

CASH VALUE BENEFIT WHEN ONLINE ORDERING

When you purchase fresh fruits and vegetables on [Walmart.com](https://www.walmart.com), the final cost may change depending on how much the items weigh. When completing the order, store staff must weigh the items to determine the actual weight and final cost.

Only the estimated cost will show in the **WICShopper app** at the time of the order. Once the staff weighs the fruit and vegetables, they adjust the price, which will show up in the app as a refund. The correct final cost of the items will appear in the app.

EXAMPLE:

You select avocados, bananas, and apples for an online pickup order.

In this example, the store staff needs to weigh the bananas and apples. Stores price some fruits and vegetables, like avocados, per unit. Store staff do not need to weigh these items, so the price stays the same.

The boxes below show the estimated cost of the order compared to the final cost.

ESTIMATED COST OF WEIGHED ITEMS AT CHECKOUT	
• Avocados:	\$0.70
• Bananas:	\$0.28
• Apples:	\$0.79

FINAL COST OF WEIGHED ITEMS AT CHECKOUT	
• Avocados:	\$0.70
• Bananas:	\$0.20
• Apples:	\$0.58

Below is an example of your **Purchase History in the WICShopper app** after completing an online order that includes weighed fruits or vegetables.
