

0:0:0.0 --> 0:0:0.400

Gray, Jocelyne (DOH)

And.

0:0:3.760 --> 0:0:10.530

Gray, Jocelyne (DOH)

So we will get started and as people join us, Scott will admit them.

0:0:11.850 --> 0:0:20.990

Gray, Jocelyne (DOH)

And so we are recording and I will have the slides and the recording up on our website later this month.

0:0:21.240 --> 0:0:29.70

Gray, Jocelyne (DOH)

So they are accessible when we open up the application process August 1st.

0:0:30.400 --> 0:0:32.510

Gray, Jocelyne (DOH)

So thank you for joining us.

0:0:33.920 --> 0:0:35.30

Gray, Jocelyne (DOH)

I'm Jocelyn Gray.

0:0:35.40 --> 0:0:40.850

Gray, Jocelyne (DOH)

I am in the alarm environmental engineer for the drinking water State revolving fund.

0:0:40.910 --> 0:0:44.530

Gray, Jocelyne (DOH)

I am currently managing the program.

0:0:44.900 --> 0:0:48.640

Gray, Jocelyne (DOH)

We will be getting a program manager starting next week.

0:0:49.580 --> 0:0:50.120

Gray, Jocelyne (DOH)

Umm.

0:0:50.460 --> 0:1:3.180

Gray, Jocelyne (DOH)

And he and I will share duties, and today's discussion is on the consolidation feasibility study grant funding that will open August 1st and application cycle closes August 31st.

0:1:4.950 --> 0:1:11.540

Gray, Jocelyne (DOH)

And we do have Scott Kugel who does our cultural environmental review consultations.

0:1:11.890 --> 0:1:14.680

Gray, Jocelyne (DOH)

Sir Herrera, who is everything?

0:1:14.690 --> 0:1:19.180

Gray, Jocelyne (DOH)

Walt and getting registered and submitting applications.

0:1:20.210 --> 0:1:24.140

Gray, Jocelyne (DOH)

And Chelsea Kennard just joined us last week.

0:1:24.410 --> 0:1:33.40

Gray, Jocelyne (DOH)

She will be managing technical assistance contracts and working with our planners on funding out each.

0:1:34.650 --> 0:1:42.530

Gray, Jocelyne (DOH)

Umm, so welcome to hurt the team and they said we will be having a program manager start next Monday.

0:1:44.740 --> 0:1:55.470

Gray, Jocelyne (DOH)

So reconsolidation feasibility study grant, we have \$800,000 this year, which is double what we had last year and in previous years.

0:1:55.940 --> 0:2:1.230

Gray, Jocelyne (DOH)

So maximum award per project is \$50,000.

0:2:1.560 --> 0:2:4.810

Gray, Jocelyne (DOH)

You can submit more than one project.

0:2:4.820 --> 0:2:16.260

Gray, Jocelyne (DOH)

So say you're in a city that has a mobile Home Park on your South end, and then you've got several group's on your North End.

0:2:16.270 --> 0:2:21.570

Gray, Jocelyne (DOH)

End those would be 2 separate consolidation projects and so you could submit two applications.

0:2:22.810 --> 0:2:30.280

Gray, Jocelyne (DOH)

Uh, we get our funding from two sources, one source of 400,000 is our service fees.

0:2:30.610 --> 0:2:40.450

Gray, Jocelyne (DOH)

So the loans umm I have a 1 to 2% loan service fee and a portion of that is being used for these grants.

0:2:40.780 --> 0:2:44.950

Gray, Jocelyne (DOH)

The other 400,000 is set asides this year.

0:2:46.320 --> 0:2:57.620

Gray, Jocelyne (DOH)

Uh, so we can could increase our ability to pay for additional, uh projects instead of just 5 to 8 projects.

0:2:57.770 --> 0:3:5.580

Gray, Jocelyne (DOH)

We're looking upwards of 16 if each of them request \$50,000, it is grant money.

0:3:5.790 --> 0:3:10.360

Gray, Jocelyne (DOH)

There is no not match.

0:3:10.370 --> 0:3:13.290

Gray, Jocelyne (DOH)

There is no loan payback, it's peer grant.

0:3:14.690 --> 0:3:19.360

Gray, Jocelyne (DOH)

We can pay for the focuses consolidation, feasibility studies.

0:3:19.670 --> 0:3:20.940

Gray, Jocelyne (DOH)

So what will it take to?

0:3:21.770 --> 0:3:29.880

Gray, Jocelyne (DOH)

Consolidate the water system into an existing water system or what will it take to change ownership?

0:3:30.550 --> 0:3:35.500

Gray, Jocelyne (DOH)

Planning documents your water system plans or small water system management programs.

