

WHAT'S THE VALUE OF WATER?

Learn how water works for you. Visit TheValueofWater.org.

SPLASHING AROUND A POOL, TOSSING A WATER BALLOON, A COOL SHOWER ON A HOT DAY— WATER IS ONE OF LIFE'S GREAT PLEASURES.

Most of us never think about how water gets to us or where it goes when it swirls down the drain. You don't have to, because we do. We run the treatment plants, pumps, and pipes that deliver clean water and safely carry away used water. But those systems are aging. Many parts need to be fixed, upgraded or replaced to continue providing life's most essential resource. System failure is not an option. We need water to grow food, run factories, and just about everything else – including have fun at the pool.

Your water and wastewater bills pay for investments that guarantee clean, safe water is available where and when you want it. All day, every day.

Water—Essential. Reliable. Invaluable.
