters of credit, as well as potential obligations associated with our equity investments in nonconsolidated businesses and to dialysis centers that are wholly-owned by third parties. Substantially all of our U.S. dialysis facilities are leased. We have potential obligations to purchase the noncontrolling interests held by third parties in several of our majority-owned joint ventures and other nonconsolidated entities. These obligations are in the form of put provisions and are exercisable at the third-party owners' discretion within specified periods as outlined in each specific put provision. If these put provisions were exercised, we would be required to purchase the third-party owners' equity interests at either the appraised fair market value or a predetermined multiple of earnings or cash flow attributable to the equity interests put to us, which is intended to approximate fair value. The methodology we use to estimate the fair values of noncontrolling interests subject to put provisions assumes the higher of either a liquidation value of net assets or an average multiple of earnings, based on historical earnings, patient mix and other performance indicators that can affect future results, as well as other factors. The estimated fair values of the noncontrolling interests subject to put provisions is a critical accounting estimate that involves significant judgments and assumptions and may not be indicative of the actual values at which the noncontrolling interests may ultimately be settled, which could vary significantly from our current estimates. The estimated fair values of noncontrolling interests subject to put provisions can fluctuate and the implicit multiple of earnings at which these noncontrolling interests obligations may be settled will vary significantly depending upon market conditions including potential purchasers' access to the capital markets, which can impact the level of competition for dialysis and non-dialysis related businesses, the economic performance of these businesses and the restricted marketability of the third-party owners' equity interests. The amount of noncontrolling interests subject to put provisions that employ a contractually predetermined multiple of earnings rather than fair value are immaterial. For additional information see Note 18 to the consolidated financial statements.

We also have certain other potential commitments to provide operating capital to several dialysis centers that are wholly-owned by third parties or centers in which we own a noncontrolling equity interest as well as to physician-owned vascular access clinics or medical practices that we operate under management and administrative services agreements. We have certain other potential commitments related to service agreements of approximately $1.5 million.

The following is a summary of these contractual obligations and commitments as of December 31, 2016 (in millions):

	Less than 1 year	1-3 years	3-5 years	After 5 years	Total
Scheduled payments under contractual obligations:					
Long-term debt	$ 143	$ 874	$ 3,327	$ 4,549	$ 8,893
Interest payments on the senior notes	237	473	473	603	1,786
Interest payments on Term Loan B(1)	121	239	176	—	536
Interest payments on Term Loan A(2)	23	30	—	—	53
Capital lease obligations	22	42	43	193	300
Operating leases	474	844	665	1,244	3,227
	$ 1,020	$ 2,502	$ 4,684	$ 6,589	$ 14,795
Potential cash requirements under existing commitments:					
Letters of credit	$ 97	$ —	$ —	$ —	$ 97
Noncontrolling interests subject to put provisions	552	222	100	99	973
Non-owned and minority owned put provisions	28	—	30	—	58
Operating capital advances	—	—	—	1	1
	$ 677	$ 222	$ 130	$ 100	$ 1,129

(1) Based upon current LIBOR-based interest rates in effect at December 31, 2016 plus an interest rate margin of 2.75% for Term Loan B.
(2) Based upon current LIBOR-based interest rates in effect at December 31, 2016 plus an interest rate margin of 1.75% for Term Loan A.

We are committed to purchase a certain amount of our hemodialysis non-equipment product supplies, such as dialyzers, from Baxter at fixed prices through 2018. Our total expenditures for the year ended December 31, 2016 on such products were approximately 2% of our total U.S. dialysis and related lab services operating expenses.

In 2010, we entered into and subsequently extended an agreement with FMC to purchase a certain amount of dialysis equipment, parts and supplies from FMC through December 31, 2017. Our total expenditures for the year ended December 31, 2016 on such products were approximately 2% of our total U.S. dialysis and related lab services operating expenses. The actual amount of purchases in future years from FMC will depend upon a number of factors, including the operating requirements of our centers, the number of centers we acquire, and growth of our existing centers.

In 2014, we entered in to an agreement with Baxter Healthcare Corporation (Baxter) that commits us to purchase a certain amount of hemodialysis non-equipment product supplies, such as dialyzers, at fixed prices through 2018. Our total expenditures for the year ended December 31, 2016 on such products were approximately 2% of our total U.S. dialysis and related lab service operating expenses.

In January 2017, we entered into a six year Sourcing and Supply Agreement with Amgen that expires on December 31, 2022, replacing our prior agreement that was to expire in 2018. Under the terms of the agreement we will purchase EPO in amounts necessary to meet no less than 90% of our requirements for ESAs from Amgen. The actual amount of EPO that we will purchase will depend upon the amount of EPO administered during dialysis as prescribed by physicians and the overall number of patients that we serve.

Settlements of approximately $28 million of existing income tax liabilities for unrecognized tax benefits, including interest, penalties and other long-term tax liabilities, are excluded from the above table as reasonably reliable estimates of their timing cannot be made.

Supplemental information concerning certain Physician Groups and unrestricted subsidiaries

The following information is presented as supplemental data as required by the indentures governing our senior notes.

We provide services to certain physician groups that, while consolidated in our financial statements for financial reporting purposes, are not subsidiaries of or owned by us, do not constitute “Subsidiaries” as defined in the indentures governing our outstanding senior notes, and do not guarantee those senior notes. In addition, we have entered into management agreements with these physician groups pursuant to which we receive management fees from the physician groups.

As of December 31, 2016, if these physician groups were not consolidated in our financial statements, our consolidated indebtedness would have been approximately $9.192 billion, our consolidated other liabilities (excluding indebtedness) would have been approximately $3.459 billion and our consolidated assets would have been approximately $18.313 billion. If these physician groups were not consolidated in our financial statements for the year ended December 31, 2016, our consolidated total net revenues (including approximately $737 million of management fees payable to us), consolidated operating income and consolidated net income would be reduced by approximately $1.350 billion, $53 million, and $32 million, respectively.

In addition, we own a 67% equity interest in California Medical Group Insurance (CMGI), which is an Unrestricted Subsidiary as defined in the indentures governing our outstanding senior notes, and does not guarantee those senior notes. Our equity interest in CMGI is accounted for under the equity method of accounting, meaning that, although CMGI is not consolidated in our financial statements for financial reporting purposes, our consolidated income statement reflects our pro rata share of CMGI's net income as equity investment income.

For the year ended December 31, 2016, excluding our equity investment income attributable to CMGI, our consolidated operating income and consolidated net income would be increased by approximately $0.1 million and $0.1 million, respectively. See Note 28 to the consolidated financial statements for further details.

Contingencies

The information in Note 17 to the consolidated financial statements of this report is incorporated by reference in response to this item.

Critical accounting policies, estimates and judgments

Our consolidated financial statements and accompanying notes are prepared in accordance with United States generally accepted accounting principles. These accounting principles require us to make estimates, judgments and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities, contingencies and temporary equity. All significant estimates, judgments and assumptions are developed based on the best information available to us at the time made and are regularly reviewed and updated when necessary. Actual results will generally differ from these estimates. Changes in estimates are reflected in our financial statements in the period of change based upon on-going actual experience trends, or subsequent settlements and realizations depending on the nature and predictability of the estimates and contingencies. Interim changes in estimates are applied prospectively within annual periods. Certain accounting estimates, including those concerning revenue recognition and accounts receivable, impairments of goodwill or other long-lived assets, accounting for income taxes, quarterly and annual variable compensation accruals, consolidation of variable interest entities, purchase accounting valuation estimates, fair value estimates, stock-based compensation and medical liability claims are considered to be critical to evaluating and understanding our financial results because they involve inherently uncertain matters and their application requires the most difficult and complex judgments and estimates.

Dialysis and related lab services revenue recognition and accounts receivable. There are significant estimating risks associated with the amount of dialysis and related lab services revenue that we recognize in a given reporting period. Payment rates are often subject to significant uncertainties related to wide variations in the coverage terms of the commercial healthcare plans under which we receive payments. In addition, ongoing insurance coverage changes, geographic coverage differences, differing interpretations of contract coverage, and other payor issues complicate the billing and collection process. Net revenue recognition and allowances for uncollectible billings require the use of estimates of the amounts that will ultimately be realized considering, among other items, retroactive adjustments that may be associated with regulatory reviews, audits, billing reviews and other matters.

Revenues associated with Medicare and Medicaid programs are recognized based on (a) the payment rates that are established by statute or regulation for the portion of the payment rates paid by the government payor (e.g., 80% for Medicare patients) and (b) for the portion not paid by the primary government payor, the estimated amounts that will ultimately be collectible from other government programs paying secondary coverage (e.g., Medicaid secondary coverage), the patient's commercial health plan secondary coverage, or the patient. Our dialysis related reimbursements from Medicare are subject to certain variations under Medicare's new single bundled payment rate system whereby our reimbursements can be adjusted for certain patient characteristics and certain other factors. Our revenue recognition depends upon our ability to effectively capture, document and bill for Medicare's base payment rate and these other factors. In addition, as a result of the potential range of variations that can occur in our dialysis-related reimbursements from Medicare under the new single bundled payment rate system, our revenue recognition is now subject to a greater degree of estimating risk.

Commercial healthcare plans, including contracted managed-care payors, are billed at our usual and customary rates; however, revenue is recognized based on estimated net realizable revenue for the services provided. Net realizable revenue is estimated based on contractual terms for the patients covered under commercial healthcare plans with which we have formal agreements, non-contracted commercial healthcare plan coverage terms if known, estimated secondary collections, historical collection experience,

historical trends of refunds and payor payment adjustments (retractions), inefficiencies in our billing and collection processes that can result in denied claims for payments, a slowdown in collections, a reduction in the amounts that we expect to collect and regulatory compliance issues. Determining applicable primary and secondary coverage for our approximately 187,700 U.S. patients at any point in time, together with the changes in patient coverage's that occur each month, requires complex, resource-intensive processes. Collections, refunds and payor retractions typically continue to occur for up to three years or longer after services are provided.

We generally expect our range of dialysis and related lab services revenues estimating risk to be within 1% of its revenue, which can represent as much as 5% of dialysis and related lab services' adjusted operating income. Changes in estimates are reflected in the then-current financial statements based on on-going actual experience trends, or subsequent settlements and realizations depending on the nature and predictability of the estimates and contingencies. Changes in revenue estimates for prior periods are separately disclosed and reported if material to the current reporting period and longer term trend analyses, and have not been significant.

Lab service revenues for current period dates of services are recognized at the estimated net realizable amounts to be received.

DMG revenue recognition. DMG revenues consist primarily of fees for medical services provided under capitated contracts with various health plans and under risk-sharing programs. Revenues with respect to both professional and institutional capitation are recognized in the month in which enrollees are entitled to receive healthcare and are based on the number of enrollees selecting a DMG associated group physician employed or affiliated with one of DMG's medical group entities as their primary healthcare provider. Capitation payments received for enrollees under Medicare Advantage plans are subject to retroactive adjustment depending upon certain clinical and demographic factors. We estimate the amount of current year adjustments in revenues during the first and second quarters of any given year and adjust our estimates during the third quarter upon receipt of payments from CMS related to prior year. Any difference between actual contract settlements and estimated revenues are recorded in the year of final settlement.

In addition, as compensation under DMG's various managed care-related agreements with hospitals, we are entitled to receive a percentage of the amount by which the institutional capitation revenue received from health plans exceeds institutional expenses, and any such risk-share amount to which we are entitled is recorded as DMG revenues. In addition, pursuant to such managed care-related agreements, DMG agrees to be responsible should the third party incur a deficit as a result of institutional expenses being in excess of institutional capitation revenue. As with global capitation, revenue with respect to professional capitation is reported in the month in which enrollees are entitled to receive healthcare. However, risk-share revenues (that is, the portion of the excess of institutional capitation revenue to which DMG is entitled less institutional expenses), in contrast, are based on the number of enrollees and significant estimating risk relating to institutional utilization and associated costs incurred by assigned health plan enrollees. The medical groups also receive other incentive payments from health plans based on specified performance and quality criteria and the amounts accrued when earned can be reasonably estimated. Differences between actual contract settlements and estimated receivables and payables are recorded in the year of final settlement. In 2013, DMG obtained a restricted Knox-Keene license in California, which now permits DMG to enter into contracts with health plans allowing it to recognize revenue under global capitation arrangements for both professional and institutional services.

Impairments of long-lived assets. We account for impairments of long-lived assets, which include property and equipment, equity investments in non-consolidated businesses, amortizable intangible assets, indefinite-lived intangible assets and goodwill, in accordance with the provisions of applicable accounting guidance. Goodwill is not amortized, but is assessed for valuation impairment as circumstances warrant and at least annually. An impairment charge would be recorded to the extent that the carrying amount of a reporting unit's goodwill exceeds its implied fair value. Impairment reviews on other long-lived assets are also performed at least annually and whenever a change in condition occurs which indicates that the carrying amounts of assets may not be recoverable.

Such changes include changes in our business strategies and plans, changes in the quality or structure of our relationships with our partners, changes in reimbursement rates, or deteriorating operating performance of individual dialysis centers or other operations. We use a variety of factors to assess the realizable value of assets depending on their nature and use. Such assessments are primarily based upon the sum of expected future undiscounted net cash flows over the expected period the asset will be utilized, as well as market values and conditions. The computation of expected future undiscounted net cash flows can be complex and involves a number of subjective assumptions. Any changes in these factors or assumptions could impact the assessed value of an asset and result in an impairment charge equal to the amount by which its carrying value exceeds its actual or estimated fair value.

Accounting for income taxes. Our income tax expense, deferred tax assets and liabilities, and liabilities for unrecognized tax benefits reflect management's best assessment of estimated current and future taxes to be paid. We are subject to income taxes in the United States and numerous state and foreign jurisdictions. Significant judgments and estimates are required in determining the consolidated income tax expense. Deferred income taxes arise from temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements, which will result in taxable or deductible amounts in the future. In evaluating our ability to recover our deferred tax assets within the jurisdiction from which they arise, we consider all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax-planning strategies, and results of recent operations, assumptions about the amount of future state, federal, and foreign pre-tax operating income

adjusted for items that do not have tax consequences. The assumptions about future taxable income require significant judgment and are consistent with the plans and estimates we are using to manage the underlying businesses. To the extent that recovery is not likely, a valuation allowance is established. The allowance is regularly reviewed and updated for changes in circumstances that would cause a change in judgment about the realizability of the related deferred tax assets.

Variable compensation accruals. We estimate variable compensation accruals quarterly based upon the amounts expected to be earned and paid out resulting from the achievement of certain teammate-specific and/or corporate financial and operating goals. Our estimates, which include compensation incentives for bonuses and other awards, including long-term incentive programs, are updated periodically based on changes in our economic condition or cash flows that could ultimately impact the actual final payment amount. Actual results reflected in each fiscal quarter may vary due to the subjectivity involved in anticipating fulfillment of specific and/or corporate goals, as well as the final determination and approval of amounts by our Board of Directors, as applicable.

Consolidation of variable interest entities. We rely on the operating activities of certain entities that we do not directly own or control, but over which we have indirect influence and of which we are considered the primary beneficiary. Under accounting guidance applicable to variable interest entities, we have determined that these entities are to be included in our consolidated financial statements. The analyses upon which these determinations rest are complex, involve uncertainties, and require significant judgment on various matters, some of which could be subject to reasonable disagreement. While these determinations have a meaningful effect on the description and classification of various amounts in our consolidated financial statements, non-consolidation of these entities would not have had a material effect on our results of operations.

Purchase accounting valuation estimates. We make various assumptions and estimates regarding the valuation of tangible and intangible assets, liabilities, contingent earn-out consideration, noncontrolling interests and contractual as well as non-contractual contingencies associated with our acquisitions. These assumptions can have a material effect on our balance sheet valuations and the related amount of depreciation and amortization expense and any contingent earn-out adjustments that will be recognized in the future.

Fair value estimates. We have recorded certain assets, liabilities and noncontrolling interests (temporary equity) subject to put provisions at fair value. The FASB defines fair value which is measured based upon certain valuation techniques that include inputs and assumptions that market participants would use in pricing assets, liabilities and noncontrolling interests subject to put provisions. We have measured the fair values of our applicable assets, liabilities and noncontrolling interests subject to put provisions based upon certain market inputs and assumptions that are either observable or unobservable in determining fair values and have also classified these assets, liabilities and noncontrolling interests subject to put provisions into the appropriate fair value hierarchy levels. The fair value of our investments available for sale are based upon quoted market prices from active markets and the fair value of our swap and cap agreements were based upon valuation models utilizing the income approach and commonly accepted valuation techniques that use inputs from closing prices for similar assets and liabilities in active markets as well as other relevant observable market inputs at quoted intervals such as current interest rates, forward yield curves, implied volatility and credit default swap pricing. The fair value of funds on deposit with third parties are based primarily on quoted close or bid market prices of the same or similar assets. The fair value of our contingent earn-out considerations were primarily based upon unobservable inputs including projected EBITDA, the estimated probabilities of achieving other performance targets and the estimated probability of the earn-out payments being made by using option pricing techniques and simulation models of expected EBITDA and operating income and other performance targets. For our noncontrolling interests subject to put provisions we have estimated the fair values based upon either the higher of a liquidation value of net assets or an average multiple of earnings based on historical earnings, patient mix and other performance indicators that can affect future results, as well as other factors. The estimate of the fair values of the noncontrolling interests subject to put provisions involves significant judgments and assumptions and may not be indicative of the actual values at which the noncontrolling interests may ultimately be settled, which could vary significantly from our current estimates. The estimated fair values of the noncontrolling interests subject to put provisions can also fluctuate and the implicit multiple of earnings at which these noncontrolling interests obligations may be settled will vary depending upon market conditions including potential purchasers' access to the capital markets, which can impact the level of competition for dialysis and non-dialysis related businesses, the economic performance of these businesses and the restricted marketability of the third-party owners' equity interests.

Stock-based compensation. Stock-based compensation awards are measured at their estimated fair values on the date of grant if settled in shares or at their estimated fair values at the end of each reporting period if settled in cash. The value of stock-based awards so measured is recognized as compensation expense on a cumulative straight-line basis over the vesting terms of the awards, adjusted for expected forfeitures. We estimate the fair value of stock awards using complex option pricing models that rely heavily on estimates from us about uncertain future events, including the expected term of the awards, the expected future volatility of our stock price, and expected future risk-free interest rates.

Medical liability claims associated with DMG. The medical groups are responsible for the medical services that associated physicians and contracted hospitals provide to assigned HMO enrollees. We provide medical services to health plan enrollees through a network of contracted providers under sub-capitation and FFS arrangements, company-operated clinics and staff physicians. Medical costs for professional and institutional services rendered by contracted providers are recorded as medical expenses and hospital

expenses, respectively, in the consolidated statements of income. Costs for operating medical clinics, including the salaries of medical and non-medical personnel and support costs, are recorded in clinic support and other operating costs.

An estimate of amounts due to contracted physicians, hospitals, and other professional providers is included in medical payables in the accompanying consolidated balance sheets. Medical claims payable include claims reported as of the balance sheet date and incurred but not reported (IBNR) estimates. Such estimates are developed using actuarial methods and are based on many variables, including the utilization of healthcare services, historical payment patterns, cost trends, product mix, seasonality, changes in membership, and other factors. The estimation methods and the resulting reserves are continually reviewed and updated. Many of the medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. We engage a third-party actuary to assist in the evaluation of the estimated IBNR reserves. Such differing interpretations may not come to light until a substantial period of time has passed following the contract implementation. Any adjustments to reserves are reflected in current operations.

Significant new accounting standards

See Note 1 to the consolidated financial statements included in this report for information regarding certain recent accounting standards that have been issued by the FASB.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

Interest rate sensitivity

The tables below provide information about our financial instruments that are sensitive to changes in interest rates. The table below presents principal repayments and current weighted average interest rates on our debt obligations as of December 31, 2016. The variable rates presented reflect the weighted average LIBOR rates in effect for all debt tranches plus interest rate margins in effect as of December 31, 2016. The Term Loan A margin in effect at December 31, 2016 is 1.75%, and along with the revolving line of credit, is subject to adjustment depending upon changes in certain of our financial ratios, including a leverage ratio. Term Loan B currently bears interest at LIBOR plus an interest rate margin of 2.75%.

	Expected maturity date					Thereafter	Total	Average interest rate	Fair value
	2017	2018	2019	2020	2021				
	(dollars in millions)								
Long term debt:									
Fixed rate	$ 37	$ 25	$ 28	$ 26	$ 21	$ 4,735	$ 4,872	5.27%	$ 4,902
Variable rate	$ 128	$ 143	$ 720	$ 44	$ 3,279	$ 7	$ 4,321	3.68%	$ 4,383

	Notional amount	Contract maturity date					Pay fixed	Receive variable	Fair value
		2017	2018	2019	2020	2021			
	(dollars in millions)								
Cap agreements	$ 7,000	$ —	$ 3,500	$ —	$ 3,500	$ —		LIBOR above 3.5%	$ 9.9

Our senior secured credit facilities, which include Term Loan A and Term Loan B, consist of various individual tranches of debt that can range in maturity from one month to twelve months (currently, all tranches are one month in duration). For Term Loan A and Term Loan B, each tranche bears interest at a LIBOR rate that is determined by the duration of such tranche plus an interest rate margin. The LIBOR variable component of the interest rate for each tranche is reset as such tranche matures and a new tranche is established. LIBOR can fluctuate significantly depending upon conditions in the credit and capital markets.

As of December 31, 2016, our Term Loan A bears interest at LIBOR plus an interest rate margin of 1.75% and our Term Loan B debt bears interest at LIBOR plus an interest rate margin of 2.75%. LIBOR was greater than the 0.75% embedded LIBOR floor on Term Loan B, resulting in Term Loan B being subject to LIBOR-based interest rate volatility on the LIBOR variable component of our interest rate as of December 31, 2016. The LIBOR based interest component is limited to a maximum LIBOR rate of 3.50% on the outstanding principal debt on Term Loan B and $87.5 million on Term Loan A as a result of the interest rate cap agreements, as described below.

As of December 31, 2016, we maintain several interest rate cap agreements that were entered into in November 2014 with notional amounts totaling $3.5 billion. These previously forward cap agreements became effective September 30, 2016 and have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 3.50% on an equivalent amount of our debt. These cap agreements expire on June 30, 2018. As of December 31, 2016, the total fair value of these cap agreements was an

asset of approximately $0.1 million. During the year ended December 31, 2016, we recognized debt expense of $2.0 million from these caps. During the year ended December 31, 2016, we recorded a loss of $1.2 million in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

As of December 31, 2016, we maintain several forward interest rate cap agreements that were entered into in October 2015 with notional amounts totaling $3.5 billion. These forward cap agreements will become effective June 29, 2018 and will have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 3.50% on an equivalent amount of our debt. These cap agreements expire on June 30, 2020. As of December 31, 2016, the total fair value of these cap agreements was an asset of approximately $9.8 million. During the year ended December 31, 2016, we recorded a loss of $4.0 million in other comprehensive income due to a decrease in the unrealized fair value of these forward cap agreements.

Previously, we maintained several interest rate cap agreements with notional amounts totaling $2.7 billion on our Term Loan B debt. These agreements had the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 2.50% on an equivalent amount of our Term Loan B. These interest rate cap agreements expired September 30, 2016. During the year ended December 31, 2016, we recognized debt expense of $1.8 million from these caps.

We also previously maintained several interest rate swap agreements. These agreements had the economic effect of modifying the LIBOR variable component of our interest rate on an equivalent amount of our Term Loan A to fixed rates ranging from 0.49% to 0.52%. These interest rate swap agreements required monthly interest payments and expired September 30, 2016. During the year ended December 31, 2016, we recognized debt expense of $0.3 million from these swaps and recorded a loss of $0.8 million in other comprehensive income due to a decrease in the unrealized fair value of these swap agreements.

Our overall weighted average effective interest rate on the senior secured credit facilities was 3.68%, based on the current margins in effect of 1.75% for Term Loan A and 2.75% for Term Loan B, as of December 31, 2016.

As of December 31, 2016, our Term Loan B debt bears interest at LIBOR plus an interest rate margin of 2.75%. Term Loan B is also subject to interest rate caps if LIBOR should rise above 3.50%. Term Loan A bears interest at LIBOR plus an interest rate margin of 1.75%. The capped portion of Term Loan A is $87.5 million. In addition, the uncapped portion of Term Loan A, which is subject to the variability of LIBOR, is $775 million. Interest rates on our senior notes are fixed by their terms.

Our overall weighted average effective interest rate during the year ended December 31, 2016 was 4.43% and as of December 31, 2016 was 4.52%.

As of December 31, 2016, we had undrawn revolving credit facilities totaling $1.0 billion of which approximately $95.2 million was committed for outstanding letters of credit. The remaining amount is unencumbered. In addition, DMG has an outstanding letter of credit of approximately $1.3 million which is secured by a certificate of deposit.

We believe that we will generate significant operating cash flows and will have sufficient liquidity to fund our scheduled debt service and other obligations and working capital needs for the foreseeable future, including the next 12 months, under the terms of our debt agreements. Our primary sources of liquidity are cash from operations and cash from borrowings.

One mean of assessing exposure to debt-related interest rate changes is a duration-based analysis that measures the potential loss in net income resulting from a hypothetical increase in interest rates of 100 basis points across all variable rate maturities (referred to as a parallel shift in the yield curve). Under this model, with all else constant, it is estimated that such an increase would have reduced net income by approximately $11.6 million, $9.3 million, and $5.7 million, net of tax, for the years ended December 31, 2016, 2015, and 2014, respectively.

Exchange rate sensitivity

While our business is predominantly conducted in the U.S. we have developing operations in 11 other countries as well. For financial reporting purposes, the U.S. dollar is our reporting currency. However, the functional currencies of our operating businesses in other countries are typically those of the countries in which they operate. Therefore, changes in the rate of exchange between the U.S. dollar and the local currencies in which our international operations are conducted affect our results of operations and financial position as reported in our consolidated financial statements.

We have consolidated the balance sheets of our non-U.S. dollar denominated operations into U.S. dollars at the exchange rates prevailing at the balance sheet date and have translated their revenues and expense at the average exchange rates for the period. Additionally, our individual subsidiaries are exposed to transactional risks mainly resulting from intercompany transactions between and among subsidiaries with different functional currencies. This exposes the subsidiaries to fluctuations in the rate of exchange between the invoicing or obligation currencies and the currency in which their local operations are conducted.

We evaluate our exposure to foreign exchange risk through the judgment of our regional and corporate management teams. Through 2016, our international operations remained small relative to the size of our consolidated financial statements, constituting less than 4% of our consolidated assets as of December 31, 2016 and approximately 1% of our consolidated net revenues for the year ended December 31, 2016. In addition, our foreign currency translation losses have remained less than approximately 2% of our consolidated operating income for the year ended December 31, 2016.

Given the still small size of our international operations, management does not consider our exposure to foreign exchange risk to be significant to the consolidated enterprise. As such, through December 31, 2016 we have not engaged in transactions to hedge the exposure of our international transactions or net investments to foreign currency risk. However, we may do so in the future.

Item 8. Financial Statements and Supplementary Data.

See the Index to Financial Statements and Index to Financial Statement Schedules included at "Item 15. Exhibits, Financial Statement Schedules."

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Management has established and maintains disclosure controls and procedures designed to ensure that information required to be disclosed in the reports that it files or submits pursuant to the Securities Exchange Act of 1934 (Exchange Act) as amended is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management including our Chief Executive Officer and Chief Financial Officer as appropriate to allow for timely decisions regarding required disclosures.

At the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures in accordance with the Exchange Act requirements. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective for timely identification and review of material information required to be included in our Exchange Act reports, including this report on Form 10-K. Management recognizes that these controls and procedures can provide only reasonable assurance of desired outcomes, and that estimates and judgments are still inherent in the process of maintaining effective controls and procedures.

There has not been any change in our internal control over financial reporting that was identified during the evaluation that occurred during the fourth fiscal quarter and that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

We intend to disclose any amendments or waivers to the Code of Ethics applicable to our principal executive officer, principal financial officer, principal accounting officer or controller or persons performing similar functions, on our website. In 2002, we adopted a Corporate Governance Code of Ethics that applies to our principal executive officer, principal financial officer, principal accounting officer or controller, and to all of our financial accounting and legal professionals who are directly or indirectly involved in the preparation, reporting and fair presentation of our financial statements and Exchange Act reports. The Code of Ethics is posted on our website, located at http://www.davita.com. We also maintain a Corporate Code of Conduct that applies to all of our employees, which is posted on our website.

Under our Corporate Governance Guidelines all Board Committees including the Audit Committee, Nominating and Governance Committee and the Compensation Committee, which are comprised solely of independent directors as defined within the listing standards of the New York Stock Exchange, have written charters that outline the committee's purpose, goals, membership requirements and responsibilities. These charters are regularly reviewed and updated as necessary by our Board of Directors. All Board Committee charters as well as the Corporate Governance Guidelines are posted on our website located at http://www.davita.com.

The other information required to be disclosed by this item will appear in, and is incorporated by reference from, the sections entitled "Proposal No. 1. Election of Directors", "Corporate Governance", and "Security Ownership of Certain Beneficial Owners and Management" included in our definitive proxy statement relating to our 2017 annual stockholder meeting.

Item 11. Executive Compensation.

The information required by this item will appear in, and is incorporated by reference from, the sections entitled "Executive Compensation" and "Compensation Committee Interlocks and Insider Participations" included in our definitive proxy statement relating to our 2017 annual stockholder meeting. The information required by Item 407(e)(5) of Regulation S-K will appear in and is incorporated by reference from the section entitled "Compensation Committee Report" included in our definitive proxy statement relating to our 2017 annual stockholder meeting; however, this information shall not be deemed to be filed.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The following table provides information about our common stock that may be issued upon the exercise of stock-settled stock appreciation rights, restricted stock units and other rights under all of our existing equity compensation plans as of December 31, 2016, which consist of our 2011 Incentive Award Plan and our Employee Stock Purchase Plan. The material terms of these plans are described in Note 19 to the consolidated financial statements.

Plan category	Number of shares to be issued upon exercise of outstanding options, warrants and rights	Weighted average exercise price of outstanding options, warrants and rights	Number of shares remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))	Total of shares reflected in columns (a) and (c)
	(a)	*(b)*	*(c)*	*(d)*
Equity compensation plans approved by shareholders	8,122,819	$ 58.62	37,789,231	45,912,050
Equity compensation plans not requiring shareholder approval	—	—	—	—
Total	8,122,819	$ 58.62	37,789,231	45,912,050

Other information required to be disclosed by Item 12 will appear in, and is incorporated by reference from, the section entitled "Security Ownership of Certain Beneficial Owners and Management" included in our definitive proxy statement relating to our 2017 annual stockholder meeting.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

The information required by this item will appear in, and is incorporated by reference from, the section entitled "Certain Relationships and Related Transactions" and the section entitled "Corporate Governance" included in our definitive proxy statement relating to our 2017 annual stockholder meeting.

Item 14. Principal Accounting Fees and Services.

The information required by this item will appear in, and is incorporated by reference from, the section entitled "Ratification of Appointment of Independent Registered Public Accounting Firm" included in our definitive proxy statement relating to our 2017 annual stockholder meeting.

PART IV

Item 15. Exhibits, Financial Statement Schedules.

(a) Documents filed as part of this Report:

(1) Index to Financial Statements:

(2) Index to Financial Statement Schedules:

(1) *Exhibits:*

2.1	Agreement and Plan of Merger, dated as of May 20, 2012, by and among DaVita Inc., Seismic Acquisition LLC, HealthCare Partners Holdings, LLC, and the Member Representative.(28)
2.2	Amendment, dated as of July 6, 2012, to the Agreement and Plan of Merger, dated as of May 20, 2012, by and among DaVita Inc., Seismic Acquisition LLC, HealthCare Partners Holdings, LLC, and the Member Representative.(29)
3.1	Restated Certificate of Incorporation of DaVita Inc., as filed with the Secretary of State of Delaware on November 1, 2016.(1)
3.2	Certificate of Ownership and Merger Merging DaVita Name Change, Inc. with and into DaVita Inc., as filed with Secretary of State of the State of Delaware on November 1, 2012.(31)
3.3	Amended and Restated Bylaws for DaVita Inc. dated as of September 7, 2016.(1)
4.1	Indenture, dated August 28, 2012, by and among DaVita Inc., the guarantors named therein and The Bank of New York Mellon Trust Company, N.A., as Trustee.(30)
4.2	Form of 5.750% Senior Notes due 2022 and related Guarantee (included in Exhibit 4.1).(30)
4.3	Indenture, dated June 13, 2014, by and among DaVita Inc., the guarantors named therein and The Bank of New York Mellon Trust Company, N.A., as Trustee. (34)
4.4	Form of 5.125% Senior Notes due 2024 and related Guarantee (included in Exhibit 4.3). (34)
4.5	Second Supplemental Indenture for the 5.750% Senior Notes due 2022, dated June 13, 2014, by and among DaVita Inc., the guarantors named therein and The Bank of New York Mellon Trust Company, N.A., as Trustee. (35)
4.6	Indenture for the 5.000% Senior Notes due 2025, dated April 17, 2015, by and among DaVita Inc., the guarantors named therein and The Bank of New York Mellon Trust Company, N.A., as Trustee. (22)
4.7	Form of 5.000% Senior Notes due 2025 and related Guarantee (included in Exhibit 4.6). (22)

10.1	Employment Agreement, dated as of October 31, 2005, effective October 24, 2005, by and between DaVita Inc. and Dennis Kogod.(6)*
10.2	Amendment to Mr. Kogod's Employment Agreement, effective December 12, 2008.(18)*
10.3	Second Amendment to Mr. Kogod's Employment Agreement, effective December 31, 2012.(18)*
10.4	Employment Agreement, effective September 22, 2005, by and between DaVita Inc. and James Hilger.(8)*
10.5	Separation Agreement, effective November 30, 2016, by and between DaVita Inc. and Mr. Kogod.✓*
10.6	Consulting Agreement, effective December 1, 2016, by and between DaVita Inc. and Mr. Kogod.✓*
10.7	Amendment to Mr. Hilger's Employment Agreement, effective December 12, 2008.(18)*
10.8	Second Amendment to Mr. Hilger's Employment Agreement, effective December 27, 2012.(33)*
10.9	Employment Agreement, effective July 25, 2008, between DaVita Inc. and Kent J. Thiry.(15)*
10.10	Employment Agreement, effective August 1, 2008, between DaVita Inc. and Allen Nissenson.(16)*
10.11	Employment Agreement, effective March 17, 2010, by and between DaVita Inc. and Javier Rodriguez.(20)*
10.12	Employment Agreement, effective November 1, 2016, by and between DaVita Inc. and Charles G. Berg.✓*
10.13	Employment Agreement, effective February 21, 2017, by and between DaVita Inc. and Joel Ackerman.✓*

DAVITA INC.
MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining an adequate system of internal control over financial reporting designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles and which includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

During the last fiscal year, the Company conducted an evaluation, under the oversight of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's internal control over financial reporting. This evaluation was completed based on the criteria established in the report titled "Internal Control—Integrated Framework (2013)" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Based upon our evaluation under the COSO framework, we have concluded that the Company's internal control over financial reporting was effective as of December 31, 2016.

The Company's independent registered public accounting firm, KPMG LLP, has issued an attestation report on the Company's internal control over financial reporting, which report is included in this Annual Report.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders
DaVita Inc.:

We have audited the accompanying consolidated balance sheets of DaVita Inc. and subsidiaries as of December 31, 2016 and 2015, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the years in the three-year period ended December 31, 2016. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of DaVita Inc. and subsidiaries as of December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2016, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), DaVita Inc.'s internal control over financial reporting as of December 31, 2016, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 24, 2017 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

February 24, 2017

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders
DaVita Inc.:

We have audited DaVita Inc.'s internal control over financial reporting as of December 31, 2016, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). DaVita Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, DaVita Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of DaVita Inc. and subsidiaries as of December 31, 2016 and 2015, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the years in the three-year period ended December 31, 2016, and our report dated February 24, 2017 expressed an unqualified opinion on those consolidated financial statements.

1. Organization and summary of significant accounting policies

Organization

DaVita Inc. operates two major divisions, DaVita Kidney Care (Kidney Care) and DaVita Medical Group (DMG, formerly known as HealthCare Partners or HCP). Kidney Care is comprised of the Company's U.S. dialysis and related lab services, its ancillary services and strategic initiatives, including its international operations, and its corporate administrative support. The Company's largest line of business is its U.S. dialysis and related lab services business, which operates kidney dialysis centers in the U.S. for patients suffering from chronic kidney failure also known as end stage renal disease (ESRD). As of December 31, 2016, the Company operated or provided administrative services through a network of 2,350 U.S. outpatient dialysis centers in 46 states and the District of Columbia, serving approximately 187,700 patients. The Company's DMG division is a patient- and physician-focused integrated healthcare delivery and management company that provides medical services to members primarily through capitation contracts with some of the nation's leading health plans.

In addition, as of December 31, 2016, the Company operated or provided administrative services to 154 outpatient dialysis centers serving approximately 15,100 patients located in 11 countries outside of the U.S.

The Company's U.S. dialysis and related lab services business and DMG qualify as separately reportable segments and the Company's other ancillary services and strategic initiatives, including its international operations, have been combined and disclosed in the other segments category.

Basis of presentation

These consolidated financial statements are prepared in accordance with United States generally accepted accounting principles (U.S. GAAP). The financial statements include DaVita Inc. and its subsidiaries, partnerships and other entities in which it maintains a majority voting interest or other controlling financial interest (collectively, the Company). All significant intercompany transactions and balances have been eliminated. Non-marketable equity investments are recorded under the equity or cost method of accounting based upon whether the Company has significant influence over the investee. For the Company's international subsidiaries, local currencies are considered their functional currencies. Translation adjustments result from translating the Company's international subsidiaries' financial statements from their functional currencies into the Company's reporting currency (USD). Prior year balances and amounts have been reclassified to conform to the current year presentation.

The Company has evaluated subsequent events through the date these consolidated financial statements were issued and has included all necessary adjustments and disclosures.

Use of estimates

The preparation of financial statements in conformity with U.S. GAAP requires the use of estimates and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities, contingencies and noncontrolling interests subject to put provisions. Although actual results in subsequent periods will differ from these estimates, such estimates are developed based on the best information available to management and management's best judgments at the time. All significant assumptions and estimates underlying the amounts reported in the financial statements and accompanying notes are regularly reviewed and updated when necessary. Changes in estimates are reflected in the financial statements based upon on-going actual experience trends, or subsequent settlements and realizations depending on the nature and predictability of the estimates and contingencies. Interim changes in estimates related to annual operating costs are applied prospectively within annual periods.

The most significant assumptions and estimates underlying these financial statements and accompanying notes involve revenue recognition and accounts receivable, contingencies, impairments of long-lived assets and goodwill, valuation adjustments, accounting for income taxes, quarterly, annual and long-term variable compensation accruals, consolidation of variable interest entities, purchase accounting valuation estimates, other fair value estimates, stock-based compensation and medical liability claims. Specific estimating risks and contingencies are further addressed within these notes to the consolidated financial statements.

Patient service net revenues and accounts receivable

U.S. dialysis and related lab services

Patient service net revenues are recognized in the period services are provided. Revenues consist primarily of payments from Medicare, Medicaid and commercial health plans for dialysis and ancillary services provided to patients. A usual and customary fee schedule is maintained for the Company's dialysis treatments and other patient services; however, actual collectible revenue is normally recognized at a discount from the fee schedule.

Revenues associated with Medicare and Medicaid programs are recognized based on: (a) the payment rates that are established by statute or regulation for the portion of payment rates paid by the government payor (e.g., 80% for Medicare patients) and (b) for the portion not paid by the primary government payor, estimates of the amounts ultimately collectible from other government programs paying secondary coverage (e.g., Medicaid secondary coverage), the patient's commercial health plan secondary coverage, or the patient. The Company's reimbursements from Medicare are subject to certain variations under Medicare's single bundled payment rate system, whereby reimbursements can be adjusted for certain patient characteristics and other factors. The Company's revenue recognition will depend upon its ability to effectively capture, document and bill for Medicare's base payment rate as well as these other variable factors.

Revenues associated with commercial health plans are estimated based on contractual terms for the patients under healthcare plans with which the Company has formal agreements, non-contracted health plan coverage terms if known, estimated secondary collections, historical collection experience, historical trends of refunds and payor payment adjustments (retractions), inefficiencies in the Company's billing and collection processes that can result in denied claims for payments, and regulatory compliance matters.

Commercial revenue recognition also involves significant estimating risks. With many larger, commercial insurers the Company has several different contracts and payment arrangements, and these contracts often include only a subset of the Company's centers. It is often not possible to determine which contract, if any, should be applied prior to billing. In addition, for services provided by non-contracted centers, final collection may require specific negotiation of a payment amount, typically at a significant discount from the Company's usual and customary rates.

Under Medicare's bundled payment rate system, services covered by Medicare are subject to estimating risk, whereby reimbursements from Medicare can vary significantly depending upon certain patient characteristics and other variable factors. Even with the bundled payment rate system, Medicare payments for bad debt claims as established by cost reports require evidence of collection efforts. As a result, billing and collection of Medicare bad debt claims can be delayed significantly and final payment is subject to audit.

Medicaid payments, when Medicaid coverage is secondary, can also be difficult to estimate. For many states, Medicaid payment terms and methods differ from Medicare, and may prevent accurate estimation of individual payment amounts prior to billing.

The Company's range of revenue estimating risk for the dialysis and related lab services segment is generally expected to be within 1% of its revenue. Changes in revenue estimates for prior periods are not material.

Other patient service revenues

Patient service revenues earned by DMG are recognized in the period services are provided, net of an estimated contractual allowance and are mainly attributable to primary care physician services and certain other specialty care services provided to patients.

Capitated revenue

DMG capitated revenue

The Company's associated medical groups are licensed to contract with health maintenance organizations (HMOs), to provide physician services in California under capitation contracts, and to provide both hospital and physician services under global risk capitation contracts in Florida and Nevada. DMG's revenues consist primarily of fees for medical services provided by these medical group entities' payments from capitated contracts with various HMOs and revenues under risk-sharing programs. Capitation revenue under HMO contracts is prepaid monthly based on the number of enrollees electing physicians affiliated with one of the medical group entities as their healthcare provider, regardless of the level of actual medical services utilized. Capitation revenue is reported as revenue in the month in which enrollees are entitled to receive healthcare. A portion of the capitation revenue pertaining to Medicare enrollees is subject to possible retroactive premium risk adjustments based on their individual acuity. Due to lack of sufficient data to

project the amount of such retroactive adjustments, the Company records any corresponding retroactive revenues in the year of receipt.

Depending on the applicable state regulation regarding global risk capitation, revenues may be received by the Company or by an independent hospital with which the Company contracts under various managed care-related administrative services agreements. In the Florida and Nevada service markets, the global capitation revenue is recorded by the Company with the corresponding cost of medical care reported by the Company as patient care costs. In California, the Company receives professional capitation and either the health plan retains the capitated revenues in a shared risk pool or the independent hospitals receive the institutional capitation revenues. The revenues are used to pay medical claims for the related enrollees. The Company is entitled to any residual amounts and bears the risk of any deficits. In all cases, an estimate is made for the cost of medical services that have been incurred and where no medical claim has been received (IBNR). DMG enters into contracts with health plans allowing it to recognize revenue under global capitation arrangements for both professional and institutional services. DMG has converted three separate contracts to global risk in California and is in the approval and implementation process to convert more.

Under risk-sharing programs, the medical groups share in the risk for hospitalization services and earn additional incentive revenues or incur penalties based on the utilization of hospital services. Estimated shared-risk receivables from the HMOs are recorded based upon hospital utilization and associated costs incurred by assigned HMO enrollees, including an estimate of IBNR compared to budgeted funding. Differences between actual contract settlements and estimated receivables or payables are recorded in the year of final settlement. The medical groups also receive other incentive payments from health plans based on specified performance and quality criteria. These amounts are accrued when earned and the amounts can be reasonably estimated, and are included in DMG's capitated revenues.

Other capitated revenues

One of the Company's subsidiaries operates Medicare Advantage ESRD Special Needs Plans in partnerships with payors that work with CMS to provide full service healthcare to ESRD patients. The Company is at risk for all medical costs of the program in excess of the capitation payments.

Other revenues

Other revenues consist of the non-patient service revenues associated with the ancillary services and strategic initiatives, management and administrative support services that are provided to outpatient dialysis centers that the Company does not own or in which the Company owns a noncontrolling interest, retail pharmacies and medical consulting services. The Company also provides administrative and management support services to certain other non-dialysis joint ventures in which the Company owns a noncontrolling interest. Management fees are principally determined as a percentage of the managed operations' revenues or cash collections and in some cases an additional component based upon a percentage of operating income. Management fees are included in net revenues when earned and represent less than 1% of total consolidated operating revenues. Revenues related to medical consulting services are recognized in the period services are provided.

Allowance for uncollectible accounts

Net revenue recognition and allowances for uncollectible billings require the use of estimates of the amounts that will ultimately be realized considering, among other items, retroactive adjustments that may be associated with regulatory reviews, audits, billing reviews and other matters. The Company's policy is to write off any uncollectible accounts receivable balance only after all collection efforts have been exhausted or when write off is mandated by federal or state policies or required by certain payor contracts. It is also the Company's policy to write off any accounts receivable balance associated with any payors or patients when the Company receives notification of a bankruptcy filing.

Other income

Other income includes interest income on cash investments, gains (losses) on foreign currency translation adjustments and other non-operating gains from investment transactions, as well as realized foreign currency transaction gains and losses.

Cash and cash equivalents

Cash equivalents are short-term highly liquid investments with maturities of three months or less at date of purchase.

Inventories

Inventories are stated at the lower of cost (first-in, first-out) or market and consist principally of pharmaceuticals and dialysis-related supplies. Rebates related to inventory purchases are recorded when earned and are based on certain qualification requirements which are dependent on a variety of factors including future pricing levels by the manufacturer and data submission.

Funds on deposit with a third party

The Company's DMG business has established a risk sharing arrangement with a California hospital, wherein the Company shares in any surplus or deficit. One of the terms of this agreement is the establishment of a segregated investment fund to ensure adequate cash to pay IBNR. The Company and the hospital monitor the reserve balance to maintain the adequacy of funds on deposit. The Company has $75,877 in such funds as of December 31, 2016, included in other current assets on the consolidated balance sheet.

Property and equipment

Property and equipment is stated at cost less accumulated depreciation and amortization and is further reduced by any impairments. Maintenance and repairs are charged to expense as incurred. Depreciation and amortization expenses are computed using the straight-line method over the useful lives of the assets estimated as follows: buildings, 20 to 40 years; leasehold improvements, the shorter of their economic useful life or the expected lease term; and equipment and information systems, principally three to eight years. Disposition gains and losses are included in current operating expenses.

Amortizable intangibles

Amortizable intangible assets and liabilities include customer relationships, trade names, provider networks, supply agreements, practice management tools, non-competition and similar agreements, lease agreements and hospital acute services contracts, each of which have finite useful lives. Amortization expense is computed using the straight-line method over the useful lives of the assets estimated as follows: customer relationships, principally ten to twenty years; provider networks and practice management tools, two to fifteen years; trade names, principally four years; non-competition and similar agreements, two to ten years; and lease agreements and hospital acute service contracts, over the term of the lease or contract period, respectively.

Equity investments

Equity investments that do not have readily determinable fair values are carried on the cost or equity method, as applicable. The Company classifies its cost and equity method investments as "Equity investments" on its balance sheet. See Note 8 to these consolidated financial statements for further details.

Investments in debt and equity securities

The Company classifies certain debt securities as held-to-maturity and records them at amortized cost based on the Company's intentions and strategies concerning those investments. Equity securities that have readily determinable fair values, and certain other financial instruments that have readily determinable fair values or redemption values, are classified as available for sale and recorded at estimated fair value.

Goodwill

Goodwill represents the difference between the fair value of businesses acquired and the fair value of the identifiable tangible and intangible net assets acquired. Goodwill is not amortized, but is assessed at the reporting unit for impairment as circumstances warrant and at least annually. An impairment charge is recorded to the extent the carrying amount of goodwill exceeds its implied fair value. The Company operates several reporting units for goodwill impairment assessments. See Note 10 to these consolidated financial statements for further details.

Impairment of long-lived assets

Long-lived assets, including property and equipment, equity investments in non-consolidated businesses, and amortizable intangible assets are reviewed for possible impairment whenever significant events or changes in circumstances indicate that an impairment may have occurred, including changes in the Company's business strategy and plans, changes in the quality or structure of its relationships with its partners or deteriorating operating performance of individual outpatient dialysis centers or other operations. An impairment is indicated when the sum of the expected future undiscounted net cash flows identifiable to an asset group is less than

its carrying amount. Impairment losses are measured based upon the difference between the actual or estimated fair values, which are based on market values, net realizable values or projections of discounted net cash flows, as appropriate, and the carrying amount of the asset group. Impairment charges are included in operating expenses. Indefinite-lived intangible assets are reviewed for possible impairment at least annually or whenever significant events or changes in circumstances indicate that an impairment may have occurred.

Self insurance

The Company's Kidney Care division records insurance liabilities for professional and general liability and workers' compensation in excess of certain individual and or aggregate amounts not covered by third-party carriers. The Company's Kidney Care division estimates the self-insured retention portion of professional and general liability and workers' compensation risks using third-party actuarial calculations that are based upon historical claims experience and expectations for future claims. In addition, DMG has purchased external primary professional and general liability insurance from California Medical Group Insurance (CMGI) in which the Company owns an equity interest of 67%.

Medical liability costs

The medical groups are responsible for integrated care that the associated physicians and contracted hospitals provide to assigned HMO enrollees. The Company provides integrated care to health plan enrollees through a network of contracted providers under sub-capitation and direct patient service arrangements, company-operated clinics and staff physicians. Medical costs for professional and institutional services rendered by contracted providers are recorded as patient care costs in the consolidated statements of income. Costs for operating medical clinics, including the salaries of medical and non-medical personnel and support costs, are also recorded in patient care costs.

An estimate of amounts due to contracted physicians, hospitals, and other professional providers for members under global and professional risk arrangements is included in medical payables in the accompanying consolidated balance sheets. Medical payables include claims reported as of the balance sheet date and estimates of IBNR. Such estimates are developed using actuarial methods and are based on many variables, including the utilization of healthcare services, historical payment patterns, cost trends, product mix, seasonality, changes in membership, and other factors. The estimation methods and the resulting reserves are continually reviewed and updated. Many of the medical contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of various services. Such differing interpretations may not come to light until a substantial period of time has passed following the contract implementation. Any adjustments to reserves are reflected in current operations.

Income taxes

Federal and state income taxes are computed at currently enacted tax rates less tax credits using the asset and liability method. Deferred taxes are adjusted both for items that do not currently have tax consequences and for the cumulative effect of any changes in tax rates from those previously used to determine deferred tax assets or liabilities. Tax provisions include amounts that are currently payable, changes in deferred tax assets and liabilities that arise because of temporary differences between the timing of when items of income and expense are recognized for financial reporting and income tax purposes, changes in the recognition of tax positions and any changes in the valuation allowance caused by a change in judgment about the realizability of the related deferred tax assets. A valuation allowance is established when necessary to reduce deferred tax assets to amounts expected to be realized.

The Company uses a recognition threshold of more-likely-than-not and a measurement attribute on all tax positions taken or expected to be taken in a tax return in order to be recognized in the financial statements. Once the recognition threshold is met, the tax position is then measured to determine the actual amount of benefit to recognize in the financial statements.

Stock-based compensation

The Company's stock-based compensation awards are measured at their estimated fair values on the date of grant if settled in shares or at their estimated fair values at the end of each reporting period if settled in cash. The value of stock-based awards so measured is recognized as compensation expense on a cumulative straight-line basis over the vesting terms of the awards, adjusted for expected forfeitures. Stock-based compensation to be settled in shares is recorded to the Company's shareholders' equity, while stock-based compensation to be settled in cash is recorded to a liability.

Interest rate swap and cap agreements

The Company often carries a combination of interest rate caps, forward interest rate caps, or interest rate swaps on portions of its variable rate debt as a means of hedging its exposure to changes in LIBOR interest rates as part of its overall interest rate risk management strategy. These interest rate caps and swaps are not held for trading or speculative purposes and are typically designated as qualifying cash flow hedges. See Note 14 to these consolidated financial statements for further details.

Noncontrolling interests

Noncontrolling interests represent third-party equity ownership interests in entities which are consolidated by the Company for financial statement reporting purposes. As of December 31, 2016, third parties held noncontrolling equity interests in 490 consolidated legal entities.

Fair value estimates

The Company currently measures the fair value of certain assets, liabilities (including contingent earn-out consideration) and noncontrolling interests subject to put provisions (temporary equity) based upon valuation techniques that include observable or unobservable market inputs and assumptions that market participants would use in pricing these assets, liabilities and temporary equity. The Company has also classified its assets, liabilities and temporary equity into the appropriate fair value hierarchy levels as defined by the Financial Accounting Standards Board (FASB). See Note 24 to the consolidated financial statements for further details.

New accounting standards

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. In July 2015, the FASB issued ASU 2015-14, *Revenue from Contracts with Customers (Topic* 606): *Deferral of Effective Date*. This guidance approves a one-year deferral of the effective date of ASU 2014-09. The ASU now permits the Company to adopt this standard effective January 1, 2018. Early application is permitted as of January 1, 2017. In March, April, and May 2016, the FASB issued ASU 2016-08, ASU 2016-10, ASU 2016-11, and ASU 2016-12, *Revenue from Contracts with Customers (Topic 606)*, each of which amends the guidance in ASU 2014-09. When they become effective, these ASUs will replace most existing revenue recognition guidance in U.S. GAAP. The Company has assembled an internal revenue task force that meets regularly to discuss and evaluate the overall impact this guidance will have on various revenue streams in the consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor determined the effect of these ASUs on its ongoing financial reporting. The Company expects to adopt these ASU's effective January 1, 2018.

In January 2016, the FASB issued ASU No. 2016-01, *Financial Statements – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities.* The amendments in this ASU revise accounting related to (i) the classification and measurement of investments in equity securities and (ii) the presentation of certain fair value changes for financial liabilities at fair value. The amendments in this ASU are effective for the Company beginning on January 1, 2018 and are to be applied through a cumulative effect adjustment to the statement of financial position. Early adoption is permitted under certain circumstances. The adoption of this ASU is not expected to have a material impact on the Company's consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)*. The amendments in this ASU revise the accounting related to lessee accounting. Under the new guidance, lessees will be required to recognize a lease liability and a right-of-use asset for substantially all leases with lease terms in excess of twelve months. The new lease guidance also simplifies the accounting for sale and leaseback transactions primarily because lessees must recognize lease assets and lease liabilities. The amendments in this ASU are effective for the Company beginning on January 1, 2019 and are to be applied through a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. Early adoption is permitted. The Company has assembled an internal lease task force that meets regularly to discuss and evaluate the overall impact of this guidance on its consolidated financial statements and related disclosures, as well as the expected timing of adoption. The Company believes that the new standard will have a material impact on its consolidated balance sheet but will not have a material impact on its results of operations or liquidity. The Company continues to evaluate the effect that the implementation of this ASU will have on its consolidated financial statements and related disclosures.

In March 2016, the FASB issued ASU No. 2016-07, *Investments – Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting.* The amendments in this ASU eliminate the requirement that when an investment

qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods that the investment had been held. The amendments in this ASU are effective for the Company beginning on January 1, 2017 to be applied prospectively. The adoption of this ASU is not expected to have a material impact on the Company's consolidated financial statements.

In March 2016, the FASB issued ASU No. 2016-09, *Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*. The changes required by this ASU involve several aspects of the accounting for share-based payment transactions, including income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The amendments in this ASU are effective for the Company beginning January 1, 2017. The method of adoption differs for each of the topics covered by the ASU. The Company expects that the primary effect of this ASU will be the presentation of excess tax benefits or deficiencies within the Company's consolidated statement of income as a component of income tax expense rather than within additional paid-in capital on its consolidated balance sheet. In addition, these amounts will be presented as an operating activity on the consolidated statement of cash flows rather than as a financing activity. The new standard may cause volatility in the Company's effective tax rates and diluted earnings per share due to the tax effects related to share-based payments being recorded within the Company's consolidated statement of income, including a potential increase in the Company's provision for income taxes if a significant number of outstanding stock awards are exercised at recent levels of the Company's stock price.

In August 2016, the FASB issued ASU No. 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*. The amendments in this ASU clarify how certain cash receipts and cash payments should be classified on the statement of cash flows. The new standard is effective for the Company beginning January 1, 2018 and should be applied retrospectively to all periods presented. The Company has not yet determined the effect that adoption of this ASU will have on its consolidated financial statements.

In October 2016, the FASB issued ASU No. 2016-16, *Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory*. The amendments in this ASU allow entities to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. The current guidance does not allow recognition until the asset has been sold to an outside party. The amendments in this ASU are effective for the Company beginning on January 1, 2018 and are to be applied on a modified retrospective basis. The Company has not yet determined the effect that adoption of this ASU will have on its consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-04, *Intangibles—Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment*. The amendments in this ASU simplify the test for goodwill impairment by eliminating the second step in testing for goodwill impairment. The amendments in this new ASU are effective for the Company January 1, 2020 and are to be applied on a prospective basis. Early adoption is permitted after January 1, 2017. The Company is evaluating the effect that the implementation of this ASU will have on its consolidated financial statements, related disclosures and timing of implementation.

2. Earnings per share

Basic net income per share is calculated by dividing net income attributable to the Company, adjusted for any change in noncontrolling interest redemption rights in excess of fair value, by the weighted average number of common shares and vested stock units outstanding, net of shares held in escrow that under certain circumstances may be returned to the Company.

Diluted net income per share includes the dilutive effect of outstanding stock-settled stock appreciation rights (SSARs), stock options and unvested stock units (under the treasury stock method) as well as shares held in escrow that the Company expects will remain outstanding.

The reconciliations of the numerators and denominators used to calculate basic and diluted net income per share are as follows:

	Year ended December 31,		
	2016	2015	2014
	(shares in thousands)		
Basic:			
Net income attributable to DaVita Inc. for basic earnings per share calculation	$ 879,874	$ 269,732	$ 723,114
Weighted average shares outstanding during the period	203,835	214,062	214,496
Contingently returnable shares held in escrow for the DaVita HealthCare Partners merger	(2,194)	(2,194)	(2,194)
Weighted average shares for basic earnings per share calculation	201,641	211,868	212,302
Basic net income per share attributable to DaVita Inc.	$ 4.36	$ 1.27	$ 3.41
Diluted:			
Net income attributable to DaVita Inc. for diluted earnings per share calculation	$ 879,874	$ 269,732	$ 723,114
Weighted average shares outstanding during the period	203,835	214,062	214,496
Assumed incremental shares from stock plans	1,070	2,190	2,432
Weighted average shares for diluted earnings per share calculation	204,905	216,252	216,928
Diluted net income per share attributable to DaVita Inc.	$ 4.29	$ 1.25	$ 3.33
Anti-dilutive stock-settled awards excluded from calculation(1)	2,523	1,365	1,715

(1) Shares associated with stock-settled stock appreciation rights excluded from the diluted denominator calculation because they are anti-dilutive under the treasury stock method.

3. Accounts receivable

For both years ending December 31, 2016 and 2015, approximately 81% of the Company's consolidated net accounts receivable is related to patient and other services, and approximately 19% is related to capitated health plans.

Approximately 16% and 18% of the Company's net patient services accounts receivable balances as of December 31, 2016 and 2015, respectively, were more than six months old, and there were no significant balances over one year old. Accounts receivable are principally from Medicare and Medicaid programs and commercial insurance plans.

Accounts receivable are reduced by an allowance for doubtful accounts. In evaluating the ultimate collectability of its accounts receivable, the Company analyzes its historical cash collection experience and trends for each payor to estimate the adequacy of the allowance for doubtful accounts and the amount of the provision for uncollectible accounts. Management regularly updates its analysis based upon the most recent information available to it to determine its current provision for uncollectible accounts and the adequacy of its allowance for doubtful accounts.

For receivables associated with dialysis and related lab services covered by government payors, like Medicare, the Company receives 80% of the payment directly from Medicare as established under the government's bundled payment system and determines an appropriate allowance for doubtful accounts and provision for uncollectible accounts on the remaining balance due depending upon the Company's estimate of the amounts ultimately collectible from other secondary coverage sources or from the patients. For receivables associated with services to patients covered by commercial payors that are either based upon contractual terms or for non-contracted health plan coverage, the Company provides an allowance for doubtful accounts by recording a provision for uncollectible accounts based upon its historical collection experience, potential inefficiencies in its billing processes and for which collectability is determined to be unlikely.

For receivables associated with the Company's capitated health plans, the balances remain on the balance sheet for as long as the respective plan years are open, which varies by health plan, but is generally two years in length. The majority of the Company's capitated health plans accounts receivable is one to three months old with collections occurring on a periodic basis throughout the duration of the corresponding plan year.

(dollars in thousands, except per share data)

Approximately 1% of the Company's U.S. dialysis and related lab services net accounts receivable are associated with patient pay and it is the Company's policy to reserve 100% of the outstanding accounts receivable balances for dialysis services when those amounts due are outstanding for more than three months and to reserve 100% of the outstanding patient pay accounts receivable balances for DMG's services when those amounts due have been outstanding for more than twelve months.

During the year ended December 31, 2016, the Company's allowance for doubtful accounts decreased by $12,088. The decrease in 2016 was primarily due to an increase in the write-offs of patient pay billings in the Company's U.S. dialysis business. The decrease was also due to a reduction in accounts receivable older than six months. During the year ended December 31, 2015, the Company's allowance for doubtful accounts increased by $21,470. The increase in 2015 was primarily due to an increase in the provision for uncollectible accounts due to an increase in the write-offs of Medicare secondary billings.

4. Other receivables

Other receivables were comprised of the following:

	December 31,	
	2016	2015
Supplier rebates and non-trade receivables	$ 347,123	$ 316,644
Medicare bad debt claims	104,658	105,714
Operating advances under management and administrative services agreements	1,702	13,527
	$ 453,483	$ 435,885

Operating advances under management and administrative services agreements are generally unsecured.

5. Other current assets

Other current assets were comprised of the following:

	December 31,	
	2016	2015
Prepaid expenses	$ 131,833	$ 105,216
Funds on deposit with third parties	75,877	82,679
Other	2,894	2,427
	$ 210,604	$ 190,322

6. Property and equipment

Property and equipment were comprised of the following:

	December 31,	
	2016	2015
Land	$ 59,013	$ 42,080
Buildings	491,301	437,283
Leasehold improvements	2,598,471	2,289,425
Equipment and information systems, including internally developed software	2,378,303	2,080,446
New center and capital asset projects in progress	480,439	336,513
	6,007,527	5,185,747
Less accumulated depreciation	(2,832,160)	(2,397,007)
	$ 3,175,367	$ 2,788,740

Depreciation expense on property and equipment was $545,734, $475,484 and $428,309 for 2016, 2015 and 2014, respectively.

Interest on debt incurred during the development of new centers and other capital asset projects is capitalized as a component of the asset cost based on the respective in-process capital asset balances. Interest capitalized was $12,990, $9,723 and $7,888 for 2016, 2015 and 2014, respectively.

(dollars in thousands, except per share data)

7. Intangibles

Intangible assets other than goodwill were comprised of the following:

	December 31,	
	2016	2015
Customer relationships	$ 1,568,161	$ 1,575,865
Trade names	190,761	170,883
Provider network and practice management tools	187,318	183,724
Noncompetition and other agreements	512,505	510,521
Lease agreements	7,624	7,306
Indefinite-lived assets	1,546	9,310
Other	583	408
	2,468,498	2,458,017
Less accumulated amortization	(940,731)	(770,691)
	$ 1,527,767	$ 1,687,326

Amortization expense from amortizable intangible assets, other than lease agreements, was $174,518, $166,537 and $167,956 for 2016, 2015 and 2014, respectively. Lease agreement intangible assets and liabilities were amortized to rent expense in the amounts of $(923), $(1,613) and $(1,798) for 2016, 2015 and 2014, respectively.

During the year ended December 31, 2016, the Company did not recognize impairment charges on any intangible assets other than goodwill. During the year ended December 31, 2015, the Company recognized a $17,400 impairment charge on an indefinite-lived intangible asset of its DMG Nevada reporting unit.

Amortizable intangible liabilities were comprised of the following:

	December 31,	
	2016	2015
Lease agreements (net of accumulated amortization of $8,485 and $6,936)	7,420	8,969
	$ 7,420	$ 8,969

There was no amortization benefit recognized from the alliance and product supply agreement in 2016 as it expired in September 2015. Amortization benefit related to this agreement was $3,997 for 2015 and $5,330 for 2014 related to this agreement. Lease agreement intangible liabilities are classified in other long-term liabilities and amortized to rent expense.

Scheduled amortization charges from amortizable intangible assets and liabilities as of December 31, 2016 were as follows:

	Customer relationships	Trade names	Provider network and practice management tools	Noncompetition and other agreements	Lease agreements	Other
2017	82,669	47,046	26,941	30,156	(1,228)	102
2018	82,664	47,046	26,881	19,519	(892)	102
2019	82,625	11,008	22,492	15,796	(832)	87
2020	82,609	3,800	581	10,437	(678)	44
2021	82,609	633	97	7,005	(606)	—
Thereafter	821,282	—	—	21,990	(3,184)	—

(dollars in thousands, except per share data)

8. Equity investments

Equity investments that do not have readily determinable fair values are carried on the cost or equity method, as applicable. The Company maintains equity method investments in nonconsolidated investees in both its Kidney Care and DMG lines of business, as well as minor cost method investments in private securities of certain other healthcare businesses. The Company classifies its non-marketable cost or equity method investments as equity investments on its balance sheet.

As described in Note 21, the Company deconsolidated its Asia Pacific dialysis business (APAC JV) effective as of August 1, 2016, adjusted its retained investment in the APAC JV to estimated fair value at that time, and has accounted for this retained investment on the equity method since August 1, 2016.

During the year ended December 31, 2016, the Company recorded an impairment of $14,993 related to a minority equity investment in one of its international reporting units.

Equity investments in nonconsolidated businesses were $502,389 and $78,368 at December 31, 2016 and 2015, respectively. The increase in equity investments was primarily related to the APAC JV, as discussed above. During 2016, 2015 and 2014, the Company recognized equity investment income of $13,044, $18,325 and $23,234, respectively, relating to equity investments in nonconsolidated businesses under the equity method of accounting.

9. Investments in debt and equity securities

The Company classifies certain debt securities as held-to-maturity and records them at amortized cost based on the Company's intentions and strategies concerning those investments. Equity securities that have readily determinable fair values, and certain other financial instruments that have readily determinable fair values or redemption values, are classified as available for sale and recorded at estimated fair value.

The Company's investments in securities and certain other financial instruments consist of the following:

	December 31, 2016			December 31, 2015		
	Held to maturity	Available for sale	Total	Held to maturity	Available for sale	Total
Certificates of deposit, commercial paper and money market funds due within one year	$ 256,827	$ —	$ 256,827	$ 406,884	$ —	$ 406,884
Investments in mutual funds and common stock	50,000	47,404	97,404	—	33,482	33,482
Cash surrender value of life insurance policies	—	59,646	59,646	—	56,840	56,840
	$ 306,827	$ 107,050	$ 413,877	$ 406,884	$ 90,322	$ 497,206
Short-term investments	$ 306,827	$ 3,371	$ 310,198	$ 406,884	$ 1,200	$ 408,084
Long-term investments	—	103,679	103,679	—	89,122	89,122
	$ 306,827	$ 107,050	$ 413,877	$ 406,884	$ 90,322	$ 497,206

The cost of certificates of deposit, commercial paper and money market funds at December 31, 2016 and 2015 approximate their fair value. As of December 31, 2016 and 2015, available for sale investments included $3,701 and $2,589, respectively, of gross pre-tax unrealized gains. During 2016 and 2015 the Company recorded gross pre-tax unrealized gains (losses) of $1,802 and $(1,974), respectively, in other comprehensive income associated with changes in the fair value of these investments. During 2016, the Company sold investments in mutual funds and common stock for net proceeds of $14,971, and recognized a pre-tax gain of $690, or $423 after tax, that was previously recorded in other comprehensive income. During 2015, the Company sold investments in mutual funds and common stock for net proceeds of $1,295, and recognized a pre-tax gain of $618, or $377 after tax, that was previously recorded in other comprehensive income.

Investments in mutual funds classified as available for sale are held within trusts to fund existing obligations associated with several of the Company's non-qualified deferred compensation plans.

Investments in life insurance policies are carried at their cash surrender value, are held within trusts to fund existing obligations associated with certain of the Company's non-qualified deferred compensation plans, and are principally classified as long-term to correspond with the long-term classification of the related plan liabilities. See Note 16 for further details.

(dollars in thousands, except per share data)

10. Goodwill

Changes in the carrying value of goodwill by reportable segments were as follows:

	U.S. dialysis and related lab services	DMG	Other ancillary services and strategic initiatives	Consolidated total
Balance at January 1, 2015	$ 5,610,643	$ 3,562,534	$ 242,118	$ 9,415,295
Acquisitions	21,910	29,910	45,273	$ 97,093
Divestitures	(3,370)	(5,411)	—	$ (8,781)
Goodwill impairment charges	—	(188,769)	(4,065)	$ (192,834)
Foreign currency and other adjustments	—	—	(16,294)	$ (16,294)
Balance at December 31, 2015	$ 5,629,183	$ 3,398,264	$ 267,032	$ 9,294,479
Acquisitions	75,295	248,901	123,632	$ 447,828
Divestitures	(12,891)	(2,223)	(29,645)	$ (44,759)
Goodwill impairment charges	—	(253,000)	(28,415)	$ (281,415)
Foreign currency and other adjustments	—	—	(8,816)	$ (8,816)
Balance at December 31, 2016	$ 5,691,587	$ 3,391,942	$ 323,788	$ 9,407,317
Balance at December 31, 2016:				
Goodwill	$ 5,691,587	$ 3,833,711	$ 358,112	$ 9,883,410
Accumulated impairment charges	—	(441,769)	(34,324)	$ (476,093)
	$ 5,691,587	$ 3,391,942	$ 323,788	$ 9,407,317

Each of the Company's operating segments described in Note 25 to these consolidated financial statements represents an individual reporting unit for goodwill impairment testing purposes, except that each sovereign jurisdiction within the Company's international operating segments is considered a separate reporting unit.

Within the U.S. dialysis and related lab services operating segment, the Company considers each of its dialysis centers to constitute an individual business for which discrete financial information is available. However, since these dialysis centers have similar operating and economic characteristics, and the allocation of resources and significant investment decisions concerning these businesses are highly centralized and the benefits broadly distributed, the Company has aggregated these centers and deemed them to constitute a single reporting unit.

The Company has applied a similar aggregation to the DMG operations in each region, to the vascular access service centers in its vascular access services reporting unit, to the physician practices in its physician services and direct primary care reporting units, and to the dialysis centers within each international reporting unit. For the Company's other operating segments, discrete business components below the operating segment level constitute individual reporting units.

During the fourth quarter of 2015, the Company recognized impairment charges of $188,769 on goodwill of certain DMG reporting units based on assessments performed after circumstances indicated it had become more likely than not that the goodwill of certain DMG reporting units had become impaired. These circumstances included under-performance of the business in recent quarters as well as changes in other market conditions, including government reimbursement cuts and the Company's expected ability to mitigate them.

Based on continuing developments at the Company's DMG reporting units during 2016, including the Medicare Advantage final benchmark rates for 2017 announced on April 4, 2016, further changes in expectations concerning future government reimbursement rates and the Company's expected ability to mitigate them, as well as medical cost and utilization trends, underperformance of certain at-risk units in recent quarters and other market conditions, the Company performed additional goodwill impairment assessments for certain at-risk DMG reporting units during each of the first three quarters of 2016 and as of their November 1 annual assessment date.

In addition, during the quarter ended December 31, 2016, the Company determined that circumstances indicated it had become more likely than not that the goodwill of the Company's vascular access reporting unit had become impaired. These circumstances included changes in future governmental reimbursement and the Company's expected ability to mitigate them. Specifically, on November 2, 2016, CMS released the 2017 Physician Fee Schedule Final Rule and the Ambulatory Surgical Center Payment Final

(dollars in thousands, except per share data)

Rule which reflected significant changes in reimbursement structure for this business unit. Accordingly, the Company performed the required valuations to estimate the fair value of the net assets and implied goodwill of this reporting unit with the assistance of a third-party valuation firm.

As a result of the assessments described above, the Company has recognized the goodwill impairment charges below:

	Year ended December 31,		
Reporting unit	2016	2015	2014
DMG Nevada	$ 161,800	$ 181,253	$ —
DMG Florida	91,200	5,800	—
DMG Arizona	—	1,716	—
Vascular access	28,415	—	—
International operations	—	4,065	1,000
Total	$ 281,415	$ 192,834	$ 1,000

Further reductions in reimbursement rates, increases in medical cost or utilization trends, or other significant adverse changes in expected future cash flows or valuation assumptions could result in goodwill impairment charges in the future for the following reporting units, which remain at risk of goodwill impairment:

	Goodwill balance as of December 31, 2016	Carrying amount coverage(1)	Sensitivities	
Reporting unit			Operating income(2)	Discount rate(3)
DMG Nevada	$ 261,204	11.4%	-2.2%	-3.9%
DMG Florida	$ 442,835	7.1%	-1.7%	-3.2%
DMG New Mexico	$ 70,926	2.6%	-1.5%	-2.2%
DMG Washington	$ 244,502	3.7%	-1.8%	-3.4%
Vascular access	$ 34,696	4.3%	-2.7%	-5.3%

(1) Excess of estimated fair value of the reporting unit over carrying amount as of the latest assessment date.
(2) Potential impact on estimated fair value of a sustained, long-term reduction of 3% in operating income as of the latest assessment date.
(3) Potential impact on estimated fair value of an increase in discount rates of 100 basis points as of the latest assessment date.

There were no major changes in the business, prospects, or expected future results of these reporting units from their latest assessment date.

Except as described above, none of the Company's various other reporting units were considered at risk of goodwill impairment as of December 31, 2016. Since the dates of the Company's last annual goodwill impairment tests, there have been certain developments, events, changes in operating performance and other changes in key circumstances that have affected the Company's businesses. However, except as further described above, these did not cause management to believe it is more likely than not that the fair value of any of the Company's other reporting units would be less than their respective carrying amount.

11. Other liabilities

Other liabilities were comprised of the following:

	December 31,	
	2016	2015
Payor refunds and retractions	$ 277,482	$ 153,104
Contingent earn-out consideration	7,217	29,050
Insurance and self-insurance accruals	80,437	80,355
Accrued interest	82,234	81,585
Other medical payables	36,645	53,687
Accrued non-income tax liabilities	27,759	29,291
Other	345,073	255,051
	$ 856,847	$ 682,123

(dollars in thousands, except per share data)

12. Medical payables

The healthcare costs shown in the following table include estimates for the cost of professional medical services provided by non-employed physicians and other providers, as well as inpatient and other ancillary costs for all markets, other than California, where state regulation allows for the assumption of global risk. Healthcare costs payable are included in medical payables.

The following table shows the components of changes in the healthcare costs payable for the year ended December 31, 2016 and 2015:

	December 31,	
	2016	2015
Healthcare costs payable, beginning of the year	$ 212,641	$ 214,405
Add: Components of incurred healthcare costs		
Current year	1,673,742	1,587,036
Prior years	(141)	1,523
Total incurred healthcare costs	1,673,601	1,588,559
Less: Claims paid		
Current year	1,473,723	1,397,378
Prior years	198,244	192,945
Total claims paid	1,671,967	1,590,323
Healthcare costs payable, end of the year	$ 214,275	$ 212,641

The Company's prior year estimates of healthcare costs payable resulted in medical claims being settled for different amounts than originally estimated. When significant increases (decreases) in prior-year healthcare cost estimates occur that the Company believes significantly impacts its current year operating results, the Company discloses that amount as unfavorable (favorable) development of prior-year's healthcare cost estimates. Actual claim payments for prior year services have not been materially different from the Company's year-end estimates.

13. Income taxes

The Company accounts for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements. Under this method, deferred tax assets and liabilities are determined on the basis of the differences between the financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse.

Income before income taxes consisted of the following:

	Year ended December 31,		
	2016	2015	2014
Domestic	$ 1,144,544	$ 764,998	$ 1,341,208
International	344,351	(41,862)	(31,535)
	$ 1,488,895	$ 723,136	$ 1,309,673

(dollars in thousands, except per share data)

Income tax expense (benefit) consisted of the following:

	Year ended December 31,		
	2016	2015	2014
Current:			
Federal	$ 337,178	$ 183,263	$ 188,302
State	48,771	30,766	30,789
International	1,928	856	1,687
Total current income tax	$ 387,877	$ 214,885	$ 220,778
Deferred:			
Federal	93,214	88,718	192,267
State	(27,764)	(8,307)	32,360
International	2,486	430	938
Total deferred income tax	$ 67,936	$ 80,841	$ 225,565
	$ 455,813	$ 295,726	$ 446,343

The reconciliation between the U.S. federal income tax rate and the Company's effective tax rate is as follows:

	Year ended December 31,		
	2016	2015	2014
Federal income tax rate	35.0%	35.0%	35.0%
State income taxes, net of federal benefit	1.2	2.5	3.5
International rate differential	0.2	(1.1)	(0.2)
Gain on APAC JV ownership changes	(9.8)	—	—
Goodwill impairments	6.7	11.7	—
Changes in deferred tax valuation allowances	0.6	2.6	0.6
Other	0.2	1.5	(0.8)
Impact of noncontrolling interests primarily attributable to non-tax paying entities	(3.5)	(11.3)	(4.0)
Effective tax rate	30.6%	40.9%	34.1%

The Company has indefinitely reinvested $381,523 of undistributed earnings of its foreign operations outside of the United States as of December 31, 2016. Included in this undistributed earnings amount is a non-taxable gain on the APAC JV ownership changes in the amount of $374,374. No deferred tax liability has been recognized for the remittance of such earnings to the U.S. since it is the Company's intention to utilize these earnings in its foreign operations. The determination of the amount of deferred taxes on these earnings is not practicable since the computation would depend on a number of factors that cannot be known unless a decision is made to repatriate the earnings.

(dollars in thousands, except per share data)

Deferred tax assets and liabilities arising from temporary differences were as follows:

	December 31,	
	2016	2015
Receivables	$ 19,283	$ 43,393
Accrued liabilities	318,596	272,080
Net operating loss carryforwards	130,456	130,977
Other	147,487	114,805
Deferred tax assets	615,822	561,255
Valuation allowance	(56,016)	(57,811)
Net deferred tax assets	559,806	503,444
Intangible assets	(1,025,488)	(927,761)
Property and equipment	(230,870)	(205,071)
Investments in partnerships	(95,936)	(83,584)
Other	(16,640)	(13,990)
Deferred tax liabilities	(1,368,934)	(1,230,406)
Net deferred tax liabilities	$ (809,128)	$ (726,962)

At December 31, 2016, the Company had federal net operating loss carryforwards of approximately $155,790 that expire through 2035, although a substantial amount expire by 2028. The Company also had state net operating loss carryforwards of $836,774 that expire through 2036 and international net operating loss carryforwards of $97,281, some of which have an indefinite life. The utilization of a portion of these losses may be limited in future years based on the profitability of certain entities. The valuation allowance net decrease of $1,795 is primarily due to an increase related to the realizability of losses in certain foreign and state jurisdictions of $8,339 and a decrease relating to the APAC JV ownership changes of $10,134.

Unrecognized tax benefits

A reconciliation of the beginning and ending liability for unrecognized tax benefits that do not meet the more-likely-than-not threshold were as follows:

	Year ended December 31,	
	2016	2015
Beginning balance	$ 39,011	$ 31,877
Additions for tax positions related to current year	9,714	6,131
Additions for tax positions related to prior years	—	2,999
Reductions related to lapse of applicable statute	(1,277)	(1,996)
Reductions related to settlements with taxing authorities	(23,382)	—
Ending balance	$ 24,066	$ 39,011

As of December 31, 2016, the Company's total liability for unrecognized tax benefits relating to tax positions that do not meet the more-likely-than-not threshold is $24,066, all of which would impact the Company's effective tax rate if recognized. This balance represents a decrease of $14,945 from the December 31, 2015 balance of $39,011, primarily due to the positive settlement of an IRS and state audit.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits in its income tax expense. At December 31, 2016 and 2015, the Company had approximately $2,595 and $9,918, respectively, accrued for interest and penalties related to unrecognized tax benefits, net of federal tax benefit.

The Company and its subsidiaries file U.S. federal and state income tax returns and various international income tax returns. The Company is no longer subject to U.S. federal and state examinations by tax authorities for years before 2013 and 2008, respectively.

(dollars in thousands, except per share data)

14. Long-term debt

Long-term debt was comprised of the following:

	December 31,	
	2016	2015
Senior Secured Credit Facilities:		
Term Loan A	$ 862,500	$ 925,000
Term Loan B	3,412,500	3,447,500
Senior notes	4,500,000	4,500,000
Acquisition obligations and other notes payable	117,547	70,645
Capital lease obligations	299,682	283,185
Total debt principal outstanding	9,192,229	9,226,330
Discount and deferred financing costs	(79,861)	(95,985)
	9,112,368	9,130,345
Less current portion	(165,041)	(129,037)
	$ 8,947,327	$ 9,001,308

Scheduled maturities of long-term debt at December 31, 2016 were as follows:

2017	165,041
2018	167,684
2019	747,871
2020	69,508
2021	3,300,437
Thereafter	4,741,688

Term Loans

Total outstanding borrowings under Term Loan A and Term Loan B can consist of various individual tranches that can range in maturity from one month to twelve months (currently all tranches are one month in duration). For Term Loan A and Term Loan B, each tranche bears interest at a London Interbank Offered Rate (LIBOR) rate that is determined by the duration of such tranche plus an interest rate margin. The LIBOR variable component of the interest rate for each tranche is reset as such tranche matures and a new tranche is established. At December 31, 2016, the overall weighted average interest rate for Term Loan A was determined based upon the LIBOR interest rates in effect for all of the individual tranches plus the interest rate margin of 1.75%. At December 31, 2016, Term Loan B bears interest at LIBOR (floor of 0.75%) plus a margin of 2.75%. The Company is subject to LIBOR-based interest rate volatility on Term Loan B as the LIBOR-based component of the interest rate exceeded the floor of 0.75% as of December 31, 2016. The overall weighted average interest rate for Term Loan B was determined based upon the LIBOR interest rates in effect for all individual tranches plus the interest rate margin. The Company has several interest rate cap agreements that have the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 3.50% on $3,500,000 of outstanding principal debt. The remaining $775,000 outstanding principal balance of Term Loan A would still be subject to LIBOR-based interest rate volatility. In addition, the Company maintains several forward interest rate cap agreements with notional amounts totaling $3,500,000, which will be effective June 29, 2018. The cap agreements will have the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 3.50% on an equivalent amount of the Company's debt. See below for further details. The Company is restricted from paying dividends under the terms of its senior secured credit facilities.

During the year ended December 31, 2016, the Company made mandatory principal payments under its then existing senior secured credit facilities totaling $62,500 on Term Loan A and $35,000 on Term Loan B.

Revolving lines of credit

The Company has an undrawn revolving line under the senior secured credit facilities totaling $1,000,000, of which approximately $95,629 was committed for outstanding letters of credit. In addition, the Company has approximately $1,286 of committed outstanding letters of credit related to DMG, which is backed by a certificate of deposit.

Senior Notes

The Company's senior notes as of December 31, 2016 consisted of $1,500,000 of 5.0% Senior Notes due 2025, $1,750,000 5 1/8% senior notes due 2024 and $1,250,000 of 5 3/4% senior notes due 2022 (collectively Senior Notes).

The Senior Notes are unsecured obligations, rank equally in right of payment with the Company's existing and future unsecured senior indebtedness, and are guaranteed by substantially all of the Company's direct and indirect wholly-owned domestic subsidiaries and require semi-annual interest payments. The Company may redeem some or all of the Senior Notes at any time on or after certain specific dates and at certain specific redemption prices as outlined in each senior note agreement. The Company is restricted from paying dividends under the indentures governing its Senior Notes.

In April 2015, the Company issued $1,500,000 5.0% Senior Notes due 2025 (5.0% Senior Notes). The 5.0% Senior Notes pay interest on May 1 and November 1 of each year beginning November 1, 2015. The 5.0% Senior Notes are unsecured senior obligations, rank equally in right of payment with the Company's existing and future unsecured senior indebtedness, and are guaranteed by certain of the Company's domestic subsidiaries. The Company may redeem up to 35% of the 5.0% Senior Notes at any time prior to May 1, 2018 at a certain specified price from the proceeds of one or more equity offerings. In addition, the Company may redeem some or all of the 5.0% Senior Notes at any time prior to May 1, 2020 at make-whole redemption rates and on or after such date at certain specified redemption prices. The net proceeds from the 5.0% Senior Notes offering were used to repurchase all of the $775,000 aggregate outstanding principal balances of the 6 5/8% Senior Notes due 2020 (6 5/8% Senior Notes) through a combination of a tender offer and a redemption process and to pay fees and expenses. The remaining net offering proceeds were used for general corporate purposes, acquisitions and share repurchases. As a result of these transactions, the Company incurred $48,072 in debt redemption charges consisting of tender and redemption premiums as well as the write-off of deferred financing costs associated with the repurchase of the 6 5/8% Senior Notes.

Interest rate swaps and cap agreements

During the year ended December 31, 2016 the Company had several interest rate swap agreements as a means of hedging its exposure to and volatility from variable-based interest rate changes as part of its overall interest rate risk management strategy. These agreements were not held for trading or speculative purposes and had the economic effect of converting the LIBOR variable component of the Company's Term Loan A interest rate to a fixed rate. These swap agreements were designated as cash flow hedges, and as a result, hedge-effective gains or losses resulting from changes in the fair values of these swaps were reported in other comprehensive income until such time as the hedged forecasted cash flows occurred, at which time the amounts were reclassified into net income. Net amounts paid or received for each specific swap tranche that had settled were reflected as adjustments to debt expense. In addition, the Company has entered into several interest rate cap agreements and several forward interest rate cap agreements that have the economic effect of capping the Company's maximum exposure to LIBOR variable interest rate changes on specific portions of the Company's floating rate debt, as described below. These cap agreements are also designated as cash flow hedges and, as a result, changes in the fair values of these cap agreements are reported in other comprehensive income. The amortization of the original cap premium is recognized as a component of debt expense on a straight-line basis over the term of the cap agreements. The swap and cap agreements do not contain credit-risk contingent features.

As of December 31, 2016, the Company maintains interest rate cap agreements that were entered into in November 2014 with notional amounts totaling $3,500,000. These previously forward cap agreements became effective September 30, 2016 and have the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 3.50% on an equivalent amount of the Company's debt. These cap agreements expire on June 30, 2018. As of December 31, 2016, the total fair value of these cap agreements was an asset of approximately $116. During the year ended December 31, 2016, the Company recognized debt expense of $2,070 from these caps. During the year ended December 31, 2016, the Company recorded a loss of $1,196 in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

As of December 31, 2016, the Company maintains several forward interest rate cap agreements that were entered into in October 2015 with notional amounts totaling $3,500,000. These forward cap agreements will become effective June 29, 2018 and will have the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 3.50% on an equivalent amount of its debt. These cap agreements expire on June 30, 2020. As of December 31, 2016, the total fair value of these cap agreements was an asset of approximately $9,813. During the year ended December 31, 2016, the Company recorded a loss of $4,002 in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

Previously, the Company maintained several interest rate cap agreements with notional amounts totaling $2,735,000 on the Company's Term Loan B debt. These agreements had the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 2.50% on an equivalent amount of the Company's Term Loan B. During the year ended

(dollars in thousands, except per share data)

December 31, 2016, the Company recognized debt expense of $1,829 from these caps. The cap agreements expired on September 30, 2016.

The Company also previously maintained several interest rate swap agreements. These agreements had the economic effect of modifying the LIBOR variable component of the Company's interest rate on an equivalent amount of the Company's Term Loan A to fixed rates ranging from 0.49% to 0.52%. These interest rate swap agreements required monthly interest payments and expired on September 30, 2016. During the year ended December 31, 2016, the Company recognized debt expense of $299 from these swaps, and recorded a loss of $815 in other comprehensive income due to a decrease in the unrealized fair value of these swap agreements.

The following table summarizes the Company's derivative instruments as of December 31, 2016 and 2015:

	Interest rate swap and cap agreements (liabilities and assets)			
	December 31, 2016		December 31, 2015	
Derivatives designated as hedging instruments	Balance sheet location	Fair value	Balance sheet location	Fair value
Interest rate swap agreements		$ —	Other short-term assets	$ 516
Interest rate cap agreements	Other long-term assets	$ 9,929	Other long-term assets	$ 15,127

The following table summarizes the effects of the Company's interest rate swap and cap agreements for the years ended December 31, 2016, 2015 and 2014:

	Amount of losses recognized in OCI on interest rate swap and cap agreements			Location of (losses) gains reclassified from accumulated OCI into income	Amount of gains reclassified from accumulated OCI into income		
	Years ended December 31,				Years ended December 31,		
Derivatives designated as cash flow hedges	2016	2015	2014		2016	2015	2014
Interest rate swap agreements	$ (815)	$ (3,971)	$ (8,390)	Debt expense	$ 299	$ 2,664	$ 12,279
Interest rate cap agreements	(5,198)	(16,114)	(8,119)	Debt expense	3,899	2,439	5,130
Tax benefit (expense)	2,343	7,844	6,450		(1,632)	(1,992)	(6,801)
Total	$ (3,670)	$ (12,241)	$ (10,059)		$ 2,566	$ 3,111	$ 10,608

As of December 31, 2016, the interest rate on the Company's Term Loan B debt bears interest at LIBOR plus an interest rate margin of 2.75%. Term Loan B is subject to an interest rate cap if LIBOR should rise above 3.50%. Term Loan A bears interest at LIBOR plus an interest rate margin of 1.75%. The capped portion of Term Loan A is $87.5 million. In addition, the uncapped portion of Term Loan A, which is subject to the variability of LIBOR, is $775 million. See above for further details. Interest rates on the Company's Senior Notes are fixed by their terms.

The Company's overall weighted average effective interest rate on the senior secured credit facilities was 3.68%, based upon the current margins in effect of 1.75% for Term Loan A and 2.75% for Term Loan B, as of December 31, 2016.

The Company's overall weighted average effective interest rate for the year ended December 31, 2016 was 4.43% and as of December 31, 2016 was 4.52%.

Debt expense

Debt expense consisted of interest expense of $394,279, $389,755 and $385,750 and the amortization and accretion of debt discounts and premiums, amortization of deferred financing costs and the amortization of interest rate cap agreements of $20,103, $18,625 and $24,544 for 2016, 2015 and 2014, respectively. The interest expense amounts are net of capitalized interest.

15. Leases

The majority of the Company's facilities are leased under non-cancelable operating leases ranging in terms from five to fifteen years and which contain renewal options of five to ten years at the fair rental value at the time of renewal. The Company's leases are

(dollars in thousands, except per share data)

generally subject to periodic consumer price index increases or contain fixed escalation clauses. The Company also leases certain facilities and equipment under capital leases.

Future minimum lease payments under non-cancelable operating and capital leases are as follows:

	Operating leases	Capital leases
2017	$ 473,302	$ 37,758
2018	442,959	34,442
2019	401,242	35,292
2020	354,559	35,575
2021	310,704	31,133
Thereafter	1,244,309	232,191
	$ 3,227,075	406,391
Less portion representing interest		(106,709)
Total capital lease obligations, including current portion		$ 299,682

Rent expense under all operating leases for 2016, 2015, and 2014 was $563,204, $514,287 and $460,093, respectively. Rent expense is recorded on a straight-line basis over the term of the lease for leases that contain fixed escalation clauses or include abatement provisions. Leasehold improvement incentives are deferred and amortized to rent expense over the term of the lease. The net book value of property and equipment under capital leases was $263,995 and $261,960 at December 31, 2016 and 2015, respectively. Capital lease obligations are included in long-term debt. See Note 14 to these consolidated financial statements.

16. Employee benefit plans

The Company has a savings plan for substantially all of its non-DMG employees which has been established pursuant to the provisions of Section 401(k) of the Internal Revenue Code (IRC). The plan allows for employees to contribute a percentage of their base annual salaries on a tax-deferred basis not to exceed IRC limitations. The Company does not provide any matching contributions for its non-DMG employees.

The Company also has various savings plans covering substantially all of its DMG employees which have been established pursuant to the provisions of Section 401(k) of the IRC. These plans provide for multiple employer matching contributions up to 4% of employee contributions. The Company made matching contributions in 2016, 2015 and 2014 totaling approximately $11,266, $8,324 and $7,400, respectively.

The Company also maintains a voluntary compensation deferral plan, the DaVita Voluntary Deferral Plan. This plan is non-qualified and permits certain employees whose annualized base salary equals or exceeds a minimum annual threshold amount as set by the Company to elect to defer all or a portion of their annual bonus payment and up to 50% of their base salary into a deferral account maintained by the Company. Total contributions to this plan in 2016, 2015 and 2014 were $5,344, $4,234 and $3,772, respectively. Deferred amounts are generally paid out in cash at the participant's election either in the first or second year following retirement or in a specified future period at least three to four years after the deferral election was effective. During 2016, 2015 and 2014 the Company distributed $916, $1,270 and $1,111, respectively, to participants in this plan. Participants are credited with their proportional amount of annual earnings from the plan. The assets of this plan are held in a rabbi trust and as such are subject to the claims of the Company's general creditors in the event of its bankruptcy. As of December 31, 2016 and 2015, the total fair value of assets held in this plan's trust were $30,191 and $23,800, respectively.

The Company also maintains two separate non-qualified voluntary compensation deferral plans for its DMG business, the HealthCare Partners, LLC Deferred Compensation Plan and the HealthCare Partners Medical Group, Inc. Deferred Compensation Plan 2. As of December 31, 2016 and 2015, the total fair value of the assets held in these plans' trusts were $14,036 and $8,578, respectively.

The Company also maintains an Executive Retirement Plan for certain members of management. This plan is non-qualified and contributions to the plan were made at the discretion of DVA Renal Healthcare based upon a pre-determined percentage of a participant's base salary. Effective November 2005, all contributions to this plan were discontinued and the balance of the plan assets will be paid out upon termination or retirement of each individual participant. During 2016 and 2015 the Company distributed $149

and $25, respectively, to participants in this plan. During 2014 the Company did not make any distributions to participants under this plan. As of December 31, 2016 and 2015, the total fair value of assets held under this plan's trust was $1,005 and $1,104, respectively.

The Company also maintains a frozen non-qualified trust-owned life insurance deferred compensation plan, the HealthCare Partners Medical Group, Inc. Deferred Compensation Plan, for certain key employees of DMG. The total cash surrender value of all of the life insurance policies totaled approximately $59,646 and $56,840 at December 31, 2016 and 2015, respectively, and is included in long-term investments. In addition, the total deferred compensation liabilities owed to the participants totaled approximately $54,486 and $52,128 at December 31, 2016 and 2015, respectively, and are included in other long-term liabilities. During 2016, 2015 and 2014, the Company did not make any contributions on behalf of its participants.

The fair value of all of the assets held in plan trusts as of December 31, 2016, and 2015 totaled $45,233 and $33,482, respectively. The assets of these plans are available for sale and as such are recorded at fair market value with changes in the fair market values being recorded in other comprehensive income. Any fair market value changes to the corresponding liability balance are recorded as compensation expense. See Note 9 to these consolidated financial statements.

Most of the Company's outstanding employee stock plan awards include a provision accelerating the vesting of the award in the event of a change of control. The Company also maintains a change of control protection program for its employees who do not have a significant number of stock awards, which has been in place since 2001, and which provides for cash bonuses to employees in the event of a change of control. Based on the market price of the Company's common stock and shares outstanding on December 31, 2016, these cash bonuses would total approximately $492,645 if a change of control transaction occurred at that price and the Company's Board of Directors did not modify the program. This amount has not been accrued at December 31, 2016, and would only be accrued upon a change of control. These change of control provisions may affect the price an acquirer would be willing to pay for the Company.

17. Contingencies

The majority of the Company's revenues are from government programs and may be subject to adjustment as a result of: (i) examination by government agencies or contractors, for which the resolution of any matters raised may take extended periods of time to finalize; (ii) differing interpretations of government regulations by different Medicare contractors or regulatory authorities; (iii) differing opinions regarding a patient's medical diagnosis or the medical necessity of services provided; and (iv) retroactive applications or interpretations of governmental requirements. In addition, the Company's revenues from commercial payors may be subject to adjustment as a result of potential claims for refunds, as a result of government actions or as a result of other claims by commercial payors.

The Company operates in a highly regulated industry and is a party to various lawsuits, claims, governmental investigations and audits (including investigations resulting from its obligation to self-report suspected violations of law) and other legal proceedings. The Company records accruals for certain legal proceedings and regulatory matters to the extent that the Company determines an unfavorable outcome is probable and the amount of the loss can be reasonably estimated. While these accruals reflect the Company's best estimate of the probable loss for those matters as the dates of those accruals, the recorded amounts may differ materially from the actual amount of the losses for those matters. Additionally, in some cases, no estimate of the possible loss or range of loss in excess of amounts accrued, if any, can be made because of the inherently unpredictable nature of legal proceedings and regulatory matters, which may be exacerbated by various factors, including that they may involve indeterminate claims for monetary damages or may involve fines, penalties or non-monetary remedies; present novel legal theories or legal uncertainties; involve disputed facts; represent a shift in regulatory policy; are in the early stages of the proceedings; or result in a change of business practices. Further, there may be various levels of judicial review available to the Company in connection with any such proceeding.

The following is a description of certain lawsuits, claims, governmental investigations and audits and other legal proceedings to which the Company is subject.

Inquiries by the Federal Government and Certain Related Civil Proceedings

Vainer Private Civil Suit: As previously disclosed, the Company received a subpoena for documents from the Office of Inspector General (OIG) for the U.S. Department of Health and Human Services (HHS) relating to the pharmaceutical products Zemplar, Hectorol, Venofer, Ferrlecit and erythropoietin (EPO), as well as other related matters, covering the period from January 2003 to December 2008. The Company subsequently learned that the allegations underlying this inquiry were made as part of a civil complaint filed by relators, Daniel Barbir and Dr. Alon Vainer, pursuant to the *qui tam* provisions of the federal False Claims Act (FCA). The relators also alleged that the Company's drug administration practices for the Company's dialysis operations for Vitamin D and iron agents from 2003 through 2010 fraudulently created unnecessary waste, which was billed to and paid for by the government. In June 2015, the Company finalized the terms of the settlement with plaintiffs, including a settlement amount of $450,000 and attorney fees and other costs of $45,000 which was paid in 2015.

2011 U.S. Attorney Medicaid Investigation: In October 2011, the Company announced that it would be receiving a request for documents, which could include an administrative subpoena from the OIG. Subsequent to the Company's announcement of this 2011 U.S. Attorney Medicaid Investigation, the Company received a request for documents in connection with the inquiry by the U.S. Attorney's Office for the Eastern District of New York. The request related to payments for infusion drugs covered by Medicaid composite payments for dialysis. It is the Company's understanding that this inquiry is civil in nature. The Company understands further that certain other providers that operate dialysis clinics in New York may have received a similar request for documents. The Company cooperated with the government and produced the requested documents. In April 2014, the Company reached an agreement in principle with the government. In March 2016, the Company finalized and executed settlement agreements with the State of New York and the U.S. Department of Justice (DOJ), including a settlement payment of an immaterial amount.

Swoben Private Civil Suit: In April 2013, HealthCare Partners (HCP), now known as the Company's DaVita Medical Group (DMG) subsidiary, was one of several defendants served with a civil complaint filed by a former employee of SCAN Health Plan (SCAN), an HMO. On July 13, 2009, pursuant to the *qui tam* provisions of the federal False Claims Act (FCA) and the California False Claims Act, James M. Swoben, as relator, filed his initial *qui tam* action in the United States District Court for the Central District of California purportedly on behalf of the United States of America and the State of California against SCAN, and certain other defendants whose identities were under seal. The allegations in the complaint relate to alleged overpayments received from government healthcare programs. In 2009 and 2010, the relator twice amended his complaint and added additional defendants, and in November 2011, he filed his Third Amended Complaint under seal alleging violations of the federal FCA and the California False Claims Act, and added additional defendants, including HCP and certain health insurance companies (the defendant HMOs). The allegations in the complaint against HCP relate to patient diagnosis coding to determine reimbursement in the Medicare Advantage program, referred to as HCC and RAF scores. The complaint sought monetary damages and civil penalties as well as costs and expenses. The DOJ reviewed these allegations and in January 2013 declined to intervene in the case. HCP and the other defendants filed motions to dismiss the Third Amended Complaint, and the court dismissed with prejudice the claims and judgment was entered in September 2013. Upon the plaintiff's appeal, a panel of the Ninth Circuit overturned the trial court's ruling and vacated the dismissal of the case. The Company, with certain defendants, petitioned the Ninth Circuit for a rehearing, but in December 2016, the Ninth Circuit rejected the petition and determined the relator should be given an opportunity to amend the complaint, and remanded the case back to district court.

2015 U.S. Attorney Transportation Investigation: In February 2015, the Company announced that it received six administrative subpoenas from the OIG for medical records from six different dialysis centers in southern California operated by the Company. Specifically, each subpoena sought the medical records of a single patient of each respective dialysis center. In February 2016, the Company received four additional subpoenas for four additional dialysis centers in southern California. The subpoenas were similarly limited in scope to the subpoenas received in 2015. On February 8, 2017, the Company was served with a qui tam complaint in the U.S. District Court for the Central District of California. The Company has been advised by an attorney with the United States Attorney's Office for the Central District of California that the qui tam is related to the investigation concerning the medical necessity of patient transportation, which was the basis for the subpoenas. The relator alleges that an ambulance company submitted false claims for patient transportation. Although the Company does not provide transportation nor does it bill for the transport of its dialysis patients, the relator alleges that two of its purported clinical staff caused the submission of a small number of those claims through improper certifications of medical necessity. The Company is investigating these allegations and intends to defend accordingly. The DOJ has declined to intervene.

2015 U.S. Office of Inspector General (OIG) Medicare Advantage Civil Investigation: In March 2015, JSA HealthCare Corporation (JSA), a subsidiary of DMG, received a subpoena from the OIG. The Company has been advised by an attorney with the Civil Division of the DOJ in Washington, D.C. that the subpoena relates to an ongoing civil investigation concerning Medicare Advantage service providers' risk adjustment practices and data, including identification and verification of patient diagnoses and

factors used in making the diagnoses. The subpoena requests documents and information for the period from January 1, 2008 through December 31, 2013, for certain Medicare Advantage plans for which JSA provided services. It also requests information regarding JSA's communications about patient diagnoses as they relate to certain Medicare Advantage plans generally, and more specifically as related to two Florida physicians with whom JSA previously contracted. The Company is producing the requested information and is cooperating with the government's investigation.

In addition to the subpoena described above, in June 2015, the Company received a subpoena from the OIG. This civil subpoena covers the period from January 1, 2008 through the present and seeks production of a wide range of documents relating to the Company's and its subsidiaries' (including DMG's and its subsidiary JSA's) provision of services to Medicare Advantage plans and related patient diagnosis coding and risk adjustment submissions and payments. The Company believes that the request is part of a broader industry investigation into Medicare Advantage patient diagnosis coding and risk adjustment practices and potential overpayments by the government. The information requested includes information relating to patient diagnosis coding practices for a number of conditions, including potentially improper historical DMG coding for a particular condition. With respect to that condition, the guidance related to that coding issue was discontinued following the Company's November 1, 2012 acquisition of DMG, and the Company notified CMS in April 2015 of the coding practice and potential overpayments. In that regard, the Company has identified certain additional coding practices which may have been problematic and is in discussions with the DOJ about the scope and nature of a review of claims relating to those practices. The Company is cooperating with the government and is producing the requested information. In addition, the Company is continuing to review other DMG coding practices to determine whether there were any improper coding issues. In connection with the DMG merger, the Company has certain indemnification rights against the sellers and an escrow was established as security for the indemnification. The Company has submitted an indemnification claim against the sellers secured by the escrow for any and all liabilities incurred relating to these matters and intends to pursue recovery from the escrow. However, the Company can make no assurances that the indemnification and escrow will cover the full amount of the Company's potential losses related to these matters.

2015 U.S. Department of Justice Vascular Access Investigation and Related *Qui Tam* Litigation: In November 2015, the Company announced that RMS Lifeline, Inc., a wholly-owned subsidiary of the Company that operates under the name Lifeline Vascular Access (Lifeline), received a Civil Investigative Demand (CID) from the DOJ. The CID relates to two vascular access centers in Florida that are part of Lifeline's vascular access business. The CID covers the period from January 1, 2008 through the present. The Company acquired these two centers in December 2012. Based on the language of the CID, the DOJ appeared to be looking at whether angiograms performed at the two centers were medically unnecessary and therefore whether related claims filed with federal healthcare programs possibly violated the FCA. Lifeline does not perform dialysis services but instead provides vascular access management services for dialysis patients. The Company cooperated with the government and produced the requested information. The DOJ investigation was initiated pursuant to a complaint brought under the *qui tam* provisions of the FCA (the Complaint). The Complaint was originally filed under seal in August 2014 in the U.S. District Court, Middle District of Florida, United States ex. rel James Spafford v. DaVita HealthCare Partners, Inc., et al., Case Number 6:14-cv-1251-Orl-41DAB, naming several doctors along with the Company as defendants. In December 2015, a First Amended Complaint was filed under seal. In May 2016, the First Amended Complaint was unsealed. The First Amended Complaint alleges violations of the FCA due to the submission of claims to the government for allegedly medically unnecessary angiograms and angiography procedures at the two vascular access centers as well as employment-related claims. The Complaint covers alleged conduct dating from July 2008, prior to the Company's acquisition of the centers, to the present. The DOJ declined to intervene. In the third quarter of 2016 the Company recorded an accrual of a non-material amount for potential damages and liabilities. In January 2017, the Company finalized and executed a settlement agreement with the relator and the government for an immaterial amount.

2016 U.S. Attorney Prescription Drug Investigation: In early February 2016, the Company announced that its pharmacy services' wholly-owned subsidiary, DaVita Rx, received a CID from the U.S. Attorney's Office for the Northern District of Texas. It appears the government is conducting an FCA investigation concerning allegations that DaVita Rx presented or caused to be presented false claims for payment to the government for prescription medications, as well as into the Company's relationship with pharmaceutical manufacturers. The CID covers the period from January 1, 2006 through the present. In the spring of 2015, the Company initiated an internal compliance review of DaVita Rx during which it identified potential billing and operational issues. The Company notified the government in September 2015 that it was conducting this review of DaVita Rx and began providing regular updates of its review. As of December 31, 2016, the Company recorded estimated accruals totaling $38,330 for potential damages and liabilities associated with write-offs and discounts of patient co-payment obligations, and credits to payors for returns of prescriptions drugs, related to DaVita Rx that were identified during the course of this internal compliance review. Upon completion of its review, the Company filed a self-disclosure with the OIG in early February 2016 and has been working to address and update the practices it identified in the self-disclosure, some of which overlap with information requested by the U.S. Attorney's Office. The Company may accrue additional reserves for refunds and related damages and potential liabilities arising out of this review. The Company does not

know if the U.S. Attorney's Office, which is part of the DOJ, knew when it served the CID on the Company that it was already in the process of developing a self-disclosure to the OIG. The OIG informed the Company in February 2016 that its submission was not accepted. They indicated that the OIG is not expressing an opinion regarding the conduct disclosed or the Company's legal positions. The Company is cooperating with the government and is producing the requested information.

Solari Post-Acquisition Matter: In 2016, HCP Nevada disclosed to the OIG for the Department of Health and Human Services (HHS) that proper procedures for clinical and eligibility determinations may not have been followed by Las Vegas Solari Hospice (Solari), which was acquired in March 2013 and sold in September 2016 by HCP Nevada. In June 2016, the Company was notified by the OIG that the disclosure submission had been accepted into the OIG's Self Disclosure Protocol. The Company recorded an estimated accrual of $16,000 for potential damages and liabilities associated with this matter. HCP Nevada had previously made a disclosure and repayment of overpayments to National Government Services (NGS), the Medicare Administrative Contractor for HCP Nevada, for claims submitted by Solari to the federal government prior to DMG's acquisition of Solari and claims made to the government post-acquisition for which the sellers had certain responsibilities pursuant to a management services agreement. The Company may accrue additional reserves for potential damages and liabilities related to this matter. The Company is cooperating with the government in this matter.

2017 U.S. Attorney American Kidney Fund Investigation. On January 4, 2017, the Company was served with an administrative subpoena for records by the United States Attorney's Office, District of Massachusetts, relating to an investigation into possible federal health care offenses. The subpoena covers the period from January 1, 2007 through the present, and seeks documents relevant to charitable patient assistance organizations, particularly the American Kidney Fund, including documents related to efforts to provide patients with information concerning the availability of charitable assistance. The Company intends to cooperate with the government in this investigation.

Although the Company cannot predict whether or when proceedings might be initiated or when these matters may be resolved (other than as described above), it is not unusual for inquiries such as these to continue for a considerable period of time through the various phases of document and witness requests and on-going discussions with regulators. In addition to the inquiries and proceedings specifically identified above, the Company is frequently subject to other inquiries by state or federal government agencies and/or private civil qui tam complaints filed by relators. Negative findings or terms and conditions that the Company might agree to accept as part of a negotiated resolution of pending or future government inquiries or relator proceedings could result in, among other things, substantial financial penalties or awards against the Company, substantial payments made by the Company, harm to the Company's reputation, required changes to the Company's business practices, exclusion from future participation in the Medicare, Medicaid and other federal health care programs and, if criminal proceedings were initiated against the Company, possible criminal penalties, any of which could have a material adverse effect on the Company.

Shareholder Claims

Peace Officers' Annuity and Benefit of Georgia Securities Laws Class Action Civil Suit: On February 1, 2017, the Peace Officers' Annuity and Benefit Fund of Georgia filed a putative federal securities class action complaint in the U.S. District Court for the District of Colorado against the Company and certain executives. The complaint covers the time period of August 2015 to October 2016 and alleges, generally, that the Company and its executives violated federal securities laws concerning the Company's financial results and revenue derived from patients who received charitable premium assistance from an industry-funded non-profit organization. The complaint further alleges that the process by which patients obtained commercial insurance and received charitable premium assistance was improper and "created a false impression of DaVita's business and operational status and future growth prospects." The Company disputes these allegations and intends to defend this action accordingly.

Blackburn Shareholder Derivative Civil Suit: On February 10, 2017, Charles Blackburn filed a derivative shareholder lawsuit in the U.S. District Court for the District of Delaware against the Company, as nominal defendant, the Board of Directors and certain executives. The complaint covers the time period from 2015 to present and alleges, generally, breach of fiduciary duty, unjust enrichment and misrepresentations and/or failures to disclose certain information in violation of the federal securities laws in the Company's 2016 proxy statement in connection with an alleged practice to direct patients with government-subsidized health insurance into private health insurance plans to maximize the Company's profits. The Company disputes these allegations and intends to defend this action accordingly.

Other Proceedings

In addition to the foregoing, from time to time the Company is subject to other lawsuits, claims, governmental investigations and audits and legal proceedings that arise due to the nature of its business, including contractual disputes, such as with payors, suppliers and others, employee-related matters and professional and general liability claims.

From time to time, the Company initiates litigation or other legal proceedings as a plaintiff arising out of contracts or other matters. In that regard, the Company had a pending lawsuit in the U.S. Court of Federal Claims against the federal government which was originally filed in May 2011. The lawsuit related to the U.S. Department of Veterans Affairs (VA) underpayment of dialysis services the Company provided from 2005 through 2011 to veterans pursuant to VA regulations. In January 2017, the Company reached a resolution of its claims with the government for $538,000, which the Company expects to recognize in its first quarter 2017 financial statements.

* * *

Other than as described above, the Company cannot predict the ultimate outcomes of the various legal proceedings and regulatory matters to which the Company is or may be subject from time to time, including those described in this Note 17, or the timing of their resolution or the ultimate losses or impact of developments in those matters, which could have a material adverse effect on the Company's revenues, earnings and cash flows. Further, any legal proceedings or regulatory matters involving the Company, whether meritorious or not, are time consuming, and often require management's attention and result in significant legal expense, and may result in the diversion of significant operational resources, or otherwise harm the Company's business or reputation.

18. Noncontrolling interests subject to put provisions and other commitments

Noncontrolling interests subject to put provisions

The Company has potential obligations to purchase the equity interests held by third parties in several of its majority-owned joint ventures and other nonconsolidated entities. These obligations are in the form of put provisions and are exercisable at the third-party owners' discretion within specified periods as outlined in each specific put provision. If these put provisions were exercised, the Company would be required to purchase the third-party owners' equity interests at either the appraised fair market value or a predetermined multiple of earnings or cash flow attributable to the equity interests put to the Company, which is intended to approximate fair value. The methodology the Company uses to estimate the fair values of noncontrolling interests subject to put provisions assumes the higher of either a liquidation value of net assets or an average multiple of earnings, based on historical earnings, patient mix and other performance indicators that can affect future results, as well as other factors. The estimated fair values of the noncontrolling interests subject to put provisions is a critical accounting estimate that involves significant judgments and assumptions and may not be indicative of the actual values at which the noncontrolling interests may ultimately be settled, which could vary significantly from the Company's current estimates. The estimated fair values of noncontrolling interests subject to put provisions can fluctuate and the implicit multiple of earnings at which these noncontrolling interests obligations may be settled will vary significantly depending upon market conditions including potential purchasers' access to the capital markets, which can impact the level of competition for dialysis and non-dialysis related businesses, the economic performance of these businesses and the restricted marketability of the third-party owners' equity interests. The amount of noncontrolling interests subject to put provisions that employ a contractually predetermined multiple of earnings rather than fair value are immaterial.

Additionally, the Company has certain other potential commitments to provide operating capital to several dialysis centers that are wholly-owned by third parties or centers in which the Company owns a noncontrolling equity interest as well as to physician-owned vascular access clinics or medical practices that the Company operates under management and administrative service agreements of approximately $1,500.

Certain consolidated joint ventures are originally contractually scheduled to dissolve after terms ranging from 10 to 50 years. Accordingly, the noncontrolling interests in these joint ventures are considered mandatorily redeemable instruments, for which the classification and measurement requirements have been indefinitely deferred. Future distributions upon dissolution of these entities would be valued below the related noncontrolling interest carrying balances in the consolidated balance sheet.

Other commitments

In January 2017, the Company entered into a six year Sourcing and Supply Agreement with Amgen USA Inc. (Amgen) that expires on December 31, 2022, replacing the Company's prior agreement that was to expire in 2018. Under terms of the agreement,

the Company will purchase EPO in amounts necessary to meet no less than 90% of its requirements for ESAs from Amgen. The actual amount of EPO that the Company will purchase will depend upon the amount of EPO administered during dialysis as prescribed by physicians and the overall number of patients that the Company serves.

In 2010, the Company entered into an agreement with Fresenius Medical Care (FMC) which committed the Company to purchase a certain amount of dialysis equipment, parts and supplies from FMC through 2013. This agreement has been subsequently extended through December 31, 2017. During 2016, 2015 and 2014, the Company purchased $164,766, $154,566 and $154,266, respectively, of certain equipment, parts and supplies from FMC.

In 2014, the Company entered into an agreement with Baxter Healthcare (Baxter) which committed the Company to purchase a certain amount of its hemodialysis non-equipment product supplies, such as dialyzers, at fixed prices through 2018. During 2016, 2015 and 2014, the Company purchased $162,109, $112,931 and $112,645 of hemodialysis product supplies from Baxter under this agreement.

Certain DMG entities are required to maintain minimum cash balances in order to comply with regulatory requirements in conjunction with medical claim reserves. As of December 31, 2016, this minimum cash balance was approximately $60,796.

Other than operating leases disclosed in Note 15 to the consolidated financial statements, the letters of credit disclosed in Note 14 to the consolidated financial statements, and the arrangements as described above, the Company has no off balance sheet financing arrangements as of December 31, 2016.

19. Long-term incentive compensation and shareholders' equity

Long-term incentive compensation

Long-term incentive program (LTIP) compensation includes both stock-based awards (principally stock-settled stock appreciation rights, restricted stock units and performance stock units) as well as long-term performance-based cash awards. Long-term incentive compensation expense, which was primarily general and administrative in nature, was attributed to the Company's U.S. dialysis and related lab services business, DMG business, corporate administrative support, and the ancillary services and strategic initiatives.

The Company's stock-based compensation awards are measured at their estimated fair values on the date of grant if settled in shares or at their estimated fair values at the end of each reporting period if settled in cash. The value of stock-based awards so measured is recognized as compensation expense on a cumulative straight-line basis over the vesting terms of the awards, adjusted for expected forfeitures.

Stock-based compensation to be settled in shares is recorded to the Company's shareholders' equity, while stock-based compensation to be settled in cash is recorded to a liability. Shares issued upon exercise of stock awards have generally been issued from treasury shares.

Long-term incentive compensation plans

The Company's 2011 Incentive Award Plan (the 2011 Plan) is the Company's omnibus equity compensation plan and provides for grants of stock-based awards to employees, directors and other individuals providing services to the Company, except that incentive stock options may only be awarded to employees. The 2011 Plan authorizes the Company to award stock options, stock appreciation rights, restricted stock units, restricted stock, and other stock-based or performance-based awards, and is designed to enable the Company to grant equity and cash awards that qualify as performance-based compensation under Section 162(m) of the Internal Revenue Code. The 2011 Plan mandates a maximum award term of five years and stipulates that stock appreciation rights and stock options be granted with prices not less than fair market value on the date of grant. The 2011 Plan also requires that full value share awards such as restricted stock units reduce shares available under the 2011 Plan at a ratio of 3.5:1. The Company's nonqualified stock appreciation rights and stock units awarded under the 2011 Plan generally vest over 36 to 48 months from the date of grant. At December 31, 2016, there were 7,337,266 stock-settled stock appreciation rights, 785,553 stock-settled stock units, 33,000 cash-settled stock appreciation rights and 1,600 cash-settled stock units outstanding, and 30,543,883 shares available for future grants, under the 2011 Plan.

(dollars in thousands, except per share data)

A combined summary of the status of the Company's stock-settled awards under the 2011 Plan, including base shares for stock-settled stock appreciation rights and stock-settled stock unit awards is as follows:

	Year ended December 31, 2016				
	Stock appreciation rights			Stock units	
	Awards	Weighted average exercise price	Weighted average remaining contractual life	Awards	Weighted average remaining contractual life
Outstanding at beginning of year	8,533,561	$ 59.05		765,060	
Granted	1,280,034	73.40		328,457	
Exercised	(2,031,593)	45.35		(280,197)	
Cancelled	(444,736)	66.50		(27,767)	
Outstanding at end of period	7,337,266	$ 64.90	2.2	785,553	1.9
Exercisable at end of period	3,026,721	$ 56.83	1.1	—	—
Weighted-average fair value of grants in 2016	$ 13.74			$ 70.99	
Weighted-average fair value of grants in 2015	$ 17.97			$ 80.25	
Weighted-average fair value of grants in 2014	$ 16.41			$ 72.24	

Range of SSAR base prices	Awards outstanding	Weighted average exercise price	Awards exercisable	Weighted average exercise price
$30.01–$40.00	16,000	39.89	16,000	39.89
$40.01–$50.00	267,621	44.44	267,621	44.44
$50.01–$60.00	3,489,398	57.53	2,420,035	56.84
$60.01–$70.00	1,306,049	67.46	232,816	65.04
$70.01–$80.00	1,581,487	74.76	50,806	70.44
$80.01–$90.00	676,711	83.60	39,443	81.51
Total	7,337,266	$ 64.90	3,026,721	$ 56.83

The Company granted 9,600 cash-settled stock-based awards during 2016. Liability-classified awards contributed $376, $(236) and $1,774 to stock-based compensation expense for the years ended December 31, 2016, 2015 and 2014, respectively. As of December 31, 2016 the Company had 34,600 liability-classified stock-based awards outstanding, 5,000 of which were vested, and a total stock-based compensation liability balance of $124.

For the years ended December 31, 2016, 2015, and 2014, the aggregate intrinsic value of stock-based awards exercised was $73,001, $116,933 and $151,342, respectively. At December 31, 2016, the aggregate intrinsic value of stock awards outstanding was $79,717 and the aggregate intrinsic value of stock awards exercisable was $23,566.

Estimated fair value of stock-based compensation awards

The Company has estimated the grant-date fair value of stock-settled stock appreciation rights awards using the Black-Scholes-Merton valuation model and stock-settled stock unit awards at intrinsic value on the date of grant, except for portions of the Company's performance stock unit awards for which a Monte Carlo simulation was used to estimate the grant-date fair value. The following assumptions were used in estimating these values and determining the related stock-based compensation attributable to the current period:

Expected term of the awards: The expected term of awards granted represents the period of time that they are expected to remain outstanding from the date of grant. The Company determines the expected term of its stock awards based on its historical experience with similar awards, considering the Company's historical exercise and post-vesting termination patterns, and the terms expected by peer companies in near industries.

Expected volatility: Expected volatility represents the volatility anticipated over the expected term of the award. The Company determines the expected volatility for its awards based on the volatility of the price of its common stock over the most recent

(dollars in thousands, except per share data)

retrospective period commensurate with the expected term of the award, considering the volatility expectations implied by the market price of its exchange-traded options and the volatilities expected by peer companies in near industries.

Expected dividend yield: The Company has not paid dividends on its common stock and does not currently expect to pay dividends during the term of stock awards granted.

Risk-free interest rate: The Company bases the expected risk-free interest rate on the implied yield currently available on stripped interest coupons of U.S. Treasury issues with a remaining term equivalent to the expected term of the award.

A summary of the weighted average valuation inputs described above used for estimating the grant-date fair value of stock-settled stock appreciation rights awards granted in the periods indicated is as follows:

	Year ended December 31,		
	2016	2015	2014
Expected term	4.2 years	4.1 years	4.2 years
Expected volatility	21.0%	24.6%	25.8%
Expected dividend yield	0.0%	0.0%	0.0%
Risk-free interest rate	1.0%	1.5%	1.5%

The Company estimates expected forfeitures based upon historical experience with separate groups of employees that have exhibited similar forfeiture behavior in the past. Stock-based compensation expense is recorded only for awards that are expected to vest.

Employee stock purchase plan

The Employee Stock Purchase Plan entitles qualifying employees to purchase up to $25 of the Company's common stock during each calendar year. The amounts used to purchase stock are accumulated through payroll withholdings or through optional lump sum payments made in advance of the first day of the purchase right period. This compensatory plan allows employees to purchase stock for the lesser of 100% of the fair market value on the first day of the purchase right period or 85% of the fair market value on the last day of the purchase right period. Purchase right periods begin on January 1 and July 1, and end on December 31. Contributions used to purchase the Company's common stock under this plan for the 2016, 2015 and 2014 participation periods were $23,902, $24,523 and $19,010, respectively. Shares purchased pursuant to the plan's 2016, 2015 and 2014 participation periods were 438,002, 413,859 and 297,954, respectively. At December 31, 2016, there were 7,484,395 shares remaining available for future grants under this plan, which includes an additional 7,500,000 shares approved by stockholders on June 20, 2016.

The fair value of employees' purchase rights was estimated as of the beginning dates of the purchase right periods using the Black-Scholes-Merton valuation model with the following weighted average assumptions for purchase right periods in 2016, 2015 and 2014, respectively: expected volatility of 22%, 26% and 27%; risk-free interest rate of 0.8%, 0.2% and 0.2%, and no dividends. Using these assumptions, the weighted average estimated fair value of these purchase rights was $16.73, $18.76 and $16.40 for 2016, 2015 and 2014, respectively.

Long-term incentive compensation expense and proceeds

For the years ended December 31, 2016, 2015 and 2014, the Company recognized $73,337, $130,682 and $118,970, respectively, in total long-term incentive program (LTIP) expense, of which $38,338, $56,664 and $56,743, respectively, was stock-based compensation expense for stock appreciation rights, stock units and discounted employee stock plan purchases, which are primarily included in general and administrative expenses. The estimated tax benefits recorded for stock-based compensation in 2016, 2015 and 2014 were $12,731, $19,689 and $20,351, respectively. As of December 31, 2016, there was $92,987 total estimated unrecognized compensation cost for outstanding LTIP awards, including $59,016 related to stock-based compensation arrangements under the Company's equity compensation and stock purchase plans. The Company expects to recognize the performance-based cash component of these LTIP costs over a weighted average remaining period of 1.0 year and the stock-based component of these LTIP costs over a weighted average remaining period of 1.4 years.

For the years ended December 31, 2016, 2015 and 2014, the Company received $28,397, $45,749 and $59,119, respectively, in actual tax benefits upon the exercise of stock awards. Since the Company issues stock-settled stock appreciation rights rather than stock options, it does not receive cash proceeds from stock option exercises.

(dollars in thousands, except per share data)

Stock repurchases

During the years ended December 31, 2016 and 2015, the Company repurchased a total of 16,649,090 shares and 7,779,958 shares of its common stock for $1,072,377 and $575,380, or an average price of $64.41 and $73.96 per share, respectively, pursuant to previously announced authorizations by the Board of Directors. The Company has not repurchased any additional shares of its common stock from January 1, 2017 through February 24, 2017.

On July 13, 2016, the Company's Board of Directors approved a share repurchase authorization in the amount of $1,240,748. This share repurchase authorization is in addition to the $259,252 remaining at that time under the Company's Board of Directors' prior share repurchase authorization announced in April 2015. As of December 31, 2016, there was $677,104 available under the current Board authorizations for additional share repurchases. Although these share repurchase authorizations have no expiration dates, the Company remains subject to share repurchase limitations under the terms of its senior secured credit facilities and the indentures governing its Senior Notes.

Charter documents & Delaware law

The Company's charter documents include provisions that may deter hostile takeovers, delay or prevent changes of control or changes in management, or limit the ability of stockholders to approve transactions that they may otherwise determine to be in their best interests. These include provisions prohibiting stockholders from acting by written consent, requiring 90 days advance notice of stockholder proposals or nominations to the Board of Directors and granting the Board of Directors the authority to issue up to five million shares of preferred stock and to determine the rights and preferences of the preferred stock without the need for further stockholder approval.

The Company is also subject to Section 203 of the Delaware General Corporation Law which, subject to exceptions, would prohibit the Company from engaging in any business combinations with any interested stockholder, as defined in that section, for a period of three years following the date on which that stockholder became an interested stockholder. These restrictions may discourage, delay or prevent a change in the control of the Company.

Changes in DaVita Inc.'s ownership interest in consolidated subsidiaries

The effects of changes in DaVita Inc.'s ownership interest on the Company's equity are as follows:

	Year ended December 31,		
	2016	2015	2014
Net income attributable to DaVita Inc.	$ 879,874	$ 269,732	$ 723,114
Increase in paid-in capital for sales of noncontrolling interest	—	—	355
Decrease in paid-in capital for the purchase of noncontrolling interests	(13,105)	(55,826)	(5,357)
Net transfer to noncontrolling interests	(13,105)	(55,826)	(5,002)
Change from net income attributable to DaVita Inc. and transfers to noncontrolling interests	$ 866,769	$ 213,906	$ 718,112

The Company acquired additional ownership interests in several existing majority-owned joint ventures for $21,512 in 2016 and $66,382 in 2015 in cash, and $17,876 in cash and deferred purchase price of $136 in 2014.

(dollars in thousands, except per share data)

20. Other comprehensive (loss) income

Charges and credits to other comprehensive (loss) income have been as follows:

	Interest rate swap and cap agreements	Investment securities	Foreign currency translation adjustments	Accumulated other comprehensive income (loss)
Balance at December 31, 2013	$ (2,344)	$ 3,120	$ (3,421)	$ (2,645)
Unrealized (losses) gains	(16,509)	425	(22,952)	(39,036)
Related income tax	6,450	(187)	—	6,263
	(10,059)	238	(22,952)	(32,773)
Reclassification from accumulated other comprehensive losses (income) into net income	17,409	(340)	—	17,069
Related income tax	(6,801)	133	—	(6,668)
	10,608	(207)	—	10,401
Balance at December 31, 2014	$ (1,795)	$ 3,151	$ (26,373)	$ (25,017)
Unrealized losses	(20,085)	(1,974)	(23,889)	(45,948)
Related income tax	7,844	561	—	8,405
	(12,241)	(1,413)	(23,889)	(37,543)
Reclassification from accumulated other comprehensive losses (income) into net income	5,103	(618)	—	4,485
Related income tax	(1,992)	241	—	(1,751)
	3,111	(377)	—	2,734
Balance at December 31, 2015	$ (10,925)	$ 1,361	$ (50,262)	$ (59,826)
Unrealized (losses) gains	(6,013)	1,802	(39,614)	(43,825)
Related income tax	2,343	(565)	—	1,778
	(3,670)	1,237	(39,614)	(42,047)
Reclassification from accumulated other comprehensive losses (income) into net income	4,198	(690)	10,087	13,595
Related income tax	(1,632)	267	—	(1,365)
	2,566	(423)	10,087	12,230
Balance at December 31, 2016	$ (12,029)	$ 2,175	$ (79,789)	$ (89,643)

The reclassification of net swap and cap realized losses into income are recorded as debt expense in the corresponding consolidated statements of income. See Note 14 to these consolidated financial statements for further details.

The reclassification of net investment realized gains into income are recorded in other income in the corresponding consolidated statements of income. See Note 9 to these consolidated financial statements for further details.

21. Acquisitions and divestitures

Change in ownership interests in Asia Pacific joint venture

On August 1, 2016, the Company consummated an agreement with Khazanah Nasional Berhad (Khazanah) and Mitsui and Co., Ltd (Mitsui) whereby Khazanah and Mitsui subscribed to invest a total of $300,000 over three years in exchange for a 40% total equity interest in the Company's APAC JV. Khazanah and Mitsui each made related initial investments of $50,000 in this business on August 1, 2016.

Based on the governance structure and voting rights put in place upon the formation of the APAC JV, certain key decisions affecting the JV's operations are no longer at the unilateral discretion of the Company, but rather are shared with the noncontrolling investors. As a result, the Company deconsolidated its Asia Pacific dialysis business in the third quarter and recognized a non-cash non-taxable gain of $374,374 on its retained investment, net of contingent obligations. This retained interest was adjusted to the Company's proportionate share of the estimated fair value of the business, as implied by the Khazanah and

(dollars in thousands, except per share data)

Mitsui investment and adjusted for certain time value of money and uncertainty discounts. Subsequent to the deconsolidation, the Company's retained interest in the APAC JV is accounted for under the equity method.

The calculation of the Company's non-cash gain on its retained investment in the APAC JV is based upon the best information available to management and will be finalized when certain information arranged to be obtained has been received, including issuance of the final valuation report by an independent third party and certain post-closing adjustments subject to audit of the APAC JV's financial statements.

Sales of Tandigm Health and DMG Arizona ownership interests

Effective June 30, 2016, the Company sold a portion of DMG's ownership interest in the Tandigm Health (Tandigm) joint venture, reducing its ownership from fifty percent to nineteen percent and resulting in a gain of $40,280. In addition, on June 1, 2016, the Company sold its DMG Arizona business, resulting in a loss of $10,489.

Acquisition of TEC

On March 1, 2016, the Company completed its acquisition of The Everett Clinic (TEC) pursuant to an agreement and plan of merger dated November 23, 2015, whereby TEC became a 100% consolidated subsidiary of DMG. TEC has 500 providers in primary and specialty care locations throughout Snohomish County, Washington who care for more than 315,000 patients. The total consideration paid at closing for all outstanding common units of TEC was approximately $393,687, net of cash acquired, plus the assumption of certain liabilities totaling approximately $7,284.

The initial purchase price allocation for the acquisition of TEC is recorded at estimated fair values based upon the best information available to management and will be finalized when certain information arranged to be obtained has been received. The fair values of property and equipment and intangible assets were valued by an independent third party and are pending issuance of the final valuation report. Certain income tax amounts are pending issuance of final tax returns.

