Hospital Reproductive Health Services

Hospital name: MultiCare Yakima Memorial Hospital

Additional comments; limitations on services; other services (*continued*)

Most vasectomies are performed in an outpatient clinic setting operated by MultiCare Yakima Memorial Hospital (MYMH). A vasectomy can be performed at MYMH if in conjunction with another treatment.

Surgical abortions performed at MYMH usually involve some form of congenital abnormality or maternal complication to the mother.

Some of the services listed on this form are most appropriately and commonly provided outside an acute care hospital setting. Some services are marked because they may be available under very specific patient circumstances. Please contact the hospital with specific questions - we are here to help.
