

Certificate of Need Application Kidney Disease Treatment Facilities

Certificate of Need applications must be submitted with a fee in accordance with Washington Administrative Code (WAC) 246-310-990.

Application is made for a Certificate of Need in accordance with provisions in Revised Code of Washington (RCW) 70.38 and WAC 246-310, rules and regulations adopted by the Washington State Department of Health. I attest that the statements made in this application are correct to the best of my knowledge and belief.

Identify the Planning Area for this project as defined in WAC 246-310-800(15)

Mason County ESRD Planning Area

If this facility has previously been approved to add special circumstance stations, provide the Certificate of Need number(s) for the approval.

DAVITA

MASON COUNTY DIALYSIS EXPANSION

SPECIAL CIRCUMSTANCES CERTIFICATE OF NEED APPLICATION

EXECUTIVE SUMMARY

Total Renal Care, Inc., a subsidiary of DaVita Inc. (hereafter "DaVita"), proposes to expand the DaVita Mason County Dialysis in the Mason County ESRD Planning Area (hereafter, "Mason County") from five (5) Certificate of Need-approved stations plus one (1) Certificate of Need-exempt isolation station to seven (7) Certificate of Need-approved stations plus one (1) Certificate of Need-exempt isolation station, an increase of two (2) stations. This proposal falls under the special circumstances application eligibility and process described in WAC 246-310-818. The proposed expanded facility will provide nearly immediate enhanced access to ESRD patients in Mason County. Total Project Costs for the expanded center will be \$61,174, and will be financed through operational funds on-hand allocated for the project. There are no associated Indirect Project Costs.

The proposed expanded dialysis facility will continue to occupy the existing 6,060 rentable square feet of leased space, located at **1930 Olympic Hwy N., Shelton, WA 98584**.

This geography, as defined by the Department, is currently served by two approved facilities: DaVita Mason County Dialysis and FKC Shelton Dialysis.

DAVITA

MASON COUNTY DIALYSIS EXPANSION SPECIAL CIRCUMSTANCES CERTIFICATE OF NEED APPLICATION

I. APPLICANT DESCRIPTION

1. Provide the legal name(s) and address(es)of the applicant(s).

The legal name of the applicant is Total Renal Care, Inc., a subsidiary of DaVita Inc. (hereafter, "DaVita") d.b.a. Mason County Dialysis. DaVita's address is DaVita Inc., 2000 16th Street, Denver, CO 80202.

We also provide the following additional information regarding DaVita:

- DaVita is a leading provider of dialysis services in the United States for patients suffering from chronic kidney failure, also known as End Stage Renal Disease, or ESRD. We currently operate or provide administrative services to more than 2,500 outpatient dialysis centers located in the United States, serving approximately 220,000 patients.
- Consistent with DaVita's mission statement to "Be the Provider, Partner and Employer of Choice," serving patients by providing quality clinical outcomes is paramount. DaVita has instituted a nationally recognized Dialysis Quality Outcomes program and maintains an aggressive Continuous Quality Improvement (CQI) program. The DaVita philosophy is patient-focused in serving the chronically ill dialysis patient by addressing all dimensions of the dialysis patient's illness state and by providing quality services through a clinical outcomes measurement and management approach to treating ESRD.
- DaVita is committed to serving chronic kidney disease patients in union with nephrologist partners.
 DaVita Mason County Dialysis will continue to carry out this commitment through:
 - Serving patients where they live and work.
 - Providing the highest quality patient care.
 - Providing proven infrastructure and continuity to grow rapidly and cost effectively in an underserved community.
 - Supporting new patients All DaVita dialysis centers within Washington State provide regular, in-center education and training with the goal to empower patients through information about their disease and ability to self-manage their care.
 - DaVita offers Kidney Smart, a non-branded, community-based education program for Chronic Kidney Disease (CKD) patients and their families.
 - DaVita offers access to a national non-profit kidney disease advocacy program: Dialysis Patient Citizens.
 - DaVita dialysis centers partner with a specialty-focused pharmacy service, WellDyneRx, for dialysis patients.

 DaVita's Guest Services Program provides assistance in locating other dialysis facilities for patients wishing to travel or relocate.

- DaVita will contribute to the community through increased taxes, thereby increasing the community's ability to provide support services for the ESRD patient population.
- 2. Identify the legal structure of the applicant (LLC, PLLC, etc) and provide the UBI number.

Total Renal Care, Inc. is a subsidiary of DaVita Inc., a publically held, for-profit Delaware corporation. Total Renal Care's UBI number is 601-134-681.

3. Provide the name, title, address, telephone number, and email address of the contact person for this application.

Jenna Gilbreath – Director, Special Projects
DaVita Inc. – North Star Division Office
32275 32nd Ave S.

Federal Way, WA 98001

Phone Number: (724) 462-7102 Email: jenna.gilbreath@davita.com

4. Provide the name, title, address, telephone number, and email address of the consultant authorized to speak on your behalf related to the screening of this application (if any).

Not Applicable

5. Provide an organizational chart that clearly identifies the business structure of the applicant(s).

DaVita is governed by its Board of Directors. Board of Director meetings are held quarterly. Organization charts are included as Appendix 1.

- 6. Identify all healthcare facilities owned, operated by, or managed by the applicant.
 This should include all facilities in Washington State as well as out-of-state facilities.
 The following identifying information should be included:
- 7. Facility Names(s)
- 8. Facility Location
- 9. Facility CMS Certification Number
- 10. Facility Accreditation Status
- 11. Operation date of most recent CN approval or exemption

DaVita is a leading provider of dialysis services in the United States for patients suffering from chronic kidney failure, also known as End Stage Renal Disease, or ESRD. We currently operate or provide administrative

services to approximately 2,500 outpatient dialysis centers in the United States, serving approximately 220,000 patients (davita.com). All DaVita facilities nationally, and their CMS license and accreditation status, are listed in Appendix 2. All applicable state regulatory agencies are listed in Appendix 13.

