Hospital Information

Name of Hospital: Western State Hospital		
Hospital License #: NA per RCW 72.23.020		
Hospital Street Address: 9601 Steilacoom Blvd SW		
City/Town: Lakewood	State: Wa	Zip code: 98498
Is this hospital license affiliated with more than one location?		☐ Yes ☒ No
If "Yes" was selected, please provide the location name and address		
Review Type:	☒ Annual	Review Date: 1/1/25
	☐ Update	Next Review Date: 1/1/26
Effective Date: NA - Previously Approved Plan		
Date Approved: NA- Previously Approved Plan		

Hospital Information Continued (Optional)

Factors Considered in the Development of the Hospital Staffing Plan (check all that apply):

- ☐ Staffing guidelines adopted or published by national nursing professional associations, specialty nursing organizations, and other health professional organizations

Description:

- ☒ Terms of applicable collective bargaining agreement

Description:

Base staffing, skill mix, and making changes to unit staffing based on census were components of the staffing plan that were discussed during bargaining. Currently, census-based staffing is not standardized and is being determined on a case-by-case basis through professional judgment of the nursing leadership.

- ☒ Relevant state and federal laws and rules including those regarding meal and rest breaks and use of overtime and on-call shifts

Description:

WAC 296-126-092

- ☒ Hospital finances and resources

Description:

Funding for state hospital operations is appropriated to the Department of Social and Health Services (DSHS) through the state legislative process and signed into law by the Governor at the end of each session. DSHS, Behavioral Health Administration (BHA) cannot legally spend more than what is appropriated to the state hospital budgets. Changes to spending levels and bed capacity require legislative approval.

- ☒ Other

Description:

The WSH hospital staffing committee was unable to agree upon a new staffing plan. Therefore, attached is the last approved plan.

This facility utilizes three distinct plans to include emergency, minimum, and optimal staffing plans.

The staffing plan provided is the minimum number of RNs, LPNs, and UAPs per shift based on the average needs of the wards. In this plan we have provided option A and option B.

BMT (PRN)	x	x	x	x

Unit Information

Factors Considered in the Development of the Unit Staffing Plan (Check all that apply):

- ☒ Activity such as patient admissions, discharges, and transfers

Description:

Routine activities includes on average 1-6 transfers from Forensics, transfers to other wards, medical and court appointments that require transports, hospital watch if necessary.

- ☒ Patient acuity level, intensity of care needs, and the type of care to be delivered on each shift

Description:

This is an all male ward, with several assaultive patients. The patient population also includes a medically frail diabetic, many patients who cannot be on a co-ed ward due to past or recent sexual history, and approximately 20% of the population who who cannot have a roommate because of their dangerousness to others.

☒ Skill mix

Description:

The skill mix includes registered nurses, licensed practical nurses, institutional counselors two and mental health technicians. the institutional counselors are tasked with providing on ward active treatment complementing the nursing care provided by the RNs, LPNs and MHTs

☒ Level of experience of nursing and patient care staff

Description:

The range of experience is broad. The RNs on the unit have up to 6 years RN experience, with the LPNs having up to 30 years experience

☐ Need for specialized or intensive equipment

Description:

none at this time

- ☒ Architecture and geography of the unit such as placement of patient rooms, treatment areas, nursing stations, medication preparation areas, and equipment

Description:

ward has 29 funded beds, (12 double bed rooms, one 4 man room, and one single room). One day room, two groups rooms, one treatment room, one nurses station, one breakroom with a toilet, one small conference room for treatment meetings, and a shared kitchen that requires 2 staff, one to guard the elevator and one to help the food aide pass the meal trays.

- ☒ Other

Description:

Currently, census-based staffing is not standardized through a patient to staff ratio. Census based changes to base staffing is determined by nursing leadership on a case-to-case basis through professional judgment. For each shift/ward the staffing office in collaboration with the nurse supervisor (RN3) and nurse manager (RN4) deploy resources to the areas with the greatest need.

Description:

This is an all male ward, with several assaultive patients. The patient population also includes a medically frail diabetic, many patients who cannot be on a co-ed ward due to past or recent sexual history, and approximately 20% of the population who who cannot have a roommate because of their dangerousness to others.

☒ Skill mix

Description:

The skill mix includes registered nurses, licensed practical nurses, institutional counselors two and mental health technicians. the institutional counselors are tasked with providing on ward active treatment complementing the nursing care provided by the RNs, LPNs and MHTs

☒ Level of experience of nursing and patient care staff

Description:

The range of experience is broad. The RNs on the unit have up to 6 years RN experience, with the LPNs having up to 30 years experience

☐ Need for specialized or intensive equipment

Description:

none at this time

- ☒ Architecture and geography of the unit such as placement of patient rooms, treatment areas, nursing stations, medication preparation areas, and equipment

Description:

ward has 29 funded beds, (12 double bed rooms, one 4 man room, and one single room). One day room, two groups rooms, one treatment room, one nurses station, one breakroom with a toilet, one small conference room for treatment meetings, and a shared kitchen that requires 2 staff, one to guard the elevator and one to help the food aide pass the meal trays.

