Webinar Ground Rules

- We are recording this webinar and will share it when it is ready.
- Comments are disabled for the webinar.
- Please use the Q&A panel for questions.
- We will go over questions at the end of the webinar.
- Webinar slides were linked on today’s Zoom reminder email.
  - We will link the slides in chat as well.
Some comments on this webinar

OUR VISION
• It is the Department’s vision to help people attain their full potential- by promoting these tools we hope to reduce health barriers and support different communities in the state.

OUR GOAL FOR THIS WEBINAR
• To assist schools and health care providers who support vaccinations and health screenings.
• To ensure the equity of children in school and child care while meeting public health immunization needs.

NOTE
• This webinar and the tools shared within do not replace the need to have a qualified interpreter to facilitate communication or do sight translations when needed.
Why is Ukrainian records interpretation important?

• Since 1979, Washington state has welcomed refugees who flee persecution in their own country.
• Over the past 10 years, Washington has welcomed 30,000 refugees from over 70 countries. This includes 6,500 Ukrainian refugees.
• The national United for Ukraine program streamlines the process for Ukrainian citizens to stay temporarily because of the Russian/Ukrainian conflict.
• Washington is in the top five states for supporting Ukrainians in the UfU campaign, with 10,082 Ukrainians.
• The Department of Health has seen increasing requests for help with Ukrainian health records.
Today's Presentation

- Introduce new toolkit for record review and interpretation
- Guidelines for record review
- Ukrainian immunization records
- Comparison of Ukrainian and US vaccination schedules
- School and child care vaccination requirements and conditional status attendance
- Resources
- Questions
UKRAINIAN VACCINE RECORDS INTERPRETATION
Translation Guide Toolkit – NEW!

Translation Guide Toolkit created in partnership between
Spokane Regional Health District
&
Washington State Department of Health
Translation Guide Toolkit

Has:

- Guidelines for evaluating records
- Overview of vaccinations children typically receive in Ukraine
- US vaccination schedule
- Examples of vaccination records from Ukraine in Ukrainian and Russian
- And more!
Guidelines for Record Review

Avoid confusing month and day

• Ukraine uses the same calendar as the United States, but
• Dates are generally recorded using the European format of DD/MM/YY
• March 15, 2020
  • Ukrainian: 15/03/20
  • US: 03/15/20

Review both the original vaccine record and the translation (if available), to ensure general consistency;
• for example, name, date of birth, and total number of vaccines
Guidelines for Record Review

If a translation is not available

- Reference the Centers for Disease Control and Prevention’s (CDC) Pink Book for generally used terms for vaccines in Ukrainian
  - See Pink Book Appendix B: Vaccines.
- Use a reputable translation service
  - Vax4School.org (Вакцинация. Документы) parents can request volunteer assistance with vaccine record translation
Guidelines for Record Review

If a vaccine record is not available,

• Reference this CDC guidance: Approaches to evaluation and vaccination of persons vaccinated outside the United States who have no (or questionable) vaccination records.
• Presume that the child has not received the vaccine in question
Ukrainian Vaccination Records

- Ukraine does not issue a national immunization card
- Vaccine records vary by clinic and year of vaccine administration
  - Printed from a hospital or clinic
  - Handwritten often in the first few pages of medical history book
Toolkit: Ukrainian and Russian Name Translations

- Lists the vaccine in Ukrainian and Russian
- Both printed and cursive examples
## Toolkit: Ukrainian and Russian Name Translations

This toolkit lists the vaccine in Ukrainian and Russian. Both printed and cursive examples are provided.

Toolkit: Ukrainian Vaccination Record Examples

Medical book example with handwritten lifelong records

Immunizations are in the first few pages
Toolkit: Ukrainian Vaccination Record Examples

Example of a clinic or hospital record
Example of a Hib record

*Haemophilus Influenzae Type B (Hib)*

Ukraine’s immunization schedule for Hib is consistent with the U.S. schedule. Record of vaccination can be written in English, as an abbreviation, or with the entire word written out.

Translation

Haemophilus:
08.16.19 0.5 lot ROB361b
09.16.19 0.5 lot PJU81b
10.30.19 0.5 lot PJU81b

Figure 8. Hib vaccination record on a clinic/hospital immunization form.

Figure 9. Hib vaccination record with Hib abbreviated on a clinic/hospital immunization form.

*Vaccine doses may be acceptable with fewer than listed depending on when they were given. **Health care provider verification of history of chickenpox disease is also acceptable.

Students must get vaccine doses at the correct timeframes to be in compliance with school requirements. Talk to your health care provider or school staff if you have questions.

Find information on other important vaccines that are not required for school at: [www.immunize.org/child/schedules](http://www.immunize.org/child/schedules).