State licensure and accreditation is not required for outpatient dialysis facilities in Washington State. However, to establish and maintain federal Medicare certification, each DaVita facility undergoes the process established by the state in which the facility operates. Medicare certification is established through surveys conducted by the Department of Health Facility and Licensing Division. All operating Washington State DaVita facilities are Medicare-certified. All operating DaVita facilities listed in Appendix 2 are Medicare certified or awaiting survey as noted.

DaVita owns, operates or has been approved to operate forty-nine (49) dialysis facilities in Washington State. These facilities, along with their latest CN number and operational date is included below.

II. Project Description

1. Provide the name and address of the existing facility.

The expanded DaVita Mason County Dialysis will provide kidney dialysis services for residents of the Mason County ESRD planning area. The location is:

DaVita Mason County Dialysis

1930 Olympic Highway North Shelton, WA 98584

2. If this facility has previously been approved to add special circumstance stations, explain why this project is consistent with WAC 246-310-818(3).

DaVita Mason County Dialysis has not previously been approved to add special circumstance stations. This question is not applicable.

3. Provide a detailed project description of the proposed project.

This project will add two (2) new stations to the service area, and will do so in an at-capacity facility, given the nature of qualifying for eligibility for a special circumstances application. This additional capacity in DaVita Mason County Dialysis will provide additional shift options for existing patients and allow for admission of dialysis patients that might otherwise be required to dialyze in facilities farther from their homes, including in neighboring planning areas. The Mason County facility operated at 7.21 patients per station in the most recent six months. The continued census growth and close-to-capacity status of the Mason County facility necessitates additional capacity via special circumstances.

Patients of the Mason County Dialysis will also maintain their access to DaVita national programs. The proposed dialysis centers will offer access to a specialty-focused pharmacy partner, WellDyneRx. Patients and their families will also have access to the Guest Services Program that provides assistance in locating other dialysis facilities for patients wishing to travel or relocate. Additionally, the Kidney Smart Education Program, which is described in Appendix 19, offers robust education for those in the community whose disease may not have yet progressed to ESRD, generating greater awareness of how best to self-manage their care and what treatment options are available to discuss with their nephrologists.

4. Identify any affiliates for this project, as defined in WAC 246-310-800(1).

This question is not applicable, as DaVita Inc., through Total Renal Care, Inc., is the sole owner of Mason County Dialysis, and will remain so upon the completion of this project. It therefore has no affiliates for this project.

5. With the understanding that the review of a Certificate of Need kidney dialysis Special Circumstance application typically takes three and a half months, provide an estimated timeline for project implementation using the table on the following page.

The table below outlines the anticipated dates of approval, design completion, construction commencement and completion, and preparation for survey based on an approval date, assuming all variables operate according to historical trends. DaVita continues to refine and streamline the facility development process.

Please note that this timeline assumes that DaVita's project is approved in February 2023 and that the CON is uncontested after approval. If the approval date is pushed into the future and/or the CON is legally contested, this timeline would need to adjust and be pushed into the future accordingly.

| | Table 1 son County Dialysis s of Project Implementation |
|---------------------------------------------|---------------------------------------------------------------|
| Event | Anticipated Month, Day, and Year |
| Project Approval | February 15, 2023 |
| Design Complete | February 15, 2023 |
| Construction Commenced | N/A |
| Construction Completed | N/A |
| Facility Prepared for Survey/ "Operational" | March 1, 2023 |

6. Identify the Month/Day/Year that the additional station(s) are expected to be operational as defined in WAC 246-310-800(12).

DaVita expects that the expansion stations will be operational and prepared for survey as defined in WAC 246-310-800(12) by **March 2023**, based on a February 15, 2023 approval date.

7. Provide a detailed discussion of existing services and how these would or would not change as a result of the project. Services can include but are not limited to: incenter hemodialysis, home hemodialysis training, peritoneal dialysis training, a late shift (after 5:00 pm), etc.

DaVita Mason County Dialysis does not expect its existing services to change as a result of the project, except for its ability to offer additional capacity for in-center hemodialysis patients, due to an increase from to five (5) to seven (7) approved stations. Mason County Dialysis currently offers services to:

- Hemodialysis patients who dialyze in the chronic setting,
- Hemodialysis patients requiring isolation,
- Hemodialysis patients requiring treatment shifts that begin after 5:00 PM,
- Continuous Ambulatory Peritoneal Dialysis (CAPD) patients, and

Continuous Cycle Peritoneal Dialysis (CCPD) patients.