The following table summarizes the assets acquired and liabilities assumed in this transaction and recognized at the acquisition date at their estimated fair values:

Current assets, net of cash acquired	$	91,591
Property and equipment		108,533
Covenant not-to-compete		3,200
Amortizable intangible and other long-term assets		30,850
Goodwill		244,502
Liabilities assumed		(50,940)
Long-term deferred income taxes		(16,880)
Noncontrolling interests		(9,885)
	$	400,971

Amortizable intangible assets acquired in this acquisition have a weighted average estimated useful life of six years. None of the goodwill recognized in this acquisition is expected to be deductible for tax purposes.

The noncontrolling interests assumed as part of the acquisition are stated at estimated fair value based on the estimated fair value of the underlying assets and liabilities of each non-wholly-owned entity.

The operating results of TEC are included in the Company's consolidated financial statements from March 1, 2016.

Other routine acquisitions

During 2016, the Company acquired eight dialysis centers in the U.S., 21 dialysis centers outside the U.S., and other medical businesses for a total of $170,169 in net cash, earn-outs of $1,511, and deferred purchase price and liabilities assumed of $18,373. During 2015, the Company acquired dialysis-related and other ancillary businesses consisting of six dialysis centers in the U.S., 21 dialysis centers outside the U.S., three vascular access centers, and other medical businesses for a total of $96,469 in net cash and deferred purchase price and earn-outs of $8,395. During 2014, the Company acquired dialysis-related and other ancillary businesses consisting of 18 dialysis centers in the U.S., seven dialysis centers outside the U.S. and other medical businesses for a total of $272,094 in net cash and deferred purchase price of $23,781. The assets and liabilities for all acquisitions were recorded at their

(dollars in thousands, except per share data)

estimated fair values at the dates of the acquisitions and are included in the Company's financial statements and operating results from the effective dates of the acquisitions. For several of the 2016 acquisitions, certain income tax amounts are pending final evaluation and quantification of any pre-acquisition tax contingencies. In addition, valuation of medical claims liabilities and certain other working capital items relating to several of these acquisitions are pending final quantification.

The following table summarizes the assets acquired and liabilities assumed in the above described transactions and recognized at their acquisition dates at estimated fair values, as well as the estimated fair value of the noncontrolling interests assumed in these transactions:

	Year ended December 31,		
	2016	2015	2014
Current assets	$ 3,996	$ 3,843	$ 915
Property and equipment	9,407	12,436	5,999
Customer relationships	—	—	74,515
Non-compete agreements	5,395	8,959	16,585
Amortizable intangible and other long-term assets	986	4,345	4,193
Goodwill	203,326	97,093	221,514
Long-term deferred income taxes	597	(1,467)	—
Noncontrolling interests assumed	(30,337)	(18,905)	(25,963)
Liabilities assumed	(3,317)	(1,440)	(1,883)
Aggregate purchase cost	$ 190,053	$ 104,864	$ 295,875

Amortizable intangible assets acquired during 2016, 2015 and 2014 had weighted-average estimated useful lives of seven, eight and ten years, respectively. The majority of the intangible assets acquired relate to non-compete agreements and customer relationships. The weighted-average amortization period for customer relationships was ten years for 2014. The weighted-average amortization period for non-compete agreements was seven years for 2016, and eight years for both 2015 and 2014. The total amount of goodwill deductible for tax purposes associated with these acquisitions for 2016, 2015, and 2014 was approximately $173,718, $73,733 and $175,247, respectively.

Other pending transactions

On August 9, 2016, the Company entered into an amendment to its agreement to acquire Colorado-based Renal Ventures Limited, LLC (Renal Ventures). As a result of the amended agreement, the Company will acquire a 100 percent interest in all 38 outpatient dialysis centers owned by Renal Ventures, including one new center under construction, and a fifty-one percent interest in one vascular access clinic. The purchase price will be approximately $360,000 in cash, subject to, among other things, adjustments for certain items such as working capital. The transaction is subject to approval by the Federal Trade Commission (FTC), including Hart-Scott-Rodino antitrust clearance. The Company anticipates that it will be required by the FTC to divest some outpatient dialysis centers as a condition of the transaction. The Company expects the transaction to close in mid 2017.

Pro forma financial information (unaudited)

The following summary, prepared on a pro forma basis, combines the results of operations as if all acquisitions in 2016 and 2015 had been consummated as of the beginning of 2015, including the impact of certain adjustments such as amortization of intangibles, interest expense on acquisition financing and income tax effects.

	Year ended December 31,	
	2016	2015
	(unaudited)	
Pro forma net revenues	$ 14,875,592	$ 14,342,138
Pro forma net income attributable to DaVita Inc.	884,284	280,124
Pro forma basic net income per share attributable to DaVita Inc.	4.39	1.32
Pro forma diluted net income per share attributable to DaVita Inc.	4.32	1.30

(dollars in thousands, except per share data)

Contingent earn-out obligations

The Company has several contingent earn-out obligations associated with acquisitions that could result in the Company paying the former shareholders of acquired companies a total of up to approximately $19,557 if certain EBITDA, operating income performance targets or quality margins are met over the next one to eight years.

Contingent earn-out obligations are remeasured to fair value at each reporting date until the contingencies are resolved with changes in the liability due to the remeasurement recorded in earnings. See Note 24 to these consolidated financial statements for further details. As of December 31, 2016, the Company has estimated the fair value of these contingent earn-out obligations to be $9,977, of which a total of $7,217 is included in other liabilities and the remaining $2,760 is included in other long-term liabilities in the Company's consolidated balance sheet.

The following is a reconciliation of changes in the contingent earn-out obligations for the year ended December 31, 2016:

Beginning balance January 1, 2016	$	34,135
Contingent earn-out obligations associated with acquisitions		1,511
Remeasurement of fair value		(4,132)
Payments of contingent earn-out obligations		(21,537)
	$	9,977

22. Variable interest entities

The Company relies on the operating activities of certain entities that it does not directly own or control, but over which it has indirect influence and of which it is considered the primary beneficiary. These entities are subject to the consolidation guidance applicable to variable interest entities (VIEs).

Under U.S. GAAP, VIEs typically include entities for which (i) the entity's equity is not sufficient to finance its activities without additional subordinated financial support; (ii) the equity holders as a group lack the power to direct the activities that most significantly influence the entity's economic performance, the obligation to absorb the entity's expected losses, or the right to receive the entity's expected returns; or (iii) the voting rights of some investors are not proportional to their obligations to absorb the entity's losses.

The Company has determined that substantially all of the entities it is associated with that qualify as VIEs must be included in its consolidated financial statements. The Company manages these entities and provides operating and capital funding as necessary for the entities to accomplish their operational and strategic objectives. A number of these entities are subject to nominee share ownership or share transfer restriction agreements that effectively transfer the majority of the economic risks and rewards of their ownership to the Company. In other cases the Company's management agreements with these entities include both financial terms and protective and participating rights to the entities' operating, strategic and non-clinical governance decisions which transfer substantial powers over and economic responsibility for the entities to the Company. In some cases such entities are subject to broad exclusivity or noncompetition restrictions that benefit the Company. Further, in some cases the Company has contractual arrangements with its related party nominee owners that effectively indemnify these parties from the economic losses from, or entitle the Company to the economic benefits of, these entities.

The analyses upon which these consolidation determinations rest are complex, involve uncertainties, and require significant judgment on various matters, some of which could be subject to different interpretations. At December 31, 2016, these consolidated financial statements include total assets of VIEs of $747,574 and total liabilities and noncontrolling interests of VIEs to third parties of $425,034.

The Company also sponsors certain deferred compensation plans whose trusts qualify as VIEs and the Company consolidates each of these plans as their primary beneficiary. The assets of these plans are recorded in short-term or long-term investments with related liabilities recorded in accrued compensation and benefits and other long-term liabilities. See Note 16 to these consolidated financial statements for disclosures on the assets of these consolidated non-qualified deferred compensation plans.

(dollars in thousands, except per share data)

23. Concentrations

Approximately 64%, 66% and 67% of total U.S. dialysis services revenues in 2016, 2015 and 2014, respectively, are from government-based programs, principally Medicare and Medicaid. Related net accounts receivable and other receivables from Medicare, including Medicare-assigned plans, and Medicaid, including Medicaid-assigned plans, were approximately $831,445 and $830,060, as of December 31, 2016 and 2015, respectively.

Approximately 72%, 70% and 71% of DMG's revenues in 2016, 2015 and 2014, respectively, are from government-based programs, principally Medicare and Medicaid. Approximately 63%, 61% and 64% for 2016, 2015 and 2014, respectively, of DMG's capitated medical revenues are associated with three health plans. In addition, approximately $289,798 and $231,278 at December 31, 2016 and 2015, respectively, of DMG's capitated accounts receivables are associated with three health plans.

One commercial payor, Humana, accounted for approximately 11% of total consolidated net revenues.

There is no single commercial payor that accounted for more than 10% of total consolidated accounts receivable at December 31, 2016 and 2015.

24. Fair values of financial instruments

The Company measures the fair value of certain assets, liabilities and noncontrolling interests subject to put provisions (temporary equity) based upon certain valuation techniques that include observable or unobservable inputs and assumptions that market participants would use in pricing these assets, liabilities, temporary equity and commitments. The Company has also classified certain assets, liabilities and temporary equity that are measured at fair value into the appropriate fair value hierarchy levels as defined by FASB.

The following tables summarize the Company's assets, liabilities and temporary equity measured at fair value on a recurring basis as of December 31, 2016 and 2015:

	Total	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
December 31, 2016				
Assets				
Available for sale securities	$ 47,404	$ 47,404	$ —	$ —
Cash surrender value of life insurance policies	$ 59,646	$ —	$ 59,646	$ —
Interest rate cap agreements	$ 9,929	$ —	$ 9,929	$ —
Funds on deposit with third parties	$ 75,877	$ 75,877	$ —	$ —
Liabilities				
Contingent earn-out obligations	$ 9,977	$ —	$ —	$ 9,977
Temporary equity				
Noncontrolling interests subject to put provisions	$ 973,258	$ —	$ —	$ 973,258
December 31, 2015				
Assets				
Available for sale securities	$ 33,482	$ 33,482	$ —	$ —
Cash surrender value of life insurance policies	$ 56,840	$ —	$ 56,840	$ —
Interest rate cap agreements	$ 15,127	$ —	$ 15,127	$ —
Interest rate swap agreements	$ 516	$ —	$ 516	$ —
Funds on deposit with third parties	$ 82,679	$ 82,679	$ —	$ —
Liabilities				
Contingent earn-out obligations	$ 34,135	$ —	$ —	$ 34,135
Temporary equity				
Noncontrolling interests subject to put provisions	$ 864,066	$ —	$ —	$ 864,066

Available for sale securities represent investments in various open-ended registered investment companies, or mutual funds, and are recorded at fair value estimated based upon quoted prices reported by each mutual fund. See Note 9 to these consolidated financial statements for further discussion.

Investments in life insurance policies are carried at their cash surrender value which approximates their fair value. See Note 16 to these consolidated financial statements for further discussion.

The interest rate swap and cap agreements are recorded at fair value based upon valuation models utilizing the income approach and commonly accepted valuation techniques that use inputs from closing prices for similar assets and liabilities in active markets as well as other relevant observable market inputs at quoted intervals such as current interest rates, forward yield curves, implied volatility and credit default swap pricing. The Company does not believe the ultimate amount that could be realized upon settlement of these interest rate swap and cap agreements would be materially different from the fair values currently reported. See Note 14 to these consolidated financial statements for further discussion.

The funds on deposit with third parties represent funds held with various third parties as required by regulation or contract and invested by those parties in various investments, which are measured at estimated fair value based primarily on quoted market prices.

The estimated fair value measurements of contingent earn-out obligations are primarily based on unobservable inputs including projected EBITDA, estimated probabilities of achieving gross margin of certain medical procedures and the estimated probability of earn-out payments being made using an option pricing technique and a simulation model for expected EBITDA and operating income. In addition, a probability adjusted model was used to estimate the fair values of the quality measures involved. The estimated fair value of these contingent earn-out obligations will be remeasured as of each reporting date and could fluctuate based upon any significant changes in key assumptions, such as changes in the Company credit risk adjusted rate that is used to discount obligations to present value.

See Note 18 to these consolidated financial statements for a discussion of the Company's methodology for estimating the fair value of noncontrolling interests subject to put obligations.

Other financial instruments consist primarily of cash, accounts receivable, accounts payable, other accrued liabilities and debt. The balances of the non-debt financial instruments are presented in the consolidated financial statements at December 31, 2016 and 2015 at their approximate fair values due to the short-term nature of their settlements. The carrying balance of the Company's senior secured credit facilities totaled $4,217,348 as of December 31, 2016, and the fair value was approximately $4,336,969 based upon quoted market prices. The fair value of the Company's Senior Notes was approximately $4,530,875 at December 31, 2016 based upon quoted market prices, as compared to the carrying amount of $4,500,000.

25. Segment reporting

The Company operates two major divisions, DaVita Kidney Care (Kidney Care) and DaVita Medical Group (DMG). The Kidney Care division is comprised of the Company's U.S. dialysis and related lab services business, various ancillary services and strategic initiatives, including its international operations, and the Company's corporate administrative support. The Company's U.S. dialysis and related lab services business is its largest line of business, and is a leading provider of kidney dialysis services in the U.S. for patients suffering from chronic kidney failure, also known as ESRD. The Company's DMG division is a patient- and physician-focused integrated healthcare delivery and management company with over two decades of providing coordinated outcomes-based medical care in a cost-effective manner.

The Company's ancillary services and strategic initiatives consist primarily of pharmacy services, disease management services, vascular access services, clinical research programs, physician services, direct primary care and the Company's international operations.

The Company's operating segments have been defined based on the separate financial information that is regularly produced and reviewed by the Company's chief operating decision maker in making decisions about allocating resources to and assessing the financial performance of the Company's various operating lines of business. The chief operating decision maker for the Company is its Chief Executive Officer.

The Company's separate operating segments include its U.S. dialysis and related lab services business, its DMG operations in each region, each of its ancillary services and strategic initiatives, and its consolidated international kidney care and other health operations in the European and Middle Eastern, Latin American, and Asian Pacific markets, and under the Saudi Ministry of Health charter. The U.S. dialysis and related lab services business and the DMG business each qualify as separately reportable segments, and

all other ancillary services and strategic initiatives operating segments, including the international operating segments, have been combined and disclosed in the other segments category.

The Company's operating segment financial information included in this report is prepared on the internal management reporting basis that the chief operating decision maker uses to allocate resources and assess the financial performance of the operating segments. For internal management reporting, segment operations include direct segment operating expenses but exclude corporate administrative support costs, which consist primarily of indirect labor, benefits and long-term incentive-based compensation of certain departments which provide support to all of the Company's various operating lines of business. These corporate administrative support costs are reduced by internal management fees received from the Company's ancillary lines of business and were increased by the reduction of a tax asset associated with the DMG acquisition escrow provisions.

(dollars in thousands, except per share data)

The following is a summary of segment revenues, segment operating margin (loss), and a reconciliation of segment operating margin to consolidated income from continuing operations before income taxes:

	Year ended December 31,		
	2016	2015	2014
Segment revenues:			
U.S. dialysis and related lab services			
Patient service revenues:			
External sources	$ 9,482,648	$ 8,980,515	$ 8,513,089
Intersegment revenues	68,774	53,476	37,112
Total dialysis and related lab services revenues	9,551,422	9,033,991	8,550,201
Less: Provision for uncollectible accounts	(429,882)	(406,530)	(353,028)
Net dialysis and related lab services patient service revenues	9,121,540	8,627,461	8,197,173
Other revenues(1)	16,649	13,971	13,498
Total net dialysis and related lab services revenues	9,138,189	8,641,432	8,210,671
DMG			
DMG revenues:			
Capitated revenues	$ 3,430,576	$ 3,436,705	$ 3,190,903
Net patient service revenues	621,583	317,950	219,306
Other revenues(2)	61,040	82,470	91,374
Intersegment capitated and other revenues	215	136	716
Total revenues	$ 4,113,414	$ 3,837,261	$ 3,502,299
Other - Ancillary services and strategic initiatives			
Net patient service revenues	$ 228,459	$ 160,484	$ 122,087
Capitated revenues	88,103	72,390	70,385
Other external sources	1,245,929	1,123,882	927,492
Intersegment revenues	58,881	25,674	19,535
Total ancillary services and strategic initiatives revenues	1,621,372	1,382,430	1,139,499
Total net segment revenues	14,872,975	13,861,123	12,852,469
Elimination of intersegment revenues	(127,870)	(79,286)	(57,363)
Consolidated net revenues	$ 14,745,105	$ 13,781,837	$ 12,795,106
Segment operating margin (loss):			
U.S. dialysis and related lab services	$ 1,777,014	$ 1,259,632	$ 1,637,626
DMG	(104,233)	33,929	214,983
Other—Ancillary services and strategic initiatives	266,323	(103,901)	(24,456)
Total segment margin	1,939,104	1,189,660	1,828,153
Reconciliation of segment operating margin to consolidated income from continuing operations before income taxes:			
Corporate administrative support(3)	(44,561)	(18,965)	(13,012)
Consolidated operating income	1,894,543	1,170,695	1,815,141
Debt expense	(414,382)	(408,380)	(410,294)
Debt refinancing and redemption charges	—	(48,072)	(97,548)
Other income	8,734	8,893	2,374
Consolidated income from continuing operations before income taxes	$ 1,488,895	$ 723,136	$ 1,309,673

(1) Includes management fees for providing management and administrative services to dialysis centers in which the Company owns a noncontrolling interest or which are wholly-owned by third parties.
(2) Includes medical consulting service fees and management fees for providing management and administrative services to unconsolidated joint ventures, as well as revenue related to the maintenance of existing physician networks.
(3) Corporate administrative support costs in 2016 also include $30,934 of an adjustment to reduce a tax asset associated with the DMG acquisition escrow provisions.

(dollars in thousands, except per share data)

Depreciation and amortization expense by segment is as follows:

	December 31,		
	2016	2015	2014
U.S. dialysis and related lab services	$ 482,768	$ 438,238	$ 402,767
DMG	210,755	174,118	169,485
Other - Ancillary services and strategic initiatives	26,729	25,668	18,683
	$ 720,252	$ 638,024	$ 590,935

Summary of assets by segment is as follows:

	December 31,	
	2016	2015
Segment assets		
U.S. dialysis and related lab services (including equity investments of $66,924 and $29,801, respectively)	$ 11,438,100	$ 11,591,507
DMG (including equity investments of $10,350 and $22,714, respectively)	6,213,091	6,150,666
Other - Ancillary services and strategic initiatives(1) (including equity investments of $425,115 and $20,853, respectively)	1,090,066	772,702
Consolidated assets	$ 18,741,257	$ 18,514,875

(1) Includes approximately $96,396 and $ 69,519 in 2016 and 2015, respectively, of net property and equipment related to the Company's international operations.

Expenditures for property and equipment by segment is as follows:

	December 31,		
	2016	2015	2014
U.S. dialysis and related lab services	$ 675,994	$ 584,513	$ 560,610
DMG	84,399	66,800	27,885

28. Consolidating financial statements

The following information is presented in accordance with Rule 3-10 of Regulation S-X. The operating and investing activities of the separate legal entities included in the Company's consolidated financial statements are fully interdependent and integrated. Revenues and operating expenses of the separate legal entities include intercompany charges for management and other services. The Company's Senior Notes are guaranteed by substantially all of its domestic subsidiaries. Each of the guarantor subsidiaries has guaranteed the Senior Notes on a joint and several basis. However, the guarantor subsidiaries can be released from their obligations in the event of a sale or other disposition of all or substantially all of the assets of such subsidiary, including by merger or consolidation or the sale of all equity interests in such subsidiary owned by the Company, if such subsidiary guarantor is designated as an unrestricted subsidiary or otherwise ceases to be a restricted subsidiary, and if such subsidiary guarantor no longer guaranties any other indebtedness of the Company. Certain domestic subsidiaries, foreign subsidiaries, joint ventures, partnerships and third parties are not guarantors of the Senior Notes.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders
DaVita Inc.:

Under date of February 24, 2017, we reported on the consolidated balance sheets of DaVita Inc. and subsidiaries as of December 31, 2016 and 2015, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the years in the three-year period ended December 31, 2016, which are included in the Annual Report on Form 10-K. In connection with our audits of the aforementioned consolidated financial statements, we also audited the related Schedule II – Valuation and Qualifying Accounts included in the Annual Report on Form 10-K. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement schedule based on our audits.

In our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

Exhibit 10.5

SEPARATION AGREEMENT AND RELEASE

This Separation Agreement and Release ("Agreement") is made and entered into by and between DaVita Healthcare Partners Inc. and/or any of its parents, subsidiaries, successors and assigns (collectively "DaVita" or the "Company") and Dennis Kogod ("Kogod").

WHEREAS, DaVita and Kogod wish to provide for the termination of their employment relationship, all roles in which Kogod serves as an officer, board member or other non-employment role with DaVita (the "Non-Employment Roles"), and all agreements (including the October 31, 2005 Employment Agreement and any amendments thereto) except as otherwise noted herein, that exist and may have existed between them, and fully and finally resolve any and all matters arising out of Kogod's employment by DaVita or the termination of his employment, without any admission of any kind by either party; and

WHEREAS, the parties wish to document their understanding and agreement with respect to the terms of Kogod's separation from employment with DaVita.

NOW, THEREFORE, in consideration of the provisions and agreements set forth hereinafter, and for good and valuable consideration, the sufficiency of which is acknowledged by both parties, the parties agree as follows:

1. Employment Termination. DaVita will eliminate Kogod's position, CEO of DaVita International, as part of a reorganization of the Company effective November 30, 2016. The Company will continue to employ Kogod as CEO of DaVita International until November 30, 2016 (the "Termination Date"). Until the Termination Date, Kogod's job duties and responsibilities, pay, and entitlement to health and welfare benefits shall remain the same as of the date of his execution of this Agreement. However, during this time, Kogod may not bind the Company or DaVita International to any contract or make any representation or commitment on behalf of the Company or DaVita International that would tend to bind the Company or DaVita International without prior written authorization from the Chief Executive Officer of DaVita. In addition, during this time if requested to do so by the Company, Kogod will submit his written and signed resignation from any Non-Employment Roles or, in lieu thereof, the Company may remove Kogod from all such roles at any time(s) prior to the Termination Date. Prior to the date of any such resignation or removal from the Non-Employment Roles, Kogod shall cooperate with the Company to take such action as might be necessary to complete any pending or essential matters that need to be accomplished prior to the Termination Date and/or to provide for a smooth transition out of the Non-Employment Roles. The parties will announce the termination of Kogod's employment consistent with applicable regulations.

2. Consulting. Kogod agrees to provide consulting services to DaVita from the termination of his employment until November 30, 2019. The terms of Kogod's provision of consulting services to DaVita are outlined in the Consulting Agreement attached hereto as Exhibit A. Notwithstanding anything to the contrary in this Agreement, the Consulting Agreement or any other writing of any kind whatsoever, upon Kogod's commencement of the consulting services under the Consulting Agreement, those services will not be deemed to be a simultaneous commencement of or remaining in service with the Company by Kogod for

purposes of the definition of "Termination of Services" under Section 2.53 of the 2011 DaVita HealthCare Partners Inc. Incentive Award Plan, as amended and restated on June 17, 2014 (the "Plan"). Without limiting the generality of the foregoing, and for the avoidance of doubt, any rights that Kogod might have under any equity-based or cash-based awards made to Kogod by the Company pursuant to the Plan prior to the Termination Date, including without limitation, to exercise any such award (other than awards that have vested prior to the Termination Date) or to continue to have such awards vest or to otherwise derive value of any kind therefrom, will cease as of the Termination Date, and any unvested portions thereof shall be forfeited. Any exercise of any vested but unexercised awards under the Plan are subject to pre-clearance by the Chief Legal Officer of the Company and the other usual requirements under the Company's Insider Trading Policy, and must occur no later than 90 days after the Termination Date, provided that no exercises may occur during the Company's regular third quarter trading blackout that begins at the close of the New York Stock Exchange on September 23, 2016 and is expected to end in or about the first week of November, unless prior to the beginning of such trading blackout Kogod establishes a 10b5-1 trading plan that complies with the DaVita Insider Trading Policy with respect to any desired exercise of any award during the blackout period, and provided further that any exercise dates under such trading plan during the trading blackout or after must occur no later than 90 days after the Termination Date.

3. Consideration. In consideration for Kogod's execution and non-revocation of this Agreement and the promises and covenants contained herein, DaVita shall pay Kogod a lump sum of One Million Five Hundred Thousand Dollars ($1,500,000) (less standard federal and state withholdings and authorized deductions), to be reported on an IRS Form W-2, within 10 business days of Kogod's execution of this Agreement, provided he does not revoke the Agreement as set forth in paragraph 12.

4. Return of Company Property. Kogod agrees to return all of DaVita's proprietary or confidential information, emails, documents, and property, including but not limited to cellular phones, credit cards, calling cards, keys, computers, employment badges and any company-provided hardware and software to DaVita on or before the Termination Date.

5. Non-Required Benefits. Kogod acknowledges that by accepting the provisions of this Agreement, Kogod is receiving certain benefits to which he would not otherwise be entitled.

6. Release. In consideration of the obligations of DaVita under this Agreement, Kogod, for himself and his heirs, executors, administrators, attorneys, successors, and assigns, hereby releases DaVita and its parents, subsidiaries, divisions, affiliates, related entities, its and their joint ventures and joint venturers, insurers, insurance policies and benefit plans, each of the past and present shareholders, officers, directors, agents, employees (including, but not limited to, Kent Thiry), representatives, administrators, fiduciaries and attorneys of the foregoing entities and plans, and the predecessors, successors, transferees and assigns of each of the persons and entities described in this sentence ("Released Parties"), from any and all claims of any kind, known or unknown, that arose on or before the date Kogod signed this Agreement.

The claims Kogod is releasing include, without limitation, any and all claims arising out of or related to his employment with DaVita.

The claims Kogod is releasing also include, without limitation, claims of wrongful termination, claims of constructive discharge, claims arising out of agreements, representations or policies related to his employment, claims arising under federal, state or local laws or ordinances prohibiting discrimination, harassment, or retaliation for whistleblowing or requiring accommodation on the basis of age, race, color, national origin, religion, sex, disability, marital status, sexual orientation or any other protected status, claims of failure to accommodate a disability or religious practice, claims for violation of public policy, claims of retaliation, claims under the federal false claims act and/or any state false claims act relating in any manner to information Kogod learned while employed by DaVita, claims of failure to assist Kogod in applying for future position openings, claims of failure to hire Kogod for future position openings, claims for wages or compensation of any kind (including overtime claims), claims of willful withholding of wages, claims of tortious interference with contract or expectancy, claims of fraud or negligent misrepresentation, claims of breach of privacy, defamation claims, claims of intentional or negligent infliction of emotional distress, claims of unfair labor practices, claims arising out of any claimed right to stock or to the receipt of any equity grant or for the issuance, vesting or derivation of any value of stock or other equity or cash in connection with any award made under the Plan (other than the right to exercise vested but unexercised equity awards as provided under paragraph 2 above), claims for attorneys' fees or costs, claims that he may have or assert based on alleged acts or omissions by DaVita, and any other claims that are based on any alleged legal obligations of DaVita.

Kogod understands and agrees that this Agreement is a full and final release covering all known and unknown, suspected or unsuspected injuries, debts, claims or damages which have arisen or may have arisen from any matters, acts, omissions or dealings released. As to such released matters, Kogod expressly waives any and all rights or benefits which he may now have, or in the future may have, under the terms of California Civil Code Section 1542 and any similar law of any state or territory in the United States. Said section provides as follows:

> A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS WHICH THE CREDITOR DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE, WHICH IF KNOWN BY HIM OR HER MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR.

Kogod fully understands that if any fact with respect to any matter covered in this Agreement is found hereinafter to be other than or different from the facts now believed by him to be true, he expressly accepts and assumes that this Agreement shall be and remain effective, notwithstanding such difference in facts.

7. Waiver of Rights. Kogod specifically waives any rights or claims that Kogod may have under the California Labor Code, the California Fair Employment and Housing Act, the California Family Rights Act, the Nevada Revised Statutes, the Nevada Fair Employment Practices Act, the Colorado Civil Rights Act, the Colorado Revised Statutes, the Civil Rights Act of 1964 (including Title VII of that Act), the Americans with Disabilities Act of 1990 (ADA), the Family and Medical Leave Act, the Age Discrimination in Employment Act (ADEA), the Worker Adjustment and Retraining Notification Act (WARN), the Employee Retirement Income Security Act of 1974 (ERISA), the National Labor Relations Act (NLRA), the Consolidated

Omnibus Budget Reconciliation Act of 1985 (COBRA), the Sarbanes-Oxley Act of 2002, the Dodd-Frank Act of 2010 (all as amended), and all similar federal, state and local laws.

8. Remedies for Breach of Release and Waiver of Rights. Kogod acknowledges and agrees that if he breaches the provisions in paragraphs 6 and/or 7, then, to the fullest extent permitted by law, DaVita will be entitled to apply for and receive an injunction to restrain any violation of the release and/or waiver of rights and DaVita will not be obligated to make any additional payments or provide any additional benefits under this Agreement, subject to an arbitrator subsequently ruling otherwise pursuant to the dispute resolution mechanism set forth in paragraph 19 below.

9. Waiver of Reinstatement Rights. To the extent permitted by law, Kogod further waives, releases, and discharges DaVita and the Released Parties from any reinstatement rights which Kogod has or could have, and Kogod acknowledges that he has not suffered any on-the job injury for which he has not already filed a claim.

10. No Pending Actions. Kogod represents and warrants that as of the date of his signing this Agreement, he has not initiated any complaint, charge, administrative proceeding, lawsuit or arbitration seeking damages or equitable relief for any of the claims Kogod is releasing in this Agreement, including, without limitation, any administrative or civil actions pending with respect to DaVita and/or any alleged or perceived violation by DaVita or the Released Parties with respect to Kogod.

11. Protected Rights. Kogod expressly acknowledges that this Release does not relinquish any protected rights he may have under Title VII of the Civil Rights Act of 1964, the Equal Pay Act ("EPA"), the Americans with Disabilities Act ("ADA"), Older Workers Benefit Protection Act ("OWBPA") or the Age Discrimination in Employment Act ("ADEA") to file a charge, testify, assist or participate in any manner in an investigation, hearing or proceeding conducted by the Equal Employment Opportunity Commission or the Office of Federal Contract Compliance. However, Kogod may not recover additional compensation or damages as a result of that participation.

Kogod agrees that he will not file or permit any other person to file a claim on Kogod's behalf, with any judicial body, administrative agency or arbitrator, any claim or cause of action herein released.

The foregoing notwithstanding, nothing herein shall prohibit or restrict Kogod from communicating directly with, or responding to any inquiry from, cooperating with, or providing testimony before, the Securities and Exchange Commission (SEC), Department of Justice (DOJ), Office of the Inspector General (OIG), or any other governmental or self-regulatory authority about a possible violation of law.

This Agreement does not waive Kogod's vested rights, if any, to receive pension or medical benefits pursuant to any formally-adopted written benefit plan, unemployment compensation benefits or workers' compensation benefits, nor does it waive Kogod's rights that he cannot waive, including claims for indemnification, and any claim that the Company has failed to make any payments or to provide any of the payments or benefits described in paragraph 3 of this Agreement.

12. Notice of Rights of Review and Revocation. Kogod acknowledges receipt of this Agreement as notice in writing from DaVita advising him to consult with an attorney prior to executing this Agreement and further acknowledges that he has been provided the right to consider this Agreement, including the release contained herein, for a period of twenty-one (21) days following the date of such receipt prior to executing same. The parties acknowledge that Kogod has seven (7) days from the date of execution of this Agreement to revoke same, and that this entire Agreement shall not be effective or enforceable in whole or in part until the revocation period has expired. If Kogod chooses to revoke this Agreement within seven (7) days of execution, such revocation shall apply to the entire Agreement, and it is understood and agreed that such revocation shall render this entire Agreement null and void. To be effective, the rescission must be in writing and delivered by hand or mailed to Timothy J. Long, Orrick Herrington & Sutcliffe, LLP, 777 S. Figueroa Street, Suite 3200, Los Angeles, CA 90017. If mailed, the rescission must be (a) postmarked within the seven-day revocation period; (b) properly addressed to Timothy J. Long and (c) sent by certified mail, return receipt requested. If Kogod accepts this Agreement, the signed Agreement must be postmarked or returned by the close of the twenty-first day of the consideration period, to Timothy J. Long at the address stated herein.

13. Cooperation/Full Disclosure. Kogod agrees, upon request of DaVita, to cooperate with DaVita in the transition of his duties.

Kogod will fully cooperate with DaVita in the investigation, prosecution and/or defense of any claims or concerns regarding the business of DaVita about which he has relevant knowledge, including by providing truthful information and testimony as reasonably requested by DaVita. Such assistance shall include, but is not limited to, participating in interviews with representatives of DaVita, attending, as a witness, depositions, trials, or other similar proceedings without requiring a subpoena, and producing and/or providing any documents or names of other persons with relevant information.

Kogod also acknowledges his obligation to raise any and all compliance concerns prior to the Termination Date. Kogod shall fill out DaVita's form Compliance Questionnaire and be available to participate in an exit interview with DaVita's Corporate Compliance Department or its designee if Kogod is asked by DaVita to do so prior to the Termination Date. In the event an interview is desired, at the sole discretion of DaVita, DaVita will contact Kogod to establish a mutually agreeable time for the interview. Kogod agrees to answer any questions fully and completely, and a failure to do so is a material breach of this Agreement. If Kogod is aware of a compliance-related issue, he acknowledges his obligation to raise the concern(s) in the form Compliance Questionnaire and the exit interview (if any), and that failure to do so is a material breach of this Agreement.

14. Duty to DaVita. Kogod acknowledges his duty of loyalty to DaVita including, but not limited to, a duty not to improperly profit from or improperly seek to profit from knowledge he has acquired while in a position of trust at DaVita, to the detriment of DaVita.

15. No Future Employment. Kogod represents and confirms that, after the Termination Date, Kogod has no interest in future employment with DaVita or its parents, subsidiaries, successors or affiliates, and that DaVita and its parents, subsidiaries and affiliates

have no obligation to assist Kogod in identifying or applying for positions with DaVita. Kogod agrees not to apply for future employment with DaVita or its parents, subsidiaries or affiliates and agrees that DaVita and its parents, subsidiaries and affiliates have no obligation to consider Kogod for future employment.

16. Kogod's Representations and Warranties. Kogod expressly represents and warrants that he is the sole owner of the actual or alleged claims, demands, rights, causes of action, and other matters that are released by Kogod herein; that the same have not been transferred or assigned or caused to be transferred or assigned to any other person, firm, corporation or other legal entity; and that Kogod has the full right and power to grant, execute and deliver the releases, undertakings, and agreements contained herein. Kogod further represents and warrants that he is unaware of any lien that has been noticed or filed and that would attach to any payment or benefit to be made or given by DaVita pursuant to this Agreement. Kogod agrees to indemnify DaVita and the Released Parties, including payment of any attorneys' fees and costs, and hold DaVita and the Released Parties harmless from and against any and all damages which may be suffered by them in the event that any of the foregoing representations and warranties are untrue in whole or part, and any and all claims based on or arising from any such assignment or transfer, or any attempted assignment or transfer, of any matters released herein. Kogod also represents that the total payment fully and adequately compensates him for anything he is releasing and anything that is owed to him (including wages and benefits) and that he is not owed any other sums.

17. Entire Agreement. The parties agree that, except as otherwise stated herein, this Agreement supersedes any prior arrangements, agreements or contracts, whether written, oral or implied (in law or fact), between them on the subject matter contained herein and contains the entire understanding and agreement between the parties and cannot be amended, modified or supplemented in any respect, except by a subsequent written agreement executed by both parties.

18. Choice of Law. This Agreement shall be governed by the laws of the State of Colorado, without regard to conflict of law principles.

19. Enforcement of Agreement by Arbitration. Any dispute over the terms of or obligations under this Agreement shall be resolved by final and binding arbitration before JAMS in Denver, Colorado, except that the Company may seek judicial intervention to obtain temporary injunctive relief to restrain any violation of the releases provided in this Agreement and/or waiver of rights pursuant to paragraph 8 above. The parties agree that the venue for any such court action will be Denver, Colorado. The arbitrator (or the Court) shall be obligated to follow substantive Colorado law. Kogod and DaVita agree to waive any and all rights to a jury trial or a bench trial in connection with the resolution of any dispute under this Agreement. The prevailing party shall be entitled to reasonable attorneys' fees and/or costs incurred to enforce this Agreement.

20. Severability. If any provision of this Agreement or the application thereof is held invalid, such invalidation shall not affect other provisions or applications of this Agreement and to this end, the provisions of this Agreement are declared to be severable; provided that if the release and covenants not to sue provided for in paragraphs 6 and 10 or any parts thereof are declared or adjudged invalid or unenforceable for any reason, the entire Agreement shall be a nullity and all consideration provided in this Agreement shall be returned. Each party agrees, at

the other party's option, to execute a release, waiver, and/or covenant that is legal and enforceable to effectuate the terms of this Agreement.

21. Section 409A. For purposes of this Agreement and the Second Agreement, all references to "termination of employment" and correlative phrases shall be construed to require a "separation from service" (as defined under Section 409A of the Internal Revenue Code of 1986, as amended (the "Code"). For purposes of the rules under Section 409A of the Code, each payment made under this Agreement and the Second Agreement shall be treated as a separate payment, and the right to a series of installment payments under this Agreement is to be treated as a right to a series of separate payments. It is intended that the payments satisfy, to the greatest extent possible, the exemptions from the application of Section 409A of the Code. Notwithstanding anything to the contrary in this Agreement or the Second Agreement, if DaVita determines (i) that on the date that Kogod's employment with the Company terminates or at such other times that DaVita determines to be relevant, Kogod is a "specified employee" (within the meaning of Section 409A of the Code) of Da Vita and (ii) that any payments to be provided to Kogod pursuant to this Agreement are or may become subject to the additional tax under Section 409A(a)(1)(B) of the Code or any other taxes or penalties imposed under Section 409A of the Code if provided at the time otherwise required under this Agreement, then such payments shall be delayed until the date that is six months after the date of Kogod's "separation from service" (as such term is defined under Section 409A of the Code) with Da Vita, or, if earlier, the date of Kogod's death. Any payments delayed pursuant to this paragraph shall be made in lump sum on the first day of the seventh month following Kogod's "separation from service" (as such term is defined under Section 409A of the Code), or, if earlier, the date of Kogod's death. In addition, to the extent that any benefits are provided in-kind or through reimbursement, (i) the amount eligible for reimbursement or payment in one calendar year may not affect the amount eligible for reimbursement or payment in any other calendar year, and (ii) the right to any reimbursement or in-kind benefit is not subject to liquidation or exchange for another benefit. Notwithstanding any other provision to the contrary, in no event shall any payment under this Agreement that constitutes "deferred compensation" for purposes of Section 409A of the Code be subject to offset by any other amount unless otherwise permitted by Section 409A of the Code.

22. Counterparts and Copies. This Agreement may be signed in any number of copies and counterparts, each of which shall be deemed an original when signed and shall constitute the same instrument. Fully executed photocopies of the Agreement shall be treated as originals.

WHEREFORE, the parties execute this Agreement effective the date set forth below.

DaVita Healthcare Partners, Inc.

/s/ Kent J. Thiry	/s/ Dennis L. Kogod
Kent J. Thiry Chief Executive Officer	Dennis L. Kogod
Dated: October 17, 2016	Dated: October 17, 2016

Exhibit 10.6

EXHIBIT A

CONSULTING AGREEMENT

The following confirms the agreement (the "Consulting Agreement") between DaVita Healthcare Partners Inc. and/or any of its parents, subsidiaries, successors and assigns (collectively "DaVita" or the "Company") and Dennis L. Kogod ("Kogod") with respect to the provision of consulting services to DaVita.

1. **Term of Consulting Agreement.** This Consulting Agreement is effective as of December 1, 2016 and will continue for three (3) years, until November 30, 2019 unless terminated earlier pursuant to paragraph 10 of this Consulting Agreement.

2. **Services, Obligations and Cooperation.** Kogod and DaVita agree to the following with respect to the services, obligation and coordination under the Consulting Agreement: (a) In Year One of this Consulting Agreement, Kogod shall provide no more than 100 hours per month of consulting services to DaVita under this Consulting Agreement as Advisor to DaVita's Chief Executive Officer, or his/her designee. In Years Two and Three of this Consulting Agreement, the cap on consulting services shall be reduced to 90 hours per month. Kogod shall include in the monthly time record all time he spends attending to administrative functions, which will count towards his consulting services. If Kogod does not work 100 hours (or, as applicable, 90 hours) in any given month, the difference between hours worked and 100 hours (or, as applicable, 90 hours) shall not carry over to the following month, unless Kogod and DaVita agree otherwise. Kogod shall maintain a record of the hours he works each month and shall send the log to DaVita's Chief Executive Officer no later than five (5) business days after the end of each month. The parties agree that the spirit and intent of this Consulting Agreement is for Kogod to provide 100 hours (or, as applicable, 90 hours) of substantive consulting services to DaVita, but recognize that this will require substantial travel in addition to the substantive consulting services. As such, DaVita agrees to pay Kogod $350 per hour for his travel time, which will be limited to 40 hours per month. However, if travel exceeds 40 hours per month, then each travel hour in excess of 40 shall be treated as consulting services, thereby counting towards the 100 (or 90) hour monthly consulting services maximum. For purposes of recording Kogod's travel hours, travel time shall be measured from the scheduled airline departure time to landing, including any lay-overs and travel delays. Travel time is not be considered part of the 100 hours (or, as applicable, 90 hours) required under this section unless the travel time exceeds 40 hours per month, as discussed above.

(b) Kogod shall give DaVita five (5) business days' notice of any days on which he cannot perform work, including travel or phone calls, provided that Kogod has not previously agreed to a commitment to DaVita pursuant to Section 2(d)-(e).

(c) In this role, Kogod shall report to DaVita's Chief Executive Officer or his/her designee and attend meetings called by him/her and/or DaVita's senior management, with reasonable notice as set forth below. Kogod understands and agrees that in performing services under this Consulting Agreement he may be required to travel internationally, with reasonable notice as set forth below. DaVita will pay for Kogod to travel on a commercial airline, first

class, and to stay in executive level accommodations consistent with similarly situated DaVita executives. Kogod shall seek reimbursement for other reasonable expenses he incurs in connection with performing these consulting services. None of the travel costs will be imputed to Kogod as income. Kogod will not be permitted to use the fractionally-owned or chartered corporate aircraft. Kogod shall also provide Quarterly Financial Disclosure Certifications to the Company in the form of Exhibit 1 attached hereto.

(d) DaVita shall give Kogod no fewer than six (6) business days' notice for any domestic travel that DaVita requires of Kogod and ten (10) business days' notice for any international travel that DaVita requires of Kogod.

(e) DaVita shall give Kogod no fewer than five (5) business days' notice of any conference call or in person meeting in which his participation is required. DaVita shall give Kogod no fewer than five (5) business days' notice of any one on one or other similar regular calls with international management team members.

(f) DaVita and Kogod agree and understand that the notice provisions in Sections 2(b), (d) and (e) may not always be possible in the event of an emergency or urgent business situation. If a legitimately urgent or emergent situation arises, both parties agree to act reasonably to accommodate the request by the other party that would be less than the required time of the notice provisions in Sections 2(b), (d) and (e).

(g) DaVita shall not require Kogod to attend any meeting of the Board of Directors.

(h) Kogod shall utilize his expertise, experience and professional judgment in performing such consulting services.

(i) Kogod acknowledges his duty of loyalty to DaVita including, but not limited to, a duty not to improperly profit from or improperly seek to profit from knowledge he has acquired while in a position of trust at DaVita, to the detriment of DaVita.

(j) Kogod shall fully cooperate with DaVita in the investigation, prosecution and/or defense of any claims or concerns regarding the business of DaVita about which he has relevant knowledge, including by providing truthful information and testimony as reasonably requested by DaVita.

3. **Compensation**. For the duration of this Consulting Agreement, and in consideration for this Consulting Agreement, DaVita shall pay Kogod One Million Two Hundred Thousand Dollars ($1,200,000) per year, to be reported on an IRS Form 1099 and paid out monthly. In addition, and subject to executing a Second Agreement attached hereto as Exhibit 2, no later than January 15, 2017, DaVita shall pay Kogod a lump sum of One Million Eight Hundred Thousand Dollars ($1,800,000), to be reported on an IRS Form 1099. The payment of this lump sum shall be conditioned solely on Kogod executing the Second Agreement and once paid, shall not be subject to later recapture or repayment, even if Kogod should later breach this Consulting Agreement or the Third Agreement (see paragraph 4 below).

4. **Additional Consideration**. Upon expiration or termination of this Consulting Agreement, Kogod shall sign a Third Agreement attached hereto as Exhibit 3. As good and

valuable consideration for Kogod's execution of the Third Agreement, as well as the post-consulting noncompetition and nonsolicitation provisions set out in paragraphs 7 and 8 herein, DaVita shall pay Kogod a lump sum of One Hundred Thousand Dollars ($100,000), to be reported on an IRS Form 1099.

5. **Independent Contractor Status**. It is the express intention of the parties to this Consulting Agreement that Kogod is an independent contractor, and is not an employee, agent, joint venturer or partner of DaVita. Nothing in this Consulting Agreement shall be interpreted or construed as creating or establishing an employment relationship between DaVita and Kogod. Both parties understand and agree that Kogod may perform services for others during the term of this Consulting Agreement.

6. **Taxes.** Kogod and DaVita agree that all tax obligations, if any, which may arise from the payments set forth above shall be the sole obligation of Kogod, and that Kogod defends and indemnifies DaVita against any and all costs, penalties, taxes or other payments made or required as a result of the allocation of those payments, if any, or the reporting of those payments. Kogod agrees to notify DaVita promptly of any claims made for costs, penalties or taxes related to those payments. Kogod acknowledges that DaVita makes no representations as to the tax consequences or characterization of the nature of the payment made pursuant to this Consulting Agreement. Kogod is solely responsible for all taxes, withholdings and other similar statutory obligations; and Kogod agrees to defend, indemnify and hold DaVita harmless from any and all claims made by any entity on account of an alleged failure by Kogod to satisfy any such tax or withholding obligations.

7. **Noncompete.** Kogod agrees that, during the term of this Consulting Agreement and for a period of eight (8) months following the expiration this Consulting Agreement, he will not perform or engage in any activities that would be competitive with DaVita, including providing any services for (whether as an owner, partner, investor, director, officer, representative, manager, employee, principal, agent, advisor, or consultant) any business which provides dialysis services in the United States, Australia, Brazil, China (PRC), Colombia, Germany, India, Indonesia, Malaysia, the Netherlands, the Philippines, Poland, Portugal, Saudi Arabia, Singapore, Spain, Taiwan, the United Arab Emirates, and United Kingdom. Kogod agrees that this provision is only as wide in scope, geographic reach and duration as necessary to safeguard DaVita's business, including its trade secret information. Additionally, Kogod agrees that this provision does not impose undue hardship on him. If any court of competent jurisdiction shall determine that any portion of this provision is invalid in any respect, the parties agree that such court may limit this provision in geographic scope, in duration, or in any other manner which the court determines such that the provision shall be enforceable against Kogod.

8. **Non-Solicitation of Employees.** Kogod understands and acknowledges that DaVita has expended and continues to expend significant time and expense in recruiting and training its employees and that the loss of employees would cause significant and irreparable harm to DaVita. Kogod agrees that he will not directly or indirectly solicit, hire, recruit, attempt to hire or recruit, or induce the termination of employment of any employee employed by DaVita during the term of this Consulting Agreement and for a period of one (1) year following the expiration of this Consulting Agreement.

9. **Confidential Information.** Kogod understands and acknowledges that DaVita has and will continue to spend significant time, effort and money to develop proprietary information which is vital to DaVita's business. In connection with performing services under this Consulting Agreement, Kogod will have access to DaVita's confidential, proprietary and trade secret information including but not limited to information and strategy relating to the Company's products and services including customer lists and files, product description and pricing, information and strategy regarding profits, costs, marketing, purchasing, sales, customers, suppliers, contract terms, employees, salaries; product development plans; business, acquisition and financial plans and forecasts and marketing and sales plans and forecasts (collectively called "Company Confidential Information"). Kogod will not, throughout the duration of this Consulting Agreement and after, directly or indirectly disclose to any other person or entity, or use for his own benefit or for the benefit of others besides the Company, any Company Confidential Information. Upon termination of this Consulting Agreement, Kogod agrees to promptly return all Company Confidential Information.

10. **Termination of Consulting Agreement.** DaVita shall have the right to terminate this Consulting Agreement for any reason, including for convenience. In the event of termination of this Consulting Agreement by DaVita for any reason except Cause, as defined below, the full unpaid balance of payment described in paragraph 3 above shall be paid to Kogod at the time of termination. Kogod agrees, however, that the noncompetition and nonsolicitation provisions set out in paragraphs 7 and 8 herein shall continue in force and effect for the anticipated duration of these provisions – i.e., three (3) years and eight months from the effective date of this Consulting Agreement.

For purposes of this Agreement, "Cause" shall mean the occurrence of any of the following events, as determined in the good faith reasonable judgment of the Board: (i) any violation by Kogod of any securities law or regulation; (ii) Kogod's conviction for, indictment for, or plea of nolo contendere to fraud, theft, embezzlement, or any crime involving moral turpitude that is injurious to DaVita; (iii) Kogod's failure to adequately perform the consulting services under this Agreement as determined by the Board, which failure continues for a period of more than 15 business days after the Board has given written notice thereof to Kogod, which written notice shall set forth in reasonable detail the manner in which Kogod's performance of the consulting services is not adequate; (iv) Kogod's breach, non-performance or non-observance of any of the material terms of this Agreement; provided, that, if such breach, non-performance or non-observance of any such material term is capable of cure, it continues without cure beyond a period of 15 business days immediately after written notice thereof by the Board to Kogod, which written notice shall set forth in reasonable detail the facts or circumstances constituting or giving rise to such breach, non-performance or non-observance; (v) any gross negligence or willful misconduct by Kogod in the performance of his consulting services; (vi) egregious conduct by Kogod that brings the Company or any of its subsidiaries or affiliates into public disgrace or disrepute; (vii) any act of unlawful discrimination, including sexual harassment, by Kogod; or (viii) exclusion or notice of exclusion of Kogod from participating in any federal health care program.

If the Company determines that it has Cause to terminate this agreement, Kogod shall have the right to request a hearing, with an arbitrator agreed upon by the parties, to determine whether Cause exists. There shall be no discovery prior to the hearing. The parties shall share

the cost of the arbitrator and shall bear their own attorneys' fees and costs. The decision of the arbitrator following the hearing shall be final.

11. **Entire Agreement**. The parties agree that, except as otherwise stated herein, this Consulting Agreement supersedes any prior arrangements, agreements or contracts, whether written, oral or implied (in law or fact), between them on the subject matter contained herein and contains the entire understanding and agreement between the parties and cannot be amended, modified or supplemented in any respect, except by a subsequent written agreement executed by both parties.

12. **Choice of Law.** This Consulting Agreement shall be governed by the laws of the State of Colorado, without regard to conflict of law principles.

13. **Enforcement of Consulting Agreement by Arbitration.** Any dispute over the terms of or obligations under this Consulting Agreement shall be resolved by final and binding arbitration before JAMS in Denver, Colorado. The arbitrator shall be obligated to follow substantive Colorado law. Kogod and DaVita agree to waive any and all rights to a jury trial or a bench trial in connection with the resolution of any dispute under this Consulting Agreement, except as described herein. The prevailing party shall be entitled to reasonable attorneys' fees and/or costs incurred to enforce this Consulting Agreement. Expressly excluded from the provisions of this paragraph are actions by either party for temporary restraining orders or preliminary injunctions in cases where such temporary equitable relief would otherwise be authorized by law.

14. **Severability.** If any provision of this Consulting Agreement or the application thereof is held invalid, such invalidation shall not affect other provisions or applications of this Consulting Agreement and to this end, the provisions of this Consulting Agreement are declared to be severable. Each party agrees, at the other party's option, to execute a release, waiver, and/or covenant that is legal and enforceable to effectuate the terms of this Consulting Agreement.

WHEREFORE, the parties execute this Consulting Agreement effective the date set forth below.

DaVita Healthcare Partners, Inc.

/s/ Ken J. Thiry	/s/ Dennis L. Kogod
Kent J. Thiry Chief Executive Officer	Dennis L. Kogod
Date: October 17, 2016	Date: October 17, 2016

EXHIBIT 2

SECOND AGREEMENT

1. I, Dennis L. Kogod, for myself and my heirs, executors, administrators, attorneys, successors, and assigns, in consideration for the payments provided pursuant to the Separation and Release Agreement with DaVita Healthcare Partners Inc. ("DaVita" or the "Company") (dated _October 17, _____, 2016) (the "Original Agreement"), which I expressly agree are more than I would otherwise be entitled, hereby release DaVita and its parents, subsidiaries, divisions, affiliates, related entities, its and their joint ventures and joint venturers, insurers, insurance policies and benefit plans, each of the past and present shareholders, officers, directors, agents, employees (including, but not limited to, Kent Thiry), representatives, administrators, fiduciaries and attorneys of the foregoing entities and plans, and the predecessors, successors, transferees and assigns of each of the persons and entities described in this sentence, from any and all claims of any kind, known or unknown, that arose on or before the time I signed this Second Agreement.

2. The claims I am releasing include, without limitation, any and all claims arising out of or related to my employment with DaVita and my consulting for DaVita. The claims I am releasing include, without limitation, claims of wrongful termination, claims of constructive discharge, claims arising out of agreements, representations or policies related to his employment, claims arising under federal, state or local laws or ordinances prohibiting discrimination, or harassment, or whistleblowing or requiring accommodation on the basis of age, race, color, national origin, religion, sex, disability, marital status, sexual orientation or any other protected status, claims of failure to accommodate a disability or religious practice, claims for violation of public policy, claims of retaliation, claims under the federal false claims act and/or any state false claims act relating in any manner to information I learned while employed by DaVita, claims of failure to assist in applying for future position openings, claims of failure to hire for future position openings, claims for wages or compensation of any kind (including overtime claims), claims of willful withholding of wages, claims of tortious interference with contract or expectancy, claims of fraud or negligent misrepresentation, claims of breach of privacy, defamation claims, claims of intentional or negligent infliction of emotional distress, claims of unfair labor practices, claims arising out of any claimed right to stock or stock options, claims for attorneys' fees or costs, claims that he may have or assert based on alleged acts or omissions by DaVita, and any other claims that are based on any alleged legal obligations of DaVita.

3. I understand and agree that this Second Agreement is a full and final release covering all known and unknown, suspected or unsuspected injuries, debts, claims or damages which have arisen or may have arisen from any matters, acts, omissions or dealings released. As to such released matters, I expressly waive any and all rights or benefits which I may now have, or in the future may have, under the terms of California Civil Code Section 1542 and any similar law of any state or territory in the United States. Said section provides as follows:

> A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS WHICH THE CREDITOR DOES NOT KNOW OR SUSPECT

TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE, WHICH IF KNOWN BY HIM OR HER MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR.

4. I fully understand that, if any fact with respect to any matter covered in this Second Agreement is found hereinafter to be other than or different from the facts now believed by me to be true, I expressly accept and assume that this Second Agreement shall be and remain effective, notwithstanding such difference in facts.

5. I specifically waive any rights or claims that I may have under the California Labor Code, the California Fair Employment and Housing Act, the California Family Rights Act, the Nevada Revised Statutes, the Nevada Fair Employment Practices Act, the Colorado Civil Rights Act, the Colorado Revised Statutes, the Civil Rights Act of 1964 (including Title VII of that Act), the Americans with Disabilities Act of 1990 (ADA), the Family and Medical Leave Act, the Worker Adjustment and Retraining Notification Act (WARN), the Employee Retirement Income Security Act of 1974 (ERISA), the National Labor Relations Act (NLRA), the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA), the Sarbanes-Oxley Act of 2002, the Dodd-Frank Act of 2010, and all similar federal, state and local laws.

6. The foregoing notwithstanding, this Second Agreement does not waive my vested rights, if any, to receive pension or medical benefits pursuant to any formally-adopted written benefit plan, unemployment compensation benefits or workers' compensation benefits. Nor does it waive my rights that I cannot waive, including claims for indemnification.

7. I represent and warrant that as of the date of his signing this Second Agreement, I have not initiated any complaint, charge, administrative proceeding, lawsuit or arbitration seeking damages or equitable relief for any of the claims I released in the Original Agreement, including, without limitation, any administrative or civil actions with respect to my employment and/or any alleged or perceived violation by DaVita or the Released Parties with respect to me.

8. I acknowledge that I have fulfilled my obligation to inform DaVita completely, forthrightly and fully of all allegations, perceived allegations, facts, and incidents or other information of which I may be aware about alleged or perceived violations by DaVita of any federal, state or local law or regulation, or DaVita's Corporate Integrity Agreement, Code of Conduct, Business Conduct Standards, or any other conduct prescribed by legal or regulatory authority or by DaVita.

9. I have returned all of DaVita's proprietary and confidential information, emails, documents, and property, including but not limited to cellular phones, credit cards, calling cards, keys, computers, employment badges and any company-provided hardware and software ("Company Property") to DaVita. I have not made any images and/or copies of Company Property, nor have I disclosed, provided, and/or shared any Company Property with any third party.

10. I acknowledge receipt of this Second Agreement as notice in writing from DaVita advising me to consult with an attorney prior to executing this Second Agreement and further acknowledge that I have been provided the right to consider this Second Agreement.

11. I understand that I will not be entitled to receive the One Million Eight Hundred Thousand Dollars ($1,800,000) lump-sum payment provided for in paragraph 3 of the Consulting Agreement until after this Second Agreement has been executed and returned.

12. This Second Agreement shall be governed by the laws of the State of Colorado.

DaVita Healthcare Partners, Inc.

Date: January 13, 2017	Date: January 13, 2017

EXHIBIT 3

THIRD AGREEMENT

1. I, Dennis L. Kogod, for myself and my heirs, executors, administrators, attorneys, successors, and assigns, in consideration for the payments provided pursuant to the Separation and Release Agreement with DaVita Healthcare Partners Inc. ("DaVita" or the "Company") (dated August 18, 2016) (the "Original Agreement"), which I expressly agree are more than I would otherwise be entitled, hereby release DaVita and its parents, subsidiaries, divisions, affiliates, related entities, its and their joint ventures and joint venturers, insurers, insurance policies and benefit plans, each of the past and present shareholders, officers, directors, agents, employees (including, but not limited to, Kent Thiry), representatives, administrators, fiduciaries and attorneys of the foregoing entities and plans, and the predecessors, successors, transferees and assigns of each of the persons and entities described in this sentence, from any and all claims of any kind, known or unknown, that arose on or before the time I signed this Third Agreement.

2. The claims I am releasing include, without limitation, any and all claims arising out of or related to my employment with DaVita and my consulting for DaVita. The claims I am releasing include, without limitation, claims of wrongful termination, claims of constructive discharge, claims arising out of agreements, representations or policies related to his employment, claims arising under federal, state or local laws or ordinances prohibiting discrimination, or harassment, or whistleblowing or requiring accommodation on the basis of age, race, color, national origin, religion, sex, disability, marital status, sexual orientation or any other protected status, claims of failure to accommodate a disability or religious practice, claims for violation of public policy, claims of retaliation, claims under the federal false claims act and/or any state false claims act relating in any manner to information I learned while employed by DaVita, claims of failure to assist in applying for future position openings, claims of failure to hire for future position openings, claims for wages or compensation of any kind (including overtime claims), claims of willful withholding of wages, claims of tortious interference with contract or expectancy, claims of fraud or negligent misrepresentation, claims of breach of privacy, defamation claims, claims of intentional or negligent infliction of emotional distress, claims of unfair labor practices, claims arising out of any claimed right to stock or stock options, claims for attorneys' fees or costs, claims that he may have or assert based on alleged acts or omissions by DaVita, and any other claims that are based on any alleged legal obligations of DaVita.

3. I understand and agree that this Third Agreement is a full and final release covering all known and unknown, suspected or unsuspected injuries, debts, claims or damages which have arisen or may have arisen from any matters, acts, omissions or dealings released. As to such released matters, I expressly waive any and all rights or benefits which I may now have, or in the future may have, under the terms of California Civil Code Section 1542 and any similar law of any state or territory in the United States. Said section provides as follows:

> A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS WHICH THE CREDITOR DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF

EXECUTING THE RELEASE, WHICH IF KNOWN BY HIM OR HER MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR.

4. I fully understand that if any fact with respect to any matter covered in this Third Agreement is found hereinafter to be other than or different from the facts now believed by me to be true, I expressly accept and assume that this Third Agreement shall be and remain effective, notwithstanding such difference in facts.

5. I specifically waive any rights or claims that I may have under the California Labor Code, the California Fair Employment and Housing Act, the California Family Rights Act, the Nevada Revised Statutes, the Nevada Fair Employment Practices Act, the Colorado Civil Rights Act, the Colorado Revised Statutes, the Civil Rights Act of 1964 (including Title VII of that Act), the Americans with Disabilities Act of 1990 (ADA), the Family and Medical Leave Act, the Worker Adjustment and Retraining Notification Act (WARN), the Employee Retirement Income Security Act of 1974 (ERISA), the National Labor Relations Act (NLRA), the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA), the Sarbanes-Oxley Act of 2002, the Dodd-Frank Act of 2010, and all similar federal, state and local laws.

6. The foregoing notwithstanding, this Third Agreement does not waive my vested rights, if any, to receive pension or medical benefits pursuant to any formally-adopted written benefit plan, unemployment compensation benefits or workers' compensation benefits. Nor does it waive my rights that I cannot waive, including claims for indemnification.

7. I represent and warrant that as of the date of his signing this Third Agreement, I have not initiated any complaint, charge, administrative proceeding, lawsuit or arbitration seeking damages or equitable relief for any of the claims I released in the Original Agreement, including, without limitation, any administrative or civil actions with respect to my employment and/or any alleged or perceived violation by DaVita or the Released Parties with respect to me.

8. I acknowledge that I have fulfilled my obligation to inform DaVita completely, forthrightly and fully of all allegations, perceived allegations, facts, and incidents or other information of which I may be aware about alleged or perceived violations by DaVita of any federal, state or local law or regulation, or DaVita's Corporate Integrity Agreement, Code of Conduct, Business Conduct Standards, or any other conduct prescribed by legal or regulatory authority or by DaVita.

9. I have returned all of DaVita's proprietary and confidential information, emails, documents, and property, including but not limited to cellular phones, credit cards, calling cards, keys, computers, employment badges and any company-provided hardware and software ("Company Property") to DaVita. I have not made any images and/or copies of Company Property, nor have I disclosed, provided, and/or shared any Company Property with any third party.

10. I acknowledge receipt of this Third Agreement as notice in writing from DaVita advising me to consult with an attorney prior to executing this Third Agreement and further acknowledge that I have been provided the right to consider this Third Agreement.

11. I understand that I will not be entitled to receive any payments or benefits under paragraph 4 of the Consulting Agreement until after this Third Agreement has been executed and returned.

12. This Third Agreement shall be governed by the laws of the State of Colorado.

DaVita Healthcare Partners, Inc.

Kent J. Thiry Chief Executive Officer	Dennis L. Kogod
Date: _____	Date: _____

Exhibit 10.12

EMPLOYMENT AGREEMENT

This Employment Agreement (this "Agreement") is made effective as of November 1, 2016 (the "Effective Date"), by and between DaVita Inc. ("Parent") and HealthCare Partners, LLC, one of its controlled affiliates ("Employer", and collectively with Parent, "DaVita") and Charles G. Berg ("Employee").

In consideration of the mutual covenants and agreements hereinafter set forth and for other good and valuable consideration, the parties hereto, intending to be legally bound hereby, agree as follows:

Section 1. Employment and Duties. Employer hereby employs Employee to serve as Executive Chair for DaVita Medical Group ("Executive Chair"). Employee accepts such employment on the terms and conditions set forth in this Agreement. Employee shall report to the Chief Executive Officer of Parent. Employee agrees to devote approximately half of his business time to the business of Employer and shall not engage in any other business activities during the term of this Agreement that would reasonably be anticipated to materially interfere with Employee's performance of his duties under this Agreement. Notwithstanding the foregoing, Employer agrees that Employee may continue his work with Justworks, Inc. and Consonance Capital Partners during the term of this Agreement. Employee shall at all times observe and abide by the Employer's policies and procedures as in effect from time to time.

Section 2. Compensation. In consideration of the services to be performed by Employee hereunder, Employee shall receive the following compensation and benefits:

2.1 Base Salary. Employer shall pay Employee a base salary of one million five hundred thousand dollars ($1,500,000) per annum, less standard withholdings and authorized deductions. Employee shall be paid consistent with Employer's payroll schedule.

2.2 Benefits. Employee and/or his family, as the case may be, shall be eligible for participation in and shall receive all benefits under Employer's health and welfare benefit plans (including, without limitation, medical, prescription, dental, disability, and life insurance) under the same terms and conditions applicable to most executives at similar levels of compensation and responsibility.

2.3 Discretionary Performance Bonus. Employee shall be eligible to receive a discretionary performance bonus (the "Discretionary Bonus") between zero ($0) and one million five hundred thousand dollars ($1,500,000), less standard withholdings and authorized deductions. The amount of the Discretionary Bonus could exceed $1,500,000 depending on performance. The amount of the Discretionary Bonus, if any, will be based on Employee's performance and will be decided by the Chief Executive Officer and/or the Board of Directors or the Compensation Committee of the Board in his/her/its sole discretion.

2.4 Sign-On Bonus: Employer will pay Employee five hundred thousand dollars ($500,000), less standard withholdings and authorized deductions (the "Sign-On Bonus"), within ten (10) days after Employee's first date of employment with Employer.

2.5 Vacation. Employee shall have vacation, subject to the approval of his direct supervisor.

2.6 Employee's Position on Board of Directors. While this Agreement is in effect, Employee shall not be entitled to any fees, compensation, other remuneration, dividends, distributions, or other property or financial benefit in connection with Employee's position as a Director of Parent.

2.7 Compensation or other Property Received in Connection with Director, Officer, Shareholder or Similar Position. All fees, compensation, other remuneration, dividends, distributions, or other property or financial benefit received by Employee in connection with Employee's position as a director, officer, member, shareholder, partner or any other similar position of any controlled or uncontrolled direct or indirect subsidiary or affiliate of Employer, or other contractual obligor to Employer or any of its subsidiaries or affiliates the obligations of which constitute revenue to Employer or any of its subsidiaries or affiliates and of which Employee beneficially owns or has the right to acquire, directly or indirectly, 10% or more of the equity interests or has the power to vote 10% or more of the voting interests, shall belong to Employer and shall be immediately remitted to Employer. Notwithstanding the foregoing, this provision shall not apply to any amounts payable to, earned by, received by or otherwise due to Employee as employment compensation from Employer or any of its subsidiaries or affiliates, or any dividends or other distributions received by Employee in Employee's capacity as a stockholder of Parent.

2.8 Indemnification. Parent agrees to indemnify Employee against and in respect of any and all claims, actions, or demands, to the extent permitted by and in accordance with Parent's Certificate of Incorporation, Parent's By-laws and applicable law. Parent shall maintain a directors' and officers' liability insurance policy covering Employee in his capacity as an employee (in addition to his capacity as a member of the Board of Directors of Parent) to the extent Parent provides such coverage to its executive officers. Notwithstanding any provision of this Agreement to the contrary, the obligations under this Section 2.8 (Indemnification) will survive termination of this Agreement or Employee's employment for any reason.

2.9 Reimbursement. Employer also agrees to reimburse Employee in accordance with Employer's reimbursement policies for travel and entertainment expenses, as well as other business-related expenses, incurred in the performance of his duties hereunder.

2.10 Changes to Benefit Plans. Employer reserves the right to modify, suspend, or discontinue any and all of its health and welfare benefit plans, practices, policies, and programs at any time without recourse by Employee so long as such action is taken generally with respect to all other similarly-situated peer executives and does not single out Employee.

2.11 Possible Recoupment of Certain Compensation. Notwithstanding any other provision in this Agreement to the contrary, Employee shall be subject to the written policies of the Board of Directors applicable to executives of the Employer, including without limitation any Board policy relating to recoupment or "claw back" of compensation, as they exist from time to time during the Employee's employment by the Employer and thereafter.

Section 3. Provisions Relating to Termination of Employment.

3.1 Term. The term of this Agreement will be until October 15, 2017 (the "Term"), unless the parties mutually agree to extend the Term. Notwithstanding the Term, Employer and Employee shall have the right to terminate this Agreement at any point during the Term in accordance with the terms of this Section 3 (Provisions Relating to Termination of Employment).

3.2 Termination for Material Cause. Employer may terminate Employee's employment without advance notice for Material Cause (as defined below). Upon termination for Material Cause, Employee shall (i) be entitled to receive the Base Salary and benefits as set forth in Section 2.1 (Base Salary), Section 2.2 (Benefits), and Section 2.9 (Reimbursement) respectively, through the effective date of such termination and (ii) not be entitled to receive any other compensation, benefits, or payments of any kind, except as otherwise required by law or by the terms of any benefit or retirement plan or other arrangement that would, by its terms, apply. Employee acknowledges and agrees that he will not be eligible for any severance payments or benefits under the DaVita Inc. Severance Plan and/or any other severance plan adopted by Employer (including its subsidiaries and affiliates).

3.3 Other Termination. Employer may terminate the employment of Employee for any reason or for no reason at any time upon at least thirty (30) days' advance written notice. Upon termination pursuant to this Section 3.3 (Other Termination), Employee shall (i) be entitled to receive the Base Salary and benefits as set forth in Section 2.1 (Base Salary), Section 2.2 (Benefits), and Section 2.9 (Reimbursement) respectively, through the effective date of such termination and (ii) not be entitled to receive any other compensation, benefits, or payments of any kind, except as otherwise required by law or by the terms of any benefit or retirement plan or other arrangement that would, by its terms, apply. Employee acknowledges and agrees that he will not be eligible for any severance payments or benefits under the DaVita Inc. Severance Plan and/or any other severance plan adopted by Employer (including its subsidiaries and affiliates).

3.4. Voluntary Resignation. Employee may resign from Employer at any time upon at least thirty (30) days' advance written notice. If Employee resigns from Employer, Employee shall (i) be entitled to receive the base salary and benefits as set forth in Section 2.1 (Base Salary), Section 2.2 (Benefits), and Section 2.9 (Reimbursement) respectively, through the effective date of such termination and (ii) not be entitled to receive any other compensation, benefits, or payments of any kind, except as otherwise required by law or by the terms of any benefit or retirement plan or other arrangement that would, by its terms, apply. In the event Employee resigns from Employer at any time, Employer shall have the right to make such resignation effective as of any date before the expiration of the required notice period.

3.5 Disability. Upon thirty (30) days' advance notice (which notice may be given before the completion of the periods described herein), Employer may terminate Employee's employment for Disability (as defined below).

3.6 Definitions. For the purposes of this Agreement, the following terms shall have the meanings indicated:

(a) "Disability" shall mean the inability, for a period of six (6) months, to adequately perform Employee's regular duties, with or without reasonable accommodation, due to a physical or mental illness, condition, or disability.

(b) "Material Cause" shall mean any of the following: (i) conviction of a felony or plea of no contest to a felony; (ii) any act of fraud or dishonesty in connection with the performance of his duties; (iii) repeated failure or refusal by Employee to follow policies or directives reasonably established by the Chief Executive Officer of Parent that goes uncorrected for a period of ten (10) consecutive days after written notice has been provided to Employee; (iv) a material breach of this Agreement that goes uncorrected after a period of ten (10) consecutive days after written notice has been provided to Employee; (v) any gross or willful misconduct or gross negligence by Employee in the performance of his duties; (vi) egregious conduct by Employee that brings Employer or any of its subsidiaries or affiliates into public disgrace or disrepute; (vii) an act of unlawful discrimination, including sexual harassment; (viii) a violation of the duty of loyalty or of any fiduciary duty; or (ix) exclusion or notice of exclusion of Employee from participating in any federal health care program.

3.7 Notice of Termination. Any purported termination of Employee's employment by Employer or by Employee shall be communicated by a written Notice of Termination to the other party hereto in accordance with Section 5.3 (Notice) hereof. A "Notice of Termination" shall mean a written notice that indicates the specific termination provision in this Agreement.

3.8 Effect of Termination. Upon termination, this Agreement shall be of no further force and effect and neither party shall have any further right or obligation hereunder; provided, however, that no termination shall modify or affect the rights and obligations of the parties that have accrued prior to termination; and provided further, that the rights and obligations of the parties under Section 2.8 (Indemnification), Section 3 (Provisions Relating to Termination of Employment), Section 4 (Noncompetition, Nonsolicitation, and Confidentiality Agreement), and Section 5 (Miscellaneous) shall survive termination of this Agreement.

3.9 Payments and benefits under this Agreement are intended to be exempt from, or comply with, the applicable requirements of Section 409A of the Internal Revenue Code, and this Agreement shall be construed and interpreted in accordance with such intent. Notwithstanding any provision herein to the contrary, in the event that any payment to be made to Employee hereunder (whether pursuant to this Section 3 (Provisions Relating to Termination of Employment) or any other Section) as a result of Employee's termination of employment is determined to constitute "deferred compensation" subject to Section 409A of the Internal Revenue Code, and Employee is a "Key Employee" under the DaVita Inc. Key Employee Policy

for 409A Arrangements at the time of Employee's termination of employment, all such deferred compensation payments payable during the first six (6) months following Employee's termination of employment shall be delayed and paid in a lump sum during the seventh calendar month following the calendar month during which Employee's termination of employment occurs.

Section 4: Covenant Not to Compete, Covenant Not to Solicit, and Confidentiality.

4.1 Covenant Not to Compete. Employee recognizes and agrees that his covenant not to compete is necessary to insure continuation of the business and reputation of the Employer and that irreparable harm and damage will be done to the Employer if Employee competes with the Employer in certain specified areas. Employee acknowledges that he will be privy to confidential information to which Employee might not otherwise be exposed.

Employee covenants and agrees that during the term of this Agreement and for six (6) months following the termination of this Agreement (the "Restricted Period"), he shall not, as an employee, independent contractor, consultant, or in any other form, provide any of the same or similar services that Employee performed under this Agreement for any other individual, partnership, limited liability company, corporation, independent practice association, management services organization, or any other entity (collectively, "Person") that competes in any material way with the Employer or any of its subsidiaries or affiliates within the DaVita Medical Group organization anywhere in the states where Employer operates as of the date of termination of Employee's employment.

Employee understands and acknowledges that the provisions of this Section 4 (Covenant Not to Compete, Covenant Not to Solicit, and Confidentiality), are designed to preserve the business and goodwill of the Employer. Accordingly, if Employee breaches any such obligation, in addition to any other remedies available under this Agreement, at law or in equity, the Employer shall be entitled to enforce this Section 4 (Covenant Not to Compete, Covenant Not to Solicit, and Confidentiality) by injunctive relief and by specific performance of this Section 4 (Covenant Not to Compete, Covenant Not to Solicit, and Confidentiality), such relief to be without the necessity of posting a bond, cash or otherwise. Additionally, nothing in this Section 4.1 (Covenant Not to Compete) shall limit the Employer's right to recover any other damages to which it is entitled as a result of Employee's breach. If any provision of the restrictive covenants contained in this Agreement is held by a court of competent jurisdiction to be unenforceable due to the excessive time period, geographic area, or restricted activity, the restrictive covenant shall be reformed to comply with the time period, geographic area, or restricted activity that would be held enforceable.

Notwithstanding the foregoing, this Section 4.1 (Covenant Not to Compete) will only apply if Employee is no longer serving on the Parent's Board of Directors during the time period covered by the covenant not to compete (i.e., during the term of this Agreement and for six (6) months following the termination of this Agreement), and the Restricted Period will continue to run during any time period after the termination of this Agreement when Employee is serving on the Board of Directors.

4.2 Covenant Not to Solicit. Employee agrees that during the term of this Agreement, and for a period of one (1) year after the termination of this Agreement, Employee will not contact, communicate with, or correspond with any director, officer, employee, representative, agent or independent contractor of the Parent and its subsidiaries and affiliates (including Employer), in any manner that will interfere with or attempt to disrupt the relationship between the Employer and any such director, officer, employee, representative, agent or independent contractor, including but not limited to the solicitation or encouragement of any employee to leave the employ of the Employer for any reason, or employ any such person in any manner whatsoever, without the prior written consent of the Employer; provided, however, that nothing herein shall prohibit Employee from making a general employment solicitation to the public that does not target any employee or independent contractor of Employer or its subsidiaries and then having contact with and/or employing such employee or independent contractor who responds to such general solicitation or who otherwise independently contacts Employee.

4.3 Confidentiality. Employee agrees that all data and information about the Employer's business, legal affairs, plans, finances, plants, equipment, processes and methods of operation disclosed to, acquired by or developed by Employee during performance of the work hereunder is and shall remain the exclusive property of the Employer. Except for such information and data that has entered the public domain through no fault of Employee or to have been in Employee's possession prior to disclosure to Employee by the Employer and/or the performance of Employee's services hereunder, Employee shall during the term of the Agreement and thereafter in perpetuity maintain as confidential and not disclose to third parties or otherwise use, and will enjoin Employee's employees, agents or subcontractors (as applicable) from using, such information except as duly authorized in the conduct of the Employer's business or as otherwise authorized in advance in writing signed by the Employer's Chief Executive Officer (or his successor). Employee agrees that such data and information shall be used by Employee solely for the purpose of performing services for the Employer and not for the benefit of any other person or entity whatsoever.

Section 5. Miscellaneous.

5.1 Entire Agreement; Amendment. This Agreement represents the entire understanding of the parties hereto with respect to the employment of Employee and supersedes all prior agreements with respect thereto. This Agreement may not be altered or amended except in writing executed by both parties hereto.

5.2 Assignment; Benefit. This Agreement is personal and may not be assigned by Employee. This Agreement may be assigned by Employer and shall inure to the benefit of and be binding upon the successors and assigns of Employer.

5.3 Notice. Notices and all other communications provided for in this Agreement shall be in writing and shall be deemed to have been duly given when delivered by (i) personal delivery, (ii) a nationally-recognized, next-day courier service, or (iii) first-class registered or certified mail, postage prepaid addressed to Employer at its principal office and to Employee at the address listed on Employee's invoices, provided that all notices to Employer shall be directed to the attention of the Chief Executive Officer, or to such other address as either party may have furnished to the other in writing in accordance herewith, except that notice of change of address shall be effective only upon receipt.

5.4 Arbitration. Any disagreement, dispute or claim arising out of or relating to this Agreement which cannot be settled by the parties hereto shall be resolved by arbitration in accordance with the following provisions: (a) the forum for arbitration shall be Denver, Colorado, (b) governing law shall be the laws of the State of Colorado, (c) the number of arbitrators shall be one (1), who shall be a retired judge; (d) arbitration shall be administered by JAMS; (e) the rules of arbitration shall be as determined by JAMS, as modified by any other instructions that the parties hereto may agree upon at the time; (f) the award rendered by arbitration shall be final and binding upon the parties hereto, and judgment on the award may be entered in any court of competent jurisdiction in the United States; (g) Employer and Employee shall each pay fifty percent (50%) of the fees and costs charged by the arbitrator and/or JAMS. Notwithstanding the foregoing, Employer and/or Parent shall be entitled to seek equitable relief from a court of competent jurisdiction for any alleged violation of Section 4 (Covenant Not to Compete, Covenant Not to Solicit, and Confidentiality).

5.5 Waiver of Jury Trial. Each of the parties hereto hereby irrevocably waives to the fullest extent permitted by applicable law any right he or it may have to a trial by jury with respect to any action directly or indirectly arising out of, under or in connection with this Agreement. Each of the parties hereto hereby (a) certifies that no representative of any other party has represented, expressly or otherwise, that such other party would not, in the event of any such action, seek to enforce the foregoing wavier; and (b) acknowledges that it has been induced to enter into this Agreement and the transactions, as applicable, by, among other things, the mutual waivers and certifications in this Section 5.5 (Waiver of Jury Trial).

5.6 Construction. Each party has cooperated in the drafting and preparation of this Agreement. Hence, in any construction to be made of this Agreement, the same shall not be construed against any party on the basis that the party was the drafter. The captions of this Agreement are not part of the provisions hereof and shall have no force or effect.

5.7 Execution. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Photographic or facsimile copies of such signed counterparts may be used in lieu of the originals for any purpose.

5.8 Legal Counsel. Employee and Employer recognize that this is a legally binding contract and acknowledge and agree that they have had the opportunity to consult with legal counsel of their choice.

5.9 Waiver. The waiver by any party of a breach of any provision of this Agreement by the other shall not operate or be construed as a waiver of any other or subsequent breach of such or any provision.

5.10 Invalidity of Provision. In the event that any provision of this Agreement is determined to be illegal, invalid, or void for any reason, the remaining provisions hereof shall continue in full force and effect.

5.11 Approval by DaVita Inc. as to Form. The parties acknowledge and agree that this Agreement shall take effect and be legally binding upon the parties only upon full execution hereof by the parties and upon approval by DaVita Inc. as to the form of hereof.

The remainder of this page is left blank intentionally.

IN WITNESS WHEREOF, the parties hereto have entered into this Agreement effective as of the date and year first written above.

Exhibit 10.13

EMPLOYMENT AGREEMENT

This Employment Agreement (this "Agreement") is made effective as of January 3, 2017 (the "Effective Date"), by and between DaVita Inc. ("Parent") and one of its controlled affiliates, TRC Total Renal Care, Inc. ("Employer," and collectively with Parent, "DaVita") and Joel Ackerman ("Employee").

In consideration of the mutual covenants and agreements hereinafter set forth and for other good and valuable consideration, the parties hereto, intending to be legally bound hereby, agree as follows:

Section 1. Employment and Duties. Employer and Employee expect that Employee's employment will commence on or about February 21, 2017. Employee will serve initially in the position of Senior Vice President, Finance until the close of business on the first business day following the day on which Parent files its Annual Report on Form 10-K for the year ended December 31, 2016 with the Securities and Exchange Commission, when Employee will begin serving in the position of Chief Financial Officer, provided that if Employee commences employment on or after the first business day following the day on which the Parent files such Form 10-K, he shall immediately begin serving in the position of Chief Financial Officer. Employee accepts such employment on the terms and conditions set forth in this Agreement. Employee shall report to Parent's Chief Executive Officer and shall perform the duties of Chief Financial Officer or any additional or different duties that are similar to or consistent with that position. Initially, Employee shall work out of New York, New York, although the location is subject to change to suit business needs, provided however, that relocation of the office more than thirty-five (35) miles from its current location shall constitute "Good Reason" for Employee to resign as set forth below in this Agreement. Employee agrees to devote substantially all of his time, energy, and ability to the business of Employer on a full-time basis and shall not engage in any other business activities during the term of this Agreement, including but not limited to providing consulting services to any investment firm, such as a hedge fund, provided however, Employee may pursue other normal charitable activities so long as such activities do not interfere with his ability to perform his duties. Employee agrees that he shall not serve on the board of directors, advisory board, or similar oversight body of any other not-for-profit or for-profit company, entity or institution without the express written approval of the Chief Executive Officer or the Board of Directors. Notwithstanding the foregoing, Employer agrees that Employee may continue his role on the Board of Directors of Kindred Healthcare, Champions Oncology and One Acre Fund. Employee shall at all times observe and abide by the Employer's policies and procedures as in effect from time to time.

Section 2. Compensation. In consideration of the services to be performed by Employee hereunder, Employee shall receive the following compensation and benefits:

2.1 Base Salary. Employer shall pay Employee a base salary of $700,000 per annum, less standard withholdings and authorized deductions. Employee shall be paid consistent with Employer's payroll schedule. The base salary will be reviewed from time to time. Employer, in its sole discretion, may increase the base salary as a result of any such review. Employer may not reduce Employee's base salary unless the Employee authorizes it in writing or the Employer is reducing the base salary of other similarly-situated executives by a similar percentage.

2.2 Benefits. Employee and/or his family, as the case may be, shall be eligible for participation in and shall receive all benefits under Employer's health and welfare benefit plans (including, without limitation, medical, prescription, dental, disability, and life insurance) under the same terms and conditions applicable to most executives at similar levels of compensation and responsibility.

2.3 Sign-On Bonus. Employer will pay Employee a sign-on bonus of two hundred thousand dollars ($200,000), less standard withholdings and authorized deductions, within twenty-one (21) days after Employee's first date of employment with Employer.

2.4 Performance Bonus.

(a) Employee shall be eligible to receive an annual cash bonus under the short-term incentive program approved by the Parent's Board of Directors and applicable to the company's executive officers exposed to the requirements of Section 162(m) of the Internal Revenue Code (the "Short-Term Incentive Program", or "STI Program"). Under the STI Program, the actual annual cash bonus amount payable to Employee for any one year (the "Bonus") is primarily contingent on the level of the Employer's achievement on the performance metrics specified in the Short-Term Incentive Program for that year. For fiscal year 2017, the Bonus payable to Employee in cash under the STI Program will be an amount between zero and $1,500,000. Employee shall not be eligible for any Bonus for fiscal year 2016.

(b) For Employee and other senior executives subject to the STI Program, the amounts of annual Bonuses earned are objectively and formulaically driven, further subject to negative discretion (i.e., further downward adjustment) in the sole discretion of the Board of Directors or the Compensation Committee of the Board of Directors.

(c) Subject to the terms of Section 3.3 (Other Termination), Employee must be employed by Employer (or an affiliate) on the date any Bonus is paid to be eligible to receive such Bonus and, if Employee is not employed by Employer (or an affiliate) on the date any Bonus is paid for any reason whatsoever, Employee shall not be entitled to receive such Bonus.

2.5 Vacation. Employee shall have vacation, subject to the approval of his direct manager.

2.6 Stock Appreciation Rights. Parent shall issue a grant to Employee of stock-settled Stock Appreciation Rights ("SSARs") with a value of two million dollars ($2,000,000) as customarily determined by Parent. This grant shall have a five-year term and vest 50% on the third and fourth anniversaries of the grant date. The base price of the award shall be the closing price as reported on the New York Stock Exchange on the start date of Employee's employment, or the date the SSAR grant has been formally approved by the appropriate authorized body or Officer, whichever date is later. The terms of the SSAR grant will be reflected in a separate agreement to be signed by Parent and Employee, which may include, among other terms, a noncompetition agreement.

2.7 Performance Stock Units and/or Restricted Stock Units. In early 2017, at the time when Parent makes grants to its other similarly-situated senior officers, Parent will grant Employee one million dollars ($1,000,000) in value of Employer's Performance Stock Units ("PSUs") and/or Restricted Stock Units ("RSUs"), with value determined similarly to such other senior officers, subject to the following time vesting conditions: such PSUs and/or RSUs shall vest fifty percent (50%) each on approximately the third and fourth anniversaries of the grant date**.** The composition of the grant (i.e., the number of PSUs and/or RSUs) will be determined by Parent in its sole discretion. Parent will determine, in its sole discretion, the performance targets for any PSU grant. The terms of the PSU and/or RSU grant(s) will be reflected in a separate Performance Stock Units Agreement and/or Restricted Stock Units Agreement to be signed by Parent and Employee, and each agreement may include, among other terms, a noncompetition agreement.

2.8 Management Share Ownership Policy. Employee shall review and understand the terms of the Management Share Ownership Policy with respect to all equity-based awards to the extent it applies to Employee.

2.9 Return of Compensation or other Property Received in Connection with Director, Officer, Shareholder or Similar Position. All fees, compensation, other remuneration, dividends, distributions, or other property or financial benefit received by Employee in connection with Employee's position as a director, officer, member, shareholder, partner or any other similar position of any controlled or uncontrolled direct or indirect subsidiary or affiliate of Employer, or other contractual obligor to Employer or any of its subsidiaries or affiliates the obligations of which constitute revenue to Employer or any of its subsidiaries or affiliates and of which Employee beneficially owns or has the right to acquire, directly or indirectly, 10% or more of the equity interests or has the power to vote 10% or more of the voting interests, shall belong to Employer and shall be immediately remitted to Employer. Notwithstanding the foregoing, this provision shall not apply to any amounts payable to, earned by, received by or otherwise due to Employee as employment compensation from Employer or any of its subsidiaries or affiliates, or any dividends or other distributions received by Employee in Employee's capacity as a stockholder of Parent.

2.10 Indemnification. In the event that the Employee is made a party or threatened to be made a party to any action, suit, or proceeding, whether civil, criminal, administrative, or investigative, by reason of the fact that he is or was a Director or officer of the Parent or Employer, or while a director or officer of the Parent or Employer is or was serving at the request of the Parent or Employer as a Director, officer, employee, or agent of another corporation or of a partnership, joint venture, trust or other enterprise, the Employee shall be indemnified and held harmless by the Parent and Employer to the fullest extent permitted under applicable law and the Parent's bylaws, and as specifically set forth in the Parent's bylaws, as the same exist or may hereafter be amended by Parent.

2.11 Reimbursement. Employer also agrees to reimburse Employee in accordance with Employer's reimbursement policies for travel and entertainment expenses, as well as other business-related expenses, incurred in the performance of his duties hereunder.

2.12 Changes to Benefit Plans. Employer reserves the right to modify, suspend, or discontinue any and all of its health and welfare benefit plans, practices, policies, and programs at any time without recourse by Employee so long as such action is taken generally with respect to all other similarly-situated peer executives and does not single out Employee.

2.13 Possible Recoupment of Certain Compensation. Notwithstanding any other provision in this Agreement to the contrary, Employee shall be subject to the written policies of the Board of Directors applicable to executives of the Employer, including without limitation any Board policy relating to recoupment or "claw back" of compensation, as they exist from time to time during the Employee's employment by the Employer and thereafter.

Section 3. Provisions Relating to Termination of Employment.

3.1 Employment Is At-Will. Employee's employment with Employer is "at will" and is terminable by Employer or by Employee at any time and for any reason or no reason, subject to the notice requirements set forth below.

3.2 Termination for Material Cause. Employer may terminate Employee's employment for Material Cause (as defined below). Upon termination for Material Cause, Employee shall (i) be entitled to receive the Base Salary and benefits as set forth in Section 2.1 (Base Salary) and Section 2.2 (Benefits), respectively, through the effective date of such termination and (ii) not be entitled to receive any other compensation, benefits, or payments of any kind, except as otherwise required by law or by the terms of any benefit or retirement plan or other arrangement that would, by its terms, apply.

3.3 Other Termination.

(a) Employer may terminate the employment of Employee for any reason or for no reason at any time upon at least thirty (30) days' advance written notice. If prior to the first anniversary of the date Employee commences employment, Employee resigns for "Good Reason," or Employer terminates the employment of Employee for reasons other than for death, Material Cause, or Disability, and contingent upon Employee's execution of the Employer's standard Severance and General Release Agreement within twenty-eight days of the termination of Employee's employment, Employee shall be entitled to the benefits set forth in the DaVita Inc. Severance Plan, pursuant to the terms and conditions of that plan as they exist at the time of the termination of Employee's employment.

(b) If on, or after, the first anniversary of date Employee's employment commences, Employee resigns for "Good Reason," or Employer terminates Employee's employment for any reasons other than death, Material Cause, or Disability, Employee shall be entitled to receive: (i) the benefits set forth in the DaVita Inc. Severance Plan, pursuant to the terms and conditions of that plan as they exist at the time of termination of Employee's employment; (b) a bonus in the amount Employee received for the previous year pro-rated based on the number of months served in the year that Employee's employment is terminated; and (c) any amounts due Employee under any stock option, stock grant, or any other compensation plan, in the accordance of the terms of such plan(s). Moreover, if the Employee timely and properly elects health continuation coverage under COBRA, the Employer shall pay for the employer portion of the cost of health continuation coverage for Employee and his dependents. Employer shall make such payments until the earliest of: (i) the eighteen-month anniversary of the Termination Date; (ii) the date the Employee is no longer eligible to receive COBRA continuation coverage; and (iii) the date on which the Employee receives/becomes eligible to receive substantially similar coverage from another employer or other source.

(c) For purposes of this provision, an Employee's employment has been terminated when Employee is no longer providing services for Employer after a specific date or the level of bona fide services that Employee would perform (as an employee or independent contractor) after a specific date would permanently decrease to no more than 20% of the average level of bona fide services performed over the immediately preceding thirty-six month period (or the full period of service if Employee was employed for less than thirty-six months).

3.4. Change in Control Termination. Notwithstanding any other provision contained herein, if the Employee's employment hereunder is terminated by the Employee for Good Reason or by the Employer without Material Cause (other than on account of the Employee's death or Disability), in each case at the time of, or within twelve (12) months following, a Change in Control, the Employee shall be entitled to receive the following:

(a) a lump sum payment equal to two (2) times the sum of the Employee's Base Salary and an amount equal to the bonus received for the year previous to the year in which the Termination Date occurs; and

(b) if the Employee timely and properly elects health continuation coverage under COBRA, the Employer shall pay for the employer portion of the cost of health continuation coverage for Employee and his dependents. Employer shall make such payments until the earliest of: (i) the eighteen-month anniversary of the Termination Date; (ii) the date the Employee is no longer eligible to receive COBRA continuation coverage; and (iii) the date on which the Employee receives/becomes eligible to receive substantially similar coverage from another employer or other source.

3.5 Voluntary Resignation. Employee may resign from Employer at any time upon at least thirty (30) days' advance written notice. If Employee resigns from Employer, Employee shall (i) be entitled to receive the base salary and benefits as set forth in Section 2.1 (Base Salary) and Section 2.2 (Benefits), respectively, through the effective date of such termination and (ii) not be entitled to receive any other compensation, benefits, or payments of any kind, except as otherwise required by law or by the terms of any benefit or retirement plan or other arrangement that would, by its terms, apply. In the event Employee resigns from Employer at any time, Employer shall have the right to make such resignation effective as of any date before the expiration of the required notice period.

3.6 Disability. Upon thirty (30) days' advance notice (which notice may be given before the completion of the periods described herein), Employer may terminate Employee's employment for Disability (as defined below).

3.7 Definitions. For the purposes of this Agreement, the following terms shall have the meanings indicated:

(a) "Disability" shall mean the inability, for a period of six (6) months, to adequately perform Employee's regular duties, with or without reasonable accommodation, due to a physical or mental illness, condition, or disability.

(b) "Material Cause" shall mean any of the following: (i) conviction of a felony or plea of no contest to a felony; (ii) any act of fraud or dishonesty in connection with the performance of his duties; (iii) repeated failure or refusal by Employee to follow policies or directives reasonably established by the Chief Executive Officer of Parent or his/her designee that goes uncorrected for a period of ten (10) consecutive days after written notice has been provided to Employee; (iv) a material breach of this Agreement; (v) any gross or willful misconduct or gross negligence by Employee in the performance of his duties; (vi) egregious conduct by Employee that brings Employer or any of its subsidiaries or affiliates into public disgrace or disrepute; (vii) an act of unlawful discrimination, including sexual harassment; (viii) a violation of the duty of loyalty or of any fiduciary duty; or (ix) exclusion or notice of exclusion of Employee from participating in any federal health care program.

Termination of the Employee's employment shall not be deemed to be for Material Cause unless and until the Employer delivers to the Employee a copy of a written notice finding that the Employee has engaged in the conduct described in any of (i)-(viii) above. Except for a failure, breach, or refusal which, by its nature, cannot reasonably be expected to be cured, the Employee shall have fourteen (14) calendar days from the delivery of written notice by the Employer within which to cure any acts constituting Material Cause; provided however, that, if the Employer reasonably expects irreparable injury from a delay of fourteen (14) calendar days, the Employer may give the Employee notice of such shorter period within which to cure as is reasonable under the circumstances, which may include the termination of the Employee's employment without notice and with immediate effect.

(c) "Good Reason" shall mean the occurrence of any of the following, in each case during the Employment Term without the Employee's written consent:

i. a material reduction in the Employee's Base Salary other than a general reduction in Base Salary that affects all similarly situated executives in substantially the same proportions; or

ii. a relocation of the Employee's principal place of employment by more than thirty-five (35) miles; or

iii. any material breach by the Employer of any material provision of this Agreement; or

iv. the Employer's failure to obtain an agreement from any successor to the Employer to assume and agree to perform this Agreement in the same manner and to the same extent that the Employer would be required to perform if no succession had taken place, except where such assumption occurs by operation of law; or

v. a material, adverse change in the Employee's title, authority, duties, or responsibilities (other than temporarily while the Employee is physically or mentally incapacitated or as required by applicable law) taking into account the Employer's size, status as a public company, and capitalization as of the date of this Agreement.

The Employee cannot terminate his employment for Good Reason unless he has provided written notice to the Employer of the existence of the circumstances providing grounds for termination for Good Reason within sixty (60) days of the initial existence of such grounds and the Employer has had at least sixty (60) days from the date on which such notice is provided to cure such circumstances. If the Executive does not terminate his employment for Good Reason within ninety (90) days after the first occurrence of the applicable grounds, then the Executive will be deemed to have waived his right to terminate for Good Reason with respect to such grounds.

(d) "Change in Control" shall mean (i) any transaction or series of transactions in which any person or group (within the meaning of Rule 13d-5 under the Exchange Act and Sections 13(d) and 14(d) of the Exchange Act) becomes the direct or indirect "beneficial owner" (as defined in Rule 13d-3 under the Exchange Act), by way of a stock issuance, tender offer, merger, consolidation, other business combination or otherwise, of greater than 50% of the total voting power (on a fully diluted basis as if all convertible securities had been converted and all warrants and options had been exercised) entitled to vote in the election of directors of Parent (including any transaction in which Parent becomes a wholly-owned or majority-owned subsidiary of another corporation), (ii) any merger or consolidation or reorganization in which Parent does not survive, (iii) any merger or consolidation in which Parent survives, but the shares of Parent's Common Stock outstanding immediately prior to such merger or consolidation represent 40% or less of the voting power of Parent after such merger or consolidation, and (iv) any transaction in which more than 40% of Parent's assets are sold. However, despite the occurrence of any of the above-directed events, a Change of Control will not have occurred if Kent Thiry remains the Chief Executive Officer or Executive Chair of Parent for at least one (1) year after the Change of Control or becomes the Chief Executive Officer or Executive Chair of the surviving company with which Parent merged or consolidated and remains in that position for at least one (1) year after the Change of Control.

3.8 Notice of Termination. Any purported termination of Employee's employment by Employer or by Employee shall be communicated by a written Notice of Termination to the other party hereto in accordance with Section 5 (Miscellaneous) hereof. A "Notice of Termination" shall mean a written notice that indicates the specific termination provision in this Agreement.

3.9 Effect of Termination. Upon termination, this Agreement shall be of no further force and effect and neither party shall have any further right or obligation hereunder; provided, however, that no termination shall modify or affect the rights and obligations of the parties that have accrued prior to termination; and provided further, that the rights and obligations of the parties under Section 3 (Provisions Relating to Termination of Employment), Section 4 (Noncompetition, Nonsolicitation, Confidentiality and Intellectual Property Agreement), and Section 5 (Miscellaneous) shall survive termination of this Agreement.

3.10 Notwithstanding any provision herein to the contrary, in the event that any payment to be made to Employee hereunder (whether pursuant to this Section 3 (Provisions Relating to Termination of Employment) or any other Section) as a result of Employee's termination of employment is determined to constitute "deferred compensation" subject to Section 409A of the Internal Revenue Code, and Employee is a "Key Employee" under the DaVita Inc. Key Employee Policy for 409A Arrangements at the time of Employee's termination of employment, all such deferred compensation payments payable during the first six (6) months following Employee's termination of employment shall be delayed and paid in a lump sum during the seventh calendar month following the calendar month during which Employee's termination of employment occurs.

Section 4: Noncompetition, Nonsolicitation, Confidentiality and Intellectual Property Agreement. Employee, contemporaneously herewith, shall enter into a Noncompetition, Nonsolicitation, Confidentiality and Intellectual Property Agreement, the terms of which are incorporated herein and made a part hereof as though set forth in this Agreement.

Section 5. Miscellaneous.

5.1 Arbitration. Any disagreement, dispute or claim arising out of or relating to this Agreement and/or Employee's employment with DaVita which cannot be settled by the parties hereto shall be resolved by arbitration in accordance with the following provisions: (a) the forum for arbitration shall be Denver, Colorado, (b) governing law shall be the laws of the State of Colorado, (c) the number of arbitrators shall be one (1), who shall be a retired judge; (d) arbitration shall be administered by JAMS; (e) the rules of arbitration shall be as determined by JAMS, as modified by any other instructions that the parties hereto may agree upon at the time; (f) the award rendered by arbitration shall be final and binding upon the parties hereto, and judgment on the award may be entered in any court of competent jurisdiction in the United States; (g) DaVita and Employee shall each pay fifty percent (50%) of the fees and costs charged by the arbitrator and/or JAMS. Notwithstanding the foregoing, DaVita shall be entitled to seek equitable relief from a court of competent jurisdiction for any alleged violation of Section 4 (Noncompetition, Nonsolicitation, Confidentiality and Intellectual Property Agreement).

5.2 Waiver of Jury Trial. Each of the parties hereto hereby irrevocably waives to the fullest extent permitted by applicable law any right he or it may have to a trial by jury with respect to any action directly or indirectly arising out of, under or in connection with this Agreement and/or Employee's employment with DaVita. Each of the parties hereto hereby (a) certifies that no representative of any other party has represented, expressly or otherwise, that such other party would not, in the event of any such action, seek to enforce the foregoing wavier; and (b) acknowledges that it has been induced to enter into this Agreement and the transactions, as applicable, by, among other things, the mutual waivers and certifications in this Section 5.2 (Waiver of Jury Trial).

5.3 Entire Agreement; Amendment. This Agreement represents the entire understanding of the parties hereto with respect to the employment of Employee and supersedes all prior agreements with respect thereto. This Agreement may not be altered or amended except in writing executed by both parties hereto.

5.4 Assignment; Benefit. This Agreement is personal and may not be assigned by Employee. This Agreement may be assigned by Employer and shall inure to the benefit of and be binding upon the successors and assigns of Employer.

5.5. Applicable Law. This Agreement shall be governed by the laws of the State of Colorado, without regard to the principles of conflicts of laws.

5.6 Notice. Notices and all other communications provided for in this Agreement shall be in writing and shall be deemed to have been duly given when delivered by (i) personal delivery, (ii) a nationally-recognized, next-day courier service, or (iii) first-class registered or certified mail, postage prepaid addressed to Employer at its principal office and to Employee at the address listed on Employee's invoices, provided that all notices to Employer shall be directed to the attention of the Chief Executive Officer, or to such other address as either party may have furnished to the other in writing in accordance herewith, except that notice of change of address shall be effective only upon receipt.

5.7 Construction. Each party has cooperated in the drafting and preparation of this Agreement. Hence, in any construction to be made of this Agreement, the same shall not be construed against any party on the basis that the party was the drafter. The captions of this Agreement are not part of the provisions hereof and shall have no force or effect.

5.8 Execution. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Photographic, electronic or facsimile copies of such signed counterparts may be used in lieu of the originals for any purpose.

5.9 Legal Counsel. Employee and Employer recognize that this is a legally binding contract and acknowledge and agree that they have had the opportunity to consult with legal counsel of their choice.

5.10 Waiver. The waiver by any party of a breach of any provision of this Agreement by the other shall not operate or be construed as a waiver of any other or subsequent breach of such or any provision.

5.11 Invalidity of Provision. In the event that any provision of this Agreement is determined to be illegal, invalid, or void for any reason, the remaining provisions hereof shall continue in full force and effect.

5.12 Approval by DaVita Inc. as to Form. The parties acknowledge and agree that this Agreement shall take effect and be legally binding upon the parties only upon full execution hereof by the parties and upon approval by DaVita Inc. as to the form of hereof.

The remainder of this page is left blank intentionally.

IN WITNESS WHEREOF, the parties hereto have entered into this Agreement effective as of the date and year first written above.

TABLE OF CONTENTS

DAVITA DEFERRED COMPENSATION PLAN

DaVita HealthCare Partners Inc., a Delaware corporation (the "**Company**"), hereby establishes the DaVita Deferred Compensation Plan (the "**Plan**"), effective January 1, 2015, (the "**Effective Date**"), for the purpose of providing a select group of management or highly compensated employees of the Company the opportunity to defer the receipt of Compensation otherwise payable to such employees in accordance with the terms of the Plan. The Plan is intended to, and shall be interpreted to, comply in all respects with Code Section 409A and those provisions of ERISA applicable to an unfunded plan maintained primarily to provide deferred compensation for a select group of management or highly compensated employees.

This Plan is considered a complete restatement of the DaVita Voluntary Deferral Plan and will apply to deferrals for 2015 and future years. Deferrals for 2014 and prior years shall be governed by the DaVita Voluntary Deferral Plan in effect on December 31, 2014.

ARTICLE I
DEFINITIONS

1.1 "**Account**" or "**Accounts**" shall mean the bookkeeping account or accounts established under this Plan pursuant to Article 4 and maintained by the Company in the names of the respective Participants, to which all amounts deferred under the Plan and earnings on such amounts shall be credited, and from which all amounts distributed under the Plan shall be debited.

1.2 "**Annual Incentive**" means a Participant's annual bonus payment, if any, that is earned in the same Plan Year as the Participant's Base Salary but is payable (if not deferred under this Plan) in the following Plan Year.

1.3 "**Base Salary**" shall mean a Participant's annual base salary, excluding incentive and discretionary bonuses, commissions, reimbursements and other non-regular remuneration, received from the Company prior to reduction for any salary deferrals under benefit plans sponsored by the Company, including but not limited to, plans established under Code Section 125 or Code Section 401(k).

1.4 "**Beneficiary**" or "**Beneficiaries**" shall mean the person, persons or entity designated as such pursuant to Section 7.1.

1.5 "**Board**" shall mean the Board of Directors of the Company.

1.6 "**Code**" shall mean the Internal Revenue Code of 1986, as amended, as interpreted by Treasury regulations and applicable authorities promulgated thereunder.

1.7 "**Committee**" shall mean the person or persons appointed by the Board to administer the Plan in accordance with Article 9.

1.8 "**Compensation**" shall mean all amounts eligible for deferral for a particular Plan Year under Section 3.1.

1.9 "**Deferral Account**" shall mean an Account maintained for each Participant that is credited with Participant deferrals pursuant to Section 4.1.

1.10 "**Disability**" or "**Disabled**" shall mean (consistent with the requirements of Code Section 409A) that the Participant is (a) unable to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than 12 months, or (b) by reason of any medically determinable physical or mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than 12 months, receiving income replacement benefits for a period of not less than three months under an accident and health plan covering employees of the Participant's Employer. For purposes of this Plan, a Participant shall be deemed Disabled if determined to be totally disabled by the Social Security Administration. A Participant shall also be deemed Disabled if determined to be disabled in accordance with the applicable disability insurance program of such Participant's Employer, provided that the definition of "disability" applied under such disability insurance program complies with the requirements of this Section.

1.11 "**Distributable Amount**" shall mean the vested balance in the applicable Account as determined under Article 4.

1.12 "**Eligible Executive**" shall mean a highly compensated or management level employee of an Employer selected by the Committee to be eligible to participate in the Plan.

1.13 "**Employer(s)**" shall be defined as follows:

(a) Except as otherwise provided in part (b) of this Section, the term "Employer" shall mean the Company and/or any of its subsidiaries (now in existence or hereafter formed or acquired) that have been selected by the Committee to participate in the Plan and have adopted the Plan as a participating Employer**.**

(b) For the purpose of determining whether a Participant has experienced a Separation from Service, the term "Employer" shall mean:

(1) The entity for which the Participant performs services and with respect to which the legally binding right to compensation deferred under this Plan arises; and

(2) All other entities with which the entity described above would be aggregated and treated as a single employer under Code Section 414(b) (controlled group of corporations) and Code Section 414(c) (a group of trades or businesses, whether or not incorporated, under common control), as applicable. In order to identify the group of entities described in the preceding sentence, the Committee shall use an ownership threshold of at least 50% as a substitute for the 80% minimum ownership threshold that appears in, and otherwise must be used when applying, the applicable provisions of (A) Code Section 1563 for determining a controlled group of corporations under Code Section 414(b), and (B) Treas. Reg. §1.414(c)-2 for determining the trades or businesses that are under common control under Code Section 414(c).

1.14 "**ERISA**" shall mean the Employee Retirement Income Security Act of 1974, as amended, including Department of Labor and Treasury regulations and applicable authorities promulgated thereunder.

1.15 "**Financial Hardship**" shall mean a severe financial hardship to the Participant resulting from an illness or accident of the Participant, the Participant's spouse, or a dependent (as defined in Code Section 152, without regard to Code Sections 152(b)(1), (b)(2), and (d)(1)(B))) of the Participant, loss of the Participant's property due to casualty, or other similar extraordinary and unforeseeable circumstances arising as a result of events beyond the control of the Participant, but shall in all events correspond to the meaning of the term "unforeseeable emergency" under Code Section 409A. No Financial Hardship shall be deemed to exist to the extent that the financial hardship is or may be relieved (a) through reimbursement or compensation by insurance or otherwise, (b) by borrowing from commercial sources on reasonable commercial terms to the extent that this borrowing would not itself cause a severe financial hardship, (c) by cessation of deferrals under the Plan, or (d) by liquidation of the Participant's other assets to the extent that this liquidation would not itself cause severe financial hardship. The Committee shall determine whether the circumstances of the Participant constitute a Financial Hardship.

1.16 "**Fund**" or "**Funds**" shall mean one or more of the investments selected by the Committee pursuant to Section 3.3 of the Plan.

1.17 "**Hardship Distribution**" shall mean an accelerated distribution of benefits or a cancellation of deferral elections pursuant to Section 5.5 to a Participant (including terminated Participants with Account balances) who has suffered a Financial Hardship.

1.18 "**Interest Rate**" shall mean, for each Fund, the rate of return derived from the net gain or loss on the assets of such Fund, as determined by the Committee.

1.19 "**Participant**" shall mean any Eligible Executive who becomes a Participant in this Plan in accordance with Article 2.

1.20 "**Participant Election(s)**" shall mean the forms or procedures by which a Participant makes elections with respect to (a) voluntary deferrals of his/her Compensation, (b) the Funds, which shall act as the basis for crediting of interest on Account balances, and (c) the form and timing of distributions from Accounts. Participant Elections may take the form of an electronic communication followed by appropriate confirmation according to specifications established by the Committee.

1.21 "**Payment Date**" shall mean the date by which a total distribution of the Distributable Amount shall be made or the date by which installment payments of the Distributable Amount shall commence, which shall be a date in January of the Plan Year following the Plan Year in which occurs the event triggering the distribution or, in the case of a Scheduled In-Service Distribution, in January of the Plan Year indicated by the Participant for the elected Scheduled In-Service Distribution. Notwithstanding the foregoing:

(a) The Payment Date shall not be before the earliest date on which benefits may be distributed under Code Section 409A without violation of the provisions thereof, as reasonably determined by the Committee.

(b) The Payment Date for a Scheduled In-Service Distribution may not be earlier than two years after the Plan Year to which the deferral election applies.

(c) To the extent required under Code Section 409A, any amount that otherwise would be payable to a Participant who is a "specified employee" of the Company, as determined by the Company in accordance with Code Section 409A, during the six-month period following such Participant's Separation from Service, shall be suspended until the lapse of such six-month period (or, if earlier, the date of death of the Participant). The amount that otherwise would be payable to such Participant during such period of suspension, together with interest on such suspended amount credited pursuant to the rules of the Plan, shall be paid in a single payment within 30 days following the end of such six-month period (or, if such day is not a business day, on the next succeeding business day) or within 30 days following the death of the Participant during such six-month period, provided that the death of the Participant during such six-month period shall not cause the acceleration of any amount that otherwise would be payable on any date during such six-month period following the date of the Participant's death.

1.22 "**Performance-Based Compensation**" shall mean compensation the entitlement to or amount of which is contingent on the satisfaction of pre-established organizational or individual performance criteria relating to a performance period of at least 12 consecutive months, as determined by the Committee in accordance with Treas. Reg. §1.409A-1(e).

1.23 "**Plan Year**" shall mean the calendar year.

1.24 "**Separation from Service**" shall mean a Separation from Services provided by a Participant to his or her Employer, whether voluntarily or involuntarily, other than by reason of death or Disability, as determined by the Committee in accordance with Treas. Reg. §1.409A-1(h). For a Participant who provides services to an Employer as an employee, a Separation from Service shall occur when such Participant has experienced a termination of employment with the Employer. A Participant shall be considered to have experienced a termination of employment when the facts and circumstances indicate that the Participant and his or her Employer reasonably anticipate that either (i) no further services will be performed for the Employer after a certain date, or (ii) that the level of bona fide services the Participant will perform for the Employer after such date (whether as an employee or as an independent contractor) will permanently decrease to no more than 20% of the average level of bona fide services performed by such Participant (whether as an employee or an independent contractor) over the immediately preceding 36-month period (or the full period of services to the employer if the Participant has been providing services to the Employer less than 36 months).

If a Participant is on military leave, sick leave, or other bona fide leave of absence, the employment relationship between the Participant and the Employer shall be treated as continuing intact, provided that the period of such leave does not exceed 6 months, or if longer, so long as the Participant retains a right to reemployment with the Employer under an applicable statute or by contract. If the period of a military leave, sick leave, or other bona fide leave of absence exceeds 6 months and the Participant does not retain a right to reemployment under an applicable statute or by contract, the employment relationship shall be considered to be terminated for purposes of this Plan as of the first day immediately following the end of such 6-month period. In applying the provisions of this paragraph, a leave of absence shall be considered a bona fide leave of absence only if there is a reasonable expectation that the Participant will return to perform services for the Employer.

1.25 "**Scheduled In-Service Distribution**" shall mean a scheduled in-service distribution date elected by the Participant for distribution of amounts from a specified Deferral Account, including earnings thereon, which distribution shall be made provided that the Participant has not experienced a Separation from Service, as provided under Section 5.4.

1.26 "**Years of Service**" shall mean the cumulative consecutive years of continuous full-time employment with the Employer (including approved leaves of absence of six months or less or legally protected leaves of absence), beginning on the date the Participant first began service with the Employer, and counting each anniversary thereof. A partial year of employment shall not be treated as a Year of Service.

ARTICLE II
PARTICIPATION

2.1 Enrollment Requirements; Commencement of Participation

(a) As a condition to participation, each Eligible Executive shall complete, execute and return to the Committee the appropriate Participant Elections, as well as such other documentation and information as the Committee reasonably requests, by the deadline(s) established by the Committee. In addition, the Committee shall establish from time to time such other enrollment requirements as it determines, in its sole discretion, are necessary.

(b) Each Eligible Executive shall commence participation in the Plan on the date that the Committee determines that the Eligible Executive has met all enrollment requirements set forth in this Plan and required by the Committee, including returning all required documents to the Committee within the specified time period.

(c) If an Eligible Executive fails to meet all requirements established by the Committee within the period required, that Eligible Executive shall not be eligible to participate in the Plan during such Plan Year.

ARTICLE III
DEFERRAL ELECTIONS

3.1 Elections to Defer Compensation. Elections to defer Compensation shall take the form of a flat dollar amount or a whole percentage (less applicable payroll withholding requirements for Social Security and income taxes and employee benefit plans, as determined in the sole and absolute discretion of the Committee) of up to a maximum of:

(1) 50% of Base Salary; and

(2) 100% of Annual Incentives.

3.2 Timing of Deferral Elections; Effect of Participant Election(s).

(a) General Timing Rule for Deferral Elections. Except as otherwise provided in this Section 3.2, in order for a Participant to make a valid election to defer Compensation, the Participant must submit Participant Election(s) on or before the deadline established by the Committee, which shall be no later than the December 31st preceding the Plan Year in which such Compensation will be earned.

Any deferral election made in accordance with this Section 3.2(a) shall be irrevocable; provided, however, that if the Committee permits Participants to make a deferral election by the deadline described above for an amount that qualifies as Performance-Based Compensation, the Committee may permit a Participant to subsequently change his or her deferral election for such compensation by submitting new Participant Election(s) in accordance with Section 3.2(c) below.

(b) Timing of Deferral Elections for New Plan Participants. An Eligible Executive who first becomes eligible to participate in the Plan on or after the beginning of a Plan Year, as determined in accordance with Treas. Reg. §1.409A-2(a)(7)(ii) and the "plan aggregation" rules provided in Treas. Reg. §1.409A-1(c)(2), may be permitted to make an election to defer the portion of Compensation attributable to services to be performed after such election, provided that the Participant submits Participant Election(s) on or before the deadline established by the Committee, which in no event shall be later than thirty (30) days after the Participant first becomes eligible to participate in the Plan.

If a deferral election made in accordance with this Section 3.2(c) relates to compensation earned based upon a specified performance period, the amount eligible for deferral shall be equal to (i) the total amount of compensation for the performance period, multiplied by (ii) a fraction, the numerator of which is the number of days remaining in the service period after the Participant's deferral election is made, and the denominator of which is the total number of days in the performance period.

Any deferral election made in accordance with this Section 3.2(c) shall become irrevocable no later than the 30th day after the date the Participant first becomes eligible to participate in the Plan.

(c) Timing of Deferral Elections for Performance-Based Compensation. Subject to the limitations described below, the Committee may determine that an irrevocable deferral election for an amount that qualifies as Performance-Based Compensation may be made by submitting Participant Election(s) on or before the deadline established by the Committee, which in no event shall be later than six (6) months before the end of the performance period.

In order for a Participant to be eligible to make a deferral election for Performance-Based Compensation in accordance with the deadline established pursuant to this Section 3.2(d), the Participant must have performed services continuously from the later of (i) the beginning of the performance period for such compensation, or (ii) the date upon which the performance criteria for such compensation are established, through the date upon which the Participant makes the deferral election for such compensation. In no event shall a deferral election submitted under this Section 3.2(d) be permitted to apply to any amount of Performance-Based Compensation that has become readily ascertainable.

(d) Duration of Compensation Deferral Election. A deferral election made for any Plan Year shall be applicable only for that Plan Year; provided, however, that the Committee may permit a Participant to elect, pursuant to procedures established by the Committee, to have his or her deferral election continue in effect for future Plan Years, until terminated or changed by the Participant prior to the beginning of a Plan Year.

3.3 Investment Elections.

(a) Participant Designation. At the time of entering the Plan and/or of making a deferral election under the Plan, the Participant shall designate, on a Participant Election provided by the Committee, the Funds in which the Participant's Accounts shall be deemed to be invested for purposes of determining the amount of earnings and losses to be credited to each Account. The Participant may specify that all or any percentage of his or her Accounts shall be deemed to be invested, in whole percentage increments, in one or more of the Funds selected as alternative investments under the Plan from time to time by the Committee pursuant to subsection (b) of this Section. If a Participant fails to make an election among the Funds as described in this Section, the Participant's Account balance shall automatically be allocated into the default Fund selected by the Committee. A Participant may change any designation made under this Section as permitted by the Committee by filing a revised election, on a Participant Election provided by the Committee. Notwithstanding the foregoing, the Committee, in its sole discretion, may impose limitations on the frequency with which one or more of the Funds elected in accordance with this Section may be added or deleted by such Participant; furthermore, the Committee, in its sole discretion, may impose limitations on the frequency with which the Participant may change the portion of his or her Account balance allocated to each previously or newly elected Fund.

(b) Investment Funds. The Committee, in its sole discretion, may select each of the types of commercially available investments communicated to the Participant pursuant to subsection (a) of this Section to be the Funds. The Interest Rate of each such commercially available investment shall be used to determine the amount of earnings or losses to be credited to the Participant's Account under Article IV. The Participant's choice among investments shall be solely for purposes of calculation of the Interest Rate on Accounts. The Company and the Employers shall have no obligation to set aside or invest amounts as directed by the Participant and, if the Company and/or the Employer elects to invest amounts as directed by the Participant, the Participant shall have no more right to such investments than any other unsecured general creditor.

3.4 Distribution Elections.

(a) Initial Election. At the time of making a deferral election under the Plan, the Participant shall designate the time and form of distribution of deferrals made pursuant to such election (together with any earnings credited thereon) from among the alternatives specified under Article VI for the applicable distribution. A new distribution election may be made at the time of subsequent deferral elections with respect to deferrals in Plan Years beginning after the election is made, in accordance with the Participant Election forms.

(b) Modification of Election. A distribution election with respect to previously deferred amounts may only be changed under the terms and conditions specified in Code Section 409A and this Section. Except as permitted under Code Section 409A, no acceleration of a distribution is permitted. A subsequent election that delays payment or changes the form of payment shall be permitted only if all of the following requirements are met:

(1) the new election does not take effect until at least twelve (12) months after the date on which the new election is made;

(2) except for payments to be made upon Disability, death or Financial Hardship, the new election delays payment for at least five (5) years from the date that payment would otherwise have been made, absent the new election; and

(3) in the case of payments made according to a Scheduled In-Service Distribution, the new election is made not less than twelve (12) months before the date on which payment would have been made (or, in the case of installment payments, the first installment payment would have been made) absent the new election.

Only one subsequent election to modify any initial distribution election for any Plan Year's deferrals (either a Scheduled In-Service Distribution, or any other distribution election) is permitted for any Participant and Participants may make a subsequent election only while employed by the Employer. A Beneficiary of a deceased Participant is not permitted to make a subsequent election under this Section. For purposes of application of the above change limitations, installment payments shall be treated as a single payment under Code Section 409A. Election changes made pursuant to this Section shall be made in accordance with rules established by the Committee and shall comply with all requirements of Code Section 409A and applicable authorities.

ARTICLE IV
ACCOUNTS

4.1 Deferral Accounts. The Committee shall establish and maintain such Deferral Accounts as are necessary for each Participant under the Plan. Each Participant's Deferral Account shall be further divided into separate subaccounts ("Fund Subaccounts"), each of which corresponds to a Fund designated pursuant to Section 3.3. A Participant's Deferral Account shall be credited as follows:

(a) As soon as reasonably possible after amounts are withheld and deferred from a Participant's Compensation, the Committee shall credit the Fund Subaccounts of the Participant's Deferral Account with an amount equal to Compensation deferred by the Participant in accordance with the designation under Section 3.3; that is, the portion of the Participant's deferred Compensation designated to be deemed to be invested in a Fund shall be credited to the Fund Subaccount to be invested in that Fund;

(b) Each business day, each Fund Subaccount of a Participant's Deferral Account shall be credited with earnings or losses in an amount equal to that determined by multiplying the balance credited to such Fund Subaccount as of the prior day, less any distributions valued as of the end of the prior day, by the Interest Rate for the corresponding Fund as determined by the Committee pursuant to Section 3.3(b); and

(c) In the event that a Participant elects for a given Plan Year's deferral of Compensation a Scheduled In-Service Distribution, all amounts attributed to the deferral of Compensation for such Plan Year shall be accounted for in a manner which allows separate accounting for the deferral of Compensation and investment gains and losses associated with amounts allocated to each such separate Scheduled In-Service Distribution.

4.2 Trust. The Company shall be responsible for the payment of all benefits under the Plan. At its discretion, the Company may establish one or more grantor trusts for the purpose of providing for payment of benefits under the Plan. Such trust or trusts may be irrevocable, but the assets thereof shall be subject to the claims of the Company's creditors. Benefits paid to the Participant from any such trust or trusts shall be considered paid by the Company for purposes of meeting the obligations of the Company under the Plan.

4.3 Statement of Accounts. The Committee shall provide each Participant with electronic statements at least quarterly setting forth the Participant's Account balance as of the end of each applicable period.

4.4 Vesting of Deferral Accounts . The Participant shall be vested at all times in amounts credited to the Participant's Deferral Account(s).

ARTICLE V
DISTRIBUTIONS

5.1 Distributions Upon Separation from Service.

(a) Timing and Form of Distributions Upon Separation from Service. Except as otherwise provided herein, in the event of a Participant's Separation from Service, the Distributable Amount credited to the Participant's Deferral Accounts shall be paid or commence to be paid to the Participant in the form of cash or other property on the Payment Date following the Participant's Separation from Service, in one lump sum payment unless the Participant has made a distribution election on a timely basis to receive substantially equal annual installments over a period of up to twenty (20) years; provided, however, that if distributions to the Participant have commenced as of the Participant's Separation from Service pursuant to a Scheduled In-Service Distribution election, then those Scheduled In-Service Distributions shall continue in effect.

(b) Small Benefit Exception. Notwithstanding any distribution election to the contrary, if on commencement of benefits payable from an Account by reason of a Participant's Separation from Service, the Distributable Amount from such Account is less than or equal to $20,000, the total Distributable Amount from such Account shall be paid in one lump sum payment of cash or other property on the scheduled Payment Date.

5.2 Disability Distributions. Except as otherwise provided herein, in the event of a Participant's Disability prior to Separation from Service, the Distributable Amount credited to the Participant's Deferral Accounts and Company Contribution Account shall be paid to the Participant in one lump sum payment of cash or other property on the Payment Date following the Participant's Disability.

5.3 Death Benefits.

(a) Prior to Commencement of Benefits. In the event that the Participant dies prior to commencement of a benefit described in this Article VI, the Participant's Beneficiary shall receive a death benefit equal to the Distributable Amount credited to the Participant's Deferral Accounts in one lump sum payment of cash or property on the Payment Date following the Participant's death.

(b) After Commencement of Benefits. In the event that the Participant dies after commencement of a benefit described in this Article VI, such Participant's remaining benefits shall be paid to the Participant's Beneficiary in one lump sum payment of cash or property on the Payment Date following the Participant's death.

5.4 Scheduled In-Service Distributions.

(a) Scheduled In-Service Distribution Election. Participants who have not had a Separation from Service from the Employer shall be entitled to elect to receive a Scheduled In-Service Distribution from a Deferral Account. If a Participant has a Separation from Service with the Employer prior to commencement of payment of the Scheduled In-Service Distribution,

distribution will not be made pursuant to this subsection (a) but will instead be made pursuant to Section 5.1(a) above. In the case of a Participant who has elected to receive a Scheduled In-Service Distribution, such Participant shall receive the Distributable Amount, with respect to the specified deferrals, including earnings thereon, which have been elected by the Participant to be subject to such Scheduled In-Service Distribution election. The Committee shall determine the earliest commencement date that may be elected by the Participant for each Scheduled In-Service Distribution and such date shall be indicated on the Participant Election. The Participant may elect to receive the Scheduled In-Service Distribution in a single lump sum or in substantially equal annual installments over a period of up to twenty (20) years. A Participant may delay and change the form of a Scheduled In-Service Distribution, provided such extension complies with the requirements of Section 3.4.

(b) Small Benefit Exception. Notwithstanding any Scheduled In-Service Distribution election to the contrary, if on commencement of a Scheduled In-Service Distribution, the balance of such Scheduled In-Service Distribution is less than or equal to $20,000, the Scheduled In-Service Distribution amount from such Account shall be paid in one lump sum payment of cash or other property on the Scheduled In-Service Distribution date.

(c) Relationship to Other Benefits. In the event that distribution of a Participant's Account is triggered under Section 5.1, 5.2, or 5.3 prior to commencement of a Scheduled In-Service Distribution, the amounts subject to such Scheduled In-Service Distribution shall not be distributed under this Section 5.4, but rather shall be distributed in accordance with the other applicable Section of this Article V.

5.5 Hardship Distribution. Upon a finding that the Participant has suffered a Financial Hardship, in accordance with Code Section 409A, the Committee may, at the request of the Participant, accelerate distribution of benefits and/or approve cancellation of deferral elections under the Plan, subject to the following conditions:

(a) The request to take a Hardship Distribution shall be made by filing a form provided by and filed with the Committee prior to the end of any calendar month.

(b) Upon a finding that the Participant has suffered a Financial Hardship under Code Section 409A, the Committee may, at the request of the Participant, accelerate distribution of benefits and/or approve cancellation of current deferral elections under the Plan in the amount reasonably necessary to alleviate such Financial Hardship. The amount distributed pursuant to this Section with respect to the Financial Hardship shall not exceed the amount necessary to satisfy such Financial Hardship, plus amounts necessary to pay taxes reasonably anticipated as a result of the distribution, after taking into account the extent to which such hardship is or may be relieved through reimbursement or compensation by insurance or otherwise or by liquidation of the Participant's assets (to the extent the liquidation of such assets would not itself cause severe financial hardship).

(c) The amount (if any) determined by the Committee as a Hardship Distribution shall be paid in a single cash lump sum as soon as practicable after the end of the calendar month in which the Hardship Distribution determination is made by the Committee.

5.6 Acceleration of Distributions Following a Change of Control. Notwithstanding any other provision of this Plan, upon the occurrence of a Change of Control of the Company, all Accounts under this Plan will be distributed in one lump sum payment of cash or property on the first day of the month following fifteen (15) months after the Change of Control; provided, however, that a Participant may make a subsequent election under Section 3.4(b) to delay such distribution within 90 days after the Change of Control. For purposes of this Section, "Change of Control" means

(a) any transactions or series of transactions in which any person or group (within the meaning of Rule 13d-5 under the Exchange Act and Sections 13(d) and 14(d) under the Exchange Act) becomes the direct or indirect "beneficial owner" (as defined in Rule 13d-3 under the Exchange Act), by way of stock issuance, tender offer, merger, consolidation, other business combination or otherwise, of greater than 50% of the total voting power (on a fully diluted basis as if all convertible securities had been converted and all warrants and options had been exercised) entitled to vote in the election of directors of the Company (including any transaction in which the Company becomes a wholly-owned or majority-owned subsidiary of another corporation), or

(b) any merger or consolidation or reorganization in which the Company does not survive, or

(c) any merger or consolidation in which the Company survives, but the shares of the Company's common stock outstanding immediately prior to such merger or consolidation represent 50% or less of the voting power of the Company after such merger or consolidation, or

(d) (iv) any transaction in which more than 50% of the Company's assets are sold;

provided, however, that no transaction contemplated by clauses (a) though (d) above shall constitute a Change of Control if both (i) the person acting as the Chief Executive Officer of the Company for six months prior to such transaction becomes the Chief Executive Officer or Executive Chairman of the board of directors of the entity that has acquired control of the Company as a result of such transaction (the "Acquiror") immediately after such transaction and remains the Chief Executive Officer or Executive Chairman of the board for not less than one year following the transaction and (ii) a majority of the Acquiror's board of directors immediately after such transaction consist of persons who were directors of the Company immediately prior to such transaction.

Notwithstanding the above, no transaction shall be considered a Change of Control under this Plan unless such transaction constitutes a change in the ownership or effective control of the Company or a change in the ownership of a substantial portion of the assets of the Company, in each case within the meaning of Code Section 409A.

5.7 Form of Distribution. Generally, distributions from the Plan shall be made in the form of cash, unless the Committee determines that such distributions shall be made in property.

ARTICLE VI
BENEFICIARY DESIGNATIONS AND OTHER PAYEES

6.1 Beneficiaries.

(a) Beneficiary Designation. The Participant shall have the right, at any time, to designate any person or persons as Beneficiary (both primary and contingent) to whom payment under the Plan shall be made in the event of the Participant's death. No consent of the Participant's spouse or any other person is required for the Participant to name a Beneficiary. The Beneficiary designation shall be effective when it is submitted to and acknowledged by the Committee during the Participant's lifetime in the format prescribed by the Committee._

(b) Absence of Valid Designation. If a Participant fails to designate a Beneficiary, as provided above, or if every person designated as Beneficiary predeceases the Participant or dies prior to complete distribution of the Participant's benefits, then the Participant's estate shall be deemed to be the Beneficiary and the Committee shall direct the distribution of such benefits to the Participant's estate.

6.2 Payments to Minors. In the event any amount is payable under the Plan to a minor, payment shall not be made to the minor, but instead such payment shall be made (a) to that person's living parent(s) to act as custodian, (b) if that person's parents are then divorced, and one parent is the sole custodial parent, to such custodial parent, to act as custodian, or (c) if no parent of that person is then living, to a custodian selected by the Committee to hold the funds for the minor under the Uniform Transfers or Gifts to Minors Act in effect in the jurisdiction in which the minor resides. If no parent is living and the Committee decides not to select another custodian to hold the funds for the minor, then payment shall be made to the duly appointed and currently acting guardian of the estate for the minor or, if no guardian of the estate for the minor is duly appointed and currently acting within sixty (60) days after the date the amount becomes payable, payment shall be deposited with the court having jurisdiction over the estate of the minor.