0:3:35.870 --> 0:3:46.780

Gray, Jocelyne (DOH)

Whether it needs to be created for the system to be consolidated or restructured, or you need to update an existing plan to include this consolidation.

0:3:48.130 --> 0:3:55.960

Gray, Jocelyne (DOH)

Uh engineering design, particularly mobile home parks that they wanna consolidate into a neighboring group.

0:3:55.970 --> 0:3:56.910

Gray, Jocelyne (DOH)

A water system.

0:3:57.710 --> 0:4:15.340

Gray, Jocelyne (DOH)

They can request that just the next phase be the engineering design, since they know they wanna move forward, or if you have a system that you're already inner tied with and all you have to do is turn a valve after they pay a connection fee.

0:4:15.550 --> 0:4:32.450

Gray, Jocelyne (DOH)

And so we can use half of our funds to for connection fee only projects and it needs to be stated clearly in the scope of work or project description that it's a connection fee only project, no groundbreaking.

0:4:32.520 --> 0:4:41.410

Gray, Jocelyne (DOH)

So if you need to install it Intertie, then the document needs to say what are the next steps before the system can be physically.

0:4:42.260 --> 0:4:42.670

Gray, Jocelyne (DOH)

Umm.

0:4:43.420 --> 0:4:50.170

Gray, Jocelyne (DOH)

Connected to an existing system and then if it's a restructuring, what?

0:4:50.500 --> 0:4:57.80

Gray, Jocelyne (DOH)

What improvements are needed umm to bring it up to standards and into compliance?

0:4:57.280 --> 0:4:59.800

Gray, Jocelyne (DOH)

And but no ground breaking.

0:4:59.810 --> 0:5:0.0

Gray, Jocelyne (DOH)

No.

0:5:0.10 --> 0:5:1.20

Gray, Jocelyne (DOH)

Installing meters?

0:5:1.30 --> 0:5:2.780

Gray, Jocelyne (DOH)

No, installing a valve?

0:5:3.30 --> 0:5:3.670

Gray, Jocelyne (DOH)

That kind of thing.

0:5:5.910 --> 0:5:10.450

Gray, Jocelyne (DOH)

Do you need to register for Walt access?

0:5:10.460 --> 0:5:15.610

Gray, Jocelyne (DOH)

So you contact Sarah Herrera and she can get you pre registered.

0:5:16.220 --> 0:5:25.500

Gray, Jocelyne (DOH)

Then you need a secure access Washington or saw account and you will access Walt through saw.

0:5:26.360 --> 0:5:30.450

Gray, Jocelyne (DOH)

Once you get set up, you can select how to get that.

0:5:30.540 --> 0:5:46.410

Gray, Jocelyne (DOH)

We do have a Walt extender external user guide and how to get set up and saw how to get set up in Walt and the different parts of the Walt application and so while is our Washington loan tracker.

0:5:49.460 --> 0:6:12.270

Gray, Jocelyne (DOH)

Umm, this is what saw looks like when you register for the first time and so if you're new to saw this is where you would set up or you can go to the login page umm and log in through saw and the this document the external User Guide walks you through how to add Walt to your saw account.

0:6:14.480 --> 0:6:27.310

Gray, Jocelyne (DOH)

You also need in order to sign a contract with us, you need a sam.gov account, which requires a login.gov account.

0:6:27.380 --> 0:6:29.110

Gray, Jocelyne (DOH)

So there are multiple steps.

0:6:31.770 --> 0:6:38.780

Gray, Jocelyne (DOH)

If you knew you need to set up an account, you need to set up an entity account and you need to set up a personal account.

0:6:42.440 --> 0:6:56.540

Gray, Jocelyne (DOH)

Or local expert on sam.gov is elouis Elois Rudolph, who is one of our contract managers and her contact information is at the end of this presentation.

0:6:58.30 --> 0:7:7.80

Gray, Jocelyne (DOH)

Umm, we are working on additional guidance documents to put on our website on how to I'm get a login.gov.

0:7:7.90 --> 0:7:8.360

Gray, Jocelyne (DOH)

How to get a sam.gov?

0:7:8.370 --> 0:7:16.210

Gray, Jocelyne (DOH)

How to get your unique entity identifier and we are hearing to get the unique entity identifier.

0:7:16.220 --> 0:7:18.260

Gray, Jocelyne (DOH)

It's taking about four weeks.

0:7:18.590 --> 0:7:37.770

Gray, Jocelyne (DOH)

If there are issues with the entities existing sam.gov account that takes several weeks to get sorted out, these are not required to apply, but you will need to provide those before you get a contract for review.

0:7:40.540 --> 0:7:44.90

Gray, Jocelyne (DOH)

And so this is what the sam.gov web page looks like.

0:7:44.100 --> 0:7:46.230

Gray, Jocelyne (DOH)

It has all the official language.

