Fertility and COVID-19 Vaccines -

Centers for Disease Control and Prevention (CDC) and American College of Obstetricians and Gynecologists (ACOG) have published information and guidelines on the impact of COVID-19 vaccines on fertility. The following are some key points:

1. There is no evidence to suggest that COVID-19 vaccines affect fertility.
2. COVID-19 vaccines are safe to use during pregnancy.

For more information, please visit the CDC and ACOG websites.

Plan Parenthood

COVID-19 misinformation and vaccine hesitancy are important issues to address. It is crucial to ensure that accurate information is disseminated to the public in order to promote vaccine confidence and uptake. Planned Parenthood and other health organizations continue to work towards this goal.
