Health Professional Shortage Area (HPSA) and Maternal Care Target Area (MCTA)

Healthcare providers in Washington are surveyed to determine if a shortage of eligible types that serve the low-income, disadvantaged populations exist. Areas with these designations receive scores based on a combination of data gathered during the surveying process and national datasets. These federal designations allow eligible facilities and providers access to numerous federal and state workforce incentive programs. There are three main HPSA categories: behavioral health, dental health, and primary care. MCTAs are supplementary scores added only to an existing primary care designated area. If you would like more information about HPSAs, MCTAs or the Medicaid Provider Survey, [contact our office](#). **Note: A provider may work at multiple locations. Provider/FTE counts are based on each location of service.**
