

BAART Behavioral Health Services, Inc. Response to Community Concern

1) The proposed location is so close to Peninsula Children's Clinic, was that taken into consideration?

Finding a location that can accommodate city, county and state zoning requirements and that provides adequate parking and transportation routes for our staff and patients can be quite challenging. Several locations around Port Angeles were considered prior to the selection. We work collaboratively with the community we serve to support neighborhood safety initiatives. The Clinic building was previously vacant. The property has been renovated to create a professional, welcoming, safe medical office.