0:7:47.140 --> 0:7:48.80

Gray, Jocelyne (DOH)

Please read the.

0:7:49.520 --> 0:7:50.770

Gray, Jocelyne (DOH)

Warnings at the top.

0:7:50.780 --> 0:7:58.750

Gray, Jocelyne (DOH)

Some of them, like today, that there are issues with signing up on sam.gov to get a unique entity identifier.

0:7:59.850 --> 0:8:1.410

Gray, Jocelyne (DOH)

So please read those.

0:8:1.780 --> 0:8:2.330

Gray, Jocelyne (DOH)

Umm.

0:8:2.720 --> 0:8:13.420

Gray, Jocelyne (DOH)

If you don't know what the status of your entity is, whether you have an account or if your account expired, you can go to check entity status.

0:8:13.470 --> 0:8:14.690

Gray, Jocelyne (DOH)

If you know the information.

0:8:17.90 --> 0:8:30.730

Gray, Jocelyne (DOH)

If you have an existing entity within seven, no Gov, you'll need to renew that entity that it expires every year and the expiration date has to be provided for the contract.

0:8:33.900 --> 0:8:47.980

Gray, Jocelyne (DOH)

And so getting start when you get started, you get to another get started page and then you can go into the sign in or creating an account and going through those steps. Umm.

0:8:49.890 --> 0:9:8.240

Gray, Jocelyne (DOH)

So there's a just following the different steps depending on the circumstances you have fall under and so it getting into the consolidation feasibility study, grant the eligible entities are our municipalities or cities, towns, counties.

0:9:9.700 --> 0:9:23.650

Gray, Jocelyne (DOH)

Then you got your special purpose districts, water, sewer districts, public utility districts, any non for profit organization that's running a group, a water system and includes homers, associations.

0:9:23.660 --> 0:9:32.760

Gray, Jocelyne (DOH)

They must submit their nonprofit documentation and then any tribal communities that I want to.

0:9:32.990 --> 0:9:47.330

Gray, Jocelyne (DOH)

I know some of the been talking about consolidating locked on that are currently served by private wells that are failing or smaller groupies into their group, a system they cannot be receiving.

0:9:47.920 --> 0:9:54.790

Gray, Jocelyne (DOH)

The federal tribal set asides, umm, if they're going to apply for the state SRF.

0:9:57.850 --> 0:10:4.580

Gray, Jocelyne (DOH)

Projects feasibility studies, planning documents, engineering designs, your connection fees.

0:10:7.190 --> 0:10:30.50

Gray, Jocelyne (DOH)

Does need to indicate if it's a connection fee only, but you know other projects include connection fees as part of the engineering design, and then if you're needing to have community engagement as part of your feasibility study or, uh, you wanted to start moving into next steps to get community buy off.

0:10:30.740 --> 0:10:43.720

Gray, Jocelyne (DOH)

Whether you need to have a facilitator or rent a building, printing, advertising so community engagement can be part of your scope of work.

0:10:45.690 --> 0:10:51.890

Gray, Jocelyne (DOH)

As I said, we have \$800,000 this year available for the grants, \$50,000 Max per project.

0:10:54.20 --> 0:11:0.510

Gray, Jocelyne (DOH)

None of the work can start until you sign your grant project your grant contract.

0:11:0.600 --> 0:11:20.640

Gray, Jocelyne (DOH)

So if you're thinking of while you're waiting for the grant contract because there's multiple months of waiting that you might start your community engagement, you will not get reimbursed for any work done prior to the signatory date on the contract.

0:11:24.700 --> 0:11:29.880

Gray, Jocelyne (DOH)

When doing the feasibility studies or even the water system plan updates.

0:11:30.470 --> 0:11:33.250

Gray, Jocelyne (DOH)

We're wanting particularly the feasibility.

0:11:34.20 --> 0:11:55.170

Gray, Jocelyne (DOH)

We're wanting to compare what will umm costs look like if the water system consolidates versus what happens if they remain independent over a 20 year period looking at operation and maintenance costs for either existing for for their existing facilities and existing management.

0:11:55.660 --> 0:12:1.970

Gray, Jocelyne (DOH)

What improvements are needed, whether they're going to stand alone or be consolidated?

0:12:2.80 --> 0:12:8.220

Gray, Jocelyne (DOH)

What are the costs of those improvements as an independent system versus being consolidated?

0:12:10.40 --> 0:12:28.300

Gray, Jocelyne (DOH)

Ohm if there are single source entity need to evaluate, what happens if that source fails and needing to get get a backup source particular there's remaining independent umm for the evaluation.

0:12:28.310 --> 0:12:32.680

Gray, Jocelyne (DOH)

So how many board members does the current system have?

0:12:32.690 --> 0:12:34.880

Gray, Jocelyne (DOH)

How many vacancies?