Additional services provided include:

- Training and support for patients for peritoneal dialysis,
- Treatment for visiting hemodialysis patients from other areas outside Mason County, and
- Community education for patients recently diagnosed with Chronic Kidney Disease (CKD).
- 8. Fill out the table below identifying the current and proposed configuration of dialysis stations. Note an exempt isolation station defined under WAC 246-310-800(9) is not counted in the methodology, but is included in the total count of certified in-center stations.

| | Е | Before | After | | | |
|------------------------|-----------|------------------|-----------|------------------|--|--|
| | CMS | Stations Counted | CMS | Stations Counted | | |
| | Certified | in the | Certified | in the | | |
| | Stations | Methodology | Stations | Methodology | | |
| General Use In-center | 5 | 5 | 7 | 7 | | |
| Stations | | | | | | |
| Permanent Bed Stations | 0 | 0 | 0 | 0 | | |
| Exempt Isolation | 1 | 0 | 1 | 0 | | |
| Stations | | | | | | |
| Isolation Stations | 0 | 0 | 0 | 0 | | |
| (not exempt) | | | | | | |
| Total Stations | 6 | 5 | 8 | 7 | | |

9. Provide a general description of the types of patients to be served by the facility at project completion.

DaVita Mason County Dialysis currently serves patients requiring in-center hemodialysis (both chronic and acute) and peritoneal dialysis (CAPD and CCPD). In addition, it serves patients requiring isolation and those requiring treatment shifts beginning after 5:00 PM. Finally, it also serves visiting hemodialysis patients and recently diagnosed CKD patients. These types of patients are not expected to change following project completion.

10. Provide a copy of the letter of intent that was already submitted according to WAC 246-310-080.

A copy of the letter of intent is included in Appendix 5.

11. Provide single-line drawings (approximately to scale) of the facility, both before and after project completion. Reference WAC 246-310-800(11) for the definition of maximum treatment area square footage. Ensure that stations are clearly labeled with their square footage identified, and specifically identify future expansion stations (if applicable)

A single line drawing, showing both before and after project completion, is included as Appendix 17. Per its certificate of need, Mason County Dialysis may operate five (5) in-center stations and one (1) exempt isolation station that does not count towards its Certificate of Need station count. These stations are numbered 1-5 in the second single line drawing in Appendix 17, with the exempt isolation station noted and not numbered. The applied-for stations are numbered 5 and 6 on the future floor plan. Finally, note that up to three hundred (300) square feet is allocated for future expansion stations per WAC 246-310-800(11)(c) on the proposed line drawing.

12. Provide the gross and net square feet of this facility. Treatment area and non-treatment area should be identified separately.

DaVita Mason County Dialysis consists of (and will consist of, after project completion) 6,060 rentable square feet. The treatment area consists of 2,052 square feet, and non-treatment area of 4,008 square feet. DaVita Mason County Dialysis space allocations are included in Table 2 below.

| SQUARE FOOTAGE ALLOCATION | |
|------------------------------------|-------|
| Treatment Floor Area | |
| Chronic Dialysis Stations | 560 |
| Isolation Station | 137 |
| Permanent Bed Station | 0 |
| Expansion Stations/Future Stations | 160 |
| Shell Stations | 0 |
| Nurse Station / Med Prep Area | 170 |
| Patient Prep | 170 |
| Circulation | 750 |
| Lab Prep | 69 |
| Storage | 36 |
| Treatment Floor Area Total | 2,052 |
| Non-Treatment Floor Area | |
| Water Room/BioCarb RO | 462 |
| Bio-Med | 122 |
| Staff Bathroom/Lounge | 272 |
| Janitorial/Electric | 209 |
| Business Office/Medical Records | 251 |
| Reception | 696 |
| Conference Room/Huddle | 288 |
| Home Training and PD Nurse | 207 |
| Patient Bathrooms | 114 |
| Storage/Med Waste/Wheelchair | 396 |
| Staff Offices | 402 |
| HVAC/Circulation | 589 |
| Non-Treatment Floor Area | 4,008 |
| Total Space | 6,060 |

In Table 3, below, is calculated the maximum treatment area square footage of 2,713 square feet. Treatment floor area at project completion will be 2,052 square feet, below the maximum allowable square footage.

| Maximum treatment floor area square footage: WAC 246-310-800(11) | | | | | |
|------------------------------------------------------------------|--------------------|-------------------|-------|--|--|
| Area Type | Number of Stations | Total Square Feet | | | |
| (a) General Use | 7 | 150 | 1,050 | | |
| (b) Permanent Bed | 0 | 200 | 0 | | |
| (b) Exempt Isolation | 1 | 200 | 200 | | |
| (c) Future Expansion | 2 | 150 | 300 | | |
| Other Treatment Floor Space | 75% * sum of (a | 1,163 | | | |
| Total | | 2,713 | | | |

13. Provide the existing facility's Medicare and Medicaid numbers.

DaVita Mason County Dialysis is, and will remain after project completion, certified by Medicare and Medicaid. Expansion certification will be requested from Medicare and Medicaid upon project completion. Mason County's Medicare and Medicaid numbers are below:

Medicare Provider Number: 50-2583
Medicaid Provider Number: 2063156

III. Certificate of Need Review Criteria

A. Need (WAC 246-310-210)

1. List all other dialysis facilities currently operating in the planning area, as defined in WAC 246-310-800(15).

WAC 246-310-800(15) defines the Mason County ESRD planning area. Table 4 provides a list of all other dialysis facilities operating in the Mason County planning area. Note that Table 4 also includes DaVita Mason County Dialysis, the subject of this expansion application.

| Table 4 | | |
|-------------------------------------------------|----------|-------------------|
| Existing Dialysis Facilities in Mason County | Provider | Approved Stations |
| FMC SHELTON 502548 | FMC | 12 |
| DVA BELFAIR 502583 | DVA | 5 |

2. Consistent with <u>WAC 246-310-818(1)</u>, provide the facility's historical utilization data for the most recent six months preceding the letter of intent period. This data should show each month separately and acquired from the Northwest Renal Network / Comagine ESRD Network 16.