6.3 Payments on Behalf of Persons Under Incapacity. In the event that any amount becomes payable under the Plan to a person who, in the sole judgment of the Committee, is considered by reason of physical or mental condition to be unable to give a valid receipt therefore, the Committee may direct that such payment be made to any person found by the Committee, in its sole judgment, to have assumed the care of such person. Any payment made pursuant to such determination shall constitute a full release and discharge of any and all liability of the Committee and the Company under the Plan.

ARTICLE VII
LEAVE OF ABSENCE

7.1 Paid Leave of Absence. If a Participant is authorized by the Participant's Employer to take a paid leave of absence from the employment of the Employer, and such leave of absence does not constitute a Separation from Service, (a) the Participant shall continue to be considered eligible for the benefits provided under the Plan, and (b) deferrals shall continue to be withheld during such paid leave of absence in accordance with Article III.

7.2 Unpaid Leave of Absence. If a Participant is authorized by the Participant's Employer to take an unpaid leave of absence from the employment of the Employer for any reason, and such leave of absence does not constitute a Separation from Service, such Participant shall continue to be eligible for the benefits provided under the Plan. During the unpaid leave of absence, the Participant shall not be allowed to make any additional deferral elections. However, if the Participant returns to employment, the Participant may elect to defer for the Plan Year following his or her return to employment and for every Plan Year thereafter while a Participant in the Plan, provided such deferral elections are otherwise allowed and a Participant Election is delivered to and accepted by the Committee for each such election in accordance with Article III above.

ARTICLE VIII
ADMINISTRATION

8.1 Committee. The Plan shall be administered by a Committee appointed by the Board, which shall have the exclusive right and full discretion (a) to appoint agents to act on its behalf, (b) to select and establish Funds, (c) to interpret the Plan, (d) to decide any and all matters arising hereunder (including the right to remedy possible ambiguities, inconsistencies, or admissions), (e) to make, amend and rescind such rules as it deems necessary for the proper administration of the Plan and (f) to make all other determinations and resolve all questions of fact necessary or advisable for the administration of the Plan, including determinations regarding eligibility for benefits payable under the Plan. All interpretations of the Committee with respect to any matter hereunder shall be final, conclusive and binding on all persons affected thereby. No member of the Committee or agent thereof shall be liable for any determination, decision, or action made in good faith with respect to the Plan. The Company will indemnify and hold harmless the members of the Committee and its agents from and against any and all liabilities, costs, and expenses incurred by such persons as a result of any act, or omission, in connection with the performance of such persons' duties, responsibilities, and obligations under the Plan, other than such liabilities, costs, and expenses as may result from the bad faith, willful misconduct, or criminal acts of such persons.

8.2 Claims Procedure. Any Participant, former Participant or Beneficiary may file a written claim with the Committee setting forth the nature of the benefit claimed, the amount thereof, and the basis for claiming entitlement to such benefit. The Committee shall determine the validity of the claim and communicate a decision to the claimant promptly and, in any event, not later than ninety (90) days after the date of the claim. The claim may be deemed by the claimant to have been denied for purposes of further review described below in the event a decision is not furnished to the claimant within such ninety (90) day period. If additional information is necessary to make a determination on a claim, the claimant shall be advised of the need for such additional information within forty-five (45) days after the date of the claim. The claimant shall have up to one hundred eighty (180) days to supplement the claim information, and the claimant shall be advised of the decision on the claim within forty-five (45) days after the earlier of the date the supplemental information is supplied or the end of the one hundred eighty (180) day period. Every claim for benefits which is denied shall be denied by written notice setting forth in a manner calculated to be understood by the claimant (a) the specific reason or reasons for the denial, (b) specific reference to any provisions of the Plan (including

any internal rules, guidelines, protocols, criteria, etc.) on which the denial is based, (c) description of any additional material or information that is necessary to process the claim, and (d) an explanation of the procedure for further reviewing the denial of the claim and shall include an explanation of the claimant's right to pursue legal action in the event of an adverse determination on review.

8.3 Review Procedures. Within sixty (60) days after the receipt of a denial on a claim, a claimant or his/her authorized representative may file a written request for review of such denial. Such review shall be undertaken by the Committee and shall be a full and fair review. The claimant shall have the right to review all pertinent documents. The Committee shall issue a decision not later than sixty (60) days after receipt of a request for review from a claimant unless special circumstances, such as the need to hold a hearing, require a longer period of time, in which case a decision shall be rendered as soon as possible but not later than one hundred twenty (120) days after receipt of the claimant's request for review. The decision on review shall be in writing and shall include specific reasons for the decision written in a manner calculated to be understood by the claimant with specific reference to any provisions of the Plan on which the decision is based and shall include an explanation of the claimant's right to pursue legal action in the event of an adverse determination on review.

ARTICLE IX
MISCELLANEOUS

9.1 Termination of Plan. The Company may terminate the Plan at any time. In the event of a Plan termination, no new deferral elections shall be permitted. However, after the Plan termination the Account balances of such Participants shall continue to be credited with deferrals attributable to any deferral election that was in effect prior to the Plan termination to the extent necessary to comply with Code Section 409A, and additional amounts shall continue to be credited or debited to such Participants' Account balances pursuant to Article IV. In addition, following a Plan termination, Participant Account balances shall remain in the Plan and shall not be distributed until such amounts become eligible for distribution in accordance with the other applicable provisions of the Plan. Notwithstanding the preceding sentence, to the extent permitted by Treas. Reg. §1.409A-3(j)(4)(ix) or as otherwise permitted under Code Section 409A, the Employer may provide that upon termination of the Plan, all Account balances of the Participants shall be distributed, subject to and in accordance with any rules established by such Employer deemed necessary to comply with Code Section 409A.

9.2 Amendment. The Company may, at any time, amend or modify the Plan in whole or in part. Notwithstanding the foregoing, no amendment or modification shall be effective to decrease the value of a Participant's vested Account balance in existence at the time the amendment or modification is made.

9.3 Unsecured General Creditor. The benefits paid under the Plan shall be paid from the general assets of the Company, and the Participant and any Beneficiary or their heirs or successors shall be no more than unsecured general creditors of the Company with no special or prior right to any assets of the Company for payment of any obligations hereunder. It is the intention of the Company that this Plan be unfunded for purposes of ERISA and the Code.

9.4 Restriction Against Assignment. The Company shall pay all amounts payable hereunder only to the person or persons designated by the Plan and not to any other person or entity. No part of a Participant's Accounts shall be liable for the debts, contracts, or engagements of any Participant, Beneficiary, or their successors in interest, nor shall a Participant's Accounts be subject to execution by levy, attachment, or garnishment or by any other legal or equitable proceeding, nor shall any such person have any right to alienate, anticipate, sell, transfer, commute, pledge, encumber, or assign any benefits or payments hereunder in any manner whatsoever. No part of a Participant's Accounts shall be subject to any right of offset against or reduction for any amount payable by the Participant or Beneficiary, whether to the Company or any other party, under any arrangement other than under the terms of this Plan.

9.5 Withholding. The Participant shall make appropriate arrangements with the Company for satisfaction of any federal, state or local income tax withholding requirements, Social Security and other employee tax or other requirements applicable to the granting, crediting, vesting or payment of benefits under the Plan. There shall be deducted from each payment made under the Plan or any other Compensation payable to the Participant (or Beneficiary) all taxes that are required to be withheld by the Company in respect to such payment or this Plan. To the extent permissible under Code Section 409A, the Company shall have the right to reduce any payment (or other Compensation) by the amount of cash sufficient to provide the amount of said taxes.

9.6 Code Section 409A. The Company intends that the Plan comply with the requirements of Code Section 409A (and all applicable Treasury Regulations and other guidance issued thereunder) and shall be operated and interpreted consistent with that intent.

9.7 Effect of Payment. Any payment made in good faith to a Participant or the Participant's Beneficiary shall, to the extent thereof, be in full satisfaction of all claims against the Committee, its members, the Employer and the Company.

9.8 Errors in Account Statements, Deferrals or Distributions. In the event an error is made in an Account statement, such error shall be corrected on the next statement following the date such error is discovered. In the event of an operational error, including, but not limited to, errors involving deferral amounts, overpayments or underpayments, such operational error shall be corrected in a manner consistent with and as permitted by any correction procedures established under Code Section 409A. If any portion of a Participant's Account(s) under this Plan is required to be included in income by the Participant prior to receipt due to a failure of this Plan to comply with the requirements of Code Section 409A, the Committee may determine that such Participant shall receive a distribution from the Plan in an amount equal to the lesser of (i) the portion of his or her Account required to be included in income as a result of the failure of the Plan to comply with the requirements of Code Section 409A, or (ii) the unpaid vested Account balance.

9.9 Domestic Relations Orders. Notwithstanding any provision in this Plan to the contrary, in the event that the Committee receives a domestic relations order, as defined in Code Section 414(p)(1)(B), pursuant to which a court has determined that a spouse or former spouse of a Participant has an interest in the Participant's benefits under the Plan, the Committee shall have the right to immediately distribute the spouse's or former spouse's vested interest in the Participant's benefits under the Plan to such spouse or former spouse to the extent necessary to fulfill such domestic relations order, provided that such distribution is in accordance with the requirements of Code Section 409A.

9.10 Employment Not Guaranteed. Nothing contained in the Plan nor any action taken hereunder shall be construed as a contract of employment or as giving any Participant any right to continue the provision of services in any capacity whatsoever to the Employer.

9.11 No Guarantee of Tax Consequences. The Employer, Company, Board and Committee make no commitment or guarantee to any Participant that any federal, state or local tax treatment will apply or be available to any person eligible for benefits under the Plan and assume no liability whatsoever for the tax consequences to any Participant.

9.12 Successors of the Company. The rights and obligations of the Company under the Plan shall inure to the benefit of, and shall be binding upon, the successors and assigns of the Company.

9.13 Notice. Any notice or filing required or permitted to be given to the Company or the Participant under this Agreement shall be sufficient if in writing and hand-delivered, or sent by registered or certified mail, in the case of the Company, to the principal office of the Company, directed to the attention of the Committee, and in the case of the Participant, to the last known address of the Participant indicated on the employment records of the Company. Such notice shall be deemed given as of the date of delivery or, if delivery is made by mail, as of the date shown on the postmark on the receipt for registration or certification. Notices to the Company may be permitted by electronic communication according to specifications established by the Committee.

9.14 Headings. Headings and subheadings in this Plan are inserted for convenience of reference only and are not to be considered in the construction of the provisions hereof.

9.15 Gender, Singular and Plural. All pronouns and any variations thereof shall be deemed to refer to the masculine, feminine, or neuter, as the identity of the person or persons may require. As the context may require, the singular may be read as the plural and the plural as the singular.

9.16 Governing Law. The Plan is intended to be an unfunded plan maintained primarily to provide deferred compensation benefits for a select group of "management or highly compensated employees" within the meaning of Sections 201, 301 and 401 of ERISA and therefore to be exempt from Parts 2, 3 and 4 of Title I of ERISA. To the extent any provision of, or legal issue relating to, this Plan is not fully preempted by federal law, such issue or provision shall be governed by the laws of the State of Delaware.

IN WITNESS WHEREOF, the undersigned duly authorized officer of the Company has approved the adoption of this Plan on behalf of the Company.

DAVITA HEALTHCARE PARTNERS INC.

By:	/s/ Cynthia Baxter
Title:	VP, of Compensation and Benefits
Date:	11/26/14

Exhibit 12.1

DAVITA HEALTHCARE PARTNERS INC.
RATIO OF EARNINGS TO FIXED CHARGES

The ratio of earnings to fixed charges is computed by dividing earnings by fixed charges. Earnings for this purpose are defined as pretax income from continuing operations adjusted by adding back fixed charges expensed during the period less noncontrolling interests. Fixed charges include debt expense (interest expense and the amortization of deferred financing costs), the estimated interest component of rent expense on operating leases, and capitalized interest.

	Year ended December 31,				
	2016	2015	2014	2013	2012
	(in thousands, except share data)				
Earnings adjusted for fixed charges:					
Income from continuing operations before income taxes	$ 1,488,895	$ 723,136	$ 1,309,673	$ 1,124,978	$ 1,001,304
Add:					
Debt expense	414,382	408,380	410,294	429,943	288,554
Interest portion of rent expense	181,888	166,821	149,432	137,558	112,424
Less: Noncontrolling interests	(153,640)	(158,304)	(140,949)	(124,276)	(105,891)
	442,630	416,897	418,777	443,225	295,087
	$ 1,931,525	$ 1,140,033	$ 1,728,450	$ 1,568,203	$ 1,296,391
Fixed charges:					
Debt expense	414,382	408,380	410,294	429,943	288,554
Interest portion of rent expense	181,888	166,821	149,432	137,558	112,424
Capitalized interest	12,990	9,723	7,888	6,408	8,127
	$ 609,260	$ 584,924	$ 567,614	$ 573,909	$ 409,105
Ratio of earnings to fixed charges	3.17	1.95	3.05	2.73	3.17

SECTION 302 CERTIFICATION

I, Kent J. Thiry, certify that:

1. I have reviewed this annual report on Form 10-K of DaVita HealthCare Partners Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and we have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 31.2

SECTION 302 CERTIFICATION

I, James K. Hilger, certify that:

1. I have reviewed this annual report on Form 10-K of DaVita HealthCare Partners Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and we have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the Fiscal Year Ended December 31, 2017

Commission File Number: 1-14106

DAVITA INC.

(Exact name of registrant as specified in charter)

Delaware	**51-0354549**
(State of incorporation)	**(I.R.S. Employer Identification No.)**

2000 16th Street
Denver, CO 80202
Telephone number (303) 405-2100

Securities registered pursuant to Section 12(b) of the Act:

Title of each class:	**Name of each exchange on which registered:**
Common Stock, $0.001 par value	**New York Stock Exchange**

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	☒	Accelerated filer	☐
Non-accelerated filer	☐ (Do not check if a smaller reporting company)	Smaller reporting company	☐
		Emerging growth company	☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

As of June 30, 2017, the aggregate market value of the Registrant's common stock outstanding held by non-affiliates based upon the closing price on the New York Stock Exchange was approximately $12.4 billion.

As of January 31, 2018, the number of shares of the Registrant's common stock outstanding was approximately 182.0 million shares.

Documents incorporated by reference

Portions of the Registrant's proxy statement for its 2018 annual meeting of stockholders are incorporated by reference in Part III of this Form 10-K.

PART I

Item 1. Business

We were incorporated as a Delaware corporation in 1994. Our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to section 13(a) or 15(d) of the Exchange Act are made available free of charge through our website, located at http://www.davita.com, as soon as reasonably practicable after the reports are filed with or furnished to the Securities and Exchange Commission (SEC). The SEC also maintains a website at http://www.sec.gov where these reports and other information about us can be obtained. The contents of our website are not incorporated by reference into this report.

Overview of DaVita Inc.

The Company has consisted of two major divisions, DaVita Kidney Care (Kidney Care) and DaVita Medical Group (DMG). Kidney Care is comprised of our U.S. dialysis and related lab services, our ancillary services and strategic initiatives, including our international operations, and our corporate administrative support. Our U.S. dialysis and related lab services business is our largest line of business and is a leading provider of kidney dialysis services in the U.S. for patients suffering from chronic kidney failure, also known as end stage renal disease (ESRD). DMG is a patient- and physician-focused integrated healthcare delivery and management company with over two decades of providing coordinated, outcomes-based medical care in a cost-effective manner.

On December 5, 2017, we entered into an equity purchase agreement to sell our DMG division to Collaborative Care Holdings, LLC (Optum), a subsidiary of UnitedHealth Group Inc. The transaction is expected to close in 2018 and is subject to regulatory approval and other customary closing conditions. As a result of this pending transaction, the DMG business has been reclassified as held for sale and its results of operations are reported as discontinued operations for all periods presented in our consolidated financial statements included in this report.

For financial information about our DMG business see Note 21 to the consolidated financial statements included in this report.

Kidney Care Division

U.S. dialysis and related lab services business overview

Our U.S. dialysis and related lab services business is a leading provider of kidney dialysis services for patients suffering from ESRD. As of December 31, 2017, we provided dialysis and administrative services in the U.S. through a network of 2,510 outpatient dialysis centers in 46 states and the District of Columbia, serving a total of approximately 197,800 patients. We also provide acute inpatient dialysis services in approximately 900 hospitals and related laboratory services throughout the U.S.

The loss of kidney function is normally irreversible. Kidney failure is typically caused by Type I and Type II diabetes, high blood pressure, polycystic kidney disease, long-term autoimmune attack on the kidney and prolonged urinary tract obstruction. ESRD is the stage of advanced kidney impairment that requires continued dialysis treatments or a kidney transplant to sustain life. Dialysis is the removal of toxins, fluids and salt from the blood of patients by artificial means. Patients suffering from ESRD generally require dialysis at least three times a week for the rest of their lives.

According to the United States Renal Data System, there were over 495,000 ESRD dialysis patients in the U.S. in 2015. The underlying ESRD dialysis patient population has grown at an approximate compound rate of 3.8% from 2000 to 2015, the latest period for which such data is available. The growth rate is attributable to the aging of the U.S. population, increased incidence rates for diseases that cause kidney failure such as diabetes and hypertension, lower mortality rates for dialysis patients and growth rates of minority populations with higher than average incidence rates of ESRD.

Since 1972, the federal government has provided healthcare coverage for ESRD patients under the Medicare ESRD program regardless of age or financial circumstances. ESRD is the first and only disease state eligible for Medicare coverage both for dialysis and dialysis-related services and for all benefits available under the Medicare program. For patients with Medicare coverage, all ESRD payments for dialysis treatments are made under a single bundled payment rate. See page 6 for further details.

Although Medicare reimbursement limits the allowable charge per treatment, it provides industry participants with a relatively predictable and recurring revenue stream for dialysis services provided to patients without commercial insurance. For the year ended December 31, 2017, approximately 89.5% of our total dialysis patients were covered under some form of

government-based programs, with approximately 74.9% of our dialysis patients covered under Medicare and Medicare-assigned plans.

Treatment options for ESRD

Treatment options for ESRD are dialysis and kidney transplantation.

Dialysis options

- *Hemodialysis*

Hemodialysis, the most common form of ESRD treatment, is usually performed at a freestanding outpatient dialysis center, at a hospital-based outpatient center, or at the patient's home. The hemodialysis machine uses an artificial kidney, called a dialyzer, to remove toxins, fluids and salt from the patient's blood. The dialysis process occurs across a semi-permeable membrane that divides the dialyzer into two distinct chambers. While blood is circulated through one chamber, a pre-mixed fluid is circulated through the other chamber. The toxins, salt and excess fluids from the blood cross the membrane into the fluid, allowing cleansed blood to return back into the patient's body. Each hemodialysis treatment that occurs in the outpatient dialysis centers typically lasts approximately three and one-half hours and is usually performed three times per week.

Hospital inpatient hemodialysis services are required for patients with acute kidney failure primarily resulting from trauma, patients in early stages of ESRD and ESRD patients who require hospitalization for other reasons. Hospital inpatient hemodialysis is generally performed at the patient's bedside or in a dedicated treatment room in the hospital, as needed.

Some ESRD patients who are healthier and more independent may perform home-based hemodialysis in their home or residence through the use of a hemodialysis machine designed specifically for home therapy that is portable, smaller and easier to use. Patients receive training, support and monitoring from registered nurses, usually in our outpatient dialysis centers, in connection with their dialysis treatment. Home-based hemodialysis is typically performed with greater frequency than dialysis treatments performed in outpatient dialysis centers and on varying schedules.

- *Peritoneal dialysis*

Peritoneal dialysis uses the patient's peritoneal or abdominal cavity to eliminate fluid and toxins and is typically performed at home. The most common methods of peritoneal dialysis are continuous ambulatory peritoneal dialysis (CAPD), and continuous cycling peritoneal dialysis (CCPD). Because it does not involve going to an outpatient dialysis center three times a week for treatment, peritoneal dialysis is an alternative to hemodialysis for patients who are healthier, more independent and desire more flexibility in their lifestyle.

CAPD introduces dialysis solution into the patient's peritoneal cavity through a surgically placed catheter. Toxins in the blood continuously cross the peritoneal membrane into the dialysis solution. After several hours, the patient drains the used dialysis solution and replaces it with fresh solution. This procedure is usually repeated four times per day.

CCPD is performed in a manner similar to CAPD, but uses a mechanical device to cycle dialysis solution through the patient's peritoneal cavity while the patient is sleeping or at rest.

Kidney transplantation

Although kidney transplantation, when successful, is generally the most desirable form of therapeutic intervention, the shortage of suitable donors, side effects of immunosuppressive pharmaceuticals given to transplant recipients and dangers associated with transplant surgery for some patient populations limit the use of this treatment option.

U.S. Dialysis and related lab services we provide

Outpatient hemodialysis services

As of December 31, 2017, we operated or provided administrative services through a network of 2,510 outpatient dialysis centers in the U.S. that are designed specifically for outpatient hemodialysis. In 2017, our overall network of U.S. outpatient dialysis centers increased by 160 primarily as a result of the opening of new dialysis centers, net of center closures, divestitures, and acquisitions, representing a total increase of approximately 6.8% from 2016.

As a condition of our enrollment in Medicare for the provision of dialysis services, we contract with a nephrologist or a group of associated nephrologists to provide medical director services at each of our dialysis centers. In addition, other

nephrologists may apply for practice privileges to treat their patients at our centers. Each center has an administrator, typically a registered nurse, who supervises the day-to-day operations of the center and its staff. The staff of each center typically consists of registered nurses, licensed practical or vocational nurses, patient care technicians, a social worker, a registered dietician, biomedical technician support and other administrative and support personnel.

Under Medicare regulations, we cannot promote, develop or maintain any kind of contractual relationship with our patients that would directly or indirectly obligate a patient to use or continue to use our dialysis services, or that would give us any preferential rights other than those related to collecting payments for our dialysis services. Our total patient turnover, which is based upon all causes, averaged approximately 26% in 2017 and 25% in 2016. However, in 2017, the overall number of patients to whom we provided services in the U.S. increased by approximately 5.4% from 2016, primarily from the opening of new dialysis centers and acquisitions, and continued growth within the industry.

Hospital inpatient hemodialysis services

As of December 31, 2017, we provided hospital inpatient hemodialysis services, excluding physician services, to patients in approximately 900 hospitals throughout the U.S. We render these services based on a contracted per-treatment fee that is individually negotiated with each hospital. When a hospital requests our services, we typically administer the dialysis treatment at the patient's bedside or in a dedicated treatment room in the hospital, as needed. In 2017, hospital inpatient hemodialysis services accounted for approximately 5.0% of our U.S. dialysis revenues and 4.0% of our total U.S. dialysis treatments.

Home-based hemodialysis services

Many of our outpatient dialysis centers offer certain support services for dialysis patients who prefer and are able to perform either home-based hemodialysis or peritoneal dialysis in their homes. Home-based hemodialysis support services consist of providing equipment and supplies, training, patient monitoring, on-call support services and follow-up assistance. Registered nurses train patients and their families or other caregivers to perform either home-based hemodialysis or peritoneal dialysis.

ESRD laboratory services

We own two separately incorporated, licensed, clinical laboratories which specialize in ESRD patient testing. These specialized laboratories provide routine laboratory tests for dialysis and other physician-prescribed laboratory tests for ESRD patients and are an integral component of overall dialysis services that we provide. Our laboratories provide these tests predominantly for our network of ESRD patients throughout the U.S. These tests are performed to monitor a patient's ESRD condition, including the adequacy of dialysis, as well as other medical conditions of the patient. Our laboratories utilize information systems which provide information to certain members of the dialysis centers' staff and medical directors regarding critical outcome indicators.

Management services

We currently operate or provide management and administrative services pursuant to management and administrative services agreements to 39 outpatient dialysis centers located in the U.S. in which we either own a noncontrolling interest or are wholly-owned by third parties. Management fees are established by contract and are recognized as earned typically based on a percentage of revenues or cash collections generated by the outpatient dialysis centers.

Quality care

Centers for Medicare and Medicaid Services (CMS) promotes high quality services in outpatient dialysis facilities treating patients with ESRD through its Quality Incentive Program (QIP). QIP associates a portion of payment directly with a facility's performance on quality of care measures. Payment reductions result when a facility's overall score on applicable measures does not meet established standards. For the fifth year in a row, we are an industry leader in QIP standards. We are industry leaders for catheter rates and also lead the industry for the total number of patients in our peritoneal dialysis program.

In addition, CMS' Five-Star Quality Rating system, is a rating system that assigns one to five stars to rate the quality of outcomes for dialysis facilities. The rating system provides patients reported information about any given dialysis facility and identifies differences in quality between facilities so that patients can make more informed decisions about where to receive treatment. For the last three years in which data is available, we have been a leader in the industry under the CMS Five-Star Quality Rating system.

Our facilities employ registered nurses, licensed practical or vocational nurses, patient care technicians, social workers, registered dieticians, biomedical technicians and other administrative and support teammates who aim to achieve superior clinical outcomes at our centers.

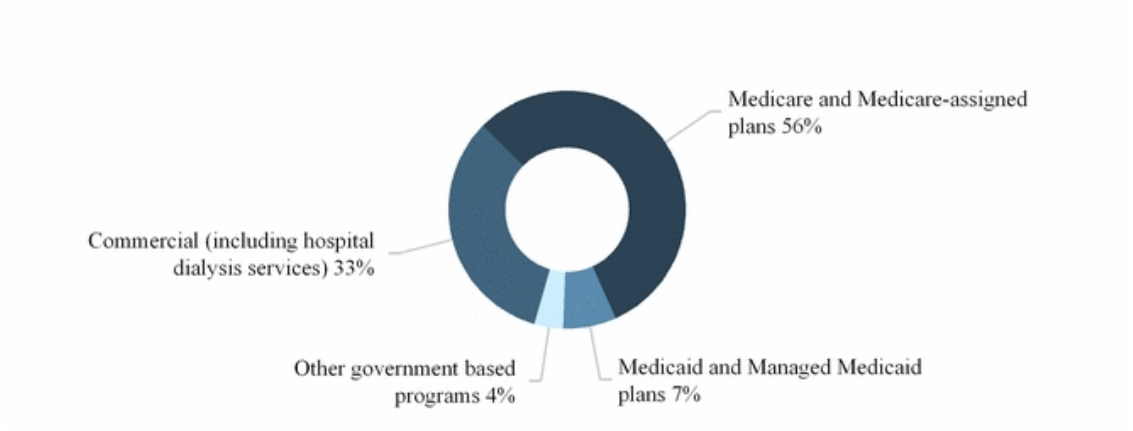
Our physician leadership in the Office of the Chief Medical Officer (OCMO) for our U.S. dialysis and related lab services business includes 16 senior nephrologists, led by our Chief Medical Officer, with a variety of academic, clinical practice, and clinical research backgrounds. Our Physician Council is an advisory body to senior management composed of eight physicians with extensive experience in clinical practice. In addition, we currently have nine Group Medical Directors.

Sources of revenue—concentrations and risks

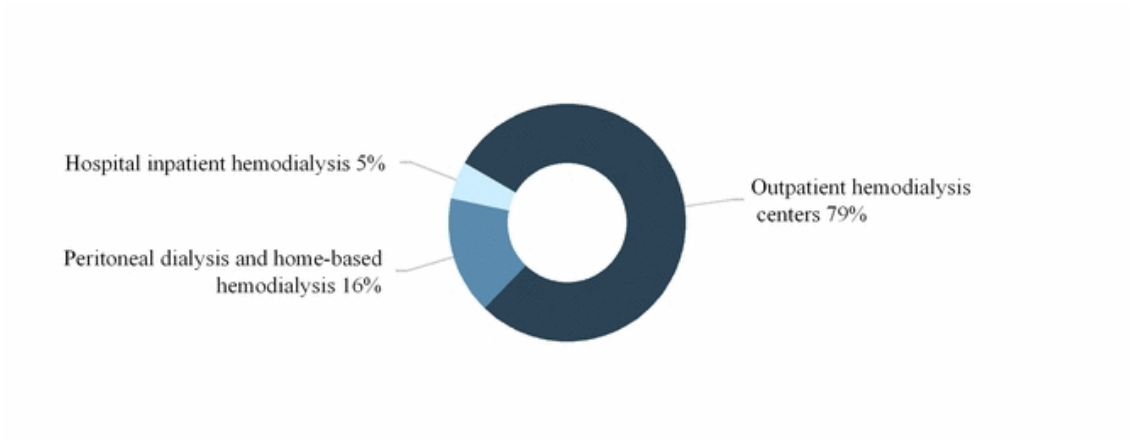
Our U.S. dialysis and related lab services business net revenues represent approximately 86% of our consolidated net revenues for the year ended December 31, 2017. Our U.S. dialysis and related lab services revenues are derived primarily from our core business of providing dialysis services and related laboratory services and, to a lesser extent, the administration of pharmaceuticals and management fees generated from providing management and administrative services to certain outpatient dialysis centers, as discussed above.

The sources of our U.S. dialysis and related lab services revenues are principally from government-based programs, including Medicare and Medicare-assigned plans, Medicaid and Managed Medicaid plans and commercial insurance plans.

The following graph summarizes our U.S. dialysis services revenues by source for the year ended December 31, 2017:



The following graph summarizes our U.S. dialysis services revenues by modality for the year ended December 31, 2017:



Medicare revenue

Government dialysis related payment rates in the U.S. are principally determined by federal Medicare and state Medicaid policy. For patients with Medicare coverage, all ESRD payments for dialysis treatments are made under a single bundled payment rate which provides a fixed payment rate to encompass all goods and services provided during the dialysis treatment, including certain pharmaceuticals, such as Epogen® (EPO), vitamin D analogs and iron supplements, irrespective of the level of pharmaceuticals administered to the patient or additional services performed. Most lab services are also included in the bundled payment. Under the ESRD Prospective Payment System (PPS), the bundled payments to a dialysis facility may be reduced by as much as 2% based on the facility's performance in specified quality measures set annually by CMS through QIP, which was established by the Medicare Improvements for Patients and Providers Act of 2008. The bundled payment rate is also adjusted for certain patient characteristics, a geographic usage index and certain other factors.

Uncertainty about future payment rates remains a material risk to our business, as well as the potential implementation of or changes in coverage determinations or other rules or regulations by CMS or Medicare Administrative Contractors (MACs) that may impact reimbursement. An important provision in the law is an annual adjustment, or market basket update, to the ESRD PPS base rate. Absent action by Congress, the ESRD PPS base rate is automatically updated annually by a formulaic inflation adjustment.

In December 2013, CMS issued the 2014 final rule for the ESRD PPS, which phases in the payment reductions mandated by the American Taxpayer Relief Act of 2012 (ATRA), as modified by the Protecting Access to Medicare Act of 2014, which reduced our market basket inflation adjustment by 1.25% in both 2016 and 2017, and by 1% in 2018. In November 2017, CMS published the 2018 final rule for the ESRD PPS, which increased dialysis facilities' bundled payment rate for 2018 relative to prior years. In particular, CMS projects that the 2018 final rule for the ESRD PPS will (i) increase the total payments to all ESRD facilities by 0.5% in 2018 compared to 2017; (ii) increase total payments to hospital-based ESRD facilities by 0.7% in 2018 compared to 2017; and (iii) increase total payments for freestanding facilities by 0.5% in 2018 compared to 2017. The 2018 final rule for the ESRD PPS also implements changes to the ESRD PPS outlier policy, broadening the pricing methodologies used to determine the cost of certain service drugs and biologicals in computing outlier payments when average sales price data is not available.

As a result of the Budget Control Act of 2011 (BCA) and subsequent activity in Congress, a $1.2 trillion sequester (across-the-board spending cuts) in discretionary programs took effect in 2013 reducing Medicare payments by 2%, which was subsequently extended through fiscal year 2027. These across-the-board spending cuts have affected and will continue to adversely affect our business, results of operations and financial condition. Although the Bipartisan Budget Act (BBA) of 2018 passed in February 2018 enacts a two-year federal spending agreement and raises the federal spending cap on non-defense spending for fiscal years 2018 and 2019, the Medicare program is frequently mentioned as a target for spending cuts.

The CMS Center for Medicare & Medicaid Innovation Center (Innovation Center) is working with various healthcare providers to develop, refine and implement Accountable Care Organizations (ACOs) and other innovative models of care for Medicare and Medicaid beneficiaries. We are uncertain of the extent to which the long-term operation and evolution of these models of care, including ACOs, Bundled Payments for Care Improvement Initiative, Comprehensive ESRD Care (CEC) Model (which includes the development of ESRD Seamless Care Organizations (ESCOs)), the Comprehensive Primary Care Initiative, the Duals Demonstration, or other models, will impact the healthcare market over time. Our U.S. dialysis business may choose to participate in one or several of these models either as a partner with other providers or independently. We currently participate in the CEC Model with the Innovation Center, including the ESCO organizations in the Arizona, Florida, and adjacent New Jersey and Pennsylvania markets. In areas where our U.S. dialysis business is not directly participating in this or other Innovation Center models, some of our patients may be assigned to an ACO, another ESRD Care Model, or another program, in which case the quality and cost of care that we furnish will be included in an ACO's, another ESRD Care Model's or other program's calculations.

The Department of Health and Human Services (HHS) has also pledged to tie 50% of Medicare payments to quality or alternate payment models by the end of 2018. As new models of care emerge and evolve, we may be at risk for losing our Medicare patient base, which would have a materially adverse effect on our revenues, earnings and cash flows. Other initiatives in the government or private sector may also arise, including the development of models similar to ACOs, independent practice associations (IPAs) and integrated delivery systems or evolutions of those concepts which could adversely impact our business.

We anticipate that we will continue to experience increases in our operating costs in 2018 that will outpace any net Medicare rate increases that we may receive, which could significantly impact our operating results. In addition, we expect to continue experiencing increases in operating costs that are subject to inflation, such as labor and supply costs, including increases in maintenance costs and capital expenditures to improve, renovate and maintain our facilities, equipment and

information technology to meet changing regulatory requirements, regardless of whether there is a compensating inflation-based increase in Medicare payment rates or in payments under the bundled payment rate system.

ESRD patients receiving dialysis services become eligible for primary Medicare coverage at various times, depending on their age or disability status, as well as whether they are covered by a commercial insurance plan. Generally, for a patient not covered by a commercial insurance plan, Medicare becomes the primary payor for ESRD patients receiving dialysis services either immediately or after a three-month waiting period. For a patient covered by a commercial insurance plan, Medicare generally becomes the primary payor after 33 months, which includes the three-month waiting period, or earlier if the patient's commercial insurance plan coverage terminates. When Medicare becomes the primary payor, the payment rates we receive for that patient shift from the commercial insurance plan rates to Medicare payment rates, which are on average significantly lower than commercial insurance rates.

Medicare pays 80% of the amount set by the Medicare system for each covered dialysis treatment. The patient is responsible for the remaining 20%. In most cases, a secondary payor, such as Medicare supplemental insurance, a state Medicaid program or a commercial health plan, covers all or part of these balances. Some patients who do not qualify for Medicaid, but otherwise cannot afford secondary insurance in the form of a Medicare Supplement Plan, can apply for premium payment assistance from charitable organizations to obtain secondary coverage. If a patient does not have secondary insurance coverage, we are generally unsuccessful in our efforts to collect from the patient the remaining 20% portion of the ESRD composite rate that Medicare does not pay. However, we are able to recover some portion of this unpaid patient balance from Medicare through an established cost reporting process by identifying these Medicare bad debts on each center's Medicare cost report.

The 21st Century Cures Act, enacted in December 2016, included a provision that will allow Medicare beneficiaries with ESRD to choose a Medicare Advantage plan. Until the effective date of this law, this choice is available only to Medicare beneficiaries without ESRD. The ESRD related provisions of the 21st Century Cures Act are scheduled to take effect in 2021.

Medicaid revenue

Medicaid programs are state-administered programs partially funded by the federal government. These programs are intended to provide health coverage for patients whose income and assets fall below state-defined levels and who are otherwise uninsured. These programs also serve as supplemental insurance programs for co-insurance payments due from Medicaid-eligible patients with primary coverage under the Medicare program. Some Medicaid programs also pay for additional services, including some oral medications that are not covered by Medicare. We are enrolled in the Medicaid programs in the states in which we conduct our business.

Commercial revenue

Before a patient becomes eligible to elect to have Medicare as their primary payor for dialysis services, a patient's commercial insurance plan, if any, is generally responsible for payment of such dialysis services for up to the first 33 months, as discussed above. Although commercial payment rates vary, average commercial payment rates established under commercial contracts are generally significantly higher than Medicare rates. The payments we receive from commercial payors generate nearly all of our profits. Payment methods from commercial payors can include a single lump-sum per treatment, referred to as bundled rates, or in other cases separate payments for dialysis treatments and pharmaceuticals, if used as part of the treatment, referred to as Fee-for-Service (FFS) rates. Commercial payment rates are the result of negotiations between us and insurers or third-party administrators. Our out-of-network payment rates are on average higher than in-network commercial contract payment rates. We continue to enter into some commercial contracts, covering certain patients that will primarily pay us under a single bundled payment rate for all dialysis services provided to these patients. However, some contracts will pay us for certain other services and pharmaceuticals in addition to the bundled payment. These contracts typically contain annual price escalator provisions. We are continuously in the process of negotiating agreements with our commercial payors and if our negotiations result in overall commercial contract payment rate reductions in excess of our commercial contract payment rate increases, or if commercial payors implement plans that restrict access to coverage or the duration or breadth of benefits or impose restrictions or limitations on patient access to commercial plans on non-contracted or out-of-network providers, it could have a material adverse effect on our business, results of operations and financial condition. In addition, if there is an increase in job losses in the U.S., or depending upon changes to the healthcare regulatory system by CMS and/or the impact of healthcare insurance exchanges, we could experience a decrease in the number of patients covered under commercial insurance plans and/or an increase in uninsured or underinsured patients. Patients with commercial insurance who cannot otherwise maintain coverage frequently rely on financial assistance from charitable organizations, such as the American Kidney Fund. If these patients are unable to obtain or continue to receive or receive for a limited duration such financial assistance, or if our assumptions about how patients will respond to any change in such financial assistance are incorrect, it could have a material adverse effect on our business, results of operations and financial condition.

Approximately 28% of our dialysis services revenues and approximately 10.5% of our dialysis patients are associated with non-acute commercial payors for the year ended December 31, 2017. Non-acute commercial patients as a percentage of our total dialysis patients for 2017 decreased 1.4% as compared to 2016. Less than 1% of our U.S. dialysis and related lab services revenues are due directly from patients. There is no single commercial payor that accounted for more than 10% of total U.S. dialysis and related lab services revenues for the year ended December 31, 2017. See Note 23 to the consolidated financial statements included in this report for disclosure on our concentration related to our commercial payors on a total consolidated net revenue basis.

The healthcare reform legislation enacted in 2010 introduced healthcare insurance exchanges which provide a marketplace for eligible individuals and small employers to purchase healthcare insurance. The business and regulatory environment continues to evolve as the exchanges mature, and regulations are challenged, changed and enforced. If commercial payor participation in the exchanges continues to decrease, it could have a material adverse effect on our business, results of operations and financial condition. Although we cannot predict the short- or long-term effects of these factors, we believe the healthcare insurance exchanges could result in a reduction in ESRD patients covered by traditional commercial insurance policies and an increase in the number of patients covered through the exchanges under more restrictive commercial plans with lower reimbursement rates or higher deductibles and co-payments that patients may not be able to pay. To the extent that the ongoing implementation of such exchanges or changes in statutes or regulations, or enforcement of statutes or regulations regarding the exchanges results in a reduction in reimbursement rates for our services from commercial and/or government payors, it could have a material adverse effect on our business, results of operations and financial condition.

In addition, in December 2016, CMS published an interim final rule that questioned the use of charitable premium assistance for ESRD patients and would have established new conditions for coverage standards for dialysis facilities. In January 2017, a federal court issued a preliminary injunction on CMS' interim final rule and in June 2017, at the request of CMS, the court stayed the proceedings while CMS pursues new rulemaking options. In November 2017, when CMS published the 2018 final rule that updates payment policies and rates under the ESRD PPS, and the 2019 proposed Notice of Benefit and Payment Parameters, it did not pursue further discussion or rule making related to charitable premium assistance or propose changes to historical charitable premium assistance guidelines. This does not preclude CMS or another regulatory agency or legislative authority from issuing a new rule or guidance that challenges charitable premium assistance. Additionally, any other law, rule, or guidance issued by CMS or other regulatory or legislative authorities restricting or prohibiting the ability of patients with access to alternative coverage from selecting a marketplace plan on or off exchange, and/or otherwise restricting or prohibiting the use of charitable premium assistance, could adversely impact dialysis centers across the U.S. making certain centers economically unviable, restrict the ability of dialysis patients to obtain and maintain optimal insurance coverage, and have a material adverse effect on our business, results of operations, and financial condition.

Revenue from other pharmaceuticals and EPO

The impact of physician-prescribed pharmaceuticals on our overall revenues that are separately billable has significantly decreased since Medicare's single bundled payment system went into effect beginning in January 2011, as well as some additional commercial contracts that pay us a single bundled payment rate. Approximately 2% of our total U.S. dialysis and related lab services net patient services revenues for the years ended December 31, 2017 and 2016, are associated with the administration of separately-billable physician-prescribed pharmaceuticals. Of this, the administration of EPO that was separately billable, accounted for approximately half of our separately billable pharmaceuticals of our U.S. dialysis and related lab services business for both years. EPO is produced by a single manufacturer, Amgen USA Inc. (Amgen). In 2017, we entered into a Sourcing and Supply Agreement with Amgen that expires on December 31, 2022. Under the terms of the agreement, we will purchase EPO in amounts necessary to meet no less than 90% of our requirements for erythropoiesis-stimulating agents (ESAs) through the expiration of the contract. The actual amount of EPO that we will purchase from Amgen will depend upon the amount of EPO administered during dialysis treatments as prescribed by physicians and the overall number of patients that we serve. Any interruption in the supply of EPO or product cost increases that we are unable to mitigate could materially impact our operations.

In addition to EPO, other drugs are included in and, in the future, other drugs will be added to the ESRD PPS. On January 1, 2018, calcimimetics, a drug class taken by many ESRD patients to treat mineral bone disease, became part of the ESRD PPS. The drug has both an oral form (Sensipar) and IV form (Parsabiv). Because the IV form is a new injectable for which there is no current functional category, neither Parsabiv nor Sensipar are considered accounted for in the ESRD PPS base rate and are reimbursed through a Transitional Drug Add-on Payment Adjustment (TDAPA). The TDAPA period is expected to continue for a period of two years. Currently, the oral and IV forms of the drug are produced and sold by a single manufacturer, Amgen. In December 2017, we entered into a Sourcing and Supply Agreement with Amgen for both the oral and IV versions of calcimimetics. Our operating results could be materially impacted by certain factors, including physician prescribing patterns, vendor contracts with Amgen and other suppliers, the timing of the entry into the market of a generic oral equivalent, whether

the drug enters into the ESRD PPS and becomes part of its bundled payment following TDAPA and, if so, at what rate, and how commercial payors will treat reimbursement of the drug.

Physician relationships

An ESRD patient generally seeks treatment at an outpatient dialysis center near his or her home where his or her treating nephrologist has practice privileges. Our relationships with local nephrologists and our ability to meet their needs and the needs of their patients are key factors in the success of our dialysis operations. Approximately 5,300 nephrologists currently refer patients to our outpatient dialysis centers. As is typical in the dialysis industry, one or a few physicians, including the outpatient dialysis center's medical director, usually account for all or a significant portion of an outpatient dialysis center's patient base.

Participation in the Medicare ESRD program requires that dialysis services at an outpatient dialysis center be under the general supervision of a medical director who is a licensed physician. We have engaged physicians or groups of physicians to serve as medical directors for each of our outpatient dialysis centers. At some outpatient dialysis centers, we also separately contract with one or more other physicians to serve as assistant or associate medical directors or to direct specific programs, such as home dialysis training programs. We have approximately 1,000 individual physicians and physician groups under contract to provide medical director services.

Medical directors for our dialysis centers enter into written contracts with us that specify their duties and fix their compensation generally for periods of ten years. The compensation of our medical directors is the result of arm's length negotiations and generally depends upon an analysis of various factors such as the physician's duties, responsibilities, professional qualifications and experience, among others.

Our medical director contracts for our dialysis centers generally include covenants not to compete. Also, except as described below, when we acquire an outpatient dialysis center from one or more physicians or where one or more physicians own minority interests in our outpatient dialysis centers, these physicians have agreed to refrain from owning interests in other competing outpatient dialysis centers within a defined geographic area for various time periods. These non-compete agreements restrict the physicians from owning or providing medical director services to other outpatient dialysis centers, but do not prohibit the physicians from referring patients to any outpatient dialysis center, including competing centers. Many of these non-compete agreements continue for a period of time beyond expiration of the corresponding medical director agreements, although some expire at the same time as the medical director agreement. Occasionally, we experience competition from a new outpatient dialysis center established by a former medical director following the termination of his or her relationship with us. As part of our Corporate Integrity Agreement (CIA), as described below, we also have agreed not to enforce investment non-compete restrictions relating to dialysis clinics or programs that were established pursuant to a partial divestiture joint venture transaction. Therefore, to the extent a joint venture partner or medical director has a contract(s) with us covering dialysis clinics or programs that were established pursuant to a partial divestiture, we will not enforce the investment non-compete provision relating to those clinics and/or programs.

If a significant number of physicians, including an outpatient dialysis center's medical directors, were to cease referring patients to our outpatient dialysis centers, it would have a material adverse effect on our business, results of operations and financial condition.

Government regulation

Our dialysis operations are subject to extensive federal, state and local governmental laws and regulations. These laws and regulations require us to meet various standards relating to, among other things, government payment programs, dialysis facilities and equipment, management of centers, personnel qualifications, maintenance of proper records, and quality assurance programs and patient care.

If any of our operations are found to violate applicable laws or regulations, we could suffer severe consequences that could have a material adverse effect on our business, results of operations, financial condition and stock price, including:

- Suspension or termination of our participation in government payment programs;
- Refund amounts received in violation of law or applicable payment program requirements;
- Loss of required government certifications or exclusion from government payment programs;
- Loss of licenses required to operate healthcare facilities or administer pharmaceuticals in some of the states in which we operate or elsewhere;

- Reductions in payment rates or coverage for dialysis and ancillary services and related pharmaceuticals;
- Civil or criminal liability, fines, damages and monetary penalties for violations of healthcare fraud and abuse laws, including the federal Anti-Kickback Statute contained in the Social Security Act of 1935, as amended (Anti-Kickback Statute), Stark Law and False Claims Act (FCA), and other failures to meet regulatory requirements;
- Enforcement actions by governmental agencies and/or claims for monetary damages from patients who believe their protected health information (PHI) has been used, disclosed or not properly safeguarded in violation of federal or state patient privacy laws including the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and the Privacy Act of 1974;
- Mandated changes to our practices or procedures that significantly increase operating expenses;
- Imposition of and compliance with corporate integrity agreements that could subject us to ongoing audits and reporting requirements as well as increased scrutiny of our billing and business practices and potential fines;
- Termination of relationships with medical directors; and
- Harm to our reputation which could impact our business relationships, affect our ability to obtain financing and decrease access to new business opportunities, among other things.

We expect that our industry will continue to be subject to substantial regulation, the scope and effect of which are difficult to predict. Our activities could be reviewed or challenged by regulatory authorities at any time in the future. This regulation and scrutiny could have a material adverse impact on us.

Licensure and certification

Our dialysis centers are certified by CMS, as is required for the receipt of Medicare payments. In some states, our outpatient dialysis centers also are required to secure additional state licenses and permits. Governmental authorities, primarily state departments of health, periodically inspect our centers to determine if we satisfy applicable federal and state standards and requirements, including the conditions of participation in the Medicare ESRD program.

To date, we have experienced some delays in obtaining Medicare certifications from CMS. Recent legislation will allow private entities to perform initial dialysis facilities certifications beginning in 2019. We may choose to use these private companies in the future, although the number of companies who will enter the market and the cost of surveys they might perform has yet to be determined.

Federal Anti-Kickback Statute

The federal Anti-Kickback Statute prohibits, among other things, knowingly and willfully offering, paying, soliciting or receiving remuneration, directly or indirectly, in cash or kind, to induce or reward either the referral of an individual for, or the purchase, or order or recommendation of, any good or service, for which payment may be made under federal and state healthcare programs such as Medicare and Medicaid.

Federal criminal penalties for the violation of the federal Anti-Kickback Statute include imprisonment, fines and exclusion of the provider from future participation in the federal healthcare programs, including Medicare and Medicaid. Violations of the federal Anti-Kickback Statute are punishable by imprisonment for up to ten years and fines of up to $100,000 or both. Larger fines can be imposed upon corporations under the provisions of the U.S. Sentencing Guidelines and the Alternate Fines Statute. Individuals and entities convicted of violating the federal Anti-Kickback Statute are subject to mandatory exclusion from participation in Medicare, Medicaid and other federal healthcare programs for a minimum of five years. Civil penalties for violation of this law include up to $100,000 in monetary penalties per violation, repayments of up to three times the total payments between the parties and suspension from future participation in Medicare and Medicaid. Court decisions have held that the statute may be violated even if only one purpose of remuneration is to induce referrals. The Patient Protection and Affordable Care Act of 2010, as amended by the Health Care and Education Reconciliation Act of 2010 (Affordable Care Act (ACA)) amended the federal Anti-Kickback Statute to clarify the intent that is required to prove a violation. Under the statute as amended, the defendant does not need to have actual knowledge of the federal Anti-Kickback Statute or have the specific intent to violate it. In addition, the ACA amended the federal Anti-Kickback Statute to provide that any claims for items or services resulting from a violation of the federal Anti-Kickback Statute are considered false or fraudulent for purposes of the FCA.

The federal Anti-Kickback Statute includes statutory exceptions and regulatory safe harbors that protect certain arrangements. Business transactions and arrangements that are structured to comply fully with an applicable safe harbor do not violate the federal Anti-Kickback Statute. However, transactions and arrangements that do not satisfy all elements of a relevant safe harbor do not necessarily violate the law. When an arrangement does not satisfy a safe harbor, the arrangement must be evaluated on a case-by-case basis in light of the parties' intent and the arrangement's potential for abuse. Arrangements that do not satisfy a safe harbor may be subject to greater scrutiny by enforcement agencies.

We enter into several arrangements with physicians that potentially implicate the Anti-Kickback Statute, such as:

Medical Director Agreements. Because our medical directors refer patients to our dialysis centers, our arrangements with these physicians are designed to substantially comply with the safe harbor for personal service arrangements. Although the Medical Director Agreements we enter into with physicians substantially comply with the safe harbor for personal service arrangements, including the requirement that compensation be consistent with fair market value, the safe harbor requires that when services are provided on a part-time basis, the agreement must specify the schedule of intervals of services, and their precise length and the exact charge for such services. Because of the nature of our medical directors' duties, it is impossible to fully satisfy this technical element of the safe harbor. We believe that our fair market value arrangements with physicians who serve as medical directors do not violate the federal Anti-Kickback Statute; however, these arrangements could be subject to scrutiny since they do not expressly describe the schedule of part-time services to be provided under the arrangement.

Joint Ventures. We own a controlling interest in numerous U.S. dialysis related joint ventures. For the year ended December 31, 2017, these joint ventures represented approximately 24% of our net U.S. dialysis and related lab services revenues. We may continue to increase the number of our joint ventures. Our relationships with physicians and other referral sources relating to these joint ventures do not fully satisfy the safe harbor for investments in small entities. Although failure to comply with a safe harbor does not render an arrangement illegal under the federal Anti-Kickback Statute, an arrangement that does not operate within a safe harbor may be subject to scrutiny and the Department of Health and Human Services' Office of Inspector General (OIG) has warned in the past that certain joint venture relationships have a potential for abuse. Based upon the foregoing, physician joint ventures that fall outside the safe harbors are not, by definition, prohibited by law. Instead, such joint ventures require case-by-case evaluation under the federal Anti-Kickback Statute.

In this regard, we have structured our joint ventures to satisfy as many elements of the safe harbor for investments in small entities as we believe are commercially reasonable. For example, we believe that these investments are offered and made by us on a fair market value basis and provide returns to the investors in proportion to their actual investment in the venture. We believe that our joint venture arrangements do not violate the federal Anti-Kickback Statute; however, since the arrangements do not satisfy all of the requirements of an applicable safe harbor, these arrangements could be subject to challenge on the ground that they are intended to induce patient referrals. In that regard, we were subject to investigation by the United States Attorney's Office for the District of Colorado, the Civil Division of the United States Department of Justice (DOJ) and the OIG related to our relationships with physicians, including our joint ventures, and whether those relationships and joint ventures comply with the federal Anti-Kickback Statute and the FCA. In October 2014, we entered into a Settlement Agreement with the United States and relator David Barbetta to resolve the then pending 2010 and 2011 U.S. Attorney physician relationship investigations. In connection with the resolution of this matter, and in exchange for the OIG's agreement not to exclude us from participating in the federal healthcare programs, we have entered into a five-year CIA with the OIG. The CIA (i) requires that we maintain certain elements of our compliance programs; (ii) imposes certain expanded compliance-related requirements during the term of the CIA; (iii) requires ongoing monitoring and reporting by an independent monitor, imposes certain reporting, certification, records retention and training obligations, allocates certain oversight responsibility to the Board's Compliance Committee, and necessitates the creation of a Management Compliance Committee and the retention of an independent compliance advisor to the Board; and (iv) contains certain business restrictions related to a subset of our joint venture arrangement. The costs associated with compliance with the CIA could be substantial and may be greater than we currently anticipate. In addition, in the event of a breach of the CIA, we could become liable for payment of certain stipulated penalties, and could be excluded from participation in federal healthcare programs.

Lease Arrangements. We lease space for numerous dialysis centers from entities in which physicians, hospitals or medical groups hold ownership interests, and we sublease space to referring physicians at approximately 250 of our dialysis centers as of December 31, 2017. We believe that these arrangements comply with the federal Anti-Kickback Statute safe harbor for space rentals in all material respects. Therefore, we believe that these lease arrangements should not be subject to challenge under the federal Anti-Kickback Statute.

Common Stock. Some medical directors and other referring physicians may own our common stock. We believe that these interests materially satisfy the requirements of the Anti-Kickback Statute safe harbor for investments in large publicly traded companies. Therefore, we believe that these investments should not be subject to challenge under the federal Anti-Kickback Statute.

Discounts. Our dialysis centers sometimes acquire certain items and services at a discount that may be reimbursed by a federal healthcare program. We believe that our vendor contracts that include discount or rebate provisions are in compliance with the federal Anti-Kickback Statute safe harbor for discounts, and accordingly, we believe that our discounted vendor contracts should not be subject to challenge under the federal Anti-Kickback Statute.

If any of our business transactions or arrangements, including those described above, were found to violate the federal Anti-Kickback Statute, we, among other things, could face criminal, civil or administrative sanctions, including possible exclusion from participation in Medicare, Medicaid and other state and federal healthcare programs. Any findings that we have violated these laws could have a material adverse impact on our business, results of operations, financial condition and stock price.

Stark Law

The Stark Law prohibits a physician who has a financial relationship, or who has an immediate family member who has a financial relationship, with entities providing Designated Health Services (DHS), from referring Medicare and Medicaid patients to such entities for the furnishing of DHS, unless an exception applies. DHS is defined to mean any of the following enumerated items or services; clinical laboratory services; physical therapy services; occupational therapy services; radiology services, including magnetic resonance imaging, computerized axial tomography scans, and ultrasound services; radiation therapy services and supplies; durable medical equipment and supplies; parenteral and enteral nutrients, equipment, and supplies; prosthetics, orthotics and prosthetic devices and supplies; home health services; outpatient prescription drugs; inpatient and outpatient hospital services; and outpatient speech-language pathology services. The types of financial arrangements between a physician and a DHS entity that trigger the self-referral prohibitions of the Stark Law are broad and include direct and indirect ownership and investment interests and compensation arrangements. The Stark Law also prohibits the DHS entity receiving a prohibited referral from presenting, or causing to be presented, a claim or billing for the services arising out of the prohibited referral. The prohibition applies regardless of the reasons for the financial relationship and the referral; unlike the federal Anti-Kickback Statute, intent to induce referrals is not required. If the Stark Law is implicated, the financial relationship must fully satisfy a Stark Law exception. If an exception is not satisfied, then the arrangement could be subject to sanctions. Sanctions for violation of the Stark Law include denial of payment for claims for services provided in violation of the prohibition, refunds of amounts collected in violation of the prohibition, a civil penalty of up to $15,000 for each service arising out of the prohibited referral, a civil penalty of up to $100,000 against parties that enter into a scheme to circumvent the Stark Law prohibition, civil assessment of up to three times the amount claimed, and potential exclusion from the federal healthcare programs, including Medicare and Medicaid. Amounts collected for prohibited claims must be reported and refunded generally within 60 days after the date on which the overpayment was identified. Furthermore, Stark Law violations and failure to return overpayments timely can form the basis for FCA liability as discussed below.

The definition of DHS under the Stark Law excludes services paid under a composite rate, even if some of the components bundled in the composite rate are DHS. Although the ESRD bundled payment system is no longer titled a composite rate, we believe that the former composite rate payment system and the current bundled system are both composite systems excluded from the Stark Law. Since most services furnished to Medicare beneficiaries provided in our dialysis centers are reimbursed through a bundled rate, the services performed in our facilities generally are not DHS, and the Stark Law referral prohibition does not apply to those services. Certain separately billable drugs (drugs furnished to an ESRD patient that are not for the treatment of ESRD that CMS allows our centers to bill for using the so-called AY modifier) may be considered DHS. However, for compliance with the law we have implemented certain billing controls to limit DHS being billed out of our dialysis clinics. Likewise, the definition of inpatient hospital services, for purposes of the Stark Law, also excludes inpatient dialysis performed in hospitals that are not certified to provide ESRD services. Consequently, our arrangements with such hospitals for the provision of dialysis services to hospital inpatients do not trigger the Stark Law referral prohibition.

In addition, although prescription drugs are DHS, there is an exception in the Stark Law for EPO and other specifically enumerated dialysis drugs when furnished in or by an ESRD facility such that the arrangement for the furnishing of the drugs does not violate the federal Anti-Kickback Statute, and all billing and claims submission for the drugs does not violate any laws or regulations governing billing or claims submission. The exception is available only for drugs included on a list of Current Procedural Terminology/Healthcare Common Procedure Coding System (CPT/HCPCS) codes published by CMS, and for EPO, Aranesp® and equivalent drugs dispensed by the ESRD facility for use at home. While we believe that most drugs furnished by our dialysis centers are covered by the exception, dialysis centers may administer drugs that are not on the list of CPT/HCPCS codes and therefore do not meet this exception. In order for a physician who has a financial relationship with a dialysis center to order one of these drugs from the center and for the center to obtain Medicare reimbursement, another exception must apply.

We have entered into several types of financial relationships with referring physicians, including compensation arrangements. If our dialysis centers were to bill for a non-exempted drug and the financial relationships with the referring

physician did not satisfy an exception, we could in the future be required to change our practices, face civil penalties, pay substantial fines, return certain payments received from Medicare and beneficiaries or otherwise experience a material adverse effect as a result of a challenge to payments made pursuant to referrals from these physicians under the Stark Law.

Medical Director Agreements. We believe that our medical director agreements satisfy the personal services arrangement exception to the Stark Law. While we believe that the compensation provisions included in our medical director agreements are the result of arm's length negotiations and result in fair market value payments for medical director services, an enforcement agency could nevertheless challenge the level of compensation that we pay our medical directors.

Lease Agreements. Some of our dialysis centers are leased from entities in which referring physicians hold interests and we sublease space to referring physicians at some of our dialysis centers. The Stark Law provides an exception for lease arrangements if specific requirements are met. We endeavor to structure our leases and subleases with referring physicians to satisfy the requirements for this exception.

Common Stock. Some medical directors and other referring physicians may own our common stock. We believe that these interests satisfy the Stark Law exception for investments in large publicly traded companies.

Joint Ventures. Some of our referring physicians also own equity interests in entities that operate our dialysis centers. None of the Stark Law exceptions applicable to physician ownership interests in entities to which they make DHS referrals apply to the kinds of ownership arrangements that referring physicians hold in several of our subsidiaries that operate dialysis centers. Accordingly, these dialysis centers do not bill Medicare for DHS referrals from physician owners. If the dialysis centers bill for DHS referred by physician owners, the dialysis center would be subject to the Stark Law penalties described above.

Other Operations. The operations of our ancillary and subsidiary businesses are also subject to compliance with the Stark Law, and any failure to comply with these requirements, particularly in light of the strict liability nature of the Stark Law, could subject these operations to the Stark Law penalties and sanctions described above.

While we believe that most of our operations do not implicate the Stark Law, particularly under the ESRD bundled payment system, and that to the extent that our dialysis centers furnish DHS, they either meet an exception or do not bill for services that do not meet a Stark Law exception, if CMS determined that we have submitted claims in violation of the Stark Law, or otherwise violated the Stark Law, we would be subject to the penalties described above. In addition, it might be necessary to restructure existing compensation agreements with our medical directors and to repurchase or to request the sale of ownership interests in subsidiaries and partnerships held by referring physicians or, alternatively, to refuse to accept referrals for DHS from these physicians, or take other actions to modify our operations. Any such penalties and restructuring or other required actions could have a material adverse effect on our business, results of operations and financial condition.

Fraud and abuse under state law

Many states in which we operate dialysis centers have statutes prohibiting physicians from holding financial interests in various types of medical facilities to which they refer patients. Some of these statutes could potentially be interpreted broadly as prohibiting physicians who hold shares of our publicly traded stock from referring patients to our dialysis centers if the centers use our laboratory subsidiary to perform laboratory services for their patients. States also have laws similar to or stricter than the federal Anti-Kickback Statute that may affect our ability to receive referrals from physicians with whom we have financial relationships, such as our medical directors. Some state anti-kickback statutes also include civil and criminal penalties. Some of these statutes include exemptions that may be applicable to our medical directors and other physician relationships or for financial interests limited to shares of publicly traded stock. Some, however, include no explicit exemption for medical director services or other services for which we contract with and compensate referring physicians or for joint ownership interests of the type held by some of our referring physicians or for financial interests limited to shares of publicly traded stock. If these statutes are interpreted to apply to referring physicians with whom we contract for medical director and similar services, to referring physicians with whom we hold joint ownership interests or to physicians who hold interests in DaVita Inc. limited solely to our publicly traded stock, we may be required to terminate or restructure some or all of our relationships with or refuse referrals from these referring physicians and could be subject to criminal, civil and administrative sanctions, refund requirements and exclusions from government healthcare programs, including Medicare and Medicaid. Such events could negatively affect the decision of referring physicians to refer patients to our centers.

The False Claims Act

The federal FCA is a means of policing false bills or false requests for payment in the healthcare delivery system. In part, the FCA authorizes the imposition of up to three times the government's damages and civil penalties on any person who, among other acts:

- Knowingly presents or causes to be presented to the federal government, a false or fraudulent claim for payment or approval;
- Knowingly makes, uses or causes to be made or used, a false record or statement material to a false or fraudulent claim;
- Knowingly makes, uses, or causes to be made or used, a false record or statement material to an obligation to pay the government, or knowingly conceals or knowingly and improperly, avoids or decreases an obligation to pay or transmit money or property to the federal government; or
- Conspires to commit the above acts.

In addition, amendments to the FCA impose severe penalties for the knowing and improper retention of overpayments collected from government payors. Under these provisions, within 60 days of identifying an overpayment, a provider is required to notify CMS or the Medicare Administrative Contractor of the overpayment and the reason for it and return the overpayment. An overpayment impermissibly retained could subject us to liability under the FCA, exclusion, and penalties under the federal Civil Monetary Penalty statute. As a result of these provisions, our procedures for identifying and processing overpayments may be subject to greater scrutiny. We have made significant investments to accelerate the time it takes us to identify and process overpayments and we may be required to make additional investments in the future. Acceleration in our ability to identify and process overpayments could result in us refunding overpayments to government or other payors sooner than we have in the past. A significant acceleration of these refunds could have a material adverse effect on our operating cash flows.

The penalties for a violation of the FCA range from $5,500 to $11,000 (adjusted for inflation) for each false claim, plus up to three times the amount of damages caused by each false claim, which can be as much as the amounts received directly or indirectly from the government for each such false claim. On February 3, 2017, the DOJ issued a final rule announcing adjustments to FCA penalties, under which the per claim penalty range increases to $10,957 to $21,916 for penalties assessed after February 3, 2017, so long as the underlying conduct occurred after November 2, 2015. The federal government has used the FCA to prosecute a wide variety of alleged false claims and fraud allegedly perpetrated against Medicare and state healthcare programs, including coding errors, billing for services not rendered, the submission of false cost reports, billing for services at a higher payment rate than appropriate, billing under a comprehensive code as well as under one or more component codes included in the comprehensive code and billing for care that is not considered medically necessary. The ACA provides that claims tainted by a violation of the federal Anti-Kickback Statute are false for purposes of the FCA. Some courts have held that filing claims or failing to refund amounts collected in violation of the Stark Law can form the basis for liability under the FCA. In addition to the provisions of the FCA, which provide for civil enforcement, the federal government can use several criminal statutes to prosecute persons who are alleged to have submitted false or fraudulent claims for payment to the federal government.

Privacy and Security

The Health Insurance Portability and Accountability Act of 1996 and its implementing privacy and security regulations, as amended by the federal Health Information Technology for Economic and Clinical Health Act (HITECH Act), (collectively referred to as HIPAA), require us to provide certain protections to patients and their health information. The HIPAA privacy and security regulations extensively regulate the use and disclosure of PHI and require covered entities, which include healthcare providers, to implement and maintain administrative, physical and technical safeguards to protect the security of such information. Additional security requirements apply to electronic PHI. These regulations also provide patients with substantive rights with respect to their health information.

The HIPAA privacy and security regulations also require us to enter into written agreements with certain contractors, known as business associates, to whom we disclose PHI. Covered entities may be subject to penalties for, among other activities, failing to enter into a business associate agreement where required by law or as a result of a business associate violating HIPAA if the business associate is found to be an agent of the covered entity and acting within the scope of the agency. Business associates are also directly subject to liability under the HIPAA privacy and security regulations. In instances

where we act as a business associate to a covered entity, there is the potential for additional liability beyond our status as a covered entity.

Covered entities must report breaches of unsecured PHI to affected individuals without unreasonable delay but not to exceed 60 days of discovery of the breach by a covered entity or its agents. Notification must also be made to the HHS, and, for breaches of unsecured PHI involving more than 500 residents of a state or jurisdiction, to the media. All non-permitted uses or disclosures of unsecured PHI are presumed to be breaches unless the covered entity or business associate establishes that there is a low probability the information has been compromised. Various state laws and regulations may also require us to notify affected individuals in the event of a data breach involving individually identifiable information without regard to whether there is a low probability of the information being compromised.

Penalties for impermissible use or disclosure of PHI were increased by the HITECH Act by imposing tiered penalties of more than $50,000 per violation and up to $1.5 million per year for identical violations. In addition, HIPAA provides for criminal penalties of up to $250,000 and ten years in prison, with the severest penalties for obtaining and disclosing PHI with the intent to sell, transfer or use such information for commercial advantage, personal gain or malicious harm. Further, state attorneys general may bring civil actions seeking either injunction or damages in response to violations of the HIPAA privacy and security regulations that threaten the privacy of state residents. We believe our HIPAA Privacy and Security Program sufficiently addresses HIPAA and state privacy law requirements.

Healthcare reform

In March 2010, broad healthcare reform legislation was enacted in the U.S. through the ACA. Although many of the provisions of the ACA did not take effect immediately and continue to be implemented, and some have been and may be modified before or during their implementation, the reforms could have an impact on our business in a number of ways. We cannot predict how employers, private payors or persons buying insurance might react to federal and state healthcare reform legislation or what form many of these regulations will take before implementation.

The ACA introduced healthcare insurance exchanges, which provide a marketplace for eligible individuals and small employers to purchase healthcare insurance. The business and regulatory environment continues to evolve as the exchanges mature, and statutes and regulations are challenged, changed and enforced.

The ACA also requires that all non-grandfathered individual and small group health plans sold in a state, including plans sold through the state-based exchanges created pursuant to the healthcare reform laws, cover essential health benefits (EHBs) in ten general categories. The scope of the benefits is intended to equal the scope of benefits under a typical employer plan.

On February 25, 2013, HHS issued the final rule governing the standards applicable to EHB benchmark plans, new definitions, actuarial value requirements and methodology, and published a list of plan benchmark options that states can use to develop EHBs. The rule describes specific coverage requirements that (i) prohibit discrimination against individuals because of pre-existing or chronic conditions on health plans applicable to EHBs, (ii) ensure network adequacy of essential health providers, and (iii) prohibit benefit designs that limit enrollment and that prohibit access to care for enrollees. Subsequent regulations relevant to the EHB have continued the benchmark plan approach for 2016 and future years and have implemented clarifications and modifications to the existing EHB regulations, including the prohibition on discrimination, network adequacy standards and other requirements. In recent years, CMS has issued an annual Notice of Benefit and Payment Parameters rulemaking and related guidance setting forth standards for insurance plans provided through the exchanges.

Other aspects of the 2010 healthcare reform laws may affect our business as well, including changes affecting the Medicare and Medicaid programs. We note, however, that the 2016 Presidential and Congressional elections and subsequent developments have caused the future state of the exchanges and other ACA reforms to be very unclear. The Republicans, who now control the Administration and Congress, have repeatedly expressed a desire to repeal and replace the ACA. Further, in October 2017, the federal government announced that cost-sharing reduction payments to insurers would end, effective immediately, unless Congress appropriated the funds, and, in December 2017, Congress passed the Tax Cuts and Jobs Act, which includes a provision that eliminates the penalty under the ACA's individual mandate and could impact the future state of the exchanges. Moreover, in February 2018, Congress passed the BBA which, among other things, repealed the Independent Payment Advisory Board that was established by the ACA and intended to reduce the rate of growth in Medicare spending. While certain provisions of the BBA may increase the scope of benefits available for certain chronically ill Federal health care program beneficiaries beginning in 2020, the ultimate impact of such changes cannot be predicted. While there may be significant changes to the healthcare environment in the future, the specific changes and their timing are not yet apparent. As a result, there is considerable uncertainty regarding the future with respect to the exchanges, and, indeed, many core aspects of the current health care marketplace. While specific changes and their timing are not yet apparent, the enacted reforms as well as

future legislative, regulatory, and executive changes could have a material adverse effect on our results of operations, including lowering our reimbursement rates and/or increasing our expenses.

Other regulations

Our U.S. dialysis and related lab services operations are subject to various state hazardous waste and non-hazardous medical waste disposal laws. These laws do not classify as hazardous most of the waste produced from dialysis services. Occupational Safety and Health Administration regulations require employers to provide workers who are occupationally subject to blood or other potentially infectious materials with prescribed protections. These regulatory requirements apply to all healthcare facilities, including dialysis centers, and require employers to make a determination as to which employees may be exposed to blood or other potentially infectious materials and to have in effect a written exposure control plan. In addition, employers are required to provide or employ hepatitis B vaccinations, personal protective equipment and other safety devices, infection control training, post-exposure evaluation and follow-up, waste disposal techniques and procedures and work practice controls. Employers are also required to comply with various record-keeping requirements. We believe that we are in material compliance with these laws and regulations.

A few states have certificate of need programs regulating the establishment or expansion of healthcare facilities, including dialysis centers. We believe that we are in material compliance with all applicable state certificate of need laws.

Capacity and location of our U.S. dialysis centers

Typically we are able to increase our capacity by extending hours at our existing dialysis centers, expanding our existing dialysis centers, relocating our dialysis centers, developing new dialysis centers and by acquiring dialysis centers. The development of a typical outpatient dialysis center by us generally requires approximately $2.1 million for leasehold improvements and other capital expenditures. Based on our experience, a new outpatient dialysis center typically opens within a year after the property lease is signed, normally achieves operating profitability in the second year after Medicare certification and normally reaches maturity within three to five years. Acquiring an existing outpatient dialysis center requires a substantially greater initial investment, but profitability and cash flows are generally accelerated and more predictable. To a limited extent, we enter into agreements to provide management and administrative services to outpatient dialysis centers in which we either own a noncontrolling equity investment, or are wholly-owned by third parties in return for management fees, which are typically based on a percentage of revenues or cash collections of the managed center's operations.

The table below shows the growth of our U.S. dialysis operations by number of dialysis centers.

	2017	2016	2015	2014	2013
Number of centers at beginning of year	2,350	2,251	2,179	2,074	1,954
Acquired centers	66	8	6	18	26
Developed centers	121	100	72	105	98
Net change in centers with management and administrative services agreements[1]	(2)	—	2	—	4
Sold and closed centers[2][3]	(15)	(4)	(3)	(2)	(5)
Closed centers[4]	(10)	(5)	(5)	(16)	(3)
Number of centers at end of year	2,510	2,350	2,251	2,179	2,074

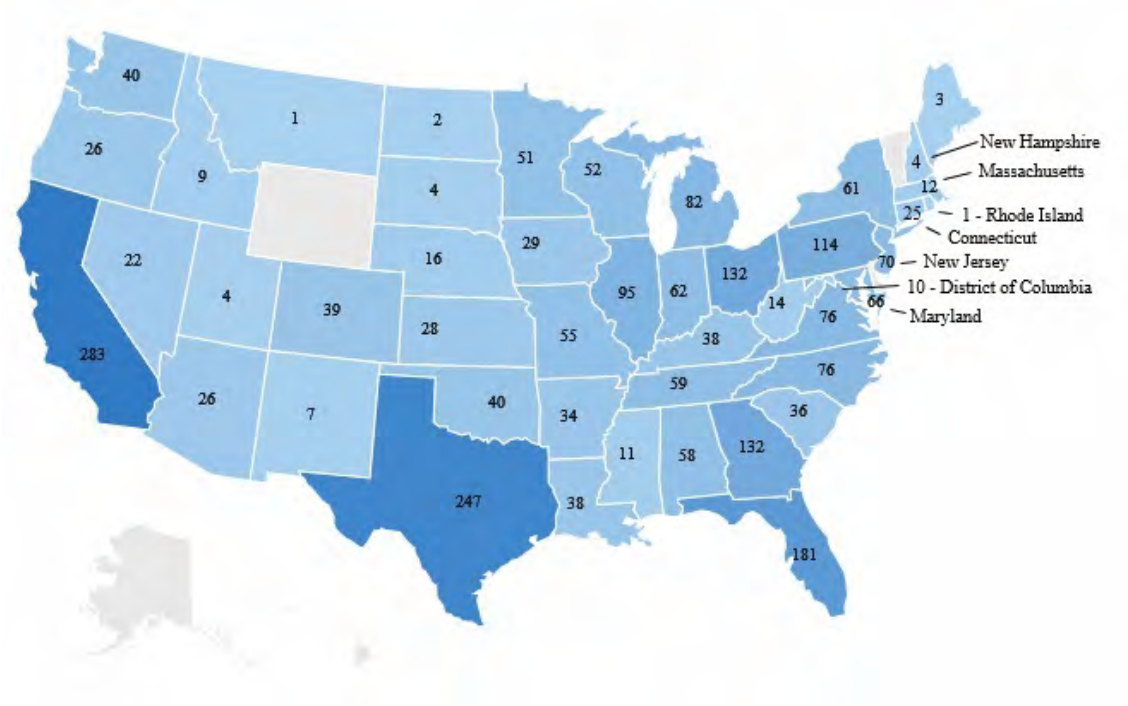
(1) Represents dialysis centers in which we either own a noncontrolling equity investment, or are wholly-owned by third parties, and also includes dialysis centers we deconsolidated and transferred to management services agreements.

(2) Includes centers that were divested as a part of our Renal Ventures acquisition.

(3) Represents dialysis centers that were sold and/or closed for which patients were not retained.

(4) Represents dialysis centers that were closed for which the majority of patients were retained and transferred to one of our other existing outpatient dialysis centers.

As of December 31, 2017, we operated or provided administrative services to a total of 2,510 U.S. outpatient dialysis centers. A total of 2,471 of such centers are consolidated in our financial statements. Of the remaining 39 unconsolidated U.S. outpatient dialysis centers, we own a noncontrolling interest in 34 centers and provide management and administrative services to five centers that are wholly-owned by third parties. The locations of the 2,471 U.S. outpatient dialysis centers consolidated in our financial statements at December 31, 2017 were as follows:



Ancillary services and strategic initiatives businesses, including our international operations

As of December 31, 2017, our ancillary services and strategic initiatives consisted primarily of pharmacy services, disease management services, vascular access services, clinical research programs, physician services, direct primary care, ESRD seamless care organizations, comprehensive care, and our international operations and relate primarily to our core business of providing kidney care services.

Ancillary services and strategic initiatives consist primarily of the following:

- *Pharmacy services*. DaVita Rx is a pharmacy that specializes in providing oral medications and medication management services to patients with ESRD. The main objective of the pharmacy is to improve clinical outcomes and reduce total healthcare costs by facilitating increased patient compliance and to provide our patients a convenient way to fill their prescription needs. Revenues are recognized as prescriptions are filled and shipped to patients or when services are completed.

- *Disease management services.* VillageHealth provides advanced integrated care management services to health plans and government programs for members/beneficiaries diagnosed with ESRD, chronic kidney failure, and/or poly-comorbid conditions. Through a combination of clinical coordination, innovative interventions, medical claims analysis and information technology, we endeavor to assist our customers and patients in obtaining superior renal healthcare and improved clinical outcomes, as well as helping to reduce overall medical costs. Integrated care management revenues are typically based upon an established contract fee and are recognized as earned over the contract period and can include additional fees for cost savings recognized by certain customers. VillageHealth also operates Medicare Advantage ESRD Special Needs Plans in partnership with payors that work with CMS to provide ESRD patients full service healthcare. We are at risk for all medical costs of the program in excess of the capitation payments. Furthermore, in October 2015, VillageHealth entered into management service agreements to support three ESCO joint ventures in which we are an investor through certain wholly- or majority-owned dialysis clinics.

- *Vascular access services.* Lifeline provides management and administrative services to physician-owned vascular access clinics that provide vascular services for dialysis and other patients. Lifeline is also the majority-owner of nine vascular access clinics. Management fees generated from providing management and administrative services are recognized as earned typically based on a percentage of revenues or cash collections generated by the clinics. Revenues associated with the vascular access clinics that are majority-owned are recognized in the period when the services are provided.

- *Clinical research programs.* DaVita Clinical Research (DCR) is a provider-based specialty clinical research organization with a full spectrum of services for clinical drug research and device development. DCR uses its extensive, applied database and real-world healthcare experience to assist in the design, recruitment and completion of retrospective, prospective pragmatic and clinical trials. Revenues are based upon an established fee per study, as determined by contract with drug companies and other sponsors and are recognized as earned according to the contract terms.

- *Physician services.* Nephrology Practice Solutions (NPS) is an independent business that partners with physicians committed to providing outstanding clinical and integrated care to patients. NPS provides nephrologist employment opportunities in select markets and offers physician practice management services to nephrologists under administrative services agreements. These services include physician practice management, billing and collections, credentialing, coding, and other support services that enable physician practices to increase efficiency and manage their administrative needs. Fees generated from these services are recognized as earned typically based upon flat fees or cash collections generated by the physician practice. NPS also provides leading nephrology recruitment and staffing services which are billed on a per search basis.

- *Direct primary care.* Paladina Health is a healthcare services organization that operates membership-based primary care clinics mainly through employer-based on-site and near-site clinics. The clinics offer patients more personalized and improved access to primary care physicians, including unlimited visits and same-day or next-day appointments. Physicians focus on clinical outcomes and patient satisfaction. Revenues are recognized over the membership period.

- *ESRD Seamless Care Organization joint ventures (ESCO JVs).* In October 2015, certain of our dialysis clinics entered into partnerships with various nephrology practices, DaVita Rx and health systems to establish three ESCO JVs in Phoenix-Tucson Arizona, South Florida, and Philadelphia Pennsylvania-Camden, New Jersey. The ESCO JVs were formed under the CMS Innovation Center's Comprehensive ESRD Care (CEC) Model, a demonstration to assess the impact of care coordination for ESRD patients in a dialysis-center oriented ACO setting. Each ESCO JV has a shared risk arrangement with CMS and the programs are evaluated on a performance year basis. The delivery of improved quality outcomes for patients and program savings depend on the contributions of the dialysis center teammates, nephrologists, health system and hospital partners, pharmacy providers including DaVita Rx, other primary care and specialty care providers and facilities, and integrated care management support from VillageHealth, which is also the manager of the ESCO JVs. In October 2017, CMS published the results for the first performance year, covering the period from October 2015 to December 2016, and all three ESCO JVs earned shared savings payments.

- *Comprehensive care.* DaVita Health Solutions provides high-quality, comprehensive medical care for high-risk patients when and where they need it most - at home, in a post-acute care facility or within the dialysis center. DaVita Health Solutions offers a broad suite of home- and outpatient-based care programs, including primary care, behavioral health, palliative care, comprehensive health assessments and other clinical services through 24/7 house calls at home, at skilled nursing facilities and at dialysis centers.

International dialysis operations

As of December 31, 2017, we operated or provided administrative services to a total of 237 outpatient dialysis centers, which includes consolidated and nonconsolidated centers located in 11 countries outside of the U.S., serving approximately 22,900 patients. Our international dialysis operations have continued to grow steadily and expand as a result of developing and acquiring outpatient dialysis centers in various strategic markets. Our international operations are included as a component of our ancillary services and strategic initiatives. The table below summarizes the number and locations of our international

outpatient dialysis centers.

	2017	2016	2015	2014	2013
Number of centers at beginning of year	154	118	91	73	36
Acquired centers	68	21	21	9	38
Developed and hospital operated centers	8	12	7	11	2
Managed centers, net	—	—	(1)	—	—
Closed centers	(1)	—	—	(2)	(3)
Net change in Asia Pacific Joint Venture (APAC JV) operated centers	8	66	—	—	—
Deconsolidated centers due to formation of APAC JV	—	(63)	—	—	—
Number of centers at end of year	237	154	118	91	73

The locations of our international outpatient dialysis centers are as follows:

(1) Includes centers that are operated or managed by our APAC JV.

Corporate Administrative Support

Corporate administrative support consists primarily of labor, benefits and long-term incentive compensation costs for departments which provide support to all of our different operating lines of business. These expenses are included in our consolidated general and administrative expenses and are partially offset by the allocation of management fees.

DaVita Medical Group (DMG) Division

On December 5, 2017, we entered into an equity purchase agreement to sell our DMG division to Optum, a subsidiary of UnitedHealth Group Inc. The transaction is expected to close in 2018 and is subject to regulatory approval and other customary closing conditions. As a result of this pending transaction, the DMG business is classified as held for sale and its results of operations are reported as discontinued operations. In addition, prior periods' presentation has been revised to conform to current year presentation.

DMG business overview

DMG is a patient- and physician-focused integrated healthcare delivery and management company with over two decades of experience providing coordinated, outcomes-based medical care in a cost-effective manner. As of December 31, 2017, DMG served approximately 763,000 members under its care in southern California, central and south Florida, southern Nevada and central New Mexico through capitation contracts with some of the nation’s leading health plans. Of these members, approximately 319,900 individuals were patients enrolled in Medicare and Medicare Advantage, and the remaining approximately 443,100 individuals were managed care members whose health coverage is provided through their employer or who have individually acquired health coverage directly from a health plan or as a result of their eligibility for Medicaid benefits. In addition to its managed care business, during the year ended December 31, 2017, DMG provided care across all markets to approximately 966,600 patients whose health coverage is structured on a FFS basis, including patients enrolled through traditional Medicare and Medicaid programs, preferred provider organizations and other third party payors.

DMG patients as well as the patients of DMG's associated physicians, physician groups and IPAs benefit from an integrated approach to medical care that places the physician at the center of patient care. As of December 31, 2017, DMG delivered services to its members via a network of over 750 primary care physicians, over 3,500 associated group and other network primary care physicians, approximately 180 network hospitals, and several thousand associated group and network specialists. Together with hundreds of case managers, registered nurses and other care coordinators, these medical professionals utilize a comprehensive information technology system, sophisticated risk management techniques and clinical protocols to provide high-quality, cost-effective care to DMG's members.

U.S. healthcare spending has increased steadily over the past twenty years. These increases have been driven, in part, by the aging of the baby boomer generation, unhealthy behavioral and lifestyle choices in terms of exercise and diet, rapidly increasing costs in medical technology and pharmaceutical research, and provider reimbursement structures that may promote volume over quality in a FFS environment. These factors, as well as the steady growth of the U.S. population, have made the healthcare industry a growing market. In 2016, CMS reported that healthcare accounted for 17.9% of the U.S. gross domestic product and that healthcare spending increased 4.3% to reach $3.3 trillion. Medicare spending grew 3.6% to $672 billion in 2016 or 20% of National Health Expenditures, according to CMS. Medicare's share of the federal budget was approximately 15.0% in 2017 according to the Congressional Budget Office (CBO). Medicare is frequently the focus of discussions on how to moderate the growth of both federal spending and healthcare spending in the U.S.

Growth in Medicare spending is expected to continue due to demographic changes. According to the U.S. Census Bureau, the U.S. population aged 65 and over is expected to be 83.7 million in 2050 — almost double its estimated population of 43.1 million in 2012.

Medicare Advantage is an alternative to the traditional FFS Medicare program, which permits Medicare beneficiaries to receive benefits from a managed care health plan. Medicare Advantage plans contract with CMS to provide benefits that are at least comparable to those offered under the traditional FFS Medicare program in exchange for a fixed per-member monthly premium payment from CMS. The monthly premium varies based on the county in which the member resides, further adjusted to reflect the plan members' expected medical cost risk. Individuals who elect to participate in the Medicare Advantage program typically receive greater benefits than traditional FFS Medicare Part B beneficiaries, including additional preventive services, vision, dental and prescription drug benefits, and often have lower deductibles and co-payments than traditional FFS Medicare.

CMS pays Medicare Advantage health plans under a bidding process. Plans bid against county-level benchmarks. If a plan's bid is higher than the benchmark, enrollees pay the difference in the form of a monthly premium. If the bid is lower than the benchmark, the plan receives the difference between its payment amount and its bid as a rebate, which must be returned to enrollees in the form of additional benefits, reduced premiums, or lower cost sharing.

Managed care health plans were developed, primarily during the 1980s, in an attempt to mitigate the rising cost of providing healthcare benefits to populations covered by traditional health insurance. These managed care health plans often enroll members through their employers. As a result of the prevalence of these health plans, many seniors now becoming eligible for Medicare have been interacting with managed care companies through their employers for the last 30 years. Individuals turning 65 now are likely to be far more familiar with the managed care setting than previous Medicare populations. According to Kaiser Family Foundation, in 2017, Medicare Advantage represented 33% of total Medicare members, creating a significant opportunity for additional Medicare Advantage penetration of newly eligible seniors.

In an effort to reduce the number of uninsured and to begin to control healthcare expenditures, President Obama signed the ACA into law in March 2010, which was affirmed, in substantial part, by the U.S. Supreme Court in June 2012. As of the end of 2016, the number of uninsured nonelderly Americans was 27.6 million, a decrease of over 16 million since 2013. These previously uninsured Americans and potentially newly eligible Medicaid beneficiaries represent a significant new market opportunity for health plans. We believe that health plans looking to cover these newly eligible individuals under fixed premium arrangements will seek provider arrangements that can effectively manage the cost and quality of the care being provided to these newly eligible individuals, although the 2016 Presidential and Congressional elections and subsequent developments, including recent federal tax reform legislation, have caused the future state of the ACA to become less clear.

One of the primary ways in which the ACA funded expanded health insurance coverage is through cuts in Medicare Advantage reimbursement. County benchmarks have transitioned to a system in which each county's benchmark is a certain percentage (ranging from 95% to 115%) of FFS Medicare. In a March 2017 report to Congress, the Medicare Payment Advisory Commission (MedPAC) estimated that 2017 Medicare Advantage benchmarks (including the average 4% for quality bonuses), bids, and payments would average 106%, 90%, and 100% of FFS spending, respectively.

Despite the fact that the plan bids average less than FFS spending, payments for enrollees in these plans usually exceed FFS spending because the benchmarks are high relative to FFS spending. For example, health maintenance organizations (HMOs) as a group bid an average of 88% of FFS spending, yet 2017 payments for HMO enrollees are estimated to average 99% of FFS spending (including the quality bonuses).

Nonetheless, changes in benchmarks and/or bids that lower payments to Medicare Advantage plans could adversely affect DMG's operating results.

Many health plans recognize both the opportunity for growth from senior members as well as the potential risks and costs associated with managing additional senior members. In regions operated by DMG and numerous other markets, many health plans subcontract a significant portion of the responsibility for managing patient care to integrated medical networks such as DMG. These integrated healthcare networks, whether medical groups or IPAs, offer a comprehensive medical delivery system and sophisticated care management knowledge and infrastructure to more efficiently provide for the healthcare needs of the population enrolled with that health plan. While reimbursement models for these arrangements vary around the country, health plans in California, Florida, Nevada and New Mexico often prospectively pay the integrated healthcare network a fixed Per Member Per Month (PMPM) amount, or capitation payment, which is often based on a percentage of the amount received by the health plan. The capitation payment is for much-and sometimes virtually all-of the care needs of the applicable membership. Capitation payments to integrated healthcare networks, in aggregate, represent a prospective budget from which the network manages care-related expenses on behalf of the population enrolled with that network. To the extent that these networks manage care-related expenses below the capitated levels, the network realizes an operating profit. On the other hand, if care-related expenses exceed projected levels, the network will realize an operating deficit. Since premiums paid represent a significant amount per person, there is a significant revenue opportunity for an integrated medical network like DMG that is able to effectively manage its costs under a capitated arrangement.

Integrated medical networks, such as DMG, that have scale are positioned to spread an individual member's cost exposure across a wider population and realize the benefits of pooling medical risk among large numbers of patients. In addition, integrated medical networks with years of managed care experience can utilize their sizeable medical experience data to identify specific medical care and quality management strategies and interventions for potential high cost cases and aggressively manage them to improve the health of its population base and, thus, lower cost. Many integrated medical networks, like DMG, also have established physician performance metrics that allow them to monitor quality and service outcomes achieved by participating physicians in order to reward efficient, high quality care delivered to members and initiate improvement efforts for physicians whose results can be enhanced.

Healthcare reform

The U.S. healthcare system, including the Medicare Advantage program, is subject to a broad array of new laws and regulations as a result of the ACA. This legislation made significant changes to the Medicare program and to the health insurance market overall. The ACA is considered by some to be the most dramatic change to the U.S. healthcare system in decades. The U.S. Supreme Court found that the individual mandate to obtain health insurance coverage under this legislation is constitutional and also found that the expanded Medicaid benefit included in the legislation is constitutional if states can opt out of the expanded Medicaid benefit without losing their funding under the pre-reform Medicaid program. In a separate, subsequent case, the U.S. Supreme Court also upheld the use of subsidies to individuals in federally-facilitated healthcare exchanges, rejecting an argument that such subsidies would apply only in the state-run healthcare exchanges.

The ACA reflects sweeping legislation that, if fully implemented, may have a significant impact on the U.S. healthcare system generally and the operations of DMG's business. There are numerous steps required to implement the ACA, and implementation remains ongoing and uncertain. Congress also has enacted, and may continue to seek, legislative changes that alter, delay, or eliminate some of their provisions. For example, under the 2016 Omnibus budget agreement, Congress voted to delay certain new taxes that the ACA had enacted, including the excise tax on certain high-cost health plans, the medical device tax, and the tax on health insurers. In addition, the 2016 Presidential and Congressional elections and subsequent developments have caused the future state of the ACA to be unclear. In October 2017, the federal government announced that cost-sharing reduction payments to insurers would end, effective immediately, unless Congress appropriated the funds, and, in December 2017, Congress passed the Tax Cuts and Jobs Act, which includes a provision that eliminates the penalty under the ACA's individual mandate and could impact the future state of the exchanges. Further, in February 2018, Congress passed the BBA, which, among other things, repealed the Independent Payment Advisory Board that was established by the ACA and intended to reduce the rate of growth in Medicare spending. While certain provisions of the BBA may increase the scope of benefits available for certain chronically ill federal health care program beneficiaries beginning in 2020, the ultimate impact of such changes cannot be predicted. While specific changes and their timing are not yet apparent, the enacted reforms as well as future legislative, regulatory, or executive changes could have a material adverse effect on our results of operations, including lowering our reimbursement rates and increasing our expenses.

One provision of the ACA required CMS to establish a Medicare Shared Savings Program (MSSP) that promotes accountability and coordination of care through the creation of ACOs. The program allows certain providers and suppliers (including hospitals, physicians and other designated professionals) to voluntarily form ACOs and work together along with other ACO participants to invest in infrastructure and redesign delivery processes to achieve high quality and efficient delivery of services. In 2014, DMG entered into an agreement with CMS to participate in the MSSP in California, Florida and Nevada. Under this program, which ran through 2016, DMG strove to attain improved clinical outcomes to its Medicare FFS patients in a more cost-effective manner, and had the opportunity to share with CMS in any financial savings created. For the 2016 MSSP program, DMG achieved approximately $3 million in savings however was not able to benefit in these savings as the minimum savings rate was not reached. In 2017, DMG participated in the CMS Innovation Center's Next Generation ACO and will continue to participate through 2018. Results for 2017 participation will be available in the third quarter of 2018.

Payor environment

Government programs

DMG derives a significant portion of its revenues from services rendered to beneficiaries of Medicare (including Medicare Advantage), Medicaid, and other governmental healthcare programs.

Medicare. The Medicare program was established in 1965 and became effective in 1967 as a federally funded U.S. health insurance program for persons aged 65 and older, and it was later expanded to include individuals with ESRD and certain disabled persons, regardless of income or age. Since its formation, Medicare has grown to an approximately $672 billion program in 2016, covering approximately 57 million Americans and, based on the growing number of eligible beneficiaries and increases in the cost of healthcare, CBO projects that net Medicare spending will increase from $595 billion in 2017 to $1.2 trillion in 2027.

Initially, Medicare was offered only on a FFS basis. Under the Medicare FFS payment system, an individual can choose any licensed physician enrolled in Medicare and use the services of any hospital, healthcare provider or facility certified by Medicare. CMS reimburses providers for covered services if CMS considers them medically necessary.

FFS Medicare pays for physician services according to a physician fee schedule (PFS) set each year by CMS in accordance with formulas mandated by Congress. Historically, CMS annually adjusted the Medicare Physician Fee Schedule (Medicare PFS) payment rates based on an updated formula that included application of the Sustainable Growth Rate (SGR). On April 16, 2015, President Obama signed and enacted into law H.R. 2, the Medicare Access and CHIP Reauthorization Act of 2015, which, among other things, repealed the SGR and instituted a 0% update to the single conversion factor under the Medicare PFS from January 1 through June 30, 2015, a 0.5% update for July 2015 through the end of 2019, and a 0% update for 2020 through 2025. For 2026 and subsequent years, the update will be either 0.75% or 0.25%, depending on the Alternate Payment Model (APM) in which the physician participates. On October 14, 2016, CMS released a final rule implementing, among other changes, the Advanced APM incentive applicable to the physician fee schedule, under which physicians may receive bonus payments for participating in an Advanced APM. Among other things, the final rule identifies the criteria an APM must satisfy to be considered an Advanced APM, which could include some MSSP ACOs or providers participating in the CEC Model. Whether DMG's subsidiary ACO or dialysis providers participating in CEC are considered to be Advanced APMs could potentially affect physicians' willingness to participate in such entities, which may indirectly impact the operations of DMG's subsidiary ACO or its providers participating in the CEC Model. In addition, under the final rule, DMG's subsidiary ACO may also be required to submit certain quality data to CMS on behalf of its Merit-Based Incentive Payment System MIPS-eligible clinicians, which could result in an increase in operational costs. Given that the payment updates for APMs have yet to take effect, we cannot determine the impact of such payment models on our business at this time.

In addition, in recent years, Congress has enacted various laws seeking to reduce the federal debt level and contain healthcare expenditures. For example, the BCA called for the establishment of a Joint Select Committee (the Committee) on Deficit Reduction, tasked with reducing the federal debt level. However, because the Committee did not draft a proposal by the BCA's deadline, President Obama issued an initial sequestration order that imposed automatic spending cuts on various federal programs. In particular, a 2% reduction to Medicare payments took effect on April 1, 2013, which was subsequently extended through 2027.

The instability of the federal budget may lead to legislation that could result in further cuts in Medicare and Medicaid payments to providers. In recent years, the government has enacted a patchwork of appropriations legislation to temporarily suspend the debt ceiling and continue government operations. Although the BBA passed in February 2018 enacts a two-year federal spending agreement and raises the federal spending cap on non-defense spending for fiscal years 2018 and 2019, the

Medicare program is frequently mentioned as a target for spending cuts. Spending cuts to the Medicare program could adversely affect our operating results.

Medicare Advantage. Medicare Advantage is a Medicare health plan program developed and administered by CMS as an alternative to the original FFS Medicare program. Under the Medicare Advantage program, Medicare beneficiaries may choose to receive benefits under a managed care health plan that provides benefits at least comparable to those offered under the original Medicare FFS payment system in exchange for which the health plan receives a monthly per patient premium payment from CMS. The Medicare Advantage monthly premium varies based on the county in which the member resides, and is adjusted to reflect the demographics and estimated risk profile of the members that enroll. Once a person is authorized by CMS to participate in Medicare Advantage, health plans compete for enrollment based on benefit design differences such as co-payments or deductibles, availability of preventive care, attractiveness of and access to a network of hospitals, physicians and ancillary providers and premium contribution or, most often in Medicare Advantage plans, the absence of any monthly premium. In certain parts of the country, many health plans that provide Medicare Advantage benefits subcontract with integrated medical networks such as DMG to transfer the responsibility for managing patient care.

In 2004, CMS adopted a risk adjustment payment system for Medicare Advantage health plans in which the participating health plans' premiums are adjusted based on the actual illness burden of the members that enroll. The model bases a portion of the total CMS reimbursement payments on various clinical and demographic factors, including hospital inpatient diagnoses, additional diagnosis data from ambulatory treatment settings, hospital outpatient department and physician visits, gender, age and Medicaid eligibility. CMS requires that all managed care companies capture, collect and submit the necessary diagnosis code information to CMS twice a year for reconciliation with CMS's internal database. Medical providers, such as DMG, provide this diagnosis code information to health plan customers for submission to CMS. Under this system, the risk-adjusted portion of the total CMS payment to the Medicare Advantage plans will equal the local rate set forth in the traditional demographic rate book, adjusted to reflect the plan members' gender, age and morbidity.

Most Medicare beneficiaries have the option to enroll in private health insurance plans that contract with Medicare under the Medicare Advantage program. According to the Kaiser Family Foundation, the share of Medicare beneficiaries in such plans has risen rapidly in recent years; it reached approximately 33% in 2017 from approximately 13% in 2004. Plan costs for the standard benefit package can be significantly lower or higher than the corresponding cost for beneficiaries in the traditional Medicare FFS payment program, but prior to the ACA, private plans were generally paid a higher average amount, and they used the additional payments to reduce enrollee cost-sharing requirements, provide extra benefits, and/or reduce Medicare premiums. These enhancements were valuable to enrollees, but also resulted in higher Medicare costs overall and higher premiums for all Medicare Part B beneficiaries and not just those enrolled in Medicare Advantage plans. The ACA requires that future payments to plans be based on benchmarks in a range of 95% to 115% of local FFS Medicare costs, with bonus amounts payable to plans meeting high quality-of-care standards. In addition, health plans offering Medicare Advantage are required to spend at least 85% of their premium dollars on medical care, the so-called medical loss ratio (MLR). Since DMG is not a health plan, except for DaVita Health Plan of California, Inc. (DHPC), it is not subject to the 85% MLR requirement. See "DaVita Medical Group Division (DMG)—Knox-Keene" below. However, payments that health plans make to DMG will apply in full towards the health plans' 85% MLR requirement. If a health plan does not meet the 85% MLR requirement, it must provide a rebate to its customers. Any such shortfalls would not impact amounts paid by health plans to DMG.

Medicaid. Medicaid is a federal entitlement program administered by the states that provides healthcare and long-term care services and support to low-income Americans. Medicaid is funded jointly by the states and the federal government. The federal government guarantees matching funds to states for qualifying Medicaid expenditures based on each state's federal medical assistance percentage, which is calculated annually and varies inversely with average personal income in the state. Subject to federal rules, each state establishes its own eligibility standards, benefit packages, payment rates and program administration within broad federal statutory and regulatory guidelines. Every state Medicaid program must balance a number of potentially competing demands, including the need for quality care, adequate provider access, and cost-effectiveness. In an effort to improve quality and provide more uniform and cost-effective care, many states have implemented Medicaid managed care programs to improve access to coordinated healthcare services, including preventative care, and to control healthcare costs. Under Medicaid managed care programs, a health plan receives capitation payments from the state. The health plan, in turn, arranges for the provision of healthcare services by contracting with a network of medical providers, such as DMG. DMG has entered into capitation agreements with health plans to manage approximately 94,800 Medicaid managed care members in its southern California market.

Commercial payors

According to the 2017 Annual Survey conducted by the Kaiser Family Foundation, approximately 151 million non-elderly people in the U.S. received their health insurance through their employers, which contracted with health plans to

administer these healthcare benefits. Patients enrolled in health plans offered through an employment setting are generally referred to as commercial members. According to the survey, the percentage of workers covered was 55% in 2017 and 2016. Under the ACA, many uninsured individuals and many individuals who receive their health insurance benefits through small employers may purchase their healthcare benefits through insurance exchanges in which health plans compete directly for individual or small group members' enrollment. DMG derives a significant amount of its enrollment from commercial members; however, these members represent a disproportionately small share of DMG's operating profits.

Whether in the Medicare Advantage, commercial or Medicaid market, managed care health plans seek to provide a coordinated and efficient approach to managing the healthcare needs of their enrolled populations. By negotiating with providers, such as pharmacies, hospitals and physicians, and implementing various quality programs, managed care companies attempt to enhance their profitability by limiting their medical costs. These health plans have shown success in mitigating certain components of medical cost, but we believe they are limited by their indirect relationship with physicians, who in the aggregate direct most of their patients' healthcare costs. We believe that physician-led and professionally-managed integrated medical networks such as DMG's have a greater opportunity to influence cost and improve quality due to the close coordination of care at the most effective point of contact with the patient—the primary care physician.

Capitation and FFS revenue

There are a number of different models under which an integrated medical network receives payment for managing and providing healthcare services to its members.

Fee-for-service structure. Under traditional FFS reimbursement, physicians are paid a specified amount for each service or procedure that they provide during a patient visit. Under this structure, physician compensation is based on the volume of patient visits and procedures performed, thus offering limited financial incentive to focus on cost containment and preventative care. FFS revenues are derived primarily from DMG's physician services.

Capitation structure. Under capitation, payors pay a fixed amount per enrolled member, thereby subcontracting a significant portion of the responsibility and risks for managing patient care to physicians. Global capitation represents a prospective budget from which the provider network then manages care-related expenses including payments to associated providers outside the group, such as hospitals and specialists. Compared to traditional FFS models, we believe that capitation arrangements better align provider incentives with both quality and efficiency of care. We believe that this approach improves the quality of the experience for patients and the potential profitability for efficient care providers.

Since premiums paid represent a significant amount per person, the revenue and, when costs are effectively managed, profit opportunity available to an integrated medical network under a capitated arrangement can be significant. This is particularly the case for senior members and members with multiple diseases. We believe that the advantages, savings and efficiencies made possible by the capitated model are most pronounced when the care demands of the population are the most severe and require the most coordination, such as for the senior population or patients with chronic, complex and follow-on diseases. While organized coordination of care is central to the capitated model, it is also well suited to the implementation of preventative care and disease management over the long-term since physicians have a financial incentive to improve the overall health of their patient population.

The inherent risk in assumption of global care risk relates to potential losses if a number of individual patients' medical costs exceed the expected amount. This risk is especially significant to individual practitioners or smaller physician groups who lack the scale required to spread the risk over a broad population. DMG has the scale, comprehensive medical delivery resources, significant infrastructure to support practicing physicians, and demonstrated care management knowledge to spread the risk of losses over a large patient population.

Global model. In Florida, DMG may contract directly with health plans under global capitation arrangements that include hospital services, because state law permits DMG to assume financial responsibility for both professional and institutional services. In New Mexico, DMG assumed financial responsibility for professional services only.

In Nevada, DMG enters into global capitation arrangements to assume financial responsibility for both professional and institutional services. However, the Nevada Division of Insurance (NDI) has not opined on whether it is appropriate for an entity like DMG to enter into global capitation arrangements and assume financial responsibility for the provision of both professional and institutional services to either Medicare Advantage enrollees or enrollees of commercial health plans. In order to avoid an adverse finding by the NDI with respect to DMG's global capitation arrangements in Nevada, DMG applied for an insurance license from the NDI and obtained the license in 2015. DMG is currently evaluating its ability to assign any of its existing contracts to the NDI license holder. Because of the current global capitation to DMG, and DMG's assumption of nearly the entire professional and institutional risk in Nevada and Florida, DMG's health plan customers function primarily to support DMG in undertaking marketing and sales efforts to enroll members and processing claims in these states.

In California, entities that maintain full or restricted licenses under the California Knox-Keene Health Care Service Plan Act of 1975 (Knox-Keene) are permitted to assume financial responsibility for both professional and institutional services. As described below, in December 2013, DMG obtained a restricted Knox-Keene license and therefore may enter into global capitation arrangements with health plans through which DMG will assume financial responsibility for both professional and institutional services.

Risk-sharing model. In California, DMG currently utilizes a capitation model in several different forms. While there are variations specific to each arrangement, HealthCare Partners Affiliates Medical Group and DaVita Medical Group Associates California, Inc. (collectively AMG), which are medical groups that have entered into management services agreements with DMG, have historically contracted with health plans to receive a PMPM or percentage of premium (POP) capitation payment for professional (physician) services and assumed the financial responsibility for professional services. In some cases, the health plans separately enter into capitation contracts with third parties (typically hospitals) who directly receive a capitation payment and assume contractual financial responsibility for institutional (hospital) services. In other cases, the health plan does not pay a capitation payment to the hospital, but rather administers and pays fee-for-service claims for hospital expenses. In both cases, AMG has been responsible under its health plan agreements for managing the care dollars associated with both the professional and institutional services provided for in the AMG capitation payment. In the case of institutional services and as a result of its managed care-related administrative services agreements with hospitals, AMG has recognized a percentage of the surplus of institutional revenues less institutional expense as AMG net revenues and has also been responsible for some percentage of any short-fall in the event that institutional expenses exceed institutional revenues. In connection with DMG's obtaining a restricted Knox-Keene license in California, substantially all of the California health plan contracts, along with the revenues received under such contracts, have been assigned from AMG to DHPC. In addition, DMG now has the legal authority to transition these health plan contracts to global capitation arrangements in which DMG is responsible for arranging professional and institutional services in exchange for a single capitation payment. DMG has evaluated its various risk sharing arrangements, and is working with the Department of Managed Health Care and several health plans to accept global capitation. DMG converted three separate contracts to global risk in 2016, and converted two additional contracts in 2017. In total, approximately 28% of DMG's membership is now covered under global risk plans. DMG is in the approval and implementation process to convert additional contracts to global risk in 2018. Completion of evaluation of possible additional conversions is expected to continue over time.

Government regulation

In addition to the laws and regulations to which our U.S. dialysis and related lab services business are subject to, the internal operations of DMG and its contractual relationships with healthcare providers such as hospitals, other healthcare facilities, and healthcare professionals are subject to extensive and increasing regulation by numerous federal, state, and local government entities. These laws and regulations often are interpreted broadly and enforced aggressively by multiple government agencies, including the OIG, the DOJ, and various state authorities. Many of these laws and regulations are the same as those that impact our U.S. dialysis and related lab services business. For example:

- DMG's financial relationships with healthcare providers including physicians and hospitals could subject DMG to criminal and civil sanctions and penalties under the federal Anti-Kickback Statute;
- The referral of Medicare patients by DMG-associated physicians for the provision of DHS may subject the parties to sanctions and penalties under the Stark Law;
- DMG's financial relationships and those of its associated physicians may subject the parties to penalties and sanctions under state fraud and abuse laws;
- DMG's submission of claims to governmental payors such as the Medicare and Medicaid programs for services provided by its associated physicians and clinical personnel may subject DMG to sanction and penalties under the FCA; and

- DMG's handling of PHI may subject DMG to sanctions and penalties under HIPAA and its implementing privacy and security regulations, as amended by the HITECH Act, and state medical privacy laws which can include penalties and restrictions that are more severe than those which arise under HIPAA.

A finding that claims for services were not covered or not payable, or the imposition of sanctions associated with a violation of any of these healthcare laws and regulations, could result in criminal and/or civil penalties and exclusion from participation in Medicare, Medicaid and other federal and state healthcare programs and could have a material adverse effect on DMG's business, financial condition and results of operations. We cannot guarantee that the arrangements or business practices of DMG will not be subject to government scrutiny or be found to violate certain healthcare laws. Government audits, investigations and prosecutions, even if we are ultimately found to be without fault, can be costly and disruptive to DMG's business. Moreover, changes in healthcare legislation or government regulation may restrict DMG's existing operations, limit their expansion or impose additional compliance requirements and costs, any of which could have a material adverse effect on DMG's business, financial condition and results of operations.

The following includes brief descriptions of some, but not all, of the laws and regulations that, in addition to those described in relation to our U.S. dialysis and related lab services business, affect DMG. DMG is also subject to the laws and regulations that apply to our U.S. dialysis and related lab services business. See "Kidney Care Division—Government regulation" above.

Licensing, certification, accreditation and related laws and guidelines. DMG clinical personnel are subject to numerous federal, state and local laws and regulations, relating to, among other things, licensing, professional credentialing and professional ethics. Since DMG clinical personnel perform services in medical office settings, hospitals and other types of healthcare facilities, DMG may indirectly be subject to laws applicable to those entities as well as ethical guidelines and operating standards of professional trade associations and private accreditation commissions, such as the American Medical Association and the Joint Commission. There are penalties for non-compliance with these laws, including discipline or loss of professional license, civil and/or criminal fines and penalties, loss of hospital admitting privileges, federal healthcare program disenrollment, loss of billing privileges, and exclusion from participation in various governmental and other third-party healthcare programs.

Professional licensing requirements. DMG's clinical personnel, including physicians, must satisfy and maintain their professional licensing in the states where they practice medicine. Activities that qualify as professional misconduct under state law may subject them to sanctions, including the loss of their licenses and could subject DMG to sanctions as well. Many state boards of medicine impose reciprocal discipline, that is, if a physician is disciplined for having committed professional misconduct in one state where he or she is licensed, another state where he or she is also licensed may impose the same discipline even though the conduct did not occur in that state. Therefore, if a DMG-associated physician is licensed in multiple states, sanctions or loss of licensure in one state may result in sanction or the loss of licensure in other states. Professional licensing sanctions may also result in exclusion from participation in governmental healthcare programs, such as Medicare and Medicaid, as well as other third-party programs.

Corporate practice of medicine and fee splitting. California, Colorado, Nevada, and Washington are states in which DMG operates that have laws that prohibit business entities, such as our Company and our subsidiaries, from practicing medicine, employing physicians to practice medicine or exercising control over medical decisions by physicians (known collectively as the corporate practice of medicine). These states also prohibit entities from engaging in certain financial arrangements, such as fee-splitting, with physicians. In some states these prohibitions are expressly stated in a statute or regulation, while in other states the prohibition is a matter of judicial or regulatory interpretation.

Violations of the corporate practice of medicine vary by state and may result in physicians being subject to disciplinary action, as well as to forfeiture of revenues from payors for services rendered. For lay entities, violations may also bring both civil and, in more extreme cases, criminal liability for engaging in medical practice without a license.

In California, a violation of the corporate practice of medicine prohibition constitutes the unlawful practice of medicine, which is a public offense punishable by fines and other criminal penalties. In addition, any person who conspires with or aids and abets another in the unlawful practice of medicine is similarly guilty of a public offense and may be subject to comparable fines and criminal penalties. In Nevada, engaging in the corporate practice of medicine where not provided by a specific statute may also constitute the unlawful practice of medicine. This violation is a felony punishable by fines and other civil and criminal penalties. Physicians in Nevada can similarly be punished for aiding or assisting in the unlicensed practice of medicine.

In Colorado, any physician found to have abetted or assisted or conspired to engage in unprofessional conduct with respect to the practice of medicine is subject to disciplinary action, including the loss of licensure. Corporate entities or lay persons who are found to have engaged in the unauthorized practice of medicine may be subject to injunctive action and other criminal penalties. In Washington, the Secretary of Health is responsible for investigating complaints concerning the unlicensed practice of medicine and violations may be subject to a cease and desist order, civil fines, injunctive action, and other criminal penalties.

In our markets where the corporate practice of medicine is prohibited, DMG has historically operated by maintaining long-term management contracts with multiple associated professional organizations which, in turn, employ or contract with physicians to provide those professional medical services required by the enrollees of the payors with which the professional organizations contract. Under these management agreements, DMG performs only non-medical administrative services, does not represent that it offers medical services, and does not exercise influence or control over the practice of medicine by the physicians or the associated physician groups with which it contracts. For example, in California, DMG has full-service management contracts with AMG. The AMG entities are owned by California-licensed physicians and professional medical corporations and contract with physicians to provide professional medical services. In Nevada and Washington, DMG's Nevada and Washington subsidiaries have similar management agreements with Nevada and Washington professional corporations, as applicable, that employ and contract with physicians to provide professional medical services. In Colorado, the physician groups contract through a provider network to include a pharmacy and ambulatory surgery center.

Some of the relevant laws, regulations, and agency interpretations in states with corporate practice of medicine restrictions have been subject to limited judicial and regulatory interpretation. Moreover, state laws are subject to change. Regulatory authorities and other parties, including DMG's associated physicians, may assert that, despite the management agreements and other arrangements through which DMG operates, we are engaged in the prohibited corporate practice of medicine or that DMG's arrangements constitute unlawful fee-splitting. If this were to occur, we could be subject to civil and/or criminal penalties, DMG's agreements could be found legally invalid and unenforceable (in whole or in part), or we could be required to restructure its contractual arrangements.

If we were required to restructure DMG's operating structures in our markets due to determination that a corporate practice of medicine violation existed, such a restructuring might include revisions of the California, Colorado, Nevada or Washington management services agreements, which might include a modification of the management fee, and/or establishing an alternative structure. For example, our subsidiaries in those states might have to obtain the equivalent of a California Knox-Keene license in such state in order to comply with the corporate practice of medicine rules while contracting directly with payors and, in turn, physicians, to provide physician services to the payors' enrollees. In California, DMG's restricted Knox-Keene license has created potential flexibility for DMG in the event regulatory authorities seek to enforce corporate practice of medicine or fee splitting laws based upon current management services relationships with AMG. DMG's restricted Knox-Keene license allows DHPC to contract with or employ physicians as a result of an exemption from California's corporate practice of medicine laws applicable to Knox-Keene licensees.

Knox-Keene. The California Department of Managed Health Care (DMHC) licenses and regulates Health Care Service Plans (HCSPs) pursuant to Knox-Keene, as amended. In addition to regulating Knox-Keene's various patient's rights protections for HCSP-enrolled individuals, the DMHC is responsible for ensuring the financial sustainability over time of licensed HCSPs and other regulated entities. As such, the DMHC is charged with continually monitoring the financial health of regulated entities. The DMHC's Division of Financial Oversight monitors and evaluates the financial viability of health plans to ensure continued access to health care services. Financial examination reviews include examinations of financial statements and financial arrangements, both by routine and non-routine examinations. The examination also ensures that there is adequate tangible net equity (TNE), as determined according to calculations included in Knox-Keene. The TNE regulations for organizations holding a Knox-Keene license, like DHPC, vary depending on circumstances, but generally require any licensee to have on hand in cash or cash equivalents a minimum of the greater of (i) $1 million, (ii) the sum of 2% of the first $150 million of annualized premium revenues plus 1% of annualized premium revenues in excess of $150 million, or (iii) the sum of 8% of the first $150 million of annualized healthcare expenditures (except those paid on a capitated basis or managed hospital payment basis) plus 4% of the annualized healthcare expenditures (except those paid on a capitated basis or managed hospital payment basis) which are in excess of $150 million; plus 4% of annualized hospital expenditures paid on a managed hospital payment basis. In its sole discretion, the DMHC may require, as a condition to obtaining or maintaining an HCSP license, that a licensee accept certain contractual undertakings such that the licensee is obligated to maintain TNE in amounts greater than the minimum amount described above. Additionally, a licensed HCSP is subject to additional DMHC reporting requirements and financial oversight if the HCSP fails to maintain at least 130% of its required minimum TNE. During the 2016 financial examination, DHPC was required to provide evidence of exclusive fidelity bond coverage in the amount of at least $2 million, with a deductible amount not in excess of $100,000 with a requirement to notify the Director of DMHC 30 days prior to cancellation.

The DMHC interprets Knox-Keene HCSP licensing requirements to apply to both full-service HCSPs and downstream restricted HCSP contracting entities, including provider groups that enter into global risk contracts with licensed HCSPs. A global risk contract is a healthcare services contract in which a downstream contracting entity agrees to provide both professional (physician) services and institutional (hospital) services subject to an at-risk or capitated reimbursement methodology. According to the DMHC, entities that accept global risk must obtain a restricted Knox-Keene license. Under a restricted Knox-Keene license, entities may enter into global risk contracts with other licensed HCSPs. Holders of restricted Knox-Keene licenses must comply with the same financial requirements as HCSPs with full licenses, including demonstrating specific levels of TNE, but are not required to meet Knox-Keene requirements for functions they are not delegated such as marketing. The consequences of operating without a license include civil penalties, criminal penalties and the issuance of cease and desist orders.

DHPC holds a restricted Knox-Keene license, which allows DHPC to contract directly with full service HCSPs to simplify DMG's historic contractual and financial structure and to facilitate expansion into new markets in California. However, this also subjects DMG and DHPC to additional regulatory obligations, including (i) regulatory oversight of operations, (ii) the need to seek approval for all material business changes, (iii) significant requirements to maintain certain TNE levels, and (iv) other operating limitations imposed by Knox-Keene and its regulations. Under its restricted Knox-Keene license, DHPC is prohibited from declaring or paying any dividends or making any distribution of cash or property to its parent, affiliates, or shareholders, if such a distribution would cause it to fail to maintain the minimum applicable TNE, have insufficient working capital or cash flow as required by DMHC regulation or otherwise be unable to provide or arrange healthcare services. In addition, DHPC is subject to DMHC oversight and must seek approval before incurring any debt or guaranteeing any debt relating to its parent, affiliates, or shareholders. DHPC must also submit proposed global capitation contracts to the DMHC for approval.

DMG services

Approximately 83% of DMG's operating revenues for the year ended December 31, 2017 were derived from multi-year capitation contracts with health plans. Under these contracts, DMG's health plan customers delegate full responsibility for member care to physicians and healthcare facilities that are part of DMG's provider network. In return, DMG receives a PMPM fee for each DMG member. As a result, DMG has financial and clinical accountability for a population of members. In California, DMG does not assume direct financial risk for institutional (hospital) services in some cases, but is responsible for managing the care dollars associated with both the professional (physician) and institutional services being provided for the PMPM fee attributable to both professional and institutional services. In those cases and as a result of its managed care-related administrative services agreements with hospitals, DMG recognizes the surplus of institutional revenues less institutional expense as DMG net revenues and is also responsible for any short-fall in the event that institutional expenses exceed institutional revenues.

DMG provides comprehensive and quality medical care through a network of participating physicians and other healthcare professionals. Through its group model, DMG employs, directly (where permitted by state law) and through its associated physician groups, over 750 primary care physicians. Through its IPA model, DMG contracts with a network of approximately 3,500 associated groups and other network primary care physicians who provide care for DMG's members in an independent office setting. These physicians are complemented by several thousand network specialists and approximately 180 network hospitals that provide specialty or institutional care to the patients of DMG's associated physicians, physician groups and IPAs.

In order to comply with local regulations prohibiting the corporate practice of medicine, many of DMG's group physicians are employed by associated medical groups with which DMG has entered into long-term management agreements. The largest of these DMG managed medical groups is AMG, which employs, directly or indirectly, over 750 primary care physicians, specialists and hospitalists. See "Government Regulation—Corporate practice of medicine and fee splitting" above.

DMG does not own hospitals, although hospitals are an essential part of its provider network. In most cases, DMG contracts or otherwise aligns with hospitals to manage the utilization, readmission and cost of hospital services. Most DMG patients receive specialty care through DMG's network based on referrals made by their primary care physician. These specialists may be reimbursed based on capitation, case rates or on a discounted FFS rate.

DMG group physicians typically see 18 to 22 patients per day, which we believe is an appropriate benchmark to ensure there is sufficient time to understand all of the patients' clinical needs. DMG care teams, including nurses, engage in outreach to patients in order to help monitor fragile and high risk patients, and help improve adherence to physicians' care plans. During these visits, DMG's physicians, nurses and educators use the time to educate patients and manage their healthcare needs. The goal of this preventative care delivery model is to keep patients healthy. Education improves self-management and compliance which allows the patient to recognize early signs of their disease and seek appropriate care. We believe this translates into

earlier intervention, which in turn leads to fewer emergency room visits, fewer hospital admissions and fewer hospital bed days (the most expensive location for healthcare). This clinical model seeks to provide early diagnosis of disease or deterioration in a chronic and complex condition and provide preventive care to maintain optimal health and avert unnecessary hospitalization. Clinic-based case managers and hospitalists coordinate with the primary care physicians to ensure that patients are receiving proper care whether they are in the clinic, in the hospital or are not regularly accessing healthcare. Physicians and case managers encourage patients to regularly visit the clinics in order to enhance their day-to-day health and diagnose any illness or deterioration in condition as early as possible.

DMG's information technology system, including DMG's electronic health record and data warehouse, is designed to support the DMG delivery model with data-driven opportunities to improve the quality and cost effectiveness of the care received by its members. Using informatics technology, DMG has created disease registries that track large numbers of patients with defined medical conditions. DMG applies the data from these registries to manage the care for patients with similar medical conditions which we believe leads to a better medical outcome. We believe this approach to using data is effective because the information is communicated by the patient's physician rather than the health plan or disease management companies.

DMG employs a wide variety of other information applications to service IPA and network providers using web connectivity. The HCP Connect! on-line portal provides web-based eligibility, referrals, electronic claims submission and explanation of benefits, and other communication vehicles for individual physician offices. The success of this suite of applications has enhanced DMG's ability to manage its IPA networks, and has resulted in significant back-office efficiencies for DMG and its associated physician groups. DMG has further expanded its ability to share key utilization and clinical data with its internal and contracted physicians and specialists through the Physician Information Portal and the Clinical Viewer. Through these secure web portals, a physician is able to obtain web-based, point of care information regarding a patient, including diagnosis history, provide quality indicators, historical risk-adjustment coding information, pharmacy medication history, and other key information. In addition to its web-portals geared towards physicians, DMG has recently introduced a patient on-line portal to enable DMG's patients to securely view their own clinical information, schedule physician appointments and interact electronically with their physicians. DMG believes these tools help lead to high quality clinical outcomes, create internal efficiencies, and enhance the satisfaction of its associated physicians and patients.

In addition, DMG uses its data to carefully track high utilizing patients through robust data warehousing and data mining technologies. DMG filters the data warehouse to identify and reach out to patients with high-utilization patterns who are inefficiently using resources, such as visiting an emergency room when either a same-day appointment or urgent care center would be more appropriate and satisfactory for the member. High utilizing patients are identified and tracked as part of DMG's electronic health record by their physician and DMG's care management staff. Specific care plans are attached to each of these patients and tracked carefully for full compliance. The objective is to proactively manage their care at times when these patients are either not compliant with the care plan or when changing circumstances require care managers to develop new and more suitable care plans. By using these resources, DMG has achieved improvements in quality of care, satisfaction and cost.

We believe DMG is well positioned to effectively leverage marketplace demands for greater provider accountability, measurable quality results and cost efficient medical care. We believe that DMG's business model is likely to continue to be an attractive alternative for health plans looking for high quality, cost effective delivery networks, physicians seeking an attractive practice environment and patients interested in a highly integrated approach to managing their medical care. Additionally, we believe that the scale of DMG's business allows it to spread capitation risk over a large population of members, invest in comprehensive analytic and healthcare information tools as well as clinical and quality measurement infrastructure, and recognize administrative and operating efficiencies. For these reasons, we believe that DMG offers patients, physicians and health plans a proven platform for addressing many of the most pressing challenges facing the U.S. healthcare system, including rising medical costs.

We also believe DMG has the ability to demonstrably improve medical outcomes and patient satisfaction while effectively managing costs through the following unique competitive strategies and internal progress and systems:

- DMG's clinical leadership and associated group and network physicians devote significant efforts to ensure that DMG's members receive the most appropriate care in the most appropriate manner.
- DMG is committed to maximizing its patients' satisfaction levels.
- DMG has the scale which, combined with its strong reputation and high quality patient care, makes it an attractive partner for health plans, compared to smaller provider groups that may have a higher risk of default and may not have the same resources to devote and develop the same level of patient care.

- DMG has over two decades of experience in managing complex disease cases for its population of patients. As a result, DMG has developed a rich dataset of patient care experiences and outcomes which permits DMG to proactively monitor and intervene in improving the care of its members.

- DMG's senior management team possesses substantial experience with the healthcare industry with average experience of approximately 19 years, as of December 31, 2017.

Locations of DMG clinics

As of December 31, 2017, DMG managed a total of 280 medical clinics, of which 68 clinics were located in California, 27 clinics were located in Colorado, 87 clinics were located in Florida, 60 clinics were located in Nevada, 14 clinics were located in New Mexico, and 24 clinics were located in Washington.

Competition

U.S. and International dialysis competition

The U.S. dialysis industry has consolidated significantly over time but still remains highly competitive, particularly in terms of acquiring existing outpatient dialysis centers. We continue to face a high degree of competition in the U.S. dialysis industry from large and medium-sized providers who compete directly with us for the acquisition of dialysis businesses, relationships with physicians to act as medical directors and skilled clinical personnel, as well as for individual patients. In addition, as we continue our international dialysis expansion into various international markets, we face competition from large and medium-sized providers for acquisition targets as well as physician relationships. Because of the ease of entry into the dialysis business and the ability of physicians to own dialysis centers and/or also be medical directors for their own centers, competition for growth in existing and expanding markets is not limited to large competitors with substantial financial resources. Acquisitions, developing new outpatient dialysis centers, patient retention and physician relationships are a critical component of our growth strategy and our business could be adversely affected if we are not able to continue to make dialysis acquisitions on reasonable and acceptable terms, continue to develop new outpatient dialysis centers, maintain or establish new relationships with physicians or if we experience significant patient attrition to our competitors. Competition for qualified physicians to act as medical directors and for inpatient dialysis services agreements with hospitals is also intense. Occasionally, we have also experienced competition from former medical directors or referring physicians who have opened their own outpatient dialysis centers. We also experience competitive pressures from other dialysis providers in connection with negotiating contracts with commercial healthcare payors and in recruiting and retaining qualified skilled clinical personnel.

Together with Fresenius Medical Care (FMC), we account for approximately 73% of outpatient dialysis patients in the U.S. with our Company serving approximately 37% of the total outpatient dialysis patients. Approximately 45% of the centers not owned by us or FMC are owned or controlled by hospitals or non-profit organizations. Hospital-based and non-profit dialysis units typically are more difficult to acquire than physician-owned dialysis centers.

FMC also manufactures a full line of dialysis supplies and equipment in addition to owning and operating outpatient dialysis centers worldwide. This may give FMC cost advantages over us because of its ability to manufacture its own products. Additionally, FMC has been one of our largest suppliers of dialysis products and equipment over the last several years. In 2018, we entered into and subsequently extended an agreement with FMC to purchase a certain amount of dialysis equipment, parts and supplies from FMC through December 31, 2020. The amount of purchases in future years from FMC will depend upon a number of factors, including the operating requirements of our centers, the number of centers we acquire, and growth of our existing centers.

DMG's competition

DMG's business is highly competitive. DMG competes with managed care organizations, hospitals, medical groups and individual physicians in its markets. DMG competes with other primary care physician groups or physicians who contract with health plans for membership. Health plans contract with care providers on the basis of costs, reputation, scope, efficiency and stability. Individual members select a primary care physician at the time of membership with the health plan. Location, name recognition, quality indicators and other factors go into that decision. For example, in California, DMG's competitors include Permanente Medical Group, which is the exclusive provider for Kaiser, and Heritage Provider Network. However, DMG's principal competitors for members and health plan contracts vary considerably in type and identity by region.

Corporate compliance program

Our businesses are subject to extensive federal, state and local government regulations. Management has designed and implemented a corporate compliance program as part of our commitment to comply fully with all criminal, civil or

administrative laws or regulations applicable to any Federal health care program for which penalties and exclusions may be authorized and anti-corruption laws to maintain the high standards of conduct we expect from all of our teammates. We continuously review this program and enhance it as necessary. The primary purposes of the program include:

- Assessing and identifying risks for existing and new businesses;
- Increasing, through training and education, the awareness of our teammates and affiliated professionals of the necessity of complying with all these laws;
- Developing and implementing compliance policies and procedures and creating controls to support compliance with these laws and such policies and procedures;
- Auditing and monitoring the activities of our operating units and business support functions on a regular basis to identify potential instances of noncompliance in a timely manner; and
- Ensuring that we take steps to resolve instances of noncompliance or to address areas of weakness or potential noncompliance as promptly as we become aware of them.

We have a code of conduct that each of our teammates and affiliated professionals must follow and we have a confidential toll-free hotline for teammates and patients to report potential instances of noncompliance. Our Chief Compliance Officer administers the compliance program. The Chief Compliance Officer reports directly to our Chief Executive Officer, our Chief Executive Officer of Kidney Care and Chair of the Compliance Committee of our Board of Directors (Board Compliance Committee). On October 22, 2014, DaVita signed a CIA with HHS and the OIG. The CIA:

- requires that we maintain certain elements of our compliance programs;
- imposes certain expanded compliance-related requirements during the term of the CIA, including increased training for teammates, physician partners and board members, implementing a series of procedures prior to entering into arrangements with referrals sources, execution of annual certifications by senior executives that evidence compliance with federal healthcare laws and regulations, internal compliance policies and the CIA, imposition of an executive recoupment program and quarterly and annual reports to the OIG;
- requires the formal allocation of certain oversight responsibility to the Board Compliance Committee and a resolution from that committee that it has made reasonable inquiry into the operations of the compliance program and the retention of an independent compliance advisor in year three of the CIA;
- contains certain business restrictions related to a subset of our joint venture arrangements, including our agreeing to not enter into certain types of partial divestiture joint venture transactions with nephrologists during the term of the CIA, among other restrictions; and
- requires that we engage an Independent Monitor who will provide additional oversight and reporting to the OIG for the term of the CIA.

The costs associated with compliance with the CIA could be substantial and may be greater than we currently anticipate. In addition, in the event of a breach of the CIA, we may become liable for payment of certain stipulated penalties, and/or be excluded from participation on federal healthcare programs. In April 2015, the OIG notified us that it considered us to be in breach of the CIA because of three implementation deficiencies. We have remediated the deficiencies and have paid certain stipulated penalties. If we fail to comply with our CIA, we could be subject to substantial penalties and exclusion from participation in federal healthcare programs that could have a material adverse effect on our business, results of operations and financial condition.

Insurance

We are predominantly self-insured with respect to professional and general liability and workers' compensation risks through wholly-owned captive insurance companies. The Company is also predominantly self-insured with respect to employee medical and other health benefits. We also maintain insurance, excess coverage, or reinsurance for property and general liability, professional liability, directors' and officers' liability, workers' compensation and other coverage in amounts and on terms deemed adequate by management, based on our actual claims experience and expectations for future claims. Future claims could, however, exceed our applicable insurance coverage. Physicians practicing at our dialysis centers are required to maintain their own malpractice insurance, and our medical directors are required to maintain coverage for their individual private medical practices. Our liability policies cover our medical directors for the performance of their duties as

medical directors at our outpatient dialysis centers. DMG also maintains general and professional liability insurance through various independent and related parties. DMG has purchased its primary general and professional liability insurance from California Medical Group Insurance (CMGI) in which DMG owns a 67% equity interest.