0:12:34.890 --> 0:12:36.850

Gray, Jocelyne (DOH)

How often do they have vacancies?

0:12:39.260 --> 0:12:48.900

Gray, Jocelyne (DOH)

How much time do we each board member actually spend on managing the water system, doing the budget troubleshooting water outages?

0:12:49.700 --> 0:13:11.20

Gray, Jocelyne (DOH)

I'm trying to make sure that the system is in compliance with state and federal regulations, local regulations and what is the ability of the existing board to manage capital improvement projects, particularly those projects that might span multiple years and.

0:13:14.420 --> 0:13:15.560

Gray, Jocelyne (DOH)

So that.

0:13:18.830 --> 0:13:23.0

Gray, Jocelyne (DOH)

Going forward, I'm just reading questioned and the chat.

0:13:23.10 --> 0:13:25.400

Gray, Jocelyne (DOH)

So you completed a feasibility study.

0:13:26.650 --> 0:13:29.560

Gray, Jocelyne (DOH)

Are you eligible for other things?

0:13:29.650 --> 0:13:53.170

Gray, Jocelyne (DOH)

Yeah, if you need to make updates to your previous feasibility study or if you're wanting to, umm, do you like an engineering evaluation of what has changed and what needs to be modified to move forward that kind of so anything that can help the process to move forward you are eligible.

0:13:55.740 --> 0:14:10.320

Gray, Jocelyne (DOH)

Uh, looking at the existing owners ability to take on debt for capital improvements, can they complete a funding application with or without technical assistance?

0:14:10.330 --> 0:15:19.680

Gray, Jocelyne (DOH)

We do have technical assistance services to help with getting a planning document together with completing a funding application with getting the documentation for a funding application, such as maybe updating homeowners association bylaws that gives clear legal authority to manage the water system or financial services to figure out what your rates need to be to take on a construction loan, making sure that you have a dedicated fund that collects fees and dues just for the water system and that those go into an account that can pay for operation and maintenance of the water system and repay any loans, financial records that need to be submitted to in order for you to go through underwriting, doing your asset inventories that are required as part of evaluating what does the existing system have, what and then what?

0:15:19.750 --> 0:15:24.440

Gray, Jocelyne (DOH)

If you're a group, a system that's taking on other systems, what are your assets?

0:15:24.690 --> 0:15:27.100

Gray, Jocelyne (DOH)

What are the assets of the systems you're taking on?

0:15:27.410 --> 0:15:34.910

Gray, Jocelyne (DOH)

And we and then determine that will help you determine which assets you want to keep versus which assets you want to decommission.

0:15:36.760 --> 0:15:44.80

Gray, Jocelyne (DOH)

Are you educating your community on these are the issues of why we're considering consolidation.

0:15:44.130 --> 0:15:53.140

Gray, Jocelyne (DOH)

These are the things we've identified during the evaluation and next steps manage rate increases.

0:15:53.150 --> 0:16:3.370

Gray, Jocelyne (DOH)

Are you having steady rate increases or are you having to do an initial big assessment with rate increases in order to take on?

0:16:4.450 --> 0:16:6.60

Gray, Jocelyne (DOH)  
Construction loan debt.

0:16:8.0 --> 0:16:29.90

Gray, Jocelyne (DOH)  
Well, the board need more time involved in the water system as part of the consolidation or if they're gonna look at trying to take on multiple construction projects and managing projects, it's doing working with your engineer to design the project, construction management and all the paperwork involved.

0:16:30.470 --> 0:16:35.930

Gray, Jocelyne (DOH)  
Depending on the type of funding you have and and which rolls into your funding management.

0:16:39.860 --> 0:16:40.830

Gray, Jocelyne (DOH)  
Timelines.

0:16:40.960 --> 0:16:46.100

Gray, Jocelyne (DOH)  
So we posted our guidelines on July 3rd.

0:16:47.610 --> 0:16:52.210

Gray, Jocelyne (DOH)  
Today's webinar will have open applications open August 1st.

0:16:53.480 --> 0:16:58.440

Gray, Jocelyne (DOH)  
We'll have another webinar which is a question and answer session on August 9th.

0:17:1.160 --> 0:17:13.220

Gray, Jocelyne (DOH)  
Applications will close at 11:59 PM on August 31st and then we'll score the applications in September and I'll get into scoring a little bit later.

0:17:14.150 --> 0:17:17.750

Gray, Jocelyne (DOH)  
We're expecting contracts may be signed December, maybe January.

0:17:18.590 --> 0:17:19.10

Gray, Jocelyne (DOH)  
Umm.

0:17:19.830 --> 0:17:26.40

Gray, Jocelyne (DOH)  
And then the deliverables need to be approved by June 1st.