DaVita is proposing to add two stations to Mason County Dialysis under WAC 246-310-818. Per WAC 246-310-818(1)(a), a facility in a 4.8 planning area (Mason County) must operate at or above an average of 5.0 patients per station for the most recent six consecutive month period preceding the letter of intent submission date for which data is available. Table 5 includes the most recent six months' utilization data for in-center patients preceding the letter of intent period. As the letter of intent period was October 1, 2022, these six months end on September 30, 2022. The data provided in Table 5 was acquired from the Northwest Renal Network / Comagine ESRD Network 16 and can be found in Appendix 20.

| Table 5: Previous Six Month Utilization | | | | | | | | |
|-----------------------------------------|--------|--------|---------|---------|--------|--------|---------|--|
| Mason County Dialysis | | | | | | | | |
| Year | Apr-22 | May-22 | June-22 | July-22 | Aug-22 | Sep-22 | Average | |
| Total CN approved in-center stations | 5 | 5 | 5 | 5 | 5 | 5 | per | |
| Total in-center patients | 37 | 37 | 37 | 36 | 35 | 34 | Station | |
| Patients per station | 7.40 | 7.40 | 7.40 | 7.20 | 7.00 | 6.80 | 7.21 | |

- 3. Consistent with WAC 246-310-818(3) and (4) confirm that the facility proposing to add stations with this application:
 - a. Has not been approved to add two stations under special circumstance review or that since approval to add two special circumstance stations a facility in the planning area has been approved to add nonspecial circumstances stations.
 - b. Has not operationalized relocated stations within the last three years.

DaVita Mason County Dialysis has not previously been approved to add stations under special circumstance review.

DaVita Mason County Dialysis is a relocated facility, approved under RA109, and began operating at the new location on 8/9/2021. WAC 246-310-818(4) states that "a facility that has relocated all or part of its stations may not request a special circumstance one- or two-station expansion until three years have lapsed from the date the stations become operational. **The three-year prohibition applies to any new kidney dialysis facility or facilities whose station count is changed by the relocation of stations**" [emphasis added]. In the case of DaVita Mason County, the relocation approved under RA109 did not change the station count of the facility – it simply relocated the five (5) Certificate of Need-approved stations plus one (1) exempt isolation station to a new location within the Mason County planning area consistent with WAC 246-310-830(4).

Therefore, a new health care facility is not considered to be established under WAC 246-310-020(1)(a), and the three-year prohibition does not apply to DaVita Mason County.

4. Consistent with WAC 246-310-818(5) or (6) provide the most recent six months utilization data for all facilities approved to operate in the planning area <u>and</u> owned, operated, or affiliated with the applicant.

Per WAC 246-310-818(5), a facility is ineligible for a special circumstances one-or-two-station expansion in a 4.8 planning area (Mason) if the owner or affiliate has approved certificate of need stations in the planning area that have operated below an average of 4.5 patients per station for the most recent six consecutive month period preceding the letter of intent submission date for which data is available. DaVita does not own or operate any other facilities outside of DaVita Mason County Dialysis.

5. Provide both historical and projected utilization of the facility for the first three full years of operation with additional stations. Be sure to include the intervening years between historical and projected. Include all assumptions used to make these projections.

As DaVita Mason County Dialysis is an existing facility for which DaVita is applying for a two station expansion, the facility's historical utilization for the last three full calendar years is provided in Table 7 below. The relevant data for total in-center patients and total home patients is the NWRN modality reports for the periods ended 12/31/2019, 12/31/2020, and 12/31/2021. The relevant data for total in-center stations is the historical number of operational stations for the majority of 2019, 2020, and 2021. The relevant data for total in-center treatments and total home treatments is from internal calendar year-end financial reports.

The table below provides projected utilization summaries from current year through completion of the third full year of operation (2026). In-center patient volume is based on a 5-year projection of Mason County patients using a regression of 5 years historical data and DaVita's own experience. In-center treatments are based on an assumption of 3 treatments per week per patient for 52 weeks with a 5% allowance for missed treatments. Facility-specific growth rates and home patient volume and growth rates are based on a 5-year projection of Mason County patients using a regression of 5 years historical data, facility growth rates, planning area growth rates, historical home/in-center proportions, and DaVita's experience. The expansion year anticipates expansion on March 1, 2023.

| | Historical | Historical | Historical | Forecast | | Partial 2023 | | Full Year | Full Year |
|---------|------------|------------|------------|----------|------|-----------------|------|--------------|--------------|
| Table 7 | 2019 | 2020 | 2021 | 2022 | _0_0 | Mar- Dec | 2024 | 2025 | 2026 |

| Total incenter stations (excluding CON exempt ISO) | 5 | 5 | 5 | 5 | 5 | 7 | 7 | 7 | 7 |
|-----------------------------------------------------|-------|-------|-------|-------|-----|-------|-------|-------|-------|
| Total in- center patients (end of year) | 11 | 19 | 27 | 38 | 39 | 39 | 41 | 42 | 43 |
| Total in- center treatments | 1,574 | 1,798 | 2,774 | 4,817 | 951 | 4,817 | 5,928 | 6,150 | 6,299 |
| Total PD patients (end of year) | 0 | 0 | 0 | 7 | 8 | 8 | 8 | 8 | 8 |
| Total PD treatments | 0 | 0 | 0 | 519 | 185 | 988 | 1,186 | 1,186 | 1,186 |
| Total HHD patients (end of year) | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Total HHD treatments | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |

6. Identify any factors in the planning area that could restrict patient access to dialysis services. WAC 246-310-210(1), (2).

DaVita is not aware of factors relating to its proposed expansion of services that could restrict patient access to dialysis services in the planning area. On the contrary, an expansion of stations in its efficiently-run Mason County Dialysis, currently averaging more than seven (7) patients per station utilization of the past six (6) months, will enhance patient access. As detailed in its response to question 7 under the Project Description, no existing services provided to dialysis patients or community members diagnosed with chronic kidney disease (CKD) will be curtailed under this project.

