## Communicable Disease Prevention and Response Plan for Temporary Worker Housing

## WAC 246-358-175

The operator must develop a communicable disease prevention and response plan (plan) as part of the requirements in WAC 246-358-175. The plan assists the operator to take the required steps, when necessary, to prevent and respond to a communicable disease case or outbreak to protect the occupants of the temporary worker housing.

## The operator must:

- Cooperate with the Local Health Jurisdiction (LHJ) in the investigation and control of cases, suspected cases, outbreaks, and suspected outbreaks of communicable diseases.
  - To help facilitate a quick response to an investigation, the plan must include processes to address common communicable disease control recommendations like Isolation and/or quarantine and screening occupants for common communicable disease symptoms.
- When notified by the occupant, the operator must report to the Local Health Jurisdiction the name and address of occupants with notifiable conditions or when two or more occupants share similar symptoms specified in WAC 246-358-175.
- Facilitate transportation to medical care for ill occupants as needed.
- Educate occupants about communicable disease prevention and response.
- > Designate a person or persons that are responsible for executing the plan and document their training at least annually.
- Submit new and revised plans to the state Department of Health. Please submit your plan by:

o **E-mail to**: <u>Housing@doh.wa.gov</u> OR

o Mail to:

Washington State Department of Health Housing Programs PO Box 47824 Olympia, WA 98504

Failure to submit a plan or properly implement the requirements of WAC 246-358-175 may result in administrative action, including license denial, license suspension, or fines.

**Variances.** Consistent with WAC 296-307-16120(1) and WAC 246-358-040(1), an operator may request a variance from the requirements of the rule when another means of providing equal protection is provided.

The following TWH communicable disease prevention and response plan may be used as a template.
