Contact phone #: 509-689-2517 ext 3341

An acute care hospital may not be the appropriate setting for all reproductive health services listed below.
Some reproductive services are most appropriately available in outpatient settings such as a physician office or clinic, depending on the specific patient circumstances.

The following reproductive health services are generally available at the above listed hospital:

Abortion services

- Medication abortion
- Referrals for abortion
- Surgical abortion

Contraception services

- Birth control: provision of the full range of Food and Drug Administration-approved methods including intrauterine devices, pills, rings, patches, implants, etc.
- Contraceptive counseling
- Hospital pharmacy dispenses contraception
- Removal of contraceptive devices
- Tubal ligations
- Vasectomies

Emergency contraception services

- Emergency contraception - sexual assault
- Emergency contraception - no sexual assault

Infertility services

- Counseling
- Infertility testing and diagnosis
- Infertility treatments including but not limited to in vitro fertilization

Other related services

- Human immunodeficiency virus (HIV) testing
- Human immunodeficiency virus (HIV) treatment
- Pre-exposure prophylaxis (PrEP), post-exposure prophylaxis (PEP), prescriptions, and related counseling
- Sexually transmitted disease testing and treatment
- Treatment of miscarriages and ectopic pregnancies

Pregnancy-related services

- Counseling
- Genetic testing
- Labor and delivery
- Neonatal intensive care unit
- Prenatal care
- Postnatal care
- Ultrasound

Comments; limitations on services; other services

Hospital Reproductive Health Services

Hospital name: Three Rivers Hospital

Additional comments; limitations on services; other services (*continued*)

1. Referrals for abortion: The clinic can refer requested abortions to Planned Parenthood in Wenatchee, WA.
2. Birth control: provision of the full range of Food and Drug Administration-approved methods including intrauterine devices, pills, rings, patches, implants, etc: Clinic and Hospital providers can write prescriptions for rings, patches, and pills. Providers can place intrauterine devices, however, cannot place implants. The providers can remove implants.
3. Human immunodeficiency virus (HIV) testing: HIV testing can be drawn at our facility, but this is a send out test.
4. Sexually transmitted disease testing and treatment: STD testing can be drawn at our facility, but these tests are a send out.
5. Treatment of miscarriages and ectopic pregnancies: We can perform diagnostics for ectopic pregnancies, but the patient would be sent to a higher level of care for treatment.
6. Genetic testing: Testing can be done via send out.