Identify how this project will be available and accessible to low-income persons, racial and ethnic minorities, women, mentally handicapped persons, and other under-served groups.

DaVita's history of providing dialysis services at numerous locations throughout Washington State provides evidence that all ESRD patients have access to DaVita's facilities, including members of the under-served groups referenced in WAC 246-310-210(2). Appendix 14 includes a copy of the admission, patient financial evaluation, and patient involuntary transfer policies which document that access will not be denied at DaVita

Mason County Dialysis due to indigence, racial or ethnic identity, gender or handicapped status. The proforma shows that funds have been budgeted to provide charity care.

8. Provide a copy of the following policies:

- Admissions policy
- Charity care or financial assistance policy
- Patient Rights and Responsibilities policy
- Non-discrimination policy
- Any other policies directly associated with patient access (example, involuntary discharge)

Copies of these policies are provided in Appendix 14. DaVita's history of providing dialysis services at numerous locations throughout Washington State provides evidence that all ESRD patients have access to DaVita's facilities, including members of the under-served groups referenced in the regulation, in combination with the policies in Appendix 14.

B. Financial Feasibility (WAC 246-310-220)

1. Provide documentation that demonstrates the immediate and long-range capital and operating costs of the project can be met. This should include but is not limited to:

- a. Utilization projections. These should be consistent with the projections provided under the Need section. Include all assumptions.
- b. Pro Forma financial projections for at least the first three full calendar years of operation. Include all assumptions.
- c. For existing facilities proposing a station addition, provide historical revenue and expense statements, including the current year. Ensure these are in the same format as the pro forma projections. For incomplete years, identify whether the data is annualized.

Utilization projections are included in Question 5 in the in the Need section above. The DaVita Mason County Dialysis Detailed Projected Operating Statement (Pro Forma) covering the first three full years in operation is included in Appendix 9. Historical and current financial statements are included in Appendix 8.

2. Provide the following agreements/contracts:

- Management agreement.
- Operating agreement
- Medical director agreement
- Development agreement
- Joint Venture agreement

A signed Medical Director Agreement, valid through the first three full years following completion of the project, is included in Appendix 3. The facility Medical Director is Dr. Dmitri Vasin (MD #00038345).

Neither a management agreement nor an operating agreement is applicable to this project, as DaVita Inc. is the sole owner and operator of Mason County Dialysis via its subsidiary, Total Renal Care, Inc. Nor is a joint venture agreement applicable, as DaVita is the sole owner of Mason County Dialysis and will continue to be so at the conclusion of the project – it has no joint venture partners on this project.

3. Provide documentation of site control. This could include either a deed to the site or a lease agreement for the site. If a lease agreement is provided, the terms must be for at least five years following project completion.

DaVita Mason County Dialysis executed lease is included in Appendix 15.

4. Provide county assessor information and zoning information for the site. If zoning information for the site is unclear, provide documentation or letter from the municipal authorities showing the proposed project is allowable at the identified site.

Zoning & county assessor documentation for the existing DaVita Mason County Dialysis is provided in Appendix 16.

5. Complete the table below with the estimated capital expenditure associated with this project. Capital expenditure for the purposes of dialysis applications is defined under WAC 246-310-800(3). If you have other line items not listed below, include the definition of the line item. Include all assumptions used to create the capital expenditure estimate.

| Table 8: Estimated Capital Expenditure | |
|-------------------------------------------------------------------------|--------------|
| DaVita Mason County Dialysis | |
| Item | Cost |
| a. Land Purchase | \$ - |
| b. Utilities to Lot Line | \$ - |
| c. Land Improvements | \$ - |
| d. Building Purchase | \$ - |
| e. Residual Value of Replaced Facility | \$ - |
| f. Building Construction | \$ - |
| g. Fixed Equipment (not already included in the construction contract) | \$ 2,927 |
| h. Movable Equipment | \$ 54,674 |
| i. Architect and Engineering Fees | \$ 1,393 |
| j. Consulting Fees | \$ - |
| k. Site Preparation | \$ - |
| I. Supervision and Inspection of Site (including Permits) | \$ 87 |
| m. Any Costs Associated with Securing the Sources of Financing (include | |
| interim interest during construction) | |
| 1. Land | \$ - |
| 2. Building | \$ - |
| 3. Equipment | \$ - |
| 4. Other | \$ - |
| n. Washington Sales Tax (included in above where applicable) | \$ 2,094 |
| Total Estimated Capital Expenditure | \$61,174 |

Sales tax is assumed at the Shelton, WA rate of 8.8% for all relevant categories, including fixtures, furnishings, and equipment, and where else applicable.

6. Identify the entity responsible for the estimated capital costs identified above. If more than one entity is responsible, provide breakdown of percentages and amounts for all.

DaVita, Inc, via its subsidiary Total Renal Care, Inc., is solely responsible for the capital costs identified above.

7. Provide a non-binding contractor's estimate for the construction costs for the project.

No construction is required for this project.

8. Provide a detailed narrative regarding how the project would or would not impact costs and charges for services. WAC 246-310-220.

Historical revenue and expense statements, including the current year, are included in Appendix 8. DaVita Mason County Dialysis Detailed Projected Operating Statement (Pro Forma) covering the first three full years in operation is included in Appendix 9. As required per WAC 246-310-815(1)(b), that pro forma is based on the facility's current payer mix and current expenses. All major pro forma assumptions are also outlined in Appendix 9.

