INTRODUCTION

This report contains a summary presentation in tabular form of the vital events which occurred during the year 1970.

In the interest of easy comparison, the same format of tabular presentation has been continued herein as was used in the 1968-1969 summary. Counties (and Cities over 10,000 population) are grouped within the 13 standard districts established by Executive Order on August 6, 1969.

Census data are those resulting from the 1970 decennial census. Cities reaching the 10,000 population category for the first time in 1970 will not be listed until the 1972 summary owing to the time lag in identifying adjacent residential areas for data compilation.

General Population

The 1970 decennial census showed a count of 3,409,169 persons in the State of Washington. This count is an increase of 19.3 percent from the 1960 census, only seven-tenths of one percent less than the 1950-1960 increase. The steady upward trend of population in the last 20 years is the result of a significant immigration as well as natural increase in spite of a fluctuating birth rate and an economic recession in the State.

Natality

The number of resident births in Washington increased in 1970, bringing the birth rate up to 17.7 per 1000 population, a slow but steady increase in the rate from the 16.6 per 1000 population at the nadir in 1966. Island County retained its lead among Washington Counties with a rate of 24.2 livebirths per 1000 population, probably because of the high proportion of young families in the County due to permanent naval installations and a relatively small total population. Columbia County had the lowest birth-rate with 8.8 per thousand.

Over 9.2 percent of Washington livebirths were illegitimate in 1970, and 27.7 percent of all births to mothers in the 15-19 year age group were likewise illegitimate. The over-all percentage of illegitimacies rose over three tenths of one percent, while the percentage increase in illegitimate births for the 15-19 year age mother was up 3.4 percent from 1969.

Mortality

The resident death rate in Washington, while relatively stable for the last few years, decreased from 9.1 to 8.8 deaths per thousand population. This decrease is mostly attributable to the absence of a flu epidemic during the year, which reduced the influenza-pneumonia deaths and resulted in a significant decrease in deaths attributed to heart disease. This year Ferry County had the lowest death rate at 5.7 and Columbia County the highest rate at 16.9 per 1000 population. Male

deaths were in a ratio of 137 to 100 female deaths in 1970, with the highest ratio, 137.9, in the 15-24 year age group.

The five leading causes of death in Washington remain the same, i.e., diseases of the heart, cancer, cerebrovascular disease, all accidents, and influenza and pneumonia. The death rate for influenza and pneumonia dropped from 35.0 per 1000 population in 1969 to 24.0 for 1970. The effect of this decline is reflected in the drop in death rate for heart disease from 345.9 per thousand population in 1969 to 329.1 in 1970. Heart disease still accounted for 37.5 percent of all Washington deaths for 1970, followed by 17.6 percent for cancer and 11.4 percent for cerebrovascular disease. The fourth and fifth ranking death causes trailed well behind percentagewise, with all accidents accounting for 6.6 percent of the total and 2.8 percent for influenza and pneumonia.

Homicide deaths continued to increase--160 in 1970 compared with 131 in 1969, with the rate increasing from 3.9 to 4.6 per hundred thousand population. The 511 Washington resident suicides in 1970 brought the rate up to 14.8 from 1969's 13.8 per hundred thousand population.

There was no change in the infant death (infants dying before their first birthday) rate for 1970, the 1135 deaths being 18.8 per thousand livebirths. Over sixty-six percent of these deaths occurred during the first week after birth.

Marriage and Divorce

A total of 41,310 marriage records were recorded during 1970, 78 percent of which were for marriages between Washington residents. Clark and Skamania Counties remained the leaders in marriages between out-of-State residents and in Civil ceremonies, no doubt because of the convenient proximity of these Counties to populous areas in Oregon, across the Columbia River.

There were 17,708 divorces granted in Washington in 1970, an increase of 6.8 percent over 1969. The most common grounds cited in these actions were cruel treatment, appearing in 92.4 percent of the cases. Of all of the divorces, children were involved in 60.6 percent of the actions, while 32.1 percent claimed no children and in 7.3 percent of the cases the presence of children was not stated.
