To Whom it May Concern,

Attached is the antibiogram data for all microbiology testing performed in 2021 by Labcorp Kennewick (Formerly Tri-Cities Laboratory). From this point forward the antibiograms will no longer be separated based on patient location, but will be an all-inclusive antibiogram which contains the data from all patient locations. This will provide a better representation of antibiotic reactions in our local population.

For any questions or additional information please feel free to contact Jordon Hawkins in the information below.

Thank you,
