

Introduction:

The Washington State Department of Health EMS and Trauma Section, in consultation with the state EMS Education and Training Program Director Workgroup, has updated the guidance and EMR course schedule for refresher courses to reflect current Washington State and NREMT recertification standards. This document will replace previously used EMR refresher documents approved in Washington State. Direct questions to HSQA.EMS@doh.wa.gov or 360-236-2842.

Guidance:

- This 16-hour EMR refresher course will meet hours of the education requirements for Washington State continuing medical education (CME) recertification requirements [WAC 246-976-162](#) for EMRs who do not meet ongoing training and evaluation program (OTEP) requirements listed in [WAC 246-976-163](#).
- This 16-hour refresher course will meet the national and state content education requirements for [National Registry of Emergency Medical Technicians \(NREMT\) recertification](#) via the National Continued Competency Program (NCCP) model (it does include four required individual NCCP content hours).
- This 16-hour refresher course will meet the education requirements for state-approved refresher courses required for [lapsed NREMT certifications](#).
- When using this template for EMRs who need retraining based on [WAC 246-976-141](#), state and local content hours may be modified to meet the hourly requirement listed in WAC.
- Local and state content should be taken from the current [National Model EMS Clinical Guidelines](#), [National EMS Education Standards](#), [NREMT NCCP EMR Training Guide](#), [Washington State Approved Procedures and Skills for Certified EMS Providers](#), nationally recognized training programs, and local state and medical program director-approved protocols.
- All skills must be performed in person and evaluated by a state-approved EMS evaluator.
- Pediatric topics are to be included in airway-respiratory-ventilation, cardiovascular, medical-pharmacology, trauma, and operations topics.
- Education can be gathered through Distributive Education (online) or in-person courses. There are no limits on how much Distributive Education (DE) is utilized.
- Distributive education is defined as instruction where students and instructor do not interact in real time.
- If this course is taken for part of the education requirements for Washington EMT recertification per WAC 246-976-162, CME method, providers will still need to pass the Washington cognitive assessment examination through NREMT/Pearson Vue.
- This document will be updated at a minimum of every four years and as needed to align with the NREMT NCCP training guide, or as needed to align with other national or Washington State requirements.

- Washington State Department of Health in conjunction with state MPDs determined state and local content topics.
 - Guidance on these topics should be taken from the Washington State Department of Health Guideline for State and Local Topic Areas for NREMT NCCP Recertification (DOH 530-206 June 2024).
 - The document is [here](#) on the DOH website.
 - State and local content includes four hours of education; NREMT allows all those hours to be distributive.
-
- Individual content of four hours is required for NREMT recertification. Because of the content and length of this course, individual content hours are to be included. All hours may be distributive.
