

2021-2023 Sampling Plan: Lead in School Drinking Water

The Lead in School Drinking Water program is part of the state's efforts to reduce children's overall environmental lead exposure. Under requirements of [RCW 28A.210.410](#), all public schools built or with all plumbing replaced before 2016 must have all drinking water outlets tested for lead once between 2014 and 2026 and then every five years.

Options for sampling and testing

Schools have two options for sampling and testing the drinking water for potential lead contamination:

1. The Department of Health (DOH) will sample and test – at no cost to the school district, or
2. The district can contract for sampling and testing in alignment with the technical guidance provided by DOH. The district will then provide the results to DOH following procedure and deadlines determined by DOH.

Which schools will DOH test?

DOH worked with the Office of Superintendent of Public Instruction (OSPI) to identify schools needing to test water for lead. Every year, DOH will identify a group of schools from that list to include for testing. As required by [RCW 43.70.830](#), prior to adding a school to this plan, DOH must contact the school to determine whether the school has contracted, or is planning to contract, for sampling and testing. Please note, if we do not hear back from a school after two attempts, they will be included in the testing plan.

This plan will allow the schools, school community, and the public to know which schools are up for sampling and testing in the next two school years.

Criteria to be added to the DOH sampling list:

1. School building and plumbing older than 2016
2. Drinking water in the school not sampled for lead since 2014
3. School will not hire an outside contractor to sample and test school's drinking water

DOH will continue to update the list below at least yearly as new schools are added and schools are tested.

Actions after testing

After testing occurs, DOH will share results with the schools. Schools are required to post their results publicly. DOH also posts results to our website. Schools have six months to adopt an action plan outlining steps they will take to remediate the outlets testing over 5 parts per billion. The school must provide the public with notice and opportunity to comment on the school action plan before it is adopted. More information about requirements can be found on our [website](#).