Teammates

As of December 31, 2017, we employed approximately 74,500 teammates, including our international teammates:

• Licensed professional staff (physicians, nurses and other healthcare professionals)	25,800
• Other patient care and center support staff and laboratory personnel	28,100
• Corporate, billing and regional administrative staff	8,200
• DMG	12,400

Our businesses require skilled healthcare professionals with specialized training for treating patients with complex care needs. Recruitment and retention of nurses are continuing concerns for healthcare providers due to short supply. We have an active program of investing in our professional healthcare teammates to help ensure we meet our recruitment and retention targets, including expanded training opportunities, tuition reimbursements and other incentives.

Item 1A. Risk Factors

This Annual Report on Form 10-K contains statements that are forward-looking statements within the meaning of the federal securities laws. These statements involve known and unknown risks and uncertainties including those discussed below. The risks and uncertainties discussed below are not the only ones facing our business. In addition, please read the cautionary notice regarding forward-looking statements in Item 7 of this Part 1 under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Risk factors related to our overall business:

If we fail to adhere to all of the complex government laws and regulations that apply to our business, we could suffer severe consequences that could have a material adverse effect on our business, results of operations, financial condition and stock price.

Our operations are subject to extensive federal, state and local government laws and regulations, such as Medicare and Medicaid payment rules and regulations, federal and state anti-kickback laws, the Stark Law and analogous state self-referral prohibition statutes, the 21st Century Cures Act, Federal Acquisition Regulations, the False Claims Act (FCA), the Civil Monetary Penalty statute, the Foreign Corrupt Practices Act (FCPA) and federal and state laws regarding the collection, use and disclosure of patient health information (e.g., Health Insurance Portability and Accountability Act of 1996 (HIPAA)) and the storage, handling, shipment, disposal and/or dispensing of pharmaceuticals and blood products and other biological materials. The Medicare and Medicaid reimbursement rules impose complex and extensive requirements upon healthcare providers as well. Moreover, additional laws and regulations potentially affecting providers continue to be promulgated that may impact us. A violation or departure from any of these legal requirements may result in government audits, lower reimbursements, significant fines and penalties, the potential loss of certification, recoupment efforts or voluntary repayments, among other things.

We endeavor to comply with all legal requirements; however, there is no guarantee that we will be able to adhere to all of the complex government regulations that apply to our business. We further endeavor to structure all of our relationships with physicians and providers to comply with state and federal anti-kickback and physician self-referral laws. We utilize considerable resources to monitor laws and regulations and implement necessary changes. However, the laws and regulations in these areas are complex, changing and often subject to varying interpretations. For example, if an enforcement agency were to challenge the level of compensation that we pay our medical directors or the number of medical directors whom we engage, we could be required to change our practices, face criminal or civil penalties, pay substantial fines or otherwise experience a material adverse effect on our business, results of operations and financial condition as a result of a challenge to these arrangements.

In addition, failure to report and return overpayments within 60 days of when the overpayment is identified can lead to a violation of the FCA and associated penalties, as described in further detail below, and exclusion and penalties under the federal Civil Monetary Penalty statute, including civil monetary penalties of up to $20,000 (adjusted for inflation) for each item or service for which a person received an identified overpayment and failed to report and return such overpayment. These obligations to report and return overpayments could subject our procedures for identifying and processing overpayments to greater scrutiny. We have made investments in resources to decrease the time it takes to identify, quantify and process overpayments, and we may be required to make additional investments in the future. From time to time we may conduct internal compliance reviews, the results of which may involve the identification of overpayments or other liabilities. An acceleration in our ability to identify and process overpayments could result in us refunding overpayments to government and other payors more rapidly than we have in the past which could have a material adverse effect on our operating cash flows. Overpayments subject us to refunds and related damages and potential liabilities.

Additionally, the federal government has used the FCA to prosecute a wide variety of alleged false claims and fraud allegedly perpetrated against Medicare and state health care programs. Moreover, amendments to the federal Anti-Kickback Statute in the 2010 Affordable Care Act (ACA) make claims tainted by anti-kickback violations potentially subject to liability under the FCA, including *qui tam* or whistleblower suits. The penalties for a violation of the FCA range from $5,500 to $11,000 (adjusted for inflation) for each false claim plus three times the amount of damages caused by each such claim which generally means the amount received directly or indirectly from the government. On February 3, 2017, the Department of Justice (DOJ) issued a final rule announcing adjustments to FCA penalties, under which the per claim penalty range increases to a range from $10,957 to $21,916 for penalties assessed after February 3, 2017, so long as the underlying conduct occurred after November 2, 2015. Given the high volume of claims processed by our various operating units, the potential is high for substantial penalties in connection with any alleged FCA violations.

In addition to the provisions of the FCA, which provide for civil enforcement, the federal government can use several criminal statutes to prosecute persons who are alleged to have submitted false or fraudulent claims for payment to the federal government.

Certain civil investigative demands received by us or our subsidiaries specifically reference that they are in connection with FCA investigations alleging, among other things, that we or our subsidiaries presented or caused to be presented false claims for payment to the government. See "Item 3. Legal Proceedings" in Part I of this report and Note 16 to the consolidated financial statements included in this report for further details.

We are subject to a Corporate Integrity Agreement (CIA) which, for our domestic dialysis business, requires us to report probable violations of criminal, civil or administrative laws applicable to any federal health care program for which penalties or exclusions may be authorized under applicable healthcare laws and regulations. See "If we fail to comply with our Corporate Integrity Agreement, we could be subject to substantial penalties and exclusion from participation in federal healthcare programs that could have a material adverse effect on our business, results of operations and financial condition."

If any of our operations are found to violate these or other government laws or regulations, we could suffer severe consequences that would have a material adverse effect on our business, results of operations, financial condition and stock price, including:

- Suspension or termination of our participation in government payment programs;
- Refunds of amounts received in violation of law or applicable payment program requirements;
- Loss of required government certifications or exclusion from government payment programs;
- Loss of licenses required to operate healthcare facilities or administer pharmaceuticals in some of the states in which we operate;
- Reductions in payment rates or coverage for dialysis and ancillary services and related pharmaceuticals;
- Criminal or civil liability, fines, damages or monetary penalties for violations of healthcare fraud and abuse laws, including the federal Anti-Kickback Statute, Stark Law violations, FCA or other failures to meet regulatory requirements;
- Enforcement actions by governmental agencies and/or state claims for monetary damages by patients who believe their protected health information (PHI) has been used, disclosed or not properly safeguarded in violation of federal or state patient privacy laws, including HIPAA and the Privacy Act of 1974;
- Mandated changes to our practices or procedures that significantly increase operating expenses;
- Imposition of and compliance with corporate integrity agreements that could subject us to ongoing audits and reporting requirements as well as increased scrutiny of our billing and business practices which could lead to potential fines;
- Termination of relationships with medical directors; and
- Harm to our reputation which could impact our business relationships, affect our ability to obtain financing and decrease access to new business opportunities, among other things.

We are, and may in the future be, a party to various lawsuits, demands, claims, *qui tam* suits, governmental investigations and audits (including investigations resulting from our obligation to self-report suspected violations of law) and other legal proceedings, any of which could result in, among other things, substantial financial penalties or awards against us, substantial payments made by us, required changes to our business practices, exclusion from future participation in the Medicare, Medicaid and other federal healthcare programs and possible criminal penalties, any of which could have a material adverse effect on our business, results of operations and financial condition and materially harm our reputation.

We are the subject of a number of investigations and audits by the federal government, as further described in Note 16 to the consolidated financial statements included in this report. We may be subject to other investigations and audits by state or federal government agencies and/or private civil *qui tam* complaints filed by relators and other lawsuits, demands, claims and legal proceedings.

Responding to subpoenas, investigations and other lawsuits, claims and legal proceedings as well as defending ourselves in such matters will continue to require management's attention and cause us to incur significant legal expense. Negative findings or terms and conditions that we might agree to accept as part of a negotiated resolution of pending or future government inquiries or relator proceedings could result in, among other things, substantial financial penalties or awards against us, substantial payments made by us, harm to our reputation, required changes to our business practices, exclusion from future participation in the Medicare, Medicaid and other federal healthcare programs and, in certain cases, criminal penalties, any of which could have a material adverse effect on us. It is possible that criminal proceedings may be initiated against us and/or individuals in our business in connection with investigations by the federal government. Other than as described in "Item 3. Legal Proceedings" in Part I of this report and Note 16 to the consolidated financial statements included in this report, we cannot predict the ultimate outcomes of the various legal proceedings and regulatory matters to which we are or may be subject from time to time, including those described in the aforementioned sections of this report, or the timing of their resolution or the ultimate losses or impact of developments in those matters, which could have a material adverse effect on our business results of operations and financial condition. See "Item 3. Legal Proceedings" in Part I of this report and Note 16 to the consolidated financial statements included in this report for further details regarding these and other matters.

Disruptions in federal government operations and funding create uncertainty in our industry and could have a material adverse effect on our business, results of operations and financial condition.

A substantial portion of our revenues is dependent on federal healthcare program reimbursement, and any disruptions in federal government operations could have a material adverse effect on our business, results of operations and financial condition. If the U.S. government defaults on its debt, there could be broad macroeconomic effects that could raise our cost of borrowing funds, and delay or prevent our future growth and expansion. Any future federal government shutdown, U.S. government default on its debt and/or failure of the U.S. government to enact annual appropriations could have a material adverse effect on our business, results of operations and financial condition. Additionally, disruptions in federal government operations may negatively impact regulatory approvals and guidance that are important to our operations, and create uncertainty about the pace of upcoming healthcare regulatory developments.

Healthcare reform could have a material adverse effect on our business, financial condition and results of operations.

We cannot predict how employers, private payors or persons buying insurance might react to the changes brought on by federal and state healthcare reform legislation, including the ACA and any subsequent legislation, or what form many of these regulations will take before implementation.

The ACA introduced healthcare insurance exchanges, which provide a marketplace for eligible individuals and small employers to purchase healthcare insurance. The business and regulatory environment continues to evolve as the exchanges mature, and statutes and regulations are challenged, changed and enforced. If commercial payor participation in the exchanges continues to decrease, it could have a material adverse effect on our business, results of operations and financial condition. Although we cannot predict the short- or long-term effects of these factors, we believe the healthcare insurance exchanges could result in a reduction in ESRD patients covered by traditional commercial insurance policies and an increase in the number of patients covered through the exchanges under more restrictive commercial plans with lower reimbursement rates or higher deductibles and co-payments that patients may not be able to pay. To the extent that the ongoing implementation of such exchanges or changes in statutes or regulations, or enforcement of statutes or regulations regarding the exchanges results in a reduction in reimbursement rates for our services from commercial and/or government payors, it could have a material adverse effect on our business, results of operations and financial condition.

The ACA also added several new tax provisions that, among other things, impose various fees and excise taxes, and limit compensation deductions for health insurance providers and their affiliates. These rules could negatively impact our cash flow and tax liabilities. In addition, the ACA broadened the potential for penalties under the FCA for the knowing and improper retention of overpayments collected from government payors and reduced the timeline to file Medicare claims. As a result, we made significant investments in new resources to accelerate the time it takes us to identify, quantify and process overpayments and we deployed significant resources to reduce our timeline and improve our claims processing methods to ensure that our Medicare claims are filed in a timely fashion. However, we may be required to make additional investments in the future. Failure to timely identify and return overpayments may result in significant penalties, which could have a material adverse effect on our business, results of operations and financial condition. Failure to file a claim within the one year window could result in payment denials, adversely affecting our business, results of operations and financial condition.

With the ACA, new models of care emerge and evolve and other initiatives in the government or private sector may arise, which could adversely impact our business. For example, the CMS Innovation Center (Innovation Center) is currently working with various healthcare providers to develop, refine and implement Accountable Care Organizations (ACOs) and other innovative models of care for Medicare and Medicaid beneficiaries, including Bundled Payments for Care Improvement

Initiative, CEC Model (which includes the development of ESRD Seamless Care Organizations), the Duals Demonstration, and other models. We are currently participating in the CEC Model with the Innovation Center, including with organizations in Arizona, Florida, and adjacent markets in New Jersey and Pennsylvania. Our U.S. dialysis business may choose to participate in additional models either as a partner with other providers or independently. Even in areas where we are not directly participating in these or other Innovation Center models, some of our patients may be assigned to an ACO, another ESRD Care Model, or another program, in which case the quality and cost of care that we furnish will be included in an ACO's, another ESRD Care Model's, or other program's calculations. Additionally, CMS instituted new screening procedures, as required by the ACA, which we expect will delay the Medicare contractor approval process, potentially causing a delay in reimbursement. We anticipate the new screening and enrollment requirements will require additional personnel and financial resources and will potentially delay the enrollment and revalidation of our centers which in turn will delay payment. These delays could adversely affect our business, results of operations and financial condition. The BBA revised the manner in which beneficiaries are assigned to an ACO, specifically giving ACOs the choice to have beneficiaries assigned prospectively at the beginning of a performance year and giving beneficiaries the option to voluntarily align to the ACO in which the beneficiary's main primary care provider participates. While prospective assignment may allow ACOs to identify beneficiaries for whom they will be held accountable and proactively take steps to ensure appropriate care, the ultimate impact of such changes on our business, results of operations and financial condition is not yet known.

Other ACA reform measures allow CMS to place a moratorium on new enrollment of providers and to suspend payment to providers upon a credible allegation of fraud from any source. These types of reform measures, as well as other measures, could adversely affect our business, results of operations, and financial condition, depending on the scope and breadth of the implementing regulations.

There is also a considerable amount of uncertainty as to the prospective implementation of the ACA and what similar measures or other changes might be enacted at the federal and/or state level. There have been multiple attempts through legislative action and legal challenges to repeal or amend the ACA. In addition, the 2016 Presidential and Congressional elections and subsequent developments in 2017 have caused the future state of the exchanges and other ACA reforms to be unclear. For example, in October 2017, the federal government announced that cost-sharing reduction payments to insurers would end, effective immediately, unless Congress appropriated the funds, and, in December 2017, Congress passed the Tax Cuts and Jobs Act, which includes a provision that eliminates the penalty under the ACA's individual mandate and could impact the future state of the exchanges. Further, in February 2018, Congress passed the BBA which, among other things, repealed the Independent Payment Advisory Board that was established by the ACA and intended to reduce the rate of growth in Medicare spending. While certain provisions of the BBA may increase the scope of benefits available for certain chronically ill Federal health care program beneficiaries beginning in 2020, the ultimate impact of such changes cannot be predicted. While there may be significant changes to the healthcare environment in the future, the specific changes and their timing are not yet apparent. As a result, there is considerable uncertainty surrounding the ACA including the exchanges, and, indeed, many core aspects of the current health care marketplace. Previously enacted reforms and future changes could have a material adverse effect on our business, financial condition and results of operations, including, for example, by limiting the scope of coverage or the number of patients who are able to obtain coverage through the exchanges and other health insurance programs, lowering or eliminating the cost-sharing reduction subsidies under the ACA, lowering our reimbursement rates, and/or increasing our expenses.

In addition, in December 2016, CMS published an interim final rule that questioned the use of charitable premium assistance for ESRD patients and would have established new conditions for coverage standards for dialysis facilities. In January 2017, a federal district court in Texas issued a preliminary injunction on CMS' interim final rule and in June 2017, at the request of CMS, the court stayed the proceedings while CMS pursues new rulemaking options. In November 2017, when CMS published the 2018 final rule that updates payment policies and rates under the ESRD PPS, and the 2019 proposed Notice of Benefit and Payment Parameters, it did not pursue further discussion or rule making related to charitable premium assistance or propose changes to historical charitable premium assistance guidelines. This does not preclude CMS or another regulatory agency or legislative authority from issuing a new rule or guidance that challenges charitable premium assistance. Additionally, any other law, rule, or guidance issued by CMS or other regulatory or legislative authorities restricting or prohibiting the ability of patients with access to alternative coverage from selecting a marketplace plan on or off exchange, and/or otherwise restricting or prohibiting the use of charitable premium assistance, could adversely impact dialysis centers across the U.S. making certain centers economically unviable, restrict the ability of dialysis patients to obtain and maintain optimal insurance coverage, and have a material adverse effect on our business, results of operations, and financial condition.

Privacy and information security laws are complex, and if we fail to comply with applicable laws, regulations and standards, including with respect to third-party service providers that utilize sensitive personal information on our behalf, or if we fail to properly maintain the integrity of our data, protect our proprietary rights to our systems or defend against cybersecurity attacks, we may be subject to government or private actions due to privacy and security breaches, any of which could have a material adverse effect on our business, financial condition and results of operations or harm our reputation.

We must comply with numerous federal and state laws and regulations in both the U.S. and the foreign jurisdictions in which we operate governing the collection, dissemination, access, use, security and privacy of PHI, including HIPAA and its implementing privacy, security, and related regulations, as amended by the federal Health Information Technology for Economic and Clinical Health Act (HITECH) and collectively referred to as HIPAA. We are also required to report known breaches of PHI consistent with applicable breach reporting requirements set forth in applicable laws and regulations. From time to time, we may be subject to both federal and state inquiries or audits related to HIPAA, HITECH and related state laws associated with complaints, desk audits, and self-reported breaches. If we fail to comply with applicable privacy and security laws, regulations and standards, including with respect to third-party service providers that utilize sensitive personal information, including PHI, on our behalf, properly maintain the integrity of our data, protect our proprietary rights, or defend against cybersecurity attacks, it could harm our reputation or have a material adverse effect on our business, results of operations and financial condition.

Information security risks have significantly increased in recent years in part because of the proliferation of new technologies, the use of the Internet and telecommunications technologies to conduct our operations, and the increased sophistication and activities of organized crime, hackers, terrorists and other external parties, including foreign state agents. Our business and operations rely on the secure processing, transmission and storage of confidential, proprietary and other information in our computer systems and networks, including sensitive personal information, including PHI, social security numbers, and credit card information of our patients, teammates, physicians, business partners and others.

We are continuously implementing multiple layers of security measures through technology, processes, and our people. We utilize security technologies to protect and maintain the integrity of our information systems and data and our defenses are monitored and routinely tested internally and by external parties. Despite these efforts, our facilities and systems and those of our third-party service providers may be vulnerable to privacy and security incidents; security attacks and breaches; acts of vandalism or theft; computer viruses and other malicious code; coordinated attacks by activist entities; emerging cybersecurity risks; misplaced or lost data; programming and/or human errors; or other similar events that could impact the security, reliability, and availability of our systems. Internal or external parties may attempt to circumvent our security systems, and we have in the past, and expect that we will in the future, experience external attacks on our network including reconnaissance probes, denial of service attempts, malicious software attacks including attacks intended to render our internal operating systems unavailable, and phishing attacks. Cybersecurity requires ongoing investment and diligence against evolving threats. Emerging and advanced security threats, including coordinated attacks, require additional layers of security which may disrupt or impact efficiency of operations. As with any security program, there always exists the risk that employees will violate our policies despite our compliance efforts or that certain attacks may be beyond the ability of our security and other systems to detect. There can be no assurance that investments and diligence will be sufficient to prevent or timely discover an attack.

Any security breach involving the misappropriation, loss or other unauthorized disclosure or use of confidential information, including PHI, financial data, competitively sensitive information, or other proprietary data, whether by us or a third party, could have a material adverse effect on our business, financial condition, and results of operations and materially harm our reputation. We may be required to expend significant additional resources to modify our protective measures, to investigate and remediate vulnerabilities or other exposures, or to make required notifications. The occurrence of any of these events could, among other things, result in interruptions, delays, the loss or corruption of data, cessations in the availability of systems and liability under privacy and security laws, all of which could have a material adverse effect on our business, financial condition or results of operations, materially harm our reputation and trigger regulatory actions and private party litigation. If we are unable to protect the physical and electronic security and privacy of our databases and transactions, we could be subject to potential liability and regulatory action, our reputation and relationships with our patients and vendors would be harmed, and our business, results of operations and financial condition could be materially and adversely affected. Failure to adequately protect and maintain the integrity of our information systems (including our networks) and data, or to defend against cybersecurity attacks, could subject us to monetary fines, civil suits, civil penalties or criminal sanctions and requirements to disclose the breach publicly, and could further result in a material adverse effect on our business, results of operations and financial condition or harm our reputation. As malicious cyber activity escalates, including activity that originates outside of the United States, the risks we face relating to transmission of data and our use of service providers outside of our network, as well as the storing or processing of data within our network, intensify. There have been increased federal and state HIPAA and other privacy and security enforcement efforts and we expect this trend to continue. While we

maintain cyber liability insurance, this insurance may not cover us for all types of losses and may not be sufficient to protect us against the amount of all losses.

We may engage in acquisitions, mergers, joint ventures or dispositions, which may affect our results of operations, debt-to-capital ratio, capital expenditures or other aspects of our business, and if businesses we acquire have liabilities we are not aware of, we could suffer severe consequences that would have a material adverse effect on our business, results of operations and financial condition.

Our business strategy includes growth through acquisitions of dialysis centers and other businesses, as well as entry into joint ventures. We may engage in acquisitions, mergers, joint ventures or dispositions or expand into new business models, which may affect our results of operations, debt-to-capital ratio, capital expenditures or other aspects of our business. There can be no assurance that we will be able to identify suitable acquisition targets or merger partners or buyers for dispositions or that, if identified, we will be able to agree to terms with merger partners, acquire these targets or make these dispositions on acceptable terms or on the desired timetable. There can also be no assurance that we will be successful in completing any acquisitions, mergers or dispositions that we announce, executing new business models or integrating any acquired business into our overall operations. There is no guarantee that we will be able to operate acquired businesses successfully as stand-alone businesses, or that any such acquired business will operate profitably or will not otherwise have a material adverse effect on our business, results of operations and financial condition. Further, we cannot be certain that key talented individuals at the business being acquired will continue to work for us after the acquisition or that they will be able to continue to successfully manage or have adequate resources to successfully operate any acquired business. In addition, certain of our newly and previously acquired dialysis centers and facilities have been in service for many years, which may result in a higher level of maintenance costs. Further, our facilities, equipment and information technology may need to be improved or renovated to maintain or increase operational efficiency, compete for patients and medical directors, or meet changing regulatory requirements. Increases in maintenance costs and capital expenditures could have a material adverse effect on our financial condition, results of operations and cash flows.

Businesses we acquire may have unknown or contingent liabilities or liabilities that are in excess of the amounts that we originally estimated, and may have other issues, including those related to internal controls over financial reporting or issues that could affect our ability to comply with healthcare laws and regulations and other laws applicable to our expanded business. As a result, we cannot make any assurances that the acquisitions we consummate will be successful. Although we generally seek indemnification from the sellers of businesses we acquire for matters that are not properly disclosed to us, we are not always successful. In addition, even in cases where we are able to obtain indemnification, we may discover liabilities greater than the contractual limits, the amounts held in escrow for our benefit (if any), or the financial resources of the indemnifying party. In the event that we are responsible for liabilities substantially in excess of any amounts recovered through rights to indemnification or alternative remedies that might be available to us, or any applicable insurance, we could suffer severe consequences that could have a material adverse effect on our business, results of operations and financial condition.

Additionally, joint ventures, including our Asia Pacific Joint Venture (APAC JV), and minority investments inherently involve a lesser degree of control over business operations, thereby potentially increasing the financial, legal, operational and/or compliance risks associated with the joint venture or minority investment. In addition, we may be dependent on joint venture partners, controlling shareholders or management who may have business interests, strategies or goals that are inconsistent with ours. Business decisions or other actions or omissions of the joint venture partner, controlling shareholders or management may adversely affect the value of our investment, result in litigation or regulatory action against us, result in reputational harm to us or adversely affect the value of our investment or partnership.

If we are not able to continue to make acquisitions at the desired pace or at all, or maintain an acceptable level of non-acquired growth, or if we face significant patient attrition to our competitors or we are not able to retain or contract with an adequate number of medical directors or associated physicians, it could adversely affect our business, results of operations and financial condition.

Acquisitions, patient retention and medical director and physician retention are an important part of our growth strategy. We face intense competition from other companies for acquisition targets. In our U.S. dialysis business, we continue to face increased competition from large and medium-sized providers, which compete directly with us for the limited acquisition targets as well as for individual patients and medical directors. In addition, we compete for individual patients and medical directors based in part on the quality of our facilities. Moreover, as we continue our international expansion into various international markets, we will face competition from large and medium-sized providers for these acquisition targets as well. As we and our competitors continue to grow and open new dialysis centers, each center is required by applicable regulations to have a medical director, and we may not be able to retain an adequate number of nephrologists to serve as medical directors. Because of the ease of entry into the dialysis business and the ability of physicians to be medical directors for their own centers, competition for growth in existing and expanding markets is not limited to large competitors with substantial financial

resources. Individual nephrologists have opened their own dialysis units or facilities. In addition, Fresenius USA, our largest competitor, manufactures a full line of dialysis supplies and equipment in addition to owning and operating dialysis centers. This may give it cost advantages over us because of its ability to manufacture its own products. If we are not able to continue to make acquisitions at the desired pace or at all, continue to maintain acceptable levels of non-acquired growth, or if we face significant patient attrition to our competitors or if a physician chooses not to refer to DaVita, it could adversely affect our business, results of operations and financial condition.

If certain of our suppliers do not meet our needs, if there are material price increases, if we are not reimbursed or adequately reimbursed for drugs we purchase or if we are unable to effectively access new technology or superior products, it could negatively impact our ability to effectively provide the services we offer and could have a material adverse effect on our business, results of operations and financial condition.

We have significant suppliers that may be the sole or primary source of products critical to the services we provide, or to which we have committed obligations to make purchases, sometimes at particular prices. If any of these suppliers do not meet our needs for the products they supply, including in the event of a product recall, shortage or dispute, and we are not able to find adequate alternative sources, if we experience material price increases from these suppliers that we are unable to mitigate, or if some of the drugs that we purchase are not reimbursed or not adequately reimbursed by commercial or government payors, it could have a material adverse impact on our business, results of operations and financial condition. In addition, the technology related to the products critical to the services we provide is subject to new developments which may result in superior products. If we are not able to access superior products on a cost-effective basis or if suppliers are not able to fulfill our requirements for such products, we could face patient attrition which could have a material adverse effect on our business, results of operations and financial condition.

DMG operates in a different line of business from our historical business, and we face challenges managing DMG and may not realize anticipated benefits.

DMG operates in a different line of business from our historical business. We may not have the expertise, experience and resources to pursue all of our businesses at once, and we may be unable to successfully operate all businesses in the combined company. The administration of DMG requires implementation of appropriate operations, management, forecasting, and financial reporting systems and controls. We have experienced difficulties in effectively implementing these and other systems. The management of DMG requires and will continue to require the focused attention of our management team, including a significant commitment of its time and resources. The need for management to focus on these matters could have a material adverse effect on our business, results of operations and financial condition. If the DMG operations continue to be less profitable than we currently anticipate or we do not have the experience, the appropriate expertise or the resources to pursue all businesses in the combined company, our results of operations and financial condition may be materially and adversely affected. In that regard, we have taken goodwill impairment charges of $1.093 billion in total and may continue incurring additional impairment charges.

Laws regulating the corporate practice of medicine could restrict the manner in which DMG and other subsidiaries of ours are permitted to conduct their respective business, and the failure to comply with such laws could subject these entities to penalties or require a restructuring of these businesses.

Some states have laws that prohibit business entities, such as DMG and other subsidiaries of ours, including but not limited to, Nephrology Practice Solutions, Paladina Health, DaVita Health Solutions, VillageHealth, and Lifeline, from practicing medicine, employing physicians to practice medicine, exercising control over medical decisions by physicians (also known collectively as the corporate practice of medicine) or engaging in certain arrangements, such as fee-splitting, with physicians. In some states these prohibitions are expressly stated in a statute or regulation, while in other states the prohibition is a matter of judicial or regulatory interpretation. Of the states in which DMG currently operates, California, Colorado, Nevada and Washington generally prohibit the corporate practice of medicine, and other states may as well.

DMG and other DaVita entities operate by maintaining long-term contracts with their associated physician groups which are each owned and operated by physicians and which employ or contract with additional physicians to provide physician services. Under these arrangements, DMG and such other DaVita entities provide management services and receive a management fee for providing non-medical management services; however, DMG and such other DaVita entities do not represent that they offer medical services, and do not exercise influence or control over the practice of medicine by the physicians or the associated physician groups.

In addition to the above management arrangements, DMG has certain contractual rights relating to the orderly transfer of equity interests in certain of its physician groups through succession agreements and other arrangements with their physician equity holders. However, such equity interests cannot be transferred to or held by DMG or by any non-professional

organization. Accordingly, neither DMG nor DMG's subsidiaries directly own any equity interests in any physician groups in California, Colorado, Nevada and Washington. The other DaVita entities operating in these and multiple other states have similar agreements and arrangements. In the event that any of these associated physician groups fail to comply with the management arrangement or any management arrangement is terminated and/or DMG or any of the other DaVita entities is unable to enforce its contractual rights over the orderly transfer of equity interests in its associated physician groups, such events could have a material adverse effect on the business, results of operations and financial condition of DMG and such other DaVita entities.

It is possible that a state regulatory agency or a court could determine that DMG's agreements with physician equity holders of certain managed California, Colorado, Nevada and Washington associated physician groups and the way DMG carries out these arrangements as described above, either independently or coupled with the management services agreements with such associated physician groups, are in violation of the corporate practice of medicine doctrine. As a result, these arrangements could be deemed invalid, potentially resulting in a loss of revenues and an adverse effect on results of operations derived from such associated physician groups. Such a determination could force a restructuring of DMG's management arrangements with associated physician groups in California, Colorado, Nevada and/or Washington, which might include revisions of the management services agreements, including a modification of the management fee and/or establishing an alternative structure that would permit DMG to contract with a physician network without violating the corporate practice of medicine prohibition. There can be no assurance that such a restructuring would be feasible, or that it could be accomplished within a reasonable time frame without a material adverse effect on DMG's business, results of operations and financial condition. These same risks exist for the other DaVita entities utilizing similar structures.

In December 2013, DHPC obtained a restricted Knox-Keene license in California, which permits DHPC to contract with health plans in California to accept global risk without violating the corporate practice of medicine prohibition. However, DMG and DMG's Colorado, Nevada and Washington associated physician groups, as well as those physician equity holders of associated physician groups who are subject to succession agreements with DMG, could be subject to criminal or civil penalties or an injunction for practicing medicine without a license or aiding and abetting the unlicensed practice of medicine.

The level of our current and future debt could have an adverse impact on our business and our ability to generate cash to service our indebtedness and for other intended purposes depends on many factors beyond our control.

We have substantial debt outstanding, we incurred a substantial amount of additional debt in connection with the acquisition of DMG and we may incur additional indebtedness in the future, including in anticipation of receiving the cash proceeds from the sale of DMG. For additional details regarding specific risks we face regarding the sale of DMG, see the discussion in the risk factors under the heading "Risk factors related to the sale of DMG." Our inability to generate sufficient cash to service our substantial indebtedness and for other intended purposes could have important consequences to you, for example, it could:

- make it difficult for us to make payments on our debt securities;
- increase our vulnerability to general adverse economic and industry conditions;
- require us to dedicate a substantial portion of our cash flows from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, acquisitions and investments, repurchases of stock at the levels intended or announced, or at all, and other general corporate purposes;
- limit our flexibility in planning for, or reacting to, changes in our business and the markets in which we operate;
- expose us to interest rate volatility that could adversely affect our business, results of operations and financial condition, and our ability to service our indebtedness;
- place us at a competitive disadvantage compared to our competitors that have less debt; and
- limit our ability to borrow additional funds, or to refinance existing debt on favorable terms when otherwise available.

In addition, we expect to continue to incur additional indebtedness in the future, and the amount of that additional indebtedness may be substantial. Although the indentures governing our senior notes and the agreement governing our senior secured credit facilities include covenants that could limit our indebtedness, we currently have the ability to incur substantial additional debt. If new debt is added to current debt levels, the related risks described above could intensify, in particular, if we

were to borrow new debt in anticipation of receiving the cash proceeds from the pending sale of DMG and if there is a delay in closing the sale of DMG or the sale of DMG does not close.

Our ability to make payments on our indebtedness, to fund planned capital expenditures and expansion efforts, including any strategic acquisitions we may make in the future, to repurchase our stock at the levels intended or announced and to meet our other liquidity needs, will depend on our ability to generate cash. This, to a certain extent, is subject to general economic, financial, competitive, regulatory and other factors that are beyond our control.

After the pending sale of DMG closes, our cash flows will be reduced accordingly. We cannot provide assurances that our business will generate sufficient cash flows from operations in the future or that future borrowings will be available to us in an amount sufficient to enable us to service our indebtedness or to fund other liquidity needs, including those described above. If we are unable to generate sufficient funds to service our outstanding indebtedness or to meet our other liquidity needs, including the intended purposes described above, we may be required to refinance, restructure, or otherwise amend some or all of such obligations, sell assets, change our intended or announced uses or strategy for capital deployment, including for stock repurchases, reduce capital expenditures or planned expansions or raise additional cash through the sale of our equity. We cannot make any assurances that any such refinancing, restructurings, sales of assets, or issuances of equity can be accomplished or, if accomplished, can be accomplished on favorable terms or that if accomplished that they would raise sufficient funds to meet these obligations or our other liquidity needs.

The borrowings under our senior secured credit facilities are guaranteed by a substantial portion of our direct and indirect wholly owned domestic subsidiaries, including certain of DMG's subsidiaries, and are secured by a substantial portion of our and our subsidiaries' assets, including those of certain of DMG's subsidiaries. After the sale of DMG closes, we will have fewer assets with which to secure future debt or refinance or restructure existing debt. This will likely reduce the total amount of secured debt that we will be able to incur and may increase the interest rate we are required to pay on our existing secured debt and any secured debt we issue in the future. In addition, by reducing the amount of assets available to meet the claims of our secured creditors, it may also adversely affect the interest rates on our existing unsecured debt and any unsecured debt we issue in the future.

We may be subject to liability claims for damages and other expenses that are not covered by insurance or exceed our existing insurance coverage that could have a material adverse effect on our business, results of operations, financial condition and reputation.

Our operations and how we manage our Company may subject us, as well as our officers and directors to whom we owe certain defense and indemnity obligations, to litigation and liability for damages. Our business, profitability and growth prospects could suffer if we face negative publicity or we pay damages or defense costs in connection with a claim that is outside the scope or limits of coverage of any applicable insurance coverage, including claims related to adverse patient events, contractual disputes, professional and general liability and directors' and officers' duties. In addition, we have received notices of claims from commercial payors and other third parties, as well as subpoenas and CIDs from the federal government, related to our business practices, including our historical billing practices and the historical billing practices of acquired businesses. Although the ultimate outcome of these claims cannot be predicted, an adverse result with respect to one or more of these claims could have a material adverse effect on our business, results of operations and financial condition. We maintain insurance coverage for those risks we deem are appropriate to insure against and make determinations about whether to self-insure as to other risks or layers of coverage. However, a successful claim, including a professional liability, malpractice or negligence claim which is in excess of any applicable insurance coverage, or that is subject to our self-insurance retentions, could have a material adverse effect on our business, results of operations, financial condition and reputation. Additionally, as a result of the broad scope of our DMG division's medical practice, we are exposed to medical malpractice claims, as well as claims for damages and other expenses, that may not be covered by insurance or for which adequate limits of insurance coverage may not be available.

In addition, if our costs of insurance and claims increase, then our earnings could decline. Market rates for insurance premiums and deductibles have been steadily increasing. Our business, results of operations and financial condition could be materially and adversely affected by any of the following:

- the collapse or insolvency of our insurance carriers;
- further increases in premiums and deductibles;
- increases in the number of liability claims against us or the cost of settling or trying cases related to those claims; or
- an inability to obtain one or more types of insurance on acceptable terms, if at all.

If we fail to successfully maintain an effective internal control over financial reporting, the integrity of our financial reporting could be compromised, which could have a material adverse effect on our ability to accurately report our financial results and the market's perception of our business and our stock price.

The integration of acquisitions and addition of new business lines into our internal control over financial reporting has required and will continue to require significant time and resources from our management and other personnel and has increased, and will continue to, increase our compliance costs. Failure to maintain an effective internal control environment could have a material adverse effect on our ability to accurately report our financial results and the market's perception of our business and our stock price. In addition, we could be required to restate our financial results in the event of a significant failure of our internal control over financial reporting or in the event of inappropriate application of accounting principles.

Deterioration in economic conditions and further disruptions in the financial markets could have a material adverse effect on our business, results of operations and financial condition.

Deterioration in economic conditions could have a material adverse effect on our business, results of operations and financial condition. Among other things, the potential decline in federal and state revenues that may result from such conditions may create additional pressures to contain or reduce reimbursements for our services from Medicare, Medicaid and other government sponsored programs. Increases in job losses in the U.S. as a result of adverse economic conditions has and may continue to result in a smaller percentage of our patients being covered by an employer group health plan and a larger percentage being covered by lower paying Medicare and Medicaid programs. Employers may also select more restrictive commercial plans with lower reimbursement rates. To the extent that payors are negatively impacted by a decline in the economy, we may experience further pressure on commercial rates, a further slowdown in collections and a reduction in the amounts we expect to collect. In addition, uncertainty in the financial markets could adversely affect the variable interest rates payable under our credit facilities or could make it more difficult to obtain or renew such facilities or to obtain other forms of financing in the future, if at all. Any or all of these factors, as well as other consequences of a deterioration in economic conditions which cannot currently be anticipated, could have a material adverse effect on our business, results of operations and financial condition.

We could be subject to adverse changes in tax laws, regulations and interpretations or challenges to our tax positions.

We are subject to tax laws and regulations of the U.S. federal, state and local governments as well as various foreign jurisdictions. We compute our income tax provision based on enacted tax rates in the jurisdictions in which we operate. As the tax rates vary among jurisdictions, a change in earnings attributable to the various jurisdictions in which we operate could result in an unfavorable change in our overall tax provision.

From time to time, changes in tax laws or regulations may be proposed or enacted that could adversely affect our overall tax liability. For example, the recent U.S. tax legislation enacted on December 22, 2017 represents a significant overhaul of the U.S. federal tax code. This tax legislation significantly reduced the U.S. statutory corporate tax rate and made other changes that we expect will reduce our effective U.S. federal tax rate in future periods. However, the tax legislation also included a number of provisions, including, but not limited to, the limitation or elimination of various deductions or credits (including for interest expense and for performance-based compensation under Section 162(m)), the imposition of taxes on certain cross-border payments or transfers, the changing of the timing of the recognition of certain income and deductions or their character, and the limitation of asset basis under certain circumstances, any of which could significantly and adversely affect our U.S. federal income tax position. The legislation also made significant changes to the tax rules applicable to insurance companies and other entities with which we do business. The estimated impact of the new law is based on management's current knowledge and assumptions. We are continuing to evaluate the overall impact of this tax legislation on our operations and U.S. federal and state income tax position. The actual impact of the new law could be materially different from our current estimates based on our actual results and our further analysis of the new law. There can be no assurance that changes in tax laws or regulations, both within the U.S. and the other jurisdictions in which we operate, will not materially and adversely affect our effective tax rate, tax payments, financial condition and results of operations. Similarly, changes in tax laws and regulations that impact our patients, business partners and counterparties or the economy generally may also impact our financial condition and results of operations.

In addition, tax laws and regulations are complex and subject to varying interpretations, and any significant failure to comply with applicable tax laws and regulations in all relevant jurisdictions could give rise to substantial penalties and liabilities. We are regularly subject to audits by tax authorities and, although we believe our tax estimates are appropriate, the final determination of tax audits and any related litigation could be materially different from our historical income tax provisions and accruals. Any changes in enacted tax laws (such as the recent U.S. tax legislation), rules or regulatory or judicial interpretations; any adverse outcome in connection with tax audits in any jurisdiction; or any change in the pronouncements

relating to accounting for income taxes could materially and adversely impact our effective tax rate, tax payments, financial condition and results of operations.

Expansion of our operations to and offering our services in markets outside of the U.S. subjects us to political, economic, legal, operational and other risks that could have a material adverse effect on our business, results of operations and financial condition.

We are continuing to expand our operations by offering our services and entering new lines of business in certain markets outside of the U.S., which increases our exposure to the inherent risks of doing business in international markets. Depending on the market, these risks include those relating to:

- changes in the local economic environment;
- political instability, armed conflicts or terrorism;
- social changes;
- intellectual property legal protections and remedies;
- trade regulations;
- procedures and actions affecting approval, production, pricing, reimbursement and marketing of products and services;
- foreign currency;
- repatriating or moving to other countries cash generated or held abroad, including considerations relating to tax-efficiencies and changes in tax laws;
- export controls;
- lack of reliable legal systems which may affect our ability to enforce contractual rights;
- changes in local laws or regulations;
- potentially longer ramp-up times for starting up new operations and for payment and collection cycles;
- financial and operational, and information technology systems integration;
- failure to comply with U.S. laws, such as the FCPA, or local laws that prohibit us, our partners, or our partners' or our intermediaries from making improper payments to foreign officials for the purpose of obtaining or retaining business; and
- data and privacy restrictions.

Issues relating to the failure to comply with any of the above may also impact our domestic business and/or raise scrutiny on our domestic practices.

Additionally, some factors that will be critical to the success of our international business and operations will be different than those affecting our domestic business and operations. For example, conducting international operations requires us to devote significant management resources to implement our controls and systems in new markets, to comply with local laws and regulations and to overcome the numerous new challenges inherent in managing international operations, including those based on differing languages, cultures and regulatory environments, and those related to the timely hiring, integration and retention of a sufficient number of skilled personnel to carry out operations in an environment with which we are not familiar.

Any expansion of our international operations through acquisitions or through organic growth could increase these risks. Additionally, while we may invest material amounts of capital and incur significant costs in connection with the growth and development of our international operations, including to start up or acquire new operations, we may not be able to operate them profitably on the anticipated timeline, or at all.

These risks could have a material adverse effect on our business, results of operations and financial condition.

Risk factors related to the sale of DMG:

The announcement and pendency of the sale of DMG may adversely affect our business, results of operations and financial condition.

The announcement and pending sale of DMG may be disruptive to our business and may adversely affect our relationships with current and prospective teammates, patients, physicians, payors, suppliers and other business partners. Uncertainties related to the pending sale of DMG may impair our ability to attract, retain and motivate key personnel and could cause suppliers and other business partners to defer entering into contracts with us or seek to change existing business relationships with us. The loss or deterioration of significant business and operational relationships could have an adverse effect on our business, results of operations and financial condition. In addition, activities relating to the pending sale and related uncertainties could divert the attention of our management and other teammates from our day-to-day business or disrupt our operations in preparation for and during the post-closing separation of DMG. It is also possible that we could have stranded costs following the closing of the pending sale, which could be material. If we are unable to effectively manage these risks, our business, results of operations and financial condition may be adversely affected.

If we fail to complete the proposed sale of DMG, or if there is a significant delay in completing the sale, our business, results of operations, financial condition and stock price may be materially adversely affected.

The completion of the proposed sale of DMG is subject to customary closing conditions, including the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, and the approval of a notice of material modification by the California Department of Managed Health Care. If any condition to the closing of the sale of DMG is neither satisfied nor, where permissible, waived, the sale of DMG will not be completed. In addition, satisfying the closing conditions to the sale of DMG may take longer than expected. Regulators may impose material conditions, terms, obligations, costs or restrictions in connection with their approval of or consent to the sale of DMG, which could delay completion of the transaction, or if such approvals or consents are not obtained, could prevent completion of the transaction. There can be no assurance that all of the closing conditions will be satisfied or waived or that other events will not intervene to delay, or result in a failure to close, the sale of DMG. In addition, either we or Optum may terminate the equity purchase agreement if, among other things, the sale has not been consummated by June 4, 2018 (subject to two three-month extensions that can be exercised by either party unilaterally). If the equity purchase agreement is terminated and our Board of Directors seeks an alternative transaction or another acquiror for the sale of the DMG business, we may not be able to negotiate a transaction with another party on terms comparable to, or better than, the terms of the equity purchase agreement with Optum.

If the sale of DMG is not completed for any reason, investor confidence could decline. A failed transaction may result in negative publicity and may affect our relationships with teammates, patients, physicians, payors, suppliers, regulators and other business partners. In addition, in the event of a failed transaction, we will have expended significant management resources in an effort to complete the sale, we have incurred additional debt in anticipation of receiving the sale proceeds but not have received the sale proceeds to repay such debt, and we will have incurred significant transaction costs, including legal fees, financial advisor fees and other related costs, without any commensurate benefit. Accordingly, if the proposed sale of DMG is not completed, or if there is a significant delay in completing the sale, our business, results of operations, financial condition and stock price may be materially adversely affected.

We may not be able to use the proceeds from the sale of DMG as planned or we may spend or invest the proceeds in ways that may not improve our results of operations or enhance the value of our common stock.

The purchase price for the sale of the DMG business is subject to customary adjustments, both upward and downward, which could be significant. We plan to use the proceeds from the sale of DMG for significant stock repurchases, to repay debt and for general corporate purposes, including growth investments. A number of factors may impact our ability to repurchase stock and the timing of any such stock repurchases, including market conditions, the price of our common stock, our cash flow position, leverage ratios, and legal, regulatory and contractual requirements and restrictions.

In addition, we may identify investments or other uses for the proceeds from the sale of DMG that we believe are more attractive than our current intended uses. Further, there can be no assurance that any investment of the proceeds from the sale of DMG will yield a favorable return.

Under the terms of the equity purchase agreement, we are subject to certain contractual restrictions while the sale of DMG is pending, and certain post-closing contractual obligations that, in some cases, could have a material adverse effect on our business, results of operations and financial condition.

Under the terms of the equity purchase agreement, we are subject to certain restrictions on the conduct of the DMG business prior to completing the sale of DMG, which may adversely affect our ability to execute certain of our business strategies, including the ability in certain cases to enter into or amend contracts, acquire or dispose of assets, incur indebtedness or incur capital expenditures. Such limitations could negatively affect our business and operations prior to the completion of the sale of DMG. Each of these risks may be exacerbated by delays or other adverse developments with respect to the completion of the sale of DMG.

In addition, we agreed to retain certain liabilities of the DMG business for which we have certain indemnification rights against the original 2012 HealthCare Partners ("HCP") sellers. An escrow was established in connection with our acquisition of the DMG business from the HCP sellers as security for these indemnification rights, including with respect to the OIG investigation into certain patient diagnosis coding practices. We have submitted an indemnification claim against the sellers secured by the escrow for any and all liabilities incurred relating to these matters and intend to pursue recovery from the escrow. However, we can make no assurances that the indemnification and escrow will cover the full amount of our potential losses related to these matters, which could have a material adverse effect on our business, results of operations and financial condition.

Risk factors related to our U.S. dialysis and related lab services, ancillary services and strategic initiatives:

If patients in commercial plans are subject to restriction in plan designs or the average rates that commercial payors pay us decline significantly, it would have a material adverse effect on our business, results of operations and financial condition.

Approximately 33% of our dialysis services revenues for the year ended December 31, 2017 were generated from patients who have commercial payors (including hospital dialysis services) as their primary payor. The majority of these patients have insurance policies that pay us on terms and at rates that are generally significantly higher than Medicare rates. The payments we receive from commercial payors generate nearly all of our profit and all of our nonacute dialysis profits come from commercial payors. We continue to experience downward pressure on some of our commercial payment rates as a result of general conditions in the market, including as employers shift to less expensive options for medical services, recent and future consolidations among commercial payors, increased focus on dialysis services and other factors. In addition, many commercial payors that sell individual plans both on and off exchange have publicly announced losses in the marketplace. These payors may seek discounts on rates for marketplace plans on and off exchange. Commercial payment rates could be materially lower in the future.

We continuously are in the process of negotiating existing and potential new agreements with commercial payors who aggressively negotiate terms with us. Sometimes many significant agreements are being renegotiated at the same time. In the event that our continual negotiations result in overall commercial rate reductions in excess of overall commercial rate increases, the cumulative effect could have a material adverse effect on our business, results of operations and financial condition. Consolidations have significantly increased the negotiating leverage of commercial payors. Our negotiations with payors are also influenced by competitive pressures, and we may experience decreased contracted rates with commercial payors or experience decreases in patient volume as our negotiations with commercial payors continue. In addition to downward pressure on contracted commercial payor rates, payors have been attempting to design and implement plans to restrict access to coverage, and the duration and/or the breadth of benefits, which may result in decreased payments. In addition, payors have been attempting to impose restrictions and limitations on patient access to commercial exchange plans and non-contracted or out-of-network providers, and in some circumstances designate our centers as out-of-network providers. Rates for commercial exchange products and out-of-network providers are on average higher than rates for government products and in-network providers, respectively.

A number of commercial payors have incorporated policies into their provider manuals limiting or refusing to accept charitable premium assistance from non-profit organizations, such as the American Kidney Fund, which may impact the number of patients who are able to afford commercial exchange plans. Paying for coverage is a significant financial burden for many patients, and ESRD disproportionately affects the low-income population. Charitable premium assistance supports continuity of coverage and access to care for patients, many of whom are unable to continue working full-time as a result of their severe condition. A material restriction in patients' ability to access charitable premium assistance may restrict the ability of dialysis patients to obtain and maintain optimal insurance coverage, and may adversely impact a large number of dialysis centers across the U.S. by making certain centers economically unviable, and may have a material adverse effect on our business, results of operations and financial condition.

We also believe commercial payors have or will begin to restructure their benefits to create disincentives for patients to stay with commercial insurance or to select or remain with out-of-network providers. In addition, payors may seek to decrease payment rates for out-of-network providers. Decreases in the number of patients with commercial plans, decreases in out-of-network rates and restrictions on out-of-network access, our turning away new patients in instances where we are unable to come to agreement on rates, or decreases in contracted rates could result in a significant decrease in our overall revenues derived from commercial payors. If the average rates that commercial payors pay us decline significantly, or if we see a decline in commercial patients, it would have a material adverse effect on our business, results of operations and financial condition. For additional details regarding specific risks we face regarding regulatory changes that could result in fewer patients covered under commercial plans or an increase of patients covered under more restrictive commercial plans with lower reimbursement rates, see the discussion in the risk factor under the heading "Healthcare reform could have a material adverse effect on our business, financial condition and results of operations."

If the number of patients with higher-paying commercial insurance declines, it could have a material adverse effect on our business, results of operations and financial condition.

Our revenue levels are sensitive to the percentage of our patients with higher-paying commercial insurance coverage. A patient's insurance coverage may change for a number of reasons, including changes in the patient's or a family member's employment status. Any changes impacting our highest paying commercial payors will have a disproportionate impact on us. In addition, many patients with commercial and government insurance rely on financial assistance from charitable organizations, such as the American Kidney Fund. Certain payors have challenged our patients' and other providers' patients' ability to utilize assistance from charitable organizations for the payment of premiums, including through litigation and other legal proceedings. Regulators have also questioned the use of charitable premium assistance for ESRD patients. CMS or another regulatory agency or legislative authority may issue a new rule or guidance that challenges charitable premium assistance. If any of these challenges to kidney patients' use of premium assistance are successful or restrictions are imposed on the use of financial assistance from such charitable organizations such that kidney patients are unable to obtain, or continue to receive or receive for a limited duration, such financial assistance, it could have a material adverse effect on our business, results of operations and financial condition. In addition, if our assumptions about how kidney patients will respond to any change in financial assistance from charitable organizations are incorrect, it could have a material adverse effect on our business, results of operations and financial condition.

When Medicare becomes the primary payor, the payment rate we receive for that patient decreases from the employer group health plan or commercial plan rate to the lower Medicare payment rate. The number of our patients who have government-based programs as their primary payors could increase and the percentage of our patients covered under commercial insurance plans could be negatively impacted as a result of improved mortality or declining macroeconomic conditions. To the extent there are sustained or increased job losses in the U.S., independent of whether general economic conditions improve, we could experience a decrease in the number of patients covered under commercial plans and/or an increase in uninsured and underinsured patients. We could also experience a further decrease in the payments we receive for services if changes to the healthcare regulatory system result in fewer patients covered under commercial plans or an increase of patients covered under more restrictive commercial plans with lower reimbursement rates. In addition, our continual negotiations with commercial payors under existing and potential new agreements could result in a decrease in the number of our patients covered by commercial plans to the extent that we cannot reach agreement with commercial payors on rates and other terms, resulting in termination or non-renewals of existing agreements and our inability to enter into new agreements. Commercial payors have taken and may continue to take steps to control the cost of and/or the eligibility for access to healthcare services, including relative to products on and off the healthcare exchanges. These efforts could impact the number of our patients who are eligible to enroll in commercial insurance plans, and remain on the plans, including plans offered through healthcare exchanges. Additionally, we continue to experience higher amounts of write-offs due to uninsured and underinsured patients, which has resulted in an increase in uncollectible accounts. Commercial payors could also cease paying in the primary position after providing 30 months of coverage resulting in a material reduction in payment as the patient moves to Medicare primary. If there is a significant reduction in the number of patients under higher-paying commercial plans relative to government-based programs that pay at lower rates or a significant increase in the number of patients that are uninsured and underinsured, it would have a material adverse effect on our business, results of operations and financial condition.

Changes in the structure of and payment rates under the Medicare ESRD program could have a material adverse effect on our business, results of operations and financial condition.

Approximately 42% of our dialysis services revenues for the year ended December 31, 2017 were generated from patients who have Medicare as their primary payor. For patients with Medicare coverage, all ESRD payments for dialysis treatments are made under a single bundled payment rate which provides a fixed payment rate to encompass all goods and services provided during the dialysis treatment, including pharmaceuticals that were historically separately reimbursed to the

dialysis providers, such as EPO, vitamin D analogs and iron supplements, irrespective of the level of pharmaceuticals administered or additional services performed. Most lab services are also included in the bundled payment. Under the ESRD PPS, the bundled payments to a dialysis facility may be reduced by as much as 2% based on the facility's performance in specified quality measures set annually by CMS through the ESRD Quality Incentive Program, which was established by the Medicare Improvements for Patients and Providers Act of 2008. The bundled payment rate is also adjusted for certain patient characteristics, a geographic usage index and certain other factors. In addition, the ESRD PPS is subject to rebasing, which can have a positive financial effect, or a negative one if the government fails to rebase in a manner that adequately addresses the costs borne by dialysis facilities. Similarly, as new drugs, services or labs are added to the ESRD bundle, CMS' failure to adequately calculate the costs associated with the drugs, services or labs could have a material adverse effect on our business, results of operations and financial condition.

The current bundled payment system presents certain operating, clinical and financial risks, which include:

- Risk that our rates are reduced by CMS. Uncertainty about future payment rates remains a material risk to our business. Each year, CMS publishes a final rule for the PPS, which has been phasing in reductions to the PPS base rate mandated by the American Taxpayer Relief Act of 2012 as modified by the Protecting Access to Medicare Act of 2014.

- Risk that CMS, through its contracted MACs or otherwise, implements Local Coverage Determinations (LCDs) or other decisions that limit the frequency a provider can bill Medicare for home dialysis treatments or other rules that may impact reimbursement. Such coverage determinations could have an adverse impact on our revenue. There is also risk commercial insurers could incorporate the requirements or limitations associated with such LCDs into their contracted terms with dialysis providers, which could have an adverse impact on our revenue.

- Risk that a MAC, or multiple MACs, change their interpretations of existing regulations, manual provisions and/or guidance; or seek to implement or enforce new interpretations that are inconsistent with how we have interpreted existing regulations, manual provisions and/or guidance.

- Risk that increases in our operating costs will outpace the Medicare rate increases we receive. We expect operating costs to continue to increase due to inflationary factors, such as increases in labor and supply costs, including increases in maintenance costs and capital expenditures to improve, renovate and maintain our facilities, equipment and information technology to meet changing regulatory requirements, regardless of whether there is a compensating inflation-based increase in Medicare payment rates or in payments under the bundled payment rate system.

- Risk of federal budget sequestration cuts. As a result of the Budget Control Act of 2011 and the BBA, an annual 2% reduction to Medicare payments took effect on April 1, 2013 and has been extended through 2027. These across-the-board spending cuts have affected and will continue to adversely affect our business, results of operations and financial condition.

- Risk that, if our clinical systems fail to accurately capture the data we report to CMS in connection with claims for which at least part of the government's payments to us is based on clinical performance or patient outcomes or co-morbidities, we might be over-reimbursed by the government, which could subject us to certain liability. For example, CMS published a final rule that implemented a provision of the ACA, requiring providers to report and return Medicare and Medicaid overpayments within the later of (a) 60 days after the overpayment is identified, or (b) the date any corresponding cost report is due, if applicable. An overpayment impermissibly retained under this statute could subject us to liability under the FCA, exclusion, and penalties under the federal Civil Monetary Penalty statute.

For additional details regarding the risks we face for failing to adhere to our Medicare and Medicaid regulatory compliance obligations, see the risk factor above under the heading "If we fail to adhere to all of the complex government laws and regulations that apply to our business, we could suffer severe consequences that could have a material adverse effect on our business, results of operations, financial condition and stock price."

Changes in state Medicaid or other non-Medicare government-based programs or payment rates could have a material adverse effect on our business, results of operations and financial condition.

Approximately 25% of our dialysis services revenues for the year ended December 31, 2017 were generated from patients who have state Medicaid or other non-Medicare government-based programs, such as coverage through the Department of Veterans Affairs (VA), as their primary coverage. As state governments and other governmental organizations

face increasing budgetary pressure, we may in turn face reductions in payment rates, delays in the receipt of payments, limitations on enrollee eligibility or other changes to the applicable programs. For example, certain state Medicaid programs and the VA have recently considered, proposed or implemented payment rate reductions.

The VA adopted Medicare's bundled PPS pricing methodology for any veterans receiving treatment from non-VA providers under a national contracting initiative. Since we are a non-VA provider, these reimbursements are tied to a percentage of Medicare reimbursement, and we have exposure to any dialysis reimbursement changes made by CMS. Approximately 3% of our dialysis services revenues for the year ended December 31, 2017 were generated by the VA.

In 2013, we entered into a five-year Nationwide Dialysis Services contract with the VA which is subject to one-year renewal periods, consistent with all provider agreements with the VA under this contract. During the length of the contract, the VA has elected not to make adjustments to reimbursement percentages that are tied to a percentage of Medicare reimbursement rates. These agreements provide the VA with the right to terminate the agreements without cause on short notice. Should the VA renegotiate, or not renew or cancel these agreements for any reason, we may cease accepting patients under this program and may be forced to close centers or experience lower reimbursement rates, which could have a material adverse effect on our business, results of operations and financial condition.

State Medicaid programs are increasingly adopting Medicare-like bundled payment systems, but sometimes these payment systems are poorly defined and are implemented without any claims processing infrastructure, or patient or facility adjusters. If these payment systems are implemented without any adjusters and claims processing changes, Medicaid payments will be substantially reduced and the costs to submit such claims may increase, which will have a negative impact on our business, results of operations and financial condition. In addition, some state Medicaid program eligibility requirements mandate that citizen enrollees in such programs provide documented proof of citizenship. If our patients cannot meet these proof of citizenship documentation requirements, they may be denied coverage under these programs, resulting in decreased patient volumes and revenue. These Medicaid payment and enrollment changes, along with similar changes to other non-Medicare government programs could reduce the rates paid by these programs for dialysis and related services, delay the receipt of payment for services provided and further limit eligibility for coverage which could have a material adverse effect on our business, results of operations and financial condition.

Changes in clinical practices, payment rates or regulations impacting EPO and other pharmaceuticals could have a material adverse effect on our business, results of operations and financial condition and negatively impact our ability to care for patients.

Medicare bundles EPO into the PPS such that dosing variations do not change the amount paid to a dialysis facility. Although some Medicaid programs and other payors suggest movement towards a bundled payment system inclusive of EPO, some non-Medicare payors continue to pay for EPO separately from the treatment rate.

Additionally, evaluations on the utilization and reimbursement for ESAs, which have occurred in the past and may occur in the future, and related actions by the U.S. Congress and federal agencies, could result in further restrictions on the utilization and reimbursement for ESAs. Commercial payors have increasingly examined their administration policies for EPO and, in some cases, have modified those policies. Changes in labeling of EPO and other pharmaceuticals in a manner that alters physician practice patterns, including their independent determinations as to appropriate EPO dosing, or accepted clinical practices, and/or changes in private and governmental payment criteria, including the introduction of EPO administration policies could have a material adverse effect on our business, results of operations and financial condition. Further increased utilization of EPO for patients for whom the cost of EPO is included in a bundled reimbursement rate, or further decreases in reimbursement for EPO and other pharmaceuticals that are not included in a bundled reimbursement rate, could also have a material adverse effect on our business, results of operations and financial condition.

Additionally, as of January 1, 2018, calcimimetics entered the Medicare ESRD bundle. We implemented processes to provide the drug as required under the regulations and prescribed by physicians and have entered into agreements to provide for access to and distribution of the drug. If Medicare Advantage plans and/or Medicaid do not pay as required or the processes we have implemented to provide the drug do not perform as anticipated, then we could be subject to both financial and operational risk.

We may be subject to increased inquiries or audits from a variety of governmental bodies or claims by third parties. Although we believe our anemia management practices and other pharmaceutical administration practices have been compliant with existing laws and regulations, increased inquiries or audits from governmental bodies or claims by third parties would require management's attention, and could result in significant legal expense. Any negative findings could result in substantial financial penalties or repayment obligations, the imposition of certain obligations on and changes to our practices and procedures as well as the attendant financial burden on us to comply with the obligations, or exclusion from future participation

in the Medicare and Medicaid programs, and could have a material adverse effect on our business, results of operations and financial condition.

If we fail to comply with our Corporate Integrity Agreement, we could be subject to substantial penalties and exclusion from participation in federal healthcare programs that could have a material adverse effect on our business, results of operations and financial condition.

In October 2014, we entered into a Settlement Agreement with the United States and relator David Barbetta to resolve the then pending 2010 and 2011 U.S. Attorney physician relationship investigations and paid $406 million in settlement amounts, civil forfeiture, and interest to the United States and certain states. In connection with the resolution of these matters, and in exchange for the OIG's agreement not to exclude us from participating in the federal healthcare programs, we have entered into a five-year CIA with the OIG. The CIA (i) requires that we maintain certain elements of our compliance programs; (ii) imposes certain expanded compliance-related requirements during the term of the CIA; (iii) requires ongoing monitoring and reporting by an independent monitor, imposes certain reporting, certification, records retention and training obligations, allocates certain oversight responsibility to the Board's Compliance Committee, and necessitates the creation of a Management Compliance Committee and the retention of an independent compliance advisor to the Board; and (iv) contains certain business restrictions related to a subset of our joint venture arrangements, including our agreeing to (1) unwind 11 joint venture transactions that were created through partial divestitures to, or partial acquisitions from, nephrologists, and that cover 26 of our 2,119 clinics that existed at the time we entered into the Settlement Agreement, all of which have been completed, (2) not enter into certain types of partial divestiture joint venture transactions with nephrologists during the term of the CIA, (3) non-enforcement of certain patient-related non-solicitation restrictions, and (4) certain other restrictions. The costs associated with compliance with the CIA could be substantial and may be greater than we currently anticipate. In addition, in the event of a breach of the CIA, we could become liable for payment of certain stipulated penalties, and could be excluded from participation in federal healthcare programs. The OIG notified us that it considered us to be previously in breach of the CIA because of three implementation deficiencies. While we have remediated the deficiencies and have paid certain stipulated penalties, we cannot provide any assurances that we may not be found in breach of the CIA in the future. In general, the costs associated with compliance with the CIA, or any liability or consequences associated with a breach, could have a material adverse effect on our business, results of operations and financial condition. For our domestic dialysis business, we are required under the CIA to report to the OIG (i) probable violations of criminal, civil or administrative laws applicable to any federal health care program for which penalties or exclusions may be authorized under applicable laws and regulations; (ii) substantial overpayments of amounts of money we have received in excess of the amounts due and payable under the federal healthcare program requirements; and (iii) employment of or contracting with individuals ineligible from participating in the federal healthcare programs (we refer to these collectively as Reportable Events). We have provided the OIG notice of Reportable Events, and we may identify and report additional events in the future. If any of our operations are found to violate government laws and regulations, we could suffer severe consequences that could have a material adverse effect on our business, results of operations, financial condition and stock price, including those consequences described under the risk factor "If we fail to adhere to all of the complex government laws and regulations that apply to our business, we could suffer severe consequences that could have a material adverse effect on our business, results of operations, financial condition and stock price."

Delays in state Medicare and Medicaid certification or other licensing and/or anything impacting the licensing of our dialysis centers could adversely affect our business, results of operations and financial condition.

Before we can begin billing for patients treated in our outpatient dialysis centers who are enrolled in government-based programs, we are required to obtain state and federal certification for participation in the Medicare and Medicaid programs. As state agencies responsible for surveying dialysis centers on behalf of the state and Medicare program face increasing budgetary pressure, certain states are having difficulty keeping up with certifying dialysis centers in the normal course resulting in significant delays in certification. If state governments continue to have difficulty keeping up with certifying new centers in the normal course and we continue to experience significant delays in our ability to treat and bill for services provided to patients covered under government programs, it could cause us to incur write-offs of investments or accelerate the recognition of lease obligations in the event we have to close centers or our centers' operating performance deteriorates, and it could have an adverse effect on our business, results of operations and financial condition. Although the BBA passed in February 2018 allows for organizations approved by the Department of Health and Human Services (HHS) to accredit dialysis facilities and imposes certain timing requirements regarding the initiation of initial surveys to determine if certain conditions and requirements for payment have been satisfied, the ultimate impact of these changes cannot be predicted. In addition to certifications for Medicare and Medicaid, some states have licensing requirements for ESRD facilities. Delays in licensure, denials of licensure, or withdrawal of licensure could also adversely affect our business, results of operations and financial condition.

If our joint ventures were found to violate the law, we could suffer severe consequences that would have a material adverse effect on our business, results of operations and financial condition.

As of December 31, 2017, we owned a controlling interest in numerous dialysis-related joint ventures, which represented approximately 24% of our net U.S. dialysis and related lab services revenues for the year ended December 31, 2017. In addition, we also owned noncontrolling equity investments in several other dialysis related joint ventures. We may continue to increase the number of our joint ventures. Many of our joint ventures with physicians or physician groups also have certain physician owners providing medical director services to centers we own and operate. Because our relationships with physicians are governed by the federal and state anti-kickback statutes, we have sought to structure our joint venture arrangements to satisfy as many federal safe harbor requirements as we believe are commercially reasonable. However, although our joint venture arrangements do not satisfy all of the elements of any safe harbor under the federal Anti-Kickback Statute, they are not automatically prohibited under the federal Anti-Kickback Statute but are susceptible to government scrutiny. For example, in October 2014, we entered into a Settlement Agreement with the United States and relator David Barbetta to resolve the then pending 2010 and 2011 U.S. Attorney physician relationship investigations regarding certain of our joint ventures and paid $406 million in settlement amounts, civil forfeiture, and interest to the United States and certain states. For further details, see "If we fail to comply with our Corporate Integrity Agreement, we could be subject to substantial penalties and exclusion from participation in federal healthcare programs that could have a material adverse effect on our business, results of operations and financial condition".

There are significant risks associated with estimating the amount of dialysis revenues and related refund liabilities that we recognize, and if our estimates of revenues and related refund liabilities are materially inaccurate, it could impact the timing and the amount of our revenues recognition or have a material adverse effect on our business, results of operations and financial condition.

There are significant risks associated with estimating the amount of U.S. dialysis and related lab services revenues and related refund liabilities that we recognize in a reporting period. The billing and collection process is complex due to ongoing insurance coverage changes, geographic coverage differences, differing interpretations of contract coverage and other payor issues. Determining applicable primary and secondary coverage for approximately 197,800 U.S. patients at any point in time, together with the changes in patient coverage that occur each month, requires complex, resource-intensive processes. Errors in determining the correct coordination of benefits may result in refunds to payors. Revenues associated with Medicare and Medicaid programs are also subject to estimating risk related to the amounts not paid by the primary government payor that will ultimately be collectible from other government programs paying secondary coverage, the patient's commercial health plan secondary coverage or the patient. Collections, refunds and payor retractions typically continue to occur for up to three years and longer after services are provided. We generally expect our range of U.S. dialysis and related lab services revenues estimating risk to be within 1% of net revenues for the segment. If our estimates of U.S. dialysis and related lab services revenues and related refund liabilities are materially inaccurate, it could impact the timing and the amount of our revenues recognition and have a material adverse impact on our business, results of operations and financial condition.

Our ancillary services and strategic initiatives, including our pharmacy services and our international operations, that we invest in now or in the future may generate losses and may ultimately be unsuccessful. In the event that one or more of these activities is unsuccessful, our business, results of operations and financial condition may be negatively impacted and we may have to write off our investment and incur other exit costs.

Our ancillary services and strategic initiatives are subject to many of the same risks, regulations and laws, as described in the risk factors related to our dialysis business set forth in this Part I, Item 1A, and are also subject to additional risks, regulations and laws specific to the nature of the particular strategic initiative. We expect to add additional service offerings to our business and pursue additional strategic initiatives in the future as circumstances warrant, which could include healthcare services not related to dialysis. Many of these initiatives require or would require investments of both management and financial resources and can generate significant losses for a substantial period of time and may not become profitable in the expected timeframe or at all. There can be no assurance that any such strategic initiative will ultimately be successful. Any significant change in market conditions, or business performance, or in the political, legislative or regulatory environment, may impact the economic viability of any of these strategic initiatives.

If any of our ancillary services or strategic initiatives, including our pharmacy services and our international operations, are unsuccessful, it would have a negative impact on our business, results of operations and financial condition, and we may determine to exit that line of business. We could incur significant termination costs if we were to exit certain of these lines of business. In addition, we may incur a material write-off or an impairment of our investment, including goodwill, in one or more of our ancillary services or strategic initiatives. In that regard, we have taken, and may in the future take, impairment charges related to our ancillary services and strategic initiatives, including in our international and pharmacy businesses.

If a significant number of physicians were to cease referring patients to our dialysis centers, whether due to regulatory or other reasons, it would have a material adverse effect on our business, results of operations and financial condition.

Physicians, including medical directors, choose where they refer their patients. We believe that physicians prefer to have their patients treated at dialysis centers where they or other members of their practice supervise the overall care provided as medical director of the center. As a result, the primary referral source for most of our centers is often the physician or physician group providing medical director services to the center.

Our medical director contracts are for fixed periods, generally ten years, and at any given time a large number of them could be up for renewal at the same time. Medical directors have no obligation to extend their agreements with us and if we are unable to enforce noncompetition provisions contained in terminated medical director agreements, our former medical directors may choose to provide medical director services for competing providers or establish their own dialysis centers in competition with ours. Neither our current nor former medical directors have an obligation to refer their patients to our centers.

The aging of the nephrologist population and opportunities presented by our competitors may negatively impact a medical director's decision to enter into or extend his or her agreement with us. Moreover, different affiliation models in the changing healthcare environment that limit a nephrologist's choice in where he or she can refer patients, such as an increase in the number of physicians becoming employed by hospitals or a perceived decrease in the quality of service levels at our centers, may limit a nephrologist's ability or desire to refer patients to our centers or otherwise negatively impact treatment volumes.

In addition, we may take actions to restructure existing relationships or take positions in negotiating extensions of relationships to assure compliance with the federal Anti-Kickback Statute, Stark Law and other similar laws. If the terms of any existing agreement are found to violate applicable laws, we may not be successful in restructuring the relationship, which could lead to the early termination of the agreement. These actions, in an effort to comply with applicable laws and regulations, could negatively impact the decision of physicians to extend their medical director agreements with us. If a significant number of physicians were to cease referring patients to our dialysis centers, it would have a material adverse effect on our business, results of operations and financial condition.

If there are shortages of skilled clinical personnel, or if changes to state staffing ratios are implemented with which we are required to comply, we may experience disruptions in our business operations and increases in operating expenses, among other things, which could have a material adverse effect on our business, results of operations and financial condition.

We face increasing labor costs generally, and in particular, face increased labor costs and difficulties in hiring nurses due to a nationwide shortage of skilled clinical personnel. We compete for nurses with hospitals and other healthcare providers. This nursing shortage may limit our ability to expand our operations. Furthermore, changes in certification requirements can impact our ability to maintain sufficient staff levels, including to the extent our teammates are not able to meet new requirements, among other things. In addition, if we experience a higher than normal turnover rate for our skilled clinical personnel, our operations and treatment growth may be negatively impacted, which could adversely affect our business, results of operations and financial condition.

In addition, currently pending and future proposed ballot initiatives or referendums, legislation or policy changes could cause us to incur substantial costs to challenge and, if implemented, impose additional requirements on our operations, including increases in the required staffing levels or staffing ratios for clinical personnel, minimum transition times between treatments, limits on how much patients may be charged for care, limitations as to the amount that can be spent on certain medical costs, and a ceiling on the percent of profit for such care. Changes such as these mandated by currently pending and future ballot initiatives or referendums, legislation or policy changes would likely materially reduce our revenues and increase our operating expense and impact our ability to staff our clinics to the new, elevated staffing levels, in particular given the ongoing nationwide shortage of healthcare workers, especially nurses. Any of these events or circumstances could materially reduce our revenues and increase our operating and other costs, require us to close dialysis centers or reduce shifts, and could have a material adverse effect on our employee relations, treatment growth, productivity, business, results of operations and financial condition.

Our business is labor intensive and could be materially adversely affected if we are unable to maintain satisfactory relations with our employees or if union organizing activities or legislative changes result in significant increases in our operating costs or decreases in productivity.

Our business is labor intensive, and our financial and operating results have been and continue to be subject to variations in labor-related costs, productivity and the number of pending or potential claims against us related to labor and employment

practices. Political efforts at the national or local level could result in actions or proposals that increase the likelihood or success of union organizing activities at our facilities and union organizing activities could increase for other reasons. Labor and employment claims, including the filing of class action suits, or work stoppages, wages and benefits or adverse outcomes of these types of claims could trend upwards. Any of these events or circumstances could have a material adverse effect on our employee relations, treatment growth, productivity, business, results of operations and financial condition.

Complications associated with our billing and collections system could materially adversely affect our business, results of operations and financial condition.

Our billing system is critical to our billing operations. If there are defects in the billing system, we may experience difficulties in our ability to successfully bill and collect for services rendered, including a delay in collections, a reduction in the amounts collected, increased risk of retractions from and refunds to commercial and government payors, an increase in our provision for uncollectible accounts receivable and noncompliance with reimbursement regulations, any or all of which could materially adversely affect our results of operations.

Risk factors primarily related to DMG:

DMG is subject to many of the same risks to which our dialysis business is subject.

As a participant in the healthcare industry, DMG is subject to many of the same risks as our dialysis business is, as described in the risk factors set forth above in this Part I, Item 1A, any of which could have a material adverse effect on DMG's business, results of operations and financial condition.

Under most of DMG's agreements with health plans, DMG assumes some or all of the risk that the cost of providing services will exceed its compensation.

Approximately 83% of DMG's revenue for the year ended December 31, 2017 is derived from fixed per member per month (PMPM) fees paid by health plans under capitation agreements with DMG or its associated physician groups. While there are variations specific to each arrangement, DMG, through DaVita Health Plan of California, Inc. (DHPC), a subsidiary of HealthCare Partners Holdings, LLC and a restricted Knox-Keene licensed entity, and, in certain instances, DMG's associated physician groups generally contract with health plans to receive a PMPM fee for professional services and assume the financial responsibility for professional services only. In some cases, the health plans separately enter into capitation contracts with third parties (typically hospitals) who receive directly a PMPM fee and assume contractual financial responsibility for hospital services. In other cases, the health plan does not pay any portion of the PMPM fee to the hospital, but rather administers claims for hospital expenses itself. In both scenarios, DMG enters into managed care-related administrative services agreements or similar arrangements with those third parties (typically hospitals) under which DMG agrees to be responsible for utilization review, quality assurance, and other managed care-related administrative functions and claim payments. As compensation for such administrative services, DMG is entitled to receive a percentage of the amount by which the institutional capitation revenue received from health plans exceeds institutional expenses; any such risk-share amount to which DMG is entitled is recorded as medical revenues, and DMG is also responsible for a percentage of any short-fall in the event that institutional expenses exceed institutional revenues. To the extent that members require more care than is anticipated and/or the cost of care increases, aggregate fixed PMPM amounts, or capitation payments, may be insufficient to cover the costs associated with treatment. If medical costs and expenses exceed estimates, except in very limited circumstances, DMG will not be able to increase the PMPM fee received under these risk agreements during their then-current terms and could, directly or indirectly through its contracts with its associated physician groups, suffer losses with respect to such agreements.

Changes in DMG's or its associated physician groups' anticipated ratio of medical expense to revenue can significantly impact DMG's financial results. Accordingly, the failure to adequately predict and control medical costs and expenses and to make reasonable estimates and maintain adequate accruals for incurred but not reported claims, could have a material adverse effect on DMG's business, results of operations and financial condition.

Historically, DMG's and its associated physician groups' medical costs and expenses as a percentage of revenue have fluctuated. Factors that may cause medical expenses to exceed estimates include:

- the health status of members;
- higher than expected utilization of new or existing healthcare services or technologies;
- an increase in the cost of healthcare services and supplies, including pharmaceuticals, whether as a result of inflation or otherwise;

- changes to mandated benefits or other changes in healthcare laws, regulations and practices;
- periodic renegotiation of provider contracts with specialist physicians, hospitals and ancillary providers;
- periodic renegotiation of contracts with DMG's affiliated primary care physicians and specialists;
- changes in the demographics of the participating members and medical trends;
- contractual or claims disputes with providers, hospitals or other service providers within a health plan's network;
- the occurrence of catastrophes, major epidemics or acts of terrorism; and
- the reduction of health plan premiums.

Risk-sharing arrangements that DMG and its associated physician groups have with health plans and hospitals could result in their costs exceeding the corresponding revenues, which could reduce or eliminate any shared risk profitability.

Most of the agreements between health plans and DMG and its associated physician groups contain risk-sharing arrangements under which the physician groups can earn additional compensation from the health plans by coordinating the provision of quality, cost-effective healthcare to members. However, such arrangements may require the physician group to assume a portion of any loss sustained from these arrangements, thereby reducing DMG's net income. Under these risk-sharing arrangements, DMG and its associated physician groups are responsible for a portion of the cost of hospital services or other services that are not capitated. The terms of the particular risk-sharing arrangement allocate responsibility to the respective parties when the cost of services exceeds the related revenue, which results in a deficit, or permit the parties to share in any surplus amounts when actual costs are less than the related revenue. The amount of non-capitated medical and hospital costs in any period could be affected by factors beyond the control of DMG, such as changes in treatment protocols, new technologies, longer lengths of stay by the patient and inflation. Certain of DMG's agreements with health plans stipulate that risk-sharing pool deficit amounts are carried forward to offset any future years' surplus amounts DMG would otherwise be entitled to receive. DMG accrues for any such risk-sharing deficits. To the extent that such non-capitated medical and hospital costs are higher than anticipated, revenue may not be sufficient to cover the risk-sharing deficits the health plans and DMG are responsible for, which could have a material adverse effect on DMG's business, results of operations and financial condition.

Renegotiation, renewal or termination of capitation agreements with health plans could have a material adverse effect on DMG's business, results operations and financial condition.

Under most of DMG's and its associated physician groups' capitation agreements with health plans, the health plan is generally permitted to modify the benefit and risk obligations and compensation rights from time to time during the terms of the agreements. If a health plan exercises its right to amend its benefit and risk obligations and compensation rights, DMG and its associated physician groups are generally allowed a period of time to object to such amendment. If DMG or its associated physician group so objects, under some of the risk agreements, the relevant health plan may terminate the applicable agreement upon 90 to 180 days written notice. If DMG or its associated physician groups enter into capitation contracts or other risk sharing arrangements with unfavorable economic terms, or a capitation contract is amended to include unfavorable terms, DMG could, directly or indirectly through its contracts with its associated physician groups, suffer losses with respect to such contract. Since DMG does not negotiate with CMS or any health plan regarding the benefits to be provided under their Medicare Advantage plans, DMG often has just a few months to familiarize itself with each new annual package of benefits it is expected to offer. Depending on the health plan at issue and the amount of revenue associated with the health plan's risk agreement, the renegotiated terms or termination could have a material adverse effect on DMG's business, results of operations and financial condition.

If DMG's agreements or arrangements with any physician equity holder(s) of associated physicians, physician groups or IPAs are deemed invalid under state law, including laws against the corporate practice of medicine, or federal law, or are terminated as a result of changes in state law, or if there is a change in accounting standards by the Financial Accounting Standards Board (FASB) or the interpretation thereof affecting consolidation of entities, it could have a material adverse effect on DMG's consolidation of total revenues derived from such associated physician groups.

DMG's financial statements are consolidated in accordance with applicable accounting standards and include the accounts of its majority-owned subsidiaries and certain non-owned DMG-associated and managed physician groups. Such consolidation for accounting and/or tax purposes does not, is not intended to, and should not be deemed to, imply or provide to DMG any control over the medical or clinical affairs of such physician groups. In the event of a change in accounting standards promulgated by FASB or in interpretation of its standards, or if there is an adverse determination by a regulatory agency or a court, or a change in state or federal law relating to the ability to maintain present agreements or arrangements with such

physician groups, DMG may not be permitted to continue to consolidate the total revenues of such organizations. A change in accounting for consolidation with respect to DMG's present agreement or arrangements would diminish DMG's reported revenues but would not be expected to materially and adversely affect its reported results of operations, while regulatory or legal rulings or changes in law interfering with DMG's ability to maintain its present agreements or arrangements could materially diminish both revenues and results of operations.

If DHPC is not able to satisfy financial solvency or other regulatory requirements, we could become subject to sanctions and its license to do business in California could be limited, suspended or terminated, which could have a material adverse effect on DMG's business, results of operations and financial condition.

Knox-Keene requires healthcare service plans operating in California to comply with financial solvency and other requirements overseen by the California Department of Managed HealthCare (DMHC). Under Knox-Keene, DHPC is required to, among other things:

- Maintain, at all times, a minimum tangible net equity (TNE);
- Submit periodic financial solvency reports to the DMHC containing various data regarding performance and financial solvency;
- Comply with extensive regulatory requirements; and
- Submit to periodic regulatory audits and reviews concerning DHPC operations and compliance with Knox-Keene.

In the event that DHPC is not in compliance with the provisions of Knox-Keene, we could be subject to sanctions, or limitations on, or suspension of its license to do business in California, which could have a material adverse effect on DMG's business, results of operations and financial condition.

If DMG's associated physician group is not able to satisfy the California DMHC's financial solvency requirements, DMG's associated physician group could become subject to sanctions and DMG's ability to do business in California could be limited or terminated, which could have a material adverse effect on DMG's business, results of operations and financial condition.

The California DMHC has instituted financial solvency regulations to monitor the financial solvency of capitated physician groups. Under these regulations, DMG's associated physician group is required to, among other things:

- Maintain, at all times, a minimum cash-to-claims ratio (where cash-to-claims ratio means the organization's cash, marketable securities and certain qualified receivables, divided by the organization's total unpaid claims liability). The regulation currently requires a cash-to-claims ratio of 0.75.
- Submit periodic reports to the California DMHC containing various data and attestations regarding performance and financial solvency, including incurred but not reported calculations and documentation, and attestations as to whether or not the organization was in compliance with Knox-Keene requirements related to claims payment timeliness, had maintained positive TNE (i.e., at least $1.00) and had maintained positive working capital (i.e., at least $1.00).

In the event that DMG's associated physician group is not in compliance with any of the above criteria, DMG's associated physician group could be subject to sanctions, or limitations on, or removal of, its ability to do business in California, which could have a material adverse effect on DMG's business, results of operations and financial condition.

Reductions in Medicare Advantage health plan reimbursement rates stemming from recent healthcare reforms and any future related regulations could have a material adverse effect on DMG's business, results of operations and financial condition.

A significant portion of DMG's revenue is directly or indirectly derived from the monthly premium payments paid by CMS to health plans for medical services provided to Medicare Advantage enrollees. As a result, DMG's results of operations are, in part, dependent on government funding levels for Medicare Advantage programs. Any changes that limit or reduce Medicare Advantage reimbursement levels, such as reductions in or limitations of reimbursement amounts or rates under programs, reductions in funding of programs, expansion of benefits without adequate funding, elimination of coverage for certain benefits, or elimination of coverage for certain individuals or treatments under programs, could have a material adverse effect on DMG's business, results of operations and financial condition.

Each year, CMS issues a final rule to establish the Medicare Advantage benchmark payment rates for the following calendar year. Any reduction to Medicare Advantage rates impacting DMG that is greater compared to the industry average rate may have material adverse effect on DMG's business, results of operations and financial condition. The final impact of the Medicare Advantage rates can vary from any estimate we may have and may be further impacted by the relative growth of DMG's Medicare Advantage patient volumes across markets as well as by the benefit plan designs submitted. It is possible that we may underestimate the impact of the Medicare Advantage rates on our business, which could have a material adverse effect on DMG's business, results of operations and financial condition.

We took impairment charges against the goodwill of several of our DMG reporting units in five of the nine quarters since the fourth quarter of 2015 based on continuing developments in our DMG business, including recent annual updates to Medicare Advantage benchmark reimbursement rates, changes in our expectations concerning future government reimbursement rates and our expected ability to mitigate them, medical cost and utilization trends, commercial pricing pressures, commercial membership rates, underperformance of certain at-risk reporting units and other market factors. We may also need to take additional impairment charges against earnings in a future period, depending on the impact of continuing developments on the value of our DMG business. Specifically, if DMG's fair value less the costs incurred in the sale of DMG falls below its carrying amount, we may need to recognize additional impairment charges on this business, and the amount of such charges, if any, could be significant. Our estimates of the fair value of this business rely on certain estimates and assumptions, including the terms and pricing agreed for the sale of this business, as well as applicable market multiples, discount and long-term growth rates, market data and future reimbursement rates, as applicable. Our estimates of the fair value of the DMG business could differ from the actual value that a market participant would pay for this business.

DMG's Medicare Advantage revenues may continue to be volatile in the future, which could have a material adverse impact on DMG's business, results of operations and financial condition.

The ACA contains a number of provisions that negatively impact Medicare Advantage plans, each of which could have a material adverse effect on DMG's business, results of operations and financial condition. These provisions include the following:

- Medicare Advantage benchmarks for 2011 were frozen at 2010 levels. From 2012 through 2016, Medicare Advantage benchmark rates were phased down from prior levels. The new benchmarks were fully phased-in in 2017 and range between 95% and 115% of the Medicare FFS costs, depending on a plan's geographic area. If our costs escalate faster than can be absorbed by the level of revenues implied by these benchmark rates, then it could have a material adverse effect on DMG's business and results of operations.

- Rebates received by Medicare Advantage plans that were reduced, with larger reductions for plans failing to receive certain quality ratings.

- The Secretary of the HHS has been granted the explicit authority to deny Medicare Advantage plan bids that propose significant increases in cost sharing or decreases in benefits. If the bids submitted by plans contracted with DMG are denied, this could have a material adverse effect on DMG's business and results of operations.

- Medicare Advantage plans with medical loss ratios below 85% are required to pay a rebate to the Secretary of HHS. The rebate amount is the total revenue under the contract year multiplied by the difference between 85% and the plan's actual medical loss ratio. The Secretary of HHS will halt enrollment in any plan failing to meet this ratio for three consecutive years, and terminate any plan failing to meet the ratio for five consecutive years. If a DMG-contracting Medicare Advantage plan experiences a limitation on enrollment or is otherwise terminated from the Medicare Advantage program, it could have a material adverse effect on DMG's business and results of operations.

- Prescription drug plans are required to provide coverage of certain drug categories on a list developed by the Secretary of HHS, which could increase the cost of providing care to Medicare Advantage enrollees, and thereby reduce DMG's revenues and earnings. The Medicare Part D premium amount subsidized for high-income beneficiaries has been reduced, which could lower the number of Medicare Advantage enrollees, which would have a negative impact on DMG's business and results of operations.

- CMS increased coding intensity adjustments for Medicare Advantage plans beginning in 2014 and continuing through 2018, which reduces CMS payments to Medicare Advantage plans, which in turn will likely reduce the amounts payable to DMG and its associated physicians, physician groups, and IPAs under its capitation agreements.

Recent legislative and executive efforts to enact further healthcare reform legislation have caused the future state of the exchanges, other ACA reforms, and many core aspects of the current U.S. health care system to be unclear. For example, in October 2017, the federal government announced that cost-sharing reduction payments to insurers would end, effective immediately, unless Congress appropriated the funds, and, in December 2017, Congress passed the Tax Cuts and Jobs Act, which includes a provision that eliminates the penalty under the ACA's individual mandate and could impact the future state of the exchanges. Further, in February 2018, Congress passed the BBA which, among other things, repealed the Independent Payment Advisory Board that was established by the ACA and intended to reduce the rate of growth in Medicare spending. While certain provisions of the BBA may increase the scope of benefits available for certain chronically ill Federal health care program beneficiaries beginning in 2020, the ultimate impact of such changes cannot be predicted. While specific changes and their timing are not yet apparent, enacted reforms and future legislative, regulatory, or executive changes could have a material adverse effect on DMG's business, results of operations and financial condition.

There is also uncertainty regarding both Medicare Advantage payment rates and beneficiary enrollment, which, if reduced, would reduce DMG's overall revenues and net income. For example, although the Congressional Budget Office (CBO) predicted in 2010 that Medicare Advantage participation would drop substantially by 2020, the CBO has more recently predicted, without taking into account potential future reforms, that enrollment in Medicare Advantage (and other contracts covering Medicare Parts A and B) could reach 31 million by 2027. Although Medicare Advantage enrollment increased by approximately 5.6 million, or by 50%, between the enactment of the ACA in 2010 and 2015, there can be no assurance that this trend will continue. Further, fluctuation in Medicare Advantage payment rates are evidenced by CMS's annual announcement of the expected average change in revenue from the prior year: for 2017, CMS announced an average increase of 0.85%; and for 2018, 0.45%. Uncertainty over Medicare Advantage enrollment and payment rates present a continuing risk to DMG's business.

According to the Kaiser Family Foundation (KFF), Medicare Advantage enrollment continues to be highly concentrated among a few payors, both nationally and in local regions. In 2017, the KFF reported that three payors together accounted for more than half of Medicare Advantage enrollment and eight firms accounted for approximately 75% of the lives. In 441 counties in 2018, only one company will offer Medicare Advantage plans. Consolidation among Medicare Advantage plans in certain regions, or the Medicare program's failure to attract additional plans to participate in the Medicare Advantage program, could have a material adverse effect on DMG's business, results of operations and financial condition.

DMG's operations are dependent on competing health plans and, at times, a health plan's and DMG's economic interests may diverge.

For the year ended December 31, 2017, 68% of DMG's consolidated capitated medical revenues were earned through contracts with three health plans.

DMG expects that, going forward, substantially all of its revenue will continue to be derived from its contracts with health plans. Each health plan may immediately terminate any of DMG's contracts and/or any individual credentialed physician upon the occurrence of certain events. They may also amend the material terms of the contracts under certain circumstances. Failure to maintain the contracts on favorable terms, for any reason, would materially and adversely affect DMG's results of operations and financial condition. A material decline in the number of members could also have a material adverse effect on DMG's results of operations.

Notwithstanding each health plan's and DMG's current shared interest in providing service to DMG's members who are enrolled in the subject health plans, the health plans may have different and, at times, opposing economic interests from those of DMG. The health plans provide a wide range of health insurance services across a wide range of geographic regions, utilizing a vast network of providers. As a result, they and DMG may have different views regarding the proper pricing of services and/or the proper pricing of the various service providers in their provider networks, the cost of which DMG bears to the extent that the services of such service providers are utilized. These health plans may also have different views than DMG regarding the efforts and expenditures that they, DMG, and/or other service providers should make to achieve and/or maintain various quality ratings. In addition, several health plans have acquired or announced their intent to acquire provider organizations. If health plans with which DMG contracts acquire a significant number of provider organizations, they may not continue to contract with DMG or contract on less favorable terms or seek to prevent DMG from acquiring or entering into arrangements with certain providers. Similarly, as a result of changes in laws, regulations, consumer preferences, or other factors, the health plans may find it in their best interest to provide health insurance services pursuant to another payment or reimbursement structure. In the event DMG's interests diverge from the interests of the health plans, DMG may have limited recourse or alternative options in light of its dependence on these health plans. There can be no assurances that DMG will continue to find it mutually beneficial to work with these health plans. As a result of various restrictive provisions that appear in some of the managed care agreements with health plans, DMG may at times have limitations on its ability to cancel an

agreement with a particular health plan and immediately thereafter contract with a competing health plan with respect to the same service area.

DMG and its associated physicians, physician groups and IPAs and other physicians may be required to continue providing services following termination or renegotiation of certain agreements with health plans.

There are circumstances under federal and state law pursuant to which DMG and its associated physician groups, IPAs and other physicians could be obligated to continue to provide medical services to DMG members in their care following a termination of their applicable risk agreement with health plans and termination of the receipt of payments thereunder. In certain cases, this obligation could require the physician group or IPA to provide care to such member following the bankruptcy or insolvency of a health plan. Accordingly, the obligations to provide medical services to DMG members (and the associated costs) may not terminate at the time the applicable agreement with the health plan terminates, and DMG may not be able to recover its cost of providing those services from the health plan, which could have a material adverse effect on DMG's business, results of operations and financial condition.

DMG operates primarily in California, Florida, Nevada, New Mexico, Washington and Colorado and may not be able to successfully establish a presence in new geographic regions.

DMG derives substantially all of its revenue from operations in California, Florida, Nevada, New Mexico, Washington and Colorado (which we refer to as the Existing Geographic Regions). As a result, DMG's exposure to many of the risks described herein is not mitigated by a greater diversification of geographic focus. Furthermore, due to the concentration of DMG's operations in the Existing Geographic Regions, it may be adversely affected by economic conditions, natural disasters (such as earthquakes or hurricanes), or acts of war or terrorism that disproportionately affect the Existing Geographic Regions as compared to other states and geographic markets.

To expand the operations of its network outside of the Existing Geographic Regions, DMG must devote resources to identify and explore perceived opportunities. Thereafter, DMG must, among other things, recruit and retain qualified personnel, develop new offices, establish potential new relationships with one or more health plans, and establish new relationships with physicians and other healthcare providers. The ability to establish such new relationships may be significantly inhibited by competition for such relationships and personnel in the healthcare marketplace in the targeted new geographic regions. Additionally, DMG may face the risk that a substantial portion of the patients served in a new geographic area may be enrolled in a Medicare FFS program and will not desire to transition to a Medicare Advantage program, such as those offered through the health plans that DMG serves, or they may enroll with other health plans with whom DMG does not contract to receive services, which could reduce substantially DMG's perceived opportunity in such geographic area. In addition, if DMG were to seek to expand outside of the Existing Geographic Regions, DMG would be required to comply with laws and regulations of states that may differ from the ones in which it currently operates, and could face competitors with greater knowledge of such local markets. DMG anticipates that any geographic expansion may require it to make a substantial investment of management time, capital and/or other resources. There can be no assurance that DMG will be able to establish profitable operations or relationships in any new geographic markets.

Reductions in the quality ratings of the health plans DMG serves could have a material adverse effect on its business, results of operations and financial condition.

As a result of the ACA, the level of reimbursement each health plan receives from CMS is dependent, in part, upon the quality rating of the Medicare plan. Such ratings impact the percentage of any cost savings rebate and any bonuses earned by such health plan. Since a significant portion of DMG's revenue is expected to be calculated as a percentage of CMS reimbursements received by these health plans with respect to DMG members, reductions in the quality ratings of a health plan that DMG serves could have a material adverse effect on its business, results of operations and financial condition.

Given each health plan's control of its plans and the many other providers that serve such plans, DMG believes that it will have limited ability to influence the overall quality rating of any such plan. The BBA passed in February 2018 implements certain changes to prevent artificial inflation of star ratings for Medicare Advantage plans offered by the same organization. In addition, CMS has terminated plans that have had a rating of less than three stars for three consecutive years, whereas Medicare Advantage plans with five stars are permitted to conduct enrollment throughout almost the entire year. Although CMS' authority to terminate plans solely for failing to achieve the minimum quality star ratings has been suspended through the end of plan year 2018, low quality ratings can still potentially lead to the termination of a plan that DMG serves, DMG may not be able to prevent the potential termination of a contracting plan or a shift of patients to other plans based upon quality issues which could, in turn, have a material adverse effect on DMG's business, results of operations and financial condition.

DMG's records and submissions to a health plan may contain inaccurate or unsupportable information regarding risk adjustment scores of members, which could cause DMG to overstate or understate its revenue and subject it to various penalties.

DMG, on behalf of itself and its associated physicians, physician groups and IPAs, submits to health plans claims and encounter data that support the Medicare Risk Adjustment Factor (RAF) scores attributable to members. These RAF scores determine, in part, the revenue to which the health plans and, in turn, DMG is entitled for the provision of medical care to such members. The data submitted to CMS by each health plan is based, in part, on medical charts and diagnosis codes prepared and submitted by DMG. Each health plan generally relies on DMG and its employed or affiliated physicians to appropriately document and support such RAF data in DMG's medical records. Each health plan also relies on DMG and its employed or affiliated physicians to appropriately code claims for medical services provided to members. Erroneous claims and erroneous encounter records and submissions could result in inaccurate PMPM fee revenue and risk adjustment payments, which may be subject to correction or retroactive adjustment in later periods. This corrected or adjusted information may be reflected in financial statements for periods subsequent to the period in which the revenue was recorded. DMG might also need to refund a portion of the revenue that it received, which refund, depending on its magnitude, could damage its relationship with the applicable health plan and could have a material adverse effect on DMG's business, results of operations and financial condition.

In June 2015, we received a subpoena from the OIG requesting information relating to our and our subsidiaries' (including DMG's and its subsidiary JSA's) provision of services to Medicare Advantage plans and related patient diagnosis coding and risk adjustment submissions and payments. See "Item 3. Legal Proceedings" in Part I of this report and Note 16 to the consolidated financial statements included in this report for further details and discussions of legal proceedings elsewhere in these Risk Factors.

Additionally, CMS audits Medicare Advantage plans for documentation to support RAF-related payments for members chosen at random. The Medicare Advantage plans ask providers to submit the underlying documentation for members that they serve. It is possible that claims associated with members with higher RAF scores could be subject to more scrutiny in a CMS or plan audit. There is a possibility that a Medicare Advantage plan may seek repayment from DMG should CMS make any payment adjustments to the Medicare Advantage plan as a result of its audits. The plans also may hold DMG liable for any penalties owed to CMS for inaccurate or unsupportable RAF scores provided by DMG. In addition, DMG could be liable for penalties to the government under the FCA that range from $5,500 to $11,000 (adjusted for inflation) for each false claim, plus up to three times the amount of damages caused by each false claim, which can be as much as the amounts received directly or indirectly from the government for each such false claim. On February 3, 2017, the DOJ issued a final rule announcing adjustments to FCA penalties, under which the per claim penalty range increases from $10,957 to $21,916 for penalties assessed after February 3, 2017, so long as the underlying conduct occurred after November 2, 2015.

CMS has indicated that payment adjustments will not be limited to RAF scores for the specific Medicare Advantage enrollees for which errors are found but may also be extrapolated to the entire Medicare Advantage plan subject to a particular CMS contract. CMS has described its audit process as plan-year specific and stated that it will not extrapolate audit results for plan years prior to 2011. Because CMS has not stated otherwise, there is a risk that payment adjustments made as a result of one plan year's audit would be extrapolated to prior plan years after 2011.

There can be no assurance that a health plan will not be randomly selected or targeted for review by CMS or that the outcome of such a review will not result in a material adjustment in DMG's revenue and profitability, even if the information DMG submitted to the plan is accurate and supportable.

Separately, as described in further detail in "Item 3. Legal Proceedings" in Part I of this report and Note 16 to the consolidated financial statements included in this report, on March 13, 2015, JSA, a subsidiary of DMG, received a subpoena from the OIG that relates, in part, to risk adjustment practices and data. See also discussions of legal proceedings elsewhere in these Risk Factors.

A failure to accurately estimate incurred but not reported medical expense could adversely affect DMG's results of operations.

Patient care costs include estimates of future medical claims that have been incurred by the patient but for which the provider has not yet billed DMG. These claim estimates are made utilizing actuarial methods and are continually evaluated and adjusted by management, based upon DMG's historical claims experience and other factors, including an independent assessment by a nationally recognized actuarial firm. Adjustments, if necessary, are made to medical claims expense and capitated revenues when the assumptions used to determine DMG's claims liability changes and when actual claim costs are ultimately determined.

Due to the inherent uncertainties associated with the factors used in these estimates and changes in the patterns and rates of medical utilization, materially different amounts could be reported in DMG's financial statements for a particular period under different conditions or using different, but still reasonable, assumptions. It is possible that DMG's estimates of this type of claim may be inadequate in the future. In such event, DMG's results of operations could be adversely impacted. Further, the inability to estimate these claims accurately may also affect DMG's ability to take timely corrective actions, further exacerbating the extent of any adverse effect on DMG's results of operations.

DMG faces certain competitive threats which could reduce DMG's profitability and increase competition for patients.

DMG faces certain competitive threats based on certain features of the Medicare programs, including the following:

- As a result of the direct and indirect impacts of the ACA, many Medicare beneficiaries may decide that an original Medicare FFS program is more attractive than a Medicare Advantage plan. As a result, enrollment in the health plans DMG serves may decrease.
- Managed care companies offer alternative products such as regional preferred provider organizations (PPOs) and private FFS plans. Medicare PPOs and private FFS plans allow their patients more flexibility in selecting physicians than Medicare Advantage health plans, which typically require patients to coordinate care with a primary care physician. The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 has encouraged the creation of regional PPOs through various incentives, including certain risk corridors, or cost reimbursement provisions, a stabilization fund for incentive payments, and special payments to hospitals not otherwise contracted with a Medicare Advantage plan that treat regional plan enrollees. The formation of regional Medicare PPOs and private FFS plans may affect DMG's relative attractiveness to existing and potential Medicare patients in their service areas.
- The payments for the local and regional Medicare Advantage plans are based on a competitive bidding process that may indirectly cause a decrease in the amount of the PMPM fee or result in an increase in benefits offered.
- The annual enrollment process and subsequent lock-in provisions of the ACA may adversely affect DMG's level of revenue growth as it will limit the ability of a health plan to market to and enroll new Medicare beneficiaries in its established service areas outside of the annual enrollment period.
- CMS allows Medicare beneficiaries who are enrolled in a Medicare Advantage plan with a quality rating of 4.5 stars or less to enroll in a 5-star rated Medicare Advantage plan at any time during the benefit year. Therefore, DMG may face a competitive disadvantage in recruiting and retaining Medicare beneficiaries.

In addition to the competitive threats intrinsic to the Medicare programs, competition among health plans and among healthcare providers may also have a negative impact on DMG's profitability. For example, due to the large population of Medicare beneficiaries, DMG's Existing Geographic Regions have become increasingly attractive to health plans that may compete with DMG. DMG may not be able to continue to compete profitably in the healthcare industry if additional competitors enter the same market. If DMG cannot compete profitably, the ability of DMG to compete with other service providers that contract with competing health plans may be substantially impaired. Furthermore, if DMG is unable to obtain new members or experiences a loss of existing members to competitors during the open enrollment period for Medicare it could have a material adverse effect on DMG's business, results of operations and financial condition.

DMG competes directly with various regional and local companies that provide similar services in DMG's Existing Geographic Regions. DMG's competitors vary in size and scope and in terms of products and services offered. DMG believes that some of its competitors and potential competitors may be significantly larger than DMG and have greater financial, sales, marketing and other resources. Furthermore, it is DMG's belief that some of its competitors may make strategic acquisitions or establish cooperative relationships among themselves.

A disruption in DMG's healthcare provider networks could have a material adverse effect on DMG's operations and profitability.

In any particular service area, healthcare providers or provider networks could refuse to contract with DMG, demand higher payments, or take other actions that could result in higher healthcare costs, disruption of benefits to DMG's members, or difficulty in meeting applicable regulatory or accreditation requirements. In some service areas, healthcare providers or provider networks may have significant market positions. If healthcare providers or provider networks refuse to contract with DMG, use their market position to negotiate favorable contracts, or place DMG at a competitive disadvantage, then DMG's ability to market or to be profitable in those service areas could be adversely affected. DMG's provider networks could also be

disrupted by the financial insolvency of a large provider group. Any disruption in DMG's provider networks could result in a loss of members or higher healthcare costs.

DMG's revenues and profits could be diminished if DMG fails to retain and attract the services of key primary care physicians.

Key primary care physicians with large patient enrollment could retire, become disabled, terminate their provider contracts, get lured away by a competing independent physician association or medical group, or otherwise become unable or unwilling to continue practicing medicine or contracting with DMG or its associated physicians, physician groups or IPAs. In addition, DMG's associated physicians, physician groups and IPAs could view the business model as unfavorable or unattractive to such providers, which could cause such associated physicians, physician groups or IPAs to terminate their relationships with DMG. Moreover, given limitations relating to the enforcement of post-termination noncompetition covenants in California, it would be difficult to restrict a primary care physician from competing with DMG's associated physicians, physician groups or IPAs. As a result, members who have been served by such physicians could choose to enroll with competitors' physician organizations or could seek medical care elsewhere, which could reduce DMG's revenues and profits. Moreover, DMG may not be able to attract new physicians to replace the services of terminating physicians or to service its growing membership.

Participation in ACO programs is subject to federal regulation, supervision, and evolving regulatory developments that may result in financial liability.

The ACA established the Medicare Shared Savings Program (MSSP) for ACOs, which took effect in January 2012. Under the MSSP, eligible organizations are accountable for the quality, cost and overall care of Medicare beneficiaries assigned to an ACO and may be eligible to share in any savings below a specified benchmark amount. The Secretary of HHS is also authorized, but not required, to use capitation payment models with ACOs. DMG has formed an MSSP ACO through a subsidiary, which operates in California, Florida, and Nevada and is evaluating whether to participate in more ACOs in the future. The continued development and expansion of ACOs will have an uncertain impact on DMG's revenue and profitability. DaVita Kidney Care is also participating as a dialysis provider in Arizona, Florida, New Jersey, and Pennsylvania for the Innovation Center's CEC Model.

The ACO programs are relatively new and therefore operational and regulatory guidance is limited. It is possible that the operations of DMG's subsidiary ACO may not fully comply with current or future regulations and guidelines applicable to ACOs, may not achieve quality targets or cost savings, or may not attract or retain sufficient physicians or patients to allow DMG to meet its objectives. Additionally, poor performance could put the DMG ACO at financial risk with a potential obligation to CMS. Traditionally, other than fee-for-service billing by the medical clinics and healthcare facilities operated by DMG, DMG has not directly contracted with CMS and has not operated any health plans or provider sponsored networks. Therefore, DMG may not have the necessary experience, systems or compliance to successfully achieve a positive return on its investment in the ACO or to avoid financial or regulatory liability. DMG believes that its historical experience with fully delegated managed care will be applicable to operation of its subsidiary ACO, but there can be no such assurance.

California hospitals may terminate their agreements with HealthCare Partners Affiliates Medical Group and DaVita Health Plan of California, Inc. (formerly HealthCare Partners Plan, Inc., and, together with HealthCare Partners Affiliates Medical Group (AMG)) or reduce the fees they pay to DMG.

In California, AMG maintains significant hospital arrangements designed to facilitate the provision of coordinated hospital care with those services provided to members by AMG and its associated physicians, physician groups and IPAs. Through contractual arrangements with certain key hospitals, AMG provides utilization review, quality assurance and other management services related to the provision of patient care services to members by the contracted hospitals and downstream hospital contractors. In the event that any one of these key hospital agreements is amended in a financially unfavorable manner or is otherwise terminated, such events could have a material adverse effect on DMG's business, results of operations and financial condition.

DMG's professional liability and other insurance coverage may not be adequate to cover DMG's potential liabilities.

DMG maintains primary professional liability insurance and other insurance coverage through California Medical Group Insurance Company, Risk Retention Group, an Arizona corporation in which DMG is the majority owner, and through excess coverage contracted through third-party insurers. DMG believes such insurance is adequate based on its review of what it believes to be all applicable factors, including industry standards. Nonetheless, potential liabilities may not be covered by insurance, insurers may dispute coverage or may be unable to meet their obligations, the amount of insurance coverage and/or related reserves may be inadequate, or the amount of any DMG self-insured retention may be substantial. There can be no

assurances that DMG will be able to obtain insurance coverage in the future, or that insurance will continue to be available on a cost-effective basis, if at all. Moreover, even if claims brought against DMG are unsuccessful or without merit, DMG would have to defend itself against such claims. The defense of any such actions may be time-consuming and costly and may distract DMG management's attention. As a result, DMG may incur significant expenses and may be unable to effectively operate its business.

Changes in the rates or methods of third-party reimbursements may materially adversely affect DMG business, results of operations and financial condition.

Any negative changes in governmental capitation or FFS rates or methods of reimbursement for the services DMG provides could have a material adverse effect on DMG's business, results of operations and financial condition. Since governmental healthcare programs generally reimburse on a fee schedule basis rather than on a charge-related basis, DMG generally cannot increase its revenues from these programs by increasing the amount it charges for its services. Moreover, if DMG's costs increase, DMG may not be able to recover its increased costs from these programs. Government and private payors have taken and may continue to take steps to control the cost, eligibility for, use, and delivery of healthcare services due to budgetary constraints, and cost containment pressures as well as other financial issues. DMG believes that these trends in cost containment will continue. These cost containment measures, and other market changes in non-governmental insurance plans have generally restricted DMG's ability to recover, or shift to non-governmental payors, any increased costs that DMG experiences. DMG's business, results of operations and financial condition may be materially adversely affected by these cost containment measures, and other market changes.

DMG's business model depends on numerous complex management information systems and any failure to successfully maintain these systems or implement new systems could materially harm DMG's operations and result in potential violations of healthcare laws and regulations.

DMG depends on a complex, specialized, and integrated management information system and standardized procedures for operational and financial information, as well as for DMG's billing operations. DMG may experience unanticipated delays, complications or expenses in implementing, integrating, and operating these integrated systems. Moreover, DMG may be unable to enhance its existing management information system or implement new management information systems where necessary. DMG's management information system may require modifications, improvements or replacements that may require both substantial expenditures as well as interruptions in operations. DMG's ability to implement and operate its integrated systems is subject to the availability of information technology and skilled personnel to assist DMG in creating and maintaining these systems.

DMG's failure to successfully implement and maintain all of its systems could have a material adverse effect on its business, financial condition and results of operations. For example, DMG's failure to successfully operate its billing systems could lead to potential violations of healthcare laws and regulations. If DMG is unable to handle its claims volume, or if DMG is unable to pay claims timely, DMG may become subject to a health plan's corrective action plan or de-delegation until the problem is corrected, and/or termination of the health plan's agreement with DMG. This could have a material adverse effect on DMG's operations and profitability. In addition, if DMG's claims processing system is unable to process claims accurately, the data DMG uses for its incurred but not reported (IBNR) estimates could be incomplete and DMG's ability to accurately estimate claims liabilities and establish adequate reserves could be adversely affected. Finally, if DMG's management information systems are unable to function in compliance with applicable state or federal rules and regulations, including medical information confidentiality laws such as HIPAA, possible penalties and fines due to this lack of compliance could have a material adverse effect on DMG's financial condition, and results of operations.

DMG may be impacted by eligibility changes to government and private insurance programs.

Due to potential decreased availability of healthcare through private employers, the number of patients who are uninsured or participate in governmental programs may increase. The ACA has increased the participation of individuals in the Medicaid program in states that elected to participate in the expanded Medicaid coverage. A shift in payor mix from managed care and other private payors to government payors as well as an increase in the number of uninsured patients may result in a reduction in the rates of reimbursement to DMG or an increase in uncollectible receivables or uncompensated care, with a corresponding decrease in net revenue. Changes in the eligibility requirements for governmental programs such as the Medicaid program under the ACA and state decisions on whether to participate in the expansion of such programs also could increase the number of patients who participate in such programs and the number of uninsured patients. Even for those patients who remain in private insurance plans, changes to those plans could increase patient financial responsibility, resulting in a greater risk of uncollectible receivables. These factors and events could have a material adverse effect on DMG's business, results of operations and financial condition.

Negative publicity regarding the managed healthcare industry generally or DMG in particular could adversely affect DMG's results of operations or business.

Negative publicity regarding the managed healthcare industry generally, the Medicare Advantage program or DMG in particular, may result in increased regulation and legislative review of industry practices that further increase DMG's costs of doing business and adversely affect DMG's results of operations or business by:

- requiring DMG to change its products and services;
- increasing the regulatory, including compliance, burdens under which DMG operates, which, in turn, may negatively impact the manner in which DMG provides services and increase DMG's costs of providing services;
- adversely affecting DMG's ability to market its products or services through the imposition of further regulatory restrictions regarding the manner in which plans and providers market to Medicare Advantage enrollees; or
- adversely affecting DMG's ability to attract and retain members.

Risk factors related to ownership of our common stock:

Provisions in our charter documents, compensation programs and Delaware law may deter a change of control that our stockholders would otherwise determine to be in their best interests.

Our charter documents include provisions that may deter hostile takeovers, delay or prevent changes of control or changes in our management, or limit the ability of our stockholders to approve transactions that they may otherwise determine to be in their best interests. These include provisions prohibiting our stockholders from acting by written consent; requiring 90 days advance notice of stockholder proposals or nominations to our Board of Directors (or 120 days for nominations made using proxy access); and granting our Board of Directors the authority to issue preferred stock and to determine the rights and preferences of the preferred stock without the need for further stockholder approval.

Most of our outstanding employee stock-based compensation awards include a provision accelerating the vesting of the awards in the event of a change of control. We also maintain a change of control protection program for our employees who do not have a significant number of stock awards, which has been in place since 2001, and which provides for cash bonuses to the employees in the event of a change of control. Based on the market price of our common stock and shares outstanding on December 31, 2017, these cash bonuses would total approximately $521 million if a change of control transaction occurred at that price and our Board of Directors did not modify this program. These change of control provisions may affect the price an acquirer would be willing to pay for our Company.

We are also subject to Section 203 of the Delaware General Corporation Law that, subject to exceptions, would prohibit us from engaging in any business combinations with any interested stockholder, as defined in that section, for a period of three years following the date on which that stockholder became an interested stockholder.

These provisions may discourage, delay or prevent an acquisition of our Company at a price that our stockholders may find attractive. These provisions could also make it more difficult for our stockholders to elect directors and take other corporate actions and could limit the price that investors might be willing to pay for shares of our common stock.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Our corporate headquarters are located in Denver, Colorado, consisting of one owned 240,000 square foot building and two leased locations consisting of 164,800 square feet. Our headquarters are occupied by teammates engaged in management, finance, marketing, strategy, legal, compliance and other administrative functions. We lease six business offices located in California, Pennsylvania, Tennessee and Washington for our U.S. dialysis and related lab services business. For our DMG business we lease nine business offices located in California, Colorado, Nevada, New Mexico, Florida and Washington. Our laboratories are based in Florida where we operate our lab services out of five buildings, one owned and four leased. DaVita Rx leases three buildings located in California, Florida and Texas. We also own four administrative offices and lease administrative offices worldwide. Our leases on the properties listed above expire at various dates through the year 2036 for Kidney Care and through the year 2037 for DMG.

For our U.S. dialysis and related lab services business we own the land and buildings for 14 of our outpatient dialysis centers. We also own 14 separate land and buildings and seven land parcels for development. We lease a total of four owned properties to third-party tenants. Our remaining outpatient dialysis centers are located on premises that we lease.

For DMG, we own the land and buildings for 23 of our clinics. We also own one separate land parcel. Our remaining clinics are located on premises that we lease.

Our leases for our U.S. dialysis and related lab services and for DMG generally cover periods from five to 20 years and typically contain renewal options of five to ten years at the fair rental value at the time of renewal. Our leases are generally subject to periodic consumer price index increases, or contain fixed escalation clauses. Our outpatient dialysis centers range in size from approximately 700 to 33,000 square feet, with an average size of approximately 7,600 square feet. DMG's clinics range in size from approximately 1,000 to 136,000 square feet, with an average size of approximately 10,200 square feet. Our international leases generally range from one to ten years.

Some of our outpatient dialysis centers are operating at or near capacity. However, we believe that we have adequate capacity within most of our existing dialysis centers to accommodate additional patient volume through increased hours and/or days of operation, or, if additional space is available within an existing facility, by adding dialysis stations. We can usually relocate existing centers to larger facilities or open new centers if existing centers reach capacity. With respect to relocating centers or building new centers, we believe that we can generally lease space at economically reasonable rates in the areas planned for each of these centers, although there can be no assurances in this regard. Expansion of existing centers or relocation of our dialysis centers is subject to review for compliance with conditions relating to participation in the Medicare ESRD program. In states that require a certificate of need or center license, additional approvals would generally be necessary for expansion or relocation.

Item 3. Legal Proceedings.

We operate in a highly regulated industry and are a party to various lawsuits, claims, *qui tam* suits, governmental investigations and audits (including investigations resulting from our obligation to self-report suspected violations of law) and other legal proceedings. We record accruals for certain legal proceedings and regulatory matters to the extent that we determine an unfavorable outcome is probable and the amount of the loss can be reasonably estimated. As of December 31, 2017 and December 31, 2016, our total recorded accruals, including DMG, with respect to legal proceedings and regulatory matters, net of anticipated third party recoveries, were approximately $6 million and $69 million, respectively. While these accruals reflect our best estimate of the probable loss for those matters as of the dates of those accruals, the recorded amounts may differ materially from the actual amount of the losses for those matters, and any anticipated third party recoveries for any such losses may not ultimately be recoverable. Additionally, in some cases, no estimate of the possible loss or range of loss in excess of amounts accrued, if any, can be made because of the inherently unpredictable nature of legal proceedings and regulatory matters, which also may be impacted by various factors, including that they may involve indeterminate claims for monetary damages or may involve fines, penalties or non-monetary remedies; present novel legal theories or legal uncertainties; involve disputed facts; represent a shift in regulatory policy; are in the early stages of the proceedings; or result in a change of business practices. Further, there may be various levels of judicial review available to us in connection with any such proceeding.

The following is a description of certain lawsuits, claims, governmental investigations and audits and other legal proceedings to which we are subject.

Inquiries by the Federal Government and Certain Related Civil Proceedings

Swoben Private Civil Suit: On July 13, 2009, pursuant to the *qui tam* provisions of the federal FCA and the California False Claims Act, James M. Swoben, as relator, filed his initial *qui tam* action in the United States District Court for the Central District of California purportedly on behalf of the United States of America and the State of California against SCAN, and certain other defendants whose identities were under seal. In April 2013, HealthCare Partners (HCP), now known as our DMG subsidiary, was one of several defendants served with a civil complaint filed by a former employee of SCAN Health Plan (SCAN), an HMO. The allegations in the complaint relate to alleged overpayments received from government healthcare programs, including allegations of violations of the federal FCA and the California False Claims Act and allegations against HCP relating to patient diagnosis coding. The complaint sought monetary damages and civil penalties as well as costs and expenses. On October 18, 2017, the relator filed a Notice of Dismissal of the action as to HCP, and the government consented to the dismissal, as a result of which the suit is now dismissed, without prejudice.

2015 U.S. Office of Inspector General (OIG) Medicare Advantage Civil Investigation: In March 2015, JSA HealthCare Corporation (JSA), a subsidiary of DMG, received a subpoena from the Office of Inspector General (OIG) for the U.S. Department of Health and Human Services (HHS) requesting documents and information for the period from January 1, 2008

through December 31, 2013, for certain Medicare Advantage (MA) plans for which JSA provided services. It also requests information regarding JSA's communications about patient diagnoses as they relate to certain MA plans generally, and more specifically as related to two Florida physicians with whom JSA previously contracted. We are producing the requested information and are cooperating with the government's investigation.

In addition to the subpoena described above, in June 2015, we received a civil subpoena from the OIG covering the period from January 1, 2008 through the present and seeking production of a wide range of documents relating to our and our subsidiaries' (including DMG's and its subsidiary JSA's) provision of services to MA plans and related patient diagnosis coding and risk adjustment submissions and payments. We believe that the request is part of a broader industry investigation into MA patient diagnosis coding and risk adjustment practices and potential overpayments by the government. The information requested includes information relating to patient diagnosis coding practices for a number of conditions, including potentially improper historical DMG coding for a particular condition. With respect to that condition, the guidance related to that coding issue was discontinued following our November 1, 2012 acquisition of HealthCare Partners (now known as our DMG business), and we notified CMS in April 2015 of the coding practice and potential overpayments. In that regard, we have identified certain additional coding practices which may have been problematic, some of which were the subject of the *Swoben Private Civil Suit*, and are in discussions with the DOJ relating to those practices. We are cooperating with the government. In addition, we are continuing to review other DMG coding practices to determine whether there were any improper coding issues. In connection with our acquisition of DMG in 2012, we have certain indemnification rights against the sellers and an escrow was established as security for the indemnification. We have submitted an indemnification claim against the sellers secured by the escrow for any and all liabilities incurred relating to these matters and intend to pursue recovery from the escrow. However, we can make no assurances that the indemnification and escrow will cover the full amount of our potential losses related to these matters.

2016 U.S. Attorney Prescription Drug Investigation: In early February 2016, we announced that our pharmacy services' wholly-owned subsidiary, DaVita Rx, received a Civil Investigative Demand (CID) from the U.S. Attorney's Office for the Northern District of Texas. The government is conducting an FCA investigation concerning allegations that DaVita Rx presented or caused to be presented false claims for payment to the government for prescription medications, as well as into our relationship with pharmaceutical manufacturers. The CID covers the period from January 1, 2006 through the present. In the spring of 2015, we initiated an internal compliance review of DaVita Rx during which we identified potential billing and operational issues, including potential write-offs and discounts of patient co-payment obligations, and credits to payors for returns of prescription drugs related to DaVita Rx. We notified the government in September 2015 that we were conducting this review of DaVita Rx and began providing regular updates of our review. Upon completion of our review, we filed a self-disclosure with the OIG in February 2016 and we have been working to address and update the practices we identified in the self-disclosure, some of which overlap with information requested by the U.S. Attorney's Office. The OIG informed us in February 2016 that our submission was not accepted. They indicated that the OIG is not expressing an opinion regarding the conduct disclosed or our legal positions. In connection with our ongoing efforts working with the government we learned that a *qui tam* complaint had been filed covering some of the issues in the CID and our self-disclosure. In December 2017, we finalized and executed a settlement agreement with the government and relators in the *qui tam* matter that included total monetary consideration of $63.7 million, as previously announced, of which $41.5 million was an incremental cash payment and $21.2 million was for amounts previously refunded, and all of which was previously accrued. The government's investigation into our relationship with pharmaceutical manufacturers is ongoing and we are continuing to cooperate with the government in this investigation.

2017 U.S. Attorney American Kidney Fund Investigation: On January 4, 2017, we were served with an administrative subpoena for records by the United States Attorney's Office, District of Massachusetts, relating to an investigation into possible federal health care offenses. The subpoena covers the period from January 1, 2007 through the present, and seeks documents relevant to charitable patient assistance organizations, particularly the American Kidney Fund, including documents related to efforts to provide patients with information concerning the availability of charitable assistance. We are cooperating with the government and are producing the requested information.

Although we cannot predict whether or when proceedings might be initiated or when these matters may be resolved (other than as described above), it is not unusual for inquiries such as these to continue for a considerable period of time through the various phases of document and witness requests and on-going discussions with regulators. In addition to the inquiries and proceedings specifically identified above, we are frequently subject to other inquiries by state or federal government agencies and/or private civil *qui tam* complaints filed by relators. Negative findings or terms and conditions that we might agree to accept as part of a negotiated resolution of pending or future government inquiries or relator proceedings could result in, among other things, substantial financial penalties or awards against us, substantial payments made by us, harm to our reputation, required changes to our business practices, exclusion from future participation in the Medicare, Medicaid and

other federal health care programs and, if criminal proceedings were initiated against us, possible criminal penalties, any of which could have a material adverse effect on us.

Shareholder Claims

Peace Officers' Annuity and Benefit Fund of Georgia Securities Class Action Civil Suit: On February 1, 2017, the Peace Officers' Annuity and Benefit Fund of Georgia filed a putative federal securities class action complaint in the U.S. District Court for the District of Colorado against us and certain executives. The complaint covers the time period of August 2015 to October 2016 and alleges, generally, that we and our executives violated federal securities laws concerning our financial results and revenue derived from patients who received charitable premium assistance from an industry-funded non-profit organization. The complaint further alleges that the process by which patients obtained commercial insurance and received charitable premium assistance was improper and "created a false impression of DaVita's business and operational status and future growth prospects." In November 2017, the court appointed the lead plaintiff and an amended complaint was filed on January 12, 2018. Our response is due March 13, 2018. We dispute these allegations and intend to defend this action accordingly.

In re DaVita Inc. Stockholder Derivative Litigation: On August 15, 2017, the U.S. District Court for the District of Delaware consolidated the three previously disclosed shareholder derivative lawsuits: the Blackburn Shareholder action filed on February 10, 2017, the Gabilondo Shareholder action filed on May 30, 2017, and the City of Warren Police and Fire Retirement System Shareholder action filed on June 9, 2017. The complaint covers the time period from 2015 to present and alleges, generally, breach of fiduciary duty, unjust enrichment, abuse of control, gross mismanagement, corporate waste, and misrepresentations and/or failures to disclose certain information in violation of the federal securities laws in connection with an alleged practice to direct patients with government-subsidized health insurance into private health insurance plans to maximize our profits. An amended complaint was filed in September 2017, and on December 18, 2017 we filed a motion to dismiss and a motion to stay proceedings in the alternative. We dispute these allegations and intend to defend this action accordingly.

Other Proceedings

In addition to the foregoing, from time to time we are subject to other lawsuits, demands, claims, governmental investigations and audits and legal proceedings that arise due to the nature of our business, including contractual disputes, such as with payors, suppliers and others, employee-related matters and professional and general liability claims. From time to time, we also initiate litigation or other legal proceedings as a plaintiff arising out of contracts or other matters.

* * *

Other than as described above, we cannot predict the ultimate outcomes of the various legal proceedings and regulatory matters to which we are or may be subject from time to time, including those described in this "Item 3. Legal Proceedings" in Part I of this report or the timing of their resolution or the ultimate losses or impact of developments in those matters, which could have a material adverse effect on our revenues, earnings and cash flows. Further, any legal proceedings or regulatory matters we are involved in, whether meritorious or not, are time consuming, and often require management's attention and result in significant legal expense, and may result in the diversion of significant operational resources, or otherwise harm our business, financial results or reputation.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Our common stock is traded on the New York Stock Exchange under the symbol DVA. The following table sets forth, for the periods indicated, the high and low sales prices for our common stock as reported by the New York Stock Exchange.

	High	Low
Year ended December 31, 2017:		
1st quarter	$ 70.14	$ 62.24
2nd quarter	70.16	61.48
3rd quarter	66.64	55.59
4th quarter	72.93	52.51
Year ended December 31, 2016:		
1st quarter	$ 74.18	$ 61.36
2nd quarter	78.00	72.31
3rd quarter	78.77	62.76
4th quarter	67.44	54.50

The closing price of our common stock on January 31, 2018 was $78.04 per share. According to Computershare, our registrar and transfer agent, as of January 31, 2018, there were 9,207 holders of record of our common stock. We have not declared or paid cash dividends to holders of our common stock since 1994. We have no current plans to pay cash dividends and we are restricted from paying dividends under the terms of our senior secured credit facilities and the indentures governing our senior notes. See "Liquidity and capital resources" under "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and the notes to our consolidated financial statements.

Stock Repurchases

The following table summarizes our repurchases of our common stock during the fourth quarter of 2017:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs[1]	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (in millions)
October 1 - October 31, 2017	5,457,839	$ 59.90	5,457,839	$ 1,254.3
November 1 - November 30, 2017	431,645	$ 60.10	431,645	$ 1,228.4
December 1 - December 31, 2017	1,520,365	$ 71.87	1,520,365	$ 1,119.1
Total	7,409,849	$ 62.37	7,409,849	$ 1,119.1

(1) On October 10, 2017, our Board of Directors approved an additional share repurchase authorization in the amount of $1.3 billion. This share repurchase authorization was in addition to the $247 million remaining at that time under our Board of Directors' prior share repurchase authorization announced in July 2016. We are authorized to make purchases from time to time in the open market or in privately negotiated transactions, including without limitations, through accelerated share repurchase transactions, derivative transactions, tender offers, Rule 10b5-1 plans or any combination of the foregoing, depending upon market conditions and other considerations. During the quarter ended December 31, 2017, we repurchased a total of 7,409,849 shares of our common stock for approximately $462 million at an average price of $62.37 per share. As of February 22, 2018, we have a total of $1.0 billion remaining in Board authorizations available for share repurchases under our repurchase programs. Although these share repurchase authorizations have no expiration dates, we are subject to share repurchase limitations under the terms of our senior secured credit facilities and the indentures governing our senior notes.

Item 6. Selected Financial Data.

The following financial and operating data should be read in conjunction with "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements filed as part of this report. The following table presents selected consolidated financial and operating data for the periods indicated.

	Year ended December 31,				
	2017	2016	2015	2014	2013
	(in thousands, except share data)				
Income statement data:					
Net revenues	$ 10,876,634	$ 10,707,467	$ 9,982,245	$ 9,312,049	$ 8,580,225
Operating expenses and charges[2]	9,063,879	8,677,757	8,845,479	7,711,891	7,464,599
Operating income	1,812,755	2,029,710	1,136,766	1,600,158	1,115,626

Total assets[1]	$ 18,948,193	$ 18,755,776	$ 18,524,224	$ 17,624,137	$ 16,614,893
Long-term debt[1]	$ 9,158,018	$ 8,944,676	$ 12,972,282	$ 8,298,624	$ 8,064,196
Total DaVita Inc. shareholders' equity[5]	$ 4,690,029	$ 4,648,047	$ 4,870,781	$ 5,170,513	$ 4,432,480

(1) In 2015, we retrospectively adopted ASU 2015-03 related to simplification of debt issuance costs as well as ASU 2015-17 related to classification of deferred taxes. All periods prior to 2015 have been recast to conform to the revised presentation.

(2) Operating expenses and charges in 2017 includes goodwill impairment charges of $34,696 related to our vascular access reporting unit, an equity investment loss of $6,293 for goodwill impairments at our APAC JV, an impairment on our investment in the APAC JV of $280,066, an asset impairment of $15,168 related to the restructuring of our pharmacy business, restructuring charges related to our international business of $2,700, a net gain on settlement of $529,504 and a gain adjustment on the 2016 ownership change of our APAC JV of $6,273. Operating expenses and charges in 2016 included goodwill impairment charges of $28,415 related to our vascular access reporting unit, an impairment of an investment of $14,993, an estimated gain on the ownership change of our APAC JV of $374,374, and an estimated accrual for certain legal matters of $15,770. Operating expenses and charges for 2015 included a settlement charge of $495,000 related to a private civil suit, goodwill impairment charges of $4,066 related to our international business, and an estimated accrual for certain legal matters of $22,530. Operating expenses and charges in 2014 and 2013 included an additional $17,000 and $397,000 loss contingency accrual related to the settlement of the 2010 and 2011 U.S. Attorney physician relationship investigations, respectively.

(3) Tax expense includes a net tax benefit of $251,510 related to U.S. tax legislation passed in December 2017.

(4) On December 5, 2017, we entered into an equity purchase agreement to sell our DMG division to Collaborative Care Holdings, LLC (Optum), a subsidiary of UnitedHealth Group Inc. As a result of this pending transaction, the DMG business has been reclassified as held for sale and its results of operations are reported as net (loss) income from discontinued operations, net of tax for all periods presented. Net (loss) income from discontinued operations, net of tax, also includes HomeChoice Partners Inc. (HomeChoice) which was divested on February 1, 2013. Net (loss) income from discontinued operations, net of tax, in 2017 includes estimated goodwill impairment charges of $651,659 related to certain DMG reporting units, a net tax benefit of $163,555 due to a remeasurement of deferred taxes resulting from DMG's reclassification to held for sale, a non-cash gain associated with our Magan acquisition of $17,129, restructuring charges of $9,569, and a reduction in estimated accruals for legal matters of $14,700. Net (loss) income from discontinued operations, net of tax, in 2016 included goodwill impairment charges of $253,000 related to certain DMG reporting units, a gain related to the partial sale of our interest in Tandigm of $40,280, a loss on the DMG Arizona sale of $10,489, an adjustment to reduce receivables associated with the DMG acquisition escrow provision relating to income tax items of $30,934, and estimated accruals for legal matters of $16,000. Net (loss) income from discontinued operations, net of tax, in 2015 included estimated goodwill and other intangible asset impairment charges of $206,169 related to certain DMG reporting units. Net (loss) income from discontinued operations, net of tax, in 2013 includes contingent earn-out obligation, a gain adjustment of $56,977 related to a decrease in DMG’s 2013 contingent earn-out obligation and an adjustment to reduce a tax asset associated with the DMG acquisition escrow provisions of $7,721.