0:17:27.80 --> 0:17:27.610

Gray, Jocelyne (DOH)

Umm.

0:17:27.880 --> 0:17:41.640

Gray, Jocelyne (DOH)

And then, because the approval of whatever documentation you need to submit then needs to go to the contract manager for them to process the grant closeout.

0:17:41.650 --> 0:17:47.120

Gray, Jocelyne (DOH)

So it can be closed out by June 30th of 2025.

0:17:47.220 --> 0:17:55.690

Gray, Jocelyne (DOH)

So by the time you get a cot grant contract, you'll have roughly 18 months to complete the work.

0:17:56.900 --> 0:17:57.140

Gray, Jocelyne (DOH)

Uh.

0:17:57.720 --> 0:18:11.500

Gray, Jocelyne (DOH)

Contract scope of work and deadlines for deliverables will be reviewed by myself and the regional engineer assigned to your county and will give guidance to the contract managers for those scopes of work.

0:18:14.970 --> 0:18:20.680

Gray, Jocelyne (DOH)

We have five risk categories, 1 being the highest, 5 being the lowest.

0:18:22.140 --> 0:18:38.920

Gray, Jocelyne (DOH)

Umm, so risk category one, we're looking at microbial contamination and the revised total coliform rule exceedances surface water rule exceedances so viruses.

0:18:40.400 --> 0:18:41.940

Gray, Jocelyne (DOH)

Bacteria, you name it.

0:18:43.820 --> 0:18:46.720

Gray, Jocelyne (DOH)

Groundwater rules, so contamination of your well water.

0:18:47.710 --> 0:18:50.790

Gray, Jocelyne (DOH)

If you're dealing with umm.

0:18:51.310 --> 0:18:56.440

Gray, Jocelyne (DOH)

Cianna toxins levels above the EPA health advisory levels.

0:18:58.220 --> 0:19:1.130

Gray, Jocelyne (DOH)

Those are in category one, category two.

0:19:1.140 --> 0:19:3.730

Gray, Jocelyne (DOH)

We then get more into chemical.

0:19:5.0 --> 0:19:6.290

Gray, Jocelyne (DOH)

Contamination.

0:19:7.120 --> 0:19:9.600

Gray, Jocelyne (DOH)

Arsenic nitrate.

0:19:10.890 --> 0:19:13.630

Gray, Jocelyne (DOH)

Fluoride Corrosion control project.

0:19:13.640 --> 0:19:36.790

Gray, Jocelyne (DOH)

So if you have a LED copper rule exceedance and you're needing to put in treat some kind of treatment for umm corrosion control that's under category two as well as any P Foss above the state action levels, and you're looking at either a clean source of water or.

0:19:37.250 --> 0:19:37.710

Gray, Jocelyne (DOH)

Umm.

0:19:38.570 --> 0:19:43.330

Gray, Jocelyne (DOH)

Needing treatment and maybe you're consolidating with the system that already has treatment that'll work.

0:19:46.150 --> 0:19:49.120

Gray, Jocelyne (DOH)

Contamination of others things.

0:19:49.230 --> 0:19:51.250

Gray, Jocelyne (DOH)

Disinfection pipe products.

0:19:51.570 --> 0:20:0.630

Gray, Jocelyne (DOH)

If you have a significant deficiency and a compliance order, and so that regional office must issue a compliance order for you to.

0:20:0.690 --> 0:20:14.10

Gray, Jocelyne (DOH)

To address the significant deficiency and in order for you to qualify for category three, if you have manganese levels above the health advisory level, .3.

0:20:16.340 --> 0:20:51.220

Gray, Jocelyne (DOH)

If those system to be consolidated is are really close to receivership or we're doing in the consolidation to prevent receivership, or if paperworks are have been filed with the court, the receiving water system can apply for this grant to do things like umm, the engineering evaluation of what it will take to bring that portion into compliance and updating water system plans, small water system management programs, that kind of thing.

0:20:51.970 --> 0:21:12.110

Gray, Jocelyne (DOH)

Uh, if you need to remove blood service lines or goosenecks, uh, category four is other compliance, just detections of things like manganese or chloride.

0:21:13.780 --> 0:21:16.50

Gray, Jocelyne (DOH)

Uh, significant findings?

0:21:16.760 --> 0:21:22.350

Gray, Jocelyne (DOH)

Those will need to have a compliance document from the regional office as well.

0:21:23.260 --> 0:21:37.180

Gray, Jocelyne (DOH)

If you're seed 80% of the nitrate and arsenic MCL those so and then instead of just P, Foss and general, this one is focused on PPFOS.

0:21:37.230 --> 0:22:7.840

Gray, Jocelyne (DOH)

And if you have any detections that are below this date action level, if there are resiliency projects that are needed, ah, because you're the only sources vulnerable or you need storage for affect various things, just any resiliency, but has to benefit at least 51% of the water system being acquired first.