- ☒ Other

Description:

Currently, census-based staffing is not standardized through a patient to staff ratio. Census based changes to base staffing is determined by nursing leadership on a case-to-case basis through professional judgment. For each shift/ward the staffing office in collaboration with the nurse supervisor (RN3) and nurse manager (RN4) deploy resources to the areas with the greatest need.

Unit Information

Factors Considered in the Development of the Unit Staffing Plan (Check all that apply):

- ☒ Activity such as patient admissions, discharges, and transfers

Description:

Routine activities includes on average 1-2 transfers from Forensics, transfers to other wards, medical and court appointments that require transports, hospital watch if necessary.

- ☒ Patient acuity level, intensity of care needs, and the type of care to be delivered on each shift

Description:

Co-ed geriatric psych patients with some high acuity patients. The percentage of patient requiring specialized staffing fluctuates but has increased to up to 7. ONLY about 10 percent of the patient cannot have a roommate. The number of patient on the unit requiring full assist fluctuates but can have up to 4-5 simultaneously.

☒ Skill mix

Description:

The skill mix includes registered nurses, licensed practical nurses, institutional counselors two and mental health technicians. the institutional counselors are tasked with providing on ward active treatment complementing the nursing care provided by the RNs, LPNs and MHTs

☒ Level of experience of nursing and patient care staff

Description:

RN experience ranges from 5-18 years. LPN experience ranges from 1-20 years.

☒ Need for specialized or intensive equipment

Description:

Walkers, medical beds, hoier lifts, wheelchairs, and would vac.

- ☒ Architecture and geography of the unit such as placement of patient rooms, treatment areas, nursing stations, medication preparation areas, and equipment

Description:

The ward has 29 funded beds, fourteen double bed rooms and one single room. The ward has one day room, a pati, one treatment room, one nurses station, one breakroom with a toilet, one small conference room for treatment meetings, and a ward kitchen.

Unit Information

Factors Considered in the Development of the Unit Staffing Plan (Check all that apply):

- ☒ Activity such as patient admissions, discharges, and transfers

Description:

The treatment delivered on HMM involves teaching new developmental skills and abilities such as learning to do activities of daily living, social skills, job readiness, recreation skills, and coping. HMM is the only civil ward that accepts admissions from the community. The patient's are escorted daily to vocational jobs, community outings and pre-placement visits.

- ☒ Patient acuity level, intensity of care needs, and the type of care to be delivered on each shift

Description:

These clients often have intellectual and developmental disabilities and co-occurring mental health disorders.

☒ Skill mix

Description:

The skill mix includes registered nurses, licensed practical nurses, institutional counselors.

☒ Level of experience of nursing and patient care staff

Description:

RN experience ranges from 7-13 years. LPN experience ranges from 3-25 years.

Factors Considered in the Development of the Unit Staffing Plan (Check all that apply):

- ☒ Activity such as patient admissions, discharges, and transfers

Description:

Routine activities includes on average 1-4 transfers from Forensics, transfers to other wards, medical and court appointments that require transports, hospital watch if necessary.

- ☒ Patient acuity level, intensity of care needs, and the type of care to be delivered on each shift

Description:

All male patients averaging a high acuity. All patient on this ward cannot have a roommate because of aggression and their danger to others.

☒ Skill mix

Description:

The skill mix includes registered nurses, licensed practical nurses, institutional counselors two and mental health technicians. the institutional counselors are tasked with providing on ward active treatment complementing the nursing care provided by the RNs, LPNs and MHTs

☒ Level of experience of nursing and patient care staff

Description:

RN experience ranges from 7-13 years. LPN experience ranges from 3-25 years.

☐ Need for specialized or intensive equipment

Description:

- ☒ Architecture and geography of the unit such as placement of patient rooms, treatment areas, nursing stations, medication preparation areas, and equipment

Description:

The ward has 20 funded beds, all single rooms. The ward has one day room, a pati, one treatment room, one nurses station, one breakroom with a toilet, one small conference room for treatment meetings, and a ward kitchen.

- ☒ Other

Description:

Currently, census-based staffing is not standardized through a patient to staff ratio. Census based changes to base staffing is determined by nursing leadership on a case-to-case basis through professional judgment. For each shift/ward the staffing office in collaboration with the nurse supervisor (RN3) and nurse manager (RN4) deploy resources to the areas with the greatest need.

Factors Considered in the Development of the Unit Staffing Plan (Check all that apply):	
☒	Activity such as patient admissions, discharges, and transfers F1, F2, F3, F5, F6 are admission wards for the Gage Center. All wards discharge and transfer.
☒	Patient acuity level, intensity of care needs, and the type of care to be delivered on each shift We utilize HART, which is a structured professional judgement tool.

Unit Information	
Factors Considered in the Development of the Unit Staffing Plan (Check all that apply):	
☒	Activity such as patient admissions, discharges, and transfers F1, F2, F3, F5, F6 are admission wards for the Gage Center. All wards discharge and transfer.
☒	Patient acuity level, intensity of care needs, and the type of care to be delivered on each shift We utilize HART, which is a structured professional judgement tool.