(5) In the third quarter of 2013, the Board of Directors approved a two-for-one split of our common stock in the form of a stock dividend payable on September 6, 2013 to stockholders of record on August 23, 2013. Our common stock began trading on a post-split basis on September 9, 2013. Share repurchases consisted of 12,966,672 shares of common stock for $810,949 in 2017, 16,649,090 shares of common stock for $1,072,377 in 2016, and 7,779,958 shares of common stock for $575,380 in 2015. No repurchases of common stock were made in 2014 or 2013. Shares issued in connection with stock awards were 514,091 in 2017, 1,011,328 in 2016, 1,479,217 in 2015, 2,179,766 in 2014, and 1,928,137 in 2013.

(6) The ratio of earnings to fixed charges was computed by dividing earnings by fixed charges. Earnings for this purpose is defined as pretax income from continuing operations adjusted by adding back fixed charges expensed during the period, less noncontrolling interests. Fixed charges include debt expense (interest expense and the write-off and amortization of deferred financing costs), the estimated interest component of rental expense on operating leases and capitalized interest.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Forward-looking statements

This Annual Report on Form 10-K, including this Management's Discussion and Analysis of Financial Condition and Results of Operations, contains statements that are forward-looking statements within the meaning of the federal securities laws. All statements that do not concern historical facts are forward-looking statements and include, among other things, statements about our expectations, beliefs, intentions and/or strategies for the future. These forward-looking statements may include statements regarding our future operations, financial condition and prospects, such as expectations for treatment growth rates, revenue per treatment, expense growth, levels of the provision for uncollectible accounts receivable, operating income, cash flow, operating cash flow, estimated tax rates, estimated charges and accruals, capital expenditures, the development of new dialysis centers and dialysis center acquisitions, government and commercial payment rates, revenue estimating risk and the impact of our level of indebtedness on our financial performance, and including earnings per share. These statements involve substantial known and unknown risks and uncertainties that could cause our actual results to differ materially from those described in the forward-looking statements, including risks resulting from the concentration of profits generated by higher-paying commercial payor plans for which there is continued downward pressure on average realized payment rates, and a reduction in the number of patients under such plans, including as a result of restrictions or prohibitions on the use and/or availability of charitable premium assistance, which may result in the loss of revenues or patients, or our making incorrect assumptions about how our patients will respond to any change in financial assistance from charitable organizations; the extent to which the ongoing implementation of healthcare exchanges or changes in or new legislation, regulations or guidance, or enforcement thereof, including among other things those regarding the exchanges, results in a reduction in reimbursement rates for our services from and/or the number of patients enrolled in higher-paying commercial plans; a reduction in government payment rates under the Medicare End Stage Renal Disease program or other government-based programs; the impact of the Medicare Advantage benchmark structure; risks arising from potential and proposed federal and/or state legislation or regulation, including healthcare-related and labor-related legislation or regulation, that could have a material adverse effect on our operations and profitability; the impact of the changing political environment and related developments on the current health care marketplace and on our business, including with respect to the future of the Affordable Care Act, the exchanges and many other core aspects of the current health care marketplace; uncertainties related to the impact of federal tax reform legislation; changes in pharmaceutical or anemia management practice patterns, payment policies, or pharmaceutical pricing; legal compliance risks, including our continued compliance with complex government regulations and the provisions of our current Corporate Integrity Agreement (CIA) and current or potential investigations by various government entities and related government or private-party proceedings, and restrictions on our business and operations required by our corporate integrity agreement and other current or potential settlement terms, and the financial impact thereof and our ability to recover any losses related to such legal matters from third parties; continued increased competition from large- and medium-sized dialysis providers that compete directly with us; our ability to reduce administrative expenses while maintaining targeted levels of service and operating performance, including our ability to achieve anticipated savings from our recent restructurings; our ability to maintain contracts with physician medical directors, changing affiliation models for physicians, and the emergence of new models of care introduced by the government or private sector, that may erode our patient base and reimbursement rates, such as accountable care organizations (ACOs), independent practice associations (IPAs) and integrated delivery systems; our ability to complete acquisitions, mergers or dispositions that we might announce or be considering, on terms favorable to us or at all, or to integrate and successfully operate any business we may acquire or have acquired, or to successfully expand our operations and services to markets outside the United States, or to businesses outside of dialysis; noncompliance by us or our business associates with any privacy laws or any security breach involving the misappropriation, loss or other unauthorized use or disclosure of confidential information; the variability of our cash flows; factors that may impact our ability to repurchase stock under our stock repurchase program and the timing of any such stock repurchases, including market conditions, the price of our common stock, our cash flow position and leverage ratios, and legal, regulatory and contractual requirements; the risk that we might invest material amounts of capital and incur significant costs in connection with the growth and development of our international operations, yet we might not be able to operate them profitably anytime soon, if at all; risks arising from the use of accounting estimates, judgments and interpretations in our financial statements; impairment of our goodwill, investments or other assets; the risks and uncertainties associated with the timing, conditions and receipt of regulatory approvals and satisfaction of other closing conditions of the DMG sale transaction, potential disruption in connection with the DMG sale transaction making it more difficult to maintain business and operational relationships, and uncertainties related to our use of proceeds from the DMG sale transaction, including our ability to repurchase stock; the risk that laws regulating the corporate practice of medicine could restrict the manner in which DMG conducts its business; the risk that the cost of providing services under DMG's agreements may exceed our compensation; the risk that reductions in reimbursement rates, including Medicare Advantage rates, and future regulations may negatively impact DMG's business, revenue and profitability; the risk that DMG may not be able to successfully establish a presence in new geographic regions or successfully address competitive threats that could reduce its profitability; the risk that a disruption in DMG's healthcare provider networks could have an adverse effect on DMG's business operations and profitability; the risk that

reductions in the quality ratings of health maintenance organization plan customers of DMG could have an adverse effect on DMG's business; the risk that health plans that acquire health maintenance organizations may not be willing to contract with DMG or may be willing to contract only on less favorable terms; and the other risk factors set forth in Part I, Item 1A. of this Annual Report on Form 10-K. We base our forward-looking statements on information currently available to us, and we undertake no obligation to update or revise any forward-looking statements, whether as a result of changes in underlying factors, new information, future events or otherwise.

The following should be read in conjunction with our consolidated financial statements and "Item 1. Business".

Company overview

The Company has consisted of two major divisions, DaVita Kidney Care (Kidney Care) and DaVita Medical Group (DMG). Kidney Care is comprised of our U.S. dialysis and related lab services, our ancillary services and strategic initiatives, including our international operations, and our corporate administrative support. Our U.S. dialysis and related lab services business is our largest line of business and is a leading provider of kidney dialysis services in the U.S. for patients suffering from chronic kidney failure, also known as end stage renal disease (ESRD). DMG is a patient- and physician-focused integrated healthcare delivery and management company with over two decades of providing coordinated, outcomes-based medical care in a cost-effective manner.

On December 5, 2017, we entered into an equity purchase agreement to sell our DMG division to Collaborative Care Holdings, LLC (Optum), a subsidiary of UnitedHealth Group Inc. The transaction is expected to close in 2018 and is subject to regulatory approval and other customary closing conditions. As a result of this pending transaction, the DMG business is classified as held for sale and its results of operations are reported as discontinued operations. In addition, prior periods' presentation has been revised to conform to current year presentation and DMG is not included in our Management's Discussion and Analysis below.

The overall financial performance of our U.S. dialysis and related lab services in 2017 benefited from increased treatment volume from acquired and non-acquired growth and cost control initiatives in our dialysis business. This was partially offset by an increase in labor costs and other center related costs.

Some of our major accomplishments and financial operating performance indicators in 2017 and year over year were as follows:

- improved clinical outcomes in our U.S. dialysis operations, including the fifth consecutive year as a leader in CMS' Quality Incentive Program;
- consolidated net revenue growth of 1.6%, which included 2.4% total net revenue growth in our U.S. dialysis segment, despite a decrease of $5 in average dialysis net patient service revenue per treatment;
- solid performance in our normalized non-acquired U.S. dialysis treatment growth of 3.5%, which contributed to an increase of approximately 4.1% in the overall number of U.S. dialysis treatments;
- a net increase of 160 U.S. dialysis centers, including dialysis centers from the Renal Ventures acquisition, and a net increase of 83 international dialysis centers;
- an increase in our overall number of patients we serve in the U.S. of approximately 5.4% in 2017;
- a decrease in U.S. dialysis and lab related services patient care costs of approximately $2 per treatment and a decrease in general and administrative expenses of approximately $1 per treatment; and
- consolidated operating cash flows of $1.9 billion, or $1.6 billion from continuing operations, which included the net VA settlement of $332 million.

We believe 2018 will be challenging. We continue to expect clinical costs to increase due to inflation and a tight labor market and we do not foresee an opportunity to offset these pressures with productivity improvements. With labor cost inflation continuing to outpace Medicare reimbursement, we anticipate that margins on our Medicare business will continue to experience pressure. In addition, we will experience an increase in benefit costs as we transition to a 401(k) plan match program as our 2017 benefit costs did not include a comparable expense. In 2018 we also anticipate additional reimbursement pressure on our pharmacy business. We remain committed to our plans for international expansion in certain regions, which will continue to require investment. We anticipate that these challenges will be partially offset in 2018 by the expected reduction in income taxes as a result of recent U.S. tax reform legislation. In addition, in connection with our previously announced capital allocation strategy, in 2018 we plan to continue our evaluation of strategic alternatives for various assets in our portfolio.

Following is a summary of our consolidated operating results for reference in the discussion that follows.

	Year ended December 31,					
	2017		2016		2015	
	(dollars in millions)					
Net revenues:						
Dialysis and related lab patient service revenues	$ 10,094		$ 9,727		$ 9,155	
Less: Provision for uncollectible accounts	(485)		(431)		(413)	
Net dialysis and related lab patient service revenues	9,608		9,296		8,743	
Other revenues	1,268		1,411		1,240	
Total net consolidated revenues	10,877	100 %	10,707	100 %	9,982	100 %

Certain columns, rows or percentages may not sum or recalculate due to the use of rounded numbers.

The following table summarizes our consolidated net revenues among our reportable segments:

	Year ended December 31,		
	2017	2016	2015
	(dollars in millions)		
Net revenues:			
U.S. dialysis and related lab patient service revenues	$ 9,822	$ 9,551	$ 9,034
Less: Provision for uncollectible accounts	(482)	(430)	(406)
U.S. dialysis and related lab net patient service revenues	9,340	9,121	8,628
Other revenues	20	17	14
Total net U.S. dialysis and related lab services revenues	9,360	9,138	8,642
Other-ancillary services and strategic initiatives other revenues	1,273	1,420	1,248
Other-ancillary services and strategic initiatives net patient service revenues (less provision for uncollectible accounts)	323	202	134
Total net other-ancillary services and strategic initiatives revenues	1,596	1,621	1,382
Total net segment revenues	10,956	10,759	10,024
Elimination of intersegment revenues	(80)	(52)	(42)
Consolidated net revenues	$ 10,877	$ 10,707	$ 9,982

Certain columns, rows or percentages may not sum or recalculate due to the use of rounded numbers.

The following table summarizes consolidated operating income and adjusted consolidated operating income:

	Year ended December 31,		
	2017	2016	2015
	(dollars in millions)		
U.S. dialysis and related lab services	$ 2,297	$ 1,777	$ 1,260
Other — ancillary services and strategic initiatives	(439)	267	(104)
Total segment operating income	1,858	2,044	1,156
Reconciling corporate items:			
Corporate administrative support	(45)	(14)	(19)
Consolidated operating income	$ 1,813	$ 2,030	$ 1,137
Reconciliation of non-GAAP measure:			
Goodwill impairment charges	35	28	4
Equity investment loss related to APAC JV goodwill impairment	6	—	—
Impairment of investment	280	15	—
Impairment of assets	15	—	—
Restructuring charges	2	—	—
Equity investment loss related to restructuring charges	1	—	—
Gain on settlement, net	(527)	—	—
Equity investment income related to gain on settlement	(3)	—	—
Gain on APAC JV ownership changes	(6)	(374)	—
Accruals for legal matters	—	16	22
Settlement charge	—	—	495
Adjusted consolidated operating income[1]	$ 1,616	$ 1,715	$ 1,658

Certain columns, rows or percentages may not sum or recalculate due to the use of rounded numbers.

(1) For the periods presented in the table above adjusted operating income is defined as operating income before certain items which we do not believe are indicative of ordinary results, including goodwill impairment charges, investment and other asset impairments, restructuring charges, a net settlement gain, gains on ownership changes, estimated accruals for certain legal matters and a settlement charge. Adjusted operating income as so defined is a non-GAAP measure and is not intended as a substitute for GAAP operating income. We have presented these adjusted amounts because management believes that these presentations enhance a user's understanding of our normal consolidated operating income by excluding certain items which we do not believe are indicative of our ordinary results of operations. As a result, adjusting for these amounts allows for comparison to our normalized prior period results.

Consolidated net revenues

Consolidated net revenues for 2017 increased by approximately $170 million, or 1.6%, from 2016. This increase in consolidated net revenues was due to an increase in U.S. dialysis and related lab services net revenues of approximately $222 million, principally as a result of solid volume growth from additional treatments, partially offset by a decrease of approximately $5 in average dialysis net patient service revenue per treatment and by one less treatment day in 2017, as discussed below. Revenue for 2017 was negatively impacted by a decrease of approximately $25 million from 2016 in our ancillary services and strategic initiatives driven primarily from decreases in revenue from our pharmaceutical business, partially offset by an increase in net revenues from expansion in our international business and increases in VillageHealth revenues, as described below.

Consolidated net revenues for 2016 increased by approximately $725 million, or 7.3%, from 2015. This increase in consolidated net revenues was due to an increase in U.S. dialysis and related lab services net revenues of approximately $496 million, principally resulted from solid volume growth from additional treatments, one additional treatment day in 2016, and an increase of $4 in the average dialysis net patient service revenue per treatment, as discussed below. In addition, revenue for 2016 increased by approximately $239 million from 2015 in our ancillary services and strategic initiatives driven primarily from growth in our pharmaceutical business and from expansion in our international business and other strategic initiatives.

Consolidated operating income

Consolidated operating income of $1.813 billion for 2017, which includes goodwill impairment charges of $35 million related to our vascular access reporting unit, an equity investment loss of $6 million for goodwill impairments at our APAC JV, an impairment of $280 million on our investment in the APAC JV, an asset impairment of $15 million related to the restructuring of our pharmacy business, restructuring charges in our international business of $3 million, a net gain on settlement of $530 million, and a gain adjustment on the 2016 ownership change of our APAC JV of $6 million, as discussed below, decreased by $217 million as compared to 2016, which included goodwill impairment charges of $28 million, an investment impairment of $15 million, an estimated gain on the ownership change of our APAC JV of $374 million and estimated accruals for legal matters of $16 million. Excluding these items from their respective periods, adjusted consolidated operating income for 2017 decreased by approximately $99 million due to an increase in adjusted operating losses in our ancillary and strategic initiatives of $59 million, an increase in expenses in our corporate administrative support of $31 million, and a decrease in adjusted operating income in U.S. dialysis and related lab services of $9 million, as described below.

Consolidated operating income of $2.030 billion for 2016, which included goodwill impairment charges of $28 million related to our vascular access reporting unit, an investment impairment of $15 million, an estimated gain on the ownership change of our APAC JV of $374 million and estimated accruals for legal matters of $16 million increased by approximately $893 million from 2015, which included estimated impairment charges of approximately $4 million, estimated accruals for legal matters of $22 million and a settlement charge of $495 million. Excluding these items from their respective periods, adjusted consolidated operating income for 2016 increased by approximately $57 million. Adjusted consolidated operating income increased primarily as a result of an increase in adjusted operating income in U.S. dialysis and related lab services of $22 million, a decrease in adjusted operating losses in our ancillary and strategic initiatives of $30 million, and a decrease in expenses in our corporate administrative support of $5 million, as described below.

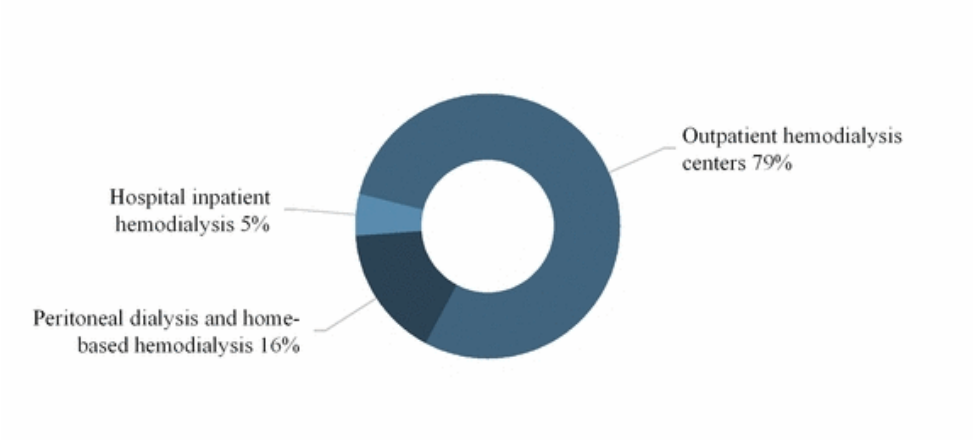
U.S. dialysis and related lab services business

Our U.S. dialysis and related lab services business is a leading provider of kidney dialysis services through a network of 2,510 outpatient dialysis centers which we own and manage through management services agreements, in 46 states and the District of Columbia, serving a total of approximately 197,800 patients. We also provide acute inpatient dialysis services in approximately 900 hospitals. We estimate that we have approximately a 37% share of the U.S. dialysis market based upon the number of patients we serve. In 2017, our overall network of U.S. outpatient dialysis centers increased by 160 dialysis centers, primarily as a result of opening new dialysis centers and from acquisitions of existing dialysis centers. The overall number of patients that we serve in the U.S. increased by approximately 5.4% in 2017, including dialysis patients from the Renal Ventures acquisition, as compared to 2016.

The stated mission of our U.S. dialysis and related lab services is to be the provider, partner and employer of choice. We believe our attention to these three stakeholders—our patients, our business partners, and our teammates—represents a major driver of our long-term performance, although we are subject to the impact of external factors such as government policy, physician practice patterns, commercial payor payment rates and the mix of commercial and government patients, as further described in Item 1A Risk Factors. Two principal non-financial metrics we track are quality clinical outcomes and teammate turnover. We have developed our own composite index for measuring improvements in our clinical outcomes, which we refer to as the DaVita Quality Index (DQI). Our clinical outcomes as measured by DQI have improved over each of the past several years, which we believe directly decreases patient mortalities. Our patient mortality percentages have decreased from 19.0% in 2001 to 13.8% in 2016. For the fifth year in a row, we have been a leader in the industry in QIP standards and for the last three years for which data is available, we have been a leader in the industry under the CMS Five-Star Quality Rating systems. Over the last two years our clinical teammate turnover has increased slightly due to increased competition for skilled clinical personnel; however, despite this headwind, we have continued to improve our clinical performance. We will continue to focus on these three stakeholders and our clinical outcomes as we believe these are fundamental long-term value drivers.

We believe our national scale, size and commitment to our patients, among other things, allows us to provide industry-leading quality care with superior clinical outcomes that attracts patients, referring physicians, and qualified medical directors to our network, which in turn provides our dialysis patient base with a large number of outpatient dialysis centers to choose from with convenient locations and access to a full range of other integrated services, which in turn provides us the ability to effectively and efficiently manage a patient's care and certain costs while still maintaining strong legal and compliance programs.

The following graph summarizes our U.S. dialysis services revenues by modality for the year ended December 31, 2017:



Approximately 86% of our 2017 consolidated net revenues were derived directly from our U.S. dialysis and related lab services business. Approximately 79% of our 2017 dialysis services revenues were derived from outpatient hemodialysis services in our 2,471 consolidated U.S. dialysis centers. Other dialysis services, which are operationally integrated with our dialysis operations, are peritoneal dialysis, home-based hemodialysis, hospital inpatient hemodialysis and management and administrative services provided to dialysis centers in which we own a noncontrolling interest or which are wholly owned by third parties. These services collectively accounted for the balance of our 2017 U.S. dialysis and related lab services revenues.

The principal drivers of our U.S. dialysis and related lab services revenues are:

- the number of treatments, which is primarily a function of the number of chronic patients requiring approximately three treatments per week as well as, to a lesser extent, the number of treatments for peritoneal dialysis and home-based dialysis and hospital inpatient dialysis; and
- average dialysis net patient service revenue per treatment, including the mix of commercial and government patients.

The total U.S. dialysis patient base is a relatively stable and growing factor, and is fundamentally influenced by a demographically growing need for dialysis services, as well as mortality rates that are common for patients with ESRD. The United States Renal Data System has reported an approximate compound annual growth rate of 3.8% from 2000 to 2015 for the U.S. dialysis patient population.

We believe our ability to maintain a stable or growing share of the U.S. dialysis patient base is influenced by the quality of our relationships with referring physicians and the quality of our clinical care, which can lead to reduced patient mortality rates, as described above, as well as our ability to open and acquire new dialysis centers.

Our average U.S. dialysis and related lab services net patient service revenue per treatment is driven by changes in our mix of commercial and government (principally Medicare and Medicaid) patients, commercial and government payment rates, and our billing and collecting operations performance.

On average, dialysis-related payment rates from contracted commercial payors are significantly higher than Medicare, Medicaid and other government program payment rates, and therefore the percentage of commercial patients in relation to total patients represents a major driver of our total average dialysis net patient service revenue per treatment. The percentage of commercial patients covered under contracted plans as compared to commercial patients with out-of-network providers has continued to increase, which can significantly affect our average dialysis net patient service revenue per treatment since commercial payment rates for patients with out-of-network providers are on average higher than in-network payment rates that are covered under commercial contracted plans.

In addition, growth of our government-based patients outpaced the growth of our commercial patients in 2017 due to a decrease in exchange patients. Government dialysis-related payment rates in the U.S. are principally determined by federal Medicare and state Medicaid policy. For patients with Medicare coverage, all ESRD payments for dialysis treatments are made under a single bundled payment rate which provides a fixed payment rate encompassing all goods and services provided during

the dialysis treatment, including certain pharmaceuticals such as Epogen® (EPO), vitamin D analogs and iron supplements, irrespective of the amount of pharmaceuticals administered to the patient or additional services performed. Most lab services are also included in the bundled payment. Under the ESRD PPS, the bundled payments to a dialysis facility may be reduced by as much as 2% based on the facility's performance in specified quality measures set annually by CMS through QIP, which was established by the Medicare Improvements for Patients and Providers Act of 2008. The bundled payment rate is also adjusted for certain patient characteristics, a geographic usage index and certain other factors.

This bundled payment system presents certain operating, clinical and financial risks as further described in the risk factor in Item 1A Risk Factors under the heading "Changes in the structure of and payment rates under the Medicare ESRD program could have a material adverse effect on our business, results of operations and financial condition." For example, with regard to the expanded list of case-mix adjustors, there is a risk that our dialysis centers or billing and other systems may not accurately document and track the appropriate patient-specific characteristics, resulting in a reduction or overpayment in the amounts of the payments that we would otherwise be entitled to receive. In addition, as new drugs, services or labs are added to the ESRD bundle, CMS' failure to adequately calculate the costs associated with the drugs, services or labs could have a material adverse effect on our business, results of operations and financial condition.

Uncertainty about future payment rates remains a material risk to our business, as well as the potential implementation of or changes in coverage determinations or other rules or regulations by CMS or MACs that may impact reimbursement. An important provision in the law is an annual adjustment, or market basket inflation update, to the ESRD PPS base rate. Absent action by Congress, the PPS base rate is automatically updated annually by a formulaic inflation adjustment.

In December 2013, CMS issued the 2014 final rule for the ESRD PPS, which phases in the payment reductions mandated by ATRA, as modified by the Protecting Access to Medicare Act of 2014 which reduced our market basket inflation adjustment by 1.25% in 2016 and 2017, and by 1% in 2018. In November 2017, CMS published the 2018 final rule for the ESRD PPS, which increased dialysis facilities' bundled payment rate for 2018 relative to prior years. In particular, CMS projects that the 2018 final rule for the ESRD PPS will (i) increase the total payments to all ESRD facilities by 0.5% in 2018 compared to 2017; (ii) increase total payments to hospital-based ESRD facilities by 0.7% in 2018 compared to 2017; and (iii) increase total payments for freestanding facilities by 0.5% in 2018 compared to 2017. The 2018 final rule for ESRD PPS also implements changes to the PPS outlier policy, broadening the pricing methodologies used to determine the cost of certain service drugs and biologicals in computing outlier payments when average sales price data is not available.

As a result of the BCA and subsequent activity in Congress, a $1.2 trillion sequester (across-the-board spending cuts) in discretionary programs took effect on April 1, 2013, reducing Medicare payments by 2% which was subsequently extended through fiscal year 2027. These across-the-board spending cuts have affected and will continue to adversely affect our business, results of operations and financial condition.

The CMS Innovation Center is working with various healthcare providers to develop, refine and implement ACOs and other innovative models of care for Medicare and Medicaid beneficiaries. We are uncertain of the extent to which the long-term operation and evolution of these models of care, including ACOs, Bundled Payments for Care Improvement Initiative, the CEC Model (which includes the development of ESCOs), the Comprehensive Primary Care Initiative, the Duals Demonstration, or other models, will impact the healthcare market over time. Our U.S. dialysis business may choose to participate in one or several of these models either as a partner with other providers or independently. We currently participate in the CEC Model with the Innovation Center, including with the ESCO organizations in the Arizona, Florida, and adjacent New Jersey and Pennsylvania markets. In areas where we are not directly participating in this or other Innovation Center models, some of our patients may be assigned to an ACO, another ESRD Care Model, or another program, in which case the quality and cost of care that we furnish will be included in an ACO's, another ESRD Care Model's or other programs' calculations.

The Department of Health and Human Services (HHS) has also pledged to tie 50% of Medicare payments to quality or alternate payment models by the end of 2018. As new models of care emerge and evolve, we may be at risk for losing our Medicare patient base, which would have a material adverse effect on our revenues, earnings and cash flows. Other initiatives in the government or private sector may also arise, including the development of models similar to ACOs, independent practice associations (IPAs) and integrated delivery systems or evolutions of those concepts which could adversely impact our business.

We anticipate that we will continue to experience increases in our operating costs in 2018 that will outpace any net Medicare rate increases that we may receive, which could significantly impact our operating results. In particular, we expect to continue experiencing increases in operating costs that are subject to inflation, such as labor and supply costs, including increases in maintenance costs and capital expenditures to improve, renovate and maintain our facilities, equipment and information technology to meet changing regulatory requirements, regardless of whether there is a compensating inflation-based increase in Medicare payment rates or in payments under the bundled payment rate system.

Dialysis payment rates from commercial payors can vary and a major portion of our commercial rates are set at contracted amounts with payors and are subject to intense negotiation pressure. Our commercial payment rates also include payments for out-of-network patients that on average are higher than our in-network commercial contract rates. We continue to enter into some commercial contracts covering certain patients that will primarily pay us a single bundled payment rate for all dialysis services provided to these patients. However, some contracts will pay us for certain other services and pharmaceuticals in addition to the bundled payment. We are continuously in the process of negotiating agreements with our commercial payors, and if our negotiations result in overall commercial contract payment rate reductions in excess of our commercial contract payment rate increases, or if commercial payors implement plans that restrict access to coverage or the duration or breadth of benefits or impose restrictions or limitations on patient access to commercial plans on non-contracted or out-of-network providers, it could have a material adverse effect on our business, results of operations and financial condition. In addition, if there is an increase in job losses in the U.S., or depending upon changes to the healthcare regulatory system by CMS and/or the impact of healthcare insurance exchanges, we could experience a decrease in the number of patients covered under commercial insurance plans and/or an increase in uninsured or underinsured patients. Patients with commercial insurance who cannot otherwise maintain coverage frequently rely on financial assistance from charitable organizations, such as the American Kidney Fund. If these patients are unable to obtain or continue to receive or receive for a limited duration, such financial assistance, or if our assumptions about how patients will respond to any change in such financial assistance are incorrect, it could have a material adverse effect on our business, results of operations and financial condition. For further details, see the risk factor in Item 1A Risk Factors under the heading "If patients in commercial plans are subject to restriction in plan designs or the average rates that commercial payors pay us decline significantly, it would have a material adverse effect on our business, results of operations and financial condition."

Our operating performance with respect to dialysis services billing and collection can also be a significant factor in the average U.S. dialysis and related lab services net patient service revenue per treatment we recognize and are able to collect. Over the past several years we have invested heavily in upgrades to our systems and internal processes that we believe have helped improve our operating performance and reduced our regulatory compliance risks, and we expect to continue to improve these systems and processes. We continue to upgrade our billing and other systems; however, as we continue to make upgrades to our systems and processes, or as payors change their systems and requirements, such as changes to what is included in the bundled payment from Medicare, we could experience a negative impact to our cash collection performance, which would affect our average U.S. dialysis and related lab services net patient service revenue per treatment.

Our U.S. dialysis and related lab services revenue recognition involves significant estimation risks. Our estimates are developed based on the best information available to us and our best judgment as to the reasonably assured collectability of our billings as of the reporting date based upon our actual historical collection experience. Changes in estimates are reflected in the then-current period financial statements based upon on-going actual experience and trends, or subsequent settlements and realizations depending on the nature and predictability of the estimates and contingencies.

Our average U.S. dialysis and related lab services net patient service revenue per treatment can be significantly impacted by several major factors, including our commercial payment rates; government payment policies regarding reimbursement amounts for dialysis treatments covered under Medicare's bundled payment rate system, including our ability to capture certain patient characteristics; and changes in the mix of government and commercial patients and the number of commercial patients that are either covered under commercial contracts or are out of network.

Our annual average U.S. dialysis and related lab services net patient service revenue per treatment was approximately $330, $336 and $332 for 2017, 2016 and 2015, respectively. In 2017, our average U.S. dialysis and related lab services net patient service revenue per treatment decreased by approximately $5 per treatment due to a decrease in our commercial treatment volume, a decline in our commercial payor mix, including exchange patients, and an increase in our provision for uncollectible accounts. In 2016, our average U.S. dialysis and related lab services net patient service revenue per treatment increased by approximately $4 per treatment due to an increase in our average commercial payment rates and improvements in our commercial payor mix, partially offset by an increase in our provision for uncollectible accounts.

The principal drivers of our U.S. dialysis and related lab services patient care costs are clinical hours per treatment, labor rates, vendor pricing of pharmaceuticals, utilization levels of pharmaceuticals, business infrastructure costs, which include the operating costs of our dialysis centers, and certain professional fees. However, other cost categories can also present significant cost variability, such as employee benefit costs, payroll taxes, insurance costs and medical supply costs. In addition, currently pending and future proposed ballot initiatives or referendums, legislation or policy changes could cause us to incur substantial costs to challenge and, if implemented, impose additional requirements on our operations, including increases in the required staffing levels or staffing ratios for clinical personnel, minimum transition times between treatments, limits on how much patients may be charged for care, limitations as to the amount that can be spent on certain medical costs, and a ceiling on the percent of profit for such care. Changes such as these mandated by currently pending and future ballot initiatives or

referendums, legislation or policy changes would likely materially reduce our revenues and increase our operating expense and impact our ability to staff our clinics to the new, elevated staffing levels, in particular given the ongoing nationwide shortage of healthcare workers, especially nurses.

Our average clinical hours per treatment, or productivity levels, were flat in 2017 compared to 2016. We are always striving for improved productivity levels, however, changes in federal and state policies or regulatory billing requirements can lead to increased labor costs in order to implement these new requirements, which can adversely impact our ability to achieve optimal productivity levels. In addition, improvements in the U.S. economy have stimulated additional competition for skilled clinical personnel resulting in slightly higher teammate turnover in 2017, which we believe negatively affected productivity levels. In 2017 and 2016, we experienced an increase in our clinical labor rates of approximately 4.0% and 2.8%, respectively, consistent with general industry trends, mainly due to the high demand for and nationwide shortage of skilled clinical personnel, along with general inflation increases. In 2018, we will have a year-over-year accounting headwind of up to $100 million as we finish the transition from a profit sharing program to a 401(k) match program. With the old program, we accrued for the expense in the calendar year before payout; with the new program, we will accrue for the expense as we pay out. This accounting change created a one-year gap in 2017 when we did not need to accrue for any such payouts. We also continue to experience increases in the infrastructure and operating costs of our dialysis centers, primarily due to the number of new dialysis centers opened, and general increases in rent, utilities and repairs and maintenance. In 2017, we continued to implement certain cost control initiatives to manage our overall operating costs, including labor productivity.

Our U.S. dialysis and related lab services general and administrative expenses represented 8.1% and 8.2% of our U.S. dialysis and related lab services net revenues in 2017 and 2016, respectively. Although slightly down as a percent of net revenues, general and administrative expenses increased by $9 million, primarily due to an increase in labor and benefit costs and occupancy costs, partially offset by a decrease in long-term compensation, profit sharing and travel expenses. Increases in general and administrative expenses over the last several years were primarily related to strengthening our dialysis business, improving our regulatory compliance and other operational processes, responding to certain legal and compliance matters, and professional fees associated with enhancing our information technology systems. We expect that these levels of expenditures on our U.S. dialysis and related lab services general and administrative expenses will continue in 2018 and could possibly increase as we seek out new business opportunities within the dialysis industry and continue to invest in improving our information technology infrastructure and the level of support required for our regulatory compliance and legal matters.

Results of Operations

The following table reflects the results of operations for our U.S. dialysis and related lab services business:

	Year ended December 31,		
	2017	2016	2015
	(dollars in millions, except treatment data)		
U.S. dialysis and related lab patient service revenues	$ 9,822	$ 9,551	$ 9,034
Less: Provision for uncollectible accounts	(482)	(430)	(406)
U.S. dialysis and related lab net patient service revenues	9,340	9,121	8,628
Other revenues	20	17	14
Total U.S. dialysis and related lab net services revenues	9,360	9,138	8,642
Operating expenses and charges:			
Patient care costs	6,334	6,145	5,755

Average dialysis treatments per treatment day	90,468	86,532	83,104
Average U.S. dialysis and related lab services patient service revenue per treatment	$ 347.43	$ 351.64	$ 347.64
Less: Provision for uncollectible accounts per treatment	(17.05)	(15.83)	(15.64)
Average U.S. dialysis and related lab services net patient service revenue per treatment	$ 330.38	$ 335.81	$ 332.00

Certain columns, rows or percentages may not sum or recalculate due to the use of rounded numbers.

(1) For the periods presented in the table above adjusted operating income is defined as operating income before certain items which we do not believe are indicative of ordinary results, including a net settlement gain and a settlement charge related to a legal matter. Adjusted operating income as so defined is a non-GAAP measure and is not intended as a substitute for GAAP operating income. We have presented these adjusted amounts because management believes that these presentations enhance a user's understanding of our normal consolidated operating income by excluding certain items which we do not believe are indicative of our ordinary results of operations. As a result, adjusting for these amounts allows for comparison to our normalized prior period results.

Net revenues

U.S. dialysis and related lab services net revenues for 2017 increased by approximately $222 million, or 2.4%, from 2016. This increase in net revenues was primarily driven by solid volume growth from additional treatments of approximately 4.1% due to an increase in acquired and non-acquired treatments, including the acquisition of Renal Ventures. U.S. dialysis and related lab services' net revenues was negatively impacted by approximately one less treatment day in 2017 as compared to 2016, a decrease in the average dialysis net patient service revenue per treatment of approximately $5, primarily due to a decrease in our commercial payor mix, including exchange patients. In addition, our provision for uncollectible accounts increased by $52 million in 2017.

U.S. dialysis and related lab services net revenues for 2016 increased by approximately $496 million, or 5.7%, from 2015. This increase in net revenues was primarily driven by solid volume growth from additional treatments of approximately 4.5% due to an increase in acquired and non-acquired treatment growth at existing and new dialysis centers, as well as one additional treatment day in 2016 as compared to 2015. U.S. dialysis and related lab services' net revenues also benefited from an increase in the average dialysis net patient service revenue per treatment of approximately $4, primarily due to an increase in our average commercial payment rates and improvements in our commercial payor mix. In addition, our provision for uncollectible accounts increased by $24 million in 2016.

The following table summarizes our U.S. dialysis services revenues by source:

	2017	2016	2015
Medicare and Medicare-assigned plans	56%	55%	56%
Medicaid and Managed Medicaid plans	7	5	6
Other government-based programs	4	4	4
Total government-based programs	67	64	66
Commercial (including hospital dialysis services)	33	36	34
Total U.S. dialysis and related lab services revenues	100%	100%	100%

Approximately 67% of our total U.S. dialysis services revenues for the year ended December 31, 2017 were from government-based programs, principally Medicare, Medicaid, Medicare-assigned and Managed Medicaid plans, representing approximately 89.5% of our total patients. Over the last year we have seen a decline in our commercial patients, which have been outpaced by the growth of our government-based patients. Less than 1% of our U.S. dialysis and related lab services revenues are due directly from patients. There is no single commercial payor that accounted for more than 10% of total U.S. dialysis and related lab services revenues for the year ended December 31, 2017.

On average, dialysis-related payment rates from contracted commercial payors are significantly higher than Medicare, Medicaid and other government program payment rates, and therefore the percentage of commercial patients as a relationship to total patients represents a major driver of our total average dialysis net patient service revenue per treatment. For a patient covered by a commercial insurance plan, Medicare generally becomes the primary payor after 33 months, which includes the three month waiting period, or earlier if the patient's commercial insurance plan coverage terminates. When Medicare becomes the primary payor, the payment rates we receive for that patient shift from the commercial insurance plan rates to Medicare payment rates, which on average are significantly lower than commercial insurance rates. Medicare payment rates are insufficient to cover our costs associated with providing dialysis services, and we therefore lose money on each Medicare treatment that we provide.

Nearly all of our net earnings from our U.S. dialysis and related lab services are derived from commercial payors, some of which pay at established contract rates and others of which pay negotiated payment rates based on our usual and customary fee schedule for out-of-network patients, which are typically higher than commercial contracted rates. If we experience an overall net reduction in our contracted and non-contracted commercial payment rates as a result of negotiations, restrictions or changes to the healthcare regulatory system, including the potential impact of healthcare insurance exchanges, it could have a material adverse effect on our business, results of operations and financial condition.

Operating expenses and charges

Patient care costs. U.S. dialysis and related lab services patient care costs are those costs directly associated with operating and supporting our dialysis centers and consist principally of labor, benefits, pharmaceuticals, medical supplies and other operating costs of the dialysis centers. U.S. dialysis and related lab services patient care costs on a per treatment basis were $224 and $226 for 2017 and 2016, respectively. The $2 decrease in per treatment costs in 2017 as compared to 2016 was primarily attributable to a decrease in pharmaceutical unit costs due to a net price reduction as well as a decrease in profit sharing expense. These decreases were partially offset by an increase in labor and benefit costs due to an increase in teammates and clinical labor rates, and an increase in other direct operating expenses associated with our dialysis centers, including the impact of the hurricanes during the third quarter of 2017.

U.S. dialysis and related lab services patient care costs on a per treatment basis were $226 and $221 for 2016 and 2015, respectively. The $5 increase in per treatment costs in 2016 as compared to 2015 was primarily attributable to an increase in labor and benefit costs due to a decrease in productivity, increased turnover and clinical labor rates, an increase in other direct operating expenses associated with our dialysis centers and an increase in pharmaceutical unit costs. These increases were partially offset by a decrease in professional fees.

General and administrative expenses. U.S. dialysis and related lab services general and administrative expenses in 2017 increased by approximately $9 million as compared to 2016. This increase was primarily due to an increase in our labor and benefit costs, and occupancy costs, partially offset by a decrease in long-term incentive compensation, profit sharing and travel expenses.

U.S. dialysis and related lab services general and administrative expenses in 2016 increased by approximately $42 million as compared to 2015. This increase was primarily due to an increase in our labor and benefit costs, occupancy, and legal costs, partially offset by a decrease in long-term incentive compensation expense.

Depreciation and amortization. U.S. dialysis and related lab services depreciation and amortization expenses for 2017 increased by approximately $38 million as compared to 2016 and increased by $45 million in 2016 as compared to 2015. The increases were primarily due to both growth through new dialysis center developments and acquisitions as well as additional informational technology initiatives.

Gain on settlement, net. During the first quarter of 2017, we reached an agreement with the government for amounts owed to us for dialysis services provided from 2005 through 2011 to patients covered by the Department of Veterans Affairs (VA). As a result of this settlement we recognized a one-time net gain of $527 million as well as equity investment income of $3 million for our share of the settlement recognized by our nonconsolidated joint ventures. As such, the total effect of this settlement on our operating income was an increase of $530 million.

Provision for uncollectible accounts receivable. The provision for uncollectible accounts receivable for our U.S. dialysis and related lab services business was 4.9% for 2017 and 4.5% for both 2016 and 2015. We continue to experience higher amounts of accounts receivable write-offs due to uninsured and underinsured patients. We assess our level of provision for uncollectible accounts based upon our historical cash collection experience and trends, and have and will continue to adjust the provision as necessary as a result of changes in expectations based on our cash collections.

Equity investment income. Equity investment income was approximately $25 million, $18 million and $15 million in 2017, 2016 and 2015, respectively. The increases in equity investment income over the last three years were primarily due to the increase in the number of our nonconsolidated dialysis joint ventures and an increase in profitability at some of these joint ventures.

Segment operating income

U.S. dialysis and related lab services operating income for 2017, which includes a net gain on the VA settlement of $530 million, increased by approximately $520 million as compared to 2016. Excluding this item from 2017, U.S. dialysis and related lab services adjusted operating income decreased by approximately $9 million from 2016. This decrease in adjusted operating income was primarily due to a decrease in the average dialysis net patient service revenue per treatment of approximately $5, one less treatment day, partially offset by treatment growth, as described above. Adjusted operating income also decreased due to an increase in general and administrative expenses, partially offset by lower patient care costs, as described above.

U.S. dialysis and related lab services operating income for 2016 increased by approximately $517 million as compared to 2015, which included a settlement charge of $495 million. Excluding this item from 2015, U.S. dialysis and related lab services adjusted operating income increased by $22 million. This increase in adjusted operating income was primarily due to treatment growth as a result of additional dialysis treatments, one additional treatment day, and an increase in the average dialysis net patient service revenue per treatment of approximately $4, as described above. Adjusted operating income also increased due to a decrease in long-term incentive compensation expense, partially offset by higher patient care costs and an increase in general and administrative expenses, as described above.

Other—Ancillary services and strategic initiatives business

Our other operations include ancillary services and strategic initiatives which are primarily aligned with our core business of providing dialysis services to our network of patients. As of December 31, 2017, these consisted primarily of pharmacy services, disease management services, vascular access services, clinical research programs, physician services, direct primary care, ESRD seamless care organizations, and comprehensive care as well as our international operations.

Our ancillary services and strategic initiatives, including our pharmacy services and international operations among others, generated approximately $1.6 billion of net revenues in 2017, representing approximately 14% of our consolidated net revenues. We expect to add additional service offerings to our business and pursue additional strategic initiatives in the future as circumstances warrant, which could include healthcare services not related to dialysis. In addition, in connection with our

previously announced capital allocation strategy, in 2018 we plan to continue our evaluation of strategic alternatives for various assets in our portfolio. Any significant change in market conditions, or business performance, or in the political, legislative or regulatory environment, may impact the economic viability of any of our strategic initiatives. If any of our ancillary services or strategic initiatives, including our pharmacy services and our international operations, are unsuccessful, it would have a negative impact on our business, results of operations and financial condition, and we may determine to exit the line of business. We could incur significant termination costs if we were to exit certain of these lines of business. In addition, we may incur a material write-off or an impairment of our investment, including goodwill, in one or more of our ancillary services or strategic initiatives. In that regard, we have taken, and may in the future take, impairment charges related to our ancillary services and strategic initiatives, including in our international and pharmacy businesses.

As of December 31, 2017, our international dialysis operations provided dialysis and administrative services to a total of 237 outpatient dialysis centers located in 11 countries outside of the U.S. The total net revenues generated from our international operations, as reflected below, were approximately 3% of our 2017 consolidated net revenues.

The following table reflects the results of operations for the ancillary services and strategic initiatives:

	Year ended December 31,		
	2017	2016	2015
	(dollars in millions)		
U.S. revenues			
Other revenues	$ 1,268	$ 1,413	$ 1,242
Total	1,268	1,413	1,242
International revenues			
Net dialysis patient service revenues	323	202	134
Other revenues	5	6	6
Total	328	208	140
Total net revenues	$ 1,596	$ 1,621	$ 1,382
Operating expenses and charges:			
Operating and other general expenses	$ 1,711	$ 1,686	$ 1,482
Goodwill impairment	36	28	4
Impairment of investment	295	15	—
Gain from APAC JV ownership changes	(6)	(374)	—
Total operating expenses and charges	2,036	1,355	1,486
Total ancillary services and strategic initiatives operating (loss) income	$ (439)	$ 267	$ (104)
U.S. operating loss	$ (110)	$ (65)	$ (45)
Reconciliation of non-GAAP:			
Goodwill impairment	35	28	—
Impairment of assets	15	—	—
Accruals for legal matters	—	16	22
Adjusted operating loss[1]	$ (60)	$ (21)	$ (23)
International operating (loss) income	$ (329)	$ 332	$ (59)
Reconciliation of non-GAAP:			
Goodwill impairment	—	—	4
Equity investment loss related to APAC JV goodwill impairment	6	—	—
Impairment of investment	280	15	—
Restructuring charges	2	—	—
Equity investment loss related to restructuring charges	1	—	—
Gain from APAC JV ownership changes	(6)	(374)	—
Adjusted operating loss[1]	$ (46)	$ (27)	$ (55)
Total adjusted ancillary services and strategic initiatives operating loss[1]	$ (107)	$ (48)	$ (78)

Certain columns, rows or percentages may not sum or recalculate due to the use of rounded numbers.

(1) For the periods presented in the table above adjusted operating loss is defined as operating loss before certain items which we do not believe are indicative of ordinary results, including goodwill impairment charges, investment and other asset impairments, restructuring charges, gains on ownership changes and accruals for legal matters. Adjusted operating loss as so defined is a non-GAAP measure and is not intended as a substitute for GAAP operating (loss) income. We have presented these adjusted amounts because management believes that these presentations enhance a user's understanding of our normal consolidated operating (loss) income by excluding certain items which we do not believe are indicative of our ordinary results of operations. As a result, adjusting for these amounts allows for comparison to our normalized prior period results.

Net revenues

Ancillary services and strategic initiatives net revenues for 2017 decreased by approximately $25 million, or 1.5%, as compared to 2016. This decrease was primarily related to a decrease in volume in our pharmaceutical business, partially offset by an increase in pharmaceutical rates, an increase in VillageHealth special needs plan revenues, an increase in shared savings revenue recognized by our ESCO joint ventures and an increase in net revenues from expansions in our international business and other strategic initiatives.

Ancillary services and strategic initiatives net revenues for 2016 increased by approximately $239 million, or 17.3%, as compared to 2015. This increase was primarily related to an increase in pharmaceutical rates, a decrease in reserves due to refunds of pharmacy reimbursements taken in 2015 that did not reoccur in 2016, an increase in VillageHealth special needs plan revenues and an increase in net revenues from expansions in our international business and other strategic initiatives. These increases were partially offset by a decrease in our pharmacy services volume.

Operating and general expenses

Ancillary services and strategic initiatives operating and general expenses for 2017, which includes restructuring charges related to our international business of $3 million, increased by approximately $25 million from 2016, which included an estimated accrual for certain legal matters of $16 million. Excluding these items from their respective periods, ancillary services and strategic initiatives adjusted operating expenses increased by $38 million. This increase in adjusted operating and general expenses was primarily related to an increase in medical costs at VillageHealth, an increase in labor and benefits costs and additional expenses associated with our international dialysis expansion, including losses from adverse changes in foreign exchange rates included in equity investment income, partially offset by a decrease in pharmaceutical costs due to decreased volume in our pharmacy services business.

Ancillary services and strategic initiatives operating and general expenses for 2016, which includes an estimated accrual for certain legal matters of $16 million, increased by approximately $203 million from 2015, which included an estimated accrual for certain legal matters of $22 million. Excluding these items from their respective periods, ancillary services and strategic initiatives adjusted operating expenses increased by $209 million. This increase in adjusted operating and general expenses was primarily due to an increase in pharmaceutical unit costs, labor and benefit costs, professional fees, other general and administration expenses, and additional expenses associated with our international dialysis expansion, partially offset by a decrease in prescription dispensing volume, long-term incentive compensation expense and foreign currency gains.

Investment and other asset impairments

During the year ended December 31, 2017, we recognized a non-cash other-than-temporary impairment charge of $280 million on our investment in the APAC JV. This charge resulted from changes in our expectations for the joint venture based on continuing market research and assessments by both us and the DaVita Care Pte. Ltd. (the APAC JV) concerning the size of the addressable market available to the joint venture at attractive risk-adjusted returns. We estimated the fair value of our retained interest in the APAC JV with the assistance of an independent third party valuation firm based on information available to management as of December 31, 2017. After this charge, our investment in the APAC JV was carried at $160 million as of December 31, 2017.

During the year ended December 31, 2017, we also recognized other asset impairment charges of $15 million related to a restructuring of our pharmacy business.

During the year ended December 31, 2016, we recognized an impairment of $15 million related to an investment in one of our international reporting units.

Goodwill impairment charges

During the year ended December 31, 2016, we recognized a goodwill impairment charge of $28 million related to our vascular access reporting unit as a result of changes in future governmental reimbursement rates for this business and our expected ability to mitigate them. Specifically, on November 2, 2016, CMS released the 2017 Physician Fee Schedule Final Rule and the Ambulatory Surgical Center Payment Final Rule which reflected significant changes in reimbursement structure for this business unit.

During the year ended December 31, 2017, we recognized an additional goodwill impairment charge of $35 million at our vascular access reporting unit. This charge resulted primarily from continuing changes in our outlook for this business unit as our partners and operators continued to evaluate and make decisions concerning changes in operations, including termination

of their management services agreements and center closures as a result of the changes in reimbursement structure discussed above. As of December 31, 2017, there was no goodwill remaining at our vascular access reporting unit.

We also recognized a goodwill impairment charge of $2 million at one of our international reporting units during the year ended December 31, 2017 and $4 million at another international reporting unit during the year ended December 31, 2015.

Restructuring charges

During the year ended December 31, 2017, we recognized total restructuring charges related to our international business of $2 million and recognized equity investment losses of $1 million related to restructuring charges at our APAC JV. These restructuring charges were related to a reorganization of our international general and administrative infrastructure at the global, regional and county levels in order to improve efficiency.

Gain on changes in ownership interests in APAC JV

As a result of our agreement with Khazanah Nasional Berhad (Khazanah) and Mitsui and Co., Ltd (Mitsui) concerning the APAC JV, we recorded an additional $6 million non-cash gain during the year ended December 31, 2017 related to a change in estimate of pending post-closing adjustments for the 2016 formation of this joint venture.

In 2016 we deconsolidated our Asia Pacific dialysis business and recognized an initial non-cash non-taxable estimated gain of $374 million on our retained investment in the APAC JV net of contingent obligations as a result of adjusting the carrying value of our retained interest in the APAC JV to our proportionate share of the estimated fair value of the business.

Segment operating (loss) income

Ancillary services and strategic initiatives operating results for 2017, which include goodwill impairment charges of $35 million at our vascular access reporting unit, an impairment of $280 million on our investment in the APAC JV, an asset impairment of $15 million related to the restructuring of our pharmacy business, equity investment losses of $6 million related to goodwill impairments at our APAC JV, restructuring charges related to our international business of $3 million and an adjustment to the gain on the 2016 ownership change of our APAC JV of $6 million, decreased by approximately $706 million from the same period in 2016, which included an estimated gain on the ownership change of our APAC JV of $374 million, a goodwill impairment charge of $28 million at our vascular access reporting unit, an estimated accrual for certain legal matters of $16 million and an investment impairment of $15 million. Excluding these items from their respective periods, adjusted operating losses increased by $59 million, primarily due to a decrease in revenues in our pharmacy services business, an increase in medical costs, higher labor and benefits costs, and additional expenses associated with our international operations, partially offset by an increase in VillageHealth special needs plan revenues, an increase in shared savings revenue recognized by our ESCO joint ventures, an increase in net revenues from expansion in our international business, and a decrease in pharmaceutical costs due to decreased volume in our pharmacy services business.

Ancillary services and strategic initiatives operating results for 2016, which includes an estimated gain on the ownership change of our APAC JV of $374 million, a goodwill impairment charge of $28 million at our vascular access reporting unit, an estimated accrual for certain legal matters of $16 million and an investment impairment of $15 million, increased by approximately $372 million from 2015, which included an estimated accrual for certain legal matters of $22 million, as well as a goodwill impairment charge of $4 million related to our international operations. Excluding these items from their respective periods, adjusted operating losses decreased by $30 million. This decrease in adjusted operating losses was primarily due to an increase in pharmaceutical rates, a decrease in reserves due to refunds of pharmacy reimbursements taken in 2015 that did not reoccur in 2016, an increase in VillageHealth special needs plan revenues and an increase in net revenues from our expansion in our international business and other strategic initiatives. The decrease in adjusted operating losses was partially offset by an increase in pharmaceutical unit costs, higher labor and benefits costs and additional expenses associated with our international dialysis expansion.

Corporate level charges

Debt expense. Debt expense for 2017, 2016, and 2015 consisted of interest expense of approximately $407 million, $394 million and $390 million, respectively, and amortization and accretion of debt discounts and premiums, amortization of deferred financing costs and amortization of interest rate cap agreements of approximately $24 million, $20 million, and $18 million, respectively. The increase in debt expense in 2017 as compared to 2016 was primarily due to an increase in our average interest rate, partially offset by a decrease in our average outstanding balance. Our overall weighted average effective interest rate in 2017 was 4.70% as compared to 4.43% in 2016.

The increase in debt expense in 2016 as compared to 2015 was primarily related to an increase in our weighted average outstanding principal balances as a result of a full year of interest on our 5.0% Senior Notes, which were issued in April 2015, and an increase in our interest rate on the amortization of our cap agreements in the fourth quarter of 2016. Our overall weighted average effective interest rate in 2016 was 4.43% as compared to 4.42% in 2015.

Corporate administrative support. Corporate administrative support consists primarily of labor, benefits and long-term incentive compensation expense, as well as professional fees for departments which provide support to all of our various operating lines of business. This is partially offset by internal management fees charged to our other lines of business for that support.

Corporate administrative support costs were approximately $45 million in 2017 and $14 million 2016. Corporate administrative support costs increased $31 million due to a decrease in internal management fees charged to our ancillary lines of business and increases in long-term incentive compensation and labor and benefits expenses, partially offset by decreases in professional fees and other general and administrative expenses.

Corporate administrative support costs were approximately $14 million in 2016 and $19 million in 2015. Corporate administrative support costs decreased $5 million primarily attributable to a decrease in long-term incentive compensation expense, primarily due to reductions in ultimate expected pay-outs as well as the departure of a senior executive, partially offset by increases in labor and benefits, professional fees, and other general and administrative expenses.

Other income. Other income was approximately $18 million in 2017 and $8 million in both 2016 and 2015, and consisted principally of interest income. Other income in 2017 as compared to 2016 increased approximately $10 million, primarily due to a decrease in foreign currency transaction losses. Other income in 2016 as compared to 2015 was flat, as short-term investment interest income increased but was offset by an increase in foreign currency transaction losses.

Provision for income taxes. The provision for income taxes for 2017, 2016 and 2015 represented an effective annualized tax rate of 23.1%, 26.6% and 30.1% of income from continuing operations, respectively. The effective tax rate in 2017 was lower primarily due to the enactment of new U.S. federal tax reform legislation known as the Tax Cuts and Jobs Act (the 2017 Tax Act) as signed into law on December 22, 2017. The 2017 Tax Act, among other changes, reduces the federal corporate income tax rate from 35% to 21%, effective January 1, 2018, resulting in a net income net tax benefit of $252 million in 2017 primarily related to a remeasurement of our net deferred tax liability. Excluding this item, our effective tax rate from continuing operations for 2017 was 41.1%. The effective tax rate in 2016 was lower primarily due to the gain on the APAC JV ownership changes, offset by goodwill impairment charges. See Note 12 to the consolidated financial statements for further information.

Noncontrolling interests

Net income attributable to noncontrolling interests for 2017, 2016 and 2015 was approximately $167 million, $153 million and $158 million, respectively. The increase in noncontrolling interests in 2017 was primarily due to additional income to noncontrolling interests related to the net gain on the settlement with the VA of $24 million, partially offset by the impairment of our vascular access reporting unit, which reduced income to noncontrolling interests by $2 million year over year.

The decrease in noncontrolling interests in 2016 was primarily due to the impairment of our vascular access reporting unit, which resulted in a decrease in income to noncontrolling interest of $8 million. The percentage of net U.S. dialysis and related lab services revenues generated from dialysis-related joint ventures was approximately 24% in 2017, and 23% in both 2016 and 2015.

Accounts receivable

Our consolidated accounts receivable balances at December 31, 2017 and December 31, 2016 were $1.715 billion and $1.504 billion, respectively, representing approximately 57 days and 52 days of revenue, respectively, net of the allowance for uncollectible accounts. The increase in consolidated DSO was primarily related to our U.S. dialysis and related lab services business and was due to changes we made in our collection policies and procedures to improve overall collections. We expect DSO to decline two to three days over the next few quarters as we continue to adjust and refine our collection operations for these new protocols. Our DSO calculation is based on the current quarter's average revenues per day. There were no significant changes during 2017 from 2016 in the amount of unreserved accounts receivable over one year old or the amounts pending approval from third-party payors.

As of December 31, 2017 and 2016, our net patient services accounts receivable balances more than six months old represents approximately 21% and 16% of our dialysis accounts receivable balances, respectively. The increase was primarily

due to changes we made in our collection policies and procedures to improve overall collections. There were no significant unreserved balances over one year old. Approximately 1% of our revenues are classified as patient pay. Substantially all revenue realized is from government and commercial payors, as discussed above.

Amounts pending approval from third-party payors associated with Medicare bad debt claims as of December 31, 2017 and 2016, other than the standard monthly billing, consisted of approximately $104 million and $105 million, respectively, and are classified as other receivables. Currently, a significant portion of our Medicare bad debt claims are typically paid to us before the Medicare fiscal intermediary audits the claims. However, payments received from Medicare are subject to adjustment based upon the actual results of these audits. Such audits typically occur one to four years after the claims are filed.

Liquidity and capital resources

Available liquidity. As of December 31, 2017, our cash balance was $508 million and we also had approximately $44 million in short-term investments. We had $300 million drawn on our $1.0 billion revolving line of credit under our senior secured credit facilities, in addition to the approximately $14 million committed for outstanding letters of credit. We also have approximately $90 million of additional outstanding letters of credit related to Kidney Care and $0.2 million of committed outstanding letters of credit related to DMG, which is backed by a certificate of deposit. We believe that we will have sufficient liquidity, operating cash flows and access to borrowings to fund our scheduled debt service payments and other obligations for the foreseeable future. Our primary sources of liquidity are cash from operations and cash from borrowings.

Consolidated cash flows from operations during 2017 was $1.9 billion, of which $1.6 billion was from continuing operations, compared with consolidated cash flows from operations of $2.0 billion for 2016, of which $1.7 billion was from continuing operations. Consolidated cash flows declined due to an increase in DSO and the timing of other working capital items, partially offset by the payment received from the settlement with the VA, net of associated tax payments. Cash flows from operations in 2017 included cash interest payments of approximately $425 million and cash tax payments of $387 million. Cash flows from operations in 2016 included cash interest payments of approximately $407 million and cash tax payments of $339 million.

Non-operating cash outflows in 2017 included $905 million for capital asset expenditures, including $559 million for new center developments and relocations and $346 million for maintenance and information technology. We also spent an additional $804 million for acquisitions. In addition, during 2017 we received $21 million associated with stock award exercises and other share issuances. We also made distributions to noncontrolling interests of $211 million, which included $24 million related to the noncontrolling interest portion of the VA settlement gain, and received contributions from noncontrolling interests of $75 million associated with new or existing joint ventures. We also repurchased a total of 12,966,672 shares of our common stock for $811 million, or an average price of $62.54 per share, of which $8 million was unsettled at December 31, 2017.

Consolidated cash flows from operations during 2016 was $2.0 billion, of which $1.7 billion was from continuing operations, compared with cash flows from operations of $1.6 billion for 2015, of which $1.2 billion was from continuing operations. The increase in our operating cash flows in 2016 as compared to 2015 was primarily due to payments of $494 million, or $304 million after-tax, made in connection with the settlement of a private civil suit in 2015 and the timing of other working capital items, offset by an increase in our income tax payments and a slight increase in our cash interest payments. Cash flows from operations in 2016 included cash interest payments of approximately $407 million and cash tax payments of $339 million. Cash flows from operations in 2015 included cash interest payments of approximately $405 million and cash tax payments of $156 million.

Non-operating cash outflows in 2016 included $829 million for capital asset expenditures, including $470 million for new center developments and relocations and $359 million for maintenance and information technology. We also spent an additional $564 million for acquisitions. During 2016, we also received $1.3 billion from the maturity and sale of investments, however these proceeds were principally used to repurchase other investments or to fund distributions from our deferred compensation plans. In addition, during 2016 we received $37 million associated with stock award exercises and other share issuances and related excess tax benefits. We also made distributions to noncontrolling interests of $192 million, and received contributions from noncontrolling interests of $48 million associated with new or existing joint ventures. We also repurchased a total of 16,649,090 shares of our common stock for $1.1 billion, or an average price of $64.41 per share. In addition, we settled $25 million in share repurchases related to 2015.

During 2017, in the U.S. we opened 121 dialysis centers, acquired 66 dialysis centers, including dialysis centers from the Renal Ventures acquisition, closed and merged ten dialysis centers, closed nine dialysis centers, divested six dialysis centers, deconsolidated seven dialysis centers which we continue to operate under management services agreements, and terminated two management services agreements. In addition, our international dialysis operations acquired 68 dialysis centers,

opened eight dialysis centers, and closed one dialysis center. In addition, our APAC JV acquired two dialysis centers, opened nine dialysis centers and closed three dialysis centers.

During 2017, our DMG business acquired four primary care physician practices, including the acquisition of Magan, seven private medical practices, and one independent physician association.

On December 5, 2017, we entered into an equity purchase agreement to sell our DMG division to Optum, a subsidiary of UnitedHealth Group Inc., for $4.9 billion in cash, subject to net working capital and other customary adjustments. The transaction is expected to close in 2018 and is subject to regulatory approval and other customary closing conditions.

During 2016, in the U.S. we opened 100 new dialysis centers, acquired a total of eight dialysis centers, closed and merged five centers, added two centers which we operate under a management and administrative services agreement, terminated two management and administration services agreements, deconsolidated three centers which we now operate under management and administrative services agreements and closed four centers. Outside the U.S., we acquired 21 dialysis centers and opened 12 new dialysis and hospital operated centers. In addition, our APAC JV acquired three dialysis and hospital operated centers.

During 2016, our DMG business acquired three primary care physician practices including the acquisition of TEC, and four private medical practices.

During the year ended December 31, 2017, we made mandatory principal payments under our senior secured credit facilities totaling $88 million on Term Loan A and $35 million on Term Loan B. During the year ended December 31, 2016, we made mandatory principal payments under our senior secured credit facilities totaling $63 million on Term Loan A and $35 million on Term Loan B.

Interest rate cap agreements

As of December 31, 2017, we maintain several currently effective interest rate cap agreements that were entered into in November 2014 with notional amounts totaling $3.5 billion. These cap agreements became effective September 30, 2016 and have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 3.50% on an equivalent amount of our debt. These cap agreements expire on June 30, 2018. As of December 31, 2017, these cap agreements had an immaterial fair value. During the year ended December 31, 2017, we recognized debt expense of $8.3 million from these caps. During the year ended December 31, 2017, we recorded a loss of $0.1 million in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

As of December 31, 2017, we also maintain several forward interest rate cap agreements that were entered into in October 2015 with notional amounts totaling $3.5 billion. These forward cap agreements will become effective June 29, 2018 and will have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 3.50% on an equivalent amount of its debt. These cap agreements expire on June 30, 2020. As of December 31, 2017, the total fair value of these cap agreements was an asset of approximately $1.0 million. During the year ended December 31, 2017, we recorded a loss of $8.8 million in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

Other items

As of December 31, 2017, our Term Loan B debt bears interest at LIBOR plus an interest rate margin of 2.75%. Term Loan B is subject to interest rate caps if LIBOR should rise above 3.50%. Term Loan A bears interest at LIBOR plus an interest rate margin of 2.00%. The capped portion of Term Loan A is $122.5 million. In addition, the uncapped portion of Term Loan A, which is subject to the variability of LIBOR, is $652.5 million. Interest rates on our senior notes are fixed by their terms.

Our overall weighted average effective interest rate on the senior secured credit facilities was 4.45%, based on the current margins in effect of 2.00% for Term Loan A and the Revolver and 2.75% for Term Loan B, as of December 31, 2017.

As of December 31, 2017, our interest rates are fixed on approximately 52% of our total debt.

Our overall weighted average effective interest rate during the year ended December 31, 2017 was 4.70% and as of December 31, 2017 was 4.88%.

As of December 31, 2017, we had $300 million drawn on our $1.0 billion revolving line of credit under our senior secured credit facilities, in addition to approximately $14.4 million committed for outstanding letters of credit. We also have approximately $90.1 million of additional outstanding letters of credit related to Kidney Care and $0.2 million of committed outstanding letters of credit related to DMG, which is backed by a certificate of deposit.

We believe that we will generate significant operating cash flows and will have sufficient liquidity to fund our scheduled debt service and other obligations for the foreseeable future, including the next 12 months, under the terms of our debt agreements. However, our primary sources of liquidity are cash from operations and cash from borrowings, including general, economic, financial, competitive, regulatory and other factors that are beyond our control, as described in the risk factor in Item IA Risk Factors under the heading "The level of our current and future debt could have an adverse impact on our business and our ability to generate cash to service our indebtedness and for other intended purposes depends on many factors beyond our control."

Goodwill

We elected to early adopt ASU No. 2017-04, *Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment*, effective January 1, 2017. The amendments in this ASU simplify the test for goodwill impairment by eliminating the second step in the assessment. All goodwill impairment tests performed during 2017 have been performed under this new guidance.

During the year ended December 31, 2016, we recognized a goodwill impairment charge of $28 million related to our vascular access reporting unit as a result of changes in future governmental reimbursement rates for this business and our expected ability to mitigate them. Specifically, on November 2, 2016, CMS released the 2017 Physician Fee Schedule Final Rule and the Ambulatory Surgical Center Payment Final Rule which reflected significant changes in reimbursement structure for this business unit.

During the year ended December 31, 2017, we recognized an additional goodwill impairment charge of $35 million at our vascular access reporting unit. This charge resulted primarily from continuing changes in our outlook for this business unit as our partners and operators continued to evaluate and make decisions concerning changes in operations, including termination of their management services agreements and center closures, as a result of the changes in reimbursement structure discussed above. As of December 31, 2017, there was no goodwill remaining at our vascular access reporting unit.

During the year ended December 31, 2017, we also performed annual impairment assessments for various other reporting units. As a result of these assessments, we also recognized a goodwill impairment charge of $2 million at one of our international reporting units during the year ended December 31, 2017. During the year ended December 31, 2015, we recognized a goodwill impairment charge of $4 million in another international reporting unit.

Based on our most recent assessments, we determined that reductions in reimbursement rates, changes in actual or expected growth rates, or other significant adverse changes in expected future cash flows or valuation assumptions could result in goodwill impairment charges in the future for the following reporting units, which remain at risk of goodwill impairment as of December 31, 2017:

Reporting unit	Goodwill balance as of December 31, 2017	Carrying amount coverage[1]	Sensitivities	
			Operating income[2]	Discount rate[3]
	(in millions)			
Kidney Care Germany	$ 316	13.7%	(1.6)%	(11.1)%
Kidney Care Portugal	$ 47	16.9%	(1.9)%	(6.0)%
Kidney Care Poland	$ 47	11.8%	(1.9)%	(6.0)%

(1) Excess of estimated fair value of the reporting unit over carrying amount as of the latest assessment date.

(2) Potential impact on estimated fair value of a sustained, long-term reduction of 3% in operating income as of the latest assessment date.

(3) Potential impact on estimated fair value of an increase in discount rates of 100 basis points as of the latest assessment date.

There were no major changes in the business, prospects, or expected future results of these reporting units from their latest assessment date through December 31, 2017.

Except as described above, none of our various other reporting units was considered at risk of significant goodwill impairment as of December 31, 2017. Since the dates of our last annual goodwill impairment tests, there have been certain developments, events, changes in operating performance and other changes in key circumstances that have affected our businesses. However, except as further described above, these did not cause management to believe it is more likely than not that the fair values of any of our reporting units would be less than their respective carrying amounts as of December 31, 2017.

Long-term incentive compensation

Long-term incentive program (LTIP) compensation includes both stock-based awards (principally stock-settled stock appreciation rights, restricted stock units and performance stock units) as well as long-term performance-based cash awards. Long-term incentive compensation expense, which was primarily general and administrative in nature, was attributed among our U.S. dialysis and related lab services business, corporate administrative support, and the ancillary services and strategic initiatives.

Our stock-based compensation awards are measured at their estimated fair values on the date of grant if settled in shares or at their estimated fair values at the end of each reporting period if settled in cash. The value of stock-based awards so measured is recognized as compensation expense on a cumulative straight-line basis over the vesting terms of the awards, adjusted for expected forfeitures.

During 2017, we granted approximately 1,692,154 stock-settled stock appreciation rights (SSARs) with an aggregate grant-date fair value of $24.5 million and a weighted-average expected life of approximately 4.2 years and approximately 528,968 stock units with an aggregate grant-date fair value of $34.8 million and a weighted-average expected life of approximately 3.4 years. We also granted 15,000 cash-settled stock-based awards with an aggregate grant-date fair value of $0.3 million.

For the years ended December 31, 2017 and 2016, long-term incentive compensation expense of $62.0 million and $65.0 million decreased by approximately $3.0 million and $59.0 million as compared to 2016 and 2015, respectively. This decrease in long-term incentive compensation expense was primarily due to cumulative revaluation of liability-based awards for reductions in estimated ultimate payouts, as well as the final vesting of a prior broad grant that is no longer contributing expense.

As of December 31, 2017, there was $98.0 million in total estimated but unrecognized long-term incentive compensation expense for LTIP awards outstanding, including $61.2 million relating to stock-based awards under our equity compensation plans. We expect to recognize the performance-based cash component of these LTIP costs over a weighted average remaining period of 1.1 years and the stock-based component of these LTIP costs over a weighted average remaining period of 1.4 years.

For the years ended December 31, 2017, 2016 and 2015, we received $13.5 million, $28.4 million and $45.7 million, respectively, in actual tax benefits upon the exercise of stock awards. Since we issue stock-settled stock appreciation rights rather than stock options, we did not receive cash proceeds from stock option exercises during the years ended December 31, 2017, 2016 and 2015.

Stock repurchases

We repurchased a total of 12,966,672 shares for $811 million, or an average price of $62.54 during the year ended December 31, 2017. We also repurchased a total of 16,649,090 shares for $1.1 billion, or an average price of $64.41 during the year ended December 31, 2016 and a total of 7,779,958 shares for $575 million, or an average price of $73.96 during the year ended December 31, 2015. Subsequent to December 31, 2017, we have repurchased 1,237,800 additional shares of our common stock for $93 million, or an average price of $74.96 per share, through February 22, 2018.

On October 10, 2017, our Board of Directors approved an additional share repurchase authorization in the amount of $1.3 billion. This share repurchase authorization was in addition to the $247 million remaining at that time under our Board of Directors' prior share repurchase authorization announced in July 2016. Accordingly, as of February 22, 2018, we have a total of $1.0 billion available under the current Board repurchase authorizations for additional share repurchases. Although these share repurchase authorizations do not have expiration dates, we remain subject to share repurchase limitations under the terms of our senior secured credit facilities and the indentures governing our senior notes.

Off-balance sheet arrangements and aggregate contractual obligations

In addition to the debt obligations reflected on our balance sheet, we have commitments associated with operating leases and letters of credit, as well as potential obligations associated with our equity investments in nonconsolidated businesses and to dialysis centers that are wholly-owned by third parties. Substantially all of our U.S. dialysis facilities are leased. We have potential obligations to purchase the noncontrolling interests held by third parties in several of our majority-owned joint ventures and other nonconsolidated entities. These obligations are in the form of put provisions that are exercisable at the third-party owners' discretion within specified periods as outlined in each specific put provision. If these put provisions were exercised, we would be required to purchase the third-party owners' equity interests at either the appraised fair market value or

a predetermined multiple of earnings or cash flows attributable to the equity interests put to us, which is intended to approximate fair value. The methodology we use to estimate the fair values of noncontrolling interests subject to put provisions assumes the higher of either a liquidation value of net assets or an average multiple of earnings, based on historical earnings, patient mix and other performance indicators that can affect future results, as well as other factors. The estimated fair values of noncontrolling interests subject to put provisions are a critical accounting estimate that involves significant judgments and assumptions and may not be indicative of the actual values at which the noncontrolling interests may ultimately be settled, which could vary significantly from our current estimates. The estimated fair values of noncontrolling interests subject to put provisions can fluctuate and the implicit multiple of earnings at which these noncontrolling interests obligations may be settled will vary significantly depending upon market conditions including potential purchasers' access to the capital markets, which can impact the level of competition for dialysis and non-dialysis related businesses, the economic performance of these businesses and the restricted marketability of the third-party owners' equity interests. The amount of noncontrolling interests subject to put provisions that employ a contractually predetermined multiple of earnings rather than fair value are immaterial. For additional information see Note 17 to the consolidated financial statements.

We also have certain other potential commitments to provide operating capital to several dialysis centers that are wholly-owned by third parties or centers in which we own a noncontrolling equity interest as well as to physician-owned vascular access clinics or medical practices that we operate under management and administrative services agreements.

The following is a summary of these contractual obligations and commitments as of December 31, 2017:

	Less than 1 year	1-3 years	4-5 years	After 5 years	Total
	(dollars in millions)				
Scheduled payments under contractual obligations:					
Long-term debt	$ 158	$ 1,078	$ 4,549	$ 3,318	$ 9,103
Interest payments on the senior notes	237	473	473	367	1,550
Interest payments on Term Loan B[1]	148	290	71	—	509
Interest payments on Term Loan A[2]	27	12	—	—	39
Kidney Care capital lease obligations	20	44	43	190	297
Kidney Care operating leases	447	807	665	1,304	3,223
DMG capital lease obligations	37	—	—	—	37
DMG operating leases	85	152	108	283	628
	$ 1,159	$ 2,856	$ 5,909	$ 5,462	$ 15,386
Potential cash requirements under other commitments:					
Letters of credit	105	$ —	$ —	$ —	$ 105
Noncontrolling interests subject to put provisions	613	211	96	91	1,011
Non-owned and minority owned put provisions	27	—	28	—	55
Operating capital advances	1	1	1	2	5
Purchase commitments	447	644	497	—	1,588
	$ 1,193	$ 856	$ 622	$ 93	$ 2,764

(1) Based upon current LIBOR-based interest rates in effect at December 31, 2017 plus an interest rate margin of 2.75% for Term Loan B.

(2) Based upon current LIBOR-based interest rates in effect at December 31, 2017 plus an interest rate margin of 2.00% for Term Loan A.

In 2010, we entered into and subsequently extended an agreement with FMC to purchase a certain amount of dialysis equipment, parts and supplies from FMC through December 31, 2017. In January 2018, we entered into a new agreement extending this agreement with FMC through December 31, 2020. The actual amount of purchases in future years from FMC will depend upon a number of factors, including the operating requirements of our centers, the number of centers we acquire, and growth of our existing centers.

We are party to agreements with Baxter Healthcare Corporation (Baxter) that commit us to purchase a certain amount of hemodialysis non-equipment product supplies, such as dialyzers, at fixed prices through 2018. In addition, in February 2018 we amended our agreement with Baxter related to certain peritoneal dialysis supplies. Under this new contract with Baxter we have committed to purchase a certain amount of peritoneal dialysis supplies at fixed prices (as set forth in the contract for each year) through 2022.

In January 2017, we entered into a Sourcing and Supply Agreement with Amgen USA Inc. (Amgen) that expires on December 31, 2022. Under the terms of the agreement, we will purchase EPO in amounts necessary to meet no less than 90% of our requirements for ESAs through the expiration of the contract. The actual amount of EPO that we will purchase will depend upon the amount of EPO administered during dialysis as prescribed by physicians and the overall number of patients that we serve.

Settlements of approximately $33 million of existing income tax liabilities for unrecognized tax benefits, including interest, penalties and other long-term tax liabilities, are excluded from the above table as reasonably reliable estimates of their timing cannot be made.

Supplemental information concerning certain Physician Groups and unrestricted subsidiaries

The following information is presented as supplemental data as required by the indentures governing our senior notes.

We provide services to certain physician groups, including those within our DMG business, which while consolidated in our financial statements for financial reporting purposes, are not subsidiaries of or owned by us, do not constitute "Subsidiaries" as defined in the indentures governing our outstanding senior notes, and do not guarantee those senior notes. In addition, we have entered into management agreements with these physician groups pursuant to which we receive management fees from the physician groups.

As of December 31, 2017, if these physician groups were not consolidated in our financial statements, our consolidated assets would have been approximately $18.522 billion and our consolidated other liabilities would have been approximately $3.342 billion. Our consolidated indebtedness would have remained approximately $9.400 billion due to these physician groups being classified as held for sale. For the year ended December 31, 2017, if these physician groups were not consolidated in our financial statements, our consolidated net income would have been reduced by approximately $21 million. Our consolidated total net revenues and consolidated operating income would have remained approximately $10.877 billion and $1.813 billion, respectively, due to these physician groups being reported as discontinued operations.

In addition, our DMG business owns a 67% equity interest in California Medical Group Insurance (CMGI), which is an Unrestricted Subsidiary as defined in the indentures governing our outstanding senior notes, and does not guarantee those senior notes. DMG's equity interest in CMGI is accounted for under the equity method of accounting, meaning that, although CMGI is not consolidated in our financial statements for financial reporting purposes, our consolidated income statement reflects our pro rata share of CMGI's net income within net loss from discontinued operations.

For the year ended December 31, 2017, excluding DMG's equity investment income attributable to CMGI, our consolidated net income would be decreased by approximately $19 thousand. See Note 29 to the consolidated financial statements for further details.

Contingencies

The information in Note 16 to the consolidated financial statements of this report is incorporated by reference in response to this item.

Critical accounting policies, estimates and judgments

Our consolidated financial statements and accompanying notes are prepared in accordance with United States generally accepted accounting principles. These accounting principles require us to make estimates, judgments and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities, contingencies and temporary equity. All significant estimates, judgments and assumptions are developed based on the best information available to us at the time made and are regularly reviewed and updated when necessary. Actual results will generally differ from these estimates. Changes in estimates are reflected in our financial statements in the period of change based upon on-going actual experience trends, or subsequent settlements and realizations depending on the nature and predictability of the estimates and contingencies. Interim changes in estimates are applied prospectively within annual periods. Certain accounting estimates, including those concerning revenue recognition and accounts receivable, impairments of goodwill and investments, accounting for income taxes, quarterly and annual variable compensation accruals, consolidation of variable interest entities, and fair value estimates are considered to be critical to evaluating and understanding our financial results because they involve inherently uncertain matters and their application requires the most difficult and complex judgments and estimates.

U.S. dialysis and related lab services revenue recognition and accounts receivable. There are significant estimating risks associated with the amount of U.S. dialysis and related lab services revenue that we recognize in a given reporting period. Payment rates are often subject to significant uncertainties related to wide variations in the coverage terms of the commercial

healthcare plans under which we receive payments. In addition, ongoing insurance coverage changes, geographic coverage differences, differing interpretations of contract coverage, and other payor issues complicate the billing and collection process. Net revenue recognition and allowances for uncollectible billings require the use of estimates of the amounts that will ultimately be realized considering, among other items, retroactive adjustments that may be associated with regulatory reviews, audits, billing reviews and other matters.

Revenues associated with Medicare and Medicaid programs are recognized based on (a) the payment rates that are established by statute or regulation for the portion of the payment rates paid by the government payor (e.g., 80% for Medicare patients) and (b) for the portion not paid by the primary government payor, the estimated amounts that will ultimately be collectible from other government programs paying secondary coverage (e.g., Medicaid secondary coverage), the patient's commercial health plan secondary coverage, or the patient. Our dialysis related reimbursements from Medicare are subject to certain variations under Medicare's single bundled payment rate system whereby our reimbursements can be adjusted for certain patient characteristics and certain other factors. Our revenue recognition depends upon our ability to effectively capture, document and bill for Medicare's base payment rate and these other factors. In addition, as a result of the potential range of variations that can occur in our dialysis-related reimbursements from Medicare under the single bundled payment rate system, our revenue recognition is subject to a greater degree of estimating risk.

Commercial healthcare plans, including contracted managed-care payors, are billed at our usual and customary rates; however, revenue is recognized based on estimated net realizable revenue for the services provided. Net realizable revenue is estimated based on contractual terms for the patients covered under commercial healthcare plans with which we have formal agreements, non-contracted commercial healthcare plan coverage terms if known, estimated secondary collections, historical collection experience, historical trends of refunds and payor payment adjustments (retractions), inefficiencies in our billing and collection processes that can result in denied claims for payments, a slowdown in collections, a reduction in the amounts that we expect to collect and regulatory compliance issues. Determining applicable primary and secondary coverage for our approximately 197,800 U.S. dialysis patients at any point in time, together with the changes in patient coverages that occur each month, requires complex, resource-intensive processes. Collections, refunds and payor retractions typically continue to occur for up to three years or longer after services are provided.

We generally expect the range of our U.S. dialysis and related lab services revenues estimating risk to be within 1% of its revenue, which can represent as much as approximately 5% of U.S. dialysis and related lab services' adjusted operating income. Changes in estimates are reflected in the then-current financial statements based on on-going actual experience trends, or subsequent settlements and realizations depending on the nature and predictability of the estimates and contingencies. Changes in revenue estimates for prior periods are separately disclosed and reported if material to the current reporting period and longer term trend analyses, and have not been significant.

Laboratory service revenues for current period dates of services are recognized at the estimated net realizable amounts to be received.

Impairments of goodwill and investments. We account for impairments of goodwill and equity method and other investments in accordance with the provisions of applicable accounting guidance. Goodwill is not amortized, but is assessed for impairment when changes in circumstances warrant and at least annually. An impairment charge would be recorded to the extent that the carrying amount of a reporting unit's goodwill exceeds its estimated fair value. Equity method and other investments are assessed for other-than-temporary impairment when changes in circumstances warrant. An other-than-temporary impairment charge is recorded when the fair value of an investment has fallen below its carrying amount and the shortfall is expected to be indefinitely or permanently unrecoverable.

Such changes can include, among others, changes in the legal environment, addressable market, business strategy, development or business plans, reimbursement structure, operating performance, future prospects, relationships with partners, and/or market value indications for the subject business. We use a variety of factors to assess changes in the financial condition, future prospects and other circumstances concerning the subject businesses and to estimate their fair value when applicable. Any change in the factors, assessments or assumptions involved could impact a determination of whether and when to assess goodwill or an investment for impairment as well as the outcome of such an assessment. These assessments and the related valuations can involve significant uncertainties and require significant judgment on various matters, some of which could be subject to reasonable disagreement.

Accounting for income taxes. Our income tax expense, deferred tax assets and liabilities, and liabilities for unrecognized tax benefits reflect management's best assessment of estimated current and future taxes to be paid. We are subject to income taxes in the United States and numerous state and foreign jurisdictions, and changes in tax laws or regulations may be proposed or enacted that could adversely affect our overall tax liability. The actual impact of any such laws or regulations, including the 2017 Tax Act, could be materially different from our current estimates.

Significant judgments and estimates are required in determining our consolidated income tax expense. Deferred income taxes arise from temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements, which will result in taxable or deductible amounts in the future. In evaluating our ability to recover our deferred tax assets within the jurisdiction from which they arise, we consider all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax-planning strategies, and results of recent operations, assumptions about the amount of future federal, state, and foreign pre-tax operating income adjusted for items that do not have tax consequences. The assumptions about future taxable income require significant judgments and are consistent with the plans and estimates we are using to manage the underlying businesses. To the extent that recovery is not likely, a valuation allowance is established. The allowance is regularly reviewed and updated for changes in circumstances that would cause a change in judgment about the realizability of the related deferred tax assets.

Variable compensation accruals. We estimate variable compensation accruals quarterly based upon the amounts expected to be earned and paid out resulting from the achievement of certain teammate-specific and/or corporate financial and operating goals. Our estimates, which include compensation incentives for bonuses and other awards, including long-term incentive programs, are updated periodically based on changes in our economic condition or cash flows that could ultimately impact the actual final payment amount. Actual results reflected in each fiscal quarter may vary due to the subjectivity involved in anticipating fulfillment of specific and/or corporate goals, as well as the final determination and approval of amounts by our Board of Directors, as applicable.

Consolidation of variable interest entities. We rely on the operating activities of certain entities that we do not directly own or control, but over which we have indirect influence and of which we are considered the primary beneficiary. Under accounting guidance applicable to variable interest entities, we have determined that these entities are to be included in our consolidated financial statements. The analyses upon which these determinations rest are complex, involve uncertainties, and require significant judgment on various matters, some of which could be subject to reasonable disagreement. While these determinations have a meaningful effect on the description and classification of various amounts in our consolidated financial statements, non-consolidation of these entities would not have had a material effect on our results of operations.

Fair value estimates. We rely on fair value measurements and estimates for purposes that require the recording, reassessment, or adjustment of the carrying amounts of certain assets, liabilities and noncontrolling interest subject to put provisions (temporary equity). These purposes can include the accounting for business combination transactions, impairment assessments for goodwill, investments, or other long-lived assets, and stock-based compensation, among others. The criticality of a particular fair value estimate to our consolidated financial statements depends upon the nature and size of the item being measured and the extent of uncertainties involved and the nature and magnitude or potential effect of assumptions and judgments required. Critical fair value estimates can involve significant uncertainties and require significant judgment on various matters, some of which could be subject to reasonable disagreement.

The FASB defines fair value as the amount at which an asset (or liability) could be bought (or incurred) or sold (or settled) between willing parties, that is, other than in a forced or liquidation sale. Critical fair value estimates can be required for measurement of goodwill and equity method and other investment impairments, as discussed previously. Fair value estimates can also be critical in accounting for major acquisitions or business combination transactions of significant size involving businesses or industries in which we and/or our professional valuation advisors do not have significant experience. In these cases, the nature and size of the item being measured and the extent of uncertainties involved, as well as the nature and magnitude or potential effect of assumptions and judgments required, can make the fair value estimate a critical accounting estimate.

Significant new accounting standards

See Note 1 to the consolidated financial statements included in this report for information regarding certain recent financial accounting standards that have been issued by the FASB.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

Interest rate sensitivity

The tables below provide information about our financial instruments that are sensitive to changes in interest rates. The table below presents principal repayments and current weighted average interest rates on our debt obligations as of December 31, 2017. The variable rates presented reflect the weighted average LIBOR rates in effect for all debt tranches plus interest rate margins in effect as of December 31, 2017. The Term Loan A margin in effect at December 31, 2017 is 2.00%, and along with the revolving line of credit, is subject to adjustment depending upon changes in certain of our financial ratios, including a leverage ratio. Term Loan B currently bears interest at LIBOR plus an interest rate margin of 2.75%.

	Expected maturity date					Thereafter	Total	Average interest rate	Fair value
	2018	2019	2020	2021	2022				
	(dollars in millions)								
Long term debt:									
Fixed rate	$ 36	$ 28	$ 27	$ 26	$ 1,276	$ 3,501	$ 4,894	5.28%	$ 4,961
Variable rate	$ 142	$ 1,021	$ 46	$ 3,282	$ 8	$ 7	$ 4,506	4.45%	$ 4,549

	Notional amount	Contract maturity date					Receive variable	Fair value
		2018	2019	2020	2021	2022		
		(dollars in millions)						
Cap agreements	$ 7,000	$ 3,500	$ —	$ 3,500	$ —	$ —	LIBOR above 3.5%	$ 1.0

Our senior secured credit facilities, which include Term Loan A and Term Loan B, consist of various individual tranches of debt that can range in maturity from one month to twelve months (currently, all tranches are one month in duration). For Term Loan A and Term Loan B, each tranche bears interest at a LIBOR rate that is determined by the duration of such tranche plus an interest rate margin. The LIBOR variable component of the interest rate for each tranche is reset as such tranche matures and a new tranche is established. LIBOR can fluctuate significantly depending upon conditions in the credit and capital markets.

As of December 31, 2017, our Term Loan A bears interest at LIBOR plus an interest rate margin of 2.00% and our Term Loan B debt bears interest at LIBOR plus an interest rate margin of 2.75%. LIBOR was greater than the 0.75% embedded LIBOR floor on Term Loan B, resulting in Term Loan B being subject to LIBOR-based interest rate volatility on the LIBOR variable component of our interest rate as of December 31, 2017. The LIBOR-based interest component is effectively limited to a maximum LIBOR rate of 3.50% on the outstanding principal debt on Term Loan B and on $122.5 million of Term Loan A as a result of the interest rate cap agreements, as described below. In addition, the uncapped portion of Term Loan A, which is subject to the variability of LIBOR, is $652.5 million. Interest rates on our senior notes are fixed by their terms.

As of December 31, 2017, we maintain several currently effective interest rate cap agreements that were entered into in November 2014 with notional amounts totaling $3.5 billion. These cap agreements became effective September 30, 2016 and have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 3.50% on an equivalent amount of our debt. These cap agreements expire on June 30, 2018. As of December 31, 2017, these cap agreements had an immaterial fair value. During the year ended December 31, 2017, we recognized debt expense of $8.3 million from these caps. During the year ended December 31, 2017, we recorded a loss of $0.1 million in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

As of December 31, 2017, we also maintain several forward interest rate cap agreements that were entered into in October 2015 with notional amounts totaling $3.5 billion. These forward cap agreements will become effective June 29, 2018 and will have the economic effect of capping the LIBOR variable component of our interest rate at a maximum of 3.50% on an equivalent amount of its debt. These cap agreements expire on June 30, 2020. As of December 31, 2017, the total fair value of these cap agreements was an asset of approximately $1.0 million. During the year ended December 31, 2017, we recorded a loss of $8.8 million in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

Our overall weighted average effective interest rate on the senior secured credit facilities was 4.45%, based on the current margins in effect of 2.00% for Term Loan A and the Revolver and 2.75% for Term Loan B, as of December 31, 2017.

Our overall weighted average effective interest rate during the year ended December 31, 2017 was 4.70% and as of December 31, 2017 was 4.88%.

As of December 31, 2017, we had $300 million drawn on our $1.0 billion revolving line of credit under our senior secured credit facilities, in addition to approximately $14.4 million committed for outstanding letters of credit. We also have approximately $90.1 million of additional outstanding letters of credit related to Kidney Care and $0.2 million of committed outstanding letters of credit related to DMG, which is backed by a certificate of deposit.

We believe that we will generate significant operating cash flows and will have sufficient liquidity to fund our scheduled debt service and other obligations and working capital needs for the foreseeable future, including the next 12 months, under the terms of our debt agreements. Our primary sources of liquidity are cash from operations and cash from borrowings.

One means of assessing exposure to debt-related interest rate changes is a duration-based analysis that measures the potential loss in net income resulting from a hypothetical increase in interest rates of 100 basis points across all variable rate maturities (referred to as a parallel shift in the yield curve). Under this model, with all else constant, it is estimated that such an increase would have reduced net income by approximately $27.6 million, $11.6 million, and $9.3 million, net of tax, for the years ended December 31, 2017, 2016, and 2015, respectively.

Exchange rate sensitivity

While our business is predominantly conducted in the U.S. we have developing operations in 11 other countries as well. For financial reporting purposes, the U.S. dollar is our reporting currency. However, the functional currencies of our operating businesses in other countries are typically those of the countries in which they operate. Therefore, changes in the rate of exchange between the U.S. dollar and the local currencies in which our international operations are conducted affect our results of operations and financial position as reported in our consolidated financial statements.

We have consolidated the balance sheets of our non-U.S. dollar denominated operations into U.S. dollars at the exchange rates prevailing at the balance sheet date and have translated their revenues and expense at average exchange rates during the period. Additionally, our individual subsidiaries are exposed to transactional risks mainly resulting from intercompany transactions between and among subsidiaries with different functional currencies. This exposes the subsidiaries to fluctuations in the rate of exchange between the invoicing or obligation currencies and the currency in which their local operations are conducted.

We evaluate our exposure to foreign exchange risk through the judgment of our regional and corporate management teams. Through 2017, our international operations remained fairly small relative to the size of our consolidated financial statements, constituting less than 6% of our consolidated assets as of December 31, 2017 and approximately 3% of our consolidated net revenues for the year ended December 31, 2017. In addition, our foreign currency translation gains (losses) were less than approximately 6%, (2)%, and (3)% of our consolidated operating income for the years ended December 31, 2017, 2016 and 2015.

Given the still small size of our international operations, management does not consider our exposure to foreign exchange risk to be significant to the consolidated enterprise. As such, through December 31, 2017 we have not engaged in transactions to hedge the exposure of our international transactions or net investments to foreign currency risk. However, we may do so in the future.

Item 8. Financial Statements and Supplementary Data.

See the Index to Financial Statements and Index to Financial Statement Schedules included at “Item 15. Exhibits, Financial Statement Schedules.”

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Management has established and maintains disclosure controls and procedures designed to ensure that information required to be disclosed in the reports that it files or submits pursuant to the Securities Exchange Act of 1934 (Exchange Act) as amended is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to our management including our Chief Executive Officer and Chief Financial Officer as appropriate to allow for timely decisions regarding required disclosures.

At the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures in accordance with the Exchange Act requirements. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective for timely identification and review of material information required to be included in our Exchange Act reports, including this report on Form 10-K. Management recognizes that these controls and procedures can provide only reasonable assurance of desired outcomes, and that estimates and judgments are still inherent in the process of maintaining effective controls and procedures.

There has not been any change in our internal control over financial reporting that was identified during the evaluation that occurred during the fourth fiscal quarter and that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

We intend to disclose any amendments or waivers to the Code of Ethics applicable to our principal executive officer, principal financial officer, principal accounting officer or controller or persons performing similar functions, on our website. In 2002, we adopted a Corporate Governance Code of Ethics that applies to our principal executive officer, principal financial officer, principal accounting officer or controller, and to all of our financial accounting and legal professionals who are directly or indirectly involved in the preparation, reporting and fair presentation of our financial statements and Exchange Act reports. The Code of Ethics is posted on our website, located at http://www.davita.com. We also maintain a Corporate Code of Conduct that applies to all of our employees, officers and directors, which is posted on our website.

Under our Corporate Governance Guidelines all Board Committees including the Audit Committee, Nominating and Governance Committee and the Compensation Committee, which are comprised solely of independent directors as defined within the listing standards of the New York Stock Exchange, have written charters that outline the committee's purpose, goals, membership requirements and responsibilities. These charters are regularly reviewed and updated as necessary by our Board of Directors. All Board Committee charters as well as the Corporate Governance Guidelines are posted on our website located at http://www.davita.com.

The other information required to be disclosed by this item will appear in, and is incorporated by reference from, the sections entitled "Proposal No. 1. Election of Directors", "Corporate Governance", and "Security Ownership of Certain Beneficial Owners and Management" included in our definitive proxy statement relating to our 2018 annual stockholder meeting.

Item 11. Executive Compensation.

The information required by this item will appear in, and is incorporated by reference from, the sections entitled "Executive Compensation" and "Compensation Committee Interlocks and Insider Participations" included in our definitive proxy statement relating to our 2018 annual stockholder meeting. The information required by Item 407(e)(5) of Regulation S-K will appear in and is incorporated by reference from the section entitled "Compensation Committee Report" included in our definitive proxy statement relating to our 2018 annual stockholder meeting; however, this information shall not be deemed to be filed.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The following table provides information about our common stock that may be issued upon the exercise of stock-settled stock appreciation rights, restricted stock units and other rights under all of our existing equity compensation plans as of December 31, 2017, which consist of our 2011 Incentive Award Plan and our Employee Stock Purchase Plan. The material terms of these plans are described in Note 18 to the consolidated financial statements.

Plan category	Number of shares to be issued upon exercise of outstanding options, warrants and rights	Weighted average exercise price of outstanding options, warrants and rights	Number of shares remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))	Total of shares reflected in columns (a) and (c)
	(a)	*(b)*	*(c)*	*(d)*
Equity compensation plans approved by shareholders	8,034,080[1]	67.92[2]	34,493,542	42,527,622
Equity compensation plans not requiring shareholder approval	—	—	—	—
Total	8,034,080	$ 67.92	34,493,542	42,527,622

(1) Includes 752,029 shares of common stock reserved for issuance in connection with performance share units and performance stock appreciation rights at the maximum number of shares issuable thereunder.

(2) This weighted-average includes performance stock appreciation rights at 100% of target amount and excludes full value awards such as restricted stock units and performance share units.

Other information required to be disclosed by Item 12 will appear in, and is incorporated by reference from, the section entitled "Security Ownership of Certain Beneficial Owners and Management" included in our definitive proxy statement relating to our 2018 annual stockholder meeting.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

The information required by this item will appear in, and is incorporated by reference from, the section entitled "Certain Relationships and Related Transactions" and the section entitled "Corporate Governance" included in our definitive proxy statement relating to our 2018 annual stockholder meeting.

Item 14. Principal Accounting Fees and Services.

The information required by this item will appear in, and is incorporated by reference from, the section entitled "Ratification of Appointment of Independent Registered Public Accounting Firm" included in our definitive proxy statement relating to our 2018 annual stockholder meeting.

PART IV

Item 15. Exhibits, Financial Statement Schedules.

(a) Documents filed as part of this Report:

(1) Index to Financial Statements:

(2) Index to Financial Statement Schedules:

(3) Exhibits

The information required by this Item is set forth in the Exhibit Index that precedes the signature pages of this Annual Report on Form 10-K.

Item 16. Form 10-K Summary.

None.

DAVITA INC.
MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining an adequate system of internal control over financial reporting designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles and which includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

During the last fiscal year, the Company conducted an evaluation, under the oversight of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's internal control over financial reporting. This evaluation was completed based on the criteria established in the report titled "Internal Control—Integrated Framework (2013)" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Based upon our evaluation under the COSO framework, we have concluded that the Company's internal control over financial reporting was effective as of December 31, 2017.

The Company's independent registered public accounting firm, KPMG LLP, has issued an attestation report on the Company's internal control over financial reporting, which report is included in this Annual Report.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
DaVita Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of DaVita Inc. and subsidiaries (the Company) as of December 31, 2017 and 2016, the related consolidated statements of income, comprehensive income, equity, and cash flow for each of the years in the three-year period ended December 31, 2017, and the related notes and financial statement Schedule II - Valuation and Qualifying Accounts (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2017, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 23, 2018 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ KPMG LLP

We have served as the Company's auditor since 2000.

Seattle, Washington
February 23, 2018

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
DaVita Inc.:

Opinion on Internal Control Over Financial Reporting

We have audited DaVita Inc. and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2017 and 2016, the related consolidated statements of income, comprehensive income, equity, and cash flow for each of the years in the three-year period ended December 31, 2017, and the related notes and financial statement Schedule II - Valuation and Qualifying Accounts (collectively, the consolidated financial statements), and our report dated February 23, 2018 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

1. Organization and summary of significant accounting policies

Organization

DaVita Inc. (the Company) has consisted of two major divisions, DaVita Kidney Care (Kidney Care) and DaVita Medical Group (DMG). The Kidney Care division is comprised of the Company's U.S. dialysis and related lab services, its ancillary services and strategic initiatives, including its international operations, and its corporate administrative support. The Company's largest line of business is its U.S. dialysis and related lab services business, which operates kidney dialysis centers in the U.S. for patients suffering from chronic kidney failure also known as end stage renal disease (ESRD). As of December 31, 2017, the Company operated or provided administrative services through a network of 2,510 U.S. outpatient dialysis centers in 46 states and the District of Columbia, serving a total of approximately 197,800 patients. In addition, as of December 31, 2017, the Company operated or provided administrative services to a total of 237 outpatient dialysis centers serving approximately 22,900 patients located in 11 countries outside of the U.S.

The Company's DMG division is a patient- and physician-focused integrated healthcare delivery and management company that provides medical services to members primarily through capitation contracts with some of the nation's leading health plans. On December 5, 2017, the Company entered into an equity purchase agreement to sell its DMG division to Collaborative Care Holdings, LLC (Optum), a subsidiary of UnitedHealth Group Inc. The transaction is expected to close in 2018 and is subject to regulatory approval and other customary closing conditions. As a result of this pending transaction, the DMG business has been reclassified as held for sale and its results of operations are reported as discontinued operations for all periods presented in these consolidated financial statements. For financial information about the DMG business, see Note 21.

The Company's U.S. dialysis and related lab services business qualifies as a separately reportable segment and the Company's other ancillary services and strategic initiatives, including its international operations, have been combined and disclosed in the other segments category.

Basis of presentation

These consolidated financial statements are prepared in accordance with United States generally accepted accounting principles (U.S. GAAP). The financial statements include DaVita Inc. and its subsidiaries, partnerships and other entities in which it maintains a majority voting interest or other controlling financial interest (collectively, the Company). All significant intercompany transactions and balances have been eliminated. Non-marketable equity investments are recorded under the equity or cost method of accounting based upon whether the Company has significant influence over the investee. For the Company's international subsidiaries, local currencies are considered their functional currencies. Translation adjustments result from translating the Company's international subsidiaries' financial statements from their functional currencies into the Company's reporting currency (USD). Prior year balances and amounts have been reclassified to conform to the current year presentation.

The Company has evaluated subsequent events through the date these consolidated financial statements were issued and has included all necessary adjustments and disclosures.

Use of estimates

The preparation of financial statements in conformity with U.S. GAAP requires the use of estimates and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities, contingencies and noncontrolling interests subject to put provisions. Although actual results in subsequent periods will differ from these estimates, such estimates are developed based on the best information available to management and management's best judgments at the time. All significant assumptions and estimates underlying the amounts reported in the financial statements and accompanying notes are regularly reviewed and updated when necessary. Changes in estimates are reflected in the financial statements based upon on-going actual experience trends, or subsequent settlements and realizations depending on the nature and predictability of the estimates and contingencies. Interim changes in estimates related to annual operating costs are applied prospectively within annual periods.

The most significant assumptions and estimates underlying these financial statements and accompanying notes involve revenue recognition and accounts receivable, contingencies, impairments of goodwill and investments, accounting for income taxes, long-term variable compensation accruals, consolidation of variable interest entities, and certain fair value estimates. Specific estimating risks and contingencies are further addressed within these notes to the consolidated financial statements.

Patient service net revenues and accounts receivable

U.S. dialysis and related lab services

U.S. dialysis patient service net revenues are recognized in the period services are provided. Revenues consist primarily of payments from Medicare, Medicaid and commercial health plans for dialysis and ancillary services provided to patients. A usual and customary fee schedule is maintained for the Company's dialysis treatments and other patient services; however, actual collectible revenue is normally recognized at a discount from the fee schedule.

Revenues associated with Medicare and Medicaid programs are recognized based on: (a) the payment rates that are established by statute or regulation for the portion of payment rates paid by the government payor (e.g., 80% for Medicare patients) and (b) for the portion not paid by the primary government payor, estimates of the amounts ultimately collectible from other government programs paying secondary coverage (e.g., Medicaid secondary coverage), the patient's commercial health plan secondary coverage, or the patient. The Company's reimbursements from Medicare are subject to certain variations under Medicare's single bundled payment rate system, whereby reimbursements can be adjusted for certain patient characteristics and other factors. The Company's revenue recognition will depend upon its ability to effectively capture, document and bill for Medicare's base payment rate as well as these other variable factors.

Revenues associated with commercial health plans are estimated based on contractual terms for the patients under healthcare plans with which the Company has formal agreements, non-contracted health plan coverage terms if known, estimated secondary collections, historical collection experience, historical trends of refunds and payor payment adjustments (retractions), inefficiencies in the Company's billing and collection processes that can result in denied claims for payments, and regulatory compliance matters.

Commercial revenue recognition also involves significant estimating risks. With many larger, commercial insurers the Company has several different contracts and payment arrangements, and these contracts often include only a subset of the Company's centers. It is often not possible to determine which contract, if any, should be applied prior to billing. In addition, for services provided by non-contracted centers, final collection may require specific negotiation of a payment amount, typically at a significant discount from the Company's usual and customary rates.

Under Medicare's bundled payment rate system, services covered by Medicare are subject to estimating risk, whereby reimbursements from Medicare can vary significantly depending upon certain patient characteristics and other variable factors. Even with the bundled payment rate system, Medicare payments for bad debt claims as established by cost reports require evidence of collection efforts. As a result, billing and collection of Medicare bad debt claims can be delayed significantly and final payment is subject to audit.

Medicaid payments, when Medicaid coverage is secondary, can also be difficult to estimate. For many states, Medicaid payment terms and methods differ from Medicare, and may prevent accurate estimation of individual payment amounts prior to billing.

The Company's range of revenue estimating risk for the U.S. dialysis and related lab services segment is generally expected to be within 1% of its revenue. Changes in revenue estimates for prior periods are not material.

Other revenues

Other revenues consist of the revenues associated with the ancillary services and strategic initiatives, management and administrative support services that are provided to outpatient dialysis centers that the Company does not own or in which the Company owns a noncontrolling interest, and administrative and management support services to certain other non-dialysis joint ventures in which the Company owns a noncontrolling interest. Revenues associated with pharmacy services are recognized as prescriptions are filled and shipped to patients. Revenues associated with disease management services, medical consulting services, clinical research programs, physician services, ESRD seamless care organizations, and comprehensive care are recognized in the period services are provided. Revenues associated with direct primary care are recognized over the membership period. Management fees are principally determined as a percentage of the managed operations' revenues or cash collections and in some cases an additional component based upon a percentage of operating income. Management fees are included in net revenues when earned.

Allowance for uncollectible accounts

Net revenue recognition and allowances for uncollectible billings require the use of estimates of the amounts that will ultimately be realized considering, among other items, retroactive adjustments that may be associated with regulatory reviews, audits, billing reviews and other matters. The Company's policy is to write off any uncollectible accounts receivable balance only after all collection efforts have been exhausted or when write off is mandated by federal or state policies or required by certain payor contracts. It is also the Company's policy to write off any accounts receivable balance associated with any payors or patients when the Company receives notification of a bankruptcy filing.

Other income

Other income includes interest income on cash and cash-equivalents and short- and long-term investments, other non-operating gains from investment transactions, and foreign currency transaction gains and losses.

Cash and cash equivalents

Cash equivalents are short-term highly liquid investments with maturities of three months or less at date of purchase.

Investments in debt and equity securities

The Company classifies certain debt securities as held-to-maturity and records them at amortized cost based on the Company's intentions and strategies concerning those investments. Equity securities that have readily determinable fair values, and certain other financial instruments that have readily determinable fair values or redemption values, are classified as available for sale and recorded at estimated fair value.

Inventories

Inventories are stated at the lower of cost (first-in, first-out) or market and consist principally of pharmaceuticals and dialysis-related supplies. Rebates related to inventory purchases are recorded when earned and are based on certain qualification requirements which are dependent on a variety of factors including future pricing levels by the manufacturer and data submission.

Property and equipment

Property and equipment is stated at cost less accumulated depreciation and amortization and is further reduced by any impairments. Maintenance and repairs are charged to expense as incurred. Depreciation and amortization expenses are computed using the straight-line method over the useful lives of the assets estimated as follows: buildings, 20 to 40 years; leasehold improvements, the shorter of their economic useful life or the expected lease term; and equipment and information systems, principally three to eight years. Disposition gains and losses are included in current operating expenses.

Amortizable intangibles

Amortizable intangible assets and liabilities include non-competition and similar agreements, lease agreements and hospital acute services contracts, each of which have finite useful lives. Amortization expense is computed using the straight-line method over the useful lives of the assets estimated as follows: non-competition and similar agreements, two to ten years; and lease agreements and hospital acute service contracts, over the term of the lease or contract period, respectively.

Indefinite-lived intangibles

Indefinite-lived intangible assets include international licenses and accreditations that allow the Company to be reimbursed for providing dialysis services to patients, each of which has an indefinite useful life.

Equity method and other investments

Equity investments that do not have readily determinable fair values are carried on the cost or equity method, as applicable, net of any other-than-temporary impairment. The Company classifies its cost and equity method investments as "Equity method and other investments" on its balance sheet. See Note 9 to these consolidated financial statements for further details.

Goodwill

Goodwill represents the difference between the fair value of businesses acquired and the fair value of the identifiable tangible and intangible net assets acquired. Goodwill is not amortized, but is assessed by individual reporting unit for impairment as circumstances warrant and at least annually. An impairment charge is recorded when a reporting unit's carrying amount is determined to exceed its fair value. The Company operates multiple reporting units. See Note 10 to these consolidated financial statements for further details.

Impairment of equity method and other investments

Equity method and other investments are assessed for other-than-temporary impairment when significant events or changes in circumstances indicate that an other-than-temporary impairment may have occurred. An other-than-temporary impairment charge is recorded when the fair value of an investment has fallen below its carrying amount and the shortfall is expected to be indefinitely or permanently unrecoverable.

Impairment of other long-lived assets

Other long-lived assets, including property and equipment and intangible assets, are reviewed for possible impairment whenever significant events or changes in circumstances indicate that an impairment may have occurred. Such changes can include changes in the Company's business strategy and plans, changes in the quality or structure of its relationships with its partners or deteriorating performance of individual outpatient dialysis centers or other business units. An impairment of an amortizable or depreciable asset is indicated when the sum of the expected future undiscounted net cash flows identifiable to the related asset group is less than its carrying amount. Impairment losses are measured based on the difference between the estimated fair value and the carrying amount of the subject asset group and are included in operating expenses.

Indefinite-lived intangible assets are reviewed for possible impairment at least annually and whenever significant events or changes in circumstances indicate that an impairment may have occurred.

Self-insurance

The Company is predominantly self-insured with respect to professional and general liability and workers' compensation risks through wholly-owned captive insurance companies, with excess or reinsurance coverage for additional risk. The Company is also predominantly self-insured with respect to employee medical and other health benefits. The Company records insurance liabilities for the professional and general liability, workers' compensation, and employee health benefit risks that it retains and estimates its liability for those risks using third party actuarial calculations that are based upon historical claims experience and expectations for future claims.

Income taxes

Federal and state income taxes are computed at currently enacted tax rates less tax credits using the asset and liability method. Deferred taxes are adjusted both for items that do not currently have tax consequences and for the cumulative effect of any changes in tax rates from those previously used to determine deferred tax assets or liabilities. Tax provisions include amounts that are currently payable, changes in deferred tax assets and liabilities that arise because of temporary differences between the timing of when items of income and expense are recognized for financial reporting and income tax purposes, changes in the recognition of tax positions and any changes in the valuation allowance caused by a change in judgment about the realizability of the related deferred tax assets. A valuation allowance is established when necessary to reduce deferred tax assets to amounts expected to be realized.

The Company uses a recognition threshold of more-likely-than-not and a measurement attribute on all tax positions taken or expected to be taken in a tax return in order to be recognized in the financial statements. Once the recognition threshold is met, the tax position is then measured to determine the actual amount of benefit to recognize in the financial statements.

Stock-based compensation

The Company's stock-based compensation awards are measured at their estimated fair values on the date of grant if settled in shares or at their estimated fair values at the end of each reporting period if settled in cash. The value of stock-based awards so measured is recognized as compensation expense on a cumulative straight-line basis over the vesting terms of the awards, adjusted for expected forfeitures. Stock-based compensation to be settled in shares is recorded to the Company's shareholders' equity, while stock-based compensation to be settled in cash is recorded to a liability.

Interest rate cap and swap agreements

The Company often carries a combination of currently effective interest rate caps, forward interest rate caps, or interest rate swaps on portions of its variable rate debt as a means of hedging its exposure to changes in LIBOR interest rates as part of its overall interest rate risk management strategy. These interest rate caps and swaps are not held for trading or speculative purposes and are typically designated as qualifying cash flow hedges. See Note 13 to these consolidated financial statements for further details.

Noncontrolling interests

Noncontrolling interests represent third-party equity ownership interests in entities which are consolidated by the Company for financial statement reporting purposes. As of December 31, 2017, third parties held noncontrolling equity interests in 589 consolidated legal entities, including 586 legal entities classified as continuing operations.

Fair value estimates

The Company relies on fair value measurements and estimates for purposes that require the recording, reassessment, or adjustment of the carrying amounts of certain assets, liabilities and noncontrolling interests subject to put provisions (temporary equity). These purposes can include the accounting for business combination transactions, impairment assessments for goodwill, investments, or other long-lived assets, and stock-based compensation, as well as recurring valuations of available for sale securities, noncontrolling interests in temporary equity, derivative instruments, and/or contingent consideration, as applicable. The Company has also classified its assets, liabilities and temporary equity into the appropriate fair value hierarchy levels as defined by the Financial Accounting Standards Board (FASB). See Note 24 to these consolidated financial statements for further details.

New accounting standards

On May 28, 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers,* which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. In 2015 and 2016, the FASB issued ASU 2015-14, ASU2016-08, ASU 2016-10, ASU 2016-11, and ASU 2016-12, *Revenue from Contracts with Customers (Topic 606)*, each of which amends the guidance in ASU 2014-09. These ASUs will replace most existing revenue recognition guidance in U.S. GAAP.

The Company will adopt these ASUs beginning January 1, 2018 using the cumulative effect method and will apply these ASUs only to those contracts that are not completed contracts as of that date with no cumulative effect adjustment. In preparation for the adoption of these ASUs, the Company has concluded that this guidance will result in a change to the presentation of its revenues, provision for uncollectible accounts and allowance for doubtful accounts, which will result in the Company's provision for uncollectible accounts being recorded as a reduction to revenue. The guidance will also require additional disaggregated revenue disclosures. The guidance will not have a material impact on the Company's consolidated financial position, results of operations, equity or cash flows. The Company expects to benefit from certain policy elections related to its adoption of these standards of approximately $30,000 in the first half of 2018.

In January 2016, the FASB issued ASU No. 2016-01, *Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities.* The amendments in this ASU revise accounting related to (i) the classification and measurement of investments in equity securities and (ii) the presentation of certain fair value changes for financial liabilities at fair value. The amendments in this ASU are effective for the Company beginning on January 1, 2018 and are to be applied through a cumulative effect adjustment to the statement of financial position. Early adoption is permitted under certain circumstances. The Company is still evaluating certain aspects of this ASU as well as the related impacts it may have on its consolidated financial statements when adopted on January 1, 2018.

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)*. The amendments in this ASU revise the accounting related to lessee accounting. Under the new guidance, lessees will be required to recognize a lease liability and a right-of-use asset for substantially all leases with lease terms in excess of twelve months. The new lease guidance also simplifies the accounting for sale and leaseback transactions primarily because lessees must recognize lease assets and lease liabilities. The amendments in this ASU are effective for the Company beginning on January 1, 2019 and are to be applied through a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. Early adoption is permitted. The Company has assembled an internal lease task force that meets regularly to discuss and evaluate the overall impact of this guidance on its consolidated financial statements and related disclosures, as well as the expected timing of adoption. The Company is currently gathering information from its existing leases and believes that the new standard will have a material impact on its consolidated balance sheet but will not have a material impact on its results of operations or liquidity. The Company expects to adopt this ASU on January 1, 2019, and continues to evaluate the effect that the implementation of this ASU will have on its consolidated financial statements, related disclosures and controls.

In March 2016, the FASB issued ASU No. 2016-07, *Investments - Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting.* The amendments in this ASU eliminate the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods that the investment had been held. The amendments in this ASU were effective for the Company beginning on January 1, 2017 and were applied prospectively. The adoption of this ASU did not have a material impact on the Company's consolidated financial statements.

In March 2016, the FASB issued ASU No. 2016-09, *Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*. The changes required by this ASU involve several aspects of the accounting for share-based payment transactions, including income tax consequences, classification of awards as either equity or liabilities, classification on the statement of cash flow, and an election on estimating forfeitures. The amendments in this ASU were effective for the Company beginning January 1, 2017. The method of adoption differs for each of the topics covered by the ASU. The primary effect of this ASU for the Company is the presentation of excess tax benefits or deficiencies as a component of income tax expense within the Company's consolidated statements of income rather than within additional paid-in capital on its consolidated balance sheet. In addition, these excess tax benefits or deficiencies are presented as an operating activity rather than as a financing activity on the consolidated statements of cash flow.

The Company elected to apply the presentation requirements for cash flows related to excess tax benefits prospectively. Additionally, the Company has elected to continue to estimate forfeitures expected to occur in determining the amount of compensation expense to be recognized each period. While this new standard may cause volatility in the Company's effective tax rates and diluted earnings per share due to tax effects of stock awards being recorded within the Company's consolidated statements of operations, adoption of this standard did not have a material impact on the Company's consolidated financial statements for the year ended December 31, 2017.

In August 2016, the FASB issued ASU No. 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*. The amendments in this ASU clarify how certain cash receipts and cash payments should be classified on the statement of cash flows. The new standard is effective for the Company beginning January 1, 2018 and is to be applied retrospectively to all periods presented. The adoption of this ASU is not expected to have a material impact on the Company's consolidated financial statements when adopted on January 1, 2018.

In October 2016, the FASB issued ASU No. 2016-16, *Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory*. The amendments in this ASU allow entities to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. The current guidance does not allow recognition until the asset has been sold to an outside party. The amendments in this ASU are effective for the Company beginning on January 1, 2018 and are to be applied on a modified retrospective basis. The adoption of this ASU is not expected to have a material impact on the Company's consolidated financial statements when adopted on January 1, 2018.

In January 2017, the FASB issued ASU No. 2017-04, *Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment*. The amendments in this ASU simplify the test for goodwill impairment by eliminating the second step in goodwill impairment assessments. The Company early adopted this ASU as of January 1, 2017.

In August 2017, the FASB issued ASU No. 2017-12, *Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities.* The amendments in this ASU better align an entity's risk management activities and

financial reporting for hedging relationships through changes to both the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. The amendments in the new ASU are effective for the Company on January 1, 2019 and are to be applied prospectively. The adoption of this ASU is not expected to have a material impact on the Company's consolidated financial statements when adopted on January 1, 2018.

In February 2018, the FASB issued ASU No. 2018-2, *Income Statement - Reporting Comprehensive Income (Topic 220), Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*, which allows for the reclassification of certain income tax effects related to the Tax Cuts and Jobs Act between "Accumulated other comprehensive income" and "Retained earnings." This ASU relates to the requirement that adjustments to deferred tax liabilities and assets related to a change in tax laws or rates to be included in "Income from continuing operations", even in situations where the related items were originally recognized in "Other comprehensive income" (rather than in "Income from continuing operations"). The amendments in this ASU are effective for all entities for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years, with early adoption permitted. Adoption of this ASU is to be applied either in the period of adoption or retrospectively to each period in which the effect of the change in the tax laws or rates were recognized. The Company is still evaluating certain aspects of this ASU as well as the related impacts it may have on the Company's consolidated financial statements.

2. Earnings per share

Basic earnings per share is calculated by dividing net income attributable to the Company, adjusted for any change in noncontrolling interest redemption rights in excess of fair value, by the weighted average number of common shares and vested stock units outstanding, net of shares held in escrow that under certain circumstances may be returned to the Company.

Diluted earnings per share includes the dilutive effect of outstanding stock-settled stock appreciation rights (SSARs) and unvested stock units (under the treasury stock method) as well as shares held in escrow that the Company expects will remain outstanding.

The reconciliations of the numerators and denominators used to calculate basic and diluted net income per share are as follows:

	Year ended December 31,		
	2017	2016	2015
	(shares in thousands)		
Numerators:			
Net income from continuing operations attributable to DaVita Inc.	$ 901,277	$ 1,032,373	$ 323,199
Net loss from discontinued operations attributable to DaVita Inc.	(237,659)	(152,499)	(53,467)
Net income attributable to DaVita Inc. for basic earnings per share calculation	$ 663,618	$ 879,874	$ 269,732
Basic:			
Weighted average shares outstanding during the period	190,820	203,835	214,062
Contingently returnable shares held in escrow for the DaVita HealthCare Partners merger	(2,194)	(2,194)	(2,194)
Weighted average shares for basic earnings per share calculation	188,626	201,641	211,868
Basic net income from continuing operations per share attributable to DaVita Inc.	$ 4.78	$ 5.12	$ 1.53
Basic net loss from discontinued operations per share attributable to DaVita Inc.	(1.26)	(0.76)	(0.26)
Basic net income per share attributable to DaVita Inc.	$ 3.52	$ 4.36	$ 1.27
Diluted:			
Weighted average shares outstanding during the period	190,820	203,835	214,062
Assumed incremental shares from stock plans	529	1,070	2,190
Weighted average shares for diluted earnings per share calculation	191,349	204,905	216,252
Diluted net income from continuing operations per share attributable to DaVita Inc.	$ 4.71	$ 5.04	$ 1.49
Diluted net loss from discontinued operations per share attributable to DaVita Inc.	(1.24)	(0.75)	(0.24)
Diluted net income per share attributable to DaVita Inc.	$ 3.47	$ 4.29	$ 1.25
Anti-dilutive stock-settled awards excluded from calculation[(1)]	4,350	2,523	1,365

(1) Shares associated with stock-settled stock appreciation rights excluded from the diluted denominator calculation because they are anti-dilutive under the treasury stock method.

3. Investments in debt and equity securities

The Company classifies certain debt securities as held-to-maturity and records them at amortized cost based on the Company's intentions and strategies concerning those investments. Equity securities that have readily determinable fair values, and certain other financial instruments that have readily determinable fair values or redemption values, are classified as available for sale and recorded at estimated fair value.

The Company's investments in these securities and certain other financial instruments consist of the following:

	December 31, 2017			December 31, 2016		
	Held to maturity	Available for sale	Total	Held to maturity	Available for sale	Total
Certificates of deposit, commercial paper and money market funds due within one year	$ 42,316	$ —	$ 42,316	$ 255,781	$ —	$ 255,781
Investments in mutual funds and common stock	—	38,895	38,895	50,000	31,197	81,197
	$ 42,316	$ 38,895	$ 81,211	$ 305,781	$ 31,197	$ 336,978
Short-term investments	$ 42,316	$ 1,200	$ 43,516	$ 305,781	$ 1,200	$ 306,981
Long-term investments	—	37,695	37,695	—	29,997	29,997
	$ 42,316	$ 38,895	$ 81,211	$ 305,781	$ 31,197	$ 336,978

(dollars in thousands, except per share data)

The cost of certificates of deposit, commercial paper and money market funds at December 31, 2017 and 2016 approximate their fair value. As of December 31, 2017 and 2016, available for sale investments included $8,416 and $3,701, respectively, of gross pre-tax unrealized gains. During 2017 and 2016 the Company recorded gross pre-tax unrealized gains of $5,075 and $1,802, respectively, in other comprehensive income associated with changes in the fair value of these investments. During 2017, the Company sold investments in mutual funds and common stock for net proceeds of $6,408, and recognized a pre-tax gain of $360, or $220 after tax, that was previously recorded in other comprehensive income. During 2016, the Company sold investments in mutual funds and common stock for net proceeds of $14,971, and recognized a pre-tax gain of $690, or $423 after tax, that was previously recorded in other comprehensive income.

Investments in mutual funds classified as available for sale are held within trusts to fund existing obligations associated with several of the Company's non-qualified deferred compensation plans.

4. Accounts receivable

Approximately 21% and 16% of the Company's net patient services accounts receivable balances as of December 31, 2017 and 2016, respectively, were more than six months old. The increase was primarily due to changes the Company made in its collection policies and procedures to improve overall collections. There were no significant balances over one year old. Accounts receivable are principally from Medicare and Medicaid programs and commercial insurance plans.

Accounts receivable are reduced by an allowance for doubtful accounts. In evaluating the ultimate collectability of its accounts receivable, the Company analyzes its historical cash collection experience and trends for each payor to estimate the adequacy of the allowance for doubtful accounts and the amount of the provision for uncollectible accounts. Management regularly updates its analysis based upon the most recent information available to it to determine its current provision for uncollectible accounts and the adequacy of its allowance for doubtful accounts.

For receivables associated with U.S. dialysis and related lab services covered by government payors, like Medicare, the Company receives 80% of the payment directly from Medicare as established under the government's bundled payment system and determines an appropriate allowance for doubtful accounts and provision for uncollectible accounts on the remaining balance due depending upon the Company's estimate of the amounts ultimately collectible from other secondary coverage sources or from the patients. For receivables associated with services to patients covered by commercial payors that are either based upon contractual terms or for non-contracted health plan coverage, the Company provides an allowance for doubtful accounts by recording a provision for uncollectible accounts based upon its historical collection experience, potential inefficiencies in its billing processes and for which collectability is determined to be unlikely.

Approximately 1% of the Company's U.S. dialysis and related lab services net accounts receivable are associated with patient pay and it is the Company's policy to reserve 100% of the outstanding accounts receivable balances for dialysis services when those amounts due are outstanding for more than three months.

During the year ended December 31, 2017, the Company's allowance for doubtful accounts decreased by $20,498. The decrease in 2017 was primarily due to an increase in write-offs of aged balances from an increase in uninsured and underinsured uncollectible patient balances related to the U.S. dialysis and related lab business. During the year ended December 31, 2016, the Company's allowance for doubtful accounts decreased by $12,837. The decrease in 2016 was primarily due to an increase in the write-offs of patient pay billings in the Company's U.S. dialysis business. The decrease was also due to a reduction in accounts receivable older than six months.

5. Other receivables

Other receivables were comprised of the following:

	December 31,	
	2017	2016
Supplier rebates and non-trade receivables	$ 268,949	$ 183,498
Medicare bad debt claims	103,970	104,658
	$ 372,919	$ 288,156

(dollars in thousands, except per share data)

6. Prepaid and other current assets

Other current assets were comprised of the following:

	December 31,	
	2017	2016
Prepaid expenses	$ 104,727	$ 96,818
Other	7,331	2,692
	$ 112,058	$ 99,510

7. Property and equipment

Property and equipment were comprised of the following:

	December 31,	
	2017	2016
Land	$ 33,814	$ 26,339
Buildings	473,489	429,039
Leasehold improvements	2,816,675	2,495,070
Equipment and information systems, including internally developed software	2,352,246	2,182,912
New center and capital asset projects in progress	576,651	429,037
	6,252,875	5,562,397
Less accumulated depreciation	(3,103,662)	(2,698,276)
	$ 3,149,213	$ 2,864,121

Depreciation expense on property and equipment was $544,129, $494,945, and $444,720 for 2017, 2016 and 2015, respectively.

In addition, during the first quarter of 2017, the Company recognized an asset impairment charge of $15,168 related to the restructuring of its pharmacy business.

Interest on debt incurred during the development of new centers and other capital asset projects is capitalized as a component of the asset cost based on the respective in-process capital asset balances. Interest capitalized was $19,176, $12,990 and $9,723 for 2017, 2016 and 2015, respectively.

8. Intangibles

Intangible assets other than goodwill were comprised of the following:

	December 31,	
	2017	2016
Noncompetition and other agreements	$ 429,140	$ 407,220
Lease agreements	7,623	7,244
Indefinite-lived assets	33,255	1,125
Other	583	583
	470,601	416,172
Less accumulated amortization	(356,774)	(342,668)
	$ 113,827	$ 73,504

Amortization expense from amortizable intangible assets, other than lease agreements, was $15,782, $14,552, and $19,185 for 2017, 2016 and 2015, respectively. Lease agreement intangible assets and liabilities were amortized to rent expense in the amounts of $(203), $(232) and $(331) for 2017, 2016 and 2015, respectively.

During the years ended December 31, 2017, 2016 and 2015, the Company recognized no impairment charges on any intangible assets other than goodwill.

(dollars in thousands, except per share data)

Amortizable intangible liabilities as of December 31, 2017 and 2016 were comprised of lease agreements of $5,447 and $6,011, respectively, which were net of accumulated amortization of $3,508 and $3,618, respectively.

There was no amortization benefit recognized from the alliance and product supply agreement in 2017 and 2016 as it expired in September 2015. Amortization benefit related to this agreement was $3,997 for 2015.

Lease agreement intangible liabilities are classified in other long-term liabilities and amortized to rent expense.

Scheduled amortization charges from amortizable intangible assets and liabilities as of December 31, 2017 were as follows:

	Noncompetition and other agreements	Lease liabilities	Other
2018	$ 15,581	$ (849)	$ 102
2019	14,051	(658)	87
2020	12,629	(628)	44
2021	9,929	(602)	—
2022	6,808	(553)	—
Thereafter	21,341	(2,157)	—
Total	$ 80,339	$ (5,447)	$ 233

9. Equity method and other investments

Equity investments that do not have readily determinable fair values are carried on the cost or equity method, as applicable. The Company maintains equity method investments in nonconsolidated investees as well as minor cost method investments in private securities of certain other healthcare businesses. The Company classifies its non-marketable cost- and equity method investments as "Equity method and other investments" on its balance sheet.

As described in Note 20, effective as of August 1, 2016, the Company deconsolidated its Asia Pacific dialysis business held by DaVita Care Pte. Ltd. (the APAC JV), adjusted its retained investment in the APAC JV to estimated fair value at that time, and has accounted for this retained investment on the equity method since that time.

During the year ended December 31, 2017, the Company recognized a non-cash other-than-temporary impairment charge of $280,066 on its investment in the APAC JV. This charge resulted from changes in its expectations for the joint venture based on continuing market research and assessments by both the Company and the APAC JV concerning the size of the addressable market available to the joint venture at attractive risk-adjusted returns. The Company estimated the fair value of its retained interest in the APAC JV with the assistance of an independent third party valuation firm based on information available to management as of December 31, 2017. After this charge, the Company’s investment in the APAC JV was carried at $160,481 as of December 31, 2017.

During the year ended December 31, 2016, the Company recorded an impairment of $14,993 related to an investment at one of its other international reporting units.

Total equity method and other investments in nonconsolidated businesses were $245,534 and $492,039 at December 31, 2017 and 2016, respectively. The decrease in these equity investments was primarily due to the impairment of the Company's investment in the APAC JV. During 2017, 2016 and 2015, the Company recognized equity investment (loss) income of $(8,640), $16,874 and $13,919, respectively, from its equity method investments in nonconsolidated businesses.

(dollars in thousands, except per share data)

10. Goodwill

Changes in the carrying value of goodwill by reportable segments were as follows:

	U.S. dialysis and related lab services	Other ancillary services and strategic initiatives	Consolidated total
Balance at January 1, 2016	$ 5,629,183	$ 267,032	$ 5,896,215
Acquisitions	75,295	123,632	198,927
Divestitures	(12,891)	(29,645)	(42,536)
Goodwill impairment charges	—	(28,415)	(28,415)
Foreign currency and other adjustments	—	(8,816)	(8,816)
Balance at December 31, 2016	$ 5,691,587	$ 323,788	$ 6,015,375
Acquisitions	485,434	131,598	617,032
Divestitures	(32,260)	(126)	(32,386)
Goodwill impairment charges	—	(36,196)	(36,196)
Foreign currency and other adjustments	—	46,454	46,454
Balance at December 31, 2017	$ 6,144,761	$ 465,518	$ 6,610,279
Goodwill	$ 6,144,761	$ 536,038	$ 6,680,799
Accumulated impairment charges	—	(70,520)	(70,520)
	$ 6,144,761	$ 465,518	$ 6,610,279

The Company elected to early adopt ASU No. 2017-04, *Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment* effective January 1, 2017. The amendments in this ASU simplify the test for goodwill impairment by eliminating the second step in the assessment. All goodwill impairment tests performed during 2017 have been performed under this new guidance.

