

Rx Fraud Alert Report

The commission is providing information gathered from [this web-based form](#) to communicate potentially forged or stolen prescription incidents to pharmacies/pharmacists in Washington State. The information is listed on [Rx Fraud Alert Webpage](#) exactly as it was received. The accuracy of the information is not confirmed or verified prior to transmission of the report. You may also report to the [Prescription Monitoring Program](#) as well as contact the [DEA](#) if you encounter a potentially forged or stolen controlled substance prescription.

I have alerted the DEA and the providers DEA number was flagged however No patient names that were used have ever been under the care of this provider although some can be found within our electronic health record system. Some do not exist in our health record system at all. The person that dropped off the second false hard script was described as early to mid- 20's male. If this is the same person he is claiming his name is Daniel Smell and either him or his alleged sister Amanda Drake would pick up the prescriptions for their mother or father as the fake actual patient is "too sick to come in because they have cancer". The people have called in the majority of these prescriptions however two people hand delivered fake fraudulent print out prescriptions....

We have gotten calls from several pharmacies verifying controlled prescriptions written by Dr. Kaya Hasanoglu when in fact they are not our patients. They faked the doctor's signature. Some pharmacies already filed a police report. We are hoping you can help us resolve this.