No existing facility is expected to lose volume or market share below Certificate of Need standards as a result of this project, as Mason County Dialysis is already operating at or near capacity by virtue of its utilization eligibility for a special circumstances application. The proposed facility will operate at utilization levels consistent with required utilization levels. Reimbursements for dialysis services are not subject to or affected by capital improvements and expenditures by providers; the proposed project will have no impact on increases in charges for services within the ESRD planning area.

9. Provide documentation that the costs of the project, including any construction costs, will not result in an unreasonable impact on the costs and charges for health services in the planning area. WAC 246-310-220.

WAC 246-310-815(2) requires that applicants limit the costs of facility projects by creating a test of reasonableness in the construction of finished treatment floor area square footage. The treatment floor area must not exceed the maximum treatment floor area square footage defined in WAC 246-310-800(11). As outlined in response to Question 12 under the Project Description, DaVita does not propose to construct treatment floor space in excess of the maximum treatment floor area square footage, and thus, under the WAC 246-310-815(2) test, this project does not have an unreasonable impact on costs and charges.

Additionally, as noted in response to question eight, reimbursements for dialysis services are not subject to or affected by capital improvements and expenditures by providers; the proposed project will have no impact on increases in charges for services within the ESRD planning area.

10. Provide the historical payer mix by revenue and by patients using the example table below. If "other" is a category, define what is included in "other."

Table 9 provides historical and expected payor mix for the DaVita Mason County Dialysis, projected using facility data and aligned with the pro forma operating statement.

| Table 9 DaVita Mason County Dialysis Historical & Projected Payer Mix | Percentage by Revenue | Percentage by Patient |
|-----------------------------------------------------------------------|--------------------------|--------------------------|
| Medicare | 46.96% | 65.58% |
| Medicaid | 4.29% | 9.01% |
| Commercial, Other Government, and Other | 48.74% | 25.41% |
| Total | 100.00% | 100.00% |

"Other" includes such categories as one-off agreements and patient pay and constitutes a very small share of payer mix by both revenue and treatment volume as almost all dialysis patients are covered by either Medicare, Medicaid, or another private insurance type.

11. If the payer mix is expected to change as a result of this project, provide the projected payer mix by revenue and patients for the existing facility using the same table format shown above.

Payer mix percentages are not expected to change as a result of this project.

12. Provide a listing of all new equipment proposed for this project. The list should include estimated costs for the equipment. If no new equipment is required, explain.

Table 10 provides a listing of all new equipment proposed for this project (including estimated sales tax).

| Table 10 | | | | | | |
|----------------------------------------------------|------------------------------|--------|--|--|--|--|
| DaVita Mason County Dialysis | DaVita Mason County Dialysis | | | | | |
| New Equipment | | | | | | |
| Expenditure Category | Allocated Equipmen | t Cost | | | | |
| Communication/Computer Equipment | \$ | 10,915 | | | | |
| Water Treatment/Biomedical/Reuse | \$ | - | | | | |
| Clinical Equipment | \$ | 43,263 | | | | |
| Dialysis Machines, IV Pumps, AED, EKG, etc. | | | | | | |
| Permanent bed | | | | | | |
| Patient Scale, Ice Machine, Patient Lift, etc. | | | | | | |
| Dialysis Chairs, Chart Racks, Stools, etc. | | | | | | |
| Storage, Fixtures, Artwork, Office Equipment, etc. | \$ | 3,423 | | | | |
| Sales Tax (included in above where applicable) | \$ | 2,094 | | | | |
| Total Equipment Costs | \$ | 59,694 | | | | |

13. Identify the source(s) of financing (loan, grant, gifts, etc.) and provide supporting documentation from the source.

The project will be funded from DaVita's capital expenditures budget. Capital budgeting reflects appropriate allocations of funds for projects in the Pacific Northwest. A letter from Mike Staffieri, Chief Operating Officer, committing to these funds is included as Appendix 6.

14. If this project will be debt financed through a financial institution, provide a repayment schedule showing interest and principal amount for each year over which the debt will be amortized. <u>WAC 246-310-220</u>

This question is not applicable.

15. Provide the applicant's audited financial statements covering at least the most recent three years. WAC 246-310-220.

Audited financial statements for DaVita Inc., covering the time period from 2019-2021, are provided in Appendix 10.

- C. Structure and Process (Quality) of Care (WAC 246-310-230)
- Provide a table that shows FTEs [full time equivalents] by category for the proposed facility. If the facility is currently in operation, include at least the last three full years of operation, the current year, and the first three full years of operation following project completion. There should be no gaps in years. All staff categories should be defined.

Table 11 presents projected staffing for DaVita Mason County Dialysis.

| Table 11 | DaVita Mason (| County Dialysis | | | | FT | Es | | | | |
|-----------------|----------------|-----------------------------------|------------|------------|------------|----------|----------------------|----------------------|-----------|-----------|-----------|
| | Avg Wage Rate | Staffing Ratio (pts per shift, | Historical | Historical | Historical | Forecast | Partial 2023 Jan- | Partial 2023 Mar- | Full Year | Full Year | Full Year |

| | | | | | | | | | | | |
| Biomed | \$ 29.12 | 40 | 0.12 | 0.12 | 0.15 | 0.03 | 0.15 | 0.20 | 0.20 | 0.20 | 0.20 |
| Other | \$ 31.13 | 80 | 0.08 | 0.80 | 0.72 | 1.45 | 0.80 | 0.80 | 0.80 | 0.80 | 0.80 |

2. Provide the assumptions used to project the number and types of FTEs identified for this project.

DaVita projects FTEs based on staffing ratios for patients per shift, FTE, or station count (including any exempt isolation station, in the case of biomed), combined with clinical expertise and historical experience with the facility. General ratios are presented in Table 11.

