

## Pediatric - Transforming Clinical Practice Initiative (P-TCPi) Regional Care Coordination Project

**What is the Initiative?** The Washington State Department of Health (DOH) was awarded \$16.3 million dollars over a four year period via a Centers for Medicare and Medicaid Services (CMS) Innovation grant to implement the P-TCPi. The Washington Chapter of the American Academy of Pediatrics and Molina Healthcare join DOH to support pediatric primary care, specialty care and behavioral health providers who serve children in transforming to a person/family centered and value based payment model of care. The aim is to improve health outcomes for Washington's children and reduce costs. P-TCPi activities are conducted through multiple teams at the state and regional levels.<sup>1</sup>

**What is the purpose of the Regional Care Coordination Project (RCCP)?** The purpose of the RCCP is to enhance and mobilize the Medical Home Neighborhood model of care for the whole child and family in pediatric practice transformation and to support a system of care coordination that strengthens linkages between pediatric providers and improves health outcomes for children on Medicaid.

### How will this work be implemented?

The work will be implemented through a statewide network of Regional Care Facilitators (RCF), one in each of the Accountable Communities of Health (ACH) and housed within the local health department.

### Regional Care Coordination Project Activities will include:

- **Joining the Regional P-TCPi ACH Team** to bring the needs and strengths of the P-TCPi practices and communities to the attention of the ACH.
- **Partnering with the P-TCPi Regional Practice Facilitator** to uncover the front-line concerns of pediatric practices, successes, and perspectives of both primary care providers and behavioral health professionals within the TCPi practices and identify local resources to build the Medical Home Neighborhood.
- **Participating in Regional Asset Mapping** to look at community resources and gaps as a whole.
- **Creating a Network of Coordinators** by developing relationships with local care coordinators who serve children to stay abreast of issues and resources to bridge gaps and minimize duplication of effort across the region.<sup>4</sup>
- **Promoting and Supporting Systems Integration** by enhancing and coordinating behavioral health integration efforts by other P-TCPi team members.
- **Collaborating with Medicaid Managed Care Organizations (MCOs)** to support care coordination and access to MCO resources.

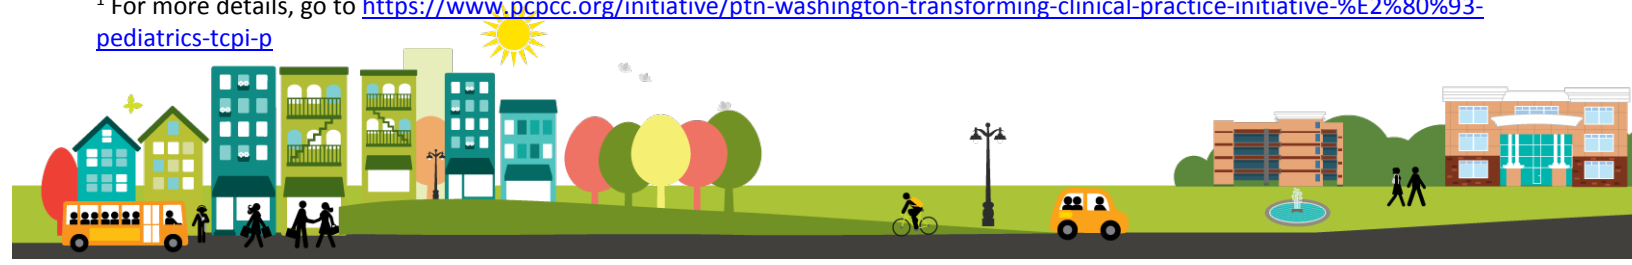

### P-TCPi Fast Facts

Project period: September 30, 2015 through April 30, 2019.

#### Aims:

- Transform care delivery system with 2000 pediatric primary/behavioral health clinicians
- Increase access to behavioral health services for children
- Improve health outcomes for children on Medicaid