Each of the Company's operating segments described in Note 25 to these consolidated financial statements represents an individual reporting unit for goodwill impairment testing purposes, except that each sovereign jurisdiction within the Company's international operating segments is considered a separate reporting unit.

Within the U.S. dialysis and related lab services operating segment, the Company considers each of its dialysis centers to constitute an individual business for which discrete financial information is available. However, since these dialysis centers have similar operating and economic characteristics, and the allocation of resources and significant investment decisions concerning these businesses are highly centralized and the benefits broadly distributed, the Company has aggregated these centers and deemed them to constitute a single reporting unit.

The Company has applied a similar aggregation to the vascular access service centers in its vascular access services reporting unit, to the physician practices in its physician services and direct primary care reporting units, and to the dialysis centers within each international reporting unit. For the Company's other operating segments, discrete business components below the operating segment level constitute individual reporting units.

During the year ended December 31, 2016, the Company recognized a goodwill impairment charge of $28,415 related to the Company's vascular access reporting unit as a result of changes in future governmental reimbursement rates for this business and the Company's expected ability to mitigate them. Specifically, on November 2, 2016, CMS released the 2017 Physician Fee Schedule Final Rule and the Ambulatory Surgical Center Payment Final Rule which reflected significant changes in reimbursement structure for this business unit.

During the year ended December 31, 2017, the Company recognized an additional goodwill impairment charge of $34,696 at its vascular access reporting unit. This charge resulted primarily from continuing changes in the Company's outlook for this business unit as the Company's partners and operators continued to evaluate and make decisions concerning changes in operations, including termination of their management services agreements and center closures, as a result of the changes in reimbursement structure discussed above. As of December 31, 2017, there was no goodwill remaining at the Company's vascular access reporting unit.

(dollars in thousands, except per share data)

During the year ended December 31, 2017, the Company also performed annual impairment assessments for various other reporting units. As a result of these assessments, the Company also recognized a goodwill impairment charge of $1,500 at one of its international reporting units during the year ended December 31, 2017. During the year ended December 31, 2015, the Company also recognized a goodwill impairment charge of $4,066 at another international reporting unit.

Based on the most recent assessments, the Company determined that reductions in reimbursement rates, changes in actual or expected growth rates, or other significant adverse changes in expected future cash flows or valuation assumptions could result in goodwill impairment charges in the future for the following reporting units, which remain at risk of goodwill impairment as of December 31, 2017:

Reporting unit	Goodwill balance as of December 31, 2017	Carrying amount coverage[1]	Sensitivities	
			Operating income[2]	Discount rate[3]
Kidney Care Germany	$ 316,369	13.7%	(1.6)%	(11.1)%
Kidney Care Portugal	$ 46,713	16.9%	(1.9)%	(6.0)%
Kidney Care Poland	$ 46,610	11.8%	(1.9)%	(6.0)%

(1) Excess of estimated fair value of the reporting unit over carrying amount as of the latest assessment date.

(2) Potential impact on estimated fair value of a sustained, long-term reduction of 3% in operating income as of the latest assessment date.

(3) Potential impact on estimated fair value of an increase in discount rates of 100 basis points as of the latest assessment date.

There were no major changes in the business, prospects, or expected future results of these reporting units from their latest assessment date through December 31, 2017.

Except as described above, none of the Company's other reporting units were considered at risk of significant goodwill impairment as of December 31, 2017. Since the dates of the Company's last annual goodwill impairment tests, there have been certain developments, events, changes in operating performance and other changes in key circumstances that have affected the Company's businesses. However, except as further described above, these did not cause management to believe it is more likely than not that the fair values of any of the Company's reporting units would be less than their respective carrying amounts as of December 31, 2017.

11. Other liabilities

Other liabilities were comprised of the following:

	December 31,	
	2017	2016
Payor refunds and retractions	$ 292,370	$ 270,298
Insurance and self-insurance accruals	64,924	76,857
Accrued interest	83,362	82,234
Accrued non-income tax liabilities	28,317	23,643
Other	83,689	125,860
	$ 552,662	$ 578,892

12. Income taxes

The Company accounts for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements. Under this method, deferred tax assets and liabilities are determined on the basis of the differences between the financial statement and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse.

(dollars in thousands, except per share data)

Income before income taxes from continuing operations consisted of the following:

	Year ended December 31,		
	2017	2016	2015
Domestic	$ 1,725,822	$ 1,278,754	$ 730,249
International	(326,036)	344,351	(41,862)
	$ 1,399,786	$ 1,623,105	$ 688,387

Income tax expense (benefit) for continuing operations consisted of the following:

	Year ended December 31,		
	2017	2016	2015
Current:			
Federal	$ 330,191	$ 322,940	$ 124,503
State	47,228	44,525	20,442
International	3,422	1,928	856
Total current income tax	380,841	369,393	145,801
Deferred:			
Federal	(98,760)	88,412	71,016
State	37,347	(28,530)	(9,737)
International	4,431	2,486	430
Total deferred income tax	(56,982)	62,368	61,709
	$ 323,859	$ 431,761	$ 207,510

Income taxes are allocated between continuing and discontinued operations as follows:

	Year ended December 31,		
	2017	2016	2015
Continuing operations	$ 323,859	$ 431,761	$ 207,510
Discontinued operations	(364,856)	24,052	88,216
	$ (40,997)	$ 455,813	$ 295,726

The reconciliation between the Company's effective tax rate from continuing operations and the U.S. federal income tax rate is as follows:

	Year ended December 31,		
	2017	2016	2015
Federal income tax rate	35.0 %	35.0 %	35.0 %
State income taxes, net of federal benefit	3.7	2.6	1.7
Gain on APAC JV ownership changes	(0.2)	(9.9)	—
APAC investment impairment	6.4	—	—
Impact of 2017 Tax Act	(20.5)	—	—
Other	2.0	1.8	2.3
Impact of noncontrolling interests primarily attributable to non-tax paying entities	(3.3)	(2.9)	(8.9)
Effective tax rate	23.1 %	26.6 %	30.1 %

On December 22, 2017, the President signed into law the tax legislation known as the Tax Cuts and Jobs Act (the 2017 Tax Act). The 2017 Tax Act includes a number of changes to existing U.S. tax laws that impact the Company, most notably a reduction in the U.S. corporate income tax rate from 35.0% to 21.0% effective January 1, 2018. The 2017 Tax Act also provides for full expensing of qualified assets placed into service after September 27, 2017, as well as prospective changes beginning in 2018, imposes a one-time transition tax on certain foreign subsidiaries, and changes how foreign earnings are subject to U.S. tax prospectively.

(dollars in thousands, except per share data)

The Company recognized the income tax effects of the 2017 Tax Act in its 2017 financial statements in accordance with Staff Accounting Bulletin No. 118, which provides SEC staff guidance for the application of ASC Topic 740, *Income Taxes*, in the reporting period in which the 2017 Tax Act was signed into law. As such, the Company's financial results reflect the income tax effects of the 2017 Tax Act for which accounting under ASC Topic 740 is complete and provisional amounts, primarily as it relates to the full expensing provisions of the 2017 Tax Act, for those specific income tax effects for which the accounting is incomplete but a reasonable estimate could be determined.

The Company has completed the accounting for income taxes with respect to the mandatory one-time tax on accumulated earnings of its foreign subsidiaries and has determined that there is no mandatory repatriation and therefore no income tax liability associated with this one-time tax.

The Company measures deferred tax assets and liabilities using enacted tax rates that will apply in the years in which the temporary differences are expected to be recovered or paid. Accordingly, the Company's deferred tax assets and liabilities were remeasured to reflect a reasonable estimate of the reduction in the U.S. corporate income tax rate from 35.0% to 21.0%, resulting in a provisional $251,510 net tax benefit.

While the Company has substantially completed its provisional analysis of the income tax effects of the 2017 Tax Act and recorded a reasonable estimate of such effects, the net one-time benefit related to the 2017 Tax Act may differ, possibly materially, due to, among other things, further refinement of the underlying calculations, changes in interpretations and assumptions that the Company has made, additional guidance that may be issued by the U.S. Government, and actions and related accounting policy decisions the Company may take as a result of the 2017 Tax Act. The Company will complete its analysis over a one-year measurement period ending December 22, 2018, and any adjustments during this measurement period will be included in net earnings from continuing operations as an adjustment to income tax expense in the reporting period in which such adjustments are determined.

Deferred tax assets and liabilities arising from temporary differences for continuing operations were as follows:

	December 31,	
	2017	2016
Receivables	$ 19,705	$ 25,197
Accrued liabilities	96,537	224,712
Net operating loss carryforwards	108,429	128,813
Other	37,794	73,525
Deferred tax assets	262,465	452,247
Valuation allowance	(61,282)	(56,016)
Net deferred tax assets	201,183	396,231
Intangible assets	(501,763)	(676,781)
Property and equipment	(100,376)	(141,919)
Investments in partnerships	(61,529)	(95,936)
Other	(23,762)	(12,464)
Deferred tax liabilities	(687,430)	(927,100)
Net deferred tax liabilities	$ (486,247)	$ (530,869)

At December 31, 2017, the Company had federal net operating loss carryforwards of approximately $137,852 that expire through 2036, although a substantial amount expire by 2028. The Company also had state net operating loss carryforwards of $445,554 that expire through 2036 and international net operating loss carryforwards of $138,717, some of which have an indefinite life. The utilization of a portion of these losses may be limited in future years based on the profitability of certain entities. The net increase of $5,266 in the valuation allowance is primarily due to newly created net operating loss carryforwards in state and foreign jurisdictions that the Company does not anticipate being able to utilize.

The 2017 Tax Act includes a mandatory one-time tax on accumulated earnings of foreign subsidiaries, and as a result, all previously unremitted earnings for which no U.S. deferred tax liability had been accrued would now be subject to U.S. tax. Irrespective of the fact that the Company will not experience any one-time tax under this provision of the 2017 Tax Act, it

(dollars in thousands, except per share data)

intends to continue to indefinitely reinvest these earnings, as well as capital invested and future earnings from its foreign subsidiaries to fund its international operations. In addition, the Company expects future U.S. cash generation will be sufficient to meet future U.S. cash needs. Determination of the amount of any applicable deferred taxes on the earnings is not practical since the computation would depend on a number of factors that cannot be known unless a decision is made to repatriate the earnings.

Unrecognized tax benefits

A reconciliation of the beginning and ending liability for unrecognized tax benefits that do not meet the more-likely-than-not threshold is as follows:

	Year ended December 31,	
	2017	2016
Beginning balance	$ 24,066	$ 39,011
Additions for tax positions related to current year	7,606	9,714
Additions for tax positions related to prior years	804	—
Reductions related to lapse of applicable statute	(1,380)	(1,277)
Impact of 2017 Tax Act	3,731	—
Reductions related to settlements with taxing authorities	(2,051)	(23,382)
Ending balance	$ 32,776	$ 24,066

As of December 31, 2017, the Company's total liability for unrecognized tax benefits relating to tax positions that do not meet the more-likely-than-not threshold is $32,776, all of which would impact the Company's effective tax rate if recognized. This balance represents an increase of $8,710 from the December 31, 2016 balance of $24,066, primarily due to additions for tax positions related to the current year.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits in its income tax expense. At December 31, 2017 and 2016, the Company had approximately $4,195 and $2,595, respectively, accrued for interest and penalties related to unrecognized tax benefits, net of federal tax benefit.

The Company and its subsidiaries file U.S. federal and state income tax returns and various foreign income tax returns. The Company is no longer subject to U.S. federal and state examinations by tax authorities for years before 2013 and 2008, respectively.

13. Long-term debt

Long-term debt was comprised of the following:

	December 31,	
	2017	2016
Senior Secured Credit Facilities:		
Term Loan A	$ 775,000	$ 862,500
Term Loan B	3,377,500	3,412,500
Revolver	300,000	—
Senior notes	4,500,000	4,500,000
Acquisition obligations and other notes payable	150,512	117,547
Capital lease obligations	297,170	292,252
Total debt principal outstanding	9,400,182	9,184,799
Discount and deferred financing costs	(63,951)	(79,861)
	9,336,231	9,104,938
Less current portion	(178,213)	(160,262)
	$ 9,158,018	$ 8,944,676

(dollars in thousands, except per share data)

Scheduled maturities of long-term debt at December 31, 2017 were as follows:

2018	178,213
2019	1,049,091
2020	73,362
2021	3,307,507
2022	1,283,671
Thereafter	3,508,338

Term Loans

Total outstanding borrowings under Term Loan A and Term Loan B can consist of various individual tranches that can range in maturity from one month to twelve months (currently all tranches are one month in duration). For Term Loan A and Term Loan B, each tranche bears interest at a London Interbank Offered Rate (LIBOR) that is determined by the duration of such tranche plus an interest rate margin. The LIBOR variable component of the interest rate for each tranche is reset as such tranche matures and a new tranche is established. At December 31, 2017, the overall weighted average interest rate for Term Loan A was determined based upon the LIBOR interest rates in effect for all of the individual tranches plus the interest rate margin of 2.00%. At December 31, 2017, Term Loan B bears interest at LIBOR (floor of 0.75%) plus a margin of 2.75%. The Company is subject to LIBOR-based interest rate volatility on Term Loan B as the LIBOR-based component of the interest rate exceeded the floor of 0.75% as of December 31, 2017. The overall weighted average interest rate for Term Loan B was determined based upon the LIBOR interest rates in effect for all individual tranches plus the interest rate margin.

The Company has several interest rate cap agreements that have the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 3.50% on $3,500,000 of outstanding principal debt. The remaining $652,500 outstanding principal balance of Term Loan A would still be subject to LIBOR-based interest rate volatility. In addition, the Company maintains several forward interest rate cap agreements with notional amounts totaling $3,500,000, which will be effective June 29, 2018. The cap agreements will have the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 3.50% on an equivalent amount of the Company's debt. See below for further details. The Company is restricted from paying dividends under the terms of its senior secured credit facilities.

During the year ended December 31, 2017, the Company made mandatory principal payments under its senior secured credit facilities totaling $87,500 on Term Loan A and $35,000 on Term Loan B.

Revolving lines of credit

The Company has $300,000 drawn on its $1,000,000 revolving line of credit under its senior secured credit facilities, in addition to approximately $14,383 committed for outstanding letters of credit. The Company also has approximately $90,085 of additional outstanding letters of credit related to Kidney Care and $211 of committed outstanding letters of credit related to DMG, which is backed by a certificate of deposit.

Senior Notes

The Company's senior notes as of December 31, 2017 consisted of $1,500,000 of 5.0% Senior Notes due 2025, $1,750,000 5 1/8% senior notes due 2024 and $1,250,000 of 5 3/4% senior notes due 2022 (collectively Senior Notes).

The Senior Notes are unsecured obligations, rank equally in right of payment with the Company's existing and future unsecured senior indebtedness, and are guaranteed by substantially all of the Company's direct and indirect wholly-owned domestic subsidiaries and require semi-annual interest payments. The Company may redeem some or all of the Senior Notes at any time on or after certain specific dates and at certain specific redemption prices as outlined in each senior note agreement. The Company is restricted from paying dividends under the indentures governing its Senior Notes.

Interest rate cap and swap agreements

During the year ended December 31, 2017 the Company had several currently effective and forward interest rate cap agreements as a means of hedging its exposure to and volatility from variable-based interest rate changes as part of its overall interest rate risk management strategy. These agreements were not held for trading or speculative purposes and had the economic effect of capping the Company's maximum exposure to LIBOR variable interest rate changes on specific portions of the Company's floating rate debt, as described below. These cap agreements are also designated as cash flow hedges and, as a

(dollars in thousands, except per share data)

result, changes in the fair values of these cap agreements are reported in other comprehensive income. The amortization of the original cap premium is recognized as a component of debt expense on a straight-line basis over the term of the cap agreements. The cap agreements do not contain credit-risk contingent features.

As of December 31, 2017, the Company maintains several currently effective interest rate cap agreements that were entered into in November 2014 with notional amounts totaling $3,500,000. These cap agreements became effective September 30, 2016 and have the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 3.50% on an equivalent amount of the Company's debt. These cap agreements expire on June 30, 2018. As of December 31, 2017, these cap agreements had an immaterial fair value. During the year ended December 31, 2017, the Company recognized debt expense of $8,278 from these caps. During the year ended December 31, 2017, the Company recorded a loss of $115 in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

As of December 31, 2017, the Company also maintains several forward interest rate cap agreements that were entered into in October 2015 with notional amounts totaling $3,500,000. These forward cap agreements will become effective June 29, 2018 and will have the economic effect of capping the LIBOR variable component of the Company's interest rate at a maximum of 3.50% on an equivalent amount of its debt. These cap agreements expire on June 30, 2020. As of December 31, 2017, the total fair value of these cap agreements was an asset of approximately $1,032. During the year ended December 31, 2017, the Company recorded a loss of $8,782 in other comprehensive income due to a decrease in the unrealized fair value of these cap agreements.

The following table summarizes the Company's derivative instruments as of December 31, 2017 and 2016:

		Fair value	
Derivatives designated as hedging instruments	**Balance sheet location**	**December 31, 2017**	**December 31, 2016**
Interest rate cap agreements	Other long-term assets	$ 1,032	$ 9,929

The following table summarizes the effects of the Company's interest rate cap and swap agreements for the years ended December 31, 2017, 2016 and 2015:

	Amount of unrealized losses in OCI on interest rate cap and swap agreements			Location of losses reclassified from accumulated OCI into income	Amount of losses reclassified from accumulated OCI into income		
	Year ended December 31,				Year ended December 31,		
Derivatives designated as cash flow hedges	**2017**	**2016**	**2015**		**2017**	**2016**	**2015**
Interest rate cap agreements	$ (8,897)	$ (5,198)	$ (16,114)	Debt expense	$ 8,278	$ 3,899	$ 2,439
Interest rate swap agreements	—	(815)	(3,971)	Debt expense	—	299	2,664
Tax benefit	3,460	2,343	7,844	Tax expense	(3,220)	(1,632)	(1,992)
Total	$ (5,437)	$ (3,670)	$ (12,241)		$ 5,058	$ 2,566	$ 3,111

As of December 31, 2017, the Company's Term Loan B debt bears interest at LIBOR plus an interest rate margin of 2.75%. Term Loan B is subject to an interest rate cap if LIBOR should rise above 3.50%. Term Loan A bears interest at LIBOR plus an interest rate margin of 2.00%. The capped portion of Term Loan A is $122,500. In addition, the uncapped portion of Term Loan A, which is subject to the variability of LIBOR, is $652,500. See above for further details. Interest rates on the Company's Senior Notes are fixed by their terms.

The Company's overall weighted average effective interest rate on the senior secured credit facilities was 4.45%, based upon the current margins in effect of 2.00% for Term Loan A and the Revolver and 2.75% for Term Loan B, as of December 31, 2017.

The Company's overall weighted average effective interest rate during the year ended December 31, 2017 was 4.70% and as of December 31, 2017 was 4.88%.

(dollars in thousands, except per share data)

Debt expense

Debt expense consisted of interest expense of $406,341, $394,013 and $389,755 and the amortization and accretion of debt discounts and premiums, amortization of deferred financing costs and the amortization of interest rate cap agreements of $24,293, $20,103 and $18,625 for 2017, 2016 and 2015, respectively. The interest expense amounts are net of capitalized interest.

14. Leases

The majority of the Company's facilities are leased under non-cancellable operating leases ranging in terms from five to fifteen years and which contain renewal options of five to ten years at the fair rental value at the time of renewal. The Company's leases are generally subject to periodic consumer price index increases or contain fixed escalation clauses. The Company also leases certain facilities and equipment under capital leases.

Future minimum lease payments under non-cancellable operating and capital leases are as follows:

	Operating leases	Capital leases
2018	$ 446,935	$ 35,258
2019	422,245	36,038
2020	384,764	36,689
2021	351,962	32,578
2022	313,005	33,004
Thereafter	1,303,594	234,094
	$ 3,222,505	407,661
Less portion representing interest		(110,491)
Total capital lease obligations, including current portion		$ 297,170

Rent expense under all operating leases for 2017, 2016, and 2015 was $530,748, $478,531 and $440,601, respectively. Rent expense is recorded on a straight-line basis over the term of the lease for leases that contain fixed escalation clauses or include abatement provisions. Leasehold improvement incentives are deferred and amortized to rent expense over the term of the lease. The net book value of property and equipment under capital leases was $257,772 and $263,438 at December 31, 2017 and 2016, respectively. Capital lease obligations are included in long-term debt. See Note 13 to these consolidated financial statements.

15. Employee benefit plans

The Company has a savings plan for substantially all of its Kidney Care employees which has been established pursuant to the provisions of Section 401(k) of the Internal Revenue Code (IRC). The plan allows for employees to contribute a percentage of their base annual salaries on a tax-deferred basis not to exceed IRC limitations. The Company has not provided any matching contributions for its Kidney Care employees through December 31, 2017.

Beginning in 2018, the Company has implemented a 401(k) matching program under which the Company will match 50% of the employee's contribution up to 6% of the employee's salary, subject to certain limitations. The matching contributions will be subject to certain eligibility and vesting conditions.

The Company also maintains a voluntary compensation deferral plan, the DaVita Voluntary Deferral Plan. This plan is non-qualified and permits certain employees whose annualized base salary equals or exceeds a minimum annual threshold amount as set by the Company to elect to defer all or a portion of their annual bonus payment and up to 50% of their base salary into a deferral account maintained by the Company. Total contributions to this plan in 2017, 2016 and 2015 were $4,497, $5,344 and $4,234, respectively. Deferred amounts are generally paid out in cash at the participant's election either in the first or second year following retirement or in a specified future period at least three to four years after the deferral election was effective. During 2017, 2016 and 2015 the Company distributed $1,731, $916 and $1,270, respectively, to participants in this plan. Participants are credited with their proportional amount of annual earnings from the plan. The assets of this plan are held in a rabbi trust and as such are subject to the claims of the Company's general creditors in the event of its bankruptcy. As of December 31, 2017 and 2016, the total fair value of assets held in this plan's trust were $38,816 and $30,192, respectively.

The Company also maintains a legacy Executive Retirement Plan for certain members of management. This plan is non-qualified and contributions to the plan were made at the discretion of DVA Renal Healthcare based upon a pre-determined percentage of a participant's base salary. Effective November 2005, all contributions to this plan were discontinued and the balance of the plan assets will be paid out upon termination or retirement of each individual participant. During 2017, 2016 and 2015 the Company distributed $1,058 and $149, $25 respectively, to participants in this plan. As of December 31, 2017 and 2016, the total fair value of assets held under this plan's trust was $79 and $1,005, respectively.

The fair value of all of the assets held in plan trusts as of December 31, 2017, and 2016 totaled $38,895 and $31,197, respectively. The assets of these plans are available for sale and as such are recorded at fair value with changes in the fair market values being recorded in other comprehensive income. Any fair value changes to the corresponding liability balance are recorded as compensation expense. See Note 3 to these consolidated financial statements.

Most of the Company's outstanding employee stock plan awards include a provision accelerating the vesting of the award in the event of a change of control. The Company also maintains a change of control protection program for its employees who do not have a significant number of stock awards, which has been in place since 2001, and which provides for cash bonuses to employees in the event of a change of control. Based on the market price of the Company's common stock and shares outstanding on December 31, 2017, these cash bonuses would total approximately $520,778 if a change of control transaction occurred at that price and the Company's Board of Directors did not modify the program. This amount has not been accrued at December 31, 2017, and would only be accrued upon a change of control. These change of control provisions may affect the price an acquirer would be willing to pay for the Company.

16. Contingencies

The majority of the Company's revenues are from government programs and may be subject to adjustment as a result of: (i) examination by government agencies or contractors, for which the resolution of any matters raised may take extended periods of time to finalize; (ii) differing interpretations of government regulations by different Medicare contractors or regulatory authorities; (iii) differing opinions regarding a patient's medical diagnosis or the medical necessity of services provided; and (iv) retroactive applications or interpretations of governmental requirements. In addition, the Company's revenues from commercial payors may be subject to adjustment as a result of potential claims for refunds, as a result of government actions or as a result of other claims by commercial payors.

The Company operates in a highly regulated industry and is a party to various lawsuits, claims, *qui tam* suits, governmental investigations and audits (including investigations resulting from its obligation to self-report suspected violations of law) and other legal proceedings. The Company records accruals for certain legal proceedings and regulatory matters to the extent that the Company determines an unfavorable outcome is probable and the amount of the loss can be reasonably estimated. As of December 31, 2017 and December 31, 2016, the Company's total recorded accruals, including DMG, with respect to legal proceedings and regulatory matters, net of anticipated third party recoveries, were approximately $6,000 and $69,000, respectively. While these accruals reflect the Company's best estimate of the probable loss for those matters as of the dates of those accruals, the recorded amounts may differ materially from the actual amount of the losses for those matters, and any anticipated third party recoveries for any such losses may not ultimately be recoverable. Additionally, in some cases, no estimate of the possible loss or range of loss in excess of amounts accrued, if any, can be made because of the inherently unpredictable nature of legal proceedings and regulatory matters, which also may be impacted by various factors, including that they may involve indeterminate claims for monetary damages or may involve fines, penalties or non-monetary remedies; present novel legal theories or legal uncertainties; involve disputed facts; represent a shift in regulatory policy; are in the early stages of the proceedings; or result in a change of business practices. Further, there may be various levels of judicial review available to the Company in connection with any such proceeding.

The following is a description of certain lawsuits, claims, governmental investigations and audits and other legal proceedings to which the Company is subject.

Inquiries by the Federal Government and Certain Related Civil Proceedings

2015 U.S. Office of Inspector General (OIG) Medicare Advantage Civil Investigation: In March 2015, JSA HealthCare Corporation (JSA), a subsidiary of DMG, received a subpoena from the Office of Inspector General (OIG) for the U.S. Department of Health and Human Services (HHS) requesting documents and information for the period from January 1, 2008 through December 31, 2013, for certain MA plans for which JSA provided services. It also requests information regarding JSA's communications about patient diagnoses as they relate to certain MA plans generally, and more specifically as related to two

Florida physicians with whom JSA previously contracted. The Company is producing the requested information and is cooperating with the government's investigation.

In addition to the subpoena described above, in June 2015, the Company received a civil subpoena from the OIG covering the period from January 1, 2008 through the present and seeking production of a wide range of documents relating to the Company's and its subsidiaries' (including DMG's and its subsidiary JSA's) provision of services to MA plans and related patient diagnosis coding and risk adjustment submissions and payments. The Company believes that the request is part of a broader industry investigation into MA patient diagnosis coding and risk adjustment practices and potential overpayments by the government. The information requested includes information relating to patient diagnosis coding practices for a number of conditions, including potentially improper historical DMG coding for a particular condition. With respect to that condition, the guidance related to that coding issue was discontinued following the Company's November 1, 2012 acquisition of HealthCare Partners (now known as the Company's DMG business), and the Company notified CMS in April 2015 of the coding practice and potential overpayments. In that regard, the Company has identified certain additional coding practices which may have been problematic, some of which were the subject of the *Swoben Private Civil Suit,* and is in discussions with the DOJ relating to those practices. The Company is cooperating with the government. In addition, the Company is continuing to review other DMG coding practices to determine whether there were any improper coding issues. In connection with the Company's acquisition of DMG in 2012, the Company has certain indemnification rights against the sellers and an escrow was established as security for the indemnification. The Company has submitted an indemnification claim against the sellers secured by the escrow for any and all liabilities incurred relating to these matters and intends to pursue recovery from the escrow. However, the Company can make no assurances that the indemnification and escrow will cover the full amount of the Company's potential losses related to these matters.

2016 U.S. Attorney Prescription Drug Investigation: In early February 2016, the Company announced that its pharmacy services' wholly-owned subsidiary, DaVita Rx, received a Civil Investigative Demand (CID) from the U.S. Attorney's Office for the Northern District of Texas. The government is conducting a federal False Claims Act (FCA) investigation concerning allegations that DaVita Rx presented or caused to be presented false claims for payment to the government for prescription medications, as well as into the Company's relationship with pharmaceutical manufacturers. The CID covers the period from January 1, 2006 through the present. In the spring of 2015, the Company initiated an internal compliance review of DaVita Rx during which it identified potential billing and operational issues, including potential write-offs and discounts of patient co-payment obligations, and credits to payors for returns of prescription drugs related to DaVita Rx. The Company notified the government in September 2015 that it was conducting this review of DaVita Rx and began providing regular updates of its review. Upon completion of its review, the Company filed a self-disclosure with the OIG in February 2016 and has been working to address and update the practices it identified in the self-disclosure, some of which overlap with information requested by the U.S. Attorney's Office. The OIG informed the Company in February 2016 that its submission was not accepted. They indicated that the OIG is not expressing an opinion regarding the conduct disclosed or the Company's legal positions. In connection with the Company's ongoing efforts working with the government the Company learned that a *qui tam* complaint had been filed covering some of the issues in the CID and the Company's self-disclosure. In December 2017, the Company finalized and executed a settlement agreement with the government and relators in the *qui tam* matter and that included total monetary consideration of $63,700, as previously announced, of which $41,500 was an incremental cash payment and $22,200 was for amounts previously refunded, and all of which was previously accrued. The government's investigation into the Company's relationship with pharmaceutical manufacturers is ongoing and the Company is continuing to cooperate with the government in this investigation.

2017 U.S. Attorney American Kidney Fund Investigation: On January 4, 2017, the Company was served with an administrative subpoena for records by the United States Attorney's Office, District of Massachusetts, relating to an investigation into possible federal health care offenses. The subpoena covers the period from January 1, 2007 through the present, and seeks documents relevant to charitable patient assistance organizations, particularly the American Kidney Fund, including documents related to efforts to provide patients with information concerning the availability of charitable assistance. The Company is cooperating with the government and is producing the requested information.

* * *

Although the Company cannot predict whether or when proceedings might be initiated or when these matters may be resolved (other than as described above), it is not unusual for inquiries such as these to continue for a considerable period of time through the various phases of document and witness requests and on-going discussions with regulators. In addition to the inquiries and proceedings specifically identified above, the Company is frequently subject to other inquiries by state or federal government agencies and/or private civil *qui tam* complaints filed by relators. Negative findings or terms and conditions that the Company might agree to accept as part of a negotiated resolution of pending or future government inquiries or relator

proceedings could result in, among other things, substantial financial penalties or awards against the Company, substantial payments made by the Company, harm to the Company's reputation, required changes to the Company's business practices, exclusion from future participation in the Medicare, Medicaid and other federal health care programs and, if criminal proceedings were initiated against the Company, possible criminal penalties, any of which could have a material adverse effect on the Company.

Shareholder Claims

Peace Officers' Annuity and Benefit Fund of Georgia Securities Class Action Civil Suit: On February 1, 2017, the Peace Officers' Annuity and Benefit Fund of Georgia filed a putative federal securities class action complaint in the U.S. District Court for the District of Colorado against the Company and certain executives. The complaint covers the time period of August 2015 to October 2016 and alleges, generally, that the Company and its executives violated federal securities laws concerning the Company's financial results and revenue derived from patients who received charitable premium assistance from an industry-funded non-profit organization. The complaint further alleges that the process by which patients obtained commercial insurance and received charitable premium assistance was improper and "created a false impression of DaVita's business and operational status and future growth prospects." In November 2017, the court appointed the lead plaintiff and an amended complaint was filed on January 12, 2018. The Company's response is due March 13, 2018. The Company disputes these allegations and intends to defend this action accordingly.

In re DaVita Inc. Stockholder Derivative Litigation: On August 15, 2017, the U.S. District Court for the District of Delaware consolidated the three previously disclosed shareholder derivative lawsuits: the Blackburn Shareholder action filed on February 10, 2017, the Gabilondo Shareholder action filed on May 30, 2017, and the City of Warren Police and Fire Retirement System Shareholder action filed on June 9, 2017. The complaint covers the time period from 2015 to present and alleges, generally, breach of fiduciary duty, unjust enrichment, abuse of control, gross mismanagement, corporate waste, and misrepresentations and/or failures to disclose certain information in violation of the federal securities laws in connection with an alleged practice to direct patients with government-subsidized health insurance into private health insurance plans to maximize the Company's profits. An amended complaint was filed in September 2017, and on December 18, 2017 the Company filed a motion to dismiss and a motion to stay proceedings in the alternative. The Company disputes these allegations and intends to defend this action accordingly.

Other Proceedings

In addition to the foregoing, from time to time the Company is subject to other lawsuits, demands, claims, governmental investigations and audits and legal proceedings that arise due to the nature of its business, including contractual disputes, such as with payors, suppliers and others, employee-related matters and professional and general liability claims. From time to time, the Company also initiates litigation or other legal proceedings as a plaintiff arising out of contracts or other matters.

Resolved Matters

Swoben Private Civil Suit: On July 13, 2009, pursuant to the *qui tam* provisions of the FCA and the California False Claims Act, James M. Swoben, as relator, filed his initial *qui tam* action in the United States District Court for the Central District of California purportedly on behalf of the United States of America and the State of California against SCAN, and certain other defendants whose identities were under seal. In April 2013, HealthCare Partners (HCP), now known as the Company's DMG subsidiary, was one of several defendants served with a civil complaint filed by a former employee of SCAN Health Plan (SCAN), an HMO. The allegations in the complaint relate to alleged overpayments received from government healthcare programs, including allegations of violations of the federal FCA and the California False Claims Act and allegations against HCP relating to patient diagnosis coding. The complaint sought monetary damages and civil penalties as well as costs and expenses. On October 18, 2017, the relator filed a Notice of Dismissal of the action as to HCP, and the government consented to the dismissal, as a result of which the suit is now dismissed, without prejudice.

Solari Post-Acquisition Matter: In 2016, HCP Nevada disclosed to the OIG for the HHS that proper procedures for clinical and eligibility determinations may not have been followed by Las Vegas Solari Hospice (Solari), which was acquired in March 2013 and sold in September 2016 by HCP Nevada. In June 2016, the Company was notified by the OIG that the disclosure submission had been accepted into the OIG's Self Disclosure Protocol. HCP Nevada had previously made a disclosure and repayment of overpayments to National Government Services (NGS), the Medicare Administrative Contractor for HCP Nevada, for claims submitted by Solari to the federal government prior to DMG's acquisition of Solari and claims made to the government post-acquisition for which the sellers had certain responsibilities pursuant to a management services

agreement. In October 2017, the Company finalized and executed a settlement agreement with the OIG including payment of an immaterial amount.

2011 Suit against the U.S. Department of Veterans Affairs: As previously disclosed, the Company had a pending lawsuit in the U.S. Court of Federal Claims against the federal government which was originally filed in May 2011. The lawsuit related to the U.S. Department of Veterans Affairs (VA) underpayment of dialysis services the Company provided from 2005 through 2011 to veterans pursuant to VA regulations. In the first quarter of 2017, the Company received a payment of $538,000 related to the settlement with the VA. The Company's consolidated entities recognized a net gain of $527,000 on this settlement. The Company's nonconsolidated and managed entities recognized a gain of $9,000, of which the Company's equity investment share was $3,000. The net effect was a net increase of $530,000 to the Company's operating income.

2015 U.S. Department of Justice Vascular Access Investigation and Related *Qui Tam* Litigation: In November 2015, the Company announced that RMS Lifeline, Inc., a wholly-owned subsidiary of the Company that operates under the name Lifeline Vascular Access (Lifeline), received a CID from the DOJ. The CID relates to two vascular access centers in Florida that are part of Lifeline's vascular access business. The CID covers the period from January 1, 2008 through the present. The Company acquired these two centers in December 2012. Based on the language of the CID, the DOJ appeared to be looking at whether angiograms performed at the two centers were medically unnecessary and therefore whether related claims filed with federal healthcare programs possibly violated the FCA. Lifeline does not perform dialysis services but instead provides vascular access management services for dialysis patients. The Company cooperated with the government and produced the requested information. The DOJ investigation was initiated pursuant to a complaint brought under the *qui tam* provisions of the FCA (the Complaint). The Complaint was originally filed under seal in August 2014 in the U.S. District Court, Middle District of Florida, United States ex. rel James Spafford v. DaVita HealthCare Partners, Inc., et al., Case Number 6:14-cv-1251-Orl-41DAB, naming several doctors along with the Company as defendants. In December 2015, a First Amended Complaint was filed under seal. In May 2016, the First Amended Complaint was unsealed. The First Amended Complaint alleged violations of the FCA due to the submission of claims to the government for allegedly medically unnecessary angiograms and angiography procedures at the two vascular access centers as well as employment-related claims. The Complaint covers alleged conduct dating from July 2008, prior to the Company's acquisition of the centers, to the present. The DOJ declined to intervene. In January 2017, the Company finalized and executed a settlement agreement with the relator and the government for an immaterial amount, and in April 2017, the court dismissed the case with prejudice.

Vainer Private Civil Suit: As previously disclosed, the Company received a subpoena for documents from the OIG relating to the pharmaceutical products Zemplar, Hectorol, Venofer, Ferrlecit and erythropoietin (EPO), as well as other related matters, covering the period from January 2003 to December 2008. The Company subsequently learned that the allegations underlying this inquiry were made as part of a civil complaint filed by relators, Daniel Barbir and Dr. Alon Vainer, pursuant to the *qui tam* provisions of the federal FCA. The relators also alleged that the Company's drug administration practices for the Company's dialysis operations for Vitamin D and iron agents from 2003 through 2010 fraudulently created unnecessary waste, which was billed to and paid for by the government. In June 2015, the Company finalized the terms of the settlement with plaintiffs, including a settlement amount of $450,000 and attorney fees and other costs of $45,000 which was paid in 2015.

* * *

Other than as described above, the Company cannot predict the ultimate outcomes of the various legal proceedings and regulatory matters to which the Company is or may be subject from time to time, including those described in this Note 16, or the timing of their resolution or the ultimate losses or impact of developments in those matters, which could have a material adverse effect on the Company's revenues, earnings and cash flows. Further, any legal proceedings or regulatory matters involving the Company, whether meritorious or not, are time consuming, and often require management's attention and result in significant legal expense, and may result in the diversion of significant operational resources, or otherwise harm the Company's business, financial results or reputation.

17. Noncontrolling interests subject to put provisions and other commitments

Noncontrolling interests subject to put provisions

The Company has potential obligations to purchase the equity interests held by third parties in several of its majority-owned joint ventures and other nonconsolidated entities. These obligations are in the form of put provisions that are exercisable at the third-party owners' discretion within specified periods as outlined in each specific put provision. If these put provisions were exercised, the Company would be required to purchase the third-party owners' equity interests at either the appraised fair market value or a predetermined multiple of earnings or cash flows attributable to the equity interests put to the Company,

which is intended to approximate fair value. The methodology the Company uses to estimate the fair values of noncontrolling interests subject to put provisions assumes the higher of either a liquidation value of net assets or an average multiple of earnings, based on historical earnings, patient mix and other performance indicators that can affect future results, as well as other factors. The estimated fair values of noncontrolling interests subject to put provisions are a critical accounting estimate that involves significant judgments and assumptions and may not be indicative of the actual values at which the noncontrolling interests may ultimately be settled, which could vary significantly from the Company's current estimates. The estimated fair values of noncontrolling interests subject to put provisions can fluctuate and the implicit multiple of earnings at which these noncontrolling interests obligations may be settled will vary significantly depending upon market conditions including potential purchasers' access to the capital markets, which can impact the level of competition for dialysis and non-dialysis related businesses, the economic performance of these businesses and the restricted marketability of the third-party owners' equity interests. The amount of noncontrolling interests subject to put provisions that employ a contractually predetermined multiple of earnings rather than fair value are immaterial.

The Company has certain other potential commitments to provide operating capital to a number of dialysis centers that are wholly-owned by third parties or businesses in which the Company owns a noncontrolling equity interest as well as to physician-owned vascular access clinics or medical practices that the Company operates under management and administrative service agreements of approximately $5,385.

Certain consolidated joint ventures are originally contractually scheduled to dissolve after terms ranging from 10 to 50 years. While noncontrolling interests in these limited life entities qualify as mandatorily redeemable financial instruments, they are subject to a classification and measurement scope exception from the accounting guidance generally applicable to other mandatorily redeemable financial instruments. Future distributions upon dissolution of these entities would be valued below the related noncontrolling interest carrying balances in the consolidated balance sheet.

Other commitments

In January 2017, the Company entered into a Sourcing and Supply Agreement with Amgen USA Inc. (Amgen) that expires on December 31, 2022, replacing the Company's prior agreement that was to expire in 2018. Under the terms of the agreement, the Company will purchase EPO in amounts necessary to meet no less than 90% of its requirements for erythropoiesis-stimulating agents (ESAs) through the expiration of the contract from Amgen. The actual amount of EPO that the Company will purchase will depend upon the amount of EPO administered during dialysis as prescribed by physicians and the overall number of patients that the Company serves.

In 2010, the Company entered into an agreement with Fresenius Medical Care (FMC) which committed the Company to purchase a certain amount of dialysis equipment, parts and supplies from FMC through 2013. This agreement has been subsequently extended through December 31, 2020. During 2017, 2016 and 2015, the Company purchased $176,212, $164,766 and $154,566, respectively, of certain equipment, parts and supplies from FMC.

In 2014, the Company entered into an agreement with Baxter Healthcare (Baxter) which committed the Company to purchase a certain amount of its hemodialysis non-equipment product supplies, such as dialyzers, at fixed prices through 2018. During 2017, 2016 and 2015, the Company purchased $166,764, $162,109 and $112,931 of hemodialysis product supplies from Baxter under this agreement.

Other than operating leases disclosed in Note 14 to the consolidated financial statements, the letters of credit disclosed in Note 13 to the consolidated financial statements, and the arrangements as described above, the Company has no off balance sheet financing arrangements as of December 31, 2017.

18. Long-term incentive compensation and shareholders' equity

Long-term incentive compensation

Long-term incentive program (LTIP) compensation includes both stock-based awards (principally stock-settled stock appreciation rights, restricted stock units and performance stock units) as well as long-term performance-based cash awards. Long-term incentive compensation expense, which was primarily general and administrative in nature, was attributed to the Company's U.S. dialysis and related lab services business, corporate administrative support, and the ancillary services and strategic initiatives.

In March 2016, the FASB issued ASU No. 2016-09, *Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*. The changes required by this ASU involve several aspects of the accounting for

share-based payment transactions, including income tax consequences, classification of awards as either equity or liabilities, classification on the statement of cash flows, and an election on estimating forfeitures. The amendments in this ASU were effective for the Company beginning January 1, 2017. See the *New accounting standards* section in Note 1 for further details.

The Company's stock-based compensation awards are measured at their estimated fair values on the date of grant if settled in shares or at their estimated fair values at the end of each reporting period if settled in cash. The value of stock-based awards so measured is recognized as compensation expense on a cumulative straight-line basis over the vesting terms of the awards, adjusted for expected forfeitures.

Stock-based compensation to be settled in shares is recorded to the Company's shareholders' equity, while stock-based compensation to be settled in cash is recorded to a liability. Shares issued upon exercise of stock awards have generally been issued from authorized but unissued shares.

Long-term incentive compensation plans

The Company's 2011 Incentive Award Plan (the 2011 Plan) is the Company's omnibus equity compensation plan and provides for grants of stock-based awards to employees, directors and other individuals providing services to the Company, except that incentive stock options may only be awarded to employees. The 2011 Plan authorizes the Company to award stock options, stock appreciation rights, restricted stock units, restricted stock, and other stock-based or performance-based awards, and is designed to enable the Company to grant equity and cash awards that qualified as performance-based compensation under Section 162(m) of the Internal Revenue Code for tax years 2017 and prior. The 2011 Plan mandates a maximum award term of five years and stipulates that stock appreciation rights and stock options be granted with prices not less than fair market value on the date of grant. The 2011 Plan also requires that full value share awards such as restricted stock units reduce shares available under the 2011 Plan at a ratio of 3.5:1. The Company's nonqualified stock appreciation rights and stock units awarded under the 2011 Plan generally vest over 36 to 48 months from the date of grant. At December 31, 2017, there were 6,648,199 stock-settled stock appreciation rights, 1,075,572 stock-settled stock units, 23,000 cash-settled stock appreciation rights and 1,600 cash-settled stock units outstanding, and 27,369,515 shares available for future grants, under the 2011 Plan.

(dollars in thousands, except per share data)

A combined summary of the status of the Company's stock-settled awards under the 2011 Plan, including base shares for stock-settled stock appreciation rights (SSARs) and stock-settled stock unit awards is as follows:

	Year ended December 31, 2017				
	Stock appreciation rights			Stock units	
	Awards	Weighted average exercise price	Weighted average remaining contractual life	Awards	Weighted average remaining contractual life
Outstanding at beginning of year	7,337,266	$ 64.90		785,553	
Granted	1,692,154	65.29		528,968	
Exercised	(2,022,418)	54.27		(119,000)	
Canceled	(358,803)	70.61		(119,949)	
Outstanding at end of period	6,648,199	$ 67.92	2.3	1,075,572	2.0
Exercisable at end of period	2,628,008	$ 62.78	0.6	—	0.0
Weighted-average fair value of grants					
2017	$ 14.51			$ 65.73	
2016	$ 13.74			$ 70.99	
2015	$ 17.97			$ 80.25	

Range of SSARs base prices	Awards Outstanding	Weighted average exercise price	Awards exercisable	Weighted average exercise price
$50.01–$60.00	1,856,145	59.05	1,712,675	59.15
$60.01–$70.00	2,715,542	66.70	632,849	67.47
$70.01–$80.00	1,443,749	74.77	243,041	73.16
$80.01–$90.00	632,763	83.59	39,443	81.51
Total	6,648,199	$ 67.92	2,628,008	$ 62.78

The Company granted 15,000 cash-settled stock-based awards during 2017. Liability-classified stock-based awards contributed $114, $376 and $(236) to stock-based compensation expense for the years ended December 31, 2017, 2016 and 2015, respectively. As of December 31, 2017 the Company had 24,600 liability-classified stock-based awards outstanding, none of which were vested, and a total stock-based compensation liability balance of $99.

For the years ended December 31, 2017, 2016, and 2015, the aggregate intrinsic value of stock-based awards exercised was $34,895, $73,944 and $117,260, respectively. At December 31, 2017, the aggregate intrinsic value of stock-based awards outstanding was $117,722 and the aggregate intrinsic value of stock awards exercisable was $25,609.

Estimated fair value of stock-based compensation awards

The Company has estimated the grant-date fair value of stock-settled stock appreciation rights awards using the Black-Scholes-Merton valuation model and stock-settled stock unit awards at intrinsic value on the date of grant, except for portions of the Company's performance stock unit awards for which a Monte Carlo simulation was used to estimate the grant-date fair value. The following assumptions were used in estimating these values and determining the related stock-based compensation expense attributable to the current period:

Expected term of the awards: The expected term of awards granted represents the period of time that they are expected to remain outstanding from the date of grant. The Company determines the expected term of its stock awards based on its historical experience with similar awards, considering the Company's historical exercise and post-vesting termination patterns, and the terms expected by peer companies in near industries.

(dollars in thousands, except per share data)

Expected volatility: Expected volatility represents the volatility anticipated over the expected term of the award. The Company determines the expected volatility for its awards based on the volatility of the price of its common stock over the most recent retrospective period commensurate with the expected term of the award, considering the volatility expectations implied by the market price of its exchange-traded options and the volatilities expected by peer companies in near industries.

Expected dividend yield: The Company has not paid dividends on its common stock and does not currently expect to pay dividends during the term of stock awards granted.

Risk-free interest rate: The Company bases the expected risk-free interest rate on the implied yield currently available on stripped interest coupons of U.S. Treasury issues with a remaining term equivalent to the expected term of the award.

A summary of the weighted average valuation inputs described above used for estimating the grant-date fair value of stock-settled stock appreciation rights awards granted in the periods indicated is as follows:

	Year ended December 31,		
	2017	2016	2015
Expected term	4.2	4.2	4.1
Expected volatility	23.9%	21.0%	24.6%
Expected dividend yield	—%	—%	—%
Risk-free interest rate	1.7%	1.0%	1.5%

The Company estimates expected forfeitures based upon historical experience with separate groups of employees that have exhibited similar forfeiture behavior in the past. Stock-based compensation expense is recorded only for awards that are expected to vest.

Employee stock purchase plan

The Employee Stock Purchase Plan entitles qualifying employees to purchase up to $25 of the Company's common stock during each calendar year. The amounts used to purchase stock are accumulated through payroll withholdings or through optional lump sum payments made in advance of the first day of the purchase right period. This compensatory plan allows employees to purchase stock for the lesser of 100% of its fair market value on the first day of the purchase right period or 85% of its fair market value on the last day of the purchase right period. Purchase right periods begin on January 1 and July 1, and end on December 31. Contributions used to purchase the Company's common stock under this plan for the 2017, 2016 and 2015 participation periods were $22,131, $23,902 and $24,523, respectively. Shares purchased pursuant to the plan's 2017, 2016 and 2015 participation periods were 360,368, 438,002 and 413,859, respectively. At December 31, 2017, there were 7,124,027 shares remaining available for future grants under this plan, after an additional 7,500,000 shares were approved to the plan by stockholders on June 20, 2016.

The fair value of participants' purchase rights was estimated as of the beginning dates of the purchase right periods using the Black-Scholes-Merton valuation model with the following weighted average assumptions for purchase right periods in 2017, 2016 and 2015, respectively: expected volatility of 23%, 22% and 26%; risk-free interest rate of 1.3%, 0.8% and 0.2%, and no dividends. Using these assumptions, the weighted average estimated fair value of these purchase rights was $15.19, $16.73 and $18.76 for 2017, 2016 and 2015, respectively.

Long-term incentive compensation expense and proceeds

For the years ended December 31, 2017, 2016 and 2015, the Company recognized $61,978, $64,956 and $123,957, respectively, in total long-term incentive program (LTIP) expense, of which $34,431, $34,530 and $52,665, respectively, was stock-based compensation expense for stock appreciation rights, stock units and discounted employee stock plan purchases, which are primarily included in general and administrative expenses. The estimated tax benefits recorded for stock-based compensation in 2017, 2016 and 2015 were $7,717, $12,731 and $19,689, respectively. As of December 31, 2017, there was $98,015 total estimated unrecognized compensation expense for outstanding LTIP awards, including $61,166 related to stock-based compensation arrangements under the Company's equity compensation and stock purchase plans. The Company expects to recognize the performance-based cash component of this LTIP expense over a weighted average remaining period of 1.1 years and the stock-based component of this LTIP expense over a weighted average remaining period of 1.4 years.

For the years ended December 31, 2017, 2016 and 2015, the Company received $13,473, $28,397 and $45,749, respectively, in actual tax benefits upon the exercise of stock awards. Since the Company issues stock-settled stock appreciation

(dollars in thousands, except per share data)

rights rather than stock options, there have been no cash proceeds from stock option exercises during the years ended December 31, 2017, 2016 and 2015.

Stock repurchases

During the years ended December 31, 2017 and 2016, the Company repurchased a total of 12,966,672 shares and 16,649,090 shares of its common stock for $810,949 and $1,072,377, or an average price of $62.54 and $64.41 per share, respectively, pursuant to previously announced authorizations by the Board of Directors. The Company also repurchased 1,237,800 shares of its common stock for $92,790, or an average price of $74.96 per share, subsequent to December 31, 2017 through February 22, 2018.

On October 10, 2017, the Company's Board of Directors approved an additional share repurchase authorization in the amount of $1,252,961. This share repurchase authorization was in addition to the $247,039 remaining at that time under the Company's Board of Directors' prior share repurchase authorization announced in July 2016. Accordingly, as of February 22, 2018, the Company has a total of $1,026,326 available under the current Board repurchase authorizations for additional share repurchases. Although these share repurchase authorizations do not have expiration dates, the Company remains subject to share repurchase limitations under the terms of its senior secured credit facilities and the indentures governing its senior notes.

The Company retired all shares held in its treasury effective as of December 31, 2017 and 2016.

Charter documents & Delaware law

The Company's charter documents include provisions that may deter hostile takeovers, delay or prevent changes of control or changes in management, or limit the ability of stockholders to approve transactions that they may otherwise determine to be in their best interests. These include provisions prohibiting stockholders from acting by written consent, requiring 90 days advance notice of stockholder proposals or nominations to the Board of Directors and granting the Board of Directors the authority to issue up to five million shares of preferred stock and to determine the rights and preferences of the preferred stock without the need for further stockholder approval.

The Company is also subject to Section 203 of the Delaware General Corporation Law which, subject to exceptions, would prohibit the Company from engaging in any business combinations with any interested stockholder, as defined in that section, for a period of three years following the date on which that stockholder became an interested stockholder. These restrictions may discourage, delay or prevent a change in the control of the Company.

Changes in DaVita Inc.'s ownership interest in consolidated subsidiaries

The effects of changes in DaVita Inc.'s ownership interest in consolidated subsidiaries on the Company's equity are as follows:

	Year ended December 31,		
	2017	2016	2015
Net income attributable to DaVita Inc.	$ 663,618	$ 879,874	$ 269,732
Changes in paid-in-capital for:			
Sales of noncontrolling interest	(114)	—	—
Purchase of noncontrolling interests	(2,752)	(13,105)	(55,826)
Net transfer in noncontrolling interests	(2,866)	(13,105)	(55,826)
Net income attributable to DaVita Inc. net of transfers in noncontrolling interests	$ 660,752	$ 866,769	$ 213,906

The Company acquired additional ownership interests in several existing majority-owned joint ventures for $5,357, $21,512, and $66,382 in 2017, 2016, and 2015, respectively.

(dollars in thousands, except per share data)

19. Other comprehensive (loss) income

Charges and credits to other comprehensive (loss) income have been as follows:

	Interest rate cap and swap agreements	Investment securities	Foreign currency translation adjustments	Accumulated other comprehensive (loss) income
Balance at January 1, 2015	$ (1,795)	$ 3,151	$ (26,373)	$ (25,017)
Unrealized losses	(20,085)	(1,974)	(23,889)	(45,948)
Related income tax	7,844	561	—	8,405
	(12,241)	(1,413)	(23,889)	(37,543)
Reclassification from accumulated other comprehensive losses (income) into net income	5,103	(618)	—	4,485
Related income tax	(1,992)	241	—	(1,751)
	3,111	(377)	—	2,734
Balance at December 31, 2015	$ (10,925)	$ 1,361	$ (50,262)	$ (59,826)
Unrealized (losses) gains	(6,013)	1,802	(39,614)	(43,825)
Related income tax	2,343	(565)	—	1,778
	(3,670)	1,237	(39,614)	(42,047)
Reclassification from accumulated other comprehensive losses (income) into net income	4,198	(690)	10,087	13,595
Related income tax	(1,632)	267	—	(1,365)
	2,566	(423)	10,087	12,230
Balance at December 31, 2016	$ (12,029)	$ 2,175	$ (79,789)	$ (89,643)
Unrealized (losses) gains	(8,897)	5,075	99,770	95,948
Related income tax	3,460	(1,368)	—	2,092
	(5,437)	3,707	99,770	98,040
Reclassification from accumulated other comprehensive losses (income) into net income	8,278	(360)	—	7,918
Related income tax	(3,220)	140	—	(3,080)
	5,058	(220)	—	4,838
Balance at December 31, 2017	$ (12,408)	$ 5,662	$ 19,981	$ 13,235

The reclassification of net cap and swap realized losses into income are recorded as debt expense in the corresponding consolidated statements of income. See Note 13 to these consolidated financial statements for further details.

The reclassification of net investment realized gains into income are recorded in other income in the corresponding consolidated statements of income. See Note 3 to these consolidated financial statements for further details.

20. Acquisitions and divestitures

Acquisition of Renal Ventures

On May 1, 2017, the Company completed its acquisition of 100% of the equity of Colorado-based Renal Ventures Management, LLC (Renal Ventures) for approximately $359,913 in net cash. Renal Ventures operated 36 dialysis centers, one uncertified dialysis center and one home program, that provided services to approximately 2,600 patients in six states. As a part of this transaction, the Company was required to divest three Renal Ventures outpatient dialysis centers, and three outpatient dialysis centers and one uncertified dialysis center of the Company for approximately $21,219 in net cash. The Company also incurred approximately $11,950 in transaction and integration costs during the year ended December 31, 2017 associated with this acquisition that are included in general and administrative expenses.

The initial purchase price allocation for the Renal Ventures acquisition is recorded at estimated fair values based upon the best information available to management and will be finalized when certain information arranged to be obtained has been

(dollars in thousands, except per share data)

received. In particular, certain working capital items, income tax amounts and the fair value of intangibles and fixed assets are pending final audit, issuance of final tax returns and valuation reports.

The following table summarizes the assets acquired and liabilities assumed in the transactions and recognized at the acquisition date at estimated fair values:

Current assets, net of cash acquired	$	22,739
Property and equipment		36,295
Amortizable intangible and other long-term assets		11,547
Goodwill		298,200
Current liabilities		(8,389)
Long-term liabilities		(479)
	$	359,913

Amortizable intangible assets acquired, primarily related to non-compete agreements, had weighted-average estimated useful lives of five years. The total estimated amount of goodwill deductible for tax purposes associated with this acquisition was approximately $298,200.

Other routine acquisitions

During 2017, the Company also acquired 30 dialysis centers in the U.S. and 68 dialysis centers outside the U.S. for a total of $308,550 in net cash, earn-outs of $2,692, and deferred purchase price and liabilities assumed of $23,748. During 2016, the Company acquired eight dialysis centers in the U.S. and 21 dialysis centers outside the U.S. for a total of $165,108 in net cash, earn-outs of $1,511, and deferred purchase price of $17,963. During 2015, the Company acquired six dialysis centers in the U.S. and 21 dialysis centers outside the U.S. for a total of $54,551 in net cash and deferred purchase price of $7,452. The assets and liabilities for all acquisitions were recorded at their estimated fair values at the dates of the acquisitions and are included in the Company's financial statements and operating results from the effective dates of the acquisitions. For several of the 2017 acquisitions, certain income tax amounts are pending final evaluation and quantification of any pre-acquisition tax contingencies. In addition, valuation of intangibles and certain other working capital items relating to several of these acquisitions are pending final quantification.

The following table summarizes the assets acquired and liabilities assumed in the above described transactions and recognized at their acquisition dates at estimated fair values, as well as the estimated fair value of noncontrolling interests assumed in these transactions:

	Year ended December 31,		
	2017	2016	2015
Current assets	$ 14,366	$ 3,996	$ 2,647
Property and equipment	18,192	8,840	4,466
Amortizable intangible and other long-term assets	11,663	5,876	8,924
Non-amortizable intangibles	32,296	—	—
Goodwill	318,832	198,927	67,183
Deferred income taxes	(210)	597	(717)
Noncontrolling interests assumed	(44,303)	(30,337)	(18,905)
Liabilities assumed	(15,846)	(3,317)	(1,595)
Aggregate purchase cost	$ 334,990	$ 184,582	$ 62,003

Amortizable intangible assets acquired, primarily related to non-compete agreements, during 2017, 2016 and 2015 had weighted-average estimated useful lives of seven, seven and eleven years, respectively. The total amount of goodwill deductible for tax purposes associated with these acquisitions for 2017, 2016, and 2015 was approximately $237,363, $169,379 and $43,823, respectively.

(dollars in thousands, except per share data)

Change in ownership interests in Asia Pacific joint venture

On August 1, 2016, the Company consummated an agreement with Khazanah Nasional Berhad (Khazanah) and Mitsui and Co., Ltd (Mitsui) whereby Khazanah and Mitsui subscribed to invest a total of $300,000 over three years in exchange for a 40% total equity interest in the Company's APAC JV. Khazanah and Mitsui made initial investments of $50,000 each on August 1, 2016 as well as additional subscribed contributions of $50,000 each on August 1, 2017. Subsequent to those contributions, the Company now holds a 60% voting interest and a 73.3% current economic interest in the APAC JV.

Based on the governance structure and voting rights put in place upon the formation of the APAC JV, certain key decisions affecting the JV's operations are no longer at the unilateral discretion of the Company, but rather are shared with the noncontrolling investors. As a result, the Company deconsolidated its Asia Pacific dialysis business in the third quarter of 2016 and recognized an initial non-cash non-taxable estimated gain of $374,374 on its retained investment, net of contingent obligations. This retained interest was adjusted to the Company's proportionate share of the estimated fair value of the business, as implied by the Khazanah and Mitsui investment and adjusted for certain time value of money and uncertainty discounts. The Company then recognized an additional $6,293 gain in the first quarter of 2017 upon resolution of certain post-closing adjustments related to this transaction.

The Company's non-cash gain on its retained investment in the APAC JV in the third quarter of 2016 was computed with the assistance of an independent third party valuation firm and was based upon the best information available to management at that time. Subsequent to its deconsolidation on August 1 2016, the Company's retained interest in the APAC JV has been accounted for under the equity method. See Note 9 for further details on the accounting for this retained investment and a subsequent other-than-temporary impairment thereof recognized in 2017.

Pro forma financial information (unaudited)

The following summary, prepared on a pro forma basis, combines the results of operations as if all acquisitions within continuing operations in 2017 and 2016 had been consummated as of the beginning of 2016, including the impact of certain adjustments such as amortization of intangibles, interest expense on acquisition financing and income tax effects.

	Year ended December 31,	
	2017	2016
	(unaudited)	
Pro forma net revenues	$ 11,005,330	$ 11,076,750
Pro forma net income from continuing operations	907,443	1,052,700
Pro forma basic net income per share from continuing operations attributable to DaVita Inc.	4.81	5.22
Pro forma diluted net income per share from continuing operations attributable to DaVita Inc.	4.74	5.14

Contingent earn-out obligations

The Company has several contingent earn-out obligations associated with acquisitions that could result in the Company paying the former shareholders of acquired companies a total of up to approximately $11,466 if certain EBITDA, operating income performance targets or quality margins are met over the next two to six years.

Contingent earn-out obligations are remeasured to fair value at each reporting date until the contingencies are resolved with changes in the liability due to the remeasurement recognized in earnings. See Note 24 to these consolidated financial statements for further details. As of December 31, 2017, the Company estimated the fair value of these contingent earn-out obligations to be $6,388, of which a total of $216 is included in other liabilities, and the remaining $6,172 is included in other long-term liabilities in the Company's consolidated balance sheet.

(dollars in thousands, except per share data)

The following is a reconciliation of changes in the contingent earn-out obligations for the year ended December 31, 2017:

Beginning balance January 1, 2017	$	2,950
Contingent earn-out obligations associated with acquisitions		2,692
Remeasurement of fair value		746
	$	6,388

21. Held for sale and discontinued operations

DaVita Medical Group (DMG)

On December 5, 2017, we entered into an equity purchase agreement to sell our DMG division to Optum, a subsidiary of UnitedHealth Group Inc., for $4,900,000 in cash, subject to net working capital and other customary adjustments. The transaction is expected to close in 2018 and is subject to regulatory approval and other customary closing conditions. As a result of this pending transaction, the DMG business has been reclassified as held for sale and its results of operations are reported as discontinued operations for all periods presented.

The following table presents the financial results of discontinued operations related to DMG:

	Year ended December 31,		
	2017	2016	2015
Net revenues	$ 4,676,213	$ 4,113,414	$ 3,837,260
Expenses	4,634,782	3,994,624	3,596,342
Goodwill and other asset impairment charges	651,659	253,000	206,169
(Loss) income from discontinued operations before taxes	(610,228)	(134,210)	34,749
Income tax benefit (expense)	364,856	(24,052)	(88,216)
Net loss from discontinued operations, net of tax	$ (245,372)	$ (158,262)	$ (53,467)

As previously disclosed, the Company's DMG business has continued to experience declining operating results in recent years, and prior to being reclassified as held for sale the Company recorded goodwill and other asset impairment charges for the DMG business of $651,659, $253,000 and $206,169 in 2017, 2016 and 2015, respectively. These charges resulted from continuing developments in the Company's DMG business, including recent annual updates to Medicare Advantage benchmark reimbursement rates, changes in expectations concerning future government reimbursement rates and the Company's expected ability to mitigate them, medical cost and utilization trends, commercial pricing pressures, underperformance of certain DMG business units and other market factors.

(dollars in thousands, except per share data)

The following table presents the financial position of discontinued operations related to DMG:

	December 31, 2017	December 31, 2016
Assets		
Cash and cash equivalents	$ 179,668	$ 238,411
Other current assets	888,697	722,545
Property and equipment, net	379,945	311,246
Intangible assets, net	1,316,550	1,454,263
Other long-term assets	116,805	94,684
Goodwill	2,879,977	3,391,942
Total assets held for sale	$ 5,761,642	$ 6,213,091
Total current assets held for sale	$ 5,761,642	$ 960,956
Total long-term assets held for sale	$ —	$ 5,252,135
Liabilities		
Other liabilities	$ 505,734	$ 460,458
Medical payables	457,040	349,506
Current portion of long-term debt	2,845	4,779
Long-term debt	35,003	2,652
Other long-term liabilities	184,448	418,723
Total liabilities held for sale	$ 1,185,070	$ 1,236,118
Total current liabilities held for sale	$ 1,185,070	$ 807,233
Total long-term liabilities held for sale	$ —	$ 428,885

The following table presents cash flows of discontinued operations related to DMG:

	Year ended December 31,		
	2017	2016	2015
Net cash provided by operating activities from discontinued operations	$ 351,557	$ 287,049	$ 365,138
Net cash used in investing activities from discontinued operations	$ (232,329)	$ (430,917)	$ (121,893)

DMG acquisitions

During 2017, the Company's DMG business acquired other medical businesses for a total of $135,416 in net cash, deferred purchase price of $1,038, and liabilities assumed of $10,145. During 2016, the Company acquired other medical businesses for a total of $398,748 in net cash and deferred purchase price and liabilities assumed of $7,694. During 2015, the Company acquired other medical businesses for a total of $41,918 in net cash and deferred purchase price of $944. For several of the 2017 acquisitions, certain income tax amounts are pending final evaluation and quantification of any pre-acquisition tax contingencies. In addition, valuation of medical claims liabilities and certain other working capital items relating to several of these acquisitions are pending final quantification. The assets and liabilities for all acquisitions were recorded at their estimated fair values at the dates of the acquisitions and are included in the Company’s current held for sale assets and liabilities.

22. Variable interest entities

The Company relies on the operating activities of certain entities that it does not directly own or control, but over which it has indirect influence and of which it is considered the primary beneficiary. These entities are subject to the consolidation guidance applicable to variable interest entities (VIEs).

Under U.S. GAAP, VIEs typically include entities for which (i) the entity’s equity is not sufficient to finance its activities without additional subordinated financial support; (ii) the equity holders as a group lack the power to direct the activities that most significantly influence the entity’s economic performance, the obligation to absorb the entity’s expected losses, or the right to receive the entity’s expected returns; or (iii) the voting rights of some investors are not proportional to their obligations to absorb the entity’s losses.

The Company has determined that substantially all of the entities it is associated with that qualify as VIEs must be included in its consolidated financial statements. A number of these VIEs are within the Company's DMG business, which has been reclassified as held for sale and as a discontinued operation in these financial statements. The Company manages these entities and provides operating and capital funding as necessary for the entities to accomplish their operational and strategic objectives. A number of these entities are subject to nominee share ownership or share transfer restriction agreements that effectively transfer the majority of the economic risks and rewards of their ownership to the Company. In other cases the Company's management agreements with these entities include both financial terms and protective and participating rights to the entities' operating, strategic and non-clinical governance decisions which transfer substantial powers over and economic responsibility for the entities to the Company. In some cases such entities are subject to broad exclusivity or noncompetition restrictions that benefit the Company. Further, in some cases the Company has contractual arrangements with its related party nominee owners that effectively indemnify these parties from the economic losses from, or entitle the Company to the economic benefits of, these entities.

The analyses upon which these consolidation determinations rest are complex, involve uncertainties, and require significant judgment on various matters, some of which could be subject to different interpretations. At December 31, 2017, these consolidated financial statements include total assets of VIEs of $870,314 and total liabilities and noncontrolling interests of VIEs to third parties of $475,143, including assets of $595,670 and liabilities and noncontrolling interests of $319,777 related to the Company's DMG business which is classified as held for sale.

The Company also sponsors certain deferred compensation plans whose trusts qualify as VIEs and the Company consolidates each of these plans as their primary beneficiary. The assets of these plans are recorded in short-term or long-term investments with related liabilities recorded in accrued compensation and benefits and other long-term liabilities. See Note 15 to these consolidated financial statements for disclosures on the assets of these consolidated non-qualified deferred compensation plans.

23. Concentrations

Approximately 67%, 64% and 66% of total U.S. dialysis services revenues in 2017, 2016 and 2015, respectively, are from government-based programs, principally Medicare and Medicaid. Related net accounts receivable and other receivables from Medicare, including Medicare-assigned plans, and Medicaid, including Managed Medicaid plans, were approximately $869,083 and $831,445, as of December 31, 2017 and 2016, respectively.

There is no single commercial payor that accounted for more than 10% of total consolidated accounts receivable or consolidated net revenues at December 31, 2017 and 2016.

24. Fair values of financial instruments

The Company measures the fair value of certain assets, liabilities and noncontrolling interests subject to put provisions (temporary equity) based upon certain valuation techniques that include observable or unobservable inputs and assumptions that market participants would use in pricing these assets, liabilities, temporary equity and commitments. The Company has also classified certain assets, liabilities and temporary equity that are measured at fair value into the appropriate fair value hierarchy levels as defined by the FASB.

(dollars in thousands, except per share data)

The following tables summarize the Company's assets, liabilities and temporary equity measured at fair value on a recurring basis as of December 31, 2017 and 2016:

December 31, 2017	Total	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets				
Available for sale securities	$ 38,895	$ 38,895	$ —	$ —
Interest rate cap agreements	$ 1,032	$ —	$ 1,032	$ —
Liabilities				
Contingent earn-out obligations	$ 6,388	$ —	$ —	$ 6,388
Temporary equity				
Noncontrolling interests subject to put provisions	$ 1,011,360	$ —	$ —	$ 1,011,360
December 31, 2016				
Assets				
Available for sale securities	$ 31,197	$ 31,197	$ —	$ —
Interest rate cap agreements	$ 9,929	$ —	$ 9,929	$ —
Liabilities				
Contingent earn-out obligations	$ 2,950	$ —	$ —	$ 2,950
Temporary equity				
Noncontrolling interests subject to put provisions	$ 973,258	$ —	$ —	$ 973,258

Available for sale securities represent investments in various open-ended registered investment companies, or mutual funds, and are recorded at fair value estimated based upon redemption prices reported by each mutual fund. See Note 3 to these consolidated financial statements for further discussion.

The interest rate cap agreements are recorded at fair value estimated from valuation models utilizing the income approach and commonly accepted valuation techniques that use inputs from closing prices for similar assets and liabilities in active markets as well as other relevant observable market inputs at quoted intervals such as current interest rates, forward yield curves, implied volatility and credit default swap pricing. The Company does not believe the ultimate amount that could be realized upon settlement of these interest rate cap agreements would be materially different from the fair value estimates currently reported. See Note 13 to these consolidated financial statements for further discussion.

The estimated fair value measurements of contingent earn-out obligations are primarily based on unobservable inputs, including projected EBITDA. The estimated fair value of these contingent earn-out obligations is remeasured as of each reporting date and could fluctuate based upon any significant changes in key assumptions, such as changes in the Company credit risk adjusted rate that is used to discount obligations to present value.

See Note 17 to these consolidated financial statements for a discussion of the Company's methodology for estimating the fair values of noncontrolling interests subject to put obligations.

Other financial instruments consist primarily of cash, accounts receivable, accounts payable, other accrued liabilities and debt. The balances of non-debt financial instruments are presented in the consolidated financial statements at December 31, 2017 and 2016 at their approximate fair values due to the short-term nature of their settlements. The carrying amount of the Company's senior secured credit facilities totaled $4,428,376 as of December 31, 2017, and their fair value was approximately $4,495,649 based upon quoted market prices. The carrying amount of the Company's Senior Notes was approximately $4,460,176 at December 31, 2017 and their fair value was approximately $4,566,175 at December 31, 2017 based upon quoted market prices.

25. Segment reporting

The Company has consisted of two major divisions, DaVita Kidney Care (Kidney Care) and DaVita Medical Group (DMG). The Kidney Care division is comprised of the Company's U.S. dialysis and related lab services business, various ancillary services and strategic initiatives, including its international operations, and the Company's corporate administrative

support. The Company's U.S. dialysis and related lab services business is its largest line of business and is a leading provider of kidney dialysis services in the U.S. for patients suffering from chronic kidney failure, also known as ESRD. The Company's ancillary services and strategic initiatives consist primarily of pharmacy services, disease management services, vascular access services, clinical research programs, physician services, direct primary care, ESRD seamless care organizations and comprehensive care as well as the Company's international operations.

The Company's DMG division is a patient- and physician-focused integrated healthcare delivery and management company with over two decades of providing coordinated outcomes-based medical care in a cost-effective manner. On December 5, 2017, the Company entered into an equity purchase agreement to sell its DMG division to Optum, a subsidiary of UnitedHealth Group Inc. The transaction is expected to close in 2018 and is subject to regulatory approval and other customary closing conditions. As a result of this pending transaction, the DMG business has been reclassified as held for sale and its results of operations are reported as discontinued operations for all periods presented in these consolidated financial statements.

The Company's operating segments have been defined based on the separate financial information that is regularly produced and reviewed by the Company's chief operating decision maker in making decisions about allocating resources to and assessing the financial performance of the Company's various operating lines of business. The chief operating decision maker for the Company is its Chief Executive Officer.

The Company's separate operating segments include its U.S. dialysis and related lab services business, each of its ancillary services and strategic initiatives, its consolidated international kidney care operations in each country and under the Saudi Ministry of Health charter, its equity method investment in the Asia Pacific joint venture, and its other health operations in Europe. The U.S. dialysis and related lab services business qualifies as a separately reportable segment, and all other ancillary services and strategic initiatives operating segments, including the international operating segments, have been combined and disclosed in the other segments category.

The Company's operating segment financial information included in this report is prepared on the internal management reporting basis that the chief operating decision maker uses to allocate resources and assess the financial performance of the Company's operating segments. For internal management reporting, segment operations include direct segment operating expenses but generally exclude corporate administrative support costs, which consist primarily of indirect labor, benefits and long-term incentive-based compensation expenses of certain departments which provide support to all of the Company's various operating lines of business, except to the extent that such costs are charged to and borne by certain ancillary services and strategic initiatives via internal management fees. These corporate administrative support costs are reduced by internal management fees received from the Company's ancillary lines of business.

(dollars in thousands, except per share data)

The following is a summary of segment revenues, segment operating margin (loss), and a reconciliation of segment operating margin to consolidated income from continuing operations before income taxes:

	Year ended December 31,		
	2017	2016	2015
Segment revenues:			
U.S. dialysis and related lab services			
Patient service revenues:			
External sources	$ 9,767,123	$ 9,524,067	$ 9,014,577
Intersegment revenues	55,175	27,355	19,414
Total U.S. dialysis and related lab services revenues	9,822,298	9,551,422	9,033,991
Less: Provision for uncollectible accounts	(482,007)	(429,882)	(406,530)
Net U.S. dialysis and related lab services patient service revenues	9,340,291	9,121,540	8,627,461
Other revenues[1]	19,774	16,649	13,971
Total net U.S. dialysis and related lab services revenues	9,360,065	9,138,189	8,641,432
Other - Ancillary services and strategic initiatives			
Net patient service revenues	323,156	201,867	134,496
Other external sources	1,248,588	1,394,766	1,225,731
Intersegment revenues	24,603	24,739	22,204
Total ancillary services and strategic initiatives revenues	1,596,347	1,621,372	1,382,431
Total net segment revenues	10,956,412	10,759,561	10,023,863
Elimination of intersegment revenues	(79,778)	(52,094)	(41,618)

Reconciliation of segment operating margin to consolidated income from continuing operations before income taxes:			
Corporate administrative support	(44,966)	(13,628)	(18,965)
Consolidated operating income	1,812,755	2,029,710	1,136,766
Debt expense	(430,634)	(414,116)	(408,380)
Debt redemption charges	—	—	(48,072)
Other income	17,665	7,511	8,073
Consolidated income from continuing operations before income taxes	$ 1,399,786	$ 1,623,105	$ 688,387

(1) Includes management fee revenues from providing management and administrative services to dialysis ventures in which the Company owns a noncontrolling interest or which are wholly-owned by third parties.

Depreciation and amortization expense by segment is as follows:

	Year ended December 31,		
	2017	2016	2015
U.S. dialysis and related lab services	$ 520,965	$ 482,768	$ 438,238
Other - Ancillary services and strategic initiatives	38,946	26,729	25,667
	$ 559,911	$ 509,497	$ 463,905

(dollars in thousands, except per share data)

Subsequent to the issuance of the Company's fiscal year 2016 consolidated financial statements and their inclusion in its Annual Report on Form 10-K filed with the Securities and Exchange Commission on February 24, 2017 (the 2016 10-K), the Company determined that it had misstated its disclosure of segment assets at December 31, 2016 in Note 25 to those consolidated financial statements. This misstatement resulted in an overstatement of "U.S. dialysis and related lab services" segment assets of $338,963 and a corresponding understatement of "Other - ancillary services and strategic initiatives" segment assets of the same amount. The Company performed an assessment of the materiality of this misstatement and concluded that this misstatement as originally disclosed was not materially misleading in its 2016 consolidated financial statements taken as a whole. The Company therefore has not amended its financial statements filed on its 2016 10-K to correct this misstatement, but has provided the corrected disclosure here.

Summary of assets by segment is as follows:

	Year ended December 31,	
	2017	2016
Segment assets		
U.S. dialysis and related lab services (including equity investments of $84,866 and $66,924, respectively)	$ 11,776,042	$ 11,108,386
Other - Ancillary services and strategic initiatives[(1)] (including equity investments of $160,668 and $425,115, respectively)	1,410,509	1,434,299
DMG - Held for sale (including equity investments of $10,321 and $10,350, respectively)	5,761,642	6,213,091
Consolidated assets	$ 18,948,193	$ 18,755,776

(1) Includes approximately $125,932 and $96,396 in 2017 and 2016, respectively, of net property and equipment related to the Company's international operations.

Expenditures for property and equipment by segment is as follows:

	Year ended December 31,		
	2017	2016	2015
U.S. dialysis and related lab services	$ 759,218	$ 675,994	$ 584,513
Other - Ancillary services and strategic initiatives	50,891	68,702	56,685
DMG - Held for sale	95,141	84,399	66,800
	$ 905,250	$ 829,095	$ 707,998

26. Supplemental cash flow information

The table below provides supplemental cash flow information:

	Year ended December 31,		
	2017	2016	2015
Cash paid:			
Income taxes	$ 387,159	$ 339,411	$ 156,075
Interest	424,547	406,987	405,120
Non-cash investing and financing activities:			
Fixed assets under capital lease obligations	48,378	28,127	74,035

(dollars in thousands, except per share data)

28. Consolidating financial statements

The following information is presented in accordance with Rule 3-10 of Regulation S-X. The operating and investing activities of the separate legal entities included in the Company's consolidated financial statements are fully interdependent and integrated. Revenues and operating expenses of the separate legal entities include intercompany charges for management and other services. The Company's Senior Notes are guaranteed by substantially all of its domestic subsidiaries. Each of the guarantor subsidiaries has guaranteed the Senior Notes on a joint and several basis. However, the guarantor subsidiaries can be released from their obligations in the event of a sale or other disposition of all or substantially all of the assets of such subsidiary, including by merger or consolidation or the sale of all equity interests in such subsidiary owned by the Company, if such subsidiary guarantor is designated as an unrestricted subsidiary or otherwise ceases to be a restricted subsidiary, and if such subsidiary guarantor no longer guaranties any other indebtedness of the Company. Certain domestic subsidiaries, foreign subsidiaries, joint ventures, partnerships and third parties are not guarantors of the Senior Notes.

Year ended December 31, 2016	$ 251,734	$ —	$ 442,985	$ 455,822	$ 238,897
Year ended December 31, 2015	$ 229,802	$ —	$ 422,145	$ 400,213	$ 251,734

DAVITA INC.
NON-EMPLOYEE DIRECTOR COMPENSATION POLICY

ARTICLE I

PURPOSE

The primary purposes of the DaVita Inc. (the "Company") Non-Employee Director Compensation and Reimbursement Policy (this "Policy") are as follows:

- to pay differentially higher compensation for higher levels of work, responsibility and performance;
- to provide a compensation structure that will attract highly competent candidates; and
- to provide a significant portion of compensation in the form of equity-based awards to align non-employee director compensation with increases in long-term shareholder value.

All references to "Director" in this Policy shall mean a member of the Company's Board of Directors (the "Board") who is not employed by the Company.

ARTICLE II

BASE ANNUAL RETAINER

Each Director shall receive a base annual retainer (the "Base Annual Retainer") of up to Two Hundred Seventy Thousand Dollars (*$270,000) per fiscal year as follows:

2.1 Cash: Eighty Thousand Dollars ($80,000) to be paid in quarterly installments made within five business days of the last calendar day of each fiscal quarter;

2.2 Stock Settled Stock Appreciation Rights: Ninety-Five Thousand Dollars ($95,000) to be paid in the form of stock-settled stock appreciation rights ("SSARs"). The SSARs shall be subject to the following terms and conditions (the "SSAR Grant Terms"):

2.2.1 Grant Date: The SSARs shall be granted on the date of the Company's annual meeting of stockholders.

2.2.2 Amount: The number of SSARs to be granted shall be the nearest whole number of shares determined by dividing $95,000 by twenty percent (20%) of the closing market price of the Company's common stock as listed on the New York Stock Exchange on the Grant Date.

2.2.3 Vesting: The SSARs shall vest one hundred percent (100%) on the one year anniversary following the Grant Date.

2.2.4 Expiration: The SSARs shall expire five years following the Grant Date.

2.3 Direct Stock Issuances: Ninety-Five Thousand Dollars ($95,000) to be paid in the form of direct stock issuances ("DSIs") granted quarterly. The DSIs shall be subject to the following terms and conditions (the "DSI Grant Terms"):

2.3.1 Grant Date: The DSIs shall be granted on the last day of each fiscal quarter.

2.3.2 Amount: The number of DSIs to be granted shall be the nearest whole number of shares as determined by dividing $23,750 by the closing market price of the Company's common stock as listed on the New York Stock Exchange on the last trading day of each fiscal quarter.

2.4 Proration: The Base Annual Retainer shall be prorated, as applicable, based on the days of service on the Board within a fiscal quarter. SSARs granted on a prorated basis shall be granted and priced as of the close of market on the first day of service on the Board, which date shall be determined by the Board upon such individual's appointment as a Director.

ARTICLE III

ANNUAL RETAINER PREMIUM – LEAD INDEPENDENT DIRECTOR

A Director serving as the Lead Independent Director of the Board shall be paid a premium (the "Lead Director Premium") of up to One Hundred Twenty-Five Thousand Dollars ($125,000) per fiscal year as follows:

3.1 Cash: Thirty-Seven Thousand Five Hundred Dollars ($37,500) to be paid in quarterly installments made within five business days of the last calendar day of each fiscal quarter.

3.2 Stock Settled Stock Appreciation Rights: Forty-Three Thousand Seven Hundred Fifty Dollars ($43,750) to be paid in the form of SSARs, subject to the SSAR Grant Terms provided in Section 2.2 above.

3.3 Direct Share Issuances: Forty-Three Thousand Seven Hundred Fifty Dollars ($43,750) to be paid in the form of DSIs to be granted quarterly, subject to the DSI Grant Terms provided in Section 2.3 above.

3.4 Proration: The Lead Director Premium shall be prorated, as applicable, based on the days of service on the Board within a fiscal quarter. SSARs granted on a prorated basis shall be granted and priced as of the close of market as listed on the New York Stock Exchange on the first day of service, which date shall be determined by the Board upon such Director's appointment as the Lead Independent Director.

ARTICLE IV

ANNUAL RETAINER PREMIUM – COMMITTEE CHAIRS

A Director serving as a Chair of a committee ("Committee") of the Board shall be paid a cash premium (the "Chair Premium") per fiscal year as follows:

4.1 Chairs of the Audit, Compensation and Compliance Committees: Fifty-Thousand Dollars ($50,000) to be paid each in quarterly installments made within five business days of the last calendar day of each fiscal quarter.

4.2 Chairs of the Public Policy and Clinical Performance Committees: Twenty-Five Thousand Dollars ($25,000) to be paid each in quarterly installments made within five business days of the last calendar day of each fiscal quarter.

4.3 Chair of the Nominating and Governance Committee: No Chair Premium will be paid for services provided as Chair of the Nominating and Governance Committee.

4.4 Proration: A Chair Premium shall be prorated, as applicable, based on the days of service as a Chair of a Committee within a fiscal quarter.

ARTICLE V

MEETING FEES

A Director shall be paid the following fees for his or her in person or telephonic attendance of Board and Committee meetings as follows:

5.1 Board: Two Thousand Five Hundred Dollars ($2,500) cash for attendance of: (1) special Board meetings held in person, irrespective of length, and (2) special Board meetings held telephonically that last approximately one hour. No additional compensation shall be provided for attendance of regular Board meetings.

5.2 Committees/Sub-Committees: Two Thousand Five Hundred Dollars ($2,500) cash for attendance of the following Committee meetings, provided that the Director is a member of such Committee: (1) regular or special Committee meetings held in person, and (2) regular or special Committee meetings held telephonically that last approximately one hour. Notwithstanding the foregoing, each member of the Audit Committee shall be paid Two Thousand Five Hundred Dollars ($2,500) in cash for his or her in person or telephonic attendance to each Audit Committee meeting related to quarterly earnings releases, regardless of the duration of such meeting.

5.2.1 Notwithstanding anything herein to the contrary, a Director shall be paid $2,500 in cash for attendance to a regular or

special meeting of a Committee of which such Director is not a member, provided that such Director's attendance was made at the request of the Committee's chair and provided further that such payment is made in accordance with this Section 5.2.

5.2.2 New Committee Members: A Director attending a Committee meeting held earlier on the same day of his or her appointment by the Board to such Committee, will be eligible to receive Committee meeting fees as described under this Section 5.2.

ARTICLE VI

EXPENSE REIMBURSEMENT AND COMPENSATION FOR ADDITIONAL TIME EXPENDED

6.1 Expense Reimbursement. Each Director shall be reimbursed for his or her reasonable out-of-pocket business expenses incurred in connection with attending meetings of the Board or its Committees or in connection with other Board related business.

6.2 Compensation for Additional Time. Each Director shall be compensated in cash on a "per diem," hourly or other basis at a rate that is reasonable and fair to the Company as determined in the discretion of the Lead Independent Director (or, should the matter be referred to them, the Board or the Compensation Committee), for significant time spent outside of Board or Committee meetings for meetings or activities outside the scope of normal Board duties, including director training, meeting with Company management or external auditors, interviewing director candidates or other activities deemed necessary by the Chairman of the Board, the Lead Independent Director, or the entire Board. Any dollar amounts set for a particular unit of time shall be paid on a pro rata basis for time expended that is less than the full unit of time for which a rate was set. The Lead Independent Director shall oversee requests for compensation under this Article VI.

Exhibit 12.1

DAVITA INC.
RATIO OF EARNINGS TO FIXED CHARGES

The ratio of earnings to fixed charges is computed by dividing earnings by fixed charges. Earnings for this purpose are defined as pretax income from continuing operations adjusted by adding back fixed charges expensed during the period less noncontrolling interests. Fixed charges include debt expense (interest expense and the amortization of deferred financing costs), the estimated interest component of rent expense on operating leases, and capitalized interest.

	Year ended December 31,				
	2017	**2016**	**2015**	**2014**	**2013**
Earnings adjusted for fixed charges:					
Income from continuing operations before income taxes	$ 1,399,786	$ 1,623,105	$ 688,387	$ 1,094,322	$ 692,438
Add:					
Debt expense	430,634	414,116	408,380	410,223	429,938
Interest portion of rent expense	171,842	154,901	143,311	130,640	120,398
Less: Noncontrolling interests	(175,176)	(159,404)	(158,304)	(140,949)	(124,438)
	427,300	409,613	393,387	399,914	425,898
	$ 1,827,086	$ 2,032,718	$ 1,081,774	$ 1,494,236	$ 1,118,336
Fixed charges:					
Debt expense	$ 430,634	$ 414,116	$ 408,380	$ 410,223	$ 429,938
Interest portion of rent expense	171,842	154,901	143,311	130,640	120,398
Capitalized interest	19,176	12,990	9,723	7,888	6,408
	$ 621,652	$ 582,007	$ 561,414	$ 548,751	$ 556,744
Ratio of earnings to fixed charges	2.94	3.49	1.93	2.72	2.01

SECTION 302 CERTIFICATION

I, Kent J. Thiry, certify that:

1. I have reviewed this annual report on Form 10-K of DaVita Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and we have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Patient Transfer Agreement

DocuSign Envelope ID: ABF82DF2-A7A6-4828-87BD-59353C084D02

FOR COMPANY USE ONLY:
Clinic #: 11160

PATIENT TRANSFER AGREEMENT

This **PATIENT TRANSFER AGREEMENT** (the "Agreement") is made as of the last date of signature hereto (the "Effective Date"), by and between **Providence Health & Services - Washington d/b/a Providence Regional Medical Center Everett** (hereinafter "Hospital") and **Refuge Dialysis, LLC**, a Delaware limited liability company and subsidiary of DaVita HealthCare Partners Inc. ("Company").

RECITALS

WHEREAS, the parties hereto desire to enter into this Agreement governing the transfer of patients between Hospital and the following free-standing dialysis clinic owned and operated by Company:

Pilchuck Dialysis
1250 State Ave.
Marysville, Washington 98270

WHEREAS, the parties hereto desire to enter into this Agreement in order to specify the rights and duties of each of the parties and to specify the procedure for ensuring the timely transfer of patients between the facilities;

WHEREAS, the parties wish to facilitate the continuity of care and the timely transfer of patients and records between the facilities; and

WHEREAS, only a patient's attending physician (not Company or the Hospital) can refer such patient to Company for dialysis treatments.

NOW THEREFORE, in consideration of the premises herein contained and for other good and valuable consideration, the receipt and legal sufficiency of which are hereby acknowledged, the parties agree as follows:

1. **HOSPITAL OBLIGATIONS.** In accordance with the policies and procedures as hereinafter provided, and upon the recommendation of an attending physician, a patient of Company may be transferred to Hospital.

(a) Hospital agrees to exercise its best efforts to provide for prompt admission of patients provided that all usual, reasonable conditions of admission are met. All transfers between the facilities shall be made in accordance with applicable federal and state laws and regulations, the standards of The Joint Commission ("TJC") and any other applicable accrediting bodies, and reasonable policies and procedures of the facilities. Transfer record forms shall be completed in detail and signed by the physician or nurse in charge at Company and must accompany the patient to the receiving institution.

DocuSign Envelope ID: ABF82DF2-A7A6-4828-87BD-59353C084D02

(b) Neither the decision to transfer a patient nor the decision to not accept a request to transfer a patient shall be predicated upon arbitrary, capricious or unreasonable discrimination or based upon the patient's inability to pay for services rendered by either facility.

2. **COMPANY OBLIGATIONS.**

(a) Upon transfer of a patient to Hospital, Company agrees:

i. That it shall transfer any needed personal effects of the patient, and information relating to the same, and shall be responsible therefore until signed for by a representative of Hospital;

ii. Original medical records kept by each of the parties shall remain the property of that institution; and

iii. That transfer procedures shall be made known to the patient care personnel of each of the parties.

(b) Company agrees to transmit with each patient at the time of transfer, or in case of an emergency, as promptly as possible thereafter, an abstract of pertinent medical and other records necessary to continue the patient's treatment without interruption and to provide identifying and other information, to include:

i. current medical findings;

ii. diagnosis;

iii. rehabilitation potential;

iv. discharge summary;

v. a brief summary of the course of treatment followed;

vi. nursing and dietary information;

vii. ambulating status; and

viii. administrative and pertinent social information.

(c) Company agrees to readmit to its facilities patients who have been transferred to Hospital for medical care as clinic capacity allows. Hospital agrees to keep the administrator or designee of Company advised of the condition of the patients that will affect the anticipated date of transfer back to Company and to provide as much notice of the transfer date as possible. Company shall assign readmission priority for its patients who have been treated at Hospital and who are ready to transfer back to Company.

DocuSign Envelope ID: ABF82DF2-A7A6-4828-87BD-59353C084D02

3. **BILLING, PAYMENT, AND FEES.** Hospital and Company each shall be responsible for billing the appropriate payor for the services it provides, respectively, hereunder. Company shall not act as guarantor for any charges incurred while the patient is a patient in Hospital. Charges for services performed by either party shall be collected by the party rendering such services, directly from the patient, third party payor, or other sources normally billed by the party. Neither party shall have any liability to the other for such charges. The parties shall cooperate with each other in the exchange of information about financial responsibility for services rendered by them to patients who are transferred to Facility.

4. **HIPAA.** Hospital and Company agree to comply with the provisions of the Health Insurance Portability and Accountability Act of 1996 ("HIPAA"). Hospital and Company acknowledge and agree that from time to time, HIPAA may require modification to this Agreement for compliance purposes. Hospital and Company further acknowledge and agree to comply with requests by the other party hereto related to HIPAA.

5. **STATUS AS INDEPENDENT CONTRACTORS.** The parties acknowledge and agree that their relationship is solely that of independent contractors. Governing bodies of Hospital and Company shall have exclusive control of the policies, management, assets, and affairs of their respective facilities. Nothing in this Agreement shall be construed as limiting the right of either to affiliate or contract with any other Hospital or facility on either a limited or general basis while this Agreement is in effect. Neither party shall use the name of the other in any promotional or advertising material unless review and approval of the intended use shall be obtained from the party whose name is to be used and its legal counsel.

6. **INSURANCE.** Each party shall secure and maintain, or cause to be secured and maintained during the term of this Agreement, commercial general liability, property damage, and workers compensation insurance in amounts generally acceptable in the industry, and professional liability insurance providing minimum limits of liability of $1,000,000 per occurrence and $3,000,000 in aggregate. Each party shall deliver to the other party certificate(s) of insurance evidencing such insurance coverage upon execution of this Agreement, and annually thereafter upon the request of the other party. Each party shall provide the other party with not less than thirty (30) days prior written notice of any change in or cancellation of any of such insurance policies. Said insurance shall survive the termination of this Agreement.

7. **INDEMNIFICATION.**

(a) Hospital Indemnity. Hospital hereby agrees to defend, indemnify and hold harmless Company and its shareholders, affiliates, officers, directors, employees, and agents for, from and against any claim, loss, liability, cost and expense (including, without limitation, costs of investigation and reasonable attorney's fees), directly or indirectly relating to, resulting from or arising out of any action or failure to act arising out of this Agreement by Hospital and its staff regardless of whether or not it is caused in part by Company or its officers, directors, agents, representatives, employees, successors and assigns. This indemnification provision shall not be effective as to any loss attributable exclusively to the negligence or willful act or omission of Company.

DocuSign Envelope ID: ABF82DF2-A7A6-4828-87BD-59353C084D02

(b) Company Indemnity. Company hereby agrees to defend, indemnify and hold harmless Hospital and its shareholders, affiliates, officers, directors, employees, and agents for, from and against any claim, loss, liability, cost and expense (including, without limitation, costs of investigation and reasonable attorney's fees), directly or indirectly relating to, resulting from or arising out of any action or failure to act arising out of this Agreement by Company and its staff regardless of whether or not it is caused in part by or its officers, directors, agents, representatives, employees, successors and assigns. This indemnification provision shall not be effective as to any loss attributable exclusively to the negligence or willful act or omission of Hospital.

(c) Survival. The indemnification obligations of the parties shall continue in full force and effect notwithstanding the expiration or termination of this Agreement with respect to any such expenses, costs, damages, claims and liabilities which arise out of or are attributable to the performance of this Agreement prior to its expiration or termination.

8. **DISPUTE RESOLUTION.** Any dispute which may arise under this Agreement shall first be discussed directly with representatives of the departments of the parties that are directly involved. If the dispute cannot be resolved at this level, it shall be referred to administrative representatives of the parties for discussion and resolution.

(a) Informal Resolution. Should any dispute between the parties arise under this Agreement, written notice of such dispute shall be delivered from one party to the other party and thereafter, the parties, through appropriate representatives, shall first meet and attempt to resolve the dispute in face-to-face negotiations. This meeting shall occur within thirty (30) days of the date on which the written notice of such dispute is received by the other party.

(b) Resolution Through Mediation. If no resolution is reached through informal resolution, pursuant to Section 8(a) above, the parties shall, within forty-five (45) days of the first meeting referred to in Section 8(a) above, attempt to settle the dispute by formal mediation. If the parties cannot otherwise agree upon a mediator and the place of the mediation within such forty-five (45) day period, the American Arbitration Association ("AAA") in the State of Washington shall administer the mediation. Such mediation shall occur no later than ninety (90) days after the dispute arises. All findings of fact and results of such mediation shall be in written form prepared by such mediator and provided to each party to such mediation. In the event that the parties are unable to resolve the dispute through formal mediation pursuant to this Section 8(b), the parties shall be entitled to seek any and all available legal remedies.

9. **TERM AND TERMINATION.** This Agreement shall be effective for an initial period of one (1) year from the Effective Date and shall continue in effect indefinitely after such initial term, except that either party may terminate by giving at least sixty (60) day notice in writing to the other party of its intention to terminate this Agreement. If this Agreement is terminated for any reason within one (1) year of the Effective Date of this Agreement, then the parties hereto shall not enter into a similar agreement with each other for the services covered hereunder before the first anniversary of the Effective Date. Termination shall be effective at the expiration of the sixty (60) day notice period. However, if either party shall have its license to operate its facility revoked by the State or become ineligible as a provider of service under Medicare or Medicaid

DocuSign Envelope ID: ABF82DF2-A7A6-4828-87BD-59353C084D02

laws, this Agreement shall automatically terminate on the date such revocation or ineligibility becomes effective.

10. **AMENDMENT.** This Agreement may be modified or amended from time to time by mutual written agreement of the parties, signed by authorized representatives thereof, and any such modification or amendment shall be attached to and become part of this Agreement. No oral agreement or modification shall be binding unless reduced to writing and signed by both parties.

11. **ENFORCEABILITY/SEVERABILITY.** The provisions of this Agreement are severable. The invalidity or unenforceability of any term or provisions hereto in any jurisdiction shall in no way affect the validity or enforceability of any other terms or provisions in that jurisdiction, or of this entire Agreement in any other jurisdiction.

12. **COMPLIANCE RELATED MATTERS.** The parties agree and certify that this Agreement is not intended to generate referrals for services or supplies for which payment maybe made in whole or in part under any federal health care program. The parties will comply with statutes, rules, and regulations as promulgated by federal and state regulatory agencies or legislative authorities having jurisdiction over the parties.

13. **EXCLUDED PROVIDER.** Each party represents that neither that party nor any entity owning or controlling that party has ever been excluded from any federal health care program including the Medicare/Medicaid program or from any state health care program. Each party further represents that it is eligible for Medicare/Medicaid participation. Each party agrees to disclose immediately any material federal, state, or local sanctions of any kind, imposed subsequent to the date of this Agreement, or any investigation which commences subsequent to the date of this Agreement, that would materially adversely impact Company's ability to perform its obligations hereunder.

14. **NOTICES.** All notices, requests, and other communications to any party hereto shall be in writing and shall be addressed to the receiving party's address set forth below or to any other address as a party may designate by notice hereunder, and shall either be (a) delivered by hand, (b) sent by recognized overnight courier, or (c) by certified mail, return receipt requested, postage prepaid.

If to Hospital:
Providence Health & Services – Washington
d/b/a Providence Regional Medical Center Everett
1231 Colby Avenue
Everett, Washington, 98201
Attention: CEO

If to Company:
Refuge Dialysis, LLC
C/o: DaVita HealthCare Partners Inc.
1250 State Ave.
Marysville, Washington, 98270
Attention: Facility Administrator

DocuSign Envelope ID: ABF82DF2-A7A6-4828-87BD-59353C084D02

With copies to: Refuge Dialysis, LLC
C/o: DaVita HealthCare Partners Inc.
601 Hawaii Street
El Segundo, California 90245
Attention: Group General Counsel

DaVita HealthCare Partners Inc.
2000 16th St., 12th Floor
Denver, Colorado 80202
Attention: General Counsel

All notices, requests, and other communication hereunder shall be deemed effective (a) if by hand, at the time of the delivery thereof to the receiving party at the address of such party set forth above, (b) if sent by overnight courier, on the next business day following the day such notice is delivered to the courier service, or (c) if sent by certified mail, five (5) business days following the day such mailing is made.

15. **ASSIGNMENT.** This Agreement shall not be assigned in whole or in part by either party hereto without the express written consent of the other party, except that Company may assign this Agreement to one of its affiliates or subsidiaries without the consent of Hospital.

16. **COUNTERPARTS.** This Agreement may be executed simultaneously in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Copies of signatures sent by facsimile shall be deemed to be originals.

17. **NON-DISCRIMINATION.** All services provided by Hospital hereunder shall be in compliance with all federal and state laws prohibiting discrimination on the basis of race, color religion, sex national origin, handicap, or veteran status.

18. **WAIVER.** The failure of any party to insist in any one or more instances upon performance of any terms or conditions of this Agreement shall not be construed as a waiver of future performance of any such term, covenant, or condition, and the obligations of such party with respect thereto shall continue in full force and effect.

19. **GOVERNING LAW.** The laws of the State of Washington shall govern this Agreement.

20. **HEADINGS.** The headings appearing in this Agreement are for convenience and reference only, and are not intended to, and shall not, define or limit the scope of the provisions to which they relate.

21. **ENTIRE AGREEMENT.** This Agreement constitutes the entire agreement between the parties with respect to the subject matter hereof and supersedes any and all other agreements, either oral or written, between the parties (including, without limitation, any prior agreement between Hospital and Company or any of its subsidiaries or affiliates) with respect to the subject matter hereof.

DocuSign Envelope ID: ABF82DF2-A7A6-4828-87BD-59353C084D02

22. **APPROVAL BY DAVITA HEALTHCARE PARTNERS INC. ("DAVITA") AS TO FORM.** The parties acknowledge and agree that this Agreement shall take effect and be legally binding upon the parties only upon full execution hereof by the parties and upon approval by DaVita HealthCare Partners Inc. as to the form hereof.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement the day and year first above written.

Electronic Record and Signature Disclosure

Electronic Record and Signature Disclosure created on: 6/12/2014 5:08:39 PM
Parties agreed to: Jason Bosh, Perri Melnick

ELECTRONIC RECORD AND SIGNATURE DISCLOSURE

From time to time, DaVita (we, us or Company) may be required by law to provide to you certain written notices or disclosures. Described below are the terms and conditions for providing to you such notices and disclosures electronically through your DocuSign, Inc. (DocuSign) Express user account. Please read the information below carefully and thoroughly, and if you can access this information electronically to your satisfaction and agree to these terms and conditions, please confirm your agreement by clicking the 'I agree' button at the bottom of this document.

Getting paper copies

At any time, you may request from us a paper copy of any record provided or made available electronically to you by us. For such copies, as long as you are an authorized user of the DocuSign system you will have the ability to download and print any documents we send to you through your DocuSign user account for a limited period of time (usually 30 days) after such documents are first sent to you. After such time, if you wish for us to send you paper copies of any such documents from our office to you, you will be charged a $0.00 per-page fee. You may request delivery of such paper copies from us by following the procedure described below.

Withdrawing your consent

If you decide to receive notices and disclosures from us electronically, you may at any time change your mind and tell us that thereafter you want to receive required notices and disclosures only in paper format. How you must inform us of your decision to receive future notices and disclosure in paper format and withdraw your consent to receive notices and disclosures electronically is described below.

Consequences of changing your mind

If you elect to receive required notices and disclosures only in paper format, it will slow the speed at which we can complete certain steps in transactions with you and delivering services to you because we will need first to send the required notices or disclosures to you in paper format, and then wait until we receive back from you your acknowledgment of your receipt of such paper notices or disclosures. To indicate to us that you are changing your mind, you must withdraw your consent using the DocuSign 'Withdraw Consent' form on the signing page of your DocuSign account. This will indicate to us that you have withdrawn your consent to receive required notices and disclosures electronically from us and you will no longer be able to use your DocuSign Express user account to receive required notices and consents electronically from us or to sign electronically documents from us.

All notices and disclosures will be sent to you electronically

Unless you tell us otherwise in accordance with the procedures described herein, we will provide electronically to you through your DocuSign user account all required notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you during the course of our relationship with you. To reduce the chance of you inadvertently not receiving any notice or disclosure, we prefer to provide all of the required notices and disclosures to you by the same method and to the same address that you have given us. Thus, you can receive all the disclosures and notices electronically or in paper format through the paper mail delivery system. If you do not agree with this process, please let us know as described below. Please also see the paragraph immediately above that describes the consequences of your electing not to receive delivery of the notices and disclosures electronically from us.

Acknowledging your access and consent to receive materials electronically
To confirm to us that you can access this information electronically, which will be similar to other electronic notices and disclosures that we will provide to you, please verify that you were able to read this electronic disclosure and that you also were able to print on paper or electronically save this page for your future reference and access or that you were able to e-mail this disclosure and consent to an address where you will be able to print on paper or save it for your future reference and access. Further, if you consent to receiving notices and disclosures exclusively in electronic format on the terms and conditions described above, please let us know by clicking the 'I agree' button below.
By checking the 'I Agree' box, I confirm that:

- I can access and read this Electronic CONSENT TO ELECTRONIC RECEIPT OF ELECTRONIC RECORD AND SIGNATURE DISCLOSURES document; and

- I can print on paper the disclosure or save or send the disclosure to a place where I can print it, for future reference and access; and

- Until or unless I notify DaVita as described above, I consent to receive from exclusively through electronic means all notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to me by DaVita during the course of my relationship with you.

Patients Rights Policy

Printed copies are for reference only. Please refer to the electronic copy for the latest version.

TITLE: ACCEPTING END STAGE RENAL DISEASE PATIENTS FOR TREATMENT

PURPOSE: To establish requirements for admitting End Stage Renal Disease (ESRD) patients to a DaVita dialysis facility and to allow DaVita to obtain necessary information from the patient/personal representative and to enter the correct information into the appropriate information system prior to providing dialysis treatment to a patient at a DaVita dialysis facility.

DEFINITION(S):

Visiting patient: A patient who is visiting a facility and plans to return to his/her home facility within 30 days. A visiting patient refers to patients visiting from a non-DaVita facility to a DaVita facility as well as visiting from a DaVita facility to another DaVita facility.

Medical Evidence Report Form (CMS 2728): Required by Medicare to determine if an individual is medically entitled to Medicare under the ESRD provisions of the law and to register patients with the United States Renal Data System. The 2728 form is used as the primary source in determining the COB for patient's insurance. Physicians have a 45 day grace period to sign the 2728 form when the patients are new to dialysis. A patient is generally only required to complete the 2728 form once, not for every facility visit or transfer (Refer to *Completion of Centers for Medicare & Medicaid Services (CMS) 2728,* available on the Clinical P&P website in Vol. 3. on the VillageWeb).

Medicare Secondary Payor Form (MSP): Determines if a commercial Employer Group Health Plan (EGHP) (or other insurance carrier) will be primary payer. This form is completed online in the Registration System and must be completed for all patients who have Medicare coverage when they start treatment at DaVita.

Patient Authorization and Financial Responsibility Form (PAFR): Document that informs patients of their financial obligations regarding services provided to them by DaVita. The form must be signed and witnessed prior to the start of the first dialysis treatment By signing the PAFR, the patient/personal representative is assigning the payment for services provided by DaVita, directly to DaVita from insurance companies. The PAFR form must be signed each year at each DaVita facility where the patient receives treatments.

Note: California facilities: For all Medi Cal patients (Medicaid program for California), a new form must be signed the first full week in January regardless of dialysis start date. Example: First date of DaVita Dialysis 12-31-2011, need PAFR for December and one for January 2012.

Property of DaVita Inc. Confidential and Copyrighted ⌈2006-2016
Origination Date: September 2006
Revision Date: March 2008, September 2008, December 2008, April 2009, September 2009, October 2010, September 2011, September 2012, March 2013, September 2013, March 2014, September 2014, March 2015, September 2015, March 2016, December 2016

Permanent patient: A patient who has selected a DaVita dialysis facility as his/her home facility.

Personal Representative: An individual who is legally appointed, designated and/or authorized pursuant to state law to: (a) make health care decisions on behalf of a patient, or (b) act on behalf of a deceased individual or a deceased individual's estate. Reference: *Personal Representatives of Patients* (available on the HIPAA website on the VillageWeb).

Transfer patient: An existing dialysis patient who is permanently relocating from any dialysis facility to a DaVita dialysis facility. Once the transfer is complete, the patient will become a "permanent patient."

POLICY:

1. DaVita will accept and dialyze patients with renal failure needing a regular course of dialysis without regard to race, color, national origin, gender, sexual orientation, age, religion, or disability if:

    a. The admitting physician or Medical Director must provide the appropriate diagnosis of Acute Kidney Injury (AKI) or End Stage Renal Disease (ESRD) in the treatment orders prior to a patient's first treatment.

    b. If the Nephrologist determines patient renal status of AKI and decides to admit, follow the policy: *Accepting Patients with Acute Kidney Injury for Treatment.*

    c. If the Nephrologist determines patient renal status of ESRD, follow the policy outlined below for admission.

    d. Final decision on whether or not the candidate patient will be admitted rests with the Medical Director. The Medical Director's determination is based on assessment of the facility's ability to safely dialyze the candidate patient without adversely affecting the quality and safety of all patients.

    e. Should the patient not have an admitting physician, refer to: *Patients without an Admitting Physician* policy (available on the Team Quest website on the VillageWeb).

    f. The patient's care can be managed in an outpatient dialysis facility according to individual modality.

    g. The patient is under the care of a nephrologist who is credentialed in the DaVita facility.

h. There is adequate treatment space, equipment and appropriately trained staff available to provide appropriate care to the patient.

i. The patient (a) has been verified as Medicare or Medicaid eligible and/or has private insurance coverage issued by an Insurance Provider licensed and operating in the United States or United States Territories which has been verified, and from which an authorization for treatment has been received by DaVita as required, (b) accepts financial responsibility for care by signing the *Patient Authorization & Financial Responsibility* (PAFR) Form.

   i. Patients who are uninsured must be authorized at the facility level with written approval by the facility's Divisional Vice President (DVP), or their designee, prior to treatment. (*Cash Payment Fee Schedule for Patients with no Insurance Coverage Policy* (available on the ROPS website on the VillageWeb).

   ii. Patients who have an out-of-state Medicaid plan that will not pay for treatment(s) cannot be requested to pay for these services, either as primary or secondary to Medicare. Admittance to the facility must be authorized at the facility level with written approval by the facility's DVP, or their designee, prior to treatment.

   iii. Patients who are out-of-network and have no out of network benefits must be authorized at the facility level with written approval by the facility's DVP, or their designee, prior to treatment.

2. Patients without adequate medical insurance coverage will be responsible to pay their portion of the cost prior to actual treatment.

3. All visiting patients, including patients visiting a non-contracted facility, will be responsible to sign a new PAFR Form specific to the visiting facility.

4. The facility will obtain height and weight on all visiting patients, including patients visiting a non-contracted facility. This information will be recorded in Snappy on the first treatment in the visiting facility.

5. A Purchase Order for services and treatments outside of their area is required prior to treatment for patients who have Indian Health Services coverage.

6. Any new patient who is uninsured must be approved for treatment by the facility's DVP, or their designee, prior to treatment.

Revision Date: March 2008, September 2008, December 2008, April 2009, September 2009, October 2010, September 2011, September 2012, March 2013, September 2013, March 2014, September 2014, March 2015, September 2015, March 2016, December 2016

7. DaVita dialysis facility will transmit the required information to the corresponding Corporate Business Office (CBO) ROPS registration teammate upon notification of a new or visiting patient.

8. ROPS registration teammate will verify all insurances and obtain authorization if needed to complete the registration process.

9. Visiting patients must make payment for non-covered, and out of network services in the form of cashier's check, money order, travelers check, American Express, Visa, Discover or MasterCard prior to treatment. Please see *Money Received at Centers Policy* and *Credit Card Process Policy* (available on the ROPS website on the VillageWeb).

10. DaVita will bill using the name and number as it appears on the beneficiary Medicare card or other document confirming the patient's health care coverage through a third party, and as the patient's name is confirmed by two (2) additional forms of identification which has the patient's current legal name listed on it. Reference DaVita's *Patient Identification and Verification Policy Attachment A: Acceptable Forms of Personal Identification* (available on the eP&P site Dialysis Regulatory and Ancillary Policies & Procedures folder) for acceptable forms of personal identification. Reference DaVita's *Entering Patient's Name Policy* (available on the ROPS website on the VillageWeb) for guidance on entering patient name into DaVita systems.

11. If any information on the beneficiary Medicare card is incorrect, DaVita will advise the beneficiary to contact their local servicing Social Security Office to obtain a new Medicare card.

12. If information contained on the insurance card is incorrect, DaVita will advise the policyholder to contact their insurance company to obtain a new insurance card. All insurance cards should match the patient's identification. The patient must produce evidence that a change was initiated with the appropriate insurance carrier within 90 days of the noted discrepancy.

13. There are four (4) mandatory data elements for any patient to be registered in Registration System. These fields must be completed accurately prior to treatment. Required Registration System fields are:

    a. First and last name;

    b. DOB (date of birth);

    c. Anticipated start date at DaVita; and

d. An ICD-9/ICD-10 code(s), representing the condition (ESRD) as specified by the admitting physician (may also consult the hospital discharge/pre-discharge summary).

14. Listed below are the following documents that are required for in-center dialysis patients and home dialysis patients prior to first treatment at a DaVita Dialysis facility, unless otherwise required by applicable state regulation:

a. Patient demographics and insurance information;
b. Copy of History and Physical (within the last year – must be legible);
c. Hepatitis and TB Testing Results: For Hepatitis and TB testing requirements, refer to policies: *Hepatitis Surveillance, Vaccination and Infection Control Measures* and *Tuberculosis Infection Control Policy* (available on the eP&P site Incenter Hemodialysis Policies & Procedures, Peritoneal Dialysis and Home Hemodialysis folders); Note: Hepatitis C testing is strongly recommended, but not required;
d. Copy of current hemodialysis orders for treatment;
e. Two (2) forms of personal identification, in addition to the patient's insurance card, verifying the patient's legal name and current legal residence, one of which is a picture ID. Reference DaVita's *Patient Identification and Verification Policy Attachment A: Acceptable Forms of Personal Identification* (available on the eP&P site Regulatory and Ancillary Policies and Procedures folder) for acceptable forms of personal identification;
f. All copies of patient's current insurance cards-front and back;
g. Initiation of CMS 2728. Once completed, within the 45-day guideline, it should include the patient's and nephrologists' signature and date. This is the official document of the patient's first date of dialysis ever, first dialysis modality, and provides transplant information, if applicable; *Patient Authorization & Financial Responsibility Form* (PAFR). Must be signed and witnessed prior to the start of the first dialysis treatment. This form allows DaVita to receive payment from insurance companies and informs the patient of the financial responsibilities regarding treatment provided to them. Without a signed PAFR Form, DaVita may not be reimbursed for services provided to the patient;
h. Medicare Secondary Payor Form (MSP). Determines if a commercial Employer Group Health Plan (EGHP) will be primary payor. Must be completed for all patients who have Medicare coverage when they start treatment at DaVita;
i. DaVita's *Notice of Privacy Practices.* Each patient/personal representative will be provided with the notice.

Facilities may elect to require documents a. through h. listed above prior to admission to a DaVita Dialysis facility.

For patients who have dialyzed before* (permanent transfers or visiting patients) the following will also be required:

a. Copy of most recent Plan of Care including: Nursing, Dietary and Social Work Assessments;
b. Copies of three (3) flowsheets within two (2) weeks of requested treatment(s);
c. Monthly labs within 30 days prior to first treatment date including hematocrit, hemoglobin, URR, electrolytes.
d. Current list of medications being administered to patient in-center and at home (recommended for patient to bring in current medications at time of first treatment);
e. Allergies;
f. Access Information;
g. Hospitalization Discharge information; and
h. Advance Directives, if patient has executed an Advance Directive and confirmed with patient as current.

*For patients displaced by disaster/emergency event, please see policy: *Facility Emergency and Disaster Plan.*

15. The following document is to be requested (but not required) for a safe transition of care for in-center dialysis patients and home dialysis patients prior to admission to a DaVita Dialysis facility:

    a. Consultations (Hematology, GI, Cardiology).

16. Unless otherwise provided for under this policy, prior to the first treatment at the facility, all patients, including Transfer, Guest, and Permanent Patients will be given the following documents to read and sign:

    a. Patient Rights;

    b. Patient Responsibilities;

    c. Patient Authorization and Financial Responsibility Form (PAFR);

    d. Patient Standards of Conduct;

    e. Patient Grievance Procedure;

    f. Authorization for and Verification of Consent to Hemodialysis/Peritoneal Dialysis;

    g. HIPAA Permission to Discuss;

h. HIPAA Notice Acknowledgement form; and

i. Affidavit of Patient Identification form (Note: This form is only given if the patient or Personal Representative on behalf of the patient is not able to produce the requested two (2) forms of personal identification verifying the patient's legal name and current legal residence upon admission or within seven (7) days of admission).

17. The patient/personal representative will agree to follow the *Patient's Rights and Responsibilities, Patient's Standards of Conduct and the Patient Grievance Procedure.* (Refer to *Patient's Standards of Conduct; Patient Grievance Procedure; Patient Rights and Responsibilities* available on the eP&P site Dialysis Regulatory and Ancillary Policies & Procedures folder).

18. Visiting patients are only required to sign the *Patient's Rights and Responsibilities, Patient's Standards of Conduct and the Patient Grievance Procedure* one time for each DaVita facility they visit, as long as these forms are visibly posted at the facility, unless there are changes made to any of those forms/policies, or state specifications require otherwise.

19. If the patient, or Personal Representative on behalf of the patient, is not able to produce the requested two (2) forms of personal identification verifying the patient's legal name and current legal residence, the teammate admitting the patient should follow the procedures set forth in the *Patient Identification and Verification Policy* (available on the eP&P site Dialysis Regulatory and Ancillary Policies & Procedures folders), and any other relevant policies based on the situation at hand.

20. Any conflict with the criteria established or refusal to sign appropriate consents and authorization to bill would constitute a need for prior written authorization by the facility's DVP or designee.

21. Other than a PAFR which is always required, a permanent DaVita patient may be treated at a DaVita facility other than his /her home facility without completing the required documentation,when:

a. The attending nephrologist has privileges at both the facilities in question (the patient's home facility and the anticipated visiting facility);

b. A visiting record is generated by the home facility at least one hour before the scheduled treatment;

c. The Facility Administrator (FA) at the visiting facility agrees to treat the patient; and

d. The visiting facility has the space and resources to treat the patient.

22. All other exceptions to this policy are subject to approval by the DVP for the region/division.

23. Clinical documentation: add all to ESRD

    a. Use ICD-9/ICD-10 code(s) as specified by admitting physician for justification in the dialysis treatment order

24. Use ICD-9/ICD-10 code(s) as specified by admitting physician for justification in all medication and laboratory orders

ATTACHMENTS:

Attachment A: Procedures for Accepting Patients for Treatment

Teammates are expected to report possible violations of this policy and procedure. You may make your report to an appropriate DaVita manager, to the Corporate Compliance Hotline (1-888-458-5848 or DaVitaComplianceHotline.com.) DaVita has a Non-Retaliation policy and will not tolerate any form of retaliation against anyone who files a Compliance report in good faith. Reports can be made anonymously or you may request confidentiality. Questions regarding this policy should be directed to policies&procedures@davita.com.

Printed copies are for reference only. Please refer to the electronic copy for the latest version.

TITLE: PATIENT BEHAVIOR AGREEMENTS, 30 DAY DISCHARGE, INVOLUNTARY DISCHARGE OR INVOLUNTARY TRANSFER

PURPOSE: To provide guidance on Patient Behavior Agreements, 30 Day Discharge, Involuntary Discharge or Involuntary Transfer. These may become necessary when a patient does not conform to the *Patient's Standards of Conduct* and/or *Patient's Rights, Responsibilities and Facility Rules.* When a facility is considering involuntary discharge, the patient is automatically designated as "unstable" and therefore requires an assessment. The Interdisciplinary Team (IDT) must assess the patient with an intent to identify any potential action or plan that could prevent the need to discharge or transfer the patient involuntarily.

POLICY:

Disruptive, Non-Threatening Behavior:

1. If the patient's behavior is disruptive to the facility, but is non-threatening, a comprehensive patient assessment will be completed by the Interdisciplinary Team (IDT) in order to identify any potential action or plan of correction required. The assessment must focus on identifying the root causes of the disruptive behavior and result in a plan of care aimed at addressing those causes and resolving disruptive behavior. This assessment may require a change in health status to unstable.

2. At the completion of the assessment, a Patient Care Conference (PCC) is required. The IDT should meet with the patient in a conference setting. The PCC will specifically address patient behavior and any patient concerns. The PCC and assessment will be documented in the medical record.

3. If the patient's behavior continues to be disruptive to the facility, but is non-threatening to others, the patient should receive a First Letter of Concern. This letter will be written in collaboration with your Risk Manager and will provide specific details of the patient's behavior and concerns the facility has regarding the patient's behavior.

Threatening Behavior/Behavior Agreements:

4. If at any time teammates or other patients feel an immediate severe threat or safety is a concern, the police should be notified immediately via 911. (See **Immediate Severe Threat** below).

5. If a patient's behavior in the dialysis facility is threatening, either verbally or physically, the treatment that day will be terminated and the patient will be asked to leave the facility. The facility will immediately notify the Medical Director, the patient's physician, the Regional Operations Director (ROD), the ESRD Network and the Risk Manager.

6. In collaboration with the ESRD Network, the facility and Risk Manager will make a determination of whether the patient should be immediately discharged from the facility due to the nature of the threatening behavior or placed on a Behavior Agreement. The collaboration with the ESRD Network will be documented in the medical record.

7. If it is determined that a Behavior Agreement is appropriate, the Behavior Agreement will be drafted in collaboration with the Risk Manager and address the behavior exhibited. The Medical Director, patient's physician, ROD, Divisional Vice President (DVP) and ESRD Network will be notified. A PCC will be scheduled with the patient and IDT to discuss the Behavior Agreement. The Behavior Agreement will also be mailed to patient via certified mail, return receipt requested.

8. Behavior Agreements will not be used for non-adherence or for patients who choose to sign off Against Medical Advice (AMA).

30 Day Discharge, Involuntary Transfer and Involuntary Discharge:

9. Lost to Follow-Up is defined as a patient who has not dialyzed for 30 days at the facility and the dialysis facility is unable to located the patient. In the event that a patient is considered Lost to Follow-Up and at risk for involuntary discharge, dialysis facilities are to notify their ESRD Network. Notify the Risk Manager for further guidance.

10. If the patient acts in violation of the Behavior Agreement, your Risk Manager is to be notified for further direction. The facility and Risk Manager will consult with the ESRD Network regarding 30 day discharge or involuntary discharge or transfer to another facility.

11. The patient's physician and facility Medical Director must be notified of the pending involuntary transfer or discharge and provide a signed order. This notification and order will be documented in the patient's medical record.

12. The ROD, DVP, State agency and ESRD Network must be notified of the involuntary discharge. If a 30 day notice is given, the effective date is the day the notice is written. This notification will be documented in the medical record.

13. The patient has the right to choose and to change physician and/or treatment facility provided that the new physician and/or facility can reasonably accommodate the patient. The patient is advised to confirm that the facility under consideration has been certified by Medicare.

14. Social Worker/designee will provide the patient with a list of area dialysis facilities (DaVita and non DaVita) that may be able to accept the patient, and the patient will be allowed to provide input as to facility preference. The patient will be advised to consult with his or her treating physician about alternative treatment options and to confirm the physician has privileges at selected dialysis facilities.

15. Good faith efforts should be made to place the patient at the patient's preferred facility and/or find the closest facility to the patient's residence that will accept the patient in transfer. The patient will be informed that DaVita cannot guarantee the transfer to the identified facility. The applicable patient's medical record must include evidence of those placement efforts.

16. The goal of contacting another dialysis facility is for continuity of care and the HIPAA privacy rules do not require patient consent to contact another dialysis facility. The HIPAA privacy rule does limit sharing of protected health information to medical records requested by the other provider and prohibits sharing information obtained through hearsay.

Immediate Severe Threat:

17. If it is determined that a patient will be immediately discharged due to the nature of the threatening behavior ("immediate, severe threat"), 30 day patient notice is not required. An immediate severe threat is considered to be a threat of physical harm. For example, if a patient has a gun or a knife or is making credible threats of physical harm, this would be considered an "immediate severe threat". An angry verbal outburst or verbal abuse is not considered to be an immediate severe threat.

18. In instances of an immediate severe threat, facility teammates may utilize "abbreviated" involuntary discharge or transfer procedures. These abbreviated procedures may include taking immediate protective action such as calling "911" and asking for police assistance. In this scenario, there may not be time or opportunity for re-assessment, intervention, or contact with another facility for possible transfer.

19. After the emergency is addressed and teammates and other patients are safe, teammates must notify the Medical Director, patient's physician, Risk Manager, ROD and DVP, State agency and ESRD Network of the involuntary discharge. Document this notification and the exact nature of the "immediate severe threat" in the patient's medical

record. The Risk Manager may recommend onsite security for a period of time after the discharge of the patient (mutually agreed upon by Operations and Risk Manager).

Discharge for Lack of Physician Coverage:

20. If the reason for discharge is the physician's determination to no longer care for a particular patient and there is no other physician available that is willing to accept the patient, generally the state practice boards for physicians require the patient be given some notice to avoid a charge of patient abandonment. The facility will need to follow this regulation as to reassessment, 30 day notice of discharge, attempts for placement, etc. during the physician's period of notice to the patient. The Facility Administrator/designee should follow state law requirements regarding notice.

TITLE: **Patient Financial Evaluation Policy**

PURPOSE:
To establish policies and procedures for the individualized determination of patient financial need for services provided by DaVita.

DEFINITIONS:
Obligation – The amount a patient must pay for dialysis and related services after all other third party payers (Medicare, Medicaid, commercial insurers, etc.) have paid DaVita, including copayments, coinsurance, deductibles, noncovered services and self-pay amounts.

PFE – Patient Financial Evaluation form (Addendum A) utilized to determine a patient's individual financial status and ability to pay the patient's Obligation.

Patient Assistance – The amount by which the patient's Obligation is reduced as a result of the PFE. Patient Assistance may be a full or partial reduction of the patient's Obligation.

Patient Assistance Scale – Sliding scale based on the Federal Poverty Guidelines used to determine the level of Patient Assistance for which the patient is eligible. (Addendum B)

Household Size – All persons residing in the same household as determined by this Policy.

Household Income – income of all persons identified in Household Size. Visitor – A patient who is at the facility for less than 30 consecutive days.

POLICY:
DaVita may provide Patient Assistance related to Patient Obligations based on an individualized determination of a patient's financial need. Any approval for Patient Assistance will be based on current facts and the agreement of the patient to maintain current coverage. Any amounts paid by an insurance company directly to the patient for services furnished by DaVita must be paid to DaVita and are not included in the patient Obligation amounts eligible for Patient Assistance.

Patients with previously approved PFEs will continue to receive Patient Assistance under the prior agreement until the first of any of the following events occurs:

Property of DaVita Inc. Confidential and Copyrighted ⌈2006

TITLE: **Patient Financial Evaluation Policy**

- Current PFE expires
- Insurance coverage changes
- Patient notifies DaVita of a change in household size or income and requests an updated PFE

PROCEDURE:

A Patient Financial Evaluation (Addendum A) may be offered for patients who have a patient Obligation and have indicated some financial need to a DaVita Teammate. If the patient refuses and/or declines offer of a PFE, the Social Worker must inform the patient that he/she is responsible for the full amount of the patient Obligation.

For patients within the state of Rhode Island, if a Community Health Center, listed on Attachment C, refers a patient and notifies the center that the patient has NO insurance and a household income up to the 200% of the Federal Poverty Limits (Full Waiver level on the PFE Scale), the center will require no further documentation from that patient and the patient will qualify for a full waiver PFE.

The PFE applies equally to all patients, without regard to the source of payment. Prior to applying for Patient Assistance, the patient must make a good faith effort to obtain insurance and exhaust all coverage options that will improve the patient's insurance coverage. All patients must have a current signed PAFR on file in order to apply for a PFE; California patients must have a PAFR signed within the current calendar year.

Patient Assistance is based on household financial status and the ability to pay after all other options for third party coverage and payment has been exhausted. The Social Worker (SW) or center designee is required to document these efforts to obtain any and all third party coverage in the patient's account record.

All patients must apply for Medicaid programs and any other available state financial assistance programs prior to applying for a PFE and provide copy of denial/approval with PFE application. If an uninsured patient is not able to apply for Medicaid, the Social Worker must document the reason. Note that patients with Medicare coverage MUST seek apply for Medicaid.

This policy is not available to patients who have had lapses in insurance coverage that the patient could control or other forms of patient non-compliance with obtaining or maintaining insurance coverage, including but not limited to; the failure to pay premiums or provide documentation necessary. If a patient is being discharged from a hospital, the patient must first attempt to secure a Single Patient Agreement (SPA) prior to utilizing the PFE Policy. Should the patient fail or refuse to provide the required PFE documentation, the patient will be discharged according to the procedures outlined in the Non-Payment Discharge Policy.

TITLE: **Patient Financial Evaluation Policy**

This policy is not applicable when superseded by state law. Patients who have a Cash Pay Agreement with the center do not qualify. DaVita reserves the right to deny or revoke patient assistance at its full discretion.

An existing PFE applies to all DaVita centers, even when the patient is a Visitor. PFEs cannot be used for visiting charges only.

With regard to any state law regarding patient "share of cost" or spend-down obligations for Medicaid, the patient shall be considered to have (1) incurred expenses for medical services and (2) assumed legal responsibility for medical services expenses, as of the date that medical services having a cost or charge equal to or greater than the amount of the patient's share of cost or spend- down obligations actually were rendered to the patient. This is the date the patient Obligation is created, notwithstanding any later application of Patient Assistance to the patient Obligation amount.

The patient is required to provide proof of Household Size and Personal Income to determine eligibility for Patient Assistance to the Social Worker or designee.

Household Size - at least one of the following documents showing proof of the household size:

- Federal Tax Return – No later than previous tax year and signed.
- State Assistance Program letters which name household members.
  - Social Security Letters which name all parties in one letter.

If the patient is unable to produce the above documents and is not otherwise covered by a government health plan, the following documents may be used to support household size:

- School records that identify an address for the children stated as part of the household that matches a lease agreement or address on a utility bill in the name of the patient
- Copy of an official marriage license
- Copy of Official birth certificate
- Court records for legal guardianship
- Adoption records
- Proof of domestic partnership

*If we do not have evidence that the patient's household size is different, we will default to one person.

Confidential and Copyrighted ⌈2006

TITLE: **Patient Financial Evaluation Policy**

Income – The patient ***must*** provide at least one (1) of the following documents listed in Column A showing proof of income. If the patient is not able to provide any of the documentation listed in Column A, patient ***may*** provide at least two (2) of the documents listed in Column B, ***or*** at least three (3) of the documents listed in Column C.

*Please note, if patient is currently a financial need patient of DaVita Healthcare Partners Inc., the patient must provide an item of documentation from Column A. Additionally, any patient that is eligible for a government health plan (e.g., Medicare, Medicaid) must submit documentation from Column A.

If patient is not able to provide the **required** income verification documentation listed in Columns A, B and C, patient must provide a signed document explaining his/her situation that prevents the patient from furnishing the required documentation.. If the patient is able to provide the required income verification documentation listed in Columns A, B and C but refuses to do so, the patient is not eligible for Patient Assistance under this Policy.

OR

If patient is not able to provide the **required** income verification documentation listed in Columns A, B and C, patient may complete a W-7 Form to file for an IRS Individual Taxpayer Identification Number (ITIN). Once the patient has received an ITIN, the patient may either file a federal income tax return and submit a copy as stated in Column A or sign an affidavit explaining why the patient is not required to file a federal income tax return.

