# Vaccine Equity Strategies

### COVID-19 Vaccine Equity Strategies

#### Washington State Department of Health

- 1. Engage communities to inform vaccine prioritization and planning
- 2. Integrate a pro-equity approach into vaccine allocation and distribution
- 3. Prioritize allocation and support to providers who effectively serve disproportionately impacted communities
- 4. Invest in trusted community leaders, messengers and organizations
- 5. Ensure all communications, education and outreach efforts are culturally and linguistically appropriate and accessible
- 6. Strengthen the public health system's ability to center communities in vaccine outreach and access
- 7. Foster opportunities for collaboration
- 8. Support a trauma-informed approach to vaccine conversations

#### Vaccine Providers

- Language access
  - Review the <u>Language Access Planning Tool</u> and implement strategies that are relevant to your vaccination clinic or organization.
- □ Access for people with disabilities
  - Review the <u>Checklist to Ensure that Vaccine Sites are Accessible to People with</u> <u>Disabilities</u> and implement strategies that are relevant to your vaccination clinic or organization.
- Collect patient race, ethnicity, and language data. This information should be self-report and is very important for understanding the populations we are and are not effectively reaching with the COVID-19 vaccine. Patients do not have to provide this information.
- Reach out proactively to eligible patients, especially patient's from highly impacted communities.
- Reinforce messaging that people are eligible for vaccine regardless of their immigration status or insurance status. If you are required to ask for a social security number, share transparently that it is not required and no personal information will be shared.
- Use our <u>Equitable Vaccine Site Placement Planning Tool</u> in planning mobile and community pop-up sites.
- □ Meet people where they are: "Vaccines going to people, not people going to vaccines"
  - Consider community centered vaccination sites where people feel safer.
  - Employer-based vaccine sites to save eligible employees time.
  - Provided alternative and extended hours.

- □ Implement community-based scheduling by:
  - Offering community specific days or hours for appointments.
  - Holding a set of appointments for phone-based scheduling. Recommendation: Consider holding 20-30% for phone-based scheduling.
  - Holding a percent of appointments for scheduling by community partners.
    Recommendation: Consider holding 20-30% for community-based scheduling.
  - Developing a separate online scheduling link to improve community access (e.g. offer a Spanish-only link to address language barriers).
- Partner with and activate community health workers to assist with culturally responsive and linguistically appropriate vaccine outreach and access needs (i.e. education, interpretation, scheduling appointments).
- □ Co-host vaccine education and clinic events with trusted community leads, community organizations, and faith-based community centers.
- □ Have an <u>equity-informed extra doses plan</u>.
- Use the <u>Washington Tracking Network</u>, <u>Information by Location Mapping Tool: COVID-19 Social Vulnerability Index</u> to identify priority community areas for mobile and community pop-up sites.
- Implement "past tier" catch-up days or times to ensure access for harder to reach groups who were eligible in previous tiers.
- Plan proactive efforts to reach communities who are likely to be missed by traditional channels.
- **Review** <u>Washington State Hospital Association's Equity in Vaccine Strategies</u>.
- Search DOH <u>COVID-19 materials by language</u> and the <u>Partner Toolkit</u> for vaccine education materials you can use.

More pro-equity strategies and resources will continue to be added to our <u>COVID-19 Vaccine</u> Equity & Engagement webpage.

## Opportunities for collaboration

**COVID-19 Vaccine Implementation Collaborative** 1<sup>st</sup> and 3<sup>rd</sup> Wednesdays of every month 4:00 – 5:30 PM More information: <u>Collaborative:: Washington State Department of Health</u> Contact: <u>Vax.Collaborative@doh.wa.gov</u>

COVID-19 Vaccine Provider Pro-equity Strategy Drop-in Space

1<sup>st</sup> and 3<sup>rd</sup> Thursdays of every month 12:00 – 1:00 PM Contact: equity@doh.wa.gov

DOH Publication: 820-121
