

To see and value every person
who comes through our doors.

Patients of Peninsula Community Health Services (PCHS) come from all walks of life. Our medical and dental services are available to PCHS patients regardless of ability to pay.

PCHS accepts new patients and accepts all insurance plans. We have a sliding fee discount program for private-pay patients.

Our mission is to provide accessible, affordable, compassionate, quality health care services for our communities.

We provide the community with skilled health care professionals who work together for the betterment of our patients' overall health. PCHS is a certified Patient Centered Medical Home and an accredited federally qualified community health center.

PCHS is a nonprofit 501(c)3 organization.

Medical

Peninsula Community Health Services (PCHS) provides services provided to all ages with a patient centered approach to medical care.

Our collaborative approach to health care means we are able to consult with fellow professionals on patient medical needs and refer to specialists in house. We focus on preventing chronic disease and improving patients' quality of life.

We offer:

- 24 hour on-call care
- Routine physicals, immunizations, and flu shots
- Minor surgery
- Newborn and well child care
- Breast, cervical, colon health care
- Family planning and pregnancy testing
- Chronic disease care
- Diabetic eye exams
- Cancer screening
- Behavioral health care services
- Health education and information
- Insurance eligibility and enrollment

Dental

A healthy smile is a key to preventive health.

We provide dental services for children and adults, and we specialize in infant and child dental care. Together we can build a foundation for a healthy smile for children through adulthood. We accept most dental insurance plans, including Apple Health/Medicaid for adults. We also offer emergency services to uninsured adults.

We offer:

- Preventive care
- Oral examinations
- Restorative treatment
- Cleanings
- Digital imaging
- Emergency care
- Referrals for specialty care
- Dental education and information

Behavioral Health

We provide behavioral health services as an additional support for our patients. By focusing on a patient's behavioral health when necessary, we are able to cover the whole health of the patient. Our caring primary care providers and our licensed, certified counselors work together to provide supportive counseling services.

We offer:

- Care coordination with primary care providers
- Depression counseling
- Anxiety counseling
- Trauma counseling
- Tobacco cessation, weight management, diabetes management, and sobriety support
- Medication-assisted treatment

Pharmacy

We are dedicated to helping our patients access affordable pharmacy services through the federal government's 340B program for low-cost prescriptions. We provide easy onsite accessibility. The close interaction between the pharmacist and primary care medical and/or dental practitioner means that each prescription gets a thorough check for drug and disease interactions.

The PCHS Pharmacy staff is available to educate patients on:

- Diabetic self-management
- Anti-coagulation management
- Tobacco cessation
- Asthma teaching
- Hypertension management
