

WA Pharmacy Quality Assurance Commission 2025 Responsible Manager Pharmacy Self-Inspection Worksheet USP 800 – Hazardous Drugs Addendum

ATTENTION: Responsible Manager or Equivalent

Washington law holds the responsible manager and all pharmacists on duty responsible for ensuring pharmacy compliance with all state and federal laws governing the practice of pharmacy. Failure to complete this addendum within the month of March and within 30 days of becoming responsible manager (as required by WAC 246-945-005) may result in disciplinary action. **The following addendum is required to be filled out and kept on file with the General Pharmacy Self-Inspection Worksheet. Do not send to the commission office.**

The primary objective of this report, and your self-inspection, is to provide an opportunity to identify and correct areas of non-compliance with state and federal law. This worksheet does not replace **U.S. Pharmacopeia (USP) <800> Hazardous Drugs – Handling in Healthcare Settings**. (NOTE: Neither the self-inspection nor a commission inspection evaluates your complete compliance with all laws and rules of the practice of pharmacy.)

By answering the questions and referencing the appropriate laws/rules/CFR provided, you can determine whether you are compliant with many of the rules and regulations. If you have corrected any deficiencies, please write corrected and the date of correction by the appropriate question.

This self-inspection worksheet applies only to activities performed by pharmacy personnel. Other healthcare professionals are regulated by their own boards and commissions.

Date responsible manager/change of responsible manager inspection was performed:

Signature of responsible manager:

To request this document in another format, call 1-800-525-0127. Deaf or hard of hearing customers, please call 711 (Washington Relay) or email <u>doh.information@doh.wa.gov</u>.

General Rule Reference - Applies to all questions throughout the worksheet.

RCW 18.64.270(2) "Any medicinal products that are compounded for patient administration or distribution to a licensed practitioner for patient use or administration shall, at a minimum, meet the standards of the official United States pharmacopeia as it applies to nonsterile products and sterile administered products."

WAC 246-945-100(1)(c) "All licensees of the commission must comply, at a minimum, with the following chapters of the United States Pharmacopeia (USP) when engaged in compounding nonsterile and sterile products for patient administration or distribution to a licensed practitioner for patient use or administration: (c) USP General Chapter <800> Hazardous Drugs – Handling in Healthcare Settings"

Yes	No	N/A	#		USP Reference	Notes/Corrective Actions
			20.	Are all antineoplastic HDs requiring manipulation, other than counting or repackaging of final dosage forms, and any HD APIs stored separately from non- HDs?	HDs must be stored in a manner that prevents spillage or breakage if the container falls. Do not store HDs on the floor. In areas prone to specific types of natural disasters (e.g., earthquakes) the manner of storage must meet applicable safety precautions, such as secure shelves with raised front lips.	
			21.	Are antineoplastic HDs that require manipulation and all HD APIs stored separately from non- HDs in an externally ventilated, negative-pressure room with at least 12 ACPH?	Antineoplastic HDs requiring manipulation other than counting or repackaging of final dosage forms and any HD API must be stored separately from non-HDs in a manner that prevents contamination and personnel exposure. These HDs must be stored in an externally ventilated, negative-pressure room with at least 12 air changes per hour (ACPH). Nonantineoplastic, reproductive risk only, and final dosage forms of antineoplastic HDs may be stored with other inventory if permitted by entity policy. Storilo	
			22.	Are refrigerated antineoplastic HDs stored in a dedicated refrigerator in a negative pressure area with at least 12 ACPH?	with other inventory if permitted by entity policy. Sterile and nonsterile HDs may be stored together, but HDs used for nonsterile compounding should not be stored in areas designated for sterile compounding to minimize traffic into the sterile compounding area. Refrigerated antineoplastic HDs must be stored in a dedicated refrigerator in a negative pressure area with at east 12 ACPH [e.g., storage room, buffer room, or containment segregated compounding area (C-SCA)]. If a refrigerator is placed in a negative pressure buffer room, an exhaust located adjacent to the refrigerator's compressor and behind the refrigerator should be considered.	
			23.	Does sterile or nonsterile compounding of HDs occur in a C- PEC located in a C-SEC?	C-PEC located in a C-SEC. The C-SEC used for sterile and	
			24.	Does the C-SEC used for sterile and nonsterile compounding include:	nonsterile compounding must: be externally vented; be physically separated (i.e., a different room from other preparation areas); have an appropriate air exchange (e.g., ACPH); have a negative pressure between 0.01 and	
			24.	a External ventilation	0.03 inches of water column relative to all adjacent areas.	
			24.	b Physical separation	The C-PEC must operate continuously if it supplies some or all of the negative pressure in the C-SEC or if it is used

				If no permeation information is available for the gowns used, changing them every 2–3 hours or immediately after a spill or splash is acceptable.	any circumstances. Gowns must be changed per the manufacturer's information for permeation of the gown. If no permeation information is available for the gowns used, change them every 2–3 hours or immediately after a spill or splash. Gowns worn in HD handling areas must	
			60.	Are gowns only worn in the HD handling areas?	not be worn to other areas in order to avoid spreading HD contamination and exposing other healthcare workers.	
			61.	Is a second pair of shoe covers donned prior to entering the C- SEC and doffed upon exiting the C-SEC?	USP Chapter 800- 7.3 HEAD, HAIR, SHOE, AND SLEEVE COVERS When compounding HDs, a second pair of shoe covers must be donned before entering the C-SEC and doffed when exiting the C-SEC. Shoe covers worn in HD handling areas must not be worn to other areas to avoid spreading HD contamination and exposing other healthcare workers.	
			62.	Is eye and face protection worn when there is a risk of a spill or splash?	USP Chapter 800- 7.4 EYE AND FACE PROTECTION Appropriate eye and face protection must be worn when there is a risk for spills or splashes of HDs or HD waste materials when working outside of a C-PEC (e.g., administration in the surgical suite, working at or above eye level, or cleaning a spill). A full-face piece respirator provides eye and face protection. Goggles must be used when eye protection is needed. Eye glasses alone or safety glasses with side shields do not protect the eyes adequately from splashes. Face shields in combination with goggles provide a full range of protection against splashes to the face and eyes. Face shields alone do not provide full eye and face protection.	
			63.	If required, is appropriate respiratory protection provided and used?	USP Chapter 800- 7.5 RESPIRATORY PROTECTION Surgical masks do not provide respiratory protection from drug exposure and must not be used when respiratory protection from HD exposure is required.	
			64.	Is PPE placed into an appropriate waste container and disposed of per local, state, and federal regulations?	USP Chapter 800- 7.6 DISPOSAL OF USED PERSONAL PROTECTIVE EQUIPMENT Consider all PPE worn when handling HDs to be contaminated with, at minimum, trace quantities of HDs.	

Co	omplia	ant	щ			
Yes	No	N/A	#		USP Reference	Notes/Corrective Actions
			65.	Are outer chemotherapy gloves and sleeve covers carefully removed and discarded immediately into an approved waste container? **Trace contaminated waste must be disposed inside the C- PEC or contained in a sealable bag for discarding outside the C- PEC.**	PPE must be placed in an appropriate waste container and further disposed of per local, state, and federal regulations. PPE worn during compounding should be disposed of in the proper waste container before leaving the C-SEC. Chemotherapy gloves and sleeve covers (if used) worn during compounding must be carefully removed and discarded immediately into a waste container approved for trace contaminated waste inside the C-PEC or contained in a sealable bag for discarding outside the C-PEC.
