

Provider Card - Hepatitis C Screening

- Give this card to your healthcare provider.
- Talk to your doctor about getting tested for hepatitis C and vaccinated against hepatitis A & B.

Hepatitis C is a serious but curable disease that can lead to liver damage, cancer, and even death. Safe and effective treatment is available. The first step to health is knowing your hepatitis C status.

DOH 150-261 CS June 2024 To request this document in another format, call 1-800-525-0127. Deaf or hard of hearing customers, please call 711 (Washington Relay) or email doh.information@doh.wa.gov.

Dear healthcare provider,

I want to be screened for hepatitis C. The CDC recommends that anyone over age 18 get tested for hepatitis C at least once in their lifetime. If I test reactive and am confirmed to have a current infection, I would like to begin treatment as soon as possible.

I would also like to be vaccinated against hepatitis A & B, if my records indicate I am at risk for these infections.

Visit www.doh.wa.gov/hep-c-hub and www.hepatitisc.uw.edu for additional information & provider education.
