EMERGENCY RULE

Under RCW 34.05.350 the agency for good cause finds:

- That immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.
- That state or federal law or federal rule or a federal deadline for state receipt of federal funds requires immediate adoption of a rule.

Reasons for this finding: In response to COVID-19, screening for the disease is essential in dental practice. Dentistry produces large amounts of aerosols and it is important for dentists to appropriately screen patients prior to dental treatment. Delegation of COVID-19 screening test of patients assists dentists by reducing their workload to effectively continue dental care to patients. Knowing whether a patient is positive for COVID-19 will assist dentists in appropriate oral health treatment planning for the patient.

Screening needs to be conducted now, as we are in the middle of a pandemic. Standard rulemaking takes approximately nine to 12 months. The rule is necessary for the preservation of public health, safety, and general welfare of dental patients and staff. Observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to protecting immediate public interests.

As dental procedures are proceeding during this pandemic, there is an influx of patients needing dental care and a greater need of the dental workforce. Allowing dentists to delegate COVID-19 screening tests with supervision to appropriately credentialed dental staff, will allow dentists to provide safe dental care to more patients.
