

VACCINE ADVISORY COMMITTEE
SCHOOL MODULE & SCHOOL DATA

July 18, 2019

WA Immunization Information System School Module

The School Module is a portal to the Washington Immunization Information System (IIS) that allows schools to track and manage student immunization information at the school level

School Module Rollout

Who is using the School Module?

- 38 public school districts
- 15 private schools
- 2 charter schools
- 4 ECEAP/Head Starts
- 15 are in progress
- 57 have expressed interest

**About 145,740 students
or**

**12.8% of students in
Washington**

What We Are Excited About

- Gold Standard for school data reporting
- Data being used to assess and evaluate
- Increased data in IIS, Immunization dates entered by school nurses:
 - 2016-2017 school year: 21,920
 - 2017-2018 school year: 33,536
 - 2018-2019 school year: 61,531
 - Total since the roll-out began: 116,987

Benefits for Schools Using the School Module

- Access to the IIS that contains millions of immunization records
- Reduces immunization duplicate data entry into a school's student information system
- Saves money and staff time
- Reports and parent letters and identify students at risk
- Eliminates the need to submit the required annual immunization report
- Adds missing immunizations records to the IIS
- Creates a lifetime immunization record
- **Reduces the number of unnecessary immunizations**
- **Supports healthy, well-immunized students**

Healthcare Providers & the School Module

The more complete the data is, the easier providers, schools and parents can determine immunization compliance

Healthcare providers can help:

- Enter missing historical immunizations
- Provide medically verified records to schools and parents or enter these missing immunizations in the IIS for your patients

Washington State Immunization Information System (IIS) School Module

The School Module is a feature of the Washington State Immunization Information System (IIS), an online registry of immunization records for people of all ages in Washington State. The School Module is a free, secure, and easy-to-use web-based tool that allows users to track and manage student and school-level immunization information.

With the School Module, schools can access existing immunization records in the IIS entered by healthcare providers, providing them with information they need to conduct important immunization work. The goal of this system is to improve compliance rates with immunization requirements and to support healthy, well-vaccinated students.

The Department of Health is currently rolling out the School Module to schools across Washington State. If you are interested in getting access or have a question about the School Module, please contact us by email at schoolmodule@doh.wa.gov.