3. Identify the salaries, wages, and employee benefits for each FTE category.

Aggregated salary and wage rates for each FTE category are noted in Table 11, based on actual rates from 2021. Benefits are calculated at 44.18% of gross wages.

4. Provide the name and professional license number of the current or proposed medical director. If not already disclosed under 210(1) identify if the medical director is an employee or under contract.

The current Medical Director is Dr. Dmitri Vasin (MD #00038345). He is under contract to provide medical director services to Mason County Dialysis, and is not an employee of DaVita.

5. Identify key staff, if known. (nurse manager, clinical director, etc.)

The Mason County Dialysis Facility Administrator (FA) is Kidus Legesse.

6. Provide names and professional license numbers for current credentialed staff.

Names and professional license numbers for current credentialed staff are provided in Appendix 7.

7. Describe your methods for staff recruitment and retention. If any barriers to staff recruitment exist in the planning area, provide a detailed description of your plan to staff this project.

DaVita anticipates no difficulty in recruiting the necessary personnel to continue to staff DaVita Mason County Dialysis. Based on our experience operating facilities in the planning area, DaVita anticipates that staff from the existing Mason County will serve patients at the expanded Mason County Dialysis. Moreover, DaVita has been repeatedly recognized as a Top Employer and a Military Friendly Employer (davita.com/about/awards) and offers a competitive wage and benefit package to employees. DaVita posts openings nationally both internally and external to DaVita.

8. Provide a listing of ancillary and support service vendors already in place.

Please see a list of ancillary and support agreements in place at DaVita Mason County Dialysis, along with their vendors, in Appendix 11.

9. Identify whether any of the existing ancillary or support agreements are expected to change as a result of this project.

No existing ancillary or support agreements are expected to change as a result of this project.

10. Provide a listing of ancillary and support services that would be provided on site and those provided through a parent corporation off site.

Ancillary services such as social services, nutrition services, financial counseling, pharmacy access, patient education, staff education, information services, material management, administration and biomedical technical services are provided on site. Additional services are coordinated through DaVita's main office in

Denver, Colorado, and support offices in Federal Way, Washington, and elsewhere. These ancillary and support services provided centrally include the Guest Services Program that provides assistance in locating other dialysis facilities for patients wishing to travel or relocate. In addition, DaVita offers centralized revenue cycle, management services, quality improvement services, biomedical equipment maintenance and a number of other high-value off-site programs.

11. Provide a listing of healthcare facilities with which the dialysis center has working relationships.

Please see the list of healthcare facilities provided in Table 12, below.

| Table 12 | |
|--------------------------------------|------------------------------------------|
| Healthcare Facility Relationships | Type of Relationship |
| Rocky Bay Healthcare | Nursing Home Dialysis Transfer Agreement |
| Puget Sound Healthcare | Nursing Home Dialysis Transfer Agreement |
| Providence Mother Joseph Care Center | Nursing Home Dialysis Transfer Agreement |
| Mason General Hospital | Patient Transfer |
| Local Physician Groups | Attending and Rounding |

12. Provide a copy of the existing or proposed transfer agreement with a local hospital.

Please see the transfer agreement provided in Appendix 12.

13. Clarify whether any of the existing working relationships would change as a result of this project.

No existing working relationships are expected to change as a result of this project, except for any enhancement due to increased access to dialysis services for other healthcare facilities' ESRD patients.

14. Fully describe any history of the applicant concerning the actions noted in Certificate of Need rules and regulations WAC 246-310-230(5)(a). If there is such history, provide documentation that the proposed project will be operated in a manner that ensures safe and adequate care to the public to be served and in conformance with applicable federal and state requirements. This could include a corporate integrity agreement or plan of correction.

DaVita and the United States Department of Health and Human Services, Office of Inspector General entered into a Corporate Integrity Agreement ("CIA") to promote compliance with the statutes, regulations, and written directives of Medicare, Medicaid, and all other Federal health care programs and, in particular, included the appointment of an Independent Monitor to prospectively review DaVita's arrangements with nephrologists and other health care providers for compliance with the Anti-Kickback Statute (collectively, "Federal Health Care

Programs and Laws"). That Independent Monitor completed the prospective review process in the fall of 2017. Each arrangement is now reviewed by the Risk Rating team to ensure that it is compliant with these Federal Health Care Programs and Laws.

- 15. Identify whether any facility or practitioner associated with this application has a history of the actions listed below. If so, provide evidence that the proposed or existing facility can and will be operated in a manner that ensures safe and adequate care to the public and conforms to applicable federal and state requirements. WAC 246-310-230(3) and (5).
 - A criminal conviction which is reasonably related to the applicant's competency to exercise responsibility for the ownership or operation of a healthcare facility; or
 - A revocation of a license to operate a healthcare facility; or
 - A revocation of a license to practice as a health professional; or
 - Decertification as a provider of services in the Medicare or Medicaid program because of a failure to comply with applicable federal conditions of participation.

The applicant has no adverse history related to any of the actions listed.