INDIVIDUAL VACCINE REQUIREMENTS SUMMARY

Guidelines on Immunizations Required for Child Care/Preschool and School Entry in Washington State

SCHOOL YEAR 2022-2023

INTRODUCTION

The Individual Vaccine Requirements Summary (IVRS) is a companion piece to the Vaccines Required charts for child care/preschool and school entry. The purpose of the summary is to assist school and child care staff and those working with student information systems to understand state immunization requirements and the immunization schedule. Both the requirements and schedule are based on the recommendations of the national Centers for Disease Control and Prevention (CDC) Advisory Committee on Immunization Practices (ACIP).

Requirements are listed in alphabetical order by vaccine. In each section, you will find detailed information about the immunization schedule, the exceptions to the schedule, and the catch-up schedule. Exceptions may apply when the ACIP recommendations are not followed.

Find the ACP schedules here: www.cdc.gov/vaccines/schedules/hcp/child-adolescent.html

4. Catch-up immunization schedule for students ≥7 years of age not fully vaccinated with DTaP:
   Student must get one Tdap vaccine followed by additional doses of Td or Tdap if needed. DTaP given in error to a student ≥7 years of age in a catch-up schedule is valid for the Tdap.
   a. A student who has not received any DTaP/DT vaccines before the age of 7 must get one dose of Tdap followed by 2 doses of Td or Tdap.
      i. The interval between dose 1 and dose 2 must be ≥4 weeks.
      ii. The interval between dose 2 and dose 3 must be ≥6 months.
   b. If DTaP/DT dose 1 was given <12 months of age, a minimum of 4 total doses of a combination of DTaP, Tdap, or Td are needed. Tdap must be included.
      i. The interval between dose 1, dose 2, and dose 3 must be ≥4 weeks each.
      ii. The interval between dose 3 and dose 4 must be ≥6 months.
      iii. If 4 doses of DTaP given <4 years of age, but none ≥4 years, Tdap must be given ≥7 years of age.
   c. If DTaP/DT/Tdap/Td dose 1 was given ≥12 months of age, a minimum of 3 total doses of a combination of DTaP, Tdap, or Td are needed. Tdap must be included.
      i. Interval between dose 1 and 2 must be ≥4 weeks each.
      ii. Interval between dose 2 and dose 3 must be ≥6 months.
      iii. If 4 doses of DTaP given <4 years of age, but none ≥4 years, Tdap must be given ≥7 years of age.

IPV (trivalent) is used for the 1st two doses after which OPV or IPV is used

If polio dose 3+ is not listed as OPV or IPV, consider it to be OPV

OPV on or after 04/01/2016 is bivalent

Only trivalent polio vaccine is acceptable in the US schedule

OPV doses on or after 04/01/2016 do not count toward series completion

Give additional doses of IPV as needed to complete the series: Birth-18 Years Immunization Schedule | CDC

Antibody titer immunity is acceptable only if there is documentation of immunity to all 3 types of poliovirus

- Testing for type 2 not available since 2016

DTaP is used for the 1st four doses

DT is used for the pre/school entry booster and Td is used for the decennial booster

US schedule is DTaP for the pre/school entry booster and Tdap at age 11-12 as adolescent pertussis booster

Children and adolescents may need DTaP or Tdap to meet the pertussis requirement

• See the Individual Vaccine Requirements Summary for more information

There are no acceptable antibody titer tests to document immunity to pertussis

1 dose required for child care
2 doses required for preschool/school entry at age 4 years or older

- **Minimum interval between doses**
  - Age 4 though 12 years = 3 months
  - Age 13 and older = 28 days

Healthcare provider documentation of history of chickenpox disease is acceptable to document immunity
Healthcare provider documentation of antibody titer sufficient for immunity is acceptable
### Vaccines Catch-Up Schedule

#### Conditional Status Catch-Up Schedule

For Age 4 Years and Older

Children can enter and stay in school or child care in conditional status if they are catching up on the vaccines required to document immunity. Conditional status allows a child to attend school or child care while waiting for their next vaccine dose according to the national immunization catch-up schedule. When the child’s next vaccine dose comes due, they have 30 calendar days to turn in documentation showing their vaccination. If a child is catching up on multiple vaccines, conditional status continues in a similar manner until all of the vaccines needed to document full immunity are completed.

Before attending in conditional status, a child must have at least the first dose of the vaccine series. Additionally, the child can’t be currently due for any additional doses. Conditional attendance is contingent upon documentation of the remaining required immunizations as shown in the timelines below.

Timelines of vaccine catch-up schedule for children age 4 years and older.
SCHOOL AND CHILD CARE VACCINE REQUIREMENTS
AND
CONDITIONAL STATUS
School/Child Care Entry Requirements

On or before the first day of attendance children must have turned in documentation of:

- Full immunization by vaccination or antibody titer for the diseases for which full immunization is required; or
- Completed Certificate of Exemption; or
- Initiation of a schedule towards full immunization

Documentation must be turned in before the child can start school or child care.

