

## Cobalt 1.10 Release Notes

### WDRS Cobalt 1.10 Release, Wednesday, January 29th, 2020

<b>General Communicable Disease</b>	Answer choices edited for clarity to ensure data integrity
	Question edited for clarity to ensure data integrity
	Question has been added to the GCD wizard
	The test type and result choices for candida lab tests have been corrected
	The Highly Antibiotic Resistant Organism wizard is now available within WDRS, and matches the paper investigation form posted on the DOH Notifiable Conditions webpage. The form and wizard have been updated to match the recent CDC changes.
	The GCD DOH investigator roles has been updated to remove the capability for hard deleting cases in WDRS
	A new report for DOH GCD investigators provides a list of events and their case status and case classification.
	The result choices for Mumps PCR have been corrected
Questions added for n-CoV outbreak - these questions will only show up for events linked to n-CoV outbreak events	
<b>Tuberculosis</b>	Label change of fields used in the advanced search of state numbers.
	DOH OCDE has been added as an override accountable county option for TB cases.
	Added a DOH-specific workflow for events needing a transfer number.
	The "Transfer state case number" field has been standardized

<b>TB cont.</b>	6 DOH workflows have been corrected to include open, closed and deleted events.
	CDC message updates
	Non-relevant questions have been removed from TB infection and TB contact events
	Instructional text has been added/edited for several questions in the TB model
	Instructional text has been added/edited for several questions in the TB model
	Specimen type selections have been edited for TB on lab results
	Date fields have been added to track follow-up imaging data
	Fixed workflow: TB Infection events that have not completed treatment >9 months [LHJ]
	Added LHJ access to access to events in which their LHJ is the Accountable county at time case counted
	Updated PHSKC reports to exclude deleted events
	Add an accountable county parameter to the report: TB Unspecified Events by Investigation Create Date.
	Edited title and description of TB Case Data By County_fnl_v1 report. New name is 'TB Case Data By County'
	Add new reference code "NTM DST" to WDRS Test Performed.
	Added 'Was the Patient Treated as an MDR TB Case (Regardless of DST Results)?' to all 'TB Model Data for Analysis' reports
Renamed column outputs in 'TB Case Data By County' and 'TB Model Data for Analysis' reports.