0:22:7.850 --> 0:22:9.900

Gray, Jocelyne (DOH)

Category five is pretty much everything else.

0:22:10.480 --> 0:22:15.640

Gray, Jocelyne (DOH)

Ah, that isn't covered in categories one through 4.

0:22:20.50 --> 0:22:21.610

Gray, Jocelyne (DOH)

And then there are bonus points.

0:22:22.20 --> 0:22:22.770

Gray, Jocelyne (DOH)

Umm.

0:22:23.260 --> 0:22:42.310

Gray, Jocelyne (DOH)

So if you're planning document already addresses that you consolidating either specific areas or surrounding water systems in general, if you've had at least one community meeting with minutes, you can submit the minutes for that.

0:22:42.320 --> 0:22:47.480

Gray, Jocelyne (DOH)

For bonus points, if you are so say you're a city and you're.

0:22:48.730 --> 0:22:58.10

Gray, Jocelyne (DOH)

Consolidating five other projects, you get additional points for umm the for four of the five water systems.

0:22:58.420 --> 0:23:1.800

Gray, Jocelyne (DOH)

If you're acquiring multiple systems, yeah.

0:23:2.260 --> 0:23:7.120

Gray, Jocelyne (DOH)

So say you're restructuring 5 systems, you'll get bonus points for.

0:23:8.650 --> 0:23:9.230

Gray, Jocelyne (DOH)

Four of them.

0:23:10.590 --> 0:24:7.380

Gray, Jocelyne (DOH)

If you have a signed binding agreement that says we are especially for like a water system, plant engineering design or connection fee projects that says we the water system being consolidated is willing and open to consolidation and they've agreed already, you can submit that we will be looking at our Washington tracking network map and if the Community to be consolidated is within an area that ranks 8 or higher on either environmental disparities total or the Social vulnerability index total, there's bonus points and a mobile Home Park requesting engineering design be done, then they can get bonus points.

0:24:10.530 --> 0:24:15.880

Gray, Jocelyne (DOH)

And here are the contacts I scopes of work your eligibility.

0:24:16.210 --> 0:24:20.660

Gray, Jocelyne (DOH)

General questions can go to me and everything Walt or.

0:24:22.330 --> 0:24:37.210

Gray, Jocelyne (DOH)

Just basic information can go to Sarah Cultural environmental reviews if you're those are going to be part of your scope of work, contact Scott uh, underwriting is my Copeland.

0:24:37.310 --> 0:24:39.120

Gray, Jocelyne (DOH)

If you are and so.

0:24:41.120 --> 0:24:41.560

Gray, Jocelyne (DOH)

Umm.

0:24:42.720 --> 0:24:55.390

Gray, Jocelyne (DOH)

If you have questions about a acquiring A4 profit water system and you're not sure if there might be some issues, you can talk to Mike Copeland. Umm.

0:24:58.310 --> 0:24:59.890

Gray, Jocelyne (DOH)

And then all our contracting.

0:25:1.130 --> 0:25:9.700

Gray, Jocelyne (DOH)

Managers, the lowest Rudolph, Dennis Hewitt, Brittany, Cody Pinckney and Elois is our sam.gov the expert.

0:25:10.830 --> 0:25:11.800

Gray, Jocelyne (DOH)

So you can contact her.

0:25:14.450 --> 0:25:18.530

Gray, Jocelyne (DOH)

Uh, this is what our website looks like.

0:25:18.540 --> 0:25:23.890

Gray, Jocelyne (DOH)

And A will be the same link at August 9th at 10:00 AM.

0:25:26.520 --> 0:25:28.180

Gray, Jocelyne (DOH)

And more information.

0:25:28.190 --> 0:25:34.410

Gray, Jocelyne (DOH)

Umm, if you Scroll down, so if you see the website here you have to Scroll down on the page and you get to these drop downs.

0:25:34.900 --> 0:25:46.70

Gray, Jocelyne (DOH)

Go to the consolidation feasibility and regionalization and there's where our guidelines, the application worksheet.

0:25:46.540 --> 0:25:52.140

Gray, Jocelyne (DOH)

This is that is where I will put the recording and the slides from today's presentation.

0:25:54.180 --> 0:25:55.370

Gray, Jocelyne (DOH)

Are there questions?

0:26:5.30 --> 0:26:5.870

Gray, Jocelyne (DOH)

Yes, Regina.

0:26:8.200 --> 0:26:14.270

Grimm, Regina (DOH)

I might have missed you saying this already, but regarding connection fees, did you say something like it can't?

0:26:14.500 --> 0:26:18.210

Grimm, Regina (DOH)

Can't it fund just connection fees or how would that work?

