

# Annas Bay

## Annual Shellfish Growing Area Review

Prepared By: Trevor Swanson

Area: Annas Bay

Year Ending: December 31, 2021

Classification: Approved, Conditionally Approved, Restricted

### Activities in the Growing Area in 2021

The growing area was sampled 11 times in accordance with National Shellfish Sanitation Program (NSSP) Systematic Random Sampling (SRS) criteria. Seven sampling events occurred during Open status. The Conditionally Approved portion of the growing area was closed 6 times for 117 days due to Skokomish River flooding. The Hood Canal Marina area was closed May 1 through November 30 based on boat moorage. The Department added station 323 in July 2021 due to a request by the Skokomish Tribe, and has sampled it five times.

The Department changed the classification of 176 acres around stations 198 and 314 to Prohibited in August 2021 due to poor water quality. Two months later, the Department changed the classification of this area to Restricted to allow for future relay activities. Two relays are approved from the Conditionally Approved area to the Approved portions of the Hood Canal 5 and 9 shellfish growing areas.

The Annas Bay Shellfish Protection District (now the Mason Clean Water District) continued to implement the 2018 closure response plan. The Hood Canal Regional PIC workgroup continued to meet.

### Analytical Results of Water Samples

Table 1 summarizes the most recent 30 samples collected from each of the sampling stations. It includes 10 samples collected when the Conditionally Approved area was closed to harvest. Table 2 shows the Conditionally Approved stations during Open status (based on the Skokomish River condition). After removing Closed status data, Station 195 fails NSSP standards with an estimated 90<sup>th</sup> percentile of 43.9 FC/100 mL. Station 197 is categorized as Threatened with an estimated 90<sup>th</sup> percentile of 36.0 FC/100 mL and Station 300 has a Concerned status. Table 3 shows individual, open period results for stations 195 and 197.

### Change in Actual Pollution Sources that Impact the Growing Area

We currently have no information indicating the area has any new sources of pollution.

### Classification Status

- Well within the classification standards
- Meets standards, but some concerns
- Meets standards, but threatened with downgrade in classification
- Fails to meet current classification standards

### Remarks and Recommendations

Station 195 fails the NSSP standards for a Conditionally Approved classification. The Department should evaluate the classification of this station. The Department should continue to work with Mason County, the Skokomish Tribe, and others to identify and correct sources of pollution in the Annas Bay watershed.

## Management Plan Evaluation

1. Have all parties involved complied with the conditions of the management plan .....Yes
2. Has reporting been adequate to manage the conditional area.....Yes
3. Does the area consistently meet approved area criteria when it is open for harvest ..... Yes
4. Has a field inspection of critical pollution sources been conducted ..... Yes

**TABLE 1. Summary of Marine Water Data (SRS) for the Annas Bay Growing Area**

Sampling Event Type: Regulatory

Maximum Number of Samples: 30

Tides Included: All

Station Number	Classification	Date Range	Range (FC/100mL)	Geomean (FC/100mL)	Est. 90 <sup>th</sup> Percentile (FC/100mL)	Meets Standard
201	Approved	6/12/2019 - 11/29/2021	1.7 - 33.0	2.4	6.4	Y
202	Approved	6/12/2019 - 11/29/2021	1.7 - 17.0	2.3	4.8	Y
203	Approved	6/12/2019 - 11/29/2021	1.7 - 70.0	2.6	8.7	Y
204	Approved	6/12/2019 - 11/29/2021	1.7 - 13.0	2.3	4.4	Y
195	Conditionally Approved	6/12/2019 - 11/29/2021	1.7 - 170.0	9.8	60.6	N
196	Conditionally Approved	6/12/2019 - 11/29/2021	1.7 - 170.0	3.5	14.9	Y
197	Conditionally Approved	6/12/2019 - 11/29/2021	1.7 - 350.0	7.9	44.0	N
199	Conditionally Approved	6/12/2019 - 11/29/2021	1.7 - 110.0	3.0	12.4	Y
200	Conditionally Approved	6/12/2019 - 11/29/2021	1.7 - 170.0	2.9	10.4	Y
206	Conditionally Approved	6/12/2019 - 11/29/2021	1.7 - 130.0	4.0	19.2	Y
299	Conditionally Approved	6/12/2019 - 11/29/2021	1.7 - 350.0	4.3	23.5	Y
300	Conditionally Approved	6/12/2019 - 11/29/2021	1.7 - 240.0	5.1	29.9	Y
323	Conditionally Approved	7/29/2021 - 11/29/2021	1.7 - 13.0	2.6	8.3	*N/A
198	Restricted	6/12/2019 - 11/29/2021	1.7 - 350.0	11.8	75.9	N
314	Restricted	6/12/2019 - 11/29/2021	1.7 - 130.0	10.5	48.1	N

The standard for approved shellfish growing waters is fecal coliform geometric mean not greater than 14 organisms/ 100 mL with an estimated 90th percentile not greater than 43 organisms/ 100 mL. The above table shows bacteriological results in relation to program standards.

\* N/A – SRS criteria require a minimum of 30 samples from each station.
