

Access specialized antimicrobial stewardship training for consultant pharmacists working with skilled nursing facilities!

Are you a consultant pharmacist working with a skilled nursing facility?

ASCP's Antimicrobial Stewardship Toolkit offers practical guidance for starting, growing, and maintaining an antimicrobial program, ensuring compliance with CMS Long-Term Care regulations. This specialized curriculum will equip you with the skills to manage antimicrobial use effectively in long-term care settings, and **it's available for free through the Washington State Department of Health.**

Toolkit Includes:

- Sample policies and procedures
- Facility and resident assessment forms
- Data collection forms
- Facility educational handouts
- Seven (7) educational PowerPoint® courses
- And more!

Why choose this toolkit?

- **Created by ASCP:** Benefit from a program designed by a professional pharmacy organization purchased through the Washington Department of Health
- **Comprehensive Content:** This curriculum covers everything from basic principles to advanced strategies for improving patient care.
- **Flexible Learning:** Study at your own pace with materials available online, allowing you to balance your professional responsibilities.

Don't miss this **free** opportunity to enhance your expertise and contribute to better patient outcomes in long-term care.