0:26:16.910 --> 0:26:18.350

Gray, Jocelyne (DOH)

Yes, so.

0:26:18.320 --> 0:26:20.380

Grimm, Regina (DOH)

Does there have to be something else included?

0:26:20.460 --> 0:26:25.930

Grimm, Regina (DOH)

Specifically, I was thinking of a water system that wants to hook up to a larger utility.

0:26:28.650 --> 0:26:28.890

Gray, Jocelyne (DOH)

Right.

0:26:26.0 --> 0:26:32.910

Grimm, Regina (DOH)

For water quality problems and they're they're located already next to the main, so it just be a hookup.

0:26:33.820 --> 0:26:36.930

Gray, Jocelyne (DOH)

So we can do connection fee only.

0:26:36.980 --> 0:26:52.760

Gray, Jocelyne (DOH)

They cannot, umm, pay for any of the constructs of if they don't have an inner tile ready, and so they have to like install a valve and a little bit of water main we can't pay for that with this, but we can pay for the connection fee.

0:26:52.830 --> 0:26:59.740

Gray, Jocelyne (DOH)

We have 400,000 out of the 800,000 that can be used for connection fee only projects.

0:27:1.400 --> 0:27:1.710

Grimm, Regina (DOH)

OK.

0:27:1.720 --> 0:27:2.60

Grimm, Regina (DOH)

Thank you.

0:27:3.30 --> 0:27:3.550

Gray, Jocelyne (DOH)

Cecilia.

0:27:5.320 --> 0:27:7.870

Welch, Cecilia X (DOH)

I'm talking about the same system as Regina.

0:27:7.880 --> 0:27:14.250

Welch, Cecilia X (DOH)

It's in Kitsap and they this mobile Home Park has a pee fast.

0:27:16.670 --> 0:27:16.930

Gray, Jocelyne (DOH)

OK.

0:27:14.740 --> 0:27:23.890

Welch, Cecilia X (DOH)

They've exceeded the soul and they want to connect to a larger utility, but the larger utility doesn't have.

0:27:25.360 --> 0:27:32.680

Welch, Cecilia X (DOH)

Well, I think their plan is expired and they probably don't have he fast in there.

0:27:32.930 --> 0:27:38.410

Welch, Cecilia X (DOH)

They wouldn't have had it in their capital improvement plans either, so I don't know how that works, like if it's.

0:27:37.920 --> 0:27:44.30

Gray, Jocelyne (DOH)

So with this they can use the \$50,000 to update their water system plan.

0:27:44.980 --> 0:27:45.320

Welch, Cecilia X (DOH)

OK.

0:27:44.780 --> 0:27:47.320

Gray, Jocelyne (DOH)

They can also use it to.

0:27:48.740 --> 0:28:4.610

Gray, Jocelyne (DOH)

Cover the connection fee cost for the mobile Home Park and as part of the water system plan update, they can identify whatever work construction work may be needed to connect that system into the bigger system.

0:28:5.850 --> 0:28:6.90

Welch, Cecilia X (DOH)

OK.

0:28:7.220 --> 0:28:7.340

Gray, Jocelyne (DOH)

Yeah.

0:28:5.910 --> 0:28:8.930

Petro, Sophia M (DOH)

I I do think it's in their water system.

0:28:14.40 --> 0:28:14.520

Welch, Cecilia X (DOH)

Right.

0:28:8.940 --> 0:28:14.640

Petro, Sophia M (DOH)

Plan already, but it wasn't in the water system plan to do this for PFAS, it was just on their water system plan all along.

0:28:14.290 --> 0:28:16.330

Gray, Jocelyne (DOH)

To umm.

0:28:18.150 --> 0:28:18.350

Welch, Cecilia X (DOH)

OK.

0:28:24.670 --> 0:28:24.930

Welch, Cecilia X (DOH)

Yeah.

0:28:17.990 --> 0:28:25.830

Gray, Jocelyne (DOH)

But yeah, so we can if you have very, very specific systems to you and I can talk more, more about details of them.

0:28:26.510 --> 0:28:26.780

Welch, Cecilia X (DOH)

OK.

0:28:26.790 --> 0:28:27.880

Welch, Cecilia X (DOH)

I'll follow up with you. Thanks.

0:28:28.20 --> 0:28:28.200

Gray, Jocelyne (DOH)

OK.

0:28:30.370 --> 0:28:31.360

Gray, Jocelyne (DOH)

Any other questions?

0:28:36.560 --> 0:28:36.820

Gray, Jocelyne (DOH)

Laura.

0:28:37.740 --> 0:28:38.470

McLaughlin, Laura A (DOH)

Hey, Jocelyn.

0:28:38.520 --> 0:28:39.830

McLaughlin, Laura A (DOH)

I just got confused.

