

Hepatitis A Outbreak

What is hepatitis A and who's at risk?

Hepatitis A is a liver infection caused by the hepatitis A virus. It is very contagious.

People who use or inject drugs are at risk of getting hepatitis A. The virus is spreading from person to person and causing outbreaks around the country.

If you use or inject drugs, protect yourself and others from hepatitis A

Get vaccinated
The vaccine is safe and effective.

Wash your hands

If you have symptoms, see a health professional as soon as possible

-  Yellow skin or eyes