(The remainder of this page is intentionally left blank)

Confidential and Copyrighted ⌈2006

TITLE: **Patient Financial Evaluation Policy**

Income Verification

Column A	Column B	Column C
✓ Federal Income Tax Return from no later than the previous year ✓ W2-form or 1099 from no later than the previous year ✓ Social Security Statement of Earnings (cannot be older than the previous tax year) ✓ One (1) consecutive month of paycheck stubs (within 60 days of PFE application) ✓ Retirement Income (Annuity, Pension, Dividends Paid Out, Veteran's Benefits) ✓ Copy of Medicaid Application (including Emergency Medicaid) along with Approval/Denial Letter	✓ Credit Check Report ✓ Document of Assets ✓ Bank Statements (last 3 months) ✓ Worker's Compensation income statements ✓ Unemployment Compensation Determination Letter ✓ Statement from Employer of employment and salary ✓ Documentation of Homeless Shelter Use	✓ *Living Expenses (i.e. rent, utility bills, cell phone carrier bill, grocery receipts, etc) along with copies of checks paid or money order receipts paying such expenses ✓ Food Stamp Benefit Information ✓ Proof of Participation in other Government Assistance Programs ✓ Court Documentation of Bankrupt Condition ✓ Proof of Residence in Area of High Poverty ✓ Proof that family is eligible for free or reduced-fare school lunch ✓ Children's School Records ✓ Strike Benefits from Union Funds ✓ Alimony ✓ Child Support ✓ PFE from another institution ✓ Other Documents of Sources of Income *Living Expenses shall not be used to offset income or determine actual expenses; rather, Living Expenses shall be used as a proxy for income that cannot otherwise be proved.

Any change in family size or insurance coverage will require a new application to be submitted. A change in insurance coverage will cause any current PFE to terminate.

The patient must sign the PFE stating that all information provided is accurate. A PFE lacking proof of income and/or family size will be denied.

Confidential and Copyrighted ⌈2006

TITLE: **Patient Financial Evaluation Policy**

Determination for awarding Patient assistance will be based on the attached Patient Assistance Scale (Addendum B).

1. Household income and household size of patient compared to a % of the federal poverty guidelines per the Patient Assistance Scale (Addendum B).
2. If the patient qualifies for 100% assistance, deeming him/her indigent, the patient will not be billed for any patient Obligations.
3. If the patient qualifies for partial Patient Assistance, he/she will be billed for the lesser of the remaining patient Obligation for the month of services or the Patient Assistance rate.
4. If the patient does not qualify for Patient Assistance, he/she will be billed for the remaining patient Obligation for the month of services.

The status of the PFE and the level of Patient Assistance which has been approved will be communicated to the patient, Social Worker and IMT.

The PFE and related documentation will be maintained in the patient's account record. The billing office designee will enter the PFE approval or denial into the patient record and patient bills will be calculated based on this information.

An approved PFE is valid for one year from the month of the submission and can retro up to twelve months, if necessary. Any payments made by the patient for Patient Obligations that are within the approval range of the PFE will not be refunded. The PFE is reviewed on an annual basis.

This policy applies equally to all patient types, including patients who are DaVita Teammates.

Teammates are expected to report possible violations of this policy and procedure. You may make your report to an appropriate DaVita manager, to the Corporate Compliance Hotline (1-888-458-5848 or DaVitaComplianceHotline.com). DaVita has a Non-Retaliation policy and will not tolerate any form of retaliation against anyone who files a Compliance report in good faith. Reports can be made anonymously or you may request confidentiality.

Printed copies are for reference only. Please refer to the electronic copy for the latest version.

TITLE: PATIENT'S RIGHTS

YOUR RIGHTS AS A PATIENT:

As a DaVita patient I understand I am entitled to the following:

1. To be fully informed of my rights (including privacy rights), responsibilities and all rules governing conduct related to patient care, services and financial policies/responsibilities.
2. To be accepted for admission without regard to national origin or sponsor, race, age, sex, religion, disability, payer, sexual orientation, marital status, or other factors unrelated to the provision of appropriate medical care.
3. To be treated with (i) respect, dignity, and recognition of my individuality, choices, strengths, abilities, cultural values, religious beliefs and personal needs, to the extent possible during treatment;, and (ii) sensitivity to my psychological needs and ability to cope with ESRD.
4. The right to privacy and confidentiality in all aspects of treatment. The dialysis facility will make accommodations to provide for patient privacy when patients are examined or body exposure is required, for example privacy screens or curtains.
5. To be free from abuse, neglect, exploitation, coercion, manipulation, sexual abuse, sexual assault, seclusion, or restraint (if not necessary to prevent harm to myself or others), or misappropriation of my personal property by the facility's teammates.
6. To receive adequate, safe, sanitary, and efficient dialysis treatment and respectful care by competent personnel in a comfortable environment.
7. To receive all information in a way that I can understand.
8. To receive assistance from a family member, representative or other individual in understanding, protecting and/or exercising my rights.
9. To be fully informed of all services available in the facility and charges not covered under Medicare or other health insurance, as applicable.
10. Upon request, to receive any information which the facility has available relative to financial assistance and free health care.
11. To be fully informed of my right to execute an advance directive and of DaVita's policy that properly executed and documented advance directives will be honored and carried out in DaVita facilities.
12. The right to choose and to change physician and/or treatment facility provided that the new physician and/or facility can reasonably accommodate me. I am advised to confirm that the facility under consideration has been certified by Medicare.
13. To know who my primary physician is, and to participate with my primary physician in planning my care.
14. To know the names, professional status, and experience of the staff who are providing and coordinating my care and treatment.
15. Upon request, to obtain an explanation as to the relationship, if any, of the facility to any other health care facility or educational institutions insofar as that relationship relates to my care or treatment.

16. To receive a full explanation by my physician/allied health professional of the nature of my medical status and the necessity for recommended treatment/appointment(s), including the risks, side effects, expected outcomes, and other treatment/appointment options before giving consent to or refusing treatment/appointment.

17. To expect and receive appropriate assessment, management and treatment of pain as an integral component of my care.

18. To receive a full explanation of facility policies regarding patient care including, but not limited to, certain policies about infectious diseases that may require me to be dialyzed in a separate space from other patients and policies about visitors and socialization within the facility.

19. To be fully informed about all treatment modalities, including but not limited to, transplantation, home dialysis (home hemodialysis, intermittent peritoneal dialysis, continuous ambulatory peritoneal dialysis, continuous cycling peritoneal dialysis), in-facility hemodialysis, in-facility nocturnal hemodialysis, hospice, and the option of no treatment.

20. To receive resource information for dialysis modalities not offered by the facility, including information about alternative scheduling options for working patients.

21. To be advised of research studies that affect my care and give my informed, written consent to participate in such research or refuse to participate.

22. To be informed about whether the facility is participating in any teaching programs and to refuse to allow their participation in my treatment.

23. To be transferred or discharged only for medical reasons, for my own welfare or that of other patients, or for nonpayment of fees. If I am discharged for these reasons, I will be given advance written notice of 30 days unless the reason involves issues of immediate safety to other patients or teammates. These actions may result in an immediate discharge. Reasons for involuntary discharge may include failure to comply with items in the *Patient's Standards of Conduct, Responsibilities and Facility Rules*, which are provided in the Patient Registration Packet.

24. To review my medical record with supervision by the Facility Administrator or designee and at a time mutually agreed upon by me and the Facility Administrator or designee in advance.

25. To receive a copy of my medical records. All requests for medical records will be put in writing. Based on individual state requirements for accessing medical records, there may be a fee charged for copying the medical records. All records requests will be completed within 30 days of the request.

26. To receive necessary services or referrals as outlined in my individualized plan of care.

27. To know my medical records and the information contained will be considered private and confidential and only released in compliance with state and federal law.

28. To freely express comments, complaints or grievances verbally or in writing personally, anonymously, or through a representative of my choosing. My comments, complaints and grievances may be expressed to facility teammates, administration, DaVita's Corporate Compliance Department, the ESRD Network organization and appropriate regulatory agencies without fear of reprisal or denial of services, discrimination or retaliation. All comments, complaints and grievances will be resolved in a timely manner in accordance with the facility's grievance process. Information regarding the grievance process will be provided to me and the facility Social Worker will assist you if needed.

29. To have all reasonable requests responded to promptly and adequately within the capacity of the facility.

Confidential and Copyrighted ©2008-2016

30. To be informed about and participate, if desired, in all aspects of my individualized plan of care and be informed of the right to refuse treatment and to be fully informed of the medical consequences of refusing treatment/appointment.

31. If I require hemodialysis and dialyzer reuse is practiced in the facility, I am entitled to the following:

    - To give or refuse permission to participate in the reuse program and to request to change from one to the other at any time either verbally or in writing. Refusal to participate in reuse will still allow me to dialyze in this facility and receive other services, however, failure to agree to reuse will minimally restrict your choice of a dialyzer.
    - To have questions about reuse answered in a complete and understandable way.

Please note, this version of the document is not intended for distribution to patients. The companion version of this document that is intended for distribution to patients (which is identical to this form, but includes a patient signature block) can be found electronically in the Reggie system.

Premises Address:	1250 State Avenue, Marysville, WA 98270
Premises Rentable Area:	approximately 6,375 square feet
Shopping Center Rentable Area:	approximately 115,956 square feet
Monthly Base Rent:	$7,968.75
Lessee's Proportionate Share:	5.5%

The foregoing Summary of Lease Information is incorporated into and made a part of the Lease. If any conflict exists between the Summary of Lease information and the Lease, then the Lease shall control.

THIS LEASE AGREEMENT (the "Lease") is made and entered as of May 30, 2012, by and between **INLAND WESTERN MARYSVILLE, L.L.C.** (hereinafter called "Lessor"), and **REFUGE DIALYSIS, LLC** (hereinafter called the "Lessee").

W I T N E S S E T H:

WHEREAS, Lessor desires to demise, lease and rent unto Lessee, and Lessee desires to rent and lease from Lessor space located at 1220 to 1262 State Avenue, Marysville, WA, 98270, as more particularly described and shown on Exhibit A (the "Shopping Center"), together with all improvements thereon and appurtenant rights thereto including, without limitation, parking areas, easements, declarations and rights of way; and

WHEREAS, the Shopping Center contains approximately One Hundred Fifteen Thousand Nine Hundred Fifty-Six (115,956) rentable square feet (the "Shopping Center Rentable Area") and the leased premises (the "Premises") shall consist of approximately Six Thousand Three Hundred Seventy-Five (6,375) rentable square feet (the "Premises Rentable Area") as shown on the site plan attached hereto as Exhibit A and more fully depicted on the floor plan attached hereto as Exhibit B.

NOW, THEREFORE, for and in consideration of the mutual covenants, promises and agreements herein contained, Lessor does hereby demise, lease and rent unto the Lessee and Lessee does hereby rent and lease from Lessor the Premises, under and pursuant to the following terms and conditions:

1. Term. This Lease shall be effective upon full execution by all parties hereto (the "Effective Date"). Lessee shall accept possession of the Premises in its as-is condition upon Lessor's tendering possession thereof to Lessee. Lessor shall deliver possession of the Premises to Lessee on December 1, 2012 (said date, or any other date agreed to in writing by the parties the "Possession Date").

The term of the Lease shall be for one hundred twenty (120) months ("Term") and shall commence on that date that is the earlier of (a) the date Lessee opens for business in the Premises or (b) December 1, 2013 (said earlier date the "Commencement Date"). The expiration date of the Term of the Lease shall be one hundred twenty (120) months following said Commencement Date (as the same may be extended the "Termination Date"), unless renewed as hereinafter provided. Each twelve (12) month period beginning on the Commencement Date or any anniversary thereof shall hereinafter be called a "Lease Year." Upon determination of the Possession Date and Commencement Date, Lessor shall execute and forward a memorandum in the form attached hereto as Exhibit C to Lessee for Lessee's approval and execution and Lessee shall execute and return said memorandum to Lessor within fifteen (15) business days of receipt of the same. Except for Lessee's obligations with respect to Rent, additional rent, and except as otherwise specifically provided in the Lease, the terms and conditions of this Lease shall apply on the Effective Date.

At the termination of this Lease by lapse of time or otherwise, or upon termination of Lessee's right of possession without termination of this Lease, Lessee shall surrender possession of the Premises to Lessor and deliver all keys to the Premises to Lessor and make known to Lessor the combination of all locks of vaults then remaining in the Premises, and, subject to the following paragraph, shall return the Premises and all equipment and fixtures of Lessor therein to Lessor in good condition, reasonable wear and tear, casualty and condemnation excepted.

Notwithstanding anything contained herein to the contrary, the parties hereto acknowledge and confirm that this Lease and the commencement and enforceability of all its terms and conditions is contingent upon the Lessor obtaining possession of the Premises from the existing tenant. Lessor hereby covenants to exercise good faith efforts to meet this contingency and deliver possession of the Premises in a timely manner. Upon notice by Lessor to Lessee that this contingency cannot be satisfied, this Lease shall automatically terminate and any Rent and additional rent paid in advance by Lessee shall be promptly returned to Lessee, and the parties shall thereupon have no further liability or obligations to the other under this Lease or otherwise with respect to the Premises. Notwithstanding the foregoing, but subject to any Force Majeure Event, Lessee shall have the option to terminate this Lease, by delivery of written notice to Lessor prior to the actual occurrence of the Possession Date, in the event the Possession Date does not occur on December 1, 2012.

2. Rent. Beginning on the Commencement Date, Lessee agrees to pay an initial annual base rent ("Rent") of Ninety-Five Thousand Six Hundred Twenty-Five and 00/100 Dollars ($95,625.00), based on a Fifteen and 00/100 Dollar ($15.00) per rentable square foot amount. Accordingly, beginning on the Commencement Date, Lessee shall pay Rent in the amount of $7,968.75 per month in advance on the first day of each calendar month during the Term, such monthly installment to be prorated for any partial calendar month in which the Commencement Date or Termination Date shall occur. The Rent shall be adjusted in accordance with the provisions of Section 3 and in accordance with the Rent Schedule set forth on Exhibit K attached hereto. All amounts (unless otherwise provided herein) other than the Rent and the adjustments thereto described in Section 3 hereof owed by Lessee to Lessor hereunder shall be deemed additional rent. In the event any portion of Rent or additional rent is not paid by Lessee within ten (10) days after notice from Lessor that said payment is past due, then immediately and without further notice to Lessee such sums shall accrue interest at the rate of (i) five percent (5%) per annum over the prime rate of interest announced from time to time by U.S. Bank National Association, or its corporate successor or (ii) the maximum rate allowed by law, whichever is less (said rate referred to herein as the "Interest Rate"). Notwithstanding the foregoing, Lessor shall not impose such Interest Rate as to the first late payment in any given Lease Year, unless Lessee fails to pay the late payment to Lessor within ten (10) days after delivery of written notice from Lessor to Lessee as set forth in Section 15.1. Prior to the Commencement Date, Lessor shall complete and deliver to Lessee a Form W-9 - Request for Taxpayer Identification and Certification in the form attached hereto as Exhibit D.

Notwithstanding the foregoing, in the event Lessee has not provided Lessor with the Notice to Proceed (as defined in Section 36) by the Possession Date (December 1, 2012), and Lessee has not terminated the Lease pursuant to Section 46 of this Lease, commencing on the

Possession Date, Lessee agrees to pay Lessor a monthly holding fee ("Holding Fee") in the amount equal to one-half (1/2) of initial Rent per month ($3,984.38) and Lessee's Proportionate Share of Operating Expenses (as defined in Section 8) ($2,204.69) until the earlier of (i) the date that Lessee provides Lessor with the Notice to Proceed; (ii) the date that is the last day of the twelfth (12th) month following the Possession Date; or (iii) the date Lessee terminates this Lease pursuant to Section 46 of this Lease. Lessee shall commence full payment of Rent and Lessee's Proportionate Share of Operating Expenses upon the occurrence of items (i) or (ii) above. In the event Lessee has not provided Lessor with the Notice to Proceed by the date that is the first day of the thirteenth (13th) month following the Possession Date and Lessee has not terminated the Lease pursuant to Section 46 of this Lease, Lessee agrees to pay Lessor, as a Holding Fee, an amount equal to the monthly Rent then due and payable for the applicable Lease Year (as set forth in Exhibit K) and Lessee's Proportionate Share of Operating Expenses for said Lease Year (as defined in Section 8) until the earlier of (i) the date that Lessee provides Lessor with the Notice to Proceed; or (ii) the date Lessee terminates this Lease pursuant to Section 46 of this Lease. Lessee shall commence full payment of Rent and Lessee's Proportionate Share of Operating Expenses upon the occurrence of item (i) above. In the event Lessee has not terminated this Lease as aforesaid and as provided in Section 46, then commencing on the first day of the thirty-seventh (37th) month of the Term, Lessee shall pay to Lessor the full Rent then due and payable (as identified on Exhibit K).

Actual square footage for the Premises will be determined with all measurements computed from the outside face of the outside walls to the middle of any interior walls which are adjacent to another premises in the Shopping Center. Lessee may elect to have the space measured within thirty (30) days following the Possession Date. If the square footage is found to be greater or less than three percent (3%) of the square footage shown in this Lease, Rent and other provisions of this Lease which are based on rentable area shall be adjusted accordingly.

Except as otherwise provided in this Lease, it is the intention of the parties that Lessor shall receive the rents, additional rents, and all sums payable by Lessee under this Lease free of all taxes, expenses, charges, damages and deductions of any nature whatsoever (except as otherwise provided hereinafter) and Lessee covenants and agrees to pay all sums (including rent taxes) from and after the Commencement Date which except for this Lease would have been chargeable against the Premises and payable by Lessor. Lessee shall, however, be under no obligation to pay principal or interest on any mortgage on the fee of the Premises, penalties or interest for late or partial payment nor any income, franchise, margin, inheritance, estate, transfer, excise, gift or capital gain taxes, that are or may be payable by Lessor or that may be imposed against Lessor or against the rents payable hereunder, or succession tax by reason of any present, future or retroactive law which may be enacted during the Term of this Lease.

3. Rent Adjustments. Beginning on the 1st anniversary of the Commencement Date and continuing on every subsequent anniversary of the Commencement Date, the Rent shall be increased by three percent (3%) per rentable square foot over the Rent for the prior Lease Year as depicted on Exhibit K attached hereto.

4. Renewals. Lessee shall have the right and option to renew this Lease for two (2) additional periods of five (5) years each, next immediately ensuing after the expiration of the

initial Term of this Lease and the subsequent renewal periods by notifying Lessor in writing not more than twenty-four (24) months and not less than six (6) months before the expiration of the immediately preceding initial Term or subsequent renewal Term of this Lease of Lessee's intention to exercise its option to renew. In the event Lessee fails to provide a renewal notice before such six (6) month period, said option to renew shall be null and void. In the event that Lessee so elects to extend this Lease, then, for such extended period of the Term, all of the terms, covenants and conditions of this Lease shall continue to be, and shall be, in full force and effect during such extended period of the Term hereof, except for the Rent, which shall be at Fair Market Rent (as defined herein). Fair Market Rent for a Renewal Term shall mean the rental and escalations that Lessor could obtain from a third party desiring to lease the Premises (after taking into consideration 100% of the rental inducements then given to new tenants in comparable buildings in the Marysville, Washington area) and shall be determined by Lessor, within thirty (30) days of Lessee's receipt of its election to extend the Term, in relation to comparable (in quality, location and size) space located in the Shopping Center market ("Fair Market Rent"). If Lessee disputes Lessor's determination of Fair Market Rent, Lessee will deliver notice of such dispute together with Lessee's proposed Fair Market Rent to Lessor within fifteen (15) days of Lessee's receipt of Lessor's determination of Fair Market Rent. If the Lessee disputes the Fair Market Rent submitted by Lessor the parties will attempt, in good faith, to agree upon the Fair Market Rent. If the parties fail to agree within 30 days, the parties shall appoint two (2) appraisers, one selected by Lessee and one selected by Lessor within thirty (30) days of such date. If either party fails to appoint an appraiser within such thirty (30) day period, the appraiser appointed by such other party shall make the Fair Market Rent determination. The appraisers shall issue their reports within ten (10) days. If the higher of the two (2) appraisals is less than or equal to one hundred ten percent (110%) of the lower, Fair Market Rent shall be the average of the two; if not, the two (2) appraisers shall then mutually select the third (3rd) appraiser within ten (10) days. The third (3rd) appraiser so selected shall determine which of the two (2) appraisers' determination is closer to Fair Market Rent within ten (10) days and the appraisal closer to the third (3rd) appraiser's determination of Fair Market Rent shall be deemed to be the Fair Market Rent. Lessor shall pay the cost of the appraisal by the appraiser selected by Lessor. Lessee shall pay the cost of the appraisal by the appraiser selected by Lessee. Lessor and Lessee shall equally bear the cost of the third appraisal.

5. Condition of Premises. Lessor shall deliver the Premises in its "AS IS, WHERE IS" condition. Notwithstanding the foregoing, Lessor, at Lessor's sole cost and expense, shall be responsible for the repair of any and all latent and/or patent structural defects in the Premises and Building throughout the Term and any renewal periods.

6. Use of Premises. Lessee may exclusively occupy and use the Premises during the Term for purposes of the operation of an outpatient renal dialysis clinic, renal dialysis home training, aphaeresis services and similar blood separation and cell collection procedures, general medical offices, clinical laboratory, including all incidental, related, and necessary elements and functions of other recognized dialysis disciplines which may be necessary or desirable to render a complete program of treatment to patients of Lessee (the "Permitted Use"), and for no other purpose without Lessor's written consent. Without limiting the foregoing, Lessee's use of the Premises shall be subject to the following: (i) the Prohibited Uses as set forth in Exhibit I; (ii) the Shopping Center Exclusive Uses as set forth in Exhibit H; and (iii) the Shopping Center specific

Prohibited Uses as set forth in Exhibit H. Lessee may operate during such days and hours as Lessee may determine, without the imposition of minimum or maximum hours of operation by Lessor and Lessee shall have full-time access to the Premises, and, subject to all applicable laws, codes, regulations and ordinances, may operate, up to twenty-four (24) hours per day, seven (7) days per week, three hundred sixty-five (365) days per year. Lessee agrees to comply with all orders, rules, regulations and requirements of any governmental body relating to the manner of Lessee's use and occupancy of the Premises, or alterations hereafter made by the Lessee, and Lessee will pay all costs and expenses incidental to such compliance and will indemnify and save harmless Lessor therefrom.

Lessor shall not sell, rent or permit any property owned, leased or controlled by Lessor within a radius of three (3) miles from the Premises to be occupied or used by a business that provides or offers any renal dialysis, renal dialysis home training, any aphaeresis service(s) or similar blood separation or cell collection procedures, except services involving the collection of blood or blood components from volunteer donors. Lessor shall not display or permit to be displayed upon any such property within said radius any advertisement for any such business other than Lessee's advertisement(s) for Lessee's business(es). Lessor further covenants that in any lease, deed or other agreement hereafter executed by Lessor affecting any property owned, leased or controlled by Lessor within such radius, Lessor will insert a restrictive clause preventing such property from being used for any purposes herein prohibited. This paragraph shall survive for two (2) years following the termination or expiration of this Lease.

Notwithstanding the preceding to the contrary and commencing on the first day of the thirty seventh (37th) month of the Term, Lessee shall have the right to cease to conduct business ("Go Dark") in the Premises following the date Lessee opens for business within the Premises. In entering into this Lease, Lessor is not relying upon Lessee's operation of its business from the Premises. Following the expiration of the first thirty-six (36) months of the Term, nothing in this Lease shall be construed to require a business to be continuously operated in the Premises or to require the Premises to be continuously occupied. However, in the event that the Premises ceases to be operated for business for a period in excess of one hundred twenty (120) consecutive days (other than any cessation of operations resulting from casualty, condemnation, renovations and repairs, licensing or compliance issues, or other Force Majeure Event) following the expiration of the thirty-sixth (36th) month of the Term, Lessor shall thereafter prior to resumption of business operations from the Premises have the right to terminate this Lease, as its sole and exclusive remedy, effective upon sixty (60) days prior written notice to Lessee; provided, however, that in the event Lessee or a Transferee commences operation for business with the general public from the Premises during such sixty (60) day period, then Lessor's election to terminate shall be nullified and this Lease shall continue in full force and effect. Upon any such termination, neither Lessor nor Lessee shall have any further duties and obligations hereunder (provided that all Rent due hereunder shall be prorated based on the subject termination date) except as specifically set forth in this Lease.

7. Assignment/Subletting. Lessee shall not assign this Lease, or sublet the Premises, or any part thereof, without Lessor's prior written consent which consent shall not be unreasonably withheld, conditioned or delayed. Prior to any sublease or assignment, Lessee shall first notify Lessor in writing of its election to sublease all or a portion of the Premises or to

assign this Lease or any interest thereunder. At any time within thirty (30) days after service of said notice, Lessor shall notify Lessee that it consents or refuses to consent to the sublease or assignment. A failure by Lessor to respond within such thirty (30) day period shall be deemed to be a consent.

Lessor shall not have the right to recapture any sublease or assignment space. Any denial of such sublease or assignment by Lessor as hereinabove provided must be predicated upon a commercially reasonable basis for such denial. A condition of any assignment or sublease is the agreement of the parties that Lessor shall receive the full and complete Rent payment of any transferee even though such payments may be in excess of the original Rent between Lessor and Lessee and Lessee; provided, however, Lessee shall be permitted to deduct from any excess Rent, Lessee's marketing costs and brokerage commissions incurred by Lessee in connection with the assignment or sublease space subject to the transfer.

Notwithstanding the preceding to the contrary, Lessee may assign its entire interest under this Lease or sublet the Premises to a wholly owned corporation, affiliate, subsidiary or parent of the Lessee or to any successor to Lessee by purchase, merger, consolidation or reorganization (hereinafter collectively referred to as "Corporate Transfer") without the consent of Lessor, provided: (i) Lessee is not in an event of default under this Lease beyond applicable notice and cure periods; (ii) if such proposed transferee is a successor to Lessee by purchase, said proposed transferee shall acquire all or substantially all of the stock or assets of Lessee's business or, if such proposed transferee is a successor to Lessee by merger, consolidation or reorganization, the continuing or surviving corporation shall own all or substantially all of the assets of Lessee; (iii) such proposed transferee operates the business in the Premises for the Permitted Use and no other purpose; and (iv) Lessee shall remain primarily liable for all obligations under this Lease in the event of any Corporate Transfer (except as otherwise expressly set forth herein). As used herein, the word "control" means the right and power, directly or indirectly, to direct or cause the direction of the management and policies of a person or business entity, corporate or otherwise, through ownership or voting securities, by contract or otherwise. Lessee shall give Lessor written notice within thirty (30) days of the effective date of such Corporate Transfer, unless notice is prohibited by law or by binding agreement. As used herein, the term "affiliate" shall mean a business entity controlling, controlled by or under common control with Lessee and the term "subsidiary" shall mean a corporate entity wholly owned by Lessee or by Lessee's parent company or at least fifty-one percent (51%) of whose voting stock is owned or controlled by Lessee. Notwithstanding the preceding to the contrary, in the event of a Corporate Transfer to an entity whose tangible financial net worth is less than that of Lessee's as of the date of this Lease, it shall be a requirement in order for the Corporate Transfer to take effect that DaVita Inc. provide Lessor with a guaranty for payment and performance which shall be effective until the end of the applicable term or extension term, as the case may be, on a commercially reasonable form that is acceptable to both Lessor and Lessee.

No such assignment or other transfer, in whole or in part, of any Lessee's rights or obligations under this Lease shall be or operate as a release of Lessee hereunder and Lessee shall remain responsible for performing Lessee's obligations hereunder should Lessee's assignee or transferee fail to perform any such obligations, unless specifically provided otherwise by Lessor in writing.

8. Operating Expenses and Utilities.

8.1 Beginning on the Commencement Date, Lessee shall pay "Lessee's Proportionate Share" (as defined herein) of all Taxes (as defined below), common area maintenance charges for the Shopping Center ("CAM Charges") and insurance premiums for the insurance maintained by Lessor under this Lease ("Insurance"), in advance, in equal monthly installments at the time of the payment of Rent, based on Lessor's estimate of the Taxes, CAM Charges and Insurance for the calendar year in question (which estimate may be revised by Lessor from time to time). For reference purposes, Taxes, CAM Charges and Insurance are collectively referred to as the "Operating Expenses" for the Shopping Center and Premises. After the actual Operating Expenses for a calendar year are determined by Lessor, Lessor shall provide Lessee with a statement of such actual Operating Expenses for such calendar year and Lessee, within 30 days, shall pay to Lessor any deficiency, which obligation shall survive the expiration or termination of this Lease. If such statement shows an overpayment by Lessee, then any surplus paid by Lessee shall be credited to Lessee's next monthly installment of Operating Expenses or, if this Lease has expired or been terminated for reasons other than Lessee's breach or default, be paid to Lessee within 30 days of the end of the Term.

"Lessee's Proportionate Share" is the quotient obtained by dividing the Premises Rentable Area by the Shopping Center Rentable Area. Lessee's Proportionate Share as of the Commencement Date will be 5.5%. Lessee's Proportionate Share shall be adjusted in the event the Shopping Center Rentable Area changes at any time. Lessor represents that the Shopping Center Rentable Area has been determined without reference to whether such area is actually leased or occupied.

"Taxes" shall mean real property taxes, public charges and assessments assessed or imposed upon the Shopping Center, provided, however, that any one time (as opposed to on-going) special assessments for public improvements having a useful economic life exceeding the remaining term of this Lease shall be prorated between Lessor and Lessee using a straight-line method, based on the proportion of that economic life falling within the remaining term of the Lease. Taxes shall not include any penalties or interest for late or partial payment nor any income, franchise, margin, inheritance, estate, transfer, excise, gift or capital gain taxes, that are or may be payable by Lessor or that may be imposed against Lessor or against the rents payable hereunder.

"CAM Charges" shall include all expenditures incurred by or on behalf of Lessor in operating, maintaining, repairing or replacing (to the extent not prohibited by Section 8.5(j) herein) the Shopping Center and Common Areas, subject to any limitations set forth in Section 8.5 below.

"Insurance" shall include all of Lessor's costs relating to insuring the common facilities or the Shopping Center as a whole or the operations thereon including, but not limited to, casualty insurance, flood insurance, rent loss insurance, fire insurance and extended coverage as well as general liability insurance, umbrella liability insurance, bodily injury, public liability, property damage liability, automobile insurance, sign insurance, and any other insurance carried by Lessor in limits selected by Lessor (whether procured and or carried through third party

insurance companies, captive insurance companies, programs of self-insurance or blanket policies of insurance or any combination of the foregoing), subject to any limitations set forth in Section 8.5 below.

Lessee's Proportionate Share of initial Operating Expenses is estimated at $4.15 per square foot per annum, of which $1.65 is attributable to Lessee's CAM Charges. From and after the first full Lease Year, Lessee's liability for the "Controllable CAM Charges" shall not increase by more than four percent (4%) over Lessee's liability for "Controllable CAM Charges" for the previous Lease Year, on a non-cumulative basis. "Controllable CAM Charges" shall mean only those items included in CAM Charges where the cost or expense thereof shall be within the reasonable ability of Lessor to control. Specifically excluded from Controllable CAM Charges, without limitation, are the costs and expenses of Taxes, Insurance, snow and ice removal, and utilities for the Shopping Center.

8.2 As of the Possession Date, Lessee shall be solely responsible for and shall pay the cost of all utilities and other services necessary in the operation of the Premises, including but not be limited to, gas, water and sewer, fuel oil, electrical, telephone, trash and other utility charges. The Premises shall be separately metered for all utilities, including gas, water and electricity.

8.3 Lessor shall make available at Lessor's home office, currently the same location as Lessor's notice address, or at the Shopping Center, true and accurate records of items that constitute Operating Expenses. Such records shall be open for inspection from time to time by Lessee or its duly authorized representative (provided, Lessee shall not use auditors paid on a contingency fee basis) for a period of one (1) year after the close of each calendar year. If any audit of Lessor's submitted reports shall disclose an overcharge, Lessor shall promptly pay to Lessee, within thirty (30) days, the amount of such overcharge, and if such audit, as reasonably agreed to by Lessor, discloses an overcharge of more than five percent (5%), Lessor shall reimburse Lessee its actual costs incurred in connection with such audit, provided, however, in no event shall Lessor be required to reimburse Lessee more than $3,750.00 for Lessee's audit costs. In addition, Lessee agrees that said audit shall not be performed on a contingency or success fee basis.

8.4 All sums (other than the Rent) which may be due and payable under this Lease shall be deemed to be additional rent hereunder and in the event that Rent shall be prorated or shall abate pursuant to the terms of this Lease then such additional rent shall be prorated or abate to the same extent and in the same manner, unless otherwise specifically provided for in this Lease.

8.5 Notwithstanding the foregoing, the term "CAM Charges" does not include the following: (a) depreciation of the Shopping Center, and all equipment, fixtures, improvements and facilities used in connection therewith; (b) payments of principal, interest, loan fees, penalties, attorney's fees or amortization relating to any debt Lessor may have incurred or will incur in the future relating to the ownership, operating and maintenance of the Shopping Center; (c) the cost of leasehold improvements, including redecorating or otherwise improving, painting, decorating or redecorating space or vacant space for other lessees of the Shopping

Center, except in connection with general maintenance of the Shopping Center; (d) cost of any "tap fees" or any sewer or water connection fees for the benefit of any lessees in the Shopping Center; (e) fees and expenses (including legal and brokerage fees, advertising, marketing and promotional costs) paid by Lessor in connection with the lease of any space within the Shopping Center, including subleasing and assignments; (f) any validated parking for any entity; (g) all costs incurred by Lessor in connection with any negotiations or disputes and/or litigation with lessees or occupants within the Shopping Center or prospective lessees of the Shopping Center; (h) expenses or costs incurred by Lessor relating to any violation by Lessor or any other lessee of the terms and conditions of any law or any lease covering the Shopping Center; (i) the cost of any work or service performed for any lessee in the Shopping Center (other than Lessee) to a materially greater extent or in a materially more favorable manner than that furnished generally to lessees (including Lessee) in the Shopping Center, except for repairs and maintenance of general applicability which may be performed in phases; (j) the cost of any repair or replacement which would be required to be capitalized under generally accepted accounting principles ("GAAP"); (k) the costs and expenses of any item included in Operating Expenses to the extent that Lessor is actually reimbursed for such cost by an insurance company, a condemning authority, another lessee or any other party (except as typical Operating Expense reimbursements by other tenants and occupants); (l) payments of ground rents and related sums pursuant to a ground lease in favor of a ground lessor; (m) wages, salaries or other compensation paid to any employees at or above the grade of building manager; (n) Lessor's general overhead (including the equipment, fixtures and facilities used in connection with the management of the Shopping Center) and administrative expenses which are not chargeable to Operating Expenses of the Shopping Center in accordance with generally accepted accounting principles, including salaries and expenses of Lessor's executive officers; provided, however, Lessee shall pay to Lessor an administrative fee of an amount not to exceed fifteen percent (15%) of the aggregate of the sum of items CAM Charges; (o) the cost of correcting defects (latent or otherwise) in the construction of the Shopping Center or in the Shopping Center equipment, except that conditions (other than construction defects) resulting from ordinary wear and tear shall not be considered defects for purposes hereof; (p) the cost of installing, operating and maintaining any specialty service (e.g., observatory, broadcasting facility, luncheon club, retail stores, newsstands or recreational club); (q) any expenses incurred by Lessor for the use of any portions of the Shopping Center to accommodate events, including but not limited to shows, promotions, kiosks, displays, filming, photography, private events or parties, ceremonies and advertising beyond the normal expenses otherwise attributable solely to Shopping Center services, such as lighting and HVAC to such public portions of the Shopping Center in normal operations during standard Shopping Center hours of operation; (r) any costs representing an amount paid to an entity related to Lessor which is in excess of the commercially reasonable amount for similar shopping centers in similar markets which would have been paid absent such relationship; (s) any entertainment, dining, or travel expenses of Lessor for any purpose; (t) costs related to maintaining Lessor's existence, either as a corporation, partnership, or other entity; (u) any expenses for repairs or maintenance to the extent covered by warranties or service contracts; (v) any type of utility service which is separately metered to or separately charged or paid by Lessee or any other lessee in the Shopping Center; (w) the cost of any environmental remediation for which Lessor is responsible under Section 10 of this Lease; (x) all ad valorem taxes paid or payable by Lessee or other lessees in the Shopping Center for (i) personal property and (ii) on the value of the leasehold improvements in

the Premises or the Shopping Center or other lessees in the Shopping Center (in this connection it is agreed that Lessee shall be responsible for the payment of ad valorem taxes on Lessee's own leasehold improvements); (y) all items and services for which Lessee pays third parties; (z) the cost of any item which is an expense or cost to Lessor in connection with Lessor's work to prepare the Premises for occupancy by Lessee including any allowances or credits granted to Lessee in lieu of a payment by Lessor; (aa) parking area replacement occurring more than once every ten (10) years; (bb) any cost of insurance premiums which exceed that of a commercially reasonable premium for such insurance coverage required under Section 16.1 if Lessor elects to self-insure ("commercially reasonable" meaning the allocation of premiums that would be quoted for the same type of property or portfolio of properties); (cc) any cost of insurance premiums that exceeds the overall premium that is allocable to the Shopping Center if Lessor maintains a blanket policy that insures other properties owned by Lessor; and (dd) any item which is included in the Operating Expenses which, but for this provision, would be included twice.

9. Alterations/Signage. Lessee shall not make any alterations, or additions or leasehold improvements to the Premises following the Commencement Date ("Alterations") without Lessor's prior written consent in each and every instance, such consent not to be unreasonably withheld or delayed. Notwithstanding the foregoing, Lessee shall have the right to make interior non-structural Alterations to the Premises which do not exceed in cost Thirty Thousand Dollars ($30,000.00) in the aggregate during each Lease Year and which do not affect any electrical, plumbing, mechanical or HVAC systems serving the Shopping Center without Lessor's consent. All Alterations which may be made by Lessee shall be the property of Lessee and Lessee shall be entitled to remove from the Premises during the Term all Alterations, Lessee improvements and any and all furniture, removable trade fixtures, equipment and personal property ("Fixtures") installed or located on or in the Premises provided that Lessee repair any and all damages done by the removal of the foregoing. All Alterations and Lessee improvements which Lessee does not elect to remove at the expiration of the Term shall be surrendered with the Premises at the termination of this Lease.

To the maximum extent permitted by applicable Laws, Lessor hereby waives any rights which Lessor may have, as to any of Lessee's furniture, fixtures, equipment, personal property, Lessee improvements and Alterations, in the nature of a Lessor's lien, security interest or otherwise and further waives the right to enforce any such lien or security interest.

Lessee shall have the right to affix Lessee's standard signage, in accordance with Lessor's signage criteria set forth on Exhibit G-1 and subject to Lessor's prior written consent, which shall not be unreasonably withheld conditioned or delayed, including a sign on the exterior of the Shopping Center. All such signs shall comply with all applicable zoning Laws and Lessor's prior approval, which approval shall not be unreasonably withheld, conditioned or delayed. Lessor, at Lessor's expense, shall timely provide space for Lessee's designated name(s) on any directory boards located in the Shopping Center or complex.

Lessee, at its sole cost and expense, shall be permitted to install one panel on the existing pylon sign in the location shown on Exhibit G-2. Fabrication, installation and maintenance (or replacement) of Lessee's pylon panel shall be at Lessee's sole cost and expense, provided, however, Lessor shall approve Lessee's panel prior to Lessee's installation of the same.

Additionally, Lessee shall be responsible for Lessee's pro rata share (determined based on the percentage of signage space occupied by Lessee) of the maintenance costs of the pylon sign.

10. Environmental. Lessee shall not cause or permit any hazardous or toxic substances, materials or waste, including, without limitation, medical waste and asbestos ("Hazardous Substances") to be used, generated, stored or disposed of in, on or under, or transported to or from the Premises unless such Hazardous Substances are reasonably necessary for Lessee's business conducted in the Premises; provided, however, Lessee shall at all times and in all material respects comply with all local, state, and federal laws, ordinances, rules, regulations and orders, whether now in existence or hereafter adopted relating to Hazardous Substances or otherwise pertaining to the environment (the "Environmental Laws") and further provided that Lessee shall periodically cause to be removed from the Premises such Hazardous Substances placed thereon by Lessee or Lessee's agents, servants, employees, guests, invitees and/or independent contractors in accordance with good business practices and in compliance with Environmental Laws, such removal to be performed by persons or entities duly qualified to handle and dispose of Hazardous Substances. Without limiting the generality of the foregoing, Lessor acknowledges that the following Hazardous Substances, among others, are required for Lessee's business operations: bleach, cidex, hibiclens, metrocide, hydrogen peroxide, and formaldehyde. Upon the expiration or earlier termination of this Lease, Lessee shall cause all Hazardous Substances placed on the Premises by Lessee to be removed, at Lessee's cost and expense, from the Premises and disposed of in strict accordance with the Environmental Laws.

Lessee shall indemnify, defend (by counsel reasonably acceptable to Lessor), protect, and hold Lessor harmless, from and against any and all claims, liabilities, penalties, fines, judgment, forfeitures, losses, costs (including clean-up costs) or expenses (including attorney's fees, consultant's fees and expert's fees) for the death of or injury to any person or damage to any property whatsoever, arising from or caused in whole or in part, directly or indirectly, by (a) the presence after the Possession Date in, on, under, or about the Premises of any Hazardous Substances caused by Lessee or its agents, servants, employees, guests, invitees and/or independent contractors; (b) any discharge or release by Lessee or its agents, servants, employees, guests, invitees and/or independent contractors after the Possession Date in or from the Premises of any Hazardous Substances; (c) Lessee's use, storage, transportation, generation, disposal, release or discharge after the Possession Date of Hazardous Substances, to, in, on, under, about or from the Premises; or (d) Lessee's failure after the Possession Date to comply with any Environmental Law. Lessee agrees to remediate at Lessee's expense promptly upon receipt of notice from Lessor any condition described in (a) through (d) of the previous sentence.

Lessor shall indemnify, defend (by counsel reasonably accepted to Lessee), protect, and hold Lessee harmless, from and against any and all claims, liabilities, penalties, fines, judgment, forfeitures, losses, costs (including clean-up costs) or expenses (including attorney's fees, consultant's fees and expert's fees) for the death of or injury to any person or damage to any property whatsoever, arising from or caused in whole or in part, directly or indirectly, by (a) the presence prior to the Possession Date in, on, under, or about the Premises or Shopping Center of any Hazardous Substances and not caused by caused by Lessee or its agents, servants, employees, guests, invitees and/or independent contractors; (b) any discharge or release caused by Lessor, its agents, employees, or contractors prior to the Possession Date in or from the Premises or

Shopping Center of any noxious or Hazardous Substances; (c) the use, storage, transportation, generation, disposal, release or discharge of Hazardous Substances by Lessor to, in, on, under, about or from the Premises or Shopping Center; or (d) Lessor's failure to comply with any Environmental Law. Lessor agrees to remediate, in accordance with and to the extent required by all applicable Environmental Laws, at Lessor's expense immediately upon receipt of notice from Lessee any condition described in (a) through (d) of the previous sentence and any other condition affecting the Premises to the extent same is not caused by caused by Lessee or its agents, servants, employees, guests, invitees and/or independent contractors.

To Lessor's actual knowledge, (which knowledge is limited to the contents of the Phase 1 environmental report dated July 22, 2009 prepared by ATC Associates (the "Report") a copy of which Report has been delivered to Tenant), except as is contained in the Report, Lessor represents and warrants to Lessee that as of the Possession Date (a) there are no Hazardous Substances on the Premises, including without limitation asbestos or mold, and (b) Lessor has received no notice from any governmental or private entity relating to Hazardous Substances on the Premises.

Lessee shall promptly deliver to Lessor copies of all notices made by Lessee to, or received by Lessee from, any state, county, municipal or other agency having authority to enforce any environmental law ("Enforcement Agency") or from the United States Occupational Safety and Health Administration concerning environmental matters or Hazardous Substances at the Premises. Lessor shall promptly deliver to Lessee copies of all notices received by Lessor from any Enforcement Agency or from the United States Occupational Safety and Health Administration concerning environmental matters or Hazardous Substances at the Premises.

Notwithstanding anything in the Lease to the contrary, Lessee in the course of its business in the Premises, may be responsible for the handling, collecting, removal and disposal of medical or related waste considered to be a bio-hazard ("Bio-Hazard Waste"). The handling, collecting, removal and disposal of any and all Bio-Hazardous Waste shall be at Lessee's sole cost and expense. Lessee shall place all Bio-Hazardous Waste in separate receptacles, clearly label such receptacles and promptly remove them or have them removed by a licensed Bio-Hazardous Waste removal company from the Premises. In addition, Lessee shall comply with any laws, rules and regulations enacted by any local, state or federal agency related to the handling of Bio-Hazard Waste. Upon receipt of a written request from Lessor, Lessee shall provide Lessor with evidence of its compliance with all applicable laws, rules and regulations. Lessee shall indemnify, defend and hold Lessor harmless from any and all claims, actions, damages, injuries, liabilities, costs and expenses arising from Lessee's and/or Lessee's agents handling, collecting, removing or disposing of any and all Bio-Hazardous Waste and/or Lessee's agents failure to comply with any and all laws, rules and regulations enacted by any local, state, or federal agency relating to the Bio-Hazardous Waste.

11. Damage to Premises by Fire or Casualty. In the event the Premises shall be damaged by fire or other casualty during the Term of this Lease, then:

11.1 if the damage to the Premises is so substantial that: (i) the repair, restoration or rehabilitation of such damage cannot reasonably be expected to be substantially

completed within two hundred ten (210) days from the date of such damage, then Lessee or Lessor may elect to terminate this Lease by giving written notice to the other party within thirty (30) days of the date of such fire or casualty. If Lessor elects to terminate this Lease, and such termination would occur in the last year of the Term, such termination shall not be effective if Lessee elects (within ten (10) days after receipt of Lessor's notice of termination) to renew this Lease by exercising any remaining options which are described in Section 4 hereof for an additional period of not less than five (5) years.

11.2 if not so terminated, Lessor shall proceed with all due diligence to repair, restore or rehabilitate the Shopping Center, to substantially its former condition as of the Possession Date, at Lessor's expense. Notwithstanding the foregoing, in the event Lessor proceeds to have any damage restored as aforesaid, Lessee agrees that promptly after completion of such repairs by Lessor, it will proceed with reasonable diligence and at its sole cost and expense to rebuild, repair and restore its signs, fixtures, equipment and to construct and install leasehold improvements. In no event shall Lessor be obligated to repair or restore any special equipment or improvements installed by Lessee, it being understood that Lessor's restoration obligations shall be limited to restoration of the Shopping Center if not so terminated, Lessor shall proceed with all due diligence to repair, restore or rehabilitate the Premises, to substantially their former condition immediately prior to such damage or destruction, at Lessor's expense, in which latter event this Lease shall not terminate.

If the Premises are rendered untenantable by fire or other casualty, there shall be an abatement of Rent due Lessor by Lessee for the period of time during which the Premises are untenantable. If the restoration is not substantially completed within two hundred ten (210) days of such damage, Lessee shall have the option to terminate this Lease by written notice to Lessor. In the event of any termination of this Lease, Rent shall be paid only to the date of such fire or casualty.

In the event that the Premises are partially but not substantially damaged by fire or other casualty, then Lessor shall immediately proceed with all due diligence to repair and restore the Premises and the Rent shall abate in proportion to the untenantable of the Premises during the period of restoration.

Notwithstanding the foregoing, in the event Lessor proceeds to have any damage restored as aforesaid, Lessee agrees that promptly after completion of such repairs by Lessor, it will proceed with reasonable diligence and at its sole cost and expense to rebuild, repair and restore its signs, fixtures, equipment and to construct and install leasehold improvements; provided, however, that the Rent abatement provided for shall continue during such period of restoration until the earlier of the date Lessee reopens for business in the Premises or one hundred eighty (180) days after Lessor delivers possession of the Premises to Lessee. In no event shall Lessor be obligated to repair or restore any special equipment or improvements installed by Lessee, it being understood that Lessor's restoration obligations shall be limited to restoration of the Shopping Center. In the event that Lessor does not restore the Premises, Lessee may retain all insurance proceeds applicable to Alterations and Lessee improvements constructed by Lessee at its expense.

12. Eminent Domain.

12.1 Taking. If by any lawful authority through condemnation or under the power of eminent domain: (a) the whole of the Premises shall be permanently taken; (b) less than the entire Premises shall be permanently taken, but the remainder of the Premises, are not, in Lessee's reasonable business judgment, fit for Lessee to carry on its business therein; (c) Lessee determines, in its reasonable business judgment, that after such taking adequate parking space will not be available near the Premises; (d) there is any substantial impairment of ingress or egress from or to or visibility of the Premises; or (e) all or any portion of the common areas shall be taken resulting in a material interference with the operations of or access to Lessee's business, then in any such event, Lessee may terminate this Lease, effective as of the date of such taking, and the Rent and other sums paid or payable hereunder shall be prorated as of the date of such termination.

12.2 Rent Adjustment. Unless this Lease is terminated as above provided, commencing with the date possession is acquired by the condemning authority the Rent and other sums payable hereunder shall be reduced by the then applicable per square foot Rent as by the number of square feet taken and Lessor shall restore the Premises, at Lessor's cost and expense to a complete architectural unit, and Operating Expenses will be recalculated based on the applicable square footage. During such restoration the Rent shall be abated to the extent the Premises are rendered untenantable.

12.3 Awards. All compensation awarded or paid in any such eminent domain proceeding shall belong to and be the property of Lessor without any participation by Lessee, except that nothing contained herein shall preclude Lessee from prosecuting any claim directly against the condemning authority in such eminent domain proceeding for its relocation costs, its unamortized leasehold improvements and trade fixtures, loss of business and the like.

13. Right of Entry by Lessor. Lessor, or any of its agents, shall have the right to enter said Premises during all reasonable hours and upon at least twenty-four (24) hours prior notice (except in cases of emergency), to perform its obligations under this Lease, examine the same or to exhibit said Premises. Lessor shall have the right to put or keep upon the doors or windows thereof a notice "FOR RENT" at any time within sixty (60) days before the expiration of this Lease. Any work done by Lessor to Premises shall be performed during hours that Lessee is not open for business (except in emergencies) unless Lessee, in the exercise of its reasonable discretion otherwise agrees. Any restoration work or alteration work at the Premises which is necessitated by or results from Lessor's entry, including, without limitation, any work necessary to conceal any element whose presence is permitted hereunder, shall be performed by Lessor at its expense or, at Lessee's election, by Lessee on Lessor's behalf and at Lessor's sole cost and expense. Lessor shall be liable for all loss, damage, or injury to persons or property and shall indemnify and hold Lessee harmless from all claims, losses, costs, expenses and liability, including reasonable attorney's fees resulting from Lessor's entry except to the extent caused by the negligent or intentional act of Lessee or its contractors, agents, employees or licensees. If Lessor's entry into the Premises pursuant to this Lease interferes with the conduct by Lessee of it business to such an extent that Lessee, in the exercise of its reasonable business judgment, must close the Premises or is unable to use seventy-five percent (75%) of the Premises for business for

two (2) or more business days, then Rent and Operating Expenses shall totally abate for each day or portion thereof that such interference continues.

14. Indemnity. Lessee agrees to indemnify Lessor and save Lessor harmless from any and all liability, claims and loss for personal injury or property damage, or both, sustained or claimed to have been sustained by any person or persons, or property in, upon or about the leased Premises or Shopping Center caused or brought about by the act or neglect of Lessee, its agents, servants or employees. Lessor agrees to indemnify Lessee and save Lessee harmless from any and all liability, claims and loss for personal injury or property damage, or both, sustained or claimed to have been sustained by any person or persons, or property in, upon or about the leased Premises or Shopping Center caused or brought about by the act or neglect of Lessor, its agents, servants or employees. The indemnities set forth in this Section 14 shall survive the expiration of the term of this Lease.

15. Default and Remedies.

15.1 Lessee Default and Lessor Remedies. In the event that (a) Lessee defaults in the payment of Rent hereunder and such Rent remains due and unpaid for ten (10) days following written notice of such default from Lessor to Lessee, provided, however, in no event shall Lessor be required to send more than two (2) written notices of a monetary default in any Lease Year during the Term; (b) or should Lessee default in the performance of any other provisions of this Lease and such default is not cured within thirty (30) days following written notice from Lessor specifying such default (unless such default is not reasonably capable of being cured within such thirty (30) day period and Lessee is diligently prosecuting such cure to completion); or (c) if a petition in bankruptcy shall be filed by or against Lessee (provided Lessee shall have ninety (90) calendar days to stay any involuntary proceeding); or (d) should Lessee make an assignment for the benefit of its creditors, or should a receiver be appointed for the said Lessee and such receiver is not dismissed within sixty (60) days of his appointment, then, in any of these events, Lessor, at its option, (i) proceed for past due installments of Rent due, reserving its right to proceed later for the remaining installments; or (ii) declare the rights of Lessee under this Lease terminated, and thereafter recover possession of the Premises through legal process, or (iii) exercise any other remedies available at law or equity.

Upon and after termination of this Lease, Lessor shall make a commercially reasonable effort to mitigate its damages and relet the Premises or any part thereof to any person, firm or corporation other than Lessee for such rent, for such time and upon such terms as Lessor in Lessor's reasonable discretion shall determine. If the consideration collected by Lessor upon any such reletting is not sufficient to pay monthly the full amount of the Rent and additional rent reserved in this Lease and all other monies to be paid by Lessee, Lessee shall pay to Lessor the amount of each monthly deficiency upon demand. Whether or not this Lease is terminated by Lessor or by any provision of law or court decree, Lessee shall have no obligation to pay any Rent until the date it would otherwise have become due in the absence of any event of default. Lessor agrees that it shall have no right to accelerate (i.e. declare the same immediately due and payable) any Rent which would have become due in the future; provided, however, that upon termination of this Lease by Lessor, Lessee shall pay Lessor for the unamortized out-of-pocket costs of leasing commissions and Lessee improvements.

15.2 Lessor Default and Lessee Remedies. Subject to the terms and provisions hereinbelow, and in addition to any other remedy expressly available to Lessee pursuant to this Lease or at law or in equity, should Lessor fail to perform any term or covenant under this Lease (such failure being herein sometimes referred to as a "Lessor Default") and if any such Lessor Default shall not be cured and shall accordingly be continuing thirty (30) days following written notice by Lessee to Lessor of such Lessor Default (unless such default is not reasonably capable of being cured within such thirty (30) day period and Lessor is diligently prosecuting such cure to completion), then Lessee shall have the right to remedy such Lessor Default and, in connection therewith, incur reasonable expenses on the account of Lessor, and any and all such reasonable sums expended or obligations incurred by Lessee in connection therewith shall be paid by Lessor to Lessee within thirty (30) days of demand. If Lessor fails to timely reimburse and pay same to Lessee, Lessee may, in addition to any other right or remedy that Lessee may have under this Lease, deduct such amount (together with interest thereon at the Interest Rate until the date of repayment thereof by Lessor to Lessee) from subsequent installments of Rent and other charges (if any) that from time to time thereafter may become due and payable by Lessee to Lessor hereunder; provided Lessee shall not deduct more than fifty percent (50%) of any one monthly Rent payment at one time. Notwithstanding the foregoing, in all events Lessee shall have the right to remedy any Lessor Default without prior notice in the event of an emergency (so long as Lessee gives notice within a reasonable period of time thereafter) and invoice Lessor and abate Rent (if necessary) in the manner set forth in the preceding sentences of this Section 15. For the purpose of this Section 15, an "emergency" means a condition or state of facts which if not promptly corrected would jeopardize the health and safety of Lessee, or Lessee's customers, employees, and invitees and/or result in further damage to the Premises or its contents.

If this Lease is terminated for any reason under this Section 15 before the first (1st) anniversary of the Commencement Date, and applicable Law, including without limitation applicable healthcare Law, restricts the parties from entering into any similar agreement with each other for the Premises before the first (1st) anniversary of the Commencement Date, both parties agree to comply with such applicable Law.

16. Insurance.

16.1 Lessor's Insurance. During the Term of this Lease and subject to Lessee's reimbursement for Lessee's Proportionate Share of Insurance as more particularly set forth in Section 8 of this Lease, Lessor shall procure and maintain in full force and effect with respect to the Shopping Center (a) a policy or policies of property insurance (including, to the extent required, sprinkler leakage, vandalism and malicious mischief coverage, and any other endorsements required by the holder of any fee or leasehold mortgage and earthquake, terrorism and flood insurance to the extent Lessor reasonably deems prudent and/or to the extent required by any mortgagee) for full replacement value; and (b) a policy of commercial liability insurance in a minimum amount of $1,000,000.00 per claim and $3,000,000.00 in the aggregate for both bodily injury and property damage insuring Lessor's activities with respect to the Premises and the Shopping Center for loss, damage or liability for personal injury or death of any person or loss or damage to property occurring in, upon or about the Premises or the Shopping Center. Lessor may carry any insurance required under this Lease through third party insurance

companies, captive insurance companies, programs of self-insurance or blanket policies of insurance or any combination of the foregoing, provided, however, the amount of the total insurance allocated to this Lease is sufficient to furnish in protection the equivalent of separate policies in the amounts herein required and in all other respects, any such policy or policies shall comply with the other provisions of this Lease.

16.2 Lessee's Insurance. Lessee covenants and agrees to keep Lessee Improvements (as defined in Section 35 hereof) and Lessee's contents in the Premises insured for full replacement value against loss by fire and casualty, under an all risk policy with extended coverage endorsements covering Lessee's improvements, betterments, contents (including inventory, machinery and equipment). In addition thereto, Lessee shall obtain and keep in force with respect to the Premises comprehensive general liability insurance in a minimum amount of $1,000,000.00 per claim and $3,000,000.00 in the aggregate for both bodily injury and property damage. Lessee may carry any insurance required by this Lease under a blanket policy or under a policy containing a self insured retention. Each policy shall provide that the insurer shall give to Lessor twenty (20) days written notice prior to any cancellation of the policy. Lessee shall also maintain worker's compensation insurance covering all employees, agents and contractors of Lessee performing work in, on, or with respect to the Premises, in amounts not less than those required by applicable law and medical errors and omissions insurance covering Lessee's business for errors and omissions committed in the course of providing advice, expertise, or other services with limits of not less than $3,000,000.

Notwithstanding anything contained herein to the contrary, Lessee may carry any insurance required by this Lease under a blanket policy or under a policy containing a self insured retention, provided: (i) Lessee or Lessee's parent company, DaVita Inc., has a liquid net worth in excess of $100,000,000.00 as demonstrated in publicly available financials; (ii) Lessee or Lessee's parent company maintains a reasonable and prudent program of self-insurance with respect to such coverage as part of a regular program of self-insurance with reasonable cash reserves set aside for reasonable loss contingencies; (iii) to the extent that any such self-insurance is inadequate to cover the insurance obligations of Lessee set forth herein, Lessee's parent company hereby agrees to indemnify Lessor from any and all claims, losses, expenses, damages and liability for which Lessor is or may be held liable based on or arising out of any circumstance which would have been: (1) covered by the insurance required to be carried by Lessee hereunder, and (2) the responsibility of Lessee pursuant to the terms of this Lease; and (iv) Lessee delivers to Lessor certificates of self insurance which are consistent with the terms of this paragraph within thirty (30) days of execution of this Lease.

17. Subrogation. Without limiting the generality of any other waivers of claims contained in this Lease, Lessor and Lessee hereby waive any and all claims and rights of recovery against the other and their respective officers, directors, employees, agents and representatives for any loss or damage to their respective property, to the extent such loss or damage is insured against, or required to be insured against pursuant to the terms of this Lease, by Lessor or Lessee (as applicable) pursuant to this Section 17, regardless of fault or negligence and regardless of the amount of insurance proceeds actually collected or collectible under any insurance policies in effect, and Lessor and Lessee each represent and warrant to the other that all such policies permit such waiver and contain, and will contain, enforceable waiver of subrogation endorsements.

Nothing contained herein shall serve as a waiver for any deductible or self-insured risk. In addition, Lessor and Lessee agree that in the event of any loss or damage to their respective property, the party suffering the loss shall resort to its insurance coverage prior to asserting any claim or demand against the party causing the loss.

18. Repairs and Maintenance.

18.1 Lessor's Maintenance Responsibilities. Lessor shall timely maintain in good condition and repair the Common Areas of the Shopping Center and such costs shall be considered CAM Charges in accordance with Section 8 of this Lease. Notwithstanding the foregoing, Lessor, at its sole cost and expense, shall maintain and keep in good order and repair and make any necessary replacements to the roof, roof membrane, roof covering, concrete slab, footings, foundation, structural components, exterior walls, flooring (except for floor covering), exterior plumbing, heating, ventilation, cooling and electrical systems of the Shopping Center (but not those exclusively serving the Premises which shall be Lessee's responsibility pursuant to 18.2 below). Lessor shall also be responsible for any damage to the exterior doors and windows of the Premises to the extent any damage to the same is caused by any structural issues which are Lessor's responsibility

18.2 Lessee's Maintenance Responsibilities. Except for Lessor's obligations set forth above and except for any damage caused by the acts of negligence by Lessor or its agents within the Premises, Lessee shall keep the interior, non-structural portions of the Premises, including, but not limited to, all HVAC systems installed by Lessee, the plumbing, electrical, sprinkler and mechanical systems exclusively serving the Premises, plate glass, ceilings, floor coverings, interior walls, windows and the non-structural elements of all doors and entrances of the Premises in the same condition, order and repair as they are at the commencement of said Term and shall deliver same to Lessor at the termination of this Lease in good order and condition, provided that normal wear and tear and damage by fire or other casualty are excepted.

19. Brokers. Lessor and Lessee each represent to the other that it has had no dealings with any real estate broker or agent in connection with the negotiation of this Lease, except for USI Real Estate Brokerage Services Inc., and Windermere Professional Partners representing Lessee ("Lessee's Brokers"), and JSH Properties, Inc., representing Lessor. Lessor shall pay Lessee's Brokers a brokerage commission pursuant to a separate agreement. Lessor and Lessee agree that the preceding brokers are the only person/brokerage firms due a commission or fee derivative to this Lease. Except as otherwise provided herein, Lessor and Lessee covenant and agree to indemnify, protect, defend and save the other harmless from any and all loss, costs (including reasonable attorneys' fees and court costs), claims, damages, judgments, suits, causes of action, penalties, fines, expenses and liability that may arise from claims for commissions or fees arising by or through the indemnifying party. The foregoing mutual indemnification shall survive the expiration or earlier termination of this Lease.

20. Emergency. If Lessor is unable or unwilling to take action which it is obligated to take hereunder where an emergency has occurred with respect to the Premises, then Lessee may take such action as is reasonably necessary to protect the Premises and persons or property in the

Premises and Lessor shall, within thirty (30) days after written notice thereof from Lessee reimburse Lessee for its reasonable out-of-pocket expenses incurred in curing such emergency; provided, however, should Lessor fail to reimburse Lessee within said thirty (30) day period, then Lessee may, at its option, offset such amount against subsequent rent due under this Lease.

21. Title and Parking. Lessor hereby represents that Lessor is the owner in fee simple of the Premises, including the Shopping Center and all improvements thereon and has the right and authority to enter into this Lease. Lessor hereby represents to Lessee that Exhibit H attached hereto contains all of the Shopping Center existing exclusives and prohibited use restrictions existing as of the Effective Date of this Lease. Lessor further represents that Lessor and those signatories executing this Lease on behalf of Lessor have full power and authority to execute this Lease.

Lessor agrees that in the exercise of its rights under this Lease or elsewhere in this Lease, it shall use commercially reasonable efforts to avoid materially and adversely affecting (a) the visibility of the Premises and Lessee's signage, (b) access to the Premises, (c) the availability for use by Lessee's customers of parking spaces in the immediate vicinity of the Premises, and (d) Lessee's ability to operate the Premises, other than on a temporary basis as reasonably necessary for construction, repair and/or maintenance of the Shopping Center. Lessee shall be entitled to the use of the parking area in accordance with a parking ratio of not less than such amount as may be required by local code (including handicapped parking spaces).

22. Compliance with Laws. Both parties hereby agree to comply with all applicable federal, state and local laws, ordinances, rules and regulations ("Laws") throughout the Term of the Lease. Lessor represents that it has received no notices or communications from any public authority having jurisdiction alleging violation of any Laws relating to the Premises or the Shopping Center or improvements thereon which would affect Lessee's use of the Premises and has received no notices alleging violation of any title instrument. Notwithstanding anything to the contrary contained in this Lease, Lessor (and not Lessee) shall be responsible for any non-compliance of the Premises with any Laws or other governmental requirements existing as of the Possession Date to Lessee (and not resulting from the particular nature of Lessee's subsequent use of, or alterations to, the Premises), whenever discovered during the Term of this Lease. Lessor shall further be responsible for any non-compliance of the Common Areas with any Laws or other governmental requirements (and not resulting from the particular nature of Lessee's subsequent use of, or alterations to, the Premises), whenever discovered during the Term of this Lease.

If at any time or from time to time any Alterations, including, without limitation, structural Alterations, are required in order for the Premises or Shopping Center to comply with any generally applicable Laws from time to time applicable to the Premises, Lessor shall make such Alterations at its sole cost and expense. If at any time or from time to time any Alterations, including, without limitation, structural Alterations, are required in order for the Premises to comply with any Laws specifically applicable to the Premises due to Lessee's use as a dialysis facility or due to Lessee's alterations of the Premises, and not due to any act by Lessor or another lessee, Lessee shall immediately make such Alterations at its sole cost and expense.

Lessor represents and warrants to Lessee that Lessor is not a "referring physician" or a "referral source" as to Lessee for services paid for by Medicare or a state health care program, as the terms are defined under any federal or state health care anti-referral or anti-kickback, regulation, interpretation or opinion ("Referral Source"). Lessor covenants, during the term of this Lease, it will not knowingly (a) take any action that would cause it to become a Referral Source as to Lessee, or (b) sell, exchange or transfer the Premises to any individual or entity who is a Referral Source as to Lessee.

23. Intentionally Deleted.

24. Lessee to Subordinate. This Lease is subordinate to any and all mortgages or deeds of trust now existing upon the Shopping Center, or any part thereof, and to all future modifications, consolidations, replacements, extensions and renewals of, and all amendments and supplements to said existing mortgages or deeds of trust. Notwithstanding such subordination, as aforesaid, this Lease, except as otherwise hereinafter provided including, but not limited to, an event of default by Lessee beyond any applicable notice and cure period, shall not terminate or be divested by foreclosure or other default proceedings under said mortgages, deeds of trust, or obligations secured thereby, and Lessee shall attorn to and recognize the landlord, mortgagee, trustee, beneficiary or the purchaser at the foreclosure sale in the event of such foreclosure or other default proceeding, as Lessor for the balance of the Term of this Lease, subject to all of the terms and provisions hereof. The provisions of this paragraph shall be self-operative, but Lessee acknowledges and agrees that as a material consideration inducing Lessor to enter into this Lease, Lessee shall acknowledge same by executing and delivering to Lessor, within fifteen (15) business days, any and all instruments in order to subordinate this Lease and Lessee's rights hereunder, as aforesaid if and only if such requesting party shall execute, deliver and record in the appropriate registry of deeds a recognition and non-disturbance agreement in commercially reasonable form and content. Notwithstanding the foregoing, any such mortgagee, beneficiary, purchaser or tenant may elect to give the rights and interests of Lessee under this Lease (excluding rights in and to insurance proceeds and condemnation awards) priority over the lien of its mortgage or deed of trust or the estate of its lease, as the case may be. In the event of such election and upon the mortgagee, beneficiary or lessor notifying Lessee of such election, the rights and interests of Lessee shall be deemed superior to and to have priority over the lien of said mortgage or deed of trust or the estate of such lease, as the case may be. In such event, Lessee shall execute and deliver whatever instruments may be requested by such mortgagee, beneficiary or lessor to confirm such superiority provided such instruments utilize a commercially reasonable form. In the event of any act or omission by Lessor which would give Lessee the right to damages from Lessor or the right to terminate this Lease, Lessee will not sue for such damages nor exercise any such right to terminate until (i) it shall have given written notice of the act or omission to Lessor and to the holder(s) of the indebtedness or other obligations secured by any mortgage or deed of trust affecting the Premises or of any ground or underlying lease, if the name and address of such holder(s) have been furnished to Lessee, and (ii) the cure periods provided for under this Lease have elapsed following the giving of the notice, during which time Lessor and such holder(s), or either of them, and their agents or employees, will be entitled to enter upon the Premises subject to the terms of this Lease and remedy the act or omission.

25. Quiet Enjoyment. Lessee, upon paying the Rent, additional rent and other sums due under this Lease, and subject to all of the terms and covenants of this Lease, on Lessee's part to be kept, observed, and performed, shall quietly have and enjoy the Premises during the Term of this Lease.

26. Memorandum of Lease. Lessee shall not record this Lease without Lessor's written consent, which consent may be withheld or granted in Lessor's sole discretion.

27. Notices. All notices, demands and requests which may be or are required to be given by either party to the other shall be in writing and shall be either (a) sent by registered or certified mail, return receipt requested, postage prepaid or (b) delivered, by hand, or (c) sent by overnight courier such as Federal Express. All notices to Lessor should be addressed to Lessor at c/o RPAI US Management, Inc., 2901 Butterfield Road, Oak Brook, IL 60523; Telephone: (630) 218-8000; Facsimile: (630) 645-7231 or at such other place as Lessor may from time to time designate in written notice to Lessee. **All Rent and additional rent payments shall be sent to: RPAI US Management LLC, 13068 Collections Center Drive, Chicago IL 60693.** All notices to Lessee shall be addressed to Lessee c/o DaVita Inc., 1551 Wewatta Street, Denver, Colorado 80202, Attention: General Counsel, Telephone: (303) 405-2100, Facsimile: (877) 420-6537, with copy to: c/o DaVita Inc., 601 Hawaii Street, El Segundo, CA 90245; Attention: Group General Counsel, or to any such other place as Lessee may from time to time designate in written notice to Lessor. In addition, all correspondence to Lessee related to Taxes, Insurance, Rent or Operating Expenses shall be sent to 1423 Pacific Avenue, Tacoma, WA 98402; attention: Rent Department. All notices, demands and requests which shall be served upon Lessor and Lessee in the manner aforesaid shall be deemed sufficiently served or given for all purposes hereunder.

28. Estoppel Certificate. Each of Lessor and Lessee agrees at any time and from time to time upon not less than fifteen (15) business days' prior written request by the other to execute, acknowledge and deliver to the other an estoppel certificate in the form attached hereto as Exhibit F certifying that (a) this Lease is unmodified and in full force and effect (or if there have been modifications that the same is in full force and effect as modified and stating the modifications), (b) the dates to which the Rent and other charges have been paid in advance, if any, and (c) all of the defaults of Lessor or Lessee hereunder, if any, (and if there are no defaults a statement to that effect) and any other information reasonably requested, it being intended that any such estoppel certificate delivered pursuant to this Section 28 may be relied upon by any prospective purchaser of the Premises or any mortgagee or assignee of any mortgage upon the fee or leasehold of the Premises or by any prospective assignee of this Lease or sublessee of the whole or any portion of the Premises and/or by other party interested in the Premises or any part thereof.

29. Holding Over. In the event Lessee remains in possession of the Premises after the expiration of the term of this Lease, or any extensions hereof without the written consent of Lessor, this Lease shall continue on a month to month basis, terminable by either party upon thirty (30) days prior notice and Lessee shall be obligated to pay Rent at 150% of the then current rate (including all adjustments) and all other sums then payable hereunder prorated on a daily basis for each day that Lessor is kept out of possession of the Premises. Notwithstanding

the foregoing, in the event that applicable Law, including without limitation applicable healthcare Law, limits the period of any such holdover, both parties agree to comply with such applicable Law, provided such holdover period shall not exceed six (6) months.

30. Binding Effect. All covenants, agreements, stipulations, provisions, conditions and obligations herein expressed and set forth shall extend to, bind and inure to the benefit of, as the case may require, the successors and assigns of Lessor and Lessee respectively, as fully as if such words were written wherever reference to Lessor or Lessee occurs in this Lease; provided, however, that the liability of Lessor hereunder and any successor in interest and title to the Shopping Center shall be limited to his or its interest in the Shopping Center, and no other assets of the Lessor other than his or its interest in the Shopping Center shall be affected by reason of any liability which said Lessor or successor in interest may have under this Lease.

31. Complete Agreement. Any stipulations, representations, promises or agreements, oral or written, made prior to or contemporaneously with this agreement shall have no legal or equitable consequences and the only agreement made and binding upon the parties with respect to the leasing of the Premises is contained herein, and it is the complete and total integration of the intent and understanding of Lessor and Lessee with respect to the leasing of the Premises.

32. Severability. If any term, covenant or condition of this Lease or the application thereof to any person or circumstance shall, to any extent, be invalid or unenforceable, the remainder of this Lease, or the application of such term, covenant or condition to persons or circumstances other than those as to which it is held invalid or unenforceable, shall not be affected thereby and each term, covenant or condition of this Lease shall be valid and be enforced to the fullest extent permitted by law.

33. Applicable Law. The laws of the State where the Premises is located shall govern the validity, performance and enforcement of this Lease, without regard to such State's conflict-of-law principles.

34. Force Majeure. Whenever a day is appointed herein on which, or a period of time is appointed within which, either party hereto is required to do or complete any act, matter or thing (other than the payment of Rent or other sums), the time for the doing or completion thereof shall be extended by a period of time equal to the number of days on or during which such party is prevented from, or is interfered with, the doing or completion of such act, matter or thing because of strikes, lock-outs, embargoes, unavailability of labor or materials, wars, insurrections, rebellions, civil disorder, declaration of national emergencies, acts of God, or other causes beyond such party's reasonable control.

35. Amendment. This Lease and the exhibits attached hereto and forming a part hereof set forth all the covenants, promises, agreements, conditions and understandings between Lessor and Lessee concerning the Premises, and there are no covenants, promises, agreements, conditions or understandings, either oral or written, between them other then are herein set forth. Except as herein otherwise provided, no subsequent alteration, amendment, change or addition to this Lease shall be binding upon Lessor or Lessee unless reduced to writing and signed by them.

36. Lessee Improvements. Lessee shall provide Lessor with written notice of the date when Lessee has obtained a Certificate of Need from the Washington Department of Health (the "CON") that Lessee deems acceptable (such notice is hereinafter referred to as the "Notice to Proceed"). Lessee shall construct its Lessee improvements to the Premises (the "Lessee Improvements") after Lessee receives the Notice to Proceed. Lessee shall contract for the installation of the Lessee Improvements with a contractor of choice. Lessor and Lessee shall mutually approve the plans and specifications of the Lessee Improvements prior to the commencement of work. Lessor shall not charge Lessee any fee or other charges for the supervision and/or overhead associated with the construction of the Lessee Improvements. Notwithstanding the foregoing, Lessee Improvements shall not include the work involved with bringing electrical and water utilities to a point in the Premises designated by Lessee and for the separate metering for said utilities, provided, Lessee represents that the points of connection existing as of the Possession Date for all utilities are acceptable. All Lessee Improvements shall be done in a good and workmanlike manner and in compliance with all applicable laws, ordinances, building and safety codes, regulations and orders of the federal, state, county, or other governmental authorities having jurisdiction thereof. Without in any way limiting any obligation of Lessee under the Lease, Lessee shall indemnify, defend and hold harmless Lessor from and against claims, damages, losses and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Lessee Improvements. If Lessee makes any alterations or improvements in the Premises, Lessee must pay for same when made. Nothing in the Lease shall be construed to authorize Lessee or anyone dealing with or under Lessee, to charge the rents of the Premises, or the property of which the Premises form a part, or the interest of Lessor in the estate of the Premises, or any person under and through whom Lessor has acquired its interest in the estate of the Premises, with a mechanic's lien or encumbrance of any kind, and under no circumstances shall Lessee be construed to be the agent, employee or representative of Lessor in the making of any such alterations or improvements to the Premises. If a mechanic's or materialmen's lien is threatened by any contractor or supplier, or in the event of the filing of a notice of any such lien, Lessee will promptly pay same and take steps immediately to have same removed. If the lien is not removed within ten (10) days from the date of written notice from Lessor, Lessor shall have the right at Lessor's option to cause the same to be discharged by record of payment, deposit, bond or order of a court of competent jurisdiction or otherwise, or to pay any portion thereof and of the amounts so paid, including reasonable attorneys' fees and reasonable expenses connected therewith, together with interest on all of the foregoing at the Interest Rate, shall be additional rent due from Lessee to Lessor and shall be paid to Lessor immediately upon rendition to Lessee of bill. Lessee will provide insurance certificates from Lessee's general contractor performing Lessee Improvements.

37. Intentionally Deleted.

38. Lessor's Sale of the Shopping Center. Lessor may, at any time, without the prior consent of Lessee, contract to and/or perform any of the following transactions with respect to an interest in Lessor, the Lease, the Premises, the realty underlying the Premises, and/or any portion of or interest in the realty or improvements owned or hereafter acquired by Lessor: sale, purchase, exchange, transfer, assignment, lease, conveyance (collectively referred to herein as "Sale"); and/or encumbrance, pledge, mortgage, deed of trust, hypothecation or sale and leaseback transaction (collectively referred to herein as "Mortgage"). From and after a Sale,

Lessor shall be released from all liability to Lessee and Lessee's successors and assigns arising from this Lease because of any act, occurrence or omission of Lessor occurring after such Sale, and Lessee shall look solely to Lessor's successor in connection with the same; provided however, that Lessor shall not be released from liability to Lessee and Lessee's successors and assigns from this Lease because of any act, occurrence or omission of Lessor occurring prior to such Sale, unless such liability is expressly assumed by Lessor's successor-in-interest in the Shopping Center. Within thirty (30) days following the effective date of a Sale, Lessor shall notify Lessee whether Lessor's successor in interest and assignee to this Lease would or would not be a Referral Source as described in Section 22 above.

39. Lessee's Satellite and Cable Rights. Lessee shall have the right to place a satellite dish on the roof and run appropriate electrical cabling from the Premises to such satellite dish and/or install cable service to the Premises at no additional fee; provided, Lessor shall have the right to approve the location and method of installation thereof, which approval Lessor shall not unreasonably withhold. Lessor's roof consultant may supervise the installation of the communication equipment by Lessee's contractor so as not to invalidate any then effective roof warranty for the building provided Lessor and/or such consultant shall not be entitled to any supervision fee. Lessee shall remove any such communication equipment at the end of the Term. Lessee shall repair any damage caused by such installation, maintenance, repair, replacement and removal, or otherwise caused by such communication equipment. Lessee shall indemnify Lessor for any impairment to Lessor's roof warranty arising out of Lessee's installation of said communications equipment. Lessor shall reasonably cooperate with Lessee's satellite or cable provider to ensure there is no delay in acquiring such services.

40. Regulatory Compliance. In the event Lessor, or Lessor's successors or assigns become a Referral Source as described in Section 0 above, this Section 40 shall apply **BUT SHALL HAVE NO EFFECT UNLESS AND UNTIL SUCH TIME:**

40.1 Referral Source. Lessor and Lessee hereby acknowledge and agree that it is not a purpose of this Lease or any of the transactions contemplated herein to exert influence in any manner over the reason or judgment of any party with respect to the referral of patients or business of any nature whatsoever. It is the intent of the parties hereto that any referrals that may be made directly or indirectly by Lessor to Lessee's business, shall be based solely upon the medical judgment and discretion of a patient's physician while acting in the best interests of the patient. Lessor and Lessee hereby agree that the Rent and any increases in the Rent reflect fair market value and do not take into account the volume or value of referrals or business that may otherwise be generated between the parties for which payment may be made in whole or in part under Medicare, Medicaid or other Federal health care programs.

40.2 Termination Due to Legislative or Administrative Changes. In the event that there shall be a change in applicable health care law or the interpretation thereof, including, without limitation, Medicare or Medicaid, statutes, regulations, or general instructions, (or the application thereof), the adoption of new legislation or regulations applicable to this Lease, the implementation of a change in payment methodology in any material third party payor reimbursement system, or the initiation of an enforcement action with respect to any applicable health care law, any of which affects the continuing legality of this Lease, then either party may,

by notice, propose an amendment to conform this Lease to applicable laws. If notice of such proposed change is given and the parties hereto are unable to agree within ninety (90) days upon an amendment, then either party may terminate this Lease by ten (10) days' advance written notice to the other party, unless a sooner termination is required under applicable law or circumstances.

40.3 Exclusions. During the term of this Lease, Lessor shall notify Lessee of any exclusion of Lessor or its affiliates from participation in any federal health care program, as defined under 42 U.S.C. §1320a-7b (f), for the provision of items or services for which payment may be made under such federal health care programs ("Exclusion") within two (2) business days of learning of any such Exclusion or any basis therefore. Lessee shall have the right to immediately terminate this Lease and any and all other agreements between Lessor and its affiliates on the one hand and Lessee and its affiliates on the other hand, upon learning of any Exclusion or any reasonable basis therefore against the other, its affiliates and/or any employee, contractor or agent engaged by any of them to provide items or services.

40.4 Medicare Access to Books and Records. In the event, and only in the event, that Section 952 of P.L. 96-499 (42 U.S.C. Section 1395x(v)(1)(I)) is applicable to this Lease, Lessee and Lessor agree as follows: (a) until the expiration of four years after the termination of this Lease, Lessor shall make available, upon written request by the Secretary of the federal Department of Health and Human Services or upon request by the Comptroller General of the United States, or any of their duly authorized representatives, this Lease, and books, documents and records of Lessor that are necessary to certify the nature and extent of the costs incurred pursuant to this Lease; (b) if Lessor carries out any of the duties of this Lease or other contract between the parties through a subcontract, with a value or cost of $10,000 or more over a twelve-month period, with a related organization, such subcontract shall contain a clause to the effect that until the expiration of four years after the furnishing of such services pursuant to such subcontract, the related organization shall make available, upon written request to the Secretary of the federal Department of Health and Human Services or upon request to the Comptroller General of the United States, or any of their duly authorized representatives, the subcontract, and books, documents and records of such organization that are necessary to verify the nature and extent of the costs incurred pursuant to such subcontract; and (c) Lessor shall notify Lessee immediately of the nature and scope of any request for access to books and records described above and shall provide copies of any books, records or documents to Lessee prior to the provision of same to any governmental agent to give Lessee an opportunity to lawfully oppose such production of documents if Lessee believes such opposition is warranted. In addition, Lessor shall indemnify and hold Lessee harmless from any liability arising out of any refusal by Lessor to grant access to books and records as required above. Nothing herein shall be deemed to be a waiver of any applicable privilege (such as attorney client privilege) by Lessee.

40.5 Medical Director or Other Agreements. In the event of the termination of any existing medical director or other agreement between Lessee, or any of its parent company, affiliates, or subsidiaries and Lessor, its affiliates or any person, corporation, partnership or other entity which owns or controls, directly or indirectly any of the business or assets of Lessor, including an immediate family member, Lessee shall have the right to terminate this Lease upon written notice to Lessor.

40.6 Representations and Warranties of Lessee. Lessee represents and warrants to Lessor as follows:

(a) Non-Exclusion. Neither Lessee nor any of its affiliates are excluded from participation in any federal health care program, as defined under 42 U.S.C. §1320a-7b (f), for the provision of items or services for which payment may be made under such federal health care programs; and

(b) Business Terms. To Lessee's knowledge: (i) the Premises do not exceed that which is reasonable and necessary for the legitimate business of Lessee; (ii) Lessee's Proportionate Share does not exceed Lessee's pro-rata share of expenses for the Premises and common areas based upon the total Shopping Center Rentable Area; and (iii) the rental charges: (1) are set in advance, (2) are consistent with fair market value, (3) do not take into account the volume or value of any referrals or other business generated between the parties, nor do they include any additional charges attributable to the proximity or convenience of Lessor as a potential referral source; and (4) would be commercially reasonable even if no referrals were made between Lessee and Lessor or their respective affiliates.

40.7 Representations and Warranties of Lessor. Lessor represents and warrants to Lessee as follows:

(a) Non-Exclusion. Neither Lessor nor any of its affiliates (i) are excluded from participation in any federal health care program, as defined under 42 U.S.C. §1320a-7b (f), for the provision of items or services for which payment may be made under such federal health care programs; or (ii) have arranged or contracted (by employment or otherwise) with any employee, contractor or agent that Lessor or its affiliates know or should know are excluded from participation in any federal health care program;

(b) Advisory Opinion. Lessor shall not, directly or indirectly, request or cause an Advisory Opinion to be requested regarding or relating to the legality of this Lease or the transactions contemplated hereunder or substantially similar circumstances from any governmental body, including without limitation the U.S. Department of Health and Human Services Office of Inspector General or the Centers for Medicare and Medicaid Services without the prior written concurrence of Lessee, whether pursuant to this Section or otherwise. All submissions of any nature in connection with an Advisory Opinion request shall be approved in writing by Lessee prior to submission; and

(c) Business Terms. To Lessor's knowledge: (i) the Premises do not exceed that which is reasonable and necessary for the legitimate business of Lessee; (ii) Lessee's Proportionate Share does not exceed Lessee's pro-rata share of expenses for the Premises and common areas based upon the total Shopping Center Rentable Area; and (iii) the rental charges: (1) are set in advance, (2) are consistent with fair market value, (3) do not take into account the volume or value of any referrals or other business generated between the parties, nor do they include any additional charges attributable to the

proximity or convenience of Lessee as a potential referral source, and (4) would be commercially reasonable even if no referrals were made between Lessee and Lessor or their respective affiliates.

41. Cooperation with Lessee's Cost Reporting Responsibilities. Lessor's reasonable cooperation with applicable authorities in connection with cost reporting is essential for Lessee's continued operation of its business. Therefore, Lessor agrees to provide to Lessee, within thirty (30) days of Lessee's request, any and all information that is reasonably necessary for Lessee to fulfill its cost reporting requirements to such applicable authorities.

42. Protected Health Information.

42.1 Lessor acknowledges and agrees that from time to time during the Term, Lessor, its representatives or assigns may be exposed to, or have access to, Protected Health Information ("PHI"), as defined by HIPAA, 45 CFR Parts 160 and 164. Lessor agrees that it will not use or disclose PHI for any purpose unless required by a court of competent jurisdiction or by any governmental authority in accordance with the requirements of HIPAA and all other applicable medical privacy laws.

42.2 Lessor shall not, without first obtaining Lessee's prior written consent or as required by a court of competent jurisdiction, disclose to any person or organization, or use for its own benefit, any PHI during and after the Lease Term, unless such PHI is required to be disclosed by a court of competent jurisdiction or by any governmental authority.

42.3 Lessor shall preserve any "Confidential Information" of or pertaining to Lessee and shall not, without first obtaining Lessee's prior written consent, disclose to any person or organization any Confidential Information or of pertaining to Lessee during and for a period of two (2) years after the Lease Term, unless such Confidential Information is required to be disclosed by a court of competent jurisdiction or any governmental authority. Confidential Information does not include any information that (i) is already lawfully in possession of Lessor, (ii) at the time of disclosure or thereafter is generally available to the public through no fault of Lessor, (iii) is available to Lessor on a nonconfidential basis from a source other than Lessee or its advisors, provided that such source was not known by Lessor to be bound by a confidentiality agreement, or (iv) is independently acquired or developed by Lessor without violating any provision of this Lease. As used herein, the term "Confidential Information" shall mean any business, financial personal or technical information relating to the business or other activities of Lessee (but not the business terms of the Lease) that Lessor obtains in connection with this Lease, provided, however, Lessor has the right to reveal such Confidential Information to mortgagees, prospective purchasers, attorneys, accounts and such other professionals engaged by Lessor (and agents in such regard) and to Lessor's own managerial and administrative staff, provided however, that such parties shall agree to keep confidential all Confidential Information contemplated herein.

43. Lessor's Consent. Unless otherwise expressly stated herein, whenever Lessor's consent is required under this Lease, such consent shall not be unreasonably withheld or delayed.

44. Approval by DaVita Inc. as to Form. The parties acknowledge and agree that this Lease shall take effect and be legally binding upon the parties only upon full execution hereof by the parties and upon approval by DaVita Inc. as to the form hereof which is evidenced by the signature block and will be delivered prior to Lessor's execution.

45. Counterparts. This Lease may be executed in any number of counterparts via facsimile or electronic transmission or otherwise, each of which shall be deemed an original and all of which together shall constitute one and the same instrument.

46. Lessee's Early Termination Option. This Lease is contingent upon Lessee obtaining a CON that it deems acceptable in its reasonable opinion. Lessee may, at any time on or before the last day of the thirty-sixth (36th) month following the Effective Date (the "CON Termination Deadline"), at its sole discretion, terminate this Lease ("Termination Right") by providing Lessor with thirty (30) days prior written notice and the parties hereto shall be released from all liability hereunder as of the effective date of the termination notice except as set forth in this Section 46. Should Lessee so elect to terminate this Lease prior to the expiration of the thirty-sixth (36^{th}) month following the Effective Date, Lessee shall pay Lessor an amount equal to the unamortized portion of the out of pocket costs Lessor proves that it has incurred (as reasonably confirmed by Lessor) for this Lease, including, but not limited to legal fees, unamortized brokerage commissions, and architectural, engineering and construction costs (collectively, the "Reimbursement Amount"), and Lessor shall be entitled to retain any Holding Fees and Rent accrued prior to the effective date of such early termination. Except for Reimbursement Amount and accrued Holding Fees and Rent described in the previous sentence, there shall be no early termination fee due to Lessor for exercising such Termination Right. Notwithstanding the foregoing, in the event Lessee provides Lessor with the Notice to Proceed, but elects to terminate this Lease prior to the CON Termination Deadline (on or before thirty-six (36) months following the Effective Date), Lessee shall (i) pay Lessor the Reimbursement Amount; (ii) forfeit any Holding Fees and Rent accrued prior to the effective date of such early termination; and (iii) pay Lessor an amount equal to three (3) months Rent at the then current rate. No such termination hereunder shall be effective unless Lessee pays to Lessor the sums due hereunder on or before the effective date of the termination notice. Lessee represents, warrants and agrees that it has not and shall not, nor has or shall any affiliate of Lessee or DaVita Inc., apply for a CON within the Service Area (as such term is commonly used by the State of Washington Department of Health) within which the Premises is located, prior to the CON Termination Deadline.

47. Press Releases and Public Statements. Neither Lessor nor Lessee shall, without the prior written approval of the other party, issue, or permit any agent or affiliate of it to issue, any press releases or otherwise make, or cause any agent or affiliate of it to make, any public statements with respect to this Lease and/or the transactions contemplated hereunder, except where such release or statement is deemed in good faith by the releasing party to be required by applicable law or under the rules and regulations of the NASDAQ or NYSE (or other public stock exchange of similar reputation and standing) on which the shares of such party or any of its affiliates are listed. In each case to which such exception applies, the releasing party will use its reasonable best efforts to provide a copy of such release or statement to the other party prior to releasing or making the same.

48. Rights Reserved by Lessor. All of the following rights are reserved by Lessor, each of which Lessor may (but without obligation to) exercise without notice or liability to Lessee. The exercise of such rights by Lessor shall not be deemed an eviction, disturbance or disruption of Lessee's use or possession of the Premises.

48.1. Easements. So long as they do not materially adversely affect Lessee's use of, access to, or visibility of the Premises, Lessor expressly reserves all rights in and with respect to the land hereby leased, including (without in any way limiting the generality of the foregoing) the rights of Lessor to establish common areas and grant parking easements to others and to grant, in Lessor's sole discretion, easements to others (even before the establishment of common areas) for the purpose of installing, using, maintaining, renewing and replacing such overhead or underground water, gas, sewer and other pipe lines, and telephone, electric, and power lines, cables and conduits.

48.2. Inspection, Repair, Installation. Lessor reserves the right to, at all reasonable times, by itself or its duly authorized agents, employees and contractors to go upon and inspect the Premises (subject to the terms of this Lease) and every part thereof, to enforce or carry out the provisions of this Lease, at its option to make repairs, alterations and additions to the Premises or the building of which the Premises are a part, to perform any defaulted obligation of Lessee or for any other proper purposes. Lessor also reserves the right, upon forty eight (48) hours' notice to Lessee, to install or place upon, or affix to the roof and exterior walls of the Premises, equipment, signs, displays, antenna, cables and any other object or structure of any kind, provided the same shall not materially impair the structural integrity of the building or interfere with Lessee's occupancy nor day to day business operations.

49. Jury Waiver. Lessor and Lessee waive their right to trial by jury in any action, proceeding, or counterclaim brought by either of them against the other, or with respect to any issue or defense raised therein, including the right to an advisory jury (except for personal injury and property damage), on any matters whatsoever arising out of, or in any way connected with this Lease, the relationship of Lessor and Lessee, Lessee's use and occupancy of the Premises including summary proceeding and possession actions, any emergency statutory or other statutory remedy.

50. Rents From Real Property. Lessor and Lessee hereby agree that it is their intent that all Rent and other charges payable to the Lessor under this Lease shall qualify as "rents from real property" within the meaning of Section 856(d) of the Internal Revenue Code, as amended, (the "Code") and the Department of the U.S. Treasury Regulations promulgated thereunder (the "Regulations"). Should the Code or the Regulations, or interpretations thereof by the Internal Revenue Service contained in revenue rulings or other similar public pronouncements, be changed so that any Rent no longer so qualifies as "rent from real property" for purposes of Section 856(d) of the Code and Regulations, or any successor provision thereto, then the parties agree to execute such further instrument as may reasonably be required by the Lessor in order to give effect to the foregoing provisions of this Section

51. Independent Covenants. The covenants of Lessee to pay Rent and any and all other amounts payable by Lessee pursuant to the terms of this Lease are independent covenants, and Lessee shall not have the right to hold back, offset, or fail to pay any such amounts for

default by Lessor or any other reason whatsoever, except as specifically provided under this Lease.

52. Governing Law. The laws of the State in which the Premises are located shall govern the validity and enforceability of this Lease. Jurisdiction and venue shall be deemed valid and appropriate in the county and state where the Shopping Center is located.

53. Partial Invalidity. If any term, covenant or condition of this Lease or the application thereof to any person or circumstance shall to any extent, be invalid or unenforceable, the remainder of this Lease, or the application of such term, covenant or condition to persons or circumstances other than those as to which it is held invalid or unenforceable shall not be affected thereby and each term, covenant or condition of this Lease shall be valid and be enforced to the fullest extent permitted by law.

[Signature Page Follows]

IN TESTIMONY WHEREOF, Lessor and Lessee have caused this Lease to be executed as a sealed instrument, effective as of the day and year first above written.

FORM W-9

Form **W-9**
(Rev. January 2011)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Give Form to the requester. Do not send to the IRS.

Print or type
See Specific Instructions on page 2.

Name (as shown on your income tax return)
Retail Properties of America, Inc.

Business name/disregarded entity name, if different from above
Inland Western Marysville, L.L.C.

Check appropriate box for federal tax classification (required): ☐ Individual/sole proprietor ☑ C Corporation ☐ S Corporation ☐ Partnership ☐ Trust/estate

☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=partnership) ▶

☐ Other (see instructions) ▶

☐ Exempt payee

Address (number, street, and apt. or suite no.)
2901 Butterfield Road

Requester's name and address (optional)

City, state, and ZIP code
Oak Brook, Illinois 60523

List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on the "Name" line to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Social security number: ___ - ___ - ____

Employer identification number: 42-1579325

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. citizen or other U.S. person (defined below).

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions on page 4.

Sign Here Signature of U.S. person ▶ Ann M. Sharp Assistant Vice President and Assistant Secretary Date ▶ May 2, 2012

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

FORM OF ESTOPPEL CERTIFICATE

THIS ESTOPPEL CERTIFICATE is made as of the ____ day of _____, 200___ by _____ ("Lessee") in connection with that certain Lease Agreement dated _____ by and between Lessee and _____, as Lessor (the "Lease") for the premises located at _____ (the "Premises").

Lessee hereby certifies to _____ as follows:

1. A true and correct copy of the Lease together with all amendments is attached hereto as Exhibit "A". There are no other oral or written agreements or understandings between Lessor and Lessee relating to the Premises.

2. The information set forth below is true and correct as of the date hereof:

   (a) Approximate square footage of the Premises: _____ rentable square feet
   (b) Monthly installment of Rent as of the date hereof: $_____
   (c) Commencement Date: _____.
   (d) Termination date: _____
   (e) Security deposit: _____
   (f) Prepaid rent in the amount of: _____
   (g) Renewal Options: _____

3. Lessee has accepted possession of the Premises and is in occupancy thereof under the Lease. As of the date hereof, the Lease is in full force and effect.

4. To the best of Lessee's actual knowledge and belief, without inquiry or investigation, there exists no default, no facts or circumstances exist that, with the passage of time or giving of notice, will or could constitute a default, event of default, or breach on the part of either Lessee or Lessor.

5. No rent has been or will be paid more than thirty (30) days in advance.

6. Lessee has no right of first refusal, option, or other right to purchase the Shopping Center or any part thereof, including, without limitation, the Premises.

[Signature page follows]

IN WITNESS WHEREOF, Lessee has executed this Estoppel Certificate as of the date first above written.

EXHIBIT G-1

SIGNAGE CRITERIA

Basic Criteria Governing Signs:

Tenant signs must be kept clean and in good operating condition. It is recommended that each tenant develop a maintenance program to assure that its sign(s) will always appear inviting to customers and enhance the overall appearance of the Shopping Center.

I. APPROVALS

1. Each tenant must submit its sign(s) to Lessor for review and approval prior to the filing of an application for a sign permit(s).

2. Each tenant shall be responsible for the costs of obtaining all permit(s) for its sign(s), and for the costs of manufacturing and installing its sign(s).

3. In addition to obtaining the approval of Lessor, a tenant must ensure that all of its signs are in conformance with local sign ordinances and codes.

4. All sign vendors and contractors must be approved by Lessor, and approved sign vendors and contractors must submit required insurance to Lessor prior to commencing any sign work at the Shopping Center.

II. MANUFACTURING

1. All wiring, transformers, ballasts and other necessary equipment shall be concealed.

2. All work shall be done in a workmanlike manner and approved by Lessor.

3. The responsible tenant, at that tenant's sole cost and expense, and to Lessor's satisfaction and approval, shall repair any damage to the fascia.

4. Upon vacating its leased premises, a tenant shall remove its sign(s) and restore the fascia to its original condition. This shall be done at the tenant's sole cost and expense, and to the satisfaction and approval of Lessor.

III. ALLOWABLE SIGN LOCATION

1. One sign per tenant may be located on the fascia of the Shopping Center.

2. Fascia signs shall be centered with respect to the tenant's total store frontage.

3. The tenant's entire copy and graphics must be located within the boundaries of the "designated sign area," as designated by Lessor.

IV. ALLOWABLE SIGN STYLES

1. Fascia signs shall be individually formed metal channel letters and graphics.

2. Letters and graphics must be covered with acrylic faces.

3. All canopy and graphics shall be internally illuminated with neon.

4. Aluminum returns or sides of letters and graphics shall be Lacyral 20-313E Duranodic, or equivalent, with a 4-inch (4") depth. Lessor must approve substitutions.

5. The tenant's copy and graphics shall be mounted entirely on a raceway that matches the color of the fascia on which it is located. Lessor will specify these colors.

V. ALLOWABLE SIGN SIZE

1. The length of a tenant's sign will be limited to seventy-five percent (75%) of the tenant's sign panel.

2. A tenant shall be allowed up to two (2) square feet of sign face for each linear foot of the tenant's store frontage, but not to extend higher than the sign panel.

3. Letter sizes shall be as follow:

   (a) for store fronts up to thirty feet (30'): capital letters shall be twenty-four inches (24"), and lower case letters shall be eighteen inches (18");

   (b) for store fronts ranging from thirty feet (30') up to sixty feet (60'): capital letters shall be thirty inches (30"), and lower case letters shall be twenty-four inches (24").

VI. GENERAL REQUIREMENTS

1. No sign shall be placed in other than the "designated sign area," as designated by Lessor.

2. No sign perpendicular to the face of any building shall be permitted.

3. No roof-mounted sign of any kind shall be permitted.

4. No flashing, moving, or audible signs or beacons shall be permitted.

5. No banners or flagpoles shall be permitted.

6. Trailer signs, portable signs or temporary signs shall not be permitted.

7. All transformers or electrical appurtenances shall be used.

8. No exposed conduit, tubing, neon tubing, conductors, transformers or electrical appurtenances shall be allowed.

9. Electrical service to all signs shall be provided from the Tenant's meter, and it shall be the responsibility of each tenant to hire an electrician approved by Lessor to perform all required electrical work.

10. Lessor shall approve design of raceway mounting devices.

11. A tenant shall be responsible for repair of any damages to the building caused by the installation of its sign(s).

12. All signs shall be fully lighted and operational from a minimum of dusk until 2:00 a.m., Monday through Sunday (seven days a week).

EXHIBIT G-2

LESSEE'S APPROVED SIGNAGE

EXHIBIT H

SHOPPING CENTER EXCLUSIVE USES AND PROHIBITED USES

Plaza at Marysville
(6026)
Exclusive Uses

Safeway, Inc. (Office lease 07.06.01)
No exclusive use rights.

Don and Dorothy Jensen d/b/a Alpha Denture Clinic (07.10.96)
5.3. No business in the Shopping Center except Tenant shall be devoted to the manufacture, fitting, and repair of dentures. This exclusive shall not apply to the building marked Pad 1, Pad 2, Pad 3, and Pad 4 on Exhibit A, or to the building marked "Safeway Store" or to any retail space occupying over twelve thousand (12,000) square feet or to spaces leased prior to the date of this Lease. This exclusive shall not restrict the use of any portion of the Shopping Center for grocery supermarket or for general dentistry.

Brandon J. Stokes, LLC d/b/a The Sun Factory (10.07.08)
Rider R-1. Landlord covenants and agrees that during the Term, as such terms may be extended pursuant to the provisions of the Lease, Tenant has the exclusive right ("Tenant's Exclusive Right") in the Shopping Center to the use of the Premises for the following purposes: the operation of a tanning salon ("Tenant's Exclusive Use").

Tenant's Exclusive Right is subject to the following express limitations:

A. Tenant acknowledges that the use clauses in the existing tenants' leases do not violate Tenant's Exclusive Right;

B. Tenant's Exclusive Right shall only limit competing uses that are the primary business of competing tenants and shall not be construed as prohibiting ancillary uses of such competing tenants (for the purposes hereof, a use which generates less than twenty-five percent (25%) of tenants' annual gross revenues shall be considered an ancillary use);

C. Tenant's Exclusive Right shall only be effective so long as Tenant continuously operates its exclusive business in the entire Premises;

D. Any lease of space for the greater of two times the square footage of the premises or 5,000 square feet in the Shopping Center is excluded from the Tenant's Exclusive Right set forth herein;

E. Tenant's Exclusive Right shall automatically terminate and be of no further force or effect upon the occurrence of an event of default by Tenant;

F. Tenant's Exclusive Right automatically shall terminate and shall be of no further force or effect upon the sublease by Tenant of the Premises or any part thereof (unless otherwise agreed to by Landlord in writing at the time of Tenant's request for Landlord's consent to such a sublease, which may be withheld in Landlord's sole discretion), or the assignment of Tenant's interest under this Lease (unless otherwise agreed to by Landlord in writing at the time of Tenant's request for Landlord's consent to such an assignment, which may be withheld in Landlord's sole discretion); and

G. Tenant's Exclusive Right automatically shall terminate and shall be of no further force or effect upon the failure of Tenant to timely or properly exercise its rights to renew the Term as provided in 3.1.(B) of this Lease.

Randy L. Werther d/b/a Mailbox Junction (06.25.96) [Patrick and Pamela Enloe assigned]
5.6. No business except Tenant shall engage primarily in postal shipping services and copying services. This exclusive shall not apply to the building marked Pad 1, Pad 2, Pad 3, and Pad 4 on Exhibit A, or to the building marked "New Safeway Store" or to any retail space occupying over six thousand (6,000) square feet or to spaces leased prior to the date of this Lease.

Games Workshop Retail, Inc. d/b/a Games Workshop (07.27.07)
No exclusive use rights.

Edward D. Jones & Co. d/b/a Edward Jones (06.02.03)
No exclusive use rights.

American Family Mutual Insurance Company d/b/a American Family (09.26.07)
No exclusive use rights.

Brian Nishikawa and Gary Tuomisto d/b/a Alderwood Auto Glass (06.05.95)
5.3. Tenant shall have the exclusive right to conduct an auto glass installation and repair business within the Shopping Center, excluding the building marked Pad 2 on Exhibit A.

Dollar Tree Stores, Inc. d/b/a Dollar Tree (11.06.09)
14. Landlord hereby agrees as follows:

a. Tenant shall have an exclusive for a single price point variety retail store ("Exclusive" or "Exclusive Use"). A single price point variety retail store is hereby defined as a store that offers all of its merchandise for sale at a single price point.

b. In addition, Landlord will not permit any other occupant in the Shopping Center to operate the following without Tenant's consent and such consent shall be in
Tenant's sole and absolute discretion:

(1) a retail store whose "principal business" (hereinafter defined) is selling variety retail merchandise at a single price point; and/or

(2) variety retail operations with the word "Dollar", in their trade name.

For the purpose of this Section, "principal business" shall be defined as selling such merchandise in twenty-five percent (25%) or more of the sales floor area (including one-half (1/2) of the adjacent aisle space).

Notwithstanding the foregoing, this A.14. shall not apply to (1) any tenant or occupant selling single price point apparel as its principal business, or (2) any current occupant, tenant or any future assignee or sublessee of any existing lease, as the may be renewed or extended, of the Shopping Center who is operating under their current use clause or trade name as of the date of this Lease; provided, however, in the event Landlord's consent is required for a change in permitted use or trade name, Landlord shall not consent to a change of any tenant's use or trade name which would violate the provisions of A.14. a and A.14. b above.

Rent-a-Center West, Inc. d/b/a Rent-a-Center (06.17.03)
Exclusive expired.

General Nutrition Corporation d/b/a GNC or General Nutrition Center (11.27.95)
Exhibit G Rider. 3. Landlord agrees not to lease space in the center of any tenant whose primary business is the sale of vitamins, health foods, and related items. This provision shall not restrict the sale of vitamins, health foods or related items by Safeway, InterWest Bank, or any "Anchor Tenant" in the Center (defined as a tenant occupying more than eight thousand (8,000) contiguous square feet of space) or the subtenants, licensees or concessionaires of any of the foregoing.

Safeway, Inc. d/b/a Safeway (07.06.01)
22.1. Tenant will be the sole seller in the Shopping Center of (i) food for off-premises consumption, (ii) alcoholic beverages for off-premises consumptions, (iii) pet foods, and (iv) merchandise which, under the laws of the State of Washington is requires to be dispensed by or under the supervision of a registered or licensed pharmacist.

22.2. Landlord further recognizes that (i) Tenant shall have the sole and exclusive right in the Shopping Center to sell food for off-premises consumption, alcoholic beverages for off-premises consumption, pet foods, and prescription pharmacy merchandise and (ii) no store other than Tenant's store shall sell, or be permitted by Landlord to sell, food for off-premises consumption, alcoholic beverages for off-premises consumption, pet food, and/or prescription pharmacy merchandise. Notwithstanding the preceding sentence, stores other than Tenant's store may devote up to, but not more than, the lesser of (i) one thousand five hundred (1,500) square feet of sales area (including aisle space adjacent thereto), or (ii) sales area (including aisle space adjacent thereto) of up to ten percent (10%) of the total square footage of the store, to the sale of food for off-premises consumption. Furthermore, the provisions of this Section shall not be deemed to prohibit a restaurant (fast food or sit-down) from selling alcoholic

beverages and/or food prepared on premises for off-premises consumption, subject, however, to the provisions of 12.2.

[Note: 13.2. Landlord hereby grants Tenant a right of first offer to lease all or a portion of the Expansion Area on the terms and conditions set forth in this 13.]

Penquin, Inc. d/b/a Marysville Daycare & Learning Center (09.14.95)
No exclusive use rights.

Boeing Employees' Credit Union (08.14.08)
Rider R-1. Tenant has the exclusive right ("Tenant's Exclusive Right") in the Shopping Center to the use of the Premises for the primary purpose of operating a credit union.

Tenant's Exclusive Right is subject to the following express limitations:

A. Tenant acknowledges that the use clauses in the existing tenants' leases do not violate Tenant's Exclusive Right;

B. Tenant's Exclusive Right shall only limit competing uses that are the primary business of competing tenants and shall not be construed as prohibiting ancillary uses of such competing tenants;

C. Tenant's Exclusive Right shall only be effective so long as Tenant continuously operates its exclusive business in the entire Premises;

D. Any lease of space for the greater of two times the square footage of the premises in the Shopping Center is excluded from the Tenant's Exclusive Right set forth herein;

E. Tenant's Exclusive Right shall automatically terminate and be of no further force or effect upon the occurrence of an event of default by Tenant.

F. Tenant's Exclusive Right automatically shall terminate and shall be of no further force or effect upon the sublease by Tenant of the Premises or any part thereof (unless otherwise agreed to by Landlord in writing at the time of Tenant's request for Landlord's consent to such a sublease, which may be withheld in Landlord's sole discretion), or the assignment of Tenant's interest under this Lease (unless otherwise agreed to by Landlord in writing at the time of Tenant's request for Landlord's consent to such an assignment, which may be withheld in Landlord's sole discretion).

G. Tenant's Exclusive Right automatically shall terminate and shall be of no further force or effect upon the failure of Tenant to timely or properly exercise its rights to renew the Term as provided in 3.1.(B) of this Lease.

American General Finaucial Services, Inc. d/b/a American General (10.11.04) [Vacated]
Addendum. Except for current leases and any extensions or renewal of their lease, Lessor agrees not to rent, lease, or to permit to be sublet any space of the building or shopping center in which the premises are located during the term of or any renewal or extension of this lease or during any period that Lessee may occupy the premises as a lessee from month to month, to a tenant who's use is similar to the use of American General Financial as described in 1.7. A. [Tenant shall use the premises for the operation of a consumer lending office with related financial services.]

Supercuts, Inc. d/b/a Supercuts (06.21.95)
5.4. Tenant shall have the exclusive right within the Shopping Center to conduct a business whose principal activity is the retail sale of cosmetology products and services. This exclusive shall not apply to the building marked Pad 2 on Exhibit A, or to Willoughby's Beauty Products or any assignee or sublessee of Willoughby's Beauty Products. This exclusive shall not restrict the use of any portion of the Shopping Center for a grocery supermarket, or for any other use which includes the sale of hair and beauty products or services as an incidental but not principal activity.

M2AD Management, Inc. d/b/a Papa Murphy's Take and Bake Pizza (03.15.96)
5.3. No business except Tenant shall engage in the sale of uncooked pizza, calzone, or lasagna for home consumption. This exclusive shall not apply to the buildings marked Pad 1, Pad 2, Pad 3, and Pad 4 on Exhibit A, or to the building marked "New Safeway Store" or to any retail space occupying over twelve thousand (12,000) square feet or to spaces leased prior to the date of this Lease. This exclusive shall not restrict the use of any portion of the Shopping Center for a grocery supermarket.

Sally Beauty Company, Inc. d/b/a Sally Beauty Supply (06.26.02)
Exclusive expired.

DJ Unionway, Inc. d/b/a Cigar Land (03.30.07)
No exclusive use rights.

Everett Clinic, P. S. d/b/a The Everett Clinic (02.05.99)
No exclusive use rights.

CCI Marysville LLC d/b/a Comcast Authorized Dealer (03.27.12)
Rider R-2. ... Landlord shall refrain from leasing other space in the Shopping Center for the following primary purposes: the sale of Comcast branded products and XFinity branded products ("Tenant's Exclusive Right").

Tenant's Exclusive Right is subject to the following express limitations:

A. Tenant acknowledges that the use clauses in the existing tenants' leases do not violate Tenant's Exclusive Right.

B. Tenant's Exclusive Right shall only limit competing uses that are the primary business of competing tenants and shall not be construed as prohibiting ancillary uses of such competing tenants.

C. Tenant's Exclusive Right shall only be effective so long as Tenant continuously operates its exclusive business in the entire Premises.

D. Any lease of space for 10,000 or more square feet in the Shopping Center is excluded from the Tenant's Exclusive Right set forth herein.

E. Tenant's Exclusive Right shall automatically terminate and be of no further force or effect upon the occurrence of an event of default by Tenant.

F. Tenant's Exclusive Right automatically shall terminate and shall be of no further force or effect upon the sublease by Tenant of the Premises or any part thereof (unless otherwise agreed to by Landlord in writing at the time of Tenant's request for Landlord's consent to such a sublease, which may be withheld in Landlord's sole discretion), or the assignment of Tenant's interest under this Lease (unless otherwise agreed to by Landlord in writing at the time of Tenant's request for Landlord's consent to such an assignment, which may be withheld in Landlord's sole discretion).

G. Tenant's Exclusive Right automatically shall terminate and shall be of no further force or effect upon the failure of Tenant to timely or properly exercise its rights to renew the Term as provided in 3.1.(B) of this Lease.

Safeway Inc. d/b/a Safeway Gas Bar (Ground 07.06.01)
14.1. Landlord covenants that: (i) Tenant shall have the sole and exclusive right in the Shopping Center to sell gasoline and other fuels for automobiles and other means of transport and (ii) no premises in the Shopping Center other than the Leased Premises shall sell, or be permitted by Landlord to sell, gasoline and other fuels for automobiles and other means of transport.

Homestreet Bank (06.02.99)
No exclusive use rights.

Son Ngoc Tran d/b/a Hi Tek Nails (06.08.06)
1.7. Tenant shall have the exclusive right within the Shopping Center to conduct a business whose principal activity is a nail salon and facial waxing. This exclusive shall not apply to any retail space occupying over 2,500 square feet of space or to spaces leased to prior tenants.

Plaza at Marysville
(6026)
Prohibited Uses

Safeway, Inc. Declaration (05.16.95)

4.1.1. The Shopping Center shall be used for the construction, operation and maintenance of business, commercial, professional and mercantile (retail and service) establishments as specified hereinafter and related facilities, including common and vehicular parking areas, all as more specifically described hereinafter. The Building Area shall be used for business, commercial, professional or mercantile purposes (retail and service) of the type usually carried on in a shopping center of comparable size and not prohibited by law or ordinance.

4.2.1. No portion of the Shopping Center shall be used by any Owner or any Owner's Tenants for (i) the conduct of any illegal, offensive, noisy, or dangerous trade, business activity or occupation, (ii) any activity which physically interferes with the business of any other Owner or Owner's tenants, or (iii) any other unreasonable use not compatible with the operation of a first-class retail and commercial shopping center, well maintained in accordance with the standards of this Declaration.

4.3.1.1. No part of the Shopping Center shall be devoted to the use or operation of any entertainment or recreation facility. As used herein, "entertainment or recreational facility" includes, without limitation, a theatre, carnival, bowling alley, skating rink, amusement center, electronic or mechanical games arcade, pool or billiard hall, betting parlor, bingo parlor, health or aerobic spa or studio, gym, massage parlor, pornographic shop, adult bookstore, nightclub, dance hall, tavern, cocktail lounge, any facility for the on-premises consumption of alcoholic beverages except as an incidental part of the operation of a full service restaurant, or other place of public or private amusement.

ECR by and between Safeway Inc., and Finn Associates, Ltd. (07.08.94)

4.2.1. No portion of the Shopping Center shall be used by any Owner or any Owner's Tenants for (i) the conduct of any illegal, offensive, noisy, or dangerous trade, business activity or occupation, (ii) any activity which physically interferes with the business of any other Owner or Owner's tenants, or (iii) any other unreasonable use not compatible with the operation of a first-class retail and commercial shopping center, well maintained in accordance with the standards of this Agreement.

4.3.1. No part of the Shopping Center shall be devoted to the use or operation of any electronic or mechanical games arcade, pool or billiard hall, betting parlor, pornographic shop, adult book store, nightclub, dance hall, tavern, cocktail lounge, or any facility for the on-premises consumption of alcoholic beverages except as an incidental part of the operation of a full service restaurant.

4.4.1. No part of Parcel II shall be used for a grocery supermarket, or for a convenience store (as exemplified by 7-11 or Quick Stop), or for the sale of any product which by law may be sold only by or under the supervision of a registered pharmacist.

Tenants

Safeway, Inc. d/b/a Safeway (07.06.01)

12.2. To safeguard Tenant's interest in a clean, quiet environment, free of obnoxious odors and to ensure adequate parking for Tenant's customers, Landlord covenants and agrees that, subject to the rights of occupants under Existing Leases (defined below) (i) within that portion of the Shopping Center within three hundred feet (300') of any wall defining the limit of the Leased Premises it shall not permit the operation of any restaurant (including any take-out, fast-food, cafeteria or full service sit-down restaurant) or any training or educational facility (defined below), and (ii) it shall not permit the use or operation of any portion of the Shopping Center for the purpose of any entertainment or recreational facility (defined below).

12.2.2. As used herein "training or educational facility" includes, without limitation, a beauty school, barber college, place of instruction, or any other operation catering primarily to students or trainees rather than to customers, but

excludes employee training by Shopping Center tenants incidental to the conduct of their businesses within the Shopping Center.

12.2.3. As used herein, "entertainment or recreational facility" includes, without limitation, a theater, carnival, bowling alley, skating rink, amusement center, electronic or mechanical games arcade, pool or billiard hall, betting parlor, bingo parlor, health or aerobic spa or studio, gymnasium, massage parlor, pornographic shop, adult book store, nightclub, dance hall, tavern, cocktail lounge, or any facility serving alcoholic beverages or allowing the on-premises consumption of alcoholic beverages, excepting only from this prohibition a full service restaurant serving alcoholic beverages as an incidental part of its food service operation (which restaurant nevertheless shall be subject to the restriction contained in item (i) of this Section).

American General Financial Services, Inc. d/b/a American General (10.11.04) [Vacated]
Addendum. Landlord agrees that it will not locate or permit to be located, during the term of this Lease and any option or extension periods, a nail or hair salon adjacent to the Tenant's location without the express written consent of the Tenant.

EXHIBIT I

LESSEE PROHIBITED USES

1. Funeral establishment;
2. Automobile sale, leasing, repair or display establishment or used car lot, including body repair facilities;

22. So called "head shop" which sells drug paraphernalia;
23. Skating or roller rink;
24. Car wash, car repair or car rental agency;
25. Second hand store, auction house, or flea market, Army/Navy-type store or governmental surplus;
26. Restaurant including, but not limited to, drive-in or drive-through restaurants;
27. Intentionally omitted; or
28. Intentionally omitted;
29. Lessee may not install an Automatic Teller Machine in or on the Premises without the express written consent of Lessor which consent Lessor may deny in its sole discretion.

EXHIBIT J

RULES AND REGULATIONS

1. Lessee shall advise and cause its vendors to deliver all merchandise before noon on Mondays through Fridays, not at other times.

2. All deliveries are to be made to designated service or receiving areas and Lessee shall request delivery trucks to approach their service or receiving areas by designated service routes and drives.

3. Tractor-trailers which must be unhooked or parked must use steel plates under dolly wheels to prevent damage to the asphalt paving surface. In addition, wheel blocking must be available for use. Tractor trailers are to be removed from the loading areas after unloading. No parking or storing of such trailers will be permitted in the Shopping Center.

4. Lessee shall not dispose of the following items in sinks or commodes: plastic products (plastic bags, straws, boxes); sanitary napkins; tea bags; cooking fats, cooking oils; any meat scraps or cutting residue; petroleum products (gasoline, naphtha, kerosene, lubricating oils); paint products (thinner, brushes); or any other item which the same are not designed to receive.

5. Lessee shall not permit or suffer any advertising medium to be placed on exterior walls or windows, on the sidewalks or on the parking lot areas or light poles. No permission, expressed or implied, is granted to exhibit or display any banner, pennant, sign and trade or seasonal decoration of any size, style or material within the Shopping Center, outside the Premises.

6. Lessee shall not permit or suffer the use of any advertising medium which can be heard or experienced outside of the Premises, including, without limiting the generality of the foregoing, flashing lights, searchlights, loud speakers, phonographs, radios, or television. No radio, television, or other communication antenna equipment or device is to be mounted, attached, or secured to any part of the roof, exterior surface, or anywhere outside the Premises, unless Lessor has previously given its written consent or except as specifically provided under the Lease.

7. Lessee shall not permit or suffer any portion of the Premises to be used for lodging or extended stay purposes.

8. Lessee shall not, in or on any part of the Common Area:

   a. Vend, peddle or solicit orders for sale or distribution of any merchandise, device, service, periodical, book, pamphlet or other matter whatsoever.
   b. Exhibit any sign, placard, banner, notice or other written material, except for activities as approved in writing by Lessor.
   c. Distribute any circular, booklet, handbill, placard or other material, except for activities as approved in writing by Lessor.
   d. Solicit membership in any organization, group or association or contribution for any purpose.
   e. Create a nuisance.
   f. Throw, discard or deposit any paper, glass or extraneous matter of any kind except in designated receptacles, or create litter or hazards of any kind.
   g. Deface, damage or demolish any sign, light standard or fixture, landscaping materials or other improvement within the Shopping Center, or the property of customers, business invitees or employees situated within the Shopping Center.

9. Lessee shall not locate furnishings or cabinets adjacent to mechanical or electrical access Panels or over air-conditioning outlets so as to prevent operating personnel from servicing such units as routine or emergency access may require. Cost of moving such furnishings for Lessor's access will be at Lessee's cost. The lighting and air-conditioning equipment of the Shopping Center will remain in the exclusive control of the building designated personnel.

10. Lessee shall comply with parking rules and regulations as may be posted and/or distribution from time to time.

11. Prior written approval, which shall be at Lessor's sole discretion, must be obtained for installation of window shades, blinds, drapes or any other window treatment of any kind whatsoever.

12. Lessee shall keep the Premises at a temperature compatible with comfortable occupancy during business hours and at all times sufficiently high to prevent freezing of water in pipes and fixtures.

13. Lessee shall not: (i) place or maintain any merchandise, trash, debris, refuse or other articles in any vestibule or entry of the Premises, on the footwalks or corridors adjacent thereto or elsewhere on the exterior of the Premises; (ii) permit undue accumulations of or burn garbage, trash, rubbish or other debris within or without the Premises; (iii) cause or permit objectionable odors in Lessor's reasonable opinion to emanate or to be dispelled from the Premises; (iv) cause water to accumulate, pool or cause leaks into adjacent premises, (v) use any plaza, exterior areas, corridor, sidewalk, or any other area of the Shopping Center adjacent to or near the Premises for the sale or display of any merchandise or for any other business use, occupation or undertaking; (vi) conduct or permit to be conducted any auction, sidewalk sale, distress sale, fire sale, going out-of-business sale, or the like; (vii) use or permit the use of any portion of the Premises for any unlawful purpose or for any activity of a type which is not generally considered appropriate for high-caliber, urban, shopping areas conducted in accordance with good and generally accepted standards of operation; or (viii) place a load upon any floor that exceeds the floor load that the floor was designed to carry.

14. Lessee shall keep the signs, exterior lights and display window lights of the Premises lighted each and every day of the Term during the hours designated by Lessor.

15. No animals shall be brought into or kept in or about the Shopping Center other than as handicap aids.

16. In the event any violation of any of the above rules and regulations continues after thirty days following written notice to Lessee of such violation, beginning on such thirtieth day Lessee shall be in default of the Lease.

17. Except as otherwise provided herein, Lessor reserves the right to modify or rescind any of these rules and regulations and to make such other or further reasonable rules and regulations as it deems in its reasonable judgment shall from time to time be necessary or advisable for the operation of the Shopping Center, which rules and regulations shall be binding upon Lessee upon their notification of said further rules and regulations. In the event of any conflict between these Rules and Regulations and the Lease, the Lease shall control.

DaVita Quality Index (DQI) Data
DaVita Continuous Quality Improvement (CQI) Data

Printed copies are for reference only. Please refer to the electronic copy for the latest version.

TITLE: CONTINUOUS QUALITY IMPROVEMENT PROGRAM

PURPOSE: To improve patient safety and outcomes including the reduction of medical errors in accordance with the Quality Assessment and Performance Improvement (QAPI) requirements in the CMS Conditions for Coverage.

POLICY:

1. Each dialysis facility will have a Continuous Quality Improvement (CQI) Committee comprised of at least the following individuals from the interdisciplinary team:
    - Facility Medical Director
    - Facility Administrator (FA)/designee
    - Registered Nurse
    - Biomed Technician
    - Registered Dietitian
    - Social Worker

2. Facility Administrators (FAs) conduct periodic Facility Health Meetings (FHM, formerly known as QIFMM) with the CQI committee to review issues and indicators regarding facility's management and performance. FHMs are conducted monthly.

3. Written documentation and plans of action will be documented within the FHM application known as Facility Health Record and will be maintained in a confidential manner. Copies of the QI meeting minutes will be provided upon request to CMS.

4. The Facility Medical Director is responsible for verifying the execution of the Quality Improvement Program, including implementation, continuous monitoring, development of action plans and program evaluation. The FA or designee of the facility will serve as the facility program coordinator unless otherwise appointed by the CQI Committee.

5. The facility CQI Program is organized, documented and reflects current knowledge and professional standards.

6. The facility will develop an annual CQI plan/calendar of indicators for review. Annually, a review of the CQI calendar of activities will occur and revisions/updates made as necessary.

7. The facility will measure, analyze, and track quality indicators or other aspects of performance. The program must include, but not be limited to, the following:
    - Patient Safety, including
        - Review of sentinel events

Property of DaVita Inc. Confidential and Copyrighted ©2007-2017
Origination Date: September 2007
Revision Date: March 2008, September 2008, March 2011, March 2013, September 2013, April 2017

  - Review of trends of adverse patient occurrences including falls and blood loss
  - Review of product, equipment, or medication notices or recalls
  - Review of all patients on less than a 2K+ or on a 4K+ dialysate, their weekly pre-dialysis serum potassium results, dialysate order start date, if physician was contacted, and any dialysate order changes
- Infection Control, including
  - Incidence of infections
  - Vaccination rates for Hepatitis B, Influenza, and Pneumococcal
- Adequacy of Dialysis (Kt/V)
- Nutritional Status (Albumin)
- Mineral Metabolism and Renal Bone Disease
- Anemia Management
- Vascular Access
- Growth and Capacity
- Mortality – review of deaths
- Hospitalizations and Emergency Ambulance Transfers
- Patient Satisfaction and Grievances
- Other indicators as reflected in the Facility Health Record application

8. Continuous monitoring of the above indicators will be reflected in the meeting minutes. Any area identified as underperforming will be reviewed to identify root causes for underperformance, will have an action plan identified that will result in performance improvement, and will track this change in performance over time to verify improvements are sustained.

9. Each action plan will be evaluated as to priority with Patient Safety and Clinical Outcomes indicators considered for the highest level of priority.

Appendix 18

DaVita's Physician, Community and Patient Services

POLICY # COMP-DD-018	Revision: 5.0	Page 1 of 6
TITLE: No-Cost Patient Education		
Department: Compliance (Team Quest)	Effective date: 12/09/2016	

Teammates must promptly report all potential violations of DaVita's Code of Conduct, Corporate Integrity Agreement (CIA) obligations*, Compliance Policies and Procedures and/or applicable laws or regulations. Reports should be made to the Compliance Department (Team Quest), or the Compliance Hotline (888-458-5848 or DaVitaComplianceHotline.com). In accordance with DaVita's Non-Retaliation policy, DaVita will not tolerate any form of retaliation against anyone who files a compliance report in good faith. Questions regarding any Compliance Policy may be directed to Team Quest via the QUESTionLine at 855-687-9645 or QUESTionLine@davita.com.*

1. PURPOSE

The purpose of this policy is to provide guidelines for no-cost patient education and teammate interaction with participants related to such initiatives.

2. SCOPE

This policy applies to DaVita Inc.'s Kidney Care business (DaVita) and, subject to approval by the chief compliance officer or his/her designee, it may be enhanced or modified by a business unit-specific policy(ies). Kidney Care is comprised of DaVita's domestic dialysis business, as well as any other subsidiaries and affiliated entities related to Kidney Care and DaVita's Strategic Business Initiatives (SBI). DaVita Medical Group (DMG) business and international operations are not part of Kidney Care.

This policy applies to all no-cost Patient Education Programs, teammates and Participants, including upstream non-DaVita Patients and community members. This policy does not apply to education provided or furnished to patients of other healthcare providers that are under contract with DaVita (e.g. Patient Pathways, Hospital Services Group, etc.).

3. DEFINITIONS

Term	Definition
Core Patient Education Program Materials	Materials that provide an overview of key elements addressed in Patient Education Programs.
DaVita Patient	A patient whose DaVita placement request has been accepted and who has been formally admitted to dialyze at. A patient can be considered formally admitted prior to their first day of dialysis at DaVita.
Health Care Provider	Any individual nephrologist or physician practice; any hospital or related corporate entity that is or has entered into a Letter of Intent with DaVita Dialysis to become a Joint Venture Partner; or any joint venture in which DaVita owns an interest that provides dialysis services, whether directly or indirectly owned by DaVita.
Healthy Transitions	A Patient Education Program intended to provide insurance and employment education to the chronic kidney disease community.

Do not copy or distribute

Term	Definition
Individualized Education Program	A program that is provided in a one-on-one setting and tailored to address the needs or circumstances of a particular Participant.
Kidney Smart	A Patient Education Program provided to the entire community, regardless of affiliation to physicians/providers or a patient's employment/insurance status.
Modality Education	A Patient Education Program intended to provide information about modality options for patients diagnosed with End-Stage Renal Disease.
One on One Education	Education that provides general information (i.e. information that is not tailored to the specific patient) to a Participant in a one-on-one setting.
Participant	An individual who takes part in a no-cost Patient Education Program.
Patient Education Program	A no-cost educational program that provides general information to Participants in order to raise awareness or improve health outcomes.
Referral Source	Physicians, hospitals, or any other person or entity in a position to refer, recommend, or arrange for any item or service from or furnished by a DaVita facility, DaVita business unit or subsidiary or an immediate family member of the Referral Source. Examples of Referral Sources include hospitals, nephrologists, and nephrology associated nurses, physician assistants, physician practice managers, social workers, discharge planners, and case managers.
Strategic Business Initiative (SBI)	SBIs include DaVita Clinical Research, DaVita Health Solutions, DaVita Labs, Falcon Physician, VillageHealth, Lifeline Vascular Access, Paladina Health and Nephrology Practice Solutions.

4. POLICY

4.1. Patient Education Programs must be designed to provide bona fide, general (non-individualized) education for which a participant (or third-party payer) would not otherwise pay.

4.1.1. Content of Patient Education Programs should be limited to the following. Education concerning topics not listed below may only be offered in limited settings and require approval from the Justice League of DaVita (JLD) and documentation.

- Information regarding disease state awareness and preventions, such as taking control of kidney disease.
- Suggestions for making healthy choices.
- Treatment options (education must not be limited to a single option and should include all modality options).
    - Educational programs that include a discussion of treatment modalities must include the *No Medical Advice Given Disclaimer*.
- Information regarding vascular access awareness, such as access function early recognition and patient actions for access issues.
- General education about healthcare insurance and/or employment options.
    - Individualized healthcare insurance and/or employment education may be provided for Participants who are late-stage patients.

4.1.2. Inappropriate Content

- Discussions related to DaVita-specific financial assistance must be limited to Participants who are DaVita Patients and are not appropriate for potential DaVita Patients.

©DaVita, Inc.

- Medical advice must not be provided as part of Patient Education Programs.
- Information may not be tailored to the specific participant except as expressly approved for Healthy Transitions.
- The content of Patient Education Programs must be provider-neutral and must not include marketing or promotional materials for any specific provider. Rather, content must be unbiased and may not include information and educational materials that are designed to influence a Participant's choice.
- DaVita should never initiate the shift in focus from bona fide education to DaVita promotion. If a Participant requests information specific to DaVita items or services:
    - Teammates should provide a HIPAA Marketing Authorization form (available on the eP&P VillageWeb site) and obtain the Participant's signature.
    - Teammates should refer the participant to a designated non-educator teammate for non-education discussions (e.g., for home educators, refer to facility administrator or home lead where participant is interested in dialysis).
- It is inappropriate to discuss or offer Patient Education Programs to Referral Sources in order to induce or reward referrals to DaVita.

4.1.3 All Patient Education Program presentations and materials must include the *No Medical Advice Given Disclaimer*.

4.1.4 Educational content concerning topics not listed in Section 4.1.1. above may only be offered in limited settings and require JLD's approval and documentation.

4.2. Educators

4.2.1. Patient Education Programs may only be conducted by DaVita teammates who have completed the appropriate training courses in StarLearning, which must be completed annually.

4.2.2. Each educator also must satisfy the additional requirements, if any, of the applicable Patient Education Program

4.2.3. Educators may not be offered incentives based on Participants choosing DaVita as their healthcare provider after completing a Patient Education Program.