16. Provide documentation that the proposed project will promote continuity in the provision of health care services in the planning area, and not result in an unwarranted fragmentation of services. WAC 246-310-230

Appendix 18 provides a summary of quality and continuity of care indicators used in DaVita's quality improvement program. The DaVita Continuous Quality Improvement (CQI) program incorporates all areas of the dialysis program. The program monitors and evaluates all activities related to clinical outcomes, operations management, and process flow. Dialysis-specific statistical tools (developed by DaVita) are used for measurement, analysis, communication, and feedback. Continuing employee and patient education are integral parts of this program. Appendix 18 includes an example of DaVita Quality Index (DQI) data. Appendix 19 includes an example of DaVita's Physician, Community and Patient Services offered through DaVita's Kidney Smart Education Program. Appendix 12 includes a copy of the transfer agreement between DaVita Mason County Dialysis and an area care partner. DaVita has been honored as one of the World's Most Admired Companies® by FORTUNE® magazine since 2006, confirming its excellence in working effectively with the communities it serves (davita.com/about/awards).

From the perspective of a dialysis patient with multiple relevant healthcare providers, such as a primary care provider, nephrologist, home care caregivers or skilled nursing or assisted living caregivers, and perhaps (unfortunately) a recently-visited hospital. DaVita is committed to the wellbeing of its patients, and for patients with a diagnosis as complex as end-stage renal disease, that wellbeing by necessity requires communication and coordination with multiple caregivers, such as those above. DaVita uses an interdisciplinary team consisting of the facility social worker, dietician, clinical nurse manager, medical director, and the patient's

nephrologist to facilitate communication and coordination through the healthcare system. If a comorbidity is identified that impacts the patient's health, the patient's nephrologist or medical director would reach out to the patient's primary care physician for consult. DaVita would also ensure any change in the care plan from the patient's nephrologist is executed in consultation with the facility medical director. DaVita collaborates with home or assisted living and skilled nursing caregivers on a daily basis, including in cases such as the patient's above, reviewing transportation, dialysis medication needs, access care, as well as taking in any dialysis-related concerns those patients may have and reviewing them in consultation with the interdisciplinary team. When a hospital is unfortunately required to intervene in a patient's care, DaVita facilitates rapid discharges back to chronic dialysis, coordination of medical records into the patient's chart, and coordination with the patient's nephrologist for any care plan changes. Additionally, all DaVita dialysis centers enter into hospital and nursing home transfer agreements, and participate in community emergency preparedness drills to ensure maximum coordination in the healthcare arena. Dialysis is one of the healthcare modalities that, due to its regular cadence and length, is one of patients' most consistent touchpoints with the healthcare system, and DaVita is committed to working with its patients to use these points to coordinate and communicate among the patient's healthcare providers across the healthcare system.

17. Provide documentation that the proposed project will have an appropriate relationship to the service area's existing health care system as required in WAC 246-310-230.

The proposed expansion of DaVita Mason County Dialysis will have an appropriate relationship to the service area's existing health care system. DaVita Mason County Dialysis is a key component of the existing health care system in the service area, and the project will enable enhanced patient access in an already highly utilized facility with a census of more than 7.0 patients per station. Furthermore, DaVita Mason County Dialysis has a long track record of working with area providers, including a Patient Transfer Agreement seen in Appendix 12, to provide the highest possible quality of care to patients.

D. Cost Containment (WAC 246-310-240)

1. Identify all alternatives considered prior to submitting this project.

Alternative 1: Do nothing, that is do not apply for two additional special circumstances stations in Mason County to expand Mason County Dialysis. Currently, DaVita Mason County Dialysis is a very busy facility, with utilization over 7.0 patients per station in the most recent six months, and thus has little additional capacity to provide access to Mason County patients. With strong and consistent demand for access to DaVita's services and without expansion, patients will be forced to dialyze at less convenient times, locations, or even out of the planning area entirely. This alternative was rejected.

Alternative 2: Expand the Mason County Dialysis by two (2) stations. The existing Mason County Dialysis facility is operating in excess of 7.0 patients per station. An expansion of two (2) stations under special circumstances review can be completed quickly and cost-efficiently but, most importantly, will provide crucial access for patients. This alternative was selected.

2. Provide a comparison of the project with alternatives rejected by the applicant. Include the rationale for considering this project to be superior to the rejected alternatives. Factors to consider can include, but are not limited to: patient access to healthcare services, capital cost, legal restrictions, staffing impacts, quality of care, and cost or operation efficiency.

Please see the exploration and analysis of alternatives in response to Question One above.

3. Identify any aspects of the facility's design could lead to operational efficiency. This could include but is not limited to: LEED building, water filtration, or the methods for construction, etc. WAC 246-310-240(2) and (3).

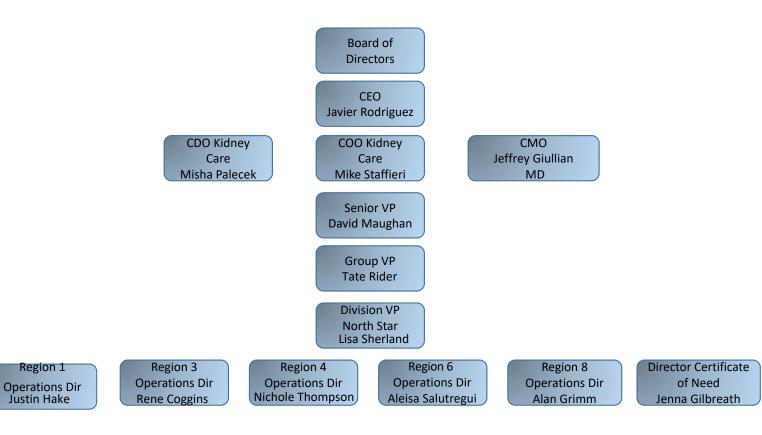

DaVita Mason County Dialysis will meet all current energy conservation standards. In addition, expansion will allow full use of the expanded facility designed to meet current energy utilization requirements. DaVita is also pursuing renovation of existing lighting systems nationwide and installing energy-efficient LED lighting in all facilities.