0:28:39.840 --> 0:28:41.70

McLaughlin, Laura A (DOH)

I think you mentioned this.

0:28:41.680 --> 0:28:47.710

McLaughlin, Laura A (DOH)

Can you clarify who can apply for multiple grants versus?

0:28:54.650 --> 0:28:54.960

Gray, Jocelyne (DOH)

Great.

0:28:47.760 --> 0:28:58.90

McLaughlin, Laura A (DOH)

You said that you get bonus points for consolidating more than one system, like why wouldn't they just apply for two consolidation study grants?

0:28:58.160 --> 0:28:59.140

McLaughlin, Laura A (DOH)

Or is it just their choice?

0:28:59.700 --> 0:29:2.70

Gray, Jocelyne (DOH)

No, it's so say so.

0:29:2.80 --> 0:29:12.990

Gray, Jocelyne (DOH)

That example of the city that had two different projects, so one project is to consolidate the mobile Home Park on the South end of their system.

0:29:13.180 --> 0:29:25.230

Gray, Jocelyne (DOH)

So that's one project, but then at the top they have maybe three Group B of the North End, three Group B Systems and two Group A systems.

0:29:25.520 --> 0:29:37.500

Gray, Jocelyne (DOH)

So they get bonus points for one of the Group A systems and the Group B systems, but not the second Group A cause that's the main one that's connecting.

0:29:37.510 --> 0:29:41.620

Gray, Jocelyne (DOH)

So because they're in completely different locations, the needs may be different.

0:29:42.660 --> 0:29:50.700

Gray, Jocelyne (DOH)

Umm, I do know of some projects where there's like by water systems and they wanna all join together as one.

0:29:51.950 --> 0:29:57.400

Gray, Jocelyne (DOH)

So one of the systems has to be the applying system.

0:29:57.930 --> 0:30:7.990

Gray, Jocelyne (DOH)

Then you have the secondary system that will connect into the applicant and then the other three they can get bonus points for that.

0:30:8.430 --> 0:30:9.310

Gray, Jocelyne (DOH)

Does that make sense?

0:30:12.280 --> 0:30:15.410

McLaughlin, Laura A (DOH)

Yeah, it it sounds like there's maybe some wiggle room there.

0:30:15.420 --> 0:30:19.230

McLaughlin, Laura A (DOH)

If they're considering doing that, they should talk to us.

0:30:19.680 --> 0:30:21.10

Gray, Jocelyne (DOH)

Yes, they should talk to us.

0:30:21.90 --> 0:30:21.440

McLaughlin, Laura A (DOH)

Yeah.

0:30:21.480 --> 0:30:22.250

McLaughlin, Laura A (DOH)

OK.

0:30:22.560 --> 0:30:23.140

McLaughlin, Laura A (DOH)

Thanks, Jane.

0:30:23.150 --> 0:30:23.650

McLaughlin, Laura A (DOH)

Thanks Jason.

0:30:23.370 --> 0:30:25.110

Gray, Jocelyne (DOH)

Yep, Diana.

0:30:26.940 --> 0:30:27.730

Diana Temple

Thanks Jocelyn.

0:30:31.890 --> 0:30:33.620

Gray, Jocelyne (DOH)

Who? Yep.

0:30:28.440 --> 0:30:35.350

Diana Temple

I also have interest in the same mobile Home Park that Regina and Sophia are are referencing.

0:30:35.880 --> 0:30:44.630

Diana Temple

What is the maximum dollar amount that that said mobile Home Park could receive for this grant?

0:30:43.960 --> 0:30:46.640

Gray, Jocelyne (DOH)

So for would be \$50,000.

0:30:46.780 --> 0:30:49.90

Diana Temple

\$50,000. OK, perfect.

0:30:49.620 --> 0:30:49.960

Diana Temple

Thank you.

0:30:47.980 --> 0:30:51.270

Gray, Jocelyne (DOH)

Yes, you are welcome.

0:30:55.450 --> 0:30:56.410

Gray, Jocelyne (DOH)

Any other questions?

0:31:0.730 --> 0:31:4.680

Gray, Jocelyne (DOH)

Again, we'll have a question and answer session on August 9th.

0:31:5.130 --> 0:31:22.240

Gray, Jocelyne (DOH)

The question and answers will be posted by the 18th of the month on to our website under the consolidation Feasibility study, grant drop down and thank you for joining me today and I look forward to seeing my applications.

0:31:22.250 --> 0:31:24.800

Gray, Jocelyne (DOH)

We get this year is have a good day.

0:31:26.740 --> 0:31:27.80

Diana Temple

Thank you.

0:31:26.930 --> 0:31:27.650

Petro, Sophia M (DOH)

Thanks to offline.

0:31:28.290 --> 0:31:28.710

Welch, Cecilia X (DOH)

Thank you.