- Any allowable incentives must align with the Teammate Incentive Handbook.

4.2.4. Educators' appearance, including clothing, must be provider-neutral, except as specifically approved by JLD.

4.3. Appropriate Venues

4.3.1. Patient Education Programs may only be offered in the following venues.

- Community-based locations (e.g., libraries, or other meeting rooms/conference rooms available for community use, senior centers and other types of community centers).
    - If there are no free community locations suitable for education classes, a reasonable fee may be paid to non-Referral Sources only to use a publicly available space (e.g., library meeting rooms, hotel conference rooms or other similar spaces). Referral Sources may not be paid to use space for Patient Education Programs.

Do not copy or distribute
Origination Date: 02/2014
Revised: 05/2014, 10/2014, 10/2015, 12/2016

- Practice or provider office/facility
    - Patient Education Programs occurring in a practice or provider office must be offered and open to the public in a region, irrespective of whether the practice is affiliated with or otherwise involved in a financial arrangement (e.g., joint venture partnership) with DaVita.
    - Referral Sources may not be paid to use a practice office for Patient Education Programs.
- Patient Education Programs must not be offered at the hospital bedside. Patient Education Programs must not be delivered in the patient's home or other personal residence with the following exceptions:
    - Website or webinar, pursuant to the requirements of 4.5.1.
    - Healthy Transitions

4.4. Financial

4.4.1. Patient Education Programs must be offered at no-cost to all Participants, regardless of the Participant's treating physician, other healthcare provider, payer or employment status.

4.4.2. Patient Education Programs must not replace, coordinate with or otherwise offset currently offered or reimbursable education or services (e.g., Medicare Improvements for Patients & Providers Act) provided by the Participant's treating physician.

4.4.3. Under no circumstance can Patient Education Programs be billed by any party.

4.4.4. It is appropriate to refer Participants with financial assistance questions to the American Kidney Fund (AKF), and inform Participants that there may be financial assistance available to ESRD patients from AKF or certain state aid programs regardless of their choice of dialysis provider.

4.5. Delivery Method

4.5.1. Patient Education Programs may be offered in the following ways:

- Websites or Webinar
    - Participants may be directed to educational websites or webinars to access Patient Education Programs subject to the requirement that all content of the website (including hyperlinks) and webinars must be provider-neutral.
- Live Classes
    - Participants may be invited to attend live Patient Education Programs.
    - Patient Education Programs must be open to the public.
- One-on-one patient or limited attendance Patient Education Programs may be provided, via telephone or live session, under the following circumstances.
    - All other options are not feasible.
    - If a live session, the public is welcome to attend.
    - An educator is available.

©DaVita, Inc.

Do not copy or distribute
Origination Date: 02/2014
Revised: 05/2014, 10/2014, 10/2015, 12/2016

- Team Quest and JLD have approved the request or previously provided written approval through a formal process for providing one-on-one or limited attendance Patient Education Programs.

- Notwithstanding the above, Healthy Transitions has been approved for one-on-one telephone sessions.
  - Currently Healthy Transitions is the only preapproved Individualized Education Program.

- Kidney Smart
  - All Kidney Smart classes must be posted on CERT (the scheduling system) 24 hours in advance.
  - Modality Education classes must be posted on CERT if they are scheduled more than one business day in advance. Educators should make every effort to schedule Modality Education so that it can be posted and open to the public.

4.6. Materials

4.6.1. All collateral materials used or handed out in connection with Patient Education Programs must be approved in advance by JLD and/or Team Quest. If teammates are found to be using materials not approved by JLD or Team Quest, teammates may be subject to corrective action up to and including termination.

4.6.2. Upon request of the Health Care Provider, materials for the Patient Education Programs may be provided by educators to hospitals, physician practices and other healthcare providers to educate those providers about the Patient Education Programs and raise awareness of available Patient Education Programs.

4.6.3. Pre-recorded Patient Education Programs may not be provided to hospitals, physician practices, or other Health Care Providers without prior consent from Team Quest of the JLD.

4.6.4. Core Patient Education Program materials must be made publicly available online at no-cost (e.g., posted on a publicly available website such as KidneySmart.org or DaVita.com).

4.7. HIPAA Authorization

4.7.1. Valid HIPAA authorizations (available on the eP&P VillageWeb site) must be obtained before contacting the Participant or collecting protected health information (PHI) (e.g., Participant contact information) belonging to the Participant.

- If a Participant is recommended to a Patient Education Program by the Participant's treating physician, the educator must receive the HIPAA authorization form that has been signed by the Participant from the Participant's treating physician prior to the educator contacting the Participant for educational purposes or causing the Participant to be contacted for educational purposes.
  - If a Participant contacts Healthy Transitions directly, Healthy Transitions may obtain verbal consent to have the HIPAA form and consent form mailed to the Participant.

- If a Participant reaches out to DaVita directly, a HIPAA authorization should be collected at the time of providing the education.

4.8. Post Education Follow Up

©DaVita, Inc. Proprietary and Confidential – Internal and Focus Arrangement Party Use Only
Origination Date: 02/2014
Revised: 05/2014, 10/2014, 10/2015, 12/2016
Do not copy or distribute

4.8.1. After the Patient Education Program is complete, educators may follow up with the Participant only if;

- A signed HIPAA Authorization Form is on file.

4.8.2. Patient Education Program educators are only permitted to use documents approved by Team Quest and JLD for follow-up purposes.

4.8.3. Information gathered through a Patient Education Program may only be used for Patient Education Program purposes, unless patient authorization has been obtained prior to the use or the use has received written JLD approval.

4.9. New Pilot Program

4.9.1. Any pilot programs related to Patient Education Programs must be approved by JLD and Team Quest. The following information must be provided for review by JLD and Team Quest:

- Explanation of why this initiative is being proposed and what the potential educational benefits are.
- List of anyone outside of DaVita who will be involved (physicians, medical directors, other healthcare entities or providers).
- A response to the following questions:
  - Will anyone be paid for participating in this initiative?
  - When will the initiative begin?
  - With whom will the results of the initiative be shared?
  - Do you anticipate publishing the results of the pilot or initiative?
- Any other information requested by JLD or Team Quest.

4.10. Patient Education Programs are subject to the DaVita Document Retention Policy (available on the JLD VillageWeb page).

5. PROCEDURES

→ N/A

6. APPLICABLE DOCUMENTS

→ No Medical Advice Given Disclaimer
→ HIPAA Marketing Authorization (available on the eP&P VillageWeb site)
→ HIPAA Marketing Authorization- Maine and Montana (available on the eP&P VillageWeb site)
→ HIPAA Marketing Authorization- Maryland (available on the eP&P VillageWeb site)
→ Kidney Smart Program Requirements
→ Valid HIPAA Authorization Form (available on the eP&P VillageWeb site)
→ Valid HIPAA Authorization Form – Maine and Montana (available on the eP&P VillageWeb site)
→ Valid HIPAA Authorization Form – Maryland (available on the eP&P VillageWeb site)
→ Document Retention Policy (available on the JLD VillageWeb page)

Appendix 19

Corporate Integrity Agreement

EX-10.1 2 d807612dex101.htm EX-10.1

Exhibit 10.1

CORPORATE INTEGRITY AGREEMENT
BETWEEN THE
OFFICE OF INSPECTOR GENERAL
OF THE
DEPARTMENT OF HEALTH AND HUMAN SERVICES
AND
DAVITA HEALTHCARE PARTNERS INC.

I. PREAMBLE

DaVita HealthCare Partners Inc. and its U.S. wholly-owned and partially-owned subsidiaries and joint ventures in which DaVita HealthCare Partners Inc. owns an interest that provide dialysis services, whether directly or indirectly owned by DaVita HealthCare Partners Inc., with the exception of the joint ventures listed in Appendix E (collectively "DaVita") hereby enters into this Corporate Integrity Agreement (CIA) with the Office of Inspector General (OIG) of the United States Department of Health and Human Services (HHS) to promote compliance with the statutes, regulations, and written directives of Medicare, Medicaid, and all other Federal health care programs (as defined in 42 U.S.C. § 1320a-7b (f)) (Federal health care program requirements). Contemporaneously with this CIA, DaVita is entering into a Settlement Agreement with the United States.

II. TERM AND SCOPE OF THE CIA

A. The period of the compliance obligations assumed by DaVita under this CIA shall be five years from the effective date of this CIA ("CIA Period"). The "Effective Date" shall be the date on which the final signatory of this CIA executes this CIA. Each one-year period, beginning with the one-year period following the Effective Date, shall be referred to as a "Reporting Period."

B. Sections VII, X, and XI shall expire no later than 120 days after OIG's receipt of: (1) DaVita's final Annual Report, or (2) any additional materials submitted by DaVita pursuant to OIG's request, whichever is later.

C. The scope of this CIA shall be governed by the following definitions:

1. "Arrangements" shall mean every arrangement or transaction that involves, directly or indirectly, the offer, payment, solicitation, or receipt of anything of value, and is between DaVita Dialysis and any actual or potential source of health care business or referrals to DaVita Dialysis or any actual or potential recipient of health care business or referrals from DaVita Dialysis. The term "source of health care business or referrals" shall mean any individual or entity that refers, recommends, arranges for,

orders, leases, or purchases any good, facility, item, or service for which payment may be made in whole or in part by a Federal health care program, and the term "recipient of health care business or referrals" shall mean any individual or entity: (1) to whom DaVita Dialysis refers an individual for the furnishing or arranging for the furnishing of any item or service; or (2) from whom DaVita Dialysis purchases, leases, or orders or arranges for or recommends the purchasing, leasing, or ordering of any good, facility, item, or service for which payment may be made in whole or in part by a Federal health care program.

2. "Arrangements Covered Persons" includes each Covered Person who is involved with the development, approval, management, negotiation, execution, implementation, or review of DaVita Dialysis's Arrangements. This definition does not include Facility Administrators whose sole involvement with Arrangements consists of working with Health Care Providers in implementing an Arrangement with DaVita Dialysis.

3. "Business Courtesies" means meals, gifts, and other gratuities, excluding educational and promotional materials.

4. "Certifying Executive" means each Covered Person who is an officer, president, general manager, vice president, group senior vice president, division vice president, or other Covered Person whose position is equivalent to or above a division vice president.

5. "Clinic Covered Persons" means all Covered Persons employed at a DaVita Dialysis clinic except the Facility Administrators.

6. "Compliance Program Review" means the review performed by the Compliance Advisor in accordance with Appendix A.

7. "Covered Executive" means each Covered Person who is an officer, president, senior vice president, or other Covered Person whose position is equivalent to or above a senior vice president.

8. "Covered Persons" includes:

a. all owners of DaVita who are natural persons (other than shareholders who: (1) have an ownership interest of less than 5% and (2) acquired the ownership interest through public trading or in connection with the operation of employee incentive programs);

b. all officers, directors, and employees of DaVita who are responsible for or work for DaVita Dialysis;

c. all contractors, subcontractors, agents, and other persons who provide patient care items or services or who perform billing or coding functions on behalf of DaVita Dialysis, excluding vendors whose sole connection with DaVita is selling or otherwise providing medical supplies or equipment to DaVita and who do not bill the Federal health care programs for such medical supplies or equipment; and

d. all domestic dialysis clinic Joint Venture Partners and Medical Directors.

Notwithstanding the above, this term does not include part-time or per diem employees, contractors, subcontractors, agents, and other persons (other than Medical Directors) who are not reasonably expected to work more than 160 hours during a Reporting Period, except that any such individuals shall become "Covered Persons" at the point when they work more than 160 hours during a Reporting Period. This term also does not include contractors, subcontractors, agents, and other persons (other than Medical Directors) who only provide diagnostic services, facility services and supplies, home medical equipment, laboratory services, pharmacy services, and transportation and ambulance services.

9. "DaVita Dialysis" means DaVita's domestic dialysis business and clinics, and all DaVita functions that provide support to DaVita's domestic dialysis business and clinics, excluding IT personnel other than IT personnel who develop software and systems, employee benefits personnel, and facility services personnel who provide administrative support for DaVita's corporate business offices.

10. "Executive Financial Recoupment Program" means the financial recoupment program required by Appendix D that puts at risk of forfeiture and recoupment an amount equivalent to up to three years of annual performance pay (*e.g.*, annual bonus, plus long-term incentives) for a Covered Executive who is discovered to have been involved in any significant misconduct.

11. “Focus Arrangements” means every Arrangement that is between DaVita Dialysis and any Health Care Provider and involves, directly or indirectly, the offer, payment, or provision of anything of value. Notwithstanding the foregoing, “Focus Arrangements” shall not include:

a. single patient agreements, stat lab agreements, or transfer agreements that DaVita Dialysis enters into with a hospital or related corporate entity, or

b Business Courtesies extended by DaVita Dialysis, except those Business Courtesies extended by Certifying Employees, DaVita Dialysis business development personnel, and DaVita Dialysis Regional Operations Directors.

12. “Health Care Provider” means: (1) any individual nephrologist or physician practice; (2) any hospital or related corporate entity that is or has entered into a Letter of Intent with DaVita Dialysis to become a Joint Venture Partner; or (3) any joint venture in which DaVita owns an interest that provides dialysis services, whether directly or indirectly owned by DaVita.

13 “Joint Venture De Novo” means any transaction in which DaVita partners with a Health Care Provider to establish and jointly own one or more new dialysis clinics or programs prior to Medicare certification.

14. “Joint Venture Partner” means a Health Care Provider who owns a percentage, directly or indirectly, whether through shares, membership interests, or other ownership means, of a DaVita Dialysis clinic or holding company that owns an interest in a DaVita Dialysis clinic.

15. “Medical Director” means a nephrologist or nephrology practice that provides the medical director services required by Medicare regulations (*e.g.*, 42 C.F.R. § 494.150) to a DaVita Dialysis clinic.

16. “Multi-Specialty Practice” means a physician practice group that includes physicians who practice in general medicine/primary care and/or more than one specialty area. If physicians who specialize in nephrology are included in the Multi-Specialty Practice, they must represent less than 20% of the practice group’s physician members.

17. “Partial Acquisition” means any transaction in which DaVita acquires a direct or indirect interest of less than 100% in one or more dialysis clinics or programs.

18. "Partial Divestiture" means any transaction in which the ownership interest held directly or indirectly by DaVita in one or more dialysis clinics or programs is reduced, but remains greater than 0%.

19. "Risk Determination" means: (a) the Independent Monitor's decision regarding whether the proposed Focus Arrangement presents a low risk or a high risk of violating the laws and regulations governing the Federal health care programs, including the False Claims Act and the Anti-Kickback Statute; or (b) the Independent Monitor's determination that he or she is unable to make such a conclusion.

20. "Subject Joint Venture Clinics" means the joint venture clinics listed in Appendix B to this CIA.

21. "Valuation Methodologies" means the collections of processes used to price a Focus Arrangement, including the template financial models used in those processes, standards concerning the methodology for calculating and documenting the inputs to those models when customized to specific transactions, and procedures for evaluating the output from those models.

III. CORPORATE INTEGRITY OBLIGATIONS

DaVita shall establish and maintain a Compliance Program that includes the following elements:

A. Chief Compliance Officer and Management Compliance Committee

1. *Chief Compliance Officer*. DaVita has appointed a Covered Person to serve as its Chief Compliance Officer and shall maintain a Chief Compliance Officer for the CIA Period. The Chief Compliance Officer shall be responsible for developing and implementing policies, procedures, and practices designed to ensure compliance with the requirements set forth in this CIA and with Federal health care program requirements. The Chief Compliance Officer shall be a member of senior management of DaVita, shall report directly to the Chief Executive Officer of DaVita and the Chairman of the Compliance Committee of the Board of Directors of DaVita (the "Board"), shall make periodic (at least quarterly) reports regarding compliance matters directly to the Compliance Committee of the Board of Directors ("Board Compliance Committee"), and shall be authorized to report on such matters to the Board or the Board Compliance Committee at any time. Written documentation of the Chief Compliance Officer's reports to the Board Compliance Committee shall be made available to OIG upon request. The Chief Compliance Officer shall not be or be subordinate to the Chief Legal Officer or Chief Financial Officer or have any responsibilities that involve acting in any capacity as legal counsel or supervising legal counsel functions for DaVita. The Chief Compliance Officer shall be responsible for monitoring the day-to-day compliance

activities engaged in by DaVita Dialysis as well as for any reporting obligations created under this CIA. Any noncompliance job responsibilities of the Chief Compliance Officer shall be limited and must not interfere with the Chief Compliance Officer's ability to perform the duties outlined in this CIA.

DaVita shall report to OIG, in writing, any changes in the identity or position description of the Chief Compliance Officer, or any actions or changes that would affect the Chief Compliance Officer's ability to perform the duties necessary to meet the obligations in this CIA, within five days after such a change.

2. *Management Compliance Committee*. DaVita has appointed and shall maintain for the CIA Period a Management Compliance Committee. The Management Compliance Committee shall, at a minimum, include the Chief Compliance Officer and other members of DaVita Dialysis's senior management necessary to meet the requirements of this CIA (*e.g.*, senior executives of DaVita Dialysis Corporate Development, billing, clinical, human resources, audit, and operations). The Chief Compliance Officer shall chair the Management Compliance Committee, and the Management Compliance Committee shall support the Chief Compliance Officer in fulfilling his/her responsibilities (*e.g.*, shall assist in the analysis of DaVita Dialysis's risk areas and shall oversee monitoring of internal and external audits and investigations). The Management Compliance Committee shall meet at least quarterly. The minutes of the Management Compliance Committee meetings shall be made available to OIG upon request.

DaVita shall report to OIG, in writing, any changes in the composition of the Management Compliance Committee, or any actions or changes that would affect the Management Compliance Committee's ability to perform the duties necessary to meet the obligations in this CIA, within 15 days after such a change.

3. *Board of Directors Compliance Obligations*. The Board Compliance Committee shall be responsible for the review and oversight of matters related to compliance with Federal health care program requirements and the obligations of this CIA. The Board Compliance Committee is currently comprised solely of independent (*i.e.*, non-executive) members and shall continue to be comprised solely of independent members for the CIA Period. The Board Compliance Committee has now and shall maintain for the CIA Period the ability to retain, at its sole discretion, outside compliance counsel.

The Board Compliance Committee shall, at a minimum, be responsible for the following:

a. The Board Compliance Committee shall meet at least quarterly to review and oversee DaVita Dialysis's

Compliance Program, including, but not limited to, the performance of the Chief Compliance Officer, Management Compliance Committee, and the Compliance Department.

b. The Board Compliance Committee shall meet at least quarterly in executive session with the Chief Compliance Officer.

c. The Board Compliance Committee shall, within 90 days of the second anniversary of the Effective Date, retain a person or entity who meets the qualifications set forth in Appendix A as its Compliance Advisor. Beginning with the third Reporting Period of the CIA, the Compliance Advisor shall review the effectiveness of DaVita Dialysis's Compliance Program and Risk Assessment and Mitigation Process for DaVita Dialysis (Compliance Program Review) and provide the Board with a Compliance Program Review Report for the remaining Reporting Periods of the CIA. The Board shall consider the Compliance Program Review Report as part of its review and assessment of DaVita Dialysis's Compliance Program.

d. The Board Compliance Committee shall, for each Reporting Period of the CIA, adopt a resolution, signed by each member of the Board Compliance Committee summarizing its review and oversight of DaVita Dialysis's compliance with Federal health care program requirements and the obligations of this CIA.

At minimum, the resolution shall include the following language:

"The Compliance Committee of the Board of Directors has made a reasonable inquiry into the operations of DaVita Dialysis's Compliance Program including the performance of the Chief Compliance Officer and the Management Compliance Committee. Based on its inquiry and review, the Board Compliance Committee has concluded that, to the best of its knowledge, DaVita Dialysis has implemented an effective Compliance Program to meet Federal health care program requirements and the obligations of the CIA."

If the Board Compliance Committee is unable to provide such a conclusion in the resolution, the Board Compliance Committee shall include in the resolution a written explanation of the reasons why it is unable to provide the conclusion and the steps it is taking to implement an effective Compliance Program at DaVita Dialysis.

DaVita shall report to OIG, in writing, any changes in the composition or leadership of the Board Compliance Committee, or any actions or changes that would affect the Board Compliance Committee's ability to perform the duties necessary to meet the obligations in this CIA, within 15 days after such a change.

4. *Management Accountability and Certifications*. In addition to the responsibilities set forth in this CIA for all Covered Persons, Certifying Executives are specifically expected to monitor and oversee activities within their areas of authority and shall annually certify that the functional area is compliant with applicable Federal health care program requirements and with the obligations of this CIA. To the extent that a functional area is not covered by the certification of a Certifying Executive, the person in charge of that functional area shall certify.

For each Reporting Period, each Certifying Executive or person in charge of the applicable functional area shall sign a certification that states:

"I have been trained on and understand the compliance requirements and responsibilities as they relate to [functional area], an area under my supervision. My job responsibilities include ensuring compliance with regard to the [functional area] with all applicable Federal health care program laws and regulations, obligations of the Corporate Integrity Agreement, and applicable DaVita HealthCare Partners policies, and I have taken steps to promote such compliance. In the event that I have identified potential issues of noncompliance with these requirements, I have referred all such issues consistent with the processes of DaVita HealthCare Partners for reporting potential misconduct for further review and follow-up. Apart from those referred issues, and any issues of which I have been made aware by DaVita HealthCare Partners' counsel because they have been brought to the attention of OIG, any other relevant government agency or entity, or the CIA Monitor, I am not currently aware of any violations of applicable Federal health care program laws and regulations, obligations of the Corporate Integrity Agreement, or the requirements of the policies of DaVita HealthCare Partners. I understand that this certification is being provided to and relied upon by the United States."

If any Certifying Executive or person in charge of the applicable functional area is unable to provide such a conclusion in the certification, the Certifying Executive or person in charge of the applicable functional area shall provide a written explanation of the reasons why he or she is unable to provide the certification outlined above and the steps being taken to address the issue(s) identified in the written explanation.

B. Written Standards

1. *Code of Conduct*. Prior to the Effective Date, DaVita developed, implemented, and distributed a written Code of Conduct for DaVita Dialysis to all Covered Persons. During the CIA Period, DaVita Dialysis shall make the performance of job responsibilities in a manner consistent with the Code of Conduct an element in evaluating the performance of all employed Covered Persons and shall implement a policy requiring that all contracted Covered Persons perform job responsibilities in a manner consistent with the Code of Conduct. The Code of Conduct shall, at a minimum, set forth:

a. DaVita's commitment to full compliance with all Federal health care program requirements;

b. DaVita's requirement that all of its Covered Persons shall be expected to comply with all Federal health care program requirements and with DaVita's own Policies and Procedures;

c. the requirement that all of DaVita's Covered Persons shall be expected to report to the Chief Compliance Officer, or other appropriate individual designated by DaVita, suspected violations of any Federal health care program requirements or of DaVita's own Policies and Procedures; and

d. the right of all individuals to use the Disclosure Program described in Section III.L, and DaVita's commitment to nonretaliation and to maintain, as appropriate, confidentiality and anonymity with respect to such disclosures.

Within 90 days after the Effective Date, each Covered Person shall certify, in writing or in electronic form, that he or she has received, read, understood, and shall abide by DaVita Dialysis's Code of Conduct. New Covered Persons shall receive the Code of Conduct in hard copy or electronic form and shall complete the required certification within 30 days after becoming a Covered Person or within 90 days after the Effective Date, whichever is later.

DaVita shall periodically review the Code of Conduct to determine if revisions are appropriate and shall make any necessary revisions based on such review. The Code of Conduct shall be distributed in hard copy or electronic form at least annually to all Covered Persons.

2. *Policies and Procedures*. Within 90 days after the Effective Date, DaVita shall implement written Policies and Procedures regarding the operation of its

compliance program for DaVita Dialysis, including the compliance program requirements outlined in this CIA and compliance with Federal health care program requirements. The Policies and Procedures also shall address:

a. 42 U.S.C. § 1320a-7b(b) (Anti-Kickback Statute) and the regulations and other guidance documents related to that statute, and business or financial arrangements or contracts that generate unlawful Federal health care program business in violation of the Anti-Kickback Statute; and

b. the requirements set forth in Section III.D (Compliance with the Anti-Kickback Statute).

Within 90 days after the Effective Date, the Policies and Procedures shall be made available in hard copy or electronic form to all Covered Persons. Appropriate and knowledgeable staff shall be available to explain the Policies and Procedures.

At least annually (and more frequently, if appropriate), DaVita shall assess and update, as necessary, the Policies and Procedures. Within 30 days after the effective date of any revisions, a description of the revisions shall be communicated to all affected Covered Persons and any revised Policies and Procedures shall be made available to all Covered Persons in hard copy or electronic form.

C. Training and Education

1. *General Training*. Within 90 days after the Effective Date, DaVita Dialysis shall provide at least one hour of General Training to each Covered Person, except Clinic Covered Persons. DaVita Dialysis shall provide at least one hour of General Training to Clinic Covered Persons within the first Reporting Period. This training, at a minimum, shall explain DaVita's:

a. CIA requirements; and

b. Compliance Program, including the Code of Conduct.

New Covered Persons shall receive the General Training described above within 30 days after becoming a Covered Person or within 90 days after the Effective Date, whichever is later. New Clinic Covered Persons shall receive General Training within 60 days after they become new Clinic Covered Persons. After receiving the initial General Training described above, each Covered Person shall receive at least one hour of General Training in each subsequent Reporting Period.

2. *Arrangements Training*. Within 90 days after the Effective Date, each Arrangements Covered Person shall receive at least three hours of Arrangements Training, in addition to the General Training required above. The Arrangements Training shall include a discussion of:

a. Arrangements that potentially implicate the Anti-Kickback Statute, as well as the regulations and other guidance documents related to that statute;

b. DaVita Dialysis's policies, procedures, and other requirements relating to Arrangements and Focus Arrangements, including, but not limited to, the Focus Arrangements Tracking System, the internal review and approval process, and the tracking of remuneration to and from sources of health care business or referrals pursuant to Focus Arrangements as required by Section III.D of the CIA;

c. the personal obligation of each individual involved in the development, approval, management, negotiation, execution, implementation, or review of DaVita Dialysis's Arrangements to know the applicable legal requirements and DaVita Dialysis's policies and procedures;

d. the legal sanctions under the Anti-Kickback Statute; and

e. examples of violations of the Anti-Kickback Statute.

New Arrangements Covered Persons shall receive this training within 30 days after the beginning of their employment or becoming Arrangements Covered Persons, or within 90 days after the Effective Date, whichever is later. New Arrangements Covered Persons shall not develop, approve, manage, negotiate, execute, implement, or review DaVita Dialysis's Arrangements until after they have completed the Arrangements Training.

After receiving the initial Arrangements Training described in this Section, each Arrangements Covered Person shall receive at least two hours of Arrangements Training, in addition to the General Training, in each subsequent Reporting Period.

3. *Board Member Training*. Within 90 days after the Effective Date, DaVita shall provide at least two hours of training to each member of the Board of Directors, in addition to the General Training. This training shall address the responsibilities of board members and corporate governance.

New members of the Board of Directors shall receive the Board Member Training described above within 30 days after becoming a member or within 90 days after the Effective Date, whichever is later.

4. *Certification*. Each individual who is required to attend training shall certify, in writing or in electronic form, that he or she has received the required training. The certification shall specify the type of training received and the date received. The Chief Compliance Officer (or designee) shall retain the certifications, along with one copy of all course materials.

5. *Qualifications of Trainer*. Persons preparing or providing the training shall be knowledgeable about the subject area. Persons preparing or providing the Arrangements Training shall have expertise in the Anti-Kickback Statute, as well as the regulations, directives, and guidance related to that law.

6. *Update of Training*. DaVita shall review the training annually and, where appropriate, update the training to reflect changes in Federal health care program requirements, any pertinent issues discovered during internal audits, the Compliance Program Review, the Monitor's findings and reviews, and any other relevant information.

7. *Computer-based Training*. DaVita may provide the training required under this CIA through appropriate computer-based training approaches. If DaVita chooses to provide computer-based training, it shall make available appropriately qualified and knowledgeable staff or trainers to answer questions or provide additional information to the individuals receiving such training.

8. *Training of Medical Directors and Joint Venture Partners*. DaVita Dialysis shall make the General Training described in Section III.C.1 available to all of its Medical Directors and Joint Venture Partners and shall require them to complete it. If, under existing Focus Arrangements, DaVita does not have the authority to require the Medical Directors and Joint Venture Partners to complete the training, it shall use its best efforts to encourage such Medical Directors and Joint Venture Partners to complete the training. The Chief Compliance Officer shall maintain records of all active Medical Directors and Joint Venture Partners who receive training, including the type of training and the date received. These records shall be made available to OIG upon request.

D. Compliance with the Anti-Kickback Statute

DaVita is responsible for ensuring that the following obligations are met:

1. *Selection Process and Selection Criteria.*

a. Within 90 days after the Effective Date, DaVita Dialysis shall develop a process for documenting the selection of Health Care Providers with whom it enters into Focus Arrangements other than Business Courtesies.

The Selection Process for each type of Focus Arrangement shall include:

i. a mechanism by which DaVita Dialysis identifies Health Care Providers for possible selection;

ii. confirmation that each Health Care Provider considered meets designated Selection Criteria, as defined in Section III.D.1.b, below, specific to the type of Focus Arrangement; and

iii. DaVita Dialysis's rationale for choosing the Health Care Provider ultimately selected for entry into a particular Focus Arrangement.

b. Within 90 days after the Effective Date, DaVita Dialysis shall develop criteria to guide its selection of Health Care Providers with whom it enters into Focus Arrangements other than Business Courtesies ("Selection Criteria"). DaVita Dialysis shall develop Selection Criteria for each type of Focus Arrangement that it enters into with Health Care Providers. For joint venture Focus Arrangements, separate Selection Criteria shall be developed for each type of joint venture that DaVita enters into (*e.g.*, Partial Acquisition, Partial Divestiture, Joint Venture De Novo). The Selection Criteria shall relate to a Health Care Provider's eligibility and ability to perform the functions required in connection with each such type of Focus Arrangement, and shall not include a Health Care Provider's ability to refer patients to DaVita.

c. The Monitor shall review and approve the Selection Process and Selection Criteria. During the first two Reporting

Periods, the Monitor also shall prospectively review and approve any modifications or changes to the Selection Process or Selection Criteria. The requirements of this subsection shall apply to the third Reporting Period if OIG exercises its discretion to extend the Monitor's authority pursuant to Section I of Appendix C to the CIA.

d. DaVita Dialysis shall maintain and continue to apply its Selection Process and Selection Criteria throughout the CIA Period.

e. Section III.D.1 and Section III.D.2 shall not apply to Focus Arrangements in which a Health Care Provider contracts with DaVita Dialysis solely for the provision of management services and has no other Focus Arrangements with DaVita Dialysis.

2. *Valuation Methodologies.*

a. Within 90 days after the Effective Date, DaVita Dialysis shall examine the Valuation Methodologies it uses to price each type of Focus Arrangement, except Business Courtesies, and shall revise each such methodology if necessary to comply with the Anti-Kickback Statute and the requirements of this CIA. To the extent no Valuation Methodology exists for a type of Focus Arrangement, except Business Courtesies, that DaVita Dialysis enters into, DaVita Dialysis shall develop a Valuation Methodology to use in pricing that type of Focus Arrangement.

b. DaVita Dialysis shall obtain the Monitor's approval of each required Valuation Methodology, and any changes to those Valuation Methodologies during the first two Reporting Periods, prior to implementation.

c. During the CIA Period, DaVita Dialysis shall consistently apply the approved Valuation Methodologies to value each type of Focus Arrangement.

3. *Focus Arrangements Procedures*. In addition to the Valuation Methodologies, within 90 days after the Effective Date DaVita Dialysis shall examine its procedures and evaluate whether the procedures are reasonably designed to ensure that each existing and new or renewed Focus Arrangement does not violate the Anti-Kickback

Statute and the regulations and guidance related to the Anti-Kickback Statute (Focus Arrangements Procedures), and shall revise those procedures as necessary. These procedures shall include the following:

a. creating and maintaining a centralized tracking system for all existing and new or renewed Focus Arrangements (Focus Arrangements Tracking System);

b. tracking remuneration to and from all parties to Focus Arrangements;

c. tracking investments made by and estimated rates of return received during the CIA Period by all parties to all Partial Acquisition and Partial Divestiture transactions between DaVita Dialysis and a Health Care Provider (if applicable), except for those transactions that are part of the conduct released by the Settlement Agreement entered into between the United States and DaVita contemporaneously with this CIA;

d. tracking services and activities to ensure that parties to the Focus Arrangement are performing the services required under the applicable Focus Arrangement(s) (if applicable);

e. monitoring the use of leased space, medical supplies, medical devices, equipment, or other patient care items to ensure that such use is consistent with the terms of the applicable Focus Arrangement(s) (if applicable);

f. establishing and implementing a written review and approval process for all Focus Arrangements, except Business Courtesies, the purpose of which is to ensure that all new and existing or renewed Focus Arrangements do not violate the Anti-Kickback Statute, and that includes at least the following: (i) a legal review of all Focus Arrangements by counsel with expertise in the Anti-Kickback Statute, (ii) a process for specifying the business need or business rationale for all Focus Arrangements, and (iii) a process for determining and documenting the fair market value of the remuneration specified in the Focus Arrangement;

g. requiring the Chief Compliance Officer to review the Focus Arrangements Tracking System, internal review and approval

process, and other Focus Arrangements Procedures on at least an annual basis and to provide a report on the results of such review to the Board Compliance Committee; and

h. implementing effective responses when suspected violations of the Anti-Kickback Statute are discovered, including disclosing Reportable Events and quantifying and repaying Overpayments pursuant to Sections III.O and III.P when appropriate.

Notwithstanding the foregoing, DaVita shall have until the end of the first Reporting Period to identify and enter in the Focus Arrangements Tracking System all existing Focus Arrangements except (i) center transaction agreements; (ii) Medical Director agreements, (iii) leases, and (iv) consulting agreements; and to enter all data for items or services provided under the existing Focus Arrangements on or after the Effective Date. DaVita is not required to include in its Focus Arrangements Tracking System historical remuneration or performance data for items or services provided under the existing Focus Arrangements prior to the Effective Date.

4. *New or Renewed Arrangements Requirements*. Prior to entering into new Focus Arrangements or renewing (whether by operation of contract or negotiation) existing Focus Arrangements, except Business Courtesies, in addition to complying with the Focus Arrangements Procedures set forth above, DaVita Dialysis shall comply with the following requirements (Focus Arrangements Requirements):

a. ensure that each Focus Arrangement is set forth in writing and signed by DaVita Dialysis and the other parties to the Focus Arrangement;

b. include in the written agreement a requirement that each party to a Focus Arrangement who meets the definition of a Covered Person shall complete at least one hour of training regarding the Anti-Kickback Statute and examples of arrangements that potentially implicate the Anti-Kickback Statute. Additionally, DaVita Dialysis shall provide each party to the Focus Arrangement with a copy of its Code of Conduct and Policies and Procedures related to the Anti-Kickback Statute in hard copy or electronic form;

c. include in the written agreement a certification by the parties to the Focus Arrangement that the parties shall not violate the Anti-Kickback Statute with respect to the performance of the Arrangement; and

d. beginning 120 days from the Effective Date, during the first two Reporting Periods and for the first 120 days of the third Reporting Period, obtain from the Monitor a Risk Determination for each Focus Arrangement. During the first two Reporting Periods and for the first 120 days of the third Reporting Period, DaVita Dialysis shall not enter into or renew a Focus Arrangement until it has received a Risk Determination from the Monitor containing a conclusion that the proposed Focus Arrangement presents a low risk or a high risk of violating the laws and regulations governing the Federal health care programs, including the False Claims Act and the Anti-Kickback Statute. The requirements of this subsection shall apply to the remainder of the third Reporting Period if OIG exercises its discretion under Section I of Appendix C to the CIA to extend the Monitor's authority to make Risk Determinations under Section C of Appendix C to the CIA.

5. *Records Retention and Access*. DaVita Dialysis shall retain and make available to OIG, upon request, the Focus Arrangements Tracking System and all supporting documentation of the Focus Arrangements subject to this Section and, to the extent available, all non-privileged communications related to the Focus Arrangements and the actual performance of the duties under the Focus Arrangements.

E. Notice to Joint Venture Partners and Medical Directors

1. Within 90 days after the Effective Date, DaVita shall send, by first class mail with delivery confirmation, a notice approved by the Monitor to each Joint Venture Partner and Medical Director. Each notice should include the following information, to the extent applicable to the particular recipient:

a. Joint Venture Partners and Medical Directors, and their employees, colleagues, and contractors, are free to refer patients to and treat patients at non-DaVita-owned dialysis clinics;

b. DaVita will not enforce any patient-related non-disparagement or non-solicitation clauses contained in any of their existing agreements with DaVita; and

c. in connection with joint venture clinics formed by Partial Divestitures, DaVita will not enforce the investment non-compete provisions it may have in those joint venture and Medical Director agreements.

2. Within 90 days after the anniversary of the Effective Date in each subsequent Reporting Period, DaVita shall send, by first class mail, postage prepaid with delivery confirmation, the notice described in Section III.E.1 to each Joint Venture Partner and Medical Director. If DaVita changes or revises the wording of the letter, DaVita shall obtain, in the second Reporting Period, the approval of the Monitor and, in subsequent Reporting Periods, the approval of the OIG prior to sending the letter.

F. Unwinding of Subject Joint Venture Clinics

1. During the first Reporting Period, DaVita shall unwind the Subject Joint Venture Clinics. DaVita may unwind the Subject Joint Venture Clinics by:

a. selling its interest in the Subject Joint Venture Clinic, at a price within the range of fair market value, to its nephrologist or nephrology practice partners;

b. purchasing its nephrologist or nephrology practice partners' interest in the Subject Joint Venture Clinic, at a price within the range of fair market value;

c. selling its interest in a Subject Joint Venture Clinic, at a price within the range of fair market value, to an independent third party; or

d. selling the full interest of the Subject Joint Venture Clinic, at a price within the range of fair market value, to an independent third party, which would buy out all Joint Venture Partners.

2. DaVita shall obtain the Monitor's approval for each transaction involved in the unwinding of the Subject Joint Venture Clinics prior to the transaction's closure and/or execution.

3. In the event that DaVita is not able to unwind a Subject Joint Venture Clinic prior to the end of the first Reporting Period, the Monitor may provide a certification that DaVita has acted in good faith to unwind the Subject Joint Venture Clinic. The Monitor shall provide such a certification only if she or he determines that DaVita has actively pursued in good faith all avenues for unwinding the Subject Joint Venture Clinic listed in Section III.F.1 above and that DaVita's failure to complete the unwind is due to circumstances beyond its control. In making this determination, the Monitor may consider the conduct of the other parties to the Subject Joint Venture Clinic.

4. During the term of the CIA, DaVita shall not enter into any Partial Divestitures, unless expressly permitted by Section III.F.5, below.

5. Notwithstanding Section III.F.4 of this CIA, DaVita is expressly permitted to enter into the following:

a. Joint Venture De Novo arrangements;

b. Any joint venture formed by selling a direct or indirect interest in a DaVita dialysis clinic to a Multi-Specialty Practice and/or hospital;

c. Any joint venture formed by selling a direct or indirect interest in a DaVita dialysis clinic to a Multi-Specialty Practice and a nephrologist or nephrology practice;

d. Any joint venture formed by selling a direct or indirect interest in a DaVita dialysis clinic to a hospital and a nephrologist or nephrology practice;

e. Any joint venture formed by selling a direct or indirect interest in a DaVita dialysis clinic to a hospital and a Multi-Specialty Practice and a nephrologist or nephrology practice;

f. Any transaction pursuant to which DaVita is required under the existing agreements related to the joint ventures listed in Appendix F to sell, offer to sell, or otherwise transfer some of its membership interests to another party;

g. Any transaction in which DaVita is required by court order sought and obtained by any independent third party to sell, offer to sell, or otherwise transfer some of its membership interests to another party; or

h. Any transaction consistent with CMS rules or regulations regarding ESRD Seamless Care Organizations (ESCOs).

G. Independent Monitor

1. *Retention of the Independent Monitor*. Within 60 days after the Effective Date, DaVita shall retain the Independent Monitor (Monitor) selected by OIG after consultation with DaVita. The Monitor may retain additional personnel, including, but not limited to, independent consultants, if needed to help meet the Monitor's obligations under this CIA. DaVita shall provide OIG with a copy of the agreement between DaVita and the Monitor, and any agreements between DaVita or the Monitor and any consultants retained by the Monitor. OIG shall have 10 business days to review and provide comment on the agreement(s) prior to final execution.

The Monitor may confer and correspond with DaVita or OIG individually or together. The Monitor and DaVita shall not negotiate or enter into another financial relationship for at least 12 months after the date of OIG's CIA closure letter to DaVita.

2. *Duties of the Monitor*. The Monitor shall perform the tasks and reviews and prepare the reports described in Appendix C of the CIA. The Monitor shall submit all reports simultaneously to OIG and DaVita. The Monitor shall not share draft reports with DaVita.

3. *Retention of Records*. The Monitor shall retain and make available to OIG, upon request, all work papers, supporting documentation, correspondence, and other documents related to the engagement of and work performed by the Monitor.

4. *Resignation or Removal of the Monitor*. The Monitor is not an agent of OIG. However, the Monitor may be removed by OIG at OIG's sole discretion. If the Monitor resigns or is removed prior to the termination of the CIA, DaVita shall retain, within 60 days after selection by OIG, another Monitor with the same functions and authorities. If the Monitor resigns or is removed, all deadlines under Sections III.F and V applicable to the Reporting Period during which the resignation or removal occurs will be tolled until 60 days after OIG selects a new Monitor or DaVita retains the new Monitor, whichever is earlier. No penalties will be applied under Section X for days that are tolled as a result of this Section III.G.4.

5. *Validation Review*. In the event OIG has reason to believe that: (a) the Monitor's work fails to conform to the requirements of this CIA, or (b) the Monitor's findings or review results are inaccurate, OIG may, at its sole discretion, conduct its own review (Validation Review). DaVita shall pay for the reasonable cost of any such review performed by OIG or any of its designated agents. Any Validation Review of reports submitted as part of DaVita's final Annual Report shall be initiated no later than one year after DaVita's final submission (as described in Section II) is received by OIG.

Prior to initiating a Validation Review, OIG shall notify DaVita of its intent to do so and provide a written explanation of why OIG believes such a review is necessary. To resolve any concerns raised by OIG, DaVita may request a meeting with OIG to discuss the matter, present any additional information, and/or propose alternatives to the proposed Validation Review. DaVita agrees to provide any additional information as may be requested by OIG under this Section III.G.5 in an expedited manner. OIG will attempt in good faith to resolve any issues with DaVita prior to conducting a Validation Review. However, the final determination as to whether or not to proceed with a Validation Review shall be made at the sole discretion of OIG.

6. *Responsibilities and Liabilities*. Nothing in this Section III.G or Appendix C to this CIA affects DaVita's responsibilities or liabilities under any criminal, civil, or administrative laws or regulations applicable to any Federal health care program including, but not limited to, the Anti-Kickback Statute.

H. Compliance Audits

1. DaVita Dialysis has established a compliance audit program consisting of four components: annual audits, routine audits, email audits, and metric monitoring. DaVita shall, at a minimum, maintain this compliance audit program for DaVita Dialysis for the CIA Period at the same level of effort as allocated to the compliance audit program in calendar year 2013.

2. DaVita shall ensure that OIG receives a list of annual, routine, and email audits completed or scheduled to be completed by DaVita Dialysis during each Reporting Period no later than 30 days prior to the end of the Reporting Period.

3. The compliance audit program shall not be performed under attorney-client privilege.

I. Risk Assessment and Mitigation Process

Within 90 days after the Effective Date, DaVita shall develop a standardized, centralized process to allow DaVita Dialysis's in-house or outside legal counsel, compliance, and leaders of the relevant functions to: (1) identify and assess the risks associated with DaVita Dialysis's compliance with Federal health care program requirements, the False Claims Act, and the Anti-Kickback Statute; and (2) determine what steps, if any, DaVita Dialysis should take to mitigate the identified risks. DaVita shall maintain the Risk Assessment and Mitigation Process for the duration of the CIA.

J. Compensation

1. *Executive Financial Recoupment Program.* DaVita shall establish no later than December 31, 2014, and shall maintain throughout the CIA Period, a financial recoupment program that puts at risk of forfeiture and recoupment an amount equivalent to up to three years of annual performance pay (*e.g.*, annual bonus, incentives) for a Covered Executive who is discovered to have been involved in any significant misconduct (Executive Financial Recoupment Program). This financial recoupment program shall apply both to Covered Executives who are current DaVita employees and to Covered Executives who are former DaVita employees at the time of a Recoupment Determination. The specific terms and conditions of the Executive Financial Recoupment Program are set forth in Appendix D to this CIA. DaVita shall maintain an Executive Financial Recoupment Program consistent with the terms of Appendix D for at least the duration of the CIA, absent agreement otherwise by OIG.

2. *Compliance Input on Executive Compensation.* The Chief Compliance Officer shall provide information to the Board Compensation Committee that evaluates each Covered Executive's performance, including, but not limited to, the Covered Executive's commitment to compliance, as demonstrated by modeling compliant behavior, leading in a compliant manner, identifying risks and issues, resolving risks and issues in a compliant manner, working with the Compliance Department to address issues, and other compliance-related factors as appropriate. The Board Compensation Committee shall document its decision regarding the consideration given to the information for each Covered Executive in determining annual compensation (*e.g.*, salary, bonuses) and the rationale for its decision. DaVita shall provide copies of the Board Compensation Committee's documentation of its decision and rationale to OIG upon request.

K. Cooperation

Upon reasonable notice, DaVita shall cooperate with all OIG investigations and understands that full cooperation includes: (1) prompt and truthful disclosures to OIG of all matters relating to any Federal or state health care law investigation, prosecution, or other enforcement action relating to the Covered Conduct in the Settlement Agreement entered into between the United States and DaVita contemporaneously with this CIA, including other matters involving possible violations of Federal or state health care law by individuals or entities in the dialysis industry and the medical practice of nephrology; and (2) truthful testimony in any administrative hearing and/or court proceeding. DaVita, upon reasonable notice, will make reasonable efforts to facilitate access to, and encourage the cooperation of, its current and former directors, officers, and employees for interviews and testimony, and will furnish to OIG, upon reasonable request, all documents and records in its possession, custody, or control relating to the Covered Conduct. Section III.K shall not require and shall not be construed as a waiver of any applicable attorney-client or work product privileges.

L. Disclosure Program

DaVita has established and shall continue to maintain a Disclosure Program that includes a mechanism (*e.g.*, a toll-free compliance telephone line) to enable individuals to disclose, to the Chief Compliance Officer or some other person who is not in the disclosing individual's chain of command, any identified issues or questions associated with DaVita Dialysis's policies, conduct, practices, or procedures with respect to a Federal health care program believed by the individual to be a potential violation of criminal, civil, or administrative law. DaVita shall continue to appropriately publicize the existence of the disclosure mechanism (*e.g.*, via periodic e-mails to employees or by posting the information in prominent common areas).

The Disclosure Program shall continue to emphasize a nonretribution, nonretaliation policy, and shall continue to include a reporting mechanism for anonymous communications for which appropriate confidentiality shall be maintained. Upon receipt of a disclosure, the Chief Compliance Officer (or designee) shall continue to gather all relevant information from the disclosing individual. The Chief Compliance Officer (or designee) shall continue to make a preliminary, good faith inquiry into the allegations set forth in every disclosure to ensure that he or she has obtained all of the information necessary to determine whether a further review should be conducted. For any disclosure that is sufficiently specific so that it reasonably: (1) permits a determination of the appropriateness of the alleged improper practice, and (2) provides an opportunity for taking corrective action, DaVita shall continue to conduct an internal review of the allegations set forth in the disclosure and ensure that proper follow-up is conducted.

The Chief Compliance Officer (or designee) shall maintain a disclosure log for DaVita Dialysis, which shall include a record and summary of each disclosure received (whether anonymous or not), the status of the respective internal reviews, and any corrective action taken in response to the internal reviews.

M. Ineligible Persons

1. *Definitions*. For purposes of this CIA:

a. an "Ineligible Person" shall include an individual or entity who:

i. is currently excluded, debarred, suspended, or otherwise ineligible to participate in the Federal health care programs or in Federal procurement or nonprocurement programs; or

ii. has been convicted of a criminal offense that falls within the scope of 42 U.S.C. § 1320a-7(a), but has not yet been excluded, debarred, suspended, or otherwise declared ineligible.

b. "Exclusion Lists" include:

i. the HHS/OIG List of Excluded Individuals/Entities (LEIE) (available through the Internet at http://www.oig.hhs.gov); and

ii. the General Services Administration's System for Award Management (SAM) (available through the Internet at http://www.sam.gov).

2. *Screening Requirements*. DaVita shall continue to ensure that all prospective and current Covered Persons are not Ineligible Persons, by continuing or implementing the following screening requirements.

a. DaVita shall screen all prospective Covered Persons against the Exclusion Lists prior to engaging their services and, as part of the hiring or contracting process, shall require such Covered Persons to disclose whether they are Ineligible Persons.

b. DaVita shall screen all Covered Persons against the Exclusion Lists within 90 days after the Effective Date and thereafter shall screen against the LEIE on a monthly basis and screen against SAM on an annual basis.

c. DaVita shall implement a policy requiring all Covered Persons to disclose immediately any debarment, exclusion, suspension, or other event that makes that person an Ineligible Person.

Nothing in Section III.M affects DaVita's responsibility to refrain from (and liability for) billing Federal health care programs for items or services furnished, ordered, or prescribed by an excluded person. DaVita understands that items or services furnished, ordered, or prescribed by excluded persons are not payable by Federal health care programs and that DaVita may be liable for overpayments and/or criminal, civil, and administrative sanctions for employing or contracting with an excluded person regardless of whether DaVita meets the requirements of Section III.M.

3. *Removal Requirement*. If DaVita has actual notice that a Covered Person has become an Ineligible Person, DaVita shall remove such Covered Person from responsibility for, or involvement with, DaVita's business operations related to the Federal health care programs and shall remove such Covered Person from any position for which the Covered Person's compensation or the items or services furnished, ordered, or prescribed by the Covered Person are paid in whole or in part, directly or indirectly, by Federal health care programs or otherwise with Federal funds at least until such time as the Covered Person is reinstated into participation in the Federal health care programs.

4. *Pending Charges and Proposed Exclusions*. If DaVita has actual notice that a Covered Person is charged with a criminal offense that falls within the scope of 42 U.S.C. §§ 1320a-7(a), 1320a-7(b)(1)–(3), or is proposed for exclusion during the Covered Person's employment or contract term, DaVita shall take all appropriate actions to ensure that the responsibilities of that Covered Person have not and shall not adversely affect the quality of care rendered to any beneficiary, patient, or resident, or any claims submitted to any Federal health care program.

N. Notification of Government Investigation or Legal Proceedings

Within 30 days after discovery, DaVita shall notify OIG, in writing, of any ongoing investigation or legal proceeding known to DaVita conducted or brought by a governmental entity or its agents in the United States involving an allegation that DaVita has committed a crime or has engaged in fraudulent activities. This notification shall include a description of the allegation, the identity of the investigating or prosecuting agency, and the status of such investigation or legal proceeding. DaVita shall also provide written notice to OIG within 30 days after the resolution of the matter, and shall provide OIG with a description of the findings and/or results of the investigation or proceedings, if any.

O. Repayment of Overpayments

1. *Definition of Overpayments*. For purposes of this CIA, an "Overpayment" shall mean the amount of money DaVita Dialysis has received in excess of the amount due and payable under any Federal health care program requirements.

2. *Repayment of Overpayments*.

a. If, at any time, DaVita Dialysis identifies any Overpayment, DaVita Dialysis shall repay the Overpayment to the appropriate payor (*e.g.*, Medicare contractor) within 60 days

after identification of the Overpayment and take remedial steps within 90 days after identification (or such additional time as may be agreed to by the payor) to correct the problem, including preventing the underlying problem and the Overpayment from recurring. If the Overpayment is not yet quantified, within 30 days after identification, DaVita Dialysis shall notify the payor of its efforts to quantify the Overpayment amount along with a schedule of when such work is expected to be completed. Notification and repayment to the payor shall be done in accordance with the payor's policies.

b. Notwithstanding the above, notification and repayment of any Overpayment amount that routinely is reconciled or adjusted pursuant to policies and procedures established by the payor should be handled in accordance with such policies and procedures.

P. Reportable Events

1. *Definition of Reportable Event*. For purposes of this CIA, a "Reportable Event" means anything that involves:

a. a substantial Overpayment to DaVita Dialysis;

b. a matter involving DaVita Dialysis that a reasonable person would consider a probable violation of criminal, civil, or administrative laws applicable to any Federal health care program for which penalties or exclusion may be authorized;

c. DaVita Dialysis's employment of or contracting with a Covered Person who is an Ineligible Person as defined by Section III.M.1.a; or

d. the filing of a bankruptcy petition by DaVita.

A Reportable Event may be the result of an isolated event or a series of occurrences.

2. *Reporting of Reportable Events*. If DaVita determines (after a reasonable opportunity to conduct an appropriate review or investigation of the allegations) through any means that there is a Reportable Event, DaVita shall notify OIG, in writing, within 30 days after making the determination that the Reportable Event exists.

DaVita Dialysis shall not be required to report as a Reportable Event a matter that is the subject of an ongoing investigation or legal proceeding by a government entity or agent previously disclosed under Section III.N, above.

3. *Reportable Events under Section III.P.1.a.* For Reportable Events under Section III.P.1.a, DaVita's report to OIG shall be made within 30 days of the identification of the Overpayment and shall include:

a. a description of the steps taken by DaVita Dialysis to identify and quantify the Overpayment;

b. a complete description of the Reportable Event, including the relevant facts, persons involved, and legal and Federal health care program authorities implicated;

c. a description of DaVita Dialysis's actions taken to correct the Reportable Event; and

d. any further steps DaVita Dialysis plans to take to address the Reportable Event and prevent it from recurring.

Within 60 days of identification of the Overpayment, DaVita shall provide OIG with a copy of the notification and repayment (if quantified) to the payor required by Section III.O.2.

4. *Reportable Events under Section III.P.1.b and c*. For Reportable Events under Section III.P.1.b and III.P.1.c, DaVita's report to OIG shall include:

a. a complete description of the Reportable Event, including the relevant facts, persons involved, and legal and Federal health care program authorities implicated;

b. a description of DaVita Dialysis's actions taken to correct the Reportable Event;

c. any further steps DaVita Dialysis plans to take to address the Reportable Event and prevent it from recurring; and

d. if the Reportable Event has resulted in an Overpayment, a description of the steps taken by DaVita Dialysis to identify and quantify the Overpayment.

5. *Reportable Events under Section III.P.1.d*. For Reportable Events under Section III.P.1.d, DaVita's report to OIG shall include documentation of the bankruptcy filing and a description of any Federal health care program authorities implicated.

IV. SUCCESSOR LIABILITY; CHANGES TO BUSINESS UNITS OR LOCATIONS

A. Sale of Business, Business Unit, or Location

In the event that, after the Effective Date, DaVita proposes to sell any or all of its DaVita Dialysis business, business units, or locations (whether through a sale of assets, sale of stock, or other type of transaction) that are subject to this CIA, DaVita shall notify OIG of the proposed sale at least 30 days prior to the sale of the DaVita Dialysis business, business unit, or location. This notification shall include a description of the DaVita Dialysis business, business unit, or location to be sold, a brief description of the terms of the sale, and the name and contact information of the prospective purchaser. This CIA shall be binding on the purchaser of the DaVita Dialysis business, business unit, or location, unless otherwise determined and agreed to in writing by OIG.

B. Change or Closure of Business, Business Unit, or Location

In the event that, after the Effective Date, DaVita changes locations or closes a DaVita Dialysis business, business unit, or location related to the furnishing of items or services that may be reimbursed by Federal health care programs, DaVita shall notify OIG of this fact as soon as possible, but no later than within 30 days after the date of change or closure of the DaVita Dialysis business, business unit, or location.

C. Purchase or Establishment of New Business, Business Unit, or Location

In the event that, after the Effective Date, DaVita purchases or establishes a new DaVita Dialysis business, business unit, or location related to the furnishing of items or services that may be reimbursed by Federal health care programs, DaVita shall notify OIG at least 30 days prior to such purchase or the operation of the new DaVita Dialysis business, business unit, or location. This notification shall include the address of the new DaVita Dialysis business, business unit, or location; phone number; fax number; the location's Medicare and state Medicaid program provider number and/or supplier number(s); and the name and address of each Medicare and state Medicaid program contractor to which DaVita Dialysis currently submits claims. Each new DaVita Dialysis business, business unit, or location and all Covered Persons at each new DaVita Dialysis business, business unit, or location shall be subject to the applicable requirements of this CIA, unless otherwise agreed to in writing by OIG.

V. IMPLEMENTATION, QUARTERLY RESPONSE, AND ANNUAL REPORTS

A. Implementation Report

Within 120 days after the Effective Date, DaVita shall submit a written report to OIG summarizing the status of its implementation of the requirements of this CIA (Implementation Report). The Implementation Report shall, at a minimum, include:

1. the name, address, phone number, and position description of the Chief Compliance Officer required by Section III.A.1, and a summary of other noncompliance job responsibilities the Chief Compliance Officer may have;

2. the names and positions of the members of the Management Compliance Committee required by Section III.A.2;

3. the names of the Board members who are responsible for satisfying the Board of Directors compliance obligations described in Section III.A.3;

4. a copy of DaVita Dialysis's Code of Conduct required by Section III.B.1;

5. the number of individuals required to complete the Code of Conduct certification required by Section III.B.1, the percentage of individuals who have completed such certification, and an explanation of any exceptions (the documentation supporting this information shall be made available to OIG upon request);

6. copies of all Policies and Procedures required by Section III.B.2;

7. the following information regarding each type of training required by Section III.C:

   a. a description of such training, including a summary of the topics covered, the length of sessions, and a schedule of training sessions;

   b. the number of individuals required to be trained, percentage of individuals actually trained, and an explanation of any exceptions.

A copy of all training materials and the documentation supporting this information shall be made available to OIG upon request.

8. a description of: (a) the Selection Process and Selection Criteria required by Section III.D.1; (b) the Valuation Methodologies required by Section III.D.2; (c) the Focus Arrangements Tracking System required by Section III.D.3.a; (d) the internal review and approval process required by Section III.D.3.f; and (e) the tracking and monitoring procedures and other Focus Arrangements Procedures required by Section III.D.3;

9. a copy of the Notices required by Section III.E and a list of the Joint Venture Partners and Medical Directors to whom each Notice was sent;

10. a copy of the engagement letter with the Monitor that DaVita is required to retain by Section III.G;

11. a description of the Disclosure Program required by Section III.L;

12. a description of the process by which DaVita fulfills the requirements of Section III.M regarding Ineligible Persons;

13. a list of all of DaVita Dialysis's offices and joint venture dialysis clinics (including locations and mailing addresses); the corresponding name under which each joint venture dialysis clinic is doing business; the corresponding phone numbers and fax numbers; each joint venture clinic's Medicare and state Medicaid program provider number(s) and/or supplier number(s); and the name and address of each Medicare and state Medicaid program contractor to which DaVita Dialysis currently submits claims;

14. a description of DaVita's corporate structure, including identification of any parent and sister companies, subsidiaries, and their respective lines of business;

15. a description of DaVita's Executive Financial Recoupment Program implemented pursuant to Section III.J.1; and

16. the certifications required by Section V.D.

B. Quarterly Response Reports

Within 30 days after receipt of the Monitor's Quarterly Reports, DaVita shall submit its Quarterly Response Report to OIG and the Monitor containing:

1. its response to the Monitor's findings and recommendations;

2. its corrective action plans; and

3. the certifications required by Section V.D.

C. Annual Reports

DaVita shall submit to OIG annually a report with respect to the status of, and findings regarding, DaVita Dialysis's compliance activities for each of the five Reporting Periods (Annual Report). Each Annual Report shall include, at a minimum:

1. any change in the identity, position description, or other noncompliance job responsibilities of the Chief Compliance Officer; any change in the membership of the Management Compliance Committee described in Section III.A; and any change in the leadership or composition of the Board Compliance Committee;

2. the dates of each report made by the Chief Compliance Officer to the Board (written documentation of such reports shall be made available upon request);

3. the Board resolution required by Section III.A.3;

4. a summary of any changes or amendments to DaVita Dialysis's Code of Conduct required by Section III.B.1 and the reason for such changes, along with a copy of the revised Code of Conduct;

5. the number of individuals required to complete the Code of Conduct certification required by Section III.B.1, the percentage of individuals who have completed such certification, and an explanation of any exceptions (the documentation supporting this information shall be made available to OIG upon request);

6. copies of the Policies and Procedures required by Section III.B.2, and a summary of the reasons for any significant changes or amendments. DaVita shall provide a "redlined" copy of any revised Policy or Procedure at OIG's request;

7. the following information regarding each type of training required by Section III.C:

a. a copy of all training materials, the length of the training sessions, and a schedule of training sessions; and

b. the number of individuals required to complete the initial and annual training, the percentage of individuals who actually completed the initial and annual training, and an explanation of any exceptions.

The documentation to support this information shall be made available to OIG upon request.

8. a description of: (a) any changes to the Focus Arrangements Tracking System required by Section III.D.3.a; (b) any changes to the internal review and approval process required by Section III.D.3.f; and (c) any changes to the tracking and monitoring procedures and other Focus Arrangements Procedures required by Section III.D.3;

9. a copy of documents related to the Selection Process and Selection Criteria required by Section III.D.1 and, in each of the third through fifth Reporting Periods, an explanation of any modifications or changes to, or deviations from, the Selection Process or Selection Criteria made during the applicable Reporting Period;

10. DaVita Dialysis's response to the reports prepared pursuant to Section H of Appendix C to the CIA, along with corrective action plan(s) related to any issues raised by the reports;

11. a summary of Reportable Events (as defined in Section III.P) identified during the Reporting Period and the status of any corrective action relating to all such Reportable Events;

12. a report of the aggregate Overpayments that DaVita Dialysis has returned to the Federal health care programs. Overpayment amounts shall be broken down into the following categories: inpatient Medicare, outpatient Medicare, Medicaid (report each applicable state separately, if applicable), and other Federal health care programs. Overpayment amounts that are routinely reconciled or adjusted pursuant to policies and procedures established by the payor do not need to be included in this aggregate Overpayment report;

13. a summary of the disclosures in the disclosure log required by Section III.L that: (a) relate to Federal health care programs, or (b) involve allegations of conduct that may involve illegal remunerations in violation of the Anti-Kickback Statute (the complete disclosure log shall be made available to OIG upon request);

14. any changes to the process by which DaVita fulfills the requirements of Section III.M regarding Ineligible Persons;

15. a summary describing any ongoing investigation or legal proceeding required to have been reported pursuant to Section III.N. The summary shall include a description of the allegation, the identity of the investigating or prosecuting agency, and the status of such investigation or legal proceeding;

16. a description of all changes to the most recently provided list of DaVita Dialysis's locations (including addresses) as required by Section V.A.13; the corresponding name under which each location is doing business; the corresponding phone numbers and fax numbers; each location's Medicare and state Medicaid program provider number(s) and/or supplier number(s); and the name and address of each Medicare and state Medicaid program contractor to which DaVita currently submits claims;

17. a description of any changes to DaVita's Executive Financial Recoupment Program;

18. a copy of the annual report to the Board concerning DaVita's Executive Financial Recoupment Program, as required by Appendix D; and

19. the certifications required by Section V.D.

The third and subsequent Annual Reports shall also include:

20. the Compliance Program Review Report; and

21. a summary and description of any and all current and prior engagements and agreements between DaVita and the Compliance Advisor, if different from what was submitted under Section A of Appendix A to the CIA.

The first Annual Report shall be received by OIG no later than 90 days after the end of the first Reporting Period. Subsequent Annual Reports shall be received by OIG no later than the anniversary date of the due date of the first Annual Report.

D. Certifications

1. *Certifying Executives*. In each Annual Report, DaVita shall include the certifications of Certifying Executives as required by Section III.A.4.

2. *Compliance Officer and Chief Executive Officers*. The Implementation Report and each Quarterly Response and Annual Report shall include certifications by the Chief Compliance Officer, Chief Executive Officer of DaVita Dialysis, and Chief Executive Officer of DaVita that:

a. to the best of his or her knowledge, except as otherwise described in the report, DaVita is in compliance with all of the requirements of this CIA;

b. to the best of his or her knowledge, DaVita has implemented procedures reasonably designed to ensure that all Focus Arrangements do not violate the Anti-Kickback Statute, including the Focus Arrangements Procedures required in Section III.D of the CIA;

c. to the best of his or her knowledge, DaVita has fulfilled the requirements for new and renewed Focus Arrangements under Section III.D.4 of the CIA; and

d. he or she has reviewed the report and has made reasonable inquiry regarding its content and believes that the information in the report is accurate and truthful.

3. *Chief Financial Officer*. The first Annual Report shall include a certification by the Chief Financial Officer that, to the best of his or her knowledge, DaVita has complied with its obligations under the Settlement Agreement: (a) not to resubmit to any Federal health care program payors any previously denied claims related to the Covered Conduct addressed in the Settlement Agreement, and not to appeal any such denials of claims; (b) not to charge to or otherwise seek payment from federal or state payors for unallowable costs (as defined in the Settlement Agreement); and (c) to identify and adjust any past charges or claims for unallowable costs.

E. Designation of Information

DaVita shall clearly identify any portions of its submissions that it believes are trade secrets, or information that is commercial or financial and privileged or confidential, and therefore potentially exempt from disclosure under the Freedom of Information Act (FOIA), 5 U.S.C. § 552. DaVita shall refrain from identifying any information as exempt from disclosure if that information does not meet the criteria for exemption from disclosure under FOIA.

VI. NOTIFICATIONS AND SUBMISSION OF REPORTS

Unless otherwise stated in writing after the Effective Date, all notifications and reports required under this CIA shall be submitted to the following entities:

OIG: Administrative and Civil Remedies Branch
Office of Counsel to the Inspector General
Office of Inspector General
U.S. Department of Health and Human Services
Cohen Building, Room 5527
330 Independence Avenue, SW
Washington, DC 20201
Telephone: 202.619.2078
Facsimile: 202.205.0604

DaVita: Jeanine Jiganti
Chief Compliance Officer
DaVita HealthCare Partners Inc.
2000 16th Street
Denver, CO 80202
Telephone: 303.876.7401
Facsimile: 877.873.8029

Unless otherwise specified, all notifications and reports required by this CIA may be made by certified mail, overnight mail, hand delivery, or other means, provided that there is proof that such notification was received. For purposes of this requirement, internal facsimile confirmation sheets do not constitute proof of receipt. Upon request by OIG, DaVita may be required to provide OIG with an electronic copy of each notification or report required by this CIA in searchable portable document format (pdf), in addition to a paper copy.

VII. OIG INSPECTION, AUDIT, AND REVIEW RIGHTS

In addition to any other rights OIG may have by statute, regulation, or contract, OIG or its duly authorized representative(s) may examine and/or request copies of DaVita's books, records, and other documents and supporting materials and/or conduct on-site reviews of DaVita's headquarters and any of DaVita Dialysis's locations for the purpose of verifying and evaluating: (a) DaVita's compliance with the terms of this CIA; and (b) DaVita Dialysis's compliance with the requirements of the Federal health care programs. The documentation described above shall be made available by DaVita to OIG or its duly authorized representative(s) at all reasonable times for inspection, audit, and/or reproduction. Furthermore, for purposes of this provision, OIG or its duly authorized representative(s) may interview any of DaVita's Covered Persons who

consent to be interviewed at the individual's place of business during normal business hours or at such other place and time as may be mutually agreed upon between the individual and OIG. DaVita shall assist OIG or its duly authorized representative(s) in contacting and arranging interviews with such individuals upon OIG's request. DaVita's Covered Persons may elect to be interviewed with or without a representative of DaVita present.

VIII. DOCUMENT AND RECORD RETENTION

DaVita shall maintain for inspection all documents and records relating to DaVita Dialysis's reimbursement from the Federal health care programs and to DaVita's compliance with this CIA for six years (or longer if otherwise required by law) from the Effective Date.

IX. DISCLOSURES

Consistent with HHS's FOIA procedures, set forth in 45 C.F.R. Part 5, OIG shall make a reasonable effort to notify DaVita prior to any release by OIG of information submitted by DaVita pursuant to its obligations under this CIA and identified upon submission by DaVita as trade secrets, or information that is commercial or financial and privileged or confidential, under the FOIA rules. With respect to such releases, DaVita shall have the rights set forth at 45 C.F.R. § 5.65 (d).

X. BREACH AND DEFAULT PROVISIONS

DaVita is expected to fully and timely comply with all of its CIA obligations.

A. Stipulated Penalties for Failure to Comply with Certain Obligations

As a contractual remedy, DaVita and OIG hereby agree that failure to comply with certain obligations as set forth in this CIA may lead to the imposition of the following monetary penalties (hereinafter referred to as "Stipulated Penalties") in accordance with the following provisions.

1. A Stipulated Penalty of $2,500 (which shall begin to accrue on the day after the date the obligation became due) for each day DaVita fails to establish and implement any of the following obligations as described in Sections III and IV:

a. a Chief Compliance Officer;

b. a Management Compliance Committee;

c. the Board of Directors compliance obligations;

d. a written Code of Conduct;

e. written Policies and Procedures;

f. the training of Covered Persons, Arrangements Covered Persons, and Board Members;

g. the Selection Process and Selection Criteria, Valuation Methodologies, Focus Arrangements Procedures, and/or Focus Arrangements Requirements described in Section III.D;

h. the Notice to Joint Venture Partners and Medical Directors;

i. the unwinding of the Subject Joint Venture Clinics, except to the extent covered by a Monitor's certification as described in Section III.F.3;

j. the Executive Financial Recoupment Program;

k. the Compliance Input on Executive Compensation;

l. a Disclosure Program;

m. Ineligible Persons screening and removal requirements;

n. notification of government investigations or legal proceedings in the United States;

o. repayment by DaVita Dialysis of Overpayments;

p. reporting of Reportable Events; and

q. disclosure of changes to business units or locations.

2. A Stipulated Penalty of $2,500 (which shall begin to accrue on the day after the date the obligation became due) for each day DaVita fails to engage and use a Compliance Advisor, as required in Section III.A.3 and Appendix A.

3. A Stipulated Penalty of $2,500 (which shall begin to accrue on the day after the date the obligation became due) for each day DaVita fails to engage and use an Independent Monitor, as required in Section III.G and Appendix C.

4. A Stipulated Penalty of $2,500 (which shall begin to accrue on the day after the date the obligation became due) for each day DaVita fails to submit the Implementation Report or any Quarterly Response Reports or Annual Reports to OIG in accordance with the requirements of Section V by the deadlines for submission.

5. A Stipulated Penalty of $2,500 (which shall begin to accrue on the day after the date the obligation became due) for each day DaVita fails to submit a Compliance Program Review Report in accordance with the requirements of Section III.A.3 and Appendix A.

6. A Stipulated Penalty of $2,500 (which shall begin to accrue on the day after the date the obligation became due) for each day the Independent Monitor fails to submit a Quarterly or Annual Report in accordance with the requirements of Section III.G and Appendix C.

7. A Stipulated Penalty of $1,500 for each day DaVita fails to grant access as required in Section VII. (This Stipulated Penalty shall begin to accrue on the date DaVita fails to grant access.)

8. A Stipulated Penalty of $50,000 for each false certification submitted by or on behalf of DaVita as part of its Implementation Report, Quarterly Response Report, Annual Report, additional documentation to a report (as requested by the OIG), or otherwise required by this CIA.

9. A Stipulated Penalty of $1,000 for each day DaVita fails to comply fully and adequately with any obligation of this CIA. OIG shall provide notice to DaVita stating the specific grounds for its determination that DaVita has failed to comply fully and adequately with the CIA obligation(s) at issue and steps DaVita shall take to comply with the CIA. (This Stipulated Penalty shall begin to accrue 10 days after DaVita receives this notice from OIG of the failure to comply.) A Stipulated Penalty as described in this Subsection shall not be demanded for any violation for which OIG has sought a Stipulated Penalty under Subsections 1–8 of this Section.

B. Timely Written Requests for Extensions

DaVita may, in advance of the due date, submit a timely written request for an extension of time to perform any act or file any notification or report required by this CIA. Notwithstanding any other provision in this Section, if OIG grants the timely written request with respect to an act, notification, or report, Stipulated Penalties for failure to perform the act or file the notification or report shall not begin to accrue until one day after DaVita fails to meet the revised deadline set by OIG. Notwithstanding any other provision in this Section, if OIG denies such a timely written request, Stipulated

Penalties for failure to perform the act or file the notification or report shall not begin to accrue until three days after DaVita receives OIG's written denial of such request or the original due date, whichever is later. A "timely written request" is defined as a request in writing received by OIG at least five days prior to the date by which any act is due to be performed or any notification or report is due to be filed.

C. Payment of Stipulated Penalties

1. *Demand Letter*. Upon a finding that DaVita has failed to comply with any of the obligations described in Section X.A and after determining that Stipulated Penalties are appropriate, OIG shall notify DaVita of: (a) DaVita's failure to comply; and (b) OIG's exercise of its contractual right to demand payment of the Stipulated Penalties. (This notification shall be referred to as the "Demand Letter.")

2. *Response to Demand Letter*. Within 10 days after the receipt of the Demand Letter, DaVita shall either: (a) cure the breach to OIG's satisfaction and pay the applicable Stipulated Penalties; or (b) request a hearing before an HHS administrative law judge (ALJ) to dispute OIG's determination of noncompliance, pursuant to the agreed upon provisions set forth below in Section X.E. In the event DaVita elects to request an ALJ hearing, the Stipulated Penalties shall continue to accrue until DaVita cures, to OIG's satisfaction, the alleged breach in dispute. Failure to respond to the Demand Letter in one of these two manners within the allowed time period shall be considered a material breach of this CIA and shall be grounds for exclusion under Section X.D.

3. *Form of Payment*. Payment of the Stipulated Penalties shall be made by electronic funds transfer to an account specified by OIG in the Demand Letter.

4. *Independence from Material Breach Determination.* Except as set forth in Section X.D.1.c, these provisions for payment of Stipulated Penalties shall not affect or otherwise set a standard for OIG's decision that DaVita has materially breached this CIA, which decision shall be made at OIG's discretion and shall be governed by the provisions in Section X.D, below.

D. Exclusion for Material Breach of this CIA

1. *Definition of Material Breach*. A material breach of this CIA means:

a. a failure by DaVita to report a Reportable Event, take corrective action, and make the appropriate refunds, as required in Section III.P;

b. repeated or flagrant violations of the obligations under this CIA, including, but not limited to, the obligations addressed in Section X.A;

c. a failure to respond to a Demand Letter concerning the payment of Stipulated Penalties in accordance with Section X.C;

d. a failure to engage and use a Compliance Advisor in accordance with Section III.A.3 and Appendix A; or

e. a failure to engage and use an Independent Monitor in accordance with Section III.G and Appendix C.

2. *Notice of Material Breach and Intent to Exclude*. The parties agree that a material breach of this CIA by DaVita constitutes an independent basis for DaVita's exclusion from participation in the Federal health care programs. Upon a determination by OIG that DaVita has materially breached this CIA and that exclusion is the appropriate remedy, OIG shall notify DaVita of: (a) DaVita's material breach, and (b) OIG's intent to exercise its contractual right to impose exclusion. (This notification shall be referred to as the "Notice of Material Breach and Intent to Exclude.")

3. *Opportunity to Cure*. DaVita shall have 30 days from the date of receipt of the Notice of Material Breach and Intent to Exclude to demonstrate to OIG's satisfaction that:

a. DaVita is in compliance with the obligations of the CIA cited by OIG as being the basis for the material breach;

b. the alleged material breach has been cured; or

c. the alleged material breach cannot be cured within the 30-day period, but that: (i) DaVita has begun to take action to cure the material breach, (ii) DaVita is pursuing such action with due diligence, and (iii) DaVita has provided to OIG a reasonable timetable for curing the material breach.

4. *Exclusion Letter*. If, at the conclusion of the 30-day period, DaVita fails to satisfy the requirements of Section X.D.3, OIG may exclude DaVita from participation in the Federal health care programs. OIG shall notify DaVita in writing of its determination to exclude DaVita. (This letter shall be referred to as the "Exclusion Letter.") Subject to the Dispute Resolution provisions in Section X.E, below, the exclusion shall go into effect 30 days after the date of DaVita's receipt of the Exclusion

Letter. The exclusion shall have national effect. Reinstatement to program participation is not automatic. After the end of the period of exclusion, DaVita may apply for reinstatement by submitting a written request for reinstatement in accordance with the provisions at 42 C.F.R. §§ 1001.3001–.3004.

E. Dispute Resolution

1. *Review Rights*. Upon OIG's delivery to DaVita of its Demand Letter or of its Exclusion Letter, and as an agreed-upon contractual remedy for the resolution of disputes arising under this CIA, DaVita shall be afforded certain review rights comparable to the ones that are provided in 42 U.S.C. § 1320a-7(f) and 42 C.F.R. Part 1005 as if they applied to the Stipulated Penalties or exclusion sought pursuant to this CIA. Specifically, OIG's determination to demand payment of Stipulated Penalties or to seek exclusion shall be subject to review by an HHS ALJ and, in the event of an appeal, the HHS Departmental Appeals Board (DAB), in a manner consistent with the provisions in 42 C.F.R. § 1005.2 –1005.21. Notwithstanding the language in 42 C.F.R. § 1005.2(c), the request for a hearing involving Stipulated Penalties shall be made within 10 days after receipt of the Demand Letter and the request for a hearing involving exclusion shall be made within 25 days after receipt of the Exclusion Letter.

2. *Stipulated Penalties Review*. Notwithstanding any provision of Title 42 of the United States Code or Title 42 of the Code of Federal Regulations, the only issues in a proceeding for Stipulated Penalties under this CIA shall be: (a) whether DaVita was in full and timely compliance with the obligations of this CIA for which OIG demands payment; and (b) the period of noncompliance. DaVita shall have the burden of proving its full and timely compliance and the steps taken to cure the noncompliance, if any. OIG shall not have the right to appeal to the DAB an adverse ALJ decision related to Stipulated Penalties. If the ALJ agrees with OIG with regard to a finding of a breach of this CIA and orders DaVita to pay Stipulated Penalties, such Stipulated Penalties shall become due and payable 20 days after the ALJ issues such a decision unless DaVita requests review of the ALJ decision by the DAB. If the ALJ decision is properly appealed to the DAB and the DAB upholds the determination of OIG, the Stipulated Penalties shall become due and payable 20 days after the DAB issues its decision.

3. *Exclusion Review*. Notwithstanding any provision of Title 42 of the United States Code or Title 42 of the Code of Federal Regulations, the only issues in a proceeding for exclusion based on a material breach of this CIA shall be:

a. whether DaVita was in material breach of this CIA;

b. whether such breach was continuing on the date of the Exclusion Letter; and

c. whether the alleged material breach could not have been cured within the 30-day period, but that: (i) DaVita had begun to take action to cure the material breach within that period; (ii) DaVita has pursued and is pursuing such action with due diligence; and (iii) DaVita provided to OIG within that period a reasonable timetable for curing the material breach and DaVita has followed the timetable.

For purposes of the exclusion herein, exclusion shall take effect only after an ALJ decision favorable to OIG, or, if the ALJ rules for DaVita, only after a DAB decision in favor of OIG. DaVita's election of its contractual right to appeal to the DAB shall not abrogate OIG's authority to exclude DaVita upon the issuance of an ALJ's decision in favor of OIG. If the ALJ sustains the determination of OIG and determines that exclusion is authorized, such exclusion shall take effect 20 days after the ALJ issues such a decision, notwithstanding that DaVita may request review of the ALJ decision by the DAB. If the DAB finds in favor of OIG after an ALJ decision adverse to OIG, the exclusion shall take effect 20 days after the DAB decision. DaVita shall waive its right to any notice of such an exclusion if a decision upholding the exclusion is rendered by the ALJ or DAB. If the DAB finds in favor of DaVita, DaVita shall be reinstated effective on the date of the original exclusion.

4. *Finality of Decision*. The review by an ALJ or DAB provided for above shall not be considered to be an appeal right arising under any statutes or regulations. Consequently, the parties to this CIA agree that the DAB's decision (or the ALJ's decision if not appealed) shall be considered final for all purposes under this CIA.

XI. EFFECTIVE AND BINDING AGREEMENT

DaVita and OIG agree as follows:

A. This CIA shall become final and binding on the date the final signature is obtained on the CIA.

B. This CIA constitutes the complete agreement between the parties and may not be amended except by written consent of the parties to this CIA.

C. OIG may agree to a suspension of DaVita's obligations under this CIA based on a certification by DaVita that it is no longer providing health care items or services that will be billed to any Federal health care program and that it does not have any ownership or control interest, as defined in 42 U.S.C. § 1320a-3, in any entity that bills any Federal health care program. If DaVita is relieved of its CIA obligations, DaVita will be required to notify OIG in writing at least 30 days in advance if DaVita plans to resume providing health care items or services that are billed to any Federal

health care program or to obtain an ownership or control interest in any entity that bills any Federal health care program. At such time, OIG shall evaluate whether the CIA will be reactivated or modified.

D. The undersigned DaVita signatories represent and warrant that they are authorized to execute this CIA. The undersigned OIG signatories represent that they are signing this CIA in their official capacities and that they are authorized to execute this CIA.

E. This CIA may be executed in counterparts, each of which constitutes an original and all of which constitute one and the same CIA. Facsimiles of signatures shall constitute acceptable, binding signatures for purposes of this CIA.

COMPLIANCE ADVISOR

This Appendix contains the requirements relating to the Compliance Advisor required by Section III.A.3 of the CIA.

A. Compliance Advisor Engagement

1. The Board Compliance Committee shall engage an independent individual or entity (Compliance Advisor) that possesses the qualifications set forth in Section B, below, to perform the Compliance Program Review. The Compliance Advisor shall conduct the review in a professionally independent and objective fashion, as set forth in Section D. Within 15 days after engaging the Compliance Advisor, the Board Compliance Committee shall provide OIG with: (a) the identity, address, and phone number of the Compliance Advisor; (b) a copy of the engagement letter; (c) information to demonstrate that the Compliance Advisor has the qualifications outlined in Section B, below; (d) a summary and description of any and all current and prior engagements and agreements between DaVita and the Compliance Advisor; and (e) a certification from the Compliance Advisor that it meets the independence requirements of Section D, below. Within 30 days after OIG receives this information or any additional information submitted by the Board Compliance Committee in response to a request by OIG, whichever is later, OIG will notify the Board Compliance Committee if the Compliance Advisor is unacceptable. Absent notification from OIG that the Compliance Advisor is unacceptable, the Board Compliance Committee may continue to engage the Compliance Advisor.

2. If the Board Compliance Committee engages a new Compliance Advisor during the term of the CIA, that Compliance Advisor shall also meet the requirements of this Appendix. If a new Compliance Advisor is engaged, the Board Compliance Committee shall submit the information identified in Section A. 1, above, within 15 days of engagement of the Compliance Advisor. Within 30 days after OIG receives this information or any additional information submitted by the Board Compliance Committee at the request of OIG, whichever is later, OIG will notify the Board Compliance Committee if the Compliance Advisor is unacceptable. Absent notification from OIG that the Compliance Advisor is unacceptable, the Board Compliance Committee may continue to engage the Compliance Advisor.

B. Compliance Advisor Qualifications

The Compliance Advisor shall:

1. have expertise in health care compliance and in the general requirements applicable to dialysis providers of the Federal health care program(s) from which DaVita Dialysis seeks reimbursement; and

2. have sufficient staff with the expertise described in Section B.l and sufficient resources to conduct the Compliance Program Review on a timely basis.

C. Compliance Advisor Responsibilities

The Compliance Advisor shall:

1. create a work plan for each Reporting Period's Compliance Program Review and submit the work plan to OIG for comment before beginning the Compliance Program Review;

2. perform the annual Compliance Program Review;

3. respond to all OIG inquiries in a prompt, objective, and factual manner;

4. retain and make available to OIG, upon request, all work papers, supporting documentation, correspondence, and other documents related to the engagement of and work performed by the Compliance Advisor; and

5. prepare timely, clear, and well-written reports.

D. Compliance Advisor Independence and Objectivity

To ensure that the Compliance Program Reviews are conducted in a professionally independent and objective fashion, the Compliance Advisor shall not have a relationship to DaVita, or to its officers, directors, employees, or agents, that would cause a reasonable person to question the Compliance Advisor's impartiality.

E. Compliance Advisor Removal/Termination

1. *The Board Compliance Committee and Compliance Advisor*. If the Board Compliance Committee terminates the Compliance Advisor or if the Compliance Advisor withdraws from the engagement during the term of the CIA, the Compliance

Advisor must submit a notice explaining its reasons for termination or the reason for withdrawal to OIG no later than 30 days after termination or withdrawal. The Board Compliance Committee must engage a new Compliance Advisor in accordance with Section A of this Appendix within 60 days of termination or withdrawal of the Compliance Advisor.

2. *OIG Removal of the Compliance Advisor.* In the event OIG has reason to believe the Compliance Advisor does not possess the qualifications described in Section B, is not independent and objective as set forth in Section D, or has failed to carry out its responsibilities in performing the Compliance Program Review as set forth in Section C, OIG may, at its sole discretion, require the Board Compliance Committee to engage a new Compliance Advisor in accordance with Section A of this Appendix. The Board Compliance Committee must engage a new Compliance Advisor within 60 days of termination of the Compliance Advisor.

Prior to requiring the Board Compliance Committee to engage a new Compliance Advisor, OIG shall notify the Board Compliance Committee of its intent to do so and provide a written explanation of why OIG believes such a step is necessary. To resolve any concerns raised by OIG, the Board Compliance Committee may present additional information regarding the Compliance Advisor's qualifications, independence, or performance of its responsibilities. OIG will attempt in good faith to resolve any differences regarding the Compliance Advisor with the Board Compliance Committee prior to requiring the Board Compliance Committee to terminate the Compliance Advisor. However, the final determination as to whether or not to require the Board Compliance Committee to engage a new Compliance Advisor shall be made at the sole discretion of OIG.

APPENDIX B

SUBJECT JOINT VENTURE CLINICS

1. Llano Dialysis, LLC ("East Bay"), a joint venture consisting of five dialysis clinics:

   - Oakland Peritoneal Dialysis Center and Oakland Peritoneal At Home, Oakland, CA
     National Provider Identifier – 1568699882
     Medicaid Provider Number – 1568699882

   - Vallejo Dialysis, Vallejo, CA
     National Provider Identifier – 1265669444
     Medicaid Provider Number – 1265669444

   - San Pablo Dialysis, San Pablo, CA
     National Provider Identifier – 1790912970
     Medicaid Provider Number – 1790912970

   - El Cerrito Dialysis, El Cerrito, CA
     National Provider Identifier – 1063649242
     Medicaid Provider Number – 1063649242

2. University Dialysis Center, LLC, a joint venture consisting of one dialysis clinic:

   - University Dialysis Center, Sacramento, CA
     National Provider Identifier – 1154415982
     Medicaid Provider Number – CDC52549G

3. Shadow Dialysis, LLC, a joint venture consisting of one dialysis clinic:

   - Antelope Dialysis Center, Citrus Heights, CA
     National Provider Identifier – 1780836684
     Medicaid Provider Number – 1780836684

4. Doves Dialysis, LLC, a joint venture consisting of one dialysis clinic:

   - Carmel Mountain Dialysis, San Diego, CA
     National Provider Identifier – 1669788980
     Medicaid Provider Number – 1669788980

5. Animas Dialysis, LLC, a joint venture consisting of two dialysis clinics:

   - Doctors Dialysis of East Los Angeles, Los Angeles, CA
     National Provider Identifier – 1083853667
     Medicaid Provider Number – 1083853667

   - Doctors Dialysis Center of Montebello, Montebello, CA
     National Provider Identifier – 1568601789
     Medicaid Provider Number – 1568601789

6. MountainWest Dialysis Services, LLC, a joint venture consisting of seven dialysis clinics:

   - Lakewood Crossing Dialysis, Lakewood, CO
     National Provider Identifier – 1437310109
     Medicaid Provider Number – 56325398

   - Longmont Dialysis Center, Longmont, CO
     National Provider Identifier – 1336301860
     Medicaid Provider Number – 11485884

   - Lakewood Dialysis Center and Lakewood at Home, Lakewood, CO
     National Provider Identifier – 1063673739
     Medicaid Provider Number – 20733283

   - Thornton Dialysis Center, Thornton, CO
     National Provider Identifier – 1154582831
     Medicaid Provider Number – 12089273

   - Boulder Dialysis Center, Boulder, CO
     National Provider Identifier – 1154582823
     Medicaid Provider Number – 86187589

   - Arvada Dialysis Center, Arvada, CO
     National Provider Identifier – 1609037373
     Medicaid Provider Number – 45706794

   - Mile High Home Dialysis PD, Lakewood, CO
     National Provider Identifier – 1508026436
     Medicaid Provider Number – 36032395

7. South Central Florida Dialysis Partners, LLC ("IMS/St. Cloud"), a joint venture consisting of four dialysis clinics:

- Celebration Dialysis, Celebration, FL
  National Provider Identifier – 1043287550
  Medicaid Provider Number – 000044200

- Hunters Creek Dialysis and Hunters Creek at Home, Orlando, FL
  National Provider Identifier – 1801864459
  Medicaid Provider Number – 000092700

- Kissimmee Dialysis, Kissimmee, FL
  National Provider Identifier – 1609843010
  Medicaid Provider Number – 000039800

- St. Cloud Dialysis, St. Cloud, FL
  National Provider Identifier – 1245410091
  Medicaid Provider Number – 892801100

8. Bright Dialysis, LLC, a joint venture consisting of one dialysis clinic:

- Bright Dialysis, Fort Pierce, FL
  National Provider Identifier – 1316179062
  Medicaid Provider Number – 001826000

9. Central Kentucky Dialysis Centers, LLC, a joint venture consisting of one dialysis clinic:

- Woodland Dialysis Center, Elizabethtown, KY
  National Provider Identifier – 1861452302
  Medicaid Provider Number – 7100011990

10. Columbus-RNA-DaVita, LLC, a joint venture consisting of three dialysis clinics:

- Columbus Dialysis, Columbus, OH
  National Provider Identifier – 1073787248
  Medicaid Provider Number – 2908241

- Columbus East Dialysis, Columbus, OH
  National Provider Identifier – 1952575128
  Medicaid Provider Number – 2911497

- Columbus Downtown Dialysis, Columbus, OH
  National Provider Identifier – 1528232790
  Medicaid Provider Number – 2955477

11. Wauseon Dialysis, LLC, a joint venture consisting of one dialysis clinic:

- Wauseon Dialysis Center, Wauseon, OH
  National Provider Identifier – 1306010228
  Medicaid Provider Number – 2911522

APPENDIX C

RESPONSIBILITIES OF THE INDEPENDENT MONITOR

A. Review of Selection Process and Selection Criteria, Valuation Methodologies, and Notice

1. *Selection Process and Selection Criteria Review.* During the first two Reporting Periods, the Monitor shall review and approve the Selection Process and Selection Criteria required by Section III.D. 1 of the CIA, and any subsequent modifications or changes to the Selection Process and Selection Criteria.

2. *Valuation Methodologies Review*. During the first two Reporting Periods, the Monitor shall review and approve each Valuation Methodology required by Section III.D.2 of the CIA, and any subsequent modifications or changes to those Valuation Methodologies. In conducting this review, the Monitor shall ensure that the Valuation Methodologies:

a. provide for application of the same methodologies for calculating and documenting inputs when valuing each type of Focus Arrangement; and

b. conform to standards commonly used and accepted by accountants and valuation experts.

3. *Notice to Joint Venture Partners and Medical Directors Review.* The Monitor shall review and approve each type of Notice required by Section III.E of the CIA.

a. The Monitor shall ensure that each type of Notice clearly and adequately informs all Joint Venture Partners and Medical Directors that:

i. Joint Venture Partners, Medical Directors, and their employees, colleagues, and contractors are free to refer patients to and treat patients at non-DaVita-owned dialysis clinics;

ii. DaVita will not enforce any patient-related non-disparagement or non-solicitation clauses contained in any of their existing agreements with DaVita; and

iii. in connection with joint venture clinics formed by Partial Divestitures, DaVita will not enforce the investment non-compete provisions it may have in the applicable joint venture agreements and Medical Director agreements.

b. The Monitor shall review and approve any changes or revisions DaVita makes to the wording of the Notice in the second Reporting Period before DaVita sends the Notice to its Joint Venture Partners and Medical Directors.

B. Oversight of Unwinding of Subject Joint Venture Clinics

The Monitor shall oversee DaVita's unwinding of the Subject Joint Venture Clinics as required by Section III.F of the CIA.

1. The Monitor shall review and approve each transaction required to unwind the Subject Joint Venture Clinic to ensure that it conforms to the requirements set forth in Section III.F of the CIA.

2. The Monitor shall review and approve prior to execution any "seller's non-competes" with the Joint Venture Partners who were party to a Subject Joint Venture Clinic to ensure that such clauses or agreements:

   a. do not contain patient-related non-disparagement or non-solicitation language; and

   b. do not restrict the nephrologist or nephrology practice's ability to refer patients to or treat patients at a non-DaVita- owned dialysis clinic.

C. Oversight of DaVita Dialysis Focus Arrangements

The Monitor:

1. Beginning 120 days from the Effective Date, during the first two Reporting Periods and for the first 120 days of the third Reporting Period, shall prospectively evaluate all Focus Arrangements, except Business Courtesies, that DaVita Dialysis proposes to enter into with Health Care Providers.

   a. The Monitor shall determine whether DaVita Dialysis properly applied the appropriate Valuation Methodology, as required by Section III.D.2 of the CIA.

   b. The Monitor shall determine whether the Health Care Provider was selected consistent with DaVita Dialysis's Selection Process and Selection Criteria, as applicable and required by Section III.D.l of the CIA.

   c. The Monitor shall inform DaVita Dialysis and OIG of: (1) the Risk Determination, and (2) the Monitor's basis for the Risk Determination.

2. For the first two Reporting Periods, shall review and evaluate:

   a. DaVita's corporate managerial and governance structure overseeing and executing DaVita Dialysis's selection, negotiation, and implementation of Focus Arrangements with, and compensation of, Health Care Providers;

   b. the Focus Arrangement Procedures required by Section III.D.3;

   c. DaVita Dialysis's compliance with the Focus Arrangement Requirements set forth in Section III.D.4; and

   d. DaVita's compliance program in relation to DaVita Dialysis's selection, negotiation, and implementation of Focus Arrangements with, and compensation of, Health Care Providers, including, but not limited to, training and education, policies and procedures, risk assessment, and auditing.

3. For the first two Reporting Periods, may retrospectively review, in his or her discretion, any payments made under a new or renewed Focus Arrangement to determine whether the payments comply with the laws governing the Federal health care programs, including the False Claims Act and the Anti-Kickback Statute.

4. For the first two Reporting Periods, may retrospectively review, in his or her discretion, any payments made under a Focus Arrangement existing on or before the Effective Date if the Monitor receives, identifies, or discovers information that suggests the payments do not comply with the laws governing the Federal health care programs, including the False Claims Act and the Anti-Kickback Statute, except for conduct released by the Settlement Agreement entered into between the United States and DaVita contemporaneously with this CIA. In the event of a disagreement between the Monitor and DaVita as to whether the Monitor has a basis to review under this Section C.4, the OIG shall, in its sole discretion, determine whether a basis to review exists.

D. Arrangements Review

1. For the third, fourth, and fifth Reporting Periods, the Monitor shall conduct the Arrangements Review. The Arrangements Review shall consist of two components: a systems review and a transactions review. The Monitor shall perform all components of each Arrangements Review. If there are no material changes to DaVita Dialysis's systems, processes, policies, and procedures relating to Arrangements after the end of the second Reporting Period, the Arrangements Systems Review shall be performed for the fourth Reporting Period. If DaVita Dialysis materially changes the Arrangements systems, processes, policies, and procedures during the third or fifth Reporting Periods, the Monitor shall perform an Arrangements Systems Review of the material changes for the Reporting Period in which such changes were made in addition to conducting the systems review for the fourth Reporting Period. The Arrangements Transactions Review shall be performed annually for the third, fourth, and fifth Reporting Periods.

2. *Arrangements Systems Review*. The Arrangements Systems Review shall be a review of DaVita Dialysis's systems, processes, policies, and procedures relating to the initiation, review, approval, and tracking of Arrangements. Specifically, the Monitor shall review the following:

a. DaVita Dialysis's systems, policies, processes, and procedures with respect to creating and maintaining a centralized tracking system for all existing and new and renewed Focus Arrangements (Focus Arrangements Tracking System), including a detailed description of the information captured in the Focus Arrangements Tracking System;

b. DaVita Dialysis's systems, policies, processes, and procedures for tracking remuneration to and from all parties to Focus Arrangements;

c. DaVita Dialysis's systems, policies, processes, and procedures for tracking services and activities to ensure that parties to the Focus Arrangement are performing the services required under the applicable Focus Arrangement(s) (if applicable);

d. DaVita Dialysis's systems, policies, processes, and procedures for monitoring the use of leased space, medical supplies, medical devices, equipment, or other patient care items to ensure that such use is consistent with the terms of the applicable Focus Arrangement(s) (if applicable);

e. DaVita Dialysis's systems, policies, processes, and procedures for initiating Focus Arrangements, including those policies that: (1) govern the Selection Process and Selection Criteria and the calculation and application of Valuation Methodologies, (2) identify the individuals with authority to initiate a Focus Arrangement, and (3) specify the business need or business rationale required to initiate a Focus Arrangement;

f. DaVita Dialysis's systems, policies, processes, and procedures for the internal review and approval of all Focus Arrangements, including those policies that identify the individuals required to approve each type or category of Focus Arrangement entered into by DaVita Dialysis, the internal controls designed to ensure that all required approvals are obtained, and the processes for ensuring that all Focus Arrangements are subject to a legal review by counsel with expertise in the Anti-Kickback Statute;

g. the Chief Compliance Officer's annual review of and reporting to the Board Compliance Committee on the Focus Arrangements Tracking System; DaVita Dialysis's internal review and approval process; and other Focus Arrangements systems, policies, processes, and procedures;

h. DaVita Dialysis's systems, policies, processes, and procedures for implementing effective responses when

suspected violations of the Anti-Kickback Statute are discovered, including disclosing Reportable Events and quantifying and repaying Overpayments when appropriate; and

i. DaVita Dialysis's systems, policies, processes, and procedures for ensuring that all new and renewed Focus Arrangements comply with the Focus Arrangements Requirements set forth in Section III.D.4 of the CIA.

3. *Arrangements Transactions Review*. The Arrangements Transactions Review shall consist of a review by the Monitor of 100 randomly selected Focus Arrangements that were entered into or renewed by DaVita Dialysis during the Reporting Period. The Monitor shall assess whether DaVita Dialysis has complied with Section III.D of the CIA with respect to the selected Focus Arrangements.

The Monitor's assessment with respect to each Focus Arrangement that is subject to review shall include:

a. verifying that the Health Care Provider(s) involved in the Focus Arrangement was selected consistent with DaVita Dialysis's Selection Process and Selection Criteria (if applicable);

b. verifying that the Focus Arrangement is maintained in DaVita Dialysis's centralized tracking system in a manner that permits the Monitor to identify the parties to the Focus Arrangement and the relevant terms of the Focus Arrangement (*i.e.*, the items/services/equipment/space to be provided, the amount of compensation, the effective date, the expiration date, etc.);

c. verifying that the remuneration related to the Focus Arrangement was determined using the appropriate Valuation Methodology;

d. verifying that the Focus Arrangement was subject to the internal review and approval process (including both a legal and business review) and obtained the necessary approvals, and that such review and approval is appropriately documented;

e. verifying that the remuneration related to the Focus Arrangement is properly tracked;

f. verifying that the services and activities are properly tracked and reviewed by DaVita Dialysis, and that the parties to the Focus Arrangement are performing the services required under the applicable Focus Arrangement (if applicable);

g. verifying that the use of leased space, medical supplies, medical devices, equipment, and other patient care items is properly monitored by DaVita Dialysis, and that such use is consistent with the terms of the applicable Focus Arrangement (if applicable); and

h. verifying that the Focus Arrangement satisfies the Focus Arrangements Requirements of Section III.D.4 of the CIA.

E. Compliance Audit Review

The Monitor shall conduct an annual review of annual, routine, and email compliance audits conducted of DaVita Dialysis.

1. OIG shall select three annual audits and one routine audit of DaVita Dialysis for the Monitor's review.

2. The Monitor shall select a statistically valid random sample of three email audits from the universe comprised of all email audits completed during the Reporting Period.

3. For each of the audits selected, the Monitor shall:

a. review the protocol and methodology of the audit to assess whether it was designed in a manner that sufficiently and effectively audits the issue;

b. review the work papers, including all records and references relied upon by DaVita Dialysis, to assess whether DaVita Dialysis relied on the relevant laws, regulations, and program guidance, and whether the work papers, records, and references reviewed support the findings reached by DaVita Dialysis; and

c. to the extent the Monitor finds that DaVita Dialysis's findings are unsupported or incorrect, provide the Monitor's findings and the Monitor's support for those findings.

F. Independent Investigations

During the first two Reporting Periods, the Monitor may, in his or her discretion, conduct an independent investigation of any complaint, concern, or report that the Monitor receives from any source concerning a probable violation of criminal, civil, or administrative laws applicable to any Federal health care program for which penalties or exclusion may be authorized, where:

1. such conduct is alleged to be by any member of the Board of Directors, officer, or Certifying Executive of DaVita;

2. such conduct allegedly has been approved or sanctioned by the DaVita Dialysis Compliance or Legal personnel;

3. the Monitor has concerns about the integrity or adequacy of DaVita's investigation; or

4. the Monitor otherwise believes, and OIG agrees, that DaVita Dialysis cannot effectively investigate the complaint, concern, or report,

except for conduct released by the Settlement Agreement entered into between the United States and DaVita contemporaneously with this CIA. The Monitor shall report its findings from any independent investigation conducted pursuant to this Section F to both DaVita and OIG. The Monitor shall complete any independent investigation begun but not completed during the first two Reporting Periods.

G. Quarterly Reports

1. The Quarterly Reports shall include, but shall not be limited to:

a. the Monitor's findings and recommendations to DaVita based on the work performed by the Monitor under Sections A, B, C, E, and F, above;

b. a list of the Subject Joint Venture Clinics unwound each quarter, a description of the terms of each transaction, and the Monitor's rationale for approving the transactions required to accomplish the unwinding;

c. a list of the Focus Arrangements reviewed each quarter, the Risk Determination for each of the listed Focus Arrangement, and the basis for each Risk Determination;

d. a list of the Focus Arrangements that DaVita Dialysis entered into each quarter, the Risk Determination for each of the listed Focus Arrangements, and the basis for each Risk Determination; and

e. the Monitor's evaluation of corrective actions taken by DaVita Dialysis based on the Monitor's findings and recommendations.

2. The Monitor shall submit via overnight delivery Quarterly Reports covering the first two Reporting Periods and the first 120 days of the third Reporting Period, with the first Quarterly Report due 30 days after the first quarter of the first Reporting Period. The last Quarterly Report shall be due 30 days after the first quarter of the third Reporting Period.

3. The Monitor may provide written recommendations to DaVita in between the Quarterly Reports, provided that the recommendations are simultaneously sent to OIG and included in the subsequent Quarterly Report. DaVita shall include its response and corrective action plans in its corresponding Quarterly Response Report.

4. With each Quarterly Report, the Monitor shall include a certification, signed by the Monitor, stating that the individuals who assisted in fulfilling the oversight obligations required by Sections A, B, C, E, and F, above, possessed the professional competence necessary to perform the work.

H. Annual Reports

The Monitor shall submit via overnight delivery each Annual Report no later than 80 days after the end of the Reporting Period for which the review was performed. With each individual review report, the Monitor shall include a certification, signed by the Monitor, stating that the individuals who worked on the review possessed the professional competence necessary to perform the work.

1. *Compliance Audit Review Report*. The Compliance Audit Review Report shall contain:

a. For each audit reviewed:

i. a description of the audit's objective, protocol, methodology, and results;

ii. the Monitor's assessment of DaVita Dialysis's performance of the audit, including the identification of any issues or deficiencies with the protocol and/or methodology, and any unsupported or incorrect findings; and

iii. to the extent DaVita Dialysis's findings are unsupported or incorrect, the Monitor's findings and the Monitor's justification for those findings.

b. The Monitor's observations and recommendations concerning:

i. the strengths and weaknesses of DaVita Dialysis's performance of the audits;

ii. any improvements to DaVita Dialysis's compliance audit program to address specific problems or weaknesses identified through the Compliance Audit Review; and

iii. other improvements that could strengthen DaVita Dialysis's compliance audit program.

2. *Arrangements Systems Review Report.* The Monitor shall prepare a report based upon each Arrangements Systems Review performed. The Arrangements Systems Review Report shall include the following information:

a. a description of the documentation (including policies) reviewed and personnel interviewed;

b. a detailed description of DaVita Dialysis's systems, policies, processes, and procedures relating to the items identified in Section D.2.a–i above;

c. findings and supporting rationale regarding weaknesses in DaVita Dialysis's systems, policies, processes, and procedures relating to Arrangements described in Section D.2.a–i above; and

d. recommendations to improve DaVita Dialysis's systems, policies, processes, or procedures relating to Arrangements described in Section D.2.a–i above.

3. *Arrangements Transactions Review Report*. The Monitor shall prepare a report based on each Arrangements Transactions Review performed. The Arrangements Transactions Review Report shall include the following information:

a. *Review Methodology*

i. Review Protocol. A detailed narrative description of the procedures performed and a description of the sampling unit and universe utilized in performing the procedures for the sample reviewed.

ii. Sources of Data. A full description of the documentation and other information, if applicable, relied upon by the Monitor in performing the Arrangements Transactions Review.

iii. Supplemental Materials. The Monitor shall request all documentation and materials required for its review of the Focus Arrangements selected as part of the Arrangements Transactions Review, and DaVita Dialysis shall furnish such documentation and materials to the Monitor prior to the Monitor initiating its review of the Focus Arrangements. If the Monitor accepts any supplemental documentation or materials from DaVita Dialysis after the Monitor has completed its initial review of the Focus Arrangements (Supplemental Materials), the Monitor shall identify in the Arrangements Transactions Review Report the Supplemental Materials, the date the Supplemental Materials were accepted, and the relative weight the Monitor gave to the Supplemental Materials in its review. In addition, the Monitor shall include a narrative in the Arrangements Transactions Review Report describing the process by which the Supplemental Materials were accepted and the Monitor's reasons for accepting the Supplemental Materials.

2. *Review Findings*. The Arrangements Transactions Review Report shall include the Monitor's findings with respect to each of the items set forth in Section D.3.a-h, above. In addition, the Monitor shall identify in the Arrangements Transactions Review Report any Focus Arrangement(s) reviewed that a reasonable person would consider a probable violation of the Anti-Kickback Statute, along with the Monitor's basis for reaching that conclusion. The Arrangements Transactions Review Report also shall include observations, findings, and recommendations on possible improvements to DaVita Dialysis's systems, policies, processes, and procedures in place to ensure that all Focus Arrangements comply with the Focus Arrangements Procedures and Focus Arrangements Requirements.

I. Extension of Certain Independent Monitor Responsibilities

OIG may, in its sole discretion, determine that the Monitor should continue to perform his or her responsibilities under Sections A, B, C, F, and G of this Appendix for the full third Reporting Period. If the OIG exercises this discretion, the requirements of Section D of this Appendix shall be tolled for the third Reporting Period.

APPENDIX D

EXECUTIVE FINANCIAL RECOUPMENT PROGRAM

DaVita shall establish and maintain throughout the term of the CIA a financial recoupment program that puts at risk of forfeiture and recoupment an amount equivalent to up to three years of annual performance pay (e.g., annual bonus, plus long-term incentives) for a Covered Executive who is discovered to have been involved in any significant misconduct (Executive Financial Recoupment Program). This financial recoupment program shall apply to Covered Executives who are either current DaVita employees or who are former DaVita employees at the time of a Recoupment Determination.

A. Existing Commitments. Pursuant to DaVita's existing Board-approved clawback policy (the "Clawback Policy"), if the Board of Directors of DaVita (the "Board") determines that any fraud or intentional misconduct by an executive officer or director was a significant contributing factor to the Company having to restate all or a portion of its consolidated financial statements, the Board may (i) require reimbursement of any bonus or incentive compensation paid to such executive or director, (ii) cause the cancellation of restricted stock unit awards and outstanding stock appreciation rights or stock options granted to such executive officer or director, and (iii) seek reimbursement of any gains realized that are attributable to such awards. These actions may be taken if (a) the amount of incentive compensation was calculated based on the achievement of certain financial results that were subsequently reduced due to a financial statement restatement, (b) the executive officer or director engaged in any fraud or intentional misconduct that was a significant contributing factor to the need for the restatement and (c) the amount of the bonus or incentive compensation that would have been awarded to the officer had the financial results been properly reported would have been lower than the amount actually awarded. Under the Clawback Policy, the Company may not seek to recover bonuses or incentive or equity-based compensation paid or which vests more than three years prior to the date the applicable financial statement restatement is disclosed. In addition, pursuant to the terms of certain awards made under the DaVita Healthcare Partners Inc. 2011 Incentive Award Plan (the "LTI Plan"), an award shall terminate, and the Company may seek repayment of gains realized by a recipient of such an award, if the recipient of the award (w) breaches certain restrictive covenants contained in the award, (x) is convicted of a felony, (y) is adjudicated by a court of competent jurisdiction to have committed an act of fraud or dishonesty resulting or intending to result directly or indirectly in personal enrichment at the expense of DaVita, or (z) is excluded from participating in any Federal health care program (the "Award Provisions" and, together with the Clawback Policy, the "Existing Commitments").

If DaVita discovers any employee misconduct that would implicate the forfeitures described in this paragraph, it will evaluate the situation and make a determination about

whether any forfeiture, and the terms of such forfeiture, will be implemented. DaVita reserves the right to amend the Existing Commitments in order to implement any changes required by rules that may be adopted by the Securities and Exchange Commission and the New York Stock Exchange pursuant to the Dodd-Frank Act relating to clawback policies.

B. New Commitments. In addition to the compensation forfeiture provisions of the Existing Commitments already in place with respect to annual bonuses and other forms of incentive compensation, no later than December 31, 2014, DaVita shall modify and supplement the provisions of its annual bonus plan and any plans and programs that provide for the award of long-term incentives (i.e., awards that have vesting dates later than the one year anniversary of the grant date), whether based on or settled in cash or equity, and whether under the LTI Plan or any other plan or program (collectively, the "LTI Program") and any employment agreements, as appropriate, by imposing the following eligibility and repayment conditions on future bonuses and LTI Program awards, as well as establishing the mandatory tolling remedy and additional remedies described below (collectively, "New Commitments") to all Covered Executives. The New Commitments shall apply prospectively to Covered Executives beginning with the 2015 bonus plan year and LTI Program awards (bonuses earned in 2015 and paid out in 2016 and LTI awards granted in 2015).

1. *Covered Executive Bonus Eligibility and Repayment Conditions*. DaVita shall implement an eligibility and repayment condition on annual bonuses designed to survive both the payment of the bonus and the separation of a Covered Executive's employment. This will allow DaVita, as a consequence of a Triggering Event as defined below in Section C, to pursue repayment from the Covered Executive of all or any portion of the bonus monies paid to the Covered Executive. To the extent permitted by controlling law, these bonus eligibility and repayment conditions will survive the payment of the Covered Executive's bonus and the separation of the Covered Executive's employment for a period of three years from the payment of the bonus for the plan year.

Consistent with a Recoupment Determination, as defined below in Section D, DaVita shall endeavor to collect repayment of any bonus from the Covered Executive through reasonable and appropriate means according to the terms of its bonus plan (or employment agreement, as the case may be) and to the extent permitted by controlling law of the relevant jurisdiction. If necessary to collect the repayment, DaVita shall file suit against the Covered Executive unless good cause exists not to do so. For purposes of the Executive Financial Recoupment Program, "good cause" shall include, but not be limited to, a financial inability on the part of the Covered Executive to repay any recoupment amount or DaVita's inability to bring such a suit under the controlling law of the relevant jurisdiction.

2. *LTI Program Awards.* DaVita shall implement, in all long-term incentive awards that vest in three or more years, a right to clawback any unvested equity or target cash value if a Triggering Event occurred within three years after the issuance of the award. In the event the long-term incentive award vesting is less than three years, DaVita shall implement a right to seek recoupment or forfeiture, as the situation requires, of the portion of the award that has vested and/or been paid or otherwise monetized by the Covered Executive within three years from the grant date. This right is designed to survive the issuance of the awards in the event the award vests in less than three years and to survive the separation of a Covered Executive's employment. This will allow DaVita, as a consequence of a Triggering Event as defined below in Section C, to compel disgorgement by the Covered Executive of all or any portion of the award granted to the Covered Executive, including all unvested awards and payments made to, or value realized by, the Covered Executive. This will also provide that, as a consequence of a Triggering Event, DaVita may pursue repayment by a Covered Executive who is a former employee of all or any portion of the last three years' worth of share option and restricted share grants that became vested and were paid during the Covered Executive's last years of employment and following termination of employment.

To the extent permitted by controlling law, these eligibility and repayment conditions shall survive vesting and payment for a period of three years from the Covered Executive's employment termination date. Consistent with a Recoupment Determination, DaVita shall endeavor to collect repayment of these LTI Program awards from the Covered Executive through reasonable and appropriate means and to the extent permitted by controlling law of the applicable jurisdiction. If necessary to collect the repayment, DaVita shall file suit against the Covered Executive unless good cause exists not to do so.

3. *Tolling Remedy*. To the extent permitting by controlling law, for the three years during which the bonus eligibility and repayment conditions exist, if DaVita reasonably anticipates that a Triggering Event has occurred pursuant to Section C of this Appendix, and DaVita has recoupment rights remaining under Sections B.l and B.2 of this Appendix, DaVita shall have the right to notify the Covered Executive that those rights shall be tolled and thereby extended for an additional three years or until the Recoupment Committee determines that a Triggering Event has not occurred, whichever is earlier, to the extent permitted by applicable controlling law.

4. *Additional Remedies*. If, after expiration of the time period specified in Sections B.l and B.2, above, the Recoupment Committee determines that a Triggering Event occurred, DaVita shall make a determination as to whether to pursue available remedies (e.g., filing suit against the Covered Executive) existing under statute or common law to the extent available.

C. Triggering Events

1. DaVita shall revise, as necessary, its bonus plan and LTI Program requirements (and employment agreements, if applicable) to provide that a Covered Executive will be ineligible for an annual bonus or LTI Program award upon discovery of significant misconduct, which shall include violations of a significant DaVita policy, applicable regulations, or law.

2. *Definition of Triggering Event.* The eligibility and repayment conditions described above shall be triggered upon a Recoupment Determination that finds:

a. significant misconduct (e.g., violation of a significant DaVita policy, or applicable regulations or law) by the Covered Executive that, if discovered prior to payment, would have made the Covered Executive ineligible for an annual bonus or LTI Program award in that program year or subsequent program years; or

b. significant misconduct by subordinate employees in the business unit over which the Covered Executive had responsibility that does not constitute an isolated occurrence and which the Covered Executive knew or should have known was occurring that, if discovered prior to payment, would have made the Covered Executive and/or employees in question ineligible for an annual bonus or LTI Program award in that program year or subsequent program years.

D. Administration of Recoupment Program. DaVita shall engage in a standardized, formal process to determine, in its sole discretion, whether a Triggering Event has occurred and, if so, the extent of bonus monies, LTI Program awards, and deferred compensation that are subject to repayment or forfeiture by the Covered Executive, and the most appropriate method for securing recoupment of relevant monies previously paid to or value realized by a Covered Executive. The findings and conclusions resulting from this process shall be referred to as the "Recoupment Determination."

1. *Initiation.* DaVita shall initiate the Recoupment Determination process upon: (1) discovery of potential significant misconduct that may rise to the level of a Triggering Event, or (2) written notification by a United States federal government agency to the Chief Compliance Officer of DaVita of a situation that may rise to the level of a Triggering Event and gives rise (or may give rise) to liability relating to Federal health care programs. This written notification shall either identify the Covered

Executive(s) potentially at issue or provide information (e.g., a description of the alleged misconduct and the applicable time period) to allow DaVita to identify the Covered Executive and alleged misconduct.

2. *Recoupment Committee*. The Recoupment Determination shall be made by a committee of senior executives headed by the Chief Compliance Officer (Recoupment Committee). In the event a Recoupment Determination must be made with respect to a member of the Recoupment Committee, it shall be made by the Board Compliance Committee.

3. *Timeline for Recoupment Determination Process*. DaVita shall initiate the Recoupment Determination process within 30 days after discovery by DaVita or notification, pursuant to Section D.l of this Appendix, of a potential Triggering Event. Absent extraordinary reasons, DaVita shall reach a Recoupment Determination within 90 days after initiation of the determination process.

In connection with making its Recoupment Determination, the Recoupment Committee or appropriate Delegate (as defined below), pursuant to implementing policies and procedures, shall:

a. undertake an appropriate and substantive review or investigation of the facts and circumstances associated with the Triggering Event or any written notifications about potential Triggering Events received pursuant to Section D.l, above;

b. make written findings regarding the facts and circumstances associated with the Triggering Event and any written notifications about potential Triggering Events received pursuant to Section D.l, above; and

c. set forth in writing its determinations (and the rationale for such determinations) about:

   i. whether a Triggering Event occurred;

   ii. the extent of bonus monies, LTI Program award payments made or value realized, or deferred compensation that will be subject to forfeiture and/or repayment by the Covered Executive;

iii the means that will be followed to implement the forfeiture and/or secure the recoupment of performance pay from the Covered Executive; and

iv the timetables under which DaVita will implement the forfeiture and/or attempt to recoup the performance pay.

For purposes of this section, a "Delegate" shall refer to the DaVita personnel to whom the Recoupment Committee has delegated one or more of its required tasks in furtherance of the Executive Financial Recoupment Program.

E. Reporting. The Recoupment Committee shall provide annual reports to the Board (or an appropriate committee thereof) about: (1) the number and circumstances of any Triggering Events that occurred during the preceding year and any written notifications about potential Triggering Events received pursuant to Section D.l, above; (2) a description of any Recoupment Determinations made during the preceding year (including any decision to require or not require forfeiture/recoupment from any Covered Executives, the amount and type of any forfeiture/recoupment, the means for collecting any recoupment, and the rationale for such decisions); and (3) a description of the status of any forfeitures and/or recoupments required under prior Recoupment Determinations that were not fully completed in prior years.

The Recoupment Committee shall also provide annual reports to the OIG about: (1) the number and circumstances of any Triggering Events that occurred during the preceding year and any written notifications about potential Triggering Events received pursuant to Section D.l, above; (2) a summary description of any Recoupment Determinations made during the preceding year (including any decision to require or not require forfeiture/recoupment from any Covered Executives, the amount and type of any forfeiture/recoupment, the method for collecting any recoupment, and the rationale for such decisions); and (3) a description of the status of any forfeitures and/or recoupments required under prior Recoupment Determinations that were not fully completed in prior years.

DaVita shall maintain all of the forfeiture and recoupment commitments set forth in Sections A–E above for at least the CIA Period.

APPENDIX E

EXCLUDED JOINT VENTURES

A. Conditions

In exchange for OIG's agreement that the joint ventures listed below ("Excluded Joint Ventures") will be excluded as parties to the CIA, DaVita agrees to the following:

1. During the CIA Period, each of the dialysis clinics that is owned and operated by the Excluded Joint Ventures will be managed pursuant to a Management Services Agreement with DaVita Dialysis, and all individuals and entities who provide items or services to the Excluded Joint Ventures will be considered Covered Persons to the same extent that individuals and entities who provide items or services to joint ventures that are parties to the CIA qualify as Covered Persons.

2. DaVita shall fulfill the obligations of Section III.P of the CIA (Reportable Events) for any Reportable Event that occurs at a dialysis clinic owned by an Excluded Joint Venture.

3. DaVita shall notify OIG of any sale of its interest in an Excluded Joint Venture or closure of any dialysis clinic that is owned and operated by the Excluded Joint Venture to the same extent as it is required to notify OIG of changes to DaVita Dialysis business units or locations under Section IV of the CIA.

4. OIG shall be able to exercise its rights under Section VII of the CIA to inspect DaVita's books, records, and other documents and supporting materials related to and/or conduct on-site reviews at the dialysis clinics owned and operated by the Excluded Joint Ventures for the purpose of determining DaVita's compliance with the CIA and DaVita Dialysis's compliance with the requirements of the Federal health care programs.

5. Section X of the CIA shall apply to DaVita for any violations of the CIA by DaVita or DaVita Dialysis that involve or occur at an Excluded Joint Venture.

B. List of Excluded Joint Ventures

Item 1.01. Entry into a Material Definitive Agreement.

On October 22, 2014, DaVita HealthCare Partners Inc. (the "Company") entered into a final settlement agreement (the "Settlement Agreement") with the United States of America, acting through the United States Department of Justice and on behalf of the Office of Inspector General of the Department of Health and Human Services (the "OIG"), the Defense Health Agency on behalf of TRICARE, through its General Counsel (collectively, the "United States") and relator David Barbetta, to resolve the pending 2010 and 2011 U.S. Attorney Physician Relationship Investigations. Under the Settlement Agreement, the Company will pay $350 million plus accrued interest from February 8, 2014, at the rate of 2.25% per annum to the United States, plus a civil forfeiture of $39 million (together, the "Settlement Payment"). In addition, the Company has agreed in principle to a settlement of certain state Medicaid claims in the amount of $11.5 million plus interest. The Company had previously announced an agreement in principle in these matters and had accrued an estimated loss contingency reserve of $397 million. In the third quarter of 2014, the Company increased the reserve from $397 million to $414 million.

Under the Settlement Agreement, the United States agrees to release the Company from any civil or administrative monetary liability arising from allegations that the Company caused the submission of claims to the federal health care programs that were ineligible for reimbursement due to certain violations of the Anti-Kickback Statute in connection with certain of its dialysis center joint venture arrangements. Additionally, under the Settlement Agreement the United States and the relator agree to dismissal of the civil action filed by the relator under the qui tam provisions of the False Claims Act, and the OIG agrees, conditioned upon the Company's full payment of the Settlement Payment, to release its permissive exclusion rights and to refrain from instituting proceedings to exclude the Company or any Company affiliates from participating in Medicare, Medicaid or other Federal health care programs.

The Settlement Agreement reflects the Company's disagreement with the United States' claims and contains no admissions of facts or liability on the part of the Company. The Settlement Payment does not include the payment of the relator's expenses, costs and attorney's fees, the amount of which remain under negotiation. The United States has also informed the Company that it has declined to proceed with any criminal charges in connection with this matter.

In connection with the resolution of this matter, and in exchange for the OIG's agreement not to exclude the Company from participating in the federal health care programs, the Company has entered into a five-year corporate integrity agreement (the "Corporate Integrity Agreement") with the OIG. The Corporate Integrity Agreement, a copy of which is attached as Exhibit 10.1 hereto, requires that the Company maintain certain elements of its compliance programs and imposes certain expanded compliance-related requirements during the term of the Corporate Integrity Agreement. Among these requirements are the following:

- Establishment of specific procedures to track and ensure compliance of relationships between its domestic dialysis business and referral sources with the Anti-Kickback Statute.
- Retention of an independent monitor to perform duties under the Corporate Integrity Agreement, which include pre-review and oversight of proposed relationships between its domestic dialysis business and certain referral sources.
- Supplementing the Company's current executive compensation clawback program to specifically address certain compliance-related matters.
- Cooperation with future investigations by the OIG.

In addition to the foregoing, the Corporate Integrity Agreement includes ongoing monitoring, reporting, certification, records retention and training obligations, the formal allocation of certain oversight responsibility to the Board's Compliance Committee, the creation of a Management Compliance Committee and the retention of an independent compliance advisor to the Board.

The Corporate Integrity Agreement also contains certain business restrictions related to a subset of the Company's joint venture arrangements. Pursuant to these obligations, the Company has agreed to: (1) unwind 11 joint venture transactions that were created through partial divestitures to or partial acquisitions from Nephrologists and that cover 26 of the Company's 2,119 clinics; (2) not enter into certain types of partial divestiture joint venture transactions with nephrologists during the term of the Corporate Integrity Agreement and (3) certain other restrictions.

In the event of a breach of the Corporate Integrity Agreement, the Company could become liable for payment of certain stipulated penalties, or could be excluded from participation in federal health care programs. The costs associated with compliance with the Corporate Integrity Agreement could be substantial and may be greater than we currently anticipate.

The foregoing descriptions of the Corporate Integrity Agreement is qualified in its entirety by the full terms of that agreement, which is attached as Exhibit 10.1 hereto and incorporated herein by reference.

Item 7.01. Regulation FD Disclosure.

On October 22, 2014, the Company issued a press release titled "DaVita Kidney Care Finalizes DOJ Settlement." A copy of the press release is attached hereto as Exhibit 99.1.

The information contained in Item 7.01 of this Current Report on Form 8-K (including Exhibit 99.1 attached hereto) is being furnished and shall not be deemed to be "filed" for the purposes of Section 18 of the Securities Exchange Act of 1934, as

amended (the "Exchange Act"), or otherwise subject to the liabilities of that section and shall not be incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such filing.

Item 9.01. Financial Statements and Exhibits.

PRESS RELEASE

DaVita Kidney Care Finalizes DOJ Settlement

Resolves all Pending Issues Regarding Joint Ventures in Question

DENVER (Oct. 22, 2014) – DaVita Kidney Care, a division of DaVita HealthCare Partners Inc. (NYSE: DVA) today announced it has finalized its comprehensive settlement with the U.S. Department of Justice and certain other federal agencies into allegations of improperly structured joint ventures with certain physician partners.

As announced in February of this year, DaVita Kidney Care will be subject to a Corporate Integrity Agreement and an independent monitor to oversee certain future joint ventures. The agreement also includes a repayment to the government and a provision requiring executive certification of quarterly and annual compliance reports.

The following statement is attributable to DaVita Kidney Care:

We are pleased to announce a civil resolution of the government's thorough review of our joint venture practices that covered more than a decade's worth of transactions. Patient care was never at issue, nor were billing or payment practices.

We are proud of our commitment to compliance over our 15-year history. We have worked incredibly hard to get things right and it is our belief there was no intentional wrongdoing.

We believe this settlement is the right thing for our teammates, partners and shareholders. It allows us to move forward with heightened clarity and transparency, both with regulators and our physician partners. As part of the settlement we will undo 11 joint venture transactions covering 26 of our 2,119 clinics.

We thank our teammates and physicians for their uninterrupted dedication in providing the highest quality care in the industry to the nearly 170,000 kidney care patients we serve in the U.S. This commitment is reflected in the government's recent annual Quality Improvement Program report card which shows DaVita leading the industry in all quality indicators measured.

About DaVita Kidney Care

DaVita Kidney Care is a division of DaVita HealthCare Partners Inc. a Fortune 500(r) company that, through its operating divisions, provides a variety of health care services to patient populations throughout the United States and abroad. A leading provider of dialysis services in the United States, DaVita Kidney Care treats patients with chronic kidney failure and end stage renal disease. DaVita Kidney Care strives to improve patients' quality of life by innovating clinical care, and by offering integrated treatment plans, personalized care teams and convenient health-management services. As of June 30, 2014, DaVita Kidney Care operated or provided administrative services at 2,119 outpatient dialysis centers located in the United States serving approximately 168,000 patients. The company also operated 84 outpatient dialysis centers located in 10 countries outside the United States. DaVita Kidney Care supports numerous

programs dedicated to creating positive, sustainable change in communities around the world. The company's leadership development initiatives and social responsibility efforts have been recognized by Fortune, Modern Healthcare, Newsweek and WorldBlu. For more information, please visit DaVita.com.

DaVita Kidney Care Announcement Regarding Atlanta Lawsuit

Company nears settlement of longstanding private case

DENVER, May 4, 2015 /PRNewswire/ -- DaVita Kidney Care, a division of DaVita HealthCare Partners Inc. (NYSE: DVA) and a leading provider of kidney care services, today announced the next step in an agreement in principle for a settlement in an Atlanta-based case, which previously was announced on April 15. The lawsuit was brought by private attorneys regarding allegations of medication wastage from 2003 to 2010.

"We should be held to high standards of accountability," said Javier Rodriguez, CEO of DaVita Kidney Care. "Our 67,000 teammates across 11 countries look forward to putting this behind us. We can now renew our focus on collaborating with regulators to avoid situations like this going forward."

"Although we believe strongly in the merits of our case, we decided it was in our stakeholders' best interests to resolve it," said Chief Legal Officer for DaVita HealthCare Partners Kim Rivera. "The potential mandatory penalties for being found in the wrong in even a small percentage of instances were simply too large."

"Our current compliance program is already much more comprehensive than what we had five to 10 years ago," said Chief Compliance Officer for DaVita HealthCare Partners Jeanine Jiganti. "We will use this experience to take our effectiveness to a whole new level going forward."

DaVita Kidney Care thanks its teammates and physicians for their dedication to providing the highest quality kidney care to the more than 170,000 patients they serve. This commitment to their patients is reflected in the government's two key scoring reports: The Quality Incentive Plan and the Five-Star Rating System. DaVita Kidney Care is the clear national leader in kidney care clinical outcomes, outperforming the industry in both.

About DaVita Kidney Care

DaVita Kidney Care is a division of DaVita HealthCare Partners Inc., a Fortune 500® company that, through its operating divisions, provides a variety of health care services to patient populations throughout the United States and abroad. A leading provider of dialysis services in the United States, DaVita Kidney Care treats patients with chronic kidney failure and end stage renal disease. DaVita Kidney Care strives to improve patients' quality of life by innovating clinical care, and by offering integrated treatment plans, personalized care teams and convenient health-management services. As of March 31, 2015, DaVita Kidney Care operated or provided administrative services at 2,197 outpatient dialysis centers located in the United States serving approximately 174,000 patients. The company also operated 93 outpatient dialysis centers located in 10 countries outside the United States. DaVita Kidney Care supports numerous programs dedicated to creating positive, sustainable change in communities around the world. The company's leadership development initiatives and social responsibility efforts have been recognized by Fortune, Modern Healthcare, Newsweek and WorldBlu. Press Release April 2018

DaVita News

DaVita Continues to Improve Patient Care, Leads in Five-Star Quality Ratings

Company earns its most ever three-, four- and five-star rated centers

DENVER, April 27, 2018 /PRNewswire/ -- DaVita Kidney Care, a division of DaVita Inc. (NYSE: DVA) and a leading provider of kidney care services in the United States, today announced it has led the industry for the fourth year by meeting or exceeding Medicare standards in the Centers for Medicare & Medicaid Services (CMS) Five-Star Quality Rating System (Five-Star).

DaVita's focus on helping improve patients' health and quality of life is demonstrated in this year's Five-Star ratings, where the company has more three, four and five star centers than it has ever had in the history of the program. The results mark DaVita's best quality performance in the program to date.

"The entire kidney care community has come together through Five-Star to raise the bar on quality year over year," said Javier Rodriguez, CEO for DaVita Kidney Care. "It's time to honor our collective success—and our commitment to clinical improvement—in the best interest of our patients and their families."

The broader kidney care community has also continued to improve with an increase in the number of dialysis centers receiving a three-, four- or five-star quality rating by 10 percent since 2016. Other meaningful improvements have been demonstrated in publicly reported clinical quality measures, including:

- 3 percent improvement in dialysis adequacy, which measures how well dialysis removes waste from the blood.
- 8 percent improvement in bloodstream infections, which are one of the leading causes of hospitalizations among dialysis patients.

"Improved clinical quality means patients have greater access to better care. That is the real victory of Five-Star," said Allen R. Nissenson, M.D., FACP, chief medical officer for DaVita Kidney Care. "DaVita continues to evolve our patient-centered clinical programs to deliver optimal care so our patients have a better chance of staying home with loved ones and friends instead of being in and out of the hospital."

All center ratings can be found on the Dialysis Facility Compare website.

To learn more about DaVita Kidney Care's commitment to quality, visit DaVita.com/Five-Star.