Exception:

- McKinney-Vento and children in foster care without immunization documentation must be enrolled and cannot be excluded
Hardcopy CIS

Fill out with vaccination dates from the vaccination record

Attach a copy of the vaccination record and a translation (if applicable)

School staff will compare the dates on the translation and verify for accuracy
Sometimes children are behind on their vaccinations

Before starting school or child care they must:

- Have all vaccinations they are eligible to receive on or before the first day of attendance
- Not be currently due for any of the additional required doses
A 6 year old child entering 1st grade has:

- 4 doses DTaP before age 4 and a DT at age 5
- 2 doses of IPV before age 4 (has OPV doses after 04-01-16 which do not count)
- 1 dose of MMR
- No varicella or Hepatitis B

Must get:

- Dose 5 of DTaP (for the pertussis) – series complete
- Dose 3 of IPV – series complete
- Dose 2 of MMR – series complete
- Dose 1 of varicella before starting school (then can attend in conditional status)
- Dose 1 of Hepatitis B before starting school (then can attend in conditional status)
Conditional Status

Vaccine doses in a series are spread out with minimum intervals, so some children may have to wait a period of time before finishing their vaccinations.

Conditional status allows them to attend school or child care while waiting for their next vaccine dose to come due according to the national immunization catch-up schedule.
Children attending school in Conditional Status must:

• Have all vaccinations they are eligible to receive on or before the first day of attendance

• Not be currently due for any of the additional required doses

• Parent/guardian must acknowledge conditional status entry and timelines on the CIS
Validated CIS

Place for parent/guardian to acknowledge child’s conditional status entry

Signature is required if the child will be attending in conditional status
Children can attend in conditional status until the next dose can be given plus an additional 30 days to get the dose.

- Conditional status continues in a similar manner until all of the required vaccines are complete.
- If the 30 days expires without documentation of immunization or an exemption the child is out of compliance
- Children out of compliance must be excluded. RCW 28A.210.120
Conditional Status – Timeline Example

A child entering kindergarten has had all vaccines except MMR dose 2. MMR dose 1 was administered one day before the start of school:

- They can start school in conditional status for 28 days (waiting for MMR dose 2 recommended date) plus an additional 30 days in which to get the dose.
Conditional Status

Student stays in school until next dose is due.

Dates follow the recommended dates of the ACIP Catch-Up Schedules.
Student has 30 days from due date to turn in documentation.

Conditional Status continues until all of the series are complete.
If the 30 days expires without documentation of immunization or an exemption the student is out of compliance

Students out of compliance must be excluded. RCW 28A.210.120
Sample Parent Letter

Notice of Child’s Conditional Immunization Status - SAMPLE LETTER

[INSERT DATE]

Dear Parent or Guardian of [INSERT CHILD’S FULL NAME],

Your child is attending [INSERT SCHOOL OR CHILD CARE NAME], with a Conditional Immunization Status. Children can enter and stay in school or child care in conditional status if they are catching up on required vaccines for school or child care entry. Vaccine series doses are spread out among minimum intervals, so some children may have to wait a period of time before finishing their vaccinations.

Students in conditional status may remain in school while waiting for the minimum valid date of the next vaccine dose plus another 30 days’ time to turn in documentation of vaccination.

Our records show that you child is due for the next dose of the vaccine/s marked with an “X” on [INSERT DATE]:

☐ MMR (measles, mumps, rubella) ☐ PCCP (pneumococcal)
☐ varicella (chickenpox) ☐ IPV (polio)
☐ dTap (diphtheria, tetanus, pertussis) ☐ Hepatitis B

Hib (Haemophilus influenza type b)

Documentation must be turned into school/child care by [INSERT DATE – 30 DAYS AFTER VACCINE DUE DATE]

If we do not receive documentation by due date above, by law we must send you a Notice of Exclusion for Immunization Noncompliance. This notice will explain that your child cannot attend school/preschool/child care until you provide the required immunization documentation, RCW 26.20.310. Valid documentation includes medical records showing vaccination, evidence of immunity to the disease in question, or a completed Certificate of Exemption (COE) form.

What do vaccines cost?

In Washington, all children under age 19 can get vaccines at no cost from their health care provider. Providers may charge an office visit fee and a fee to give the vaccine, called an administration fee. If you cannot pay the administration fee, you can ask your health care provider to waive the cost. You can also use https://vaccinefinder.org to find other places that vaccinate near you, such as pharmacies.

Where do I get more information? Where do I get forms?

For more information about immunization requirements, including links to the forms mentioned above, visit https://www.doh.wa.gov/SCC. You can reach us at [INSERT PHONE #] for help or more information.

Sincerely,

[INSERT NAME AND TITLE OF EMPLOYEE, AND NAME OF SCHOOL]
